Legislative branch: Acquisition of property, construction and equipment, additional House Office Building.	12	Unused portion of permanent or multiyear authorizations granted to enable completion of long-term projects. No new contract authority requested in 1958. Appropriation to liquidate requested in 1958.
Housing and Home Finance Agency: Capital grants for slum clearance and urban renewal.	295	Unused portion of permanent or multiyear authorizations granted to enable completion of long-term projects. No new contract authority requested in 1958.

Analysis of certain large unobligated balances in the 1958 budget document—Continued

[In millions]

Description	June 30, 1958	Remarks
BALANCES OF CONTRACT AUTHORIZATIONS—continued		
Department of Commerce: Grants-in-aid for airports	23	Unused portion of permanent or multiyear authorizations granted to enable completion of long-term projects. New contract authority granted in Federal Airport Act (Public Law 211, Aug. 3, 1955) through 1959. Appropriation to liquidate requested in 1958.
Forest highways	22	Unused portion of permanent or multiyear authorizations granted to enable completion of long-term projects. Multiyear authority granted in Federal-Aid Highway Act of 1956 for construction and maintenance at roads in or near national forests. Appropriation to liquidate requested in 1958.
Department of the Interior: Road construction and maintenance, Bureau of Indian Affairs.	12	Unused portion of permanent or multiyear authorizations granted to enable completion of long-term projects. Multiyear contract authority granted in Federal-Aid Highway Act of 1956 for construction and improvement of roads in Indian reservations. Appropriation to liquidate requested in 1958.
Construction (liquidation of contract authorization), National Park Service.	32	Unused portion of permanent or multiyear authorizations granted to enable completion of long-term projects. Multiyear contract authority granted in Federal-Aid Highway Act of 1956 for construction and improvement of roads in national parks.
Contract authorizations proposed for later transmission: Housing and Home Finance Agency: Capital grants for slum clearance and urban renewal.	250	Unused portion of permanent or multiyear authorizations granted to enable completion of long-term projects. New contract authority requested to permit orderly progress in program of fund reservations for local urban renewal projects.
Other	13	
Total, balances of contract authorizations	659	
BALANCES IN REVOLVING AND MANAGEMENT FUNDS		
Independent offices: Farm Credit Association: Production on Credit Association Investment fund	58	In order to assure an uninterrupted cycle of operations, revolving and management funds must maintain an unused balance minimum to their recurring requirements. No new authority requested in 1958.
Agricultural marketing revolving fund	44	
Federal Home Loan Bank Board: Federal Savings and Loan Insurance Corporation.	291	
Small Business Administration revolving fund	24	
Tennessee Valley Authority fund	35	In order to assure an uninterrupted cycle of operations, revolving and management funds must maintain an unused balance minimum to their recurring requirements. New authority requested to finance that portion of the agency's program not covered by carryover balances or receipts from operations.
Veterans' Administration: Direct loans to veterans and reserves	41	In order to assure an uninterrupted cycle of operations, revolving and management funds must maintain an unused balance minimum to their recurring requirements. No new authority requested in 1958.
Veterans' special term insurance fund	51	
Housing and Home Finance Agency: Management and liquidating functions fund	39	
Federal Housing Administration fund	555	
Department of Agriculture: Federal Crop Insurance Corporation fund	19	
Disaster loans, etc., revolving fund	59	
Department of Commerce: Vessel operations revolving fund	34	In order to assure an uninterrupted cycle of operations, revolving and management funds must maintain an unused balance minimum to their recurring requirements. No new authority requested in 1958.
Department of Defense—Military: Army industrial fund	369	
Army stock fund	585	
Marine Corps stock fund	59	
Navy industrial fund	732	
Navy management fund	10	
Navy stock fund	115	
Air Force industrial fund	106	
Air Force stock fund	256	
Department of Defense—Civil: Emergency fund, Panama Canal Company.	10	In order to assure an uninterrupted cycle of operations, revolving and management funds must maintain an unused balance minimum to their recurring requirements. Contingency fund for emergencies. No new authority requested in 1958.
Other	51	
Total, balances in revolving and management funds	3,543	
Grand total	25,439	

The VICE PRESIDENT. Is there further morning business?

CALL OF THE ROLL

Mr. JOHNSON of Texas. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Aiken	Church	Hickenlooper
Anderson	Clark	Hill
Barrett	Cooper	Holland
Beall	Cotton	Hruska
Bennett	Curtis	Humphrey
Bricker	Dirksen	Ives
Bridges	Douglas	Jackson
Bush	Dworshak	Johnson, Tex.
Butler	Eastland	Johnston, S. C.
Byrd	Ellender	Kefauver
Capehart	Ervin	Kennedy
Carlson	Flanders	Kerr
Carroll	Fulbright	Knowland
Case, N. J.	Gore	Lausche
Case, S. Dak.	Green	Long
Chavez	Hayden	Magnuson
Malone	O'Mahoney	Smith, Maine
Mansfield	Pastore	Smith, N. J.
Martin, Iowa	Purtell	Stennis
Martin, Pa.	Revercomb	Symington
McNamara	Robertson	Thurmond
Monroney	Russell	Thye
Morse	Saltonstall	Wiley
Morton	Schoeppel	Williams
Mundt	Scott	Yarborough
Neuberger	Smathers	Young

Mr. MANSFIELD. I announce that the Senator from Nevada [Mr. BIBLE], the Senator from Delaware [Mr. FREAR], the Senator from Missouri [Mr. HENNINGS], the Senator from Arkansas [Mr. MCCLELLAN], the Senator from Montana [Mr. MURRAY], the Senator from West Virginia [Mr. NEELY], and the Senator from Alabama [Mr. SPARKMAN] are absent on official business.

The Senator from Georgia [Mr. TALMADGE] is absent by leave of the Senate attending the Inter-American Trade Conference in Rio de Janeiro, Brazil, as a representative of the Senate Agriculture Committee.

Mr. DIRKSEN. I announce that the Senator from Colorado [Mr. ALLOTT] is absent on official business.

The Senator from Arizona [Mr. GOLDWATER], the Senator from New York [Mr. JAVITS], the Senator from California [Mr. KUCHEL], the Senator from Michigan [Mr. POTTER], and the Senator from Utah [Mr. WATKINS] are necessarily absent.

The Senator from Indiana [Mr. JENNER], the Senator from North Dakota [Mr. LANGER], and the Senator from Maine [Mr. PAYNE] are absent because of illness.

The PRESIDING OFFICER (Mr. SCOTT in the chair). A quorum is present.

PROPOSED ANTARCTIC COMMISSION

Mr. WILEY. Mr. President, I am pleased to confirm a statement I have heretofore made regarding a proposal

which I have already discussed with a good many of my colleagues.

It is my intention late next week to introduce a bill to establish an Antarctic Commission.

This bill for the first time will establish a coordinated American policy and program to assure fullest protection of the national interests of the United States in the Antarctic.

Such an Antarctic Commission represents the great dream of one of America's finest servants who has now unfortunately passed on—the late Rear Adm. Richard E. Byrd. Admiral Byrd had worked on the plans for this proposed legislation for a long period of time. He realized, as did many of the coworkers, that America's experience with the Antarctic has been fragmentary, irregular, uncoordinated, and haphazard.

America's explorers in the Antarctic have performed magnificently, as they are now performing. But we as a nation have lacked an effective follow through.

We have allowed Antarctic responsibilities to be splintered among various Federal agencies, none of whom has ever come up with a systematic program to protect the interests of our flag in that region.

So I desire today to issue a warm invitation to my colleagues, with many of whom I have communicated by letter and in person, that they join with me in cosponsoring the bill I propose to introduce. It will be known, appropriately enough, as the Byrd Antarctic Commission bill.

At the time I introduce this bill I will present the full story of the case for it.

For the present, however, as a ready reference to my colleagues, I ask unanimous consent that a very brief memorandum on this subject be printed at this point in the body of the CONGRESSIONAL RECORD.

I may say that any of my colleagues who wish to analyze this proposed bill in detail are warmly invited to communicate with my office so that the draft copy can be made available to them.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

WHY THE BILL FOR THE BYRD ANTARCTIC COMMISSION IS ESSENTIAL

This new body, to be known as the Byrd Antarctic Commission, will, for the first time, assure that the United States protects its long-range strategic interests in the Antarctic—military, territorial, commercial aviation, scientific, and mineralogical.

The Commission will assure an end to the appalling waste which has occurred, because our Government has failed to compile and utilize even a fraction of the mountains of findings of the various past expeditions.

The Byrd expeditions of 1928–30, 1933–35, 1939–41, and 1947–48 were magnificent feats.

But never have we, as a nation, had effective followthrough. We have not had the coordination of all the many Federal agencies' interests which, Admiral Byrd and other pioneers always felt, was desperately needed. Ours has been an on-again, off-again national interest—in spurts. It has not been a steady, consistent, evolving national program, designed to make sure that America capitalized fully on the Antarctic.

Now, the Russian threat, and other nations' extensive territorial claims there, make it imperative that we get on the beam and stay on the beam permanently.

Post-IGY: The International Geophysical Year, to which we are now contributing, ends in December 1958. After that, we should not simply "close up shop" in the Antarctic, i. e., close up our bases and go home. Instead, we should keep many of the bases open—which would be at comparatively minor cost—and then follow through on our own intensive United States program there.

Organization: And so, the proposed bill would establish the Byrd Antarctic Commission in the executive branch. The Commission would be an independent agency. It would have a 12-man expert advisory council, a Director and Deputy Directors, all of whom would be appointed by the President, with the advice and consent of the Senate. There would be a small administrative staff, as well.

Purposes: The purpose of the Commission would be to collect and coordinate all of the elements of America's Antarctic program (which are now scattered among Federal agencies and private groups). It would bring together under one roof the tremendous historical, documentary files relating to past United States Antarctic expeditions. It would supervise the preparation of scientific and historical publications and maps, cataloging, and preserving of Antarctic scientific photos, and other documents.

Funds: It is expected that the appropriations necessary for the initial operation of the Commission and for each fiscal year thereafter would approximate $500,000. This would not, however, include the operation of any stations in Antarctica, if such were to be operated by the Commission.

The Commission would not interfere with the normal prerogatives and responsibilities of the Cabinet Departments like State, Commerce, Interior, Defense—all of whom have important obligations in this area.

THE FEDERAL BUDGET

Mr. WILEY. Mr. President, on several occasions I have commented on the Federal budget issue.

I should like to add a few observations today.

The President should continue to act as the liberal leader of the Nation and should not be deterred by "scare propaganda" seeking to reduce the budget. Extreme conservatives will not bolt the Republican Party.

It is clear that every thinking American would like to see any possible waste or extravagance in the budget eliminated. Every thinking American would like to see the way paved for sound tax reform and tax reduction at the earliest possible date.

But in my judgment, the so-called budget-economy issue has become the subject of more scare propaganda, more false alarms than any issue within recent memory.

Some of the propaganda from extreme conservative sources which has poured into the Congress would lead us to believe that "if Congress does not slash 3, 4, or 5 billion dollars from the budget, then the country is going to ruin." Such a scare is utter nonsense.

The United States Chamber of Commerce which, on many occasions, has rendered great service to the Nation, has unfortunately chosen to whip up much of this extreme scare propaganda.

In my judgment, the propaganda is a complete exaggeration, and the country should see right through it.

NOT ONE-TENTH OF 1 PERCENT OF WISCONSIN HAS URGED BUDGET SLASH

The so-called deluge of economy mail, which is supposed to have descended on the Congress, does not actually add up to representing more than the tiniest fraction of the total adult population of the United States.

The "economy" mail has admittedly been sizable, and I, for one, welcome civic-minded mail on the budget or any other issue. But it has not come from as much as one-tenth of 1 percent of the adult population of my State, for example.

The whole intent of the scare propaganda has been to try to force the Congress into ruthless, blind slashes of the budget—the domestic budget and the mutual-security budget.

The scare propaganda has been designed, as well, to try to force the President far to the right and to have him hack away at his own budget, irrespective of consequences to the Nation.

I am pleased, however, that the President has twice gone to the Nation through radio and television, to demonstrate that he is not misled by the scare propaganda and that he is not retreating.

He should not in the slightest be deterred by the empty threats of any extreme conservatives "to bolt" the Republican Party. All sorts of reports have been made to the effect that "the Republicans" are allegedly "bitterly disappointed" with Ike, because of the high budget.

These reports are so much eyewash, in that they do not actually speak for the mass of the Republican Party. Of course, a small fraction of the Republican Party—men of great wealth—might like to see the President slash the budget to pieces. But that does not mean that it is "the Republican Party" which wants the budget cut to pieces.

So far as the extreme conservatives in the Republican Party are concerned, the fact is they have no place to go but the Republican Party. They cannot go to the Democratic Party. From 1933 on, through almost uninterrupted years of deficit financing the Democratic Party showed not the slightest interest in the size of the Federal budget. All of a sudden, this year, when the budget is to be balanced, our Democratic friends "discovered" the budget as a so-called "issue."

THIRD PARTY OF THE RIGHT IS A FINANCIAL "RATHOLE PROJECT"

The extreme conservatives have threatened to bolt to a "Third Party." But in my judgment, the record of so-called "Third Parties of the Right" show that they are utterly ineffectual, and every thinking person recognizes them to be such.

The Third Party, of the Right, is not a threat to the Republican Party. It is little more than a financial rathole down which a few rich people may care to pour their money in a futile effort to push America into reaction and isolationism.

In my judgment, the President should not and must not move down the road to reaction. That would be the path of Republican suicide and the President knows it.

The President should keep moving instead in the direction of a liberal policy for the Nation—one which builds, one which recognizes, as his budget recognizes, the need to improve the Nation's schools, which recognizes the problems of the Nation's consumers, farmers, its old folk, its needy citizens.

HOW PRESIDENT'S SECOND TERM WILL BE JUDGED

When the history of Dwight D. Eisenhower's Second Term is written, very little space will be reserved by the historian for whether the Congress managed to cut 1 billion or 1.1 or 1.2 billion dollars from the President's budget. But the historian will report whether, during the President's second term, he met the crucial challenge of world peace, the challenge of over-crowded schools, the challenge of declining farm income.

FALSE ECONOMY ON SCHOOLS OR FOREIGN POLICY

Again, I wish to make it perfectly clear that I am just as much interested in reasonable economy, as is any other Member of the Congress.

But I do not believe in so-called economy which stuffs 60 or 70 children into many of the Nation's classrooms like "sardines." Many classrooms are firetraps. They can only be occupied by children 4 hours a day, because 60 or 70 more "sardine children" must be packed in during the next shift, 4 hours later. That is not economy, in my judgment.

So, too, I do not believe in a false economy, which would allow South Vietnam or South Korea, or Formosa, or Thailand, or any other free land to fall into the hands of Communist China.

The 85th Congress will not receive recognition and praise from history if it allows itself to become panic stricken by the scare propaganda about the budget. Rather, it will receive credit from history if it acts, with statesmanship, to meet its tremendous responsibilities at home and abroad, in this Atomic Age, while fulfilling its responsibility as a trustee of the people's savings.

Finally, I point out that if one were to believe the scare propaganda which has poured into the Congress, one would think that this Republican administration is controlled by a Socialist President with a Socialist Cabinet and Socialist agency heads, all of whom are determined to spend the people's resources like water.

Such a picture is utter nonsense. It is utterly contrary to the effort which is being made by the administration for reasonable economy.

This is a growing country, with growing needs and growing requirements. We cannot turn the clock back.

I WILL NOT BE PANICKED BY SCARE PROPAGANDA

I, for one, refuse to be panicked by the so-called deluge of budget mail. In the first place, it is not a deluge of mail. In the second place, even if it were, it has been artificially whipped up. In the third place, it does not speak for more than 5 percent of the Members of either party. In the fourth place, it is my responsibility to help keep this country at peace, and to help keep it strong. Those are my No. 1 and No. 2 responsibilities, and I refuse to be party to any "hacksaw" action which would destroy those objectives.

SUPERIOR SERVICE HONOR AWARD TO LAWRENCE A. CHATTO

Mrs. SMITH of Maine. Mr. President, on last Tuesday, May 21, at 10:30 in the morning, the Secretary of Agriculture presented the annual Superior Service Awards of the Department of Agriculture. I wish very much that I could have been there to join in the honor given to Lawrence A. Chatto of Orono, Maine, the Maine State Administrative Officer of the Agricultural Stabilization and Conservation Committee, who received one of the awards for outstanding service in the position he holds.

Unfortunately, I could not be present for at that very time I was testifying before the Senate Agriculture Committee urging the enactment of my bill, S. 1393, the National Potato Labeling bill.

Just at the same time when Lawrence Chatto was being honored for the outstanding service he had given the farmers of the State of Maine, I was continuing my efforts to be of greatest service and assistance to the potato farmers of Maine. It is unfortunate that these two events were happening at the same time, and that I was thus prevented from being in attendance at the awarding of the honor to Mr. Chatto. But it is gratifying that these two events did happen at the same time—they were both serving the best interests of the farmers of the State of Maine.

ORDER FOR ADJOURNMENT TO MONDAY

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that when the Senate concludes its business today, it stand in adjournment until Monday, at 12 o'clock noon.

The PRESIDING OFFICER. Without objection, it is so ordered.

CIVIL RIGHTS

Mr. JOHNSON of Texas. Mr. President, earlier in the day our colleague, the senior Senator from North Carolina [Mr. ERVIN], appeared at the desk of the majority leader and stated that he desired recognition for the purpose of asking the permission of the Senate to insert a brief statement in the RECORD and to include certain views he intends to file with the Judiciary Committee. He was forced to leave before he could get recognition.

Therefore, Mr. President, on behalf of the senior Senator from North Carolina, and at his request, I ask unanimous consent that he be allowed to insert the statements in the RECORD, including a statement in the nature of minority views which he will subsequently file with the Senate if and when the bill is reported.

The PRESIDING OFFICER. Is there objection? The Chair hears none.

Mr. JOHNSON of Texas. I desire to make it clear, Mr. President, that the statements will appear under the name of the senior Senator from North Carolina, since I am merely acting at his request in the matter.

Mr. ERVIN. Mr. President, the able and distinguished senior Senator from South Carolina [Mr. JOHNSTON] and I have prepared a statement of our views in respect to the civil-rights bill now pending before the Congress. Owing to the importance of the subject, I ask unanimous consent that the statement be printed at this point in the body of the RECORD as a part of my remarks.

There being no objection, the matters were ordered to be printed in the RECORD, as follows:

In urging the rejection of S. 83, we seek to preserve the American constitutional and legal systems for all Americans of all races and all generations.

Diligent efforts are made to present S. 83 in the guise of a meritorious and mild bill. S. 83 is, in truth, as drastic and indefensible a legislative proposal as was ever submitted to any legislative body in this country.

When all is said, it is not surprising that this is so. S. 83 is presented to Congress at a time when never-ending agitation on racial subjects by both designing and sincere men impairs our national sanity, and diminishes in substantial measure the capacity of our public men to see the United States steady and to see it whole.

S. 83 is based on the strange thesis that the best way to promote the civil rights of some Americans is to rob other Americans of civil rights equally as precious and to reduce the supposedly sovereign States to meaningless zeros on the Nation's map.

The only reason advanced by the proponents of S. 83 for urging its enactment is, in essence, an insulting and insupportable indictment of a whole people. They say that southern officials and southern people are generally faithless to their oaths as public officers and jurors, and for that reason can be justifiably denied the right to invoke for their protection in courts of justice constitutional and legal safeguards erected in times past by the Founding Fathers and the Congress to protect all Americans from governmental tyranny.

Congress would do well to pause and ponder this indisputable fact: The provisions of S. 83 are far broader than the reason assigned for urging its enactment. If these provisions can be used today to make legal pariahs and second-class litigants out of southerners involved in civil-rights cases, they can be used with equal facility tomorrow to reduce other Americans involved in countless other cases to the like status.

The drastic provisions of S. 83 are even more surprising than the thesis of its proponents or the reason given by them for urging its enactment. They ignore the primary lesson taught by history, that is, that no man is fit to be trusted with unlimited governmental power.

If S. 83 should be enacted by Congress and successfully run the constitutional gantlet, it would vest in a single fallible human being, namely, the temporary occupant of the office of Attorney General, regardless of his character or qualifications, autocratic and despotic powers which have no counterpart in American history and which are repugnant to the basic concepts underlying and supporting the American constitutional and legal systems.

This is true for these reasons:

1. S. 83 is deliberately designed to establish a new procedure for the enforcement or vindication of the civil rights of private persons at public expense, and to confer upon the Attorney General the despotic power to grant or withhold the supposed benefits of the new procedure at his uncontrolled discretion. In consequence, S. 83 offends the basic American concepts that ours is a government of laws rather than a government of men and that courts are created to administer equal and exact justice according to certain and uniform laws applying alike to all men in like situations.

2. S. 83 is deliberately designed to vest in the Attorney General the autocratic and despotic power to nullify State laws duly enacted by State legislatures in the undoubted exercise of the legislative power reserved to the States by the 10th amendment. As a consequence, S. 83 is wholly incompatible with the constitutional doctrine of the sovereignty and indestructibility of the States. Even apart from this consideration, S. 83 is inimical to proper Federal-State relations because it proposes to place in the hands of the Attorney General a legal club by which he can browbeat State and local officials into submission to his will and thus assume control of what are essentially State or local governmental matters.

3. S. 83 is deliberately designed to confer upon the Attorney General the autocratic and despotic power to rob State and local officials and other Americans involved in civil-rights disputes of these basic and invaluable safeguards created by the Founding Fathers and Congress to protect all Americans from bureaucratic and judicial tyranny; namely the constitutional right of indictment by grand jury, the constitutional right of trial by petit jury, the statutory right of trial by jury in indirect contempt cases, and the statutory right to the benefit of limited punishment in indirect contempt cases. S. 83 undertakes to do these things by a perversion of the powers of equity.

4. S. 83 is deliberately designed to empower the Attorney General to establish government by injunction in the place of government by law in the civil-rights field.

5. The provisions of S. 83 are so worded as to empower the Attorney General to institute and prosecute at public expense lawsuits as numberless as the sand for the avowed benefit of any alien, citizen, or private corporation within the territorial jurisdiction of any of the 48 States.

The other provisions of S. 83, which look to the creation of a Civil Rights Commission and the establishment of a Civil Rights Division in the Department of Justice, are subject to these grave objections:

S. 83 provides for the establishment of a roving Presidential Commission on Civil Rights with drastic subpena and hearing powers to wander to and fro over such portions of the face of the United States as it may select to investigate such vague matters as unwarranted economic pressures and such unlimited matters as developments constituting a denial of equal protection of the laws. The establishment of such Commission is wholly unnecessary because committees of Congress are well equipped to make such investigations as may be necessary in the premises. Furthermore, the establishment of such Commission is likely to be productive of much evil because its activities will foment controversies in racial matters and inevitably give rise to the charge that it is being used to exploit so-called minority groups for political purposes. S. 83 also provides for the establishment of a new Civil Rights Division in the Department of Justice which will necessarily have to be staffed by innumerable employees at an expense which no one can now estimate.

We will now discuss these matters in some detail.

I

S. 83 is deliberately designed to establish a new procedure for the enforcement or vindication of the civil rights of private persons at public expense, and to confer upon the Attorney General the despotic power to grant or withhold the supposed benefits of the new procedure at his uncontrolled discretion. In consequence, S. 83 offends the basic American concepts that ours is a government of laws rather than a government of men and that courts are created to administer equal and exact justice according to certain and uniform laws applying alike to all men in like situations.

Our ancestors appraised at its full value the everlasting truth embodied in Daniel Webster's assertion that "whatever government is not a government of laws is a despotism, let it be called what it may."

Consequently they based the governmental and legal systems of America upon these fundamental concepts:

1. That our Government should be a government by law and not a government by men—a government in which laws should have authority over men, not men over laws.

2. That our courts should administer equal and exact justice according to certain and uniform laws applying in like manner to all men in like situations.

Parts III and IV of S. 83 specify, in substance, that "the Attorney General may institute for the United States, or in the name of the United States but for the benefit of the real party in interest," a new civil action or proceeding to enforce or vindicate certain supposed civil rights of private citizens.

By these words, the bill proposes to do these two things: (1) To establish a new procedure for the enforcement or vindication of certain supposed civil rights of private persons at the expense of the taxpayers; and (2) to confer upon one fallible human being, namely, the temporary occupant of the office of Attorney General, whoever he may be, the despotic power to grant the benefit of the new procedure to some persons and withhold it from others.

The proposed law is not to be operative at all unless the Attorney General, acting either with or without reason, so wills. This is not government by law. It is government by the whim of the Attorney General.

It is to be noted, moreover, that the new procedure to be authorized by the bill is to be used for and against such persons only as the Attorney General may select. This being true, the bill is utterly repugnant to the fundamental concept that courts are created to administer equal and exact justice in compliance with certain and uniform laws applying in like manner to all men in like situations.

There is always danger that discretionary governmental power may permit the public officer in whom it is reposed to rule arbitrarily without the restraint of law. As a consequence, no legislative body should ever adopt any statute conferring discretionary governmental power upon any public officer unless such statute satisfied the only valid test of the advisability of legislation of this nature. The test is the evil a bad public officer may do under the proposed law rather than the good a good public officer may do under it.

S. 83 cannot satisfy this test. If it were enacted, it would vest in the temporary occupant of the office of Attorney General, regardless of his character or qualifications, absolute power to act or refrain from acting in the premises at his uncontrollable discretion. Thus the proposed law would constitute a political weapon of the first magnitude which any Attorney General, who happens to be a pragmatic politician, could pervert from its avowed purposes to curry favor with some groups or to browbeat State officials into submission to his will.

This is a despotic power which no good Attorney General ought to want and no bad Attorney General ought to have.

Americans who believe that bad laws are the worst sort of tyranny may rest their hope that the 85th Congress will reject S. 83 upon the fact that no previous Congress has ever enacted into law any legislative proposal so repugnant to the basic concepts underlying our governmental and legal systems.

In closing this phase of our report, we wish to comment briefly on the circumstance that S. 83, if enacted, would permit the Attorney General to sue for the supposed benefit of full-grown and mentally competent Americans without their consent or even against their will. If an American has any civil right which ought to be honored by all under all conditions, it is his civil right not to be embroiled in a lawsuit in the capacity of a supposed beneficiary without his consent or against his will.

II

S. 83 is deliberately designed to vest in the Attorney General the autocratic and despotic power to nullify State laws duly enacted by State legislatures in the undoubteded exercise of the legislative power reserved to the States by the 10th amendment. As a consequence, S. 83 is wholly incompatible with the constitutional doctrine of the sovereignty and indestructibility of the States. Even apart from this consideration, S. 83 is inimical to proper Federal-State relations because it proposes to place in the hands of the Attorney General a legal club by which he can browbeat State and local officials into submission to his will and thus assume control of what are essentially State or local governmental matters.

The men who composed the Constitutional Convention of 1787 comprehended in full measure the everlasting political truth that no man or set of men can be safely trusted with governmental power of an unlimited nature. In consequence, they were determined, above all things, to establish a government of laws and not of men.

To prevent the exercise of arbitrary power by the Federal Government, they inserted in the Constitution of the United States the doctrine of the separation of governmental powers.

In so doing, they utilized the doctrine of the separation of powers in a twofold way.

They delegated to the Federal Government the powers necessary to enable it to discharge its limited functions as a central government and left to the States all other powers. It was this use of the doctrine of the separation of powers which prompted Chief Justice Salmon P. Chase to make these memorable remarks in his opinion in *Texas* v. *White* (7 Wall. 700):

"Not only, therefore, can there be no loss of separate and independent autonomy to the States through their union under the Constitution, but it may be not unreasonably said that the preservation of the States, and the maintenance of their governments, are as much within the design and care of the Constitution as the preservation of the Union and the maintenance of the National Government. The Constitution, in all its provisions, looks to an indestructible Union, composed of indestructible States."

In their other utilization of the doctrine of the separation of powers, the members of the Convention of 1787 vested the power to make laws in the Congress, the power to execute laws in the President, and the power to interpret laws in the Supreme Court of the United States and such inferior courts as the Congress might establish. Moreover, they declared, in essence, that the legislative, the executive, and the judicial powers of the Federal Government should forever remain separate and distinct from each other.

Since the two Governments, Federal and State, exist within the same territorial limits, it is obviously indispensable to the proper functioning of both of them for each of them to exercise its powers in such a manner as not to interfere with the free and full exercise of the powers of the other (11 Am. Jur., Constitutional Law, sec. 174).

History makes it crystal clear that the Constitution of the United States would never have been ratified by the requisite number of States if they had not been assured that it would be so amended as to embrace the principle enunciated by the 10th amendment. This amendment declares that "the powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively or to the people."

The legislatures of the several States have adopted statutes which establish public

school systems, and confer upon the local and State school officials and school boards charged with the supervision of their operation the authority and the duty to determine by simple and inexpensive administrative procedures whether any parent, school child, or teacher is being deprived of any right secured by the constitution or laws of the State or the Constitution of the United States and to grant relief accordingly. Examples of statutes prescribing administrative remedies of this nature may be found in *Cook* v. *Davis* (178 F. (2d) 595), and *Carson* v. *Board of Education of McDowell County* (227 F. (2d) 789).

The legislatures of the several States have likewise enacted statutes which regulate the conduct of elections, prescribe the qualifications for voting, and confer upon the supervising local and State election officials and boards the authority and the duty to determine by simple and inexpensive administrative procedures whether persons applying for registration possess the qualifications for voting and whether the right of any citizen possessing the qualifications for voting is being denied or abridged contrary to the 15th and 19th amendments on account of race or sex and to grant relief accordingly.

In adopting these statutes, the several States have undoubtedly acted within the scope of the powers reserved to them by the 10th amendment. Moreover, the statutes relating to elections find additional sanction in article I, section 2, and the 17th amendment which stipulate, in effect, that persons are entitled to vote for Senators and Congressmen if they possess the qualifications prescribed by the laws of their States "for electors of the most numerous branch of the State legislatures" (*Breedlove* v. *Suttles*, 302 U. S. 277).

Statutes prescribing administrative remedies are not peculiar to the fields of education and suffrage. They are commonplace in the scores upon scores of areas in which Federal and State agencies, boards, and commissions administer governmental functions, or regulate business activities affecting the public.

It is, indeed, no exaggeration to say that statutes prescribing administrative remedies are essential to the operation of Government in this complex age. They are, moreover, a wise utilization of the truth that experience is the most efficient teacher of all things. They afford the men who are experienced in the matters administered or regulated by Federal and State agencies, boards, and commissions, opportunities to review by relatively simple and inexpensive procedures their initial actions, and to correct any error revealed by such reviews. By so doing, they reduce to a minimum the necessity for resort to vexatious litigation in the courts.

For these reasons the Supreme Court of the United States and all other judicial tribunals in this country adopt and enforce this salutary, sensible, and long-settled rule of judicial administration, namely: No one is entitled to resort to the courts for judicial relief until he has used and exhausted the prescribed administrative remedy. As this is not a legal brief, we refrain from citing the hundreds upon hundreds of Federal and State court decisions upholding this rule. We will, however, call attention to the able opinion of that great liberal jurist, Justice Louis D. Brandeis, in *Myers* v. *Bethlehem, Shipbuilding Corp.* (303 U. S. 41, 51), which cites numerous decisions of the Supreme Court of the United States in support of his observation that "the rule has been most frequently applied in equity where relief by injunction was sought." It is not strange that this should be so. The rule resembles the doctrine of equity that a litigant has no standing in equity where he has an adequate remedy at law.

An excellent exposition of the rule and of the wisdom of one of the reasons underlying it in cases involving State agencies appears in the opinion of the United States Court of Appeals for the Fourth Circuit in the recent case of *Carson* v. *Board of Education of McDowell County* (227 F. (2d) 789). It is noted in passing that the chief judge of this circuit is the Honorable John J. Parker, one of the greatest American jurists of all time.

The court of appeals made these statements in the Carson case:

"An administrative remedy is thus provided by State law for persons who feel that they have not been assigned to the schools that they are entitled to attend; and it is well settled that the courts of the United States will not grant injunctive relief until administrative remedies have been exhausted * * *. This rule is especially applicable to a case such as this where injunction is asked against State or county officers with respect to the control of schools maintained and supported by the State. The Federal courts manifestly cannot operate the schools. All that they have the power to do in the premises is to enjoin violation of constitutional rights in the operation of schools by State authorities. Where the State law provides adequate administrative procedure for the protection of such rights, the Federal courts manifestly should not interfere with the operation of the schools until such administrative procedure has been exhausted and the intervention of the Federal courts is shown to be necessary. As said by Mr. Justice Stone in *Matthews* v. *Rodgers, supra* (284 U. S. 525): 'The scrupulous regard for the rightful independence of State governments which should at all times actuate the Federal courts, and a proper reluctance to interfere by injunction with their fiscal operations, require that such relief should be denied in every case where the asserted Federal rights may be preserved without it.' Interference by injunction with the schools of a State is as grave a matter as interfering with its fiscal operations, and should not be resorted to 'where the asserted Federal right may be preserved without it.'"

The rule does not bar the right of any person to resort to the courts for judicial relief for a supposed or threatened injury. It merely postpones his power to exercise such right until he uses and exhausts the administrative remedy available to him without obtaining relief. A statement made by the Supreme Court of the United States in *United States* v. *Illinois Central Railroad Co.* (291 U. S. 457, 463, 464) is peculiarly appropriate at this point:

"The constitutional question raised by appellees, therefore, vanishes from the case, because the Commission concedes and stands ready to grant every administrative procedural right that appellees are lawfully entitled to claim. If the preliminary order be erroneous in any particular, it is susceptible of correction by the Commission upon the hearing thus provided for. It will be time enough for appellees to seek the aid of a court of equity when they shall have fully availed themselves of this administrative remedy, and the Commission shall have taken adverse action. Until then they are in no situation to invoke judicial action."

S. 83 is calculated and intended to confer upon a single Federal executive officer, to wit, the Attorney General, the autocratic and despotic power to nullify at his absolute and uncontrolled election, in particular civil-rights cases selected by him, State statutes prescribing administrative remedies which were enacted by State legislatures in the undoubted exercise of the legislative power reserved to the States by the 10th amendment.

S. 83 undertakes to do this by certain legal jargon embodied in parts III and IV. It is as follows:

"The district courts of the United States shall have jurisdiction of proceedings instituted pursuant to this section and shall exercise the same without regard to whether the party aggrieved shall have exhausted any administrative or other remedies that may be prescribed by law."

If Congress should approve this monstrous proposal it would stamp with its approval this queer legal result:

1. When the Attorney General elects to extend the benefit of the novel procedure to one citizen, he automatically nullifies State statutes prescribing administrative remedies in respect to such citizen, thereby freeing such citizen from the operation of the salutary, sensible, and long-settled rule of judicial administration that no one is entitled to judicial relief for a supposed or threatened injury until the prescribed administrative remedy is exhausted.

2. But when the Attorney General withholds the benefit of the novel procedure from another citizen, State statutes prescribing administrative remedies remain in full force, and such citizen cannot resort to the courts for judicial relief for a supposed or threatened injury until the prescribed administrative remedy is exhausted.

Inasmuch as the advocates of the proposal under consideration assure Congress that it is ideally adapted to prevent any State from denying "to any person within its jurisdiction the equal protection of the laws," the singular legal result which would flow from the enactment and operation of the proposal seems peculiarly ironic and paradoxical. This is true because the phrase, "equal protection of the laws," implies, when it is used in a procedural sense, that all persons may appeal to courts for both relief and defense under like conditions, with like protection and without discrimination (*Sexton* v. *Barry*, 233 F. (2d) 220).

Happily for America one may search the legislative annals of our country without finding anything corresponding to the monstrous proposal that a single Federal executive officer, to wit, the Attorney General, should be given the autocratic and despotic power to nullify valid State laws in particular cases to be selected by him.

It is submitted in all sincerity that the proposal is utterly repugnant to the constitutional doctrine of the indestructibility and sovereignty of the States, that Congress itself is without authority to nullify State statutes enacted by State legislatures in the undoubted exercise of the legislative powers reserved to the States by the 10th amendment, and that Congress cannot delegate to a Federal executive officer an authority not possessed by it.

It would be well for our country if those who advocate this unprecedented proposal would pause and ponder these words:

"Every journey to a forbidden end begins with the first step, and the danger of such a step by the Federal Government in the direction of taking over the powers of the States is that the end of the journey may find the States so despoiled of their powers, or—what may amount to the same thing—so relieved of the responsibilities which possession of the powers necessarily enjoins as to reduce them to little more than geographical subdivisions of the national domain. It is safe to say that if, when the Constitution was under consideration, it had been thought that any such danger lurked behind its plain words, it would never have been ratified. *Carter* v. *Carter Coal Co.* (298 U. S. 238, 295, 296)."

Even apart from such considerations as this, S. 83 cannot be reconciled with a due regard for sound Federal-State relations.

S. 83 is aimed in large measure at State and local officials, such as members of election and school boards, who render essential governmental services at State and local levels for little or no compensation out of a sense of public duty.

If S. 83 should be enacted by Congress and survive the test of constitutionality, it would

vest in the Attorney General, whoever he might be, tremendous power in the civil-rights field.

The argument that any occupant of the office of Attorney General could be safely trusted to wield this tremendous power wisely ignores the first fact of governmental life, that is, that power corrupts and tremendous power corrupts tremendously.

Federal officers have been notorious in all periods of our history for encroaching on the governmental domain of the States. Indeed, they have been justly charged on occasion with being thieves of jurisdiction.

If S. 83 should become law, it would furnish the Federal Government with ready means for usurping the functions and power of State and local governments in vital areas of our life.

By resorting to civil actions and proceedings under S. 83, the Attorney General could virtually convert Federal district courts into administrative branches of the executive department of the Federal Government for the management of elections, schools, and similar activities of a local nature.

Moreover, the notion that the occupant of the office of Attorney General could not exert the tremendous power embodied in S. 83 without first obtaining a decree from a Federal court is utter nonsense.

If the occupant of this office should happen to be a pragmatic politician, or a so-called civil-rights zealot, or a person susceptible to coercion by pressure groups, he could employ S. 83 as an intimidating club, and thereby control or demoralize State and local government in such vital areas as elections and public education.

Here is how the Attorney General could operate in a case of a State or local election or school official, who denies registration to an applicant for voting rights on the ground that he does not possess the qualifications prescribed by State law "for electors of the most numerous branch of the State legislature," or who declines a parental request for the assignment of a school child to a particular school on the ground that the requested assignment is not calculated to promote the educational interest of the child:

The Attorney General, acting through a subordinate, could politely threaten the State or local official in this wise: "If you don't register this man or assign this child to that school, I'll put the law to you in an action or proceeding under S. 83 in which all the legal and financial might of the Federal Government will be arrayed against you and in which you will be denied such basic safeguards as the right of trial by jury."

The State or local official could do 1 of 3 things. He could submit to the threat, and thus permit a Federal officer to dictate how the functions of a State or local office are to be discharged. He could relinquish his State or local office, and thus escape further harassment and hazard. And, finally, he could stand up and fight for his convictions, even to the point of defending a lawsuit in a Federal district court, which might sit in a place far removed from his home. If he should pursue the last course and win, he could conceivably bankrupt himself in defraying the cost of his successful defense. If he should pursue the last course and lose, he could conceivably wind up with a virtually unlimited fine or a virtually unlimited jail sentence simply because his convictions as to how the duties of his State or local office ought to be performed might differ from those of the Attorney General and a one-man Federal court.

Congress would commit an unspeakable folly if it should enact a bill whose provisions are susceptible to such grave abuses in the field of Federal-State relations.

III–A

The Constitution and Congress have established these basic safeguards to protect all Americans from bureaucratic and judicial tyranny: The constitutional right of indictment by grand jury; the constitutional right of trial by petit jury; the constitutional right to confront and cross-examine adverse witnesses; the statutory right of trial by jury in indirect contempt cases where the alleged contemptuous act constitutes a crime under Federal or State law; and the statutory right of the benefit of limited punishments in indirect contempt cases of the same nature.

If one is to understand the laws and institutions of today, he must know the events of yesterday which gave them birth. For this reason, we deem it necessary to consider the origins of relevant constitutional and legal safeguards.

The founders of our Government were wise men. They knew that tyranny uses the forms of law to crush those who oppose her will. They knew that the right of trial by jury is the best security of the people against governmental oppression. They knew that the surest test of the credibility of a witness is his confrontation and cross-examination by the adverse party.

They knew the history of the long struggle of the English people to secure and preserve such basic legal safeguards as the right of trial by jury and the right to confront and cross-examine adverse witnesses.

They knew the history of the repeated efforts of tyrannical kings and subservient parliaments to deprive the English people of the benefits af such legal safeguards.

They knew the history of the court of star chamber and rightly deduced from it "that the rights and liberties of the people will not long survive in any country where the administration of the law is committed exclusively to a caste endowed with boundless discretion and a long term of office, no matter how learned, able, and honest its members may be" (United States Circuit Judge Henry C. Caldwell in the American Federationist for May, 1910).

They knew the history of Chief Justice Jeffreys and his bloody assizes and rightly inferred from it that tyranny on the bench is as objectionable as tyranny on the throne.

They knew that in 1765 the British Parliament, at the instigation of King George III and his ministers, enacted the Stamp Act and other measures whereby they deprived American colonists of the right of trial by jury in cases arising under the revenue laws by a device astoundingly similar to that invoked by S. 83, namely, "by extending * * * beyond its ancient limits * * * the jurisdiction of the courts of admiralty" in which trial by jury was not available.

They knew that the Stamp Act Congress, which was attended by delegates from nine of the Thirteen Colonies, forthwith met in New York and adopted the Colonial Declaration of Rights of October 19, 1765, condemning this action of Parliament on the ground "that trial by jury is the inherent and invaluable right of every British subject in these Colonies."

They knew that in 1764 and 1768 the British Parliament, at the urging of King George III and his ministers, enacted the Sugar Act and the statute known as 8 George III, chapter 22, whereby they deprived American colonists of the right of trial by jury in cases arising under the laws relating to trade and revenue by a repetition of the device resembling that invoked by S. 83, namely, "by extending * * * beyond their ancient limits * * * the powers of the courts of admiralty" in which trial by jury was not available.

They knew that the First Continental Congress adopted the Declaration of October 14, 1774, denouncing this action of the British Parliament on the ground that American colonists were "entitled to the common law of England, and more especially to the great and inestimable privilege of being tried by their peers of the vicinage according to the course of the law."

They knew that the Declaration of Independence assigned the fact that American colonists had been deprived "in many cases of the benefits of trial by jury" as one of the "injuries and usurpations" requiring the American colonies to dissolve their political bands with England.

They knew "that tranquility was not to be always anticipated in a republic"; "that strife would rise between classes and sections, and even civil war might come"; and "that in such times judges themselves might not be safely trusted in criminal cases, especially in prosecutions for political offenses, where the whole power of the executive is arrayed against the accused party" (argument of Jeremiah S. Black in *Ex parte Milligan*, 4 Wall., 1, 64).

They knew "that what was done in the past might be attempted in the future," and "that troublous times would arise, when rulers and people would become restive under restraint, and seek by sharp and decisive methods to accomplish ends deemed just and proper; and that the principles of constitutional liberty would be in peril, unless established by irrepealable law" (opinion of the Court in *Ex parte Milligan*, 4 Wall., 1, 120).

They knew that the best part of the inheritance of America from England was the right of trial by jury both in criminal cases and in suits at common law. For these reasons, the founders of our Government enshrined these guaranties in the Constitution.

That "the trial of all crimes, except in cases of impeachment, shall be by jury." Article III, section 2.

That "no person shall be held to answer for a capital, or otherwise infamous offense, unless on a presentment or indictment of a grand jury, except in cases arising in the land or naval forces, or in the militia, when in actual service in time of war or public danger" amendment V.

That "in all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial, by an impartial jury of the State and district wherein the crime shall have been committed, * * * and to be informed of the nature and cause of the accusation; to be confronted with the witnesses against him; to have compulsory process for obtaining witnesses in his favor, and to have the assistance of counsel for his defense" amendment VI.

That "in suits at common law, where the value in controversy shall exceed $20, the right of trial by jury shall be preserved" amendment VII.

At the time of the ratification of the Constitution, courts of equity existed in the several States, either in conjunction with, or independent of, the courts of law. The basis of the jurisdiction then exercised by courts of equity, which historically function without juries, was the protection of private rights of property.

In stating that courts of equity historically function without juries, we do not overlook the circumstance that the chancellor or judge of such a court has discretionary authority to call an advisory jury to his aid. An advisory jury is not a jury, however, in the real sense of the term because the chancellor or judge is at liberty to reject its verdict and act solely on his own findings.

In some of the cases cognizable by them at the time of the ratification of the Constitution, courts of equity used restraining orders and temporary and permanent injunctions. The role of the restraining order and the temporary injunction was to preserve the status quo in respect to property in dispute until the conflicting claims to it could be determined in a trial on the merits, and the role of the permanent injunction was to secure the enjoyment of the property by the person adjudged its owner in the trial on the merits. Restraining orders and injunctions did not issue to inhibit

criminal acts except in cases where such acts threatened irreparable injury to property rights.

Courts of equity punished disobedience to restraining orders and injunctions by fines or imprisonment in proceedings for contempt conducted by chancellors or judges without juries.

It seems appropriate to note at this point changes occurring in the field of equity since the ratification of the Constitution. Since that time many States have extended the right of trial by jury to issues of fact arising in actions of an equitable nature. As this has not been done on the Federal level, actions of an equitable nature are still triable on the merits by judges without juries in district courts of the United States.

Beginning with the Interstate Commerce Commission Act of 1887, Congress has adopted 28 statutes creating new public rights and corresponding new public wrongs. The new public rights are enforcible by injunctive process as rights of the United States in its capacity as a sovereign nation in actions brought by the United States or specified Federal officials or agencies. The new public wrongs are punishable in the manner prescribed by law for other crimes. A painstaking analysis makes it obvious that each of the 28 statutes is clearly distinguishable from S. 83. In consequence, we refrain from further comment upon them.

The injunctive process is susceptible to abuse. This is particularly true when its use is extended beyond its ancient limits to the field occupied by criminal law. Some of the objections to the use of the injunctive process in this field are well stated by a legal writer in these words:

"The objections to 'criminal equity' are that it deprives defendant of his jury trial; that it deprives him of the protection of the higher burden of proof required in criminal prosecutions; that after imprisonment and fine for violation of an equity injunction, defendant may be subjected under the criminal law to punishment for the same acts; that it substitutes for the definite penalties fixed by the legislature whatever punishment for contempt a particular judge may see fit to exact; that it is often no more than an attempt to overcome by circumvention the supposed shortcomings of jurors; and that it may result, or induce the public to believe that it results, in the arbitrary exercise of power or in government by injunction" (43 C. J. S., Injunctions, sec. 150).

Happily, the use of the injunctive process was confined in large measure to "its ancient limits" during the first century of our national existence.

Unhappily, however, its susceptibility to abuse was clearly revealed at the end of that period when courts of equity, acting on the allegations of employers that such action was necessary to protect their property rights from irreparable injury, converted the extraordinary writ of injunction to ordinary and wholesale use to defeat the efforts of labor to secure fair wages and reasonable working conditions.

The most shameful story in the judicial annals of America was written during the ensuing years when courts of equity robbed labor of its right to trial by jury, its right to freedom of the press, and its right to freedom of speech by substituting government by injunction for government by law.

Space and time preclude a review of the numerous episodes in this shameful story. Consequently we must content ourselves with calling attention to only one of them—the one recorded in the case of *Gompers* v. *The United States* (233 U. S. 604).

In that case Samuel Gompers, one of the wisest and most patriotic labor leaders of America of all time, was charged with contempt of court because of his alleged disobedience to an injunction issued by a Federal court of the District of Columbia on the application of Bucks Stove & Range Co., which undertook to defeat by the injunctive process the demands of its striking employees for better working conditions.

A Federal judge sitting without a jury adjudged Gompers guilty of contempt and sentenced him to jail for disobedience of the injunction because he had truthfully stated orally and in print that no law compelled his hearers and readers to buy a stove manufactured by Bucks Stove & Range Co.

Compers managed to escape actual service of the jail sentence merely because the Supreme Court held on his appeal that the contempt proceedings had not been initiated within 3 years after the violations alleged, and in consequence the trial judge had lost his power to punish Gompers for contempt under the 3-year statute of limitations.

The abuse of the injunctive and contempt processes in industrial controversies prompted Congress to enact in 1914 as a section of the Clayton Act a statutory provision extending the right of trial by jury under certain circumstances to respondents in proceedings to punish violations of injunctions as indirect contempts of court. An indirect contempt is one committed outside the presence of the court.

This statutory provision is now embodied in somewhat altered phraseology in sections 402 and 3691 of title 18 of the United States Code.

Under these sections, a respondent, whether a natural person or a corporation, charged with an indirect contempt for violation of an injunction is entitled to a jury trial if the act charged as a violation of the injunction is also a crime under an act of Congress or the laws of the State in which it was committed. It is noted, in passing, that virtually all violations of the civil rights of others constitute crimes under both Federal and State laws.

Sections 402 and 3691 of title 18 of the United States Code confer another substantial right upon a respondent who is a natural person in case he is convicted. While they provide that he may be "punished by fine or imprisonment or both," they set definite limits to his punishment by specifying that he canont be required to pay a fine to the United States in excess of $1,000 or subjected to imprisonment for a term in excess of 6 months.

Sections 402 and 3691 of title 18 of the United States Code stipulate in express terms that their salutary provisions do not apply "to contempts committed in disobedience of any lawful writ, process, order, rule, decree, or command entered in any suit or action brought or prosecuted in the name of, or on behalf of, the United States."

Borah of Idaho, Norris of Nebraska, Walsh of Montana, and the other liberal Senators of that day favored extending the right of trial by jury to all persons charged with indirect contempts arising out of alleged violations of injunctions.

In a magnificent speech pointing out that such right was secured to the people by constitutional or statutory provisions in a number of States, Walsh declared that "the most perfect judicial systems ever known are those of which the jury forms an essential part"; that "trial by jury * * * is the greatest school in self-government ever devised by the ingenuity of man"; that "Jefferson * * * maintained all his life that cases in chancery should be tried before a jury"; that "there is not an argument that can be advanced or thought of in opposition to trial by jury in contempt cases that is not equally an argument against the jury as we now know it"; and that "instead of being an attack on the court, the proposal to submit to trial by jury alleged contempts not committed in the presence of the court is a plan to restore to the Federal courts the confidence and good will which the people ought to bear toward them, but which, unfortunately, by a liberal and sometimes inconsiderate exercise of the power to issue injunctions and to punish as for contempt, has, among certain classes of citizens, been all but forfeited."

Borah denounced with rare eloquence the provisions now embodied in sections 402 and 3691 of title 18 of the United States Code denying the right of trial by jury and the protection of limited punishment to persons charged with "contempts committed in disobedience of any lawful writ, process, order, rule, decree, or command entered in any suit or action brought or prosecuted in the name of, or on behalf of, the United States."

In offering an amendment to strike out this provision, Borah said that "the effect of this amendment is to provide for jury trial in contempt cases in actions brought by the Government the same as when actions are brought by private individuals"; that "every argument * * * in favor of the right of trial by jury upon the part of one citizen of the United States is equally applicable to the right of trial by jury upon the part of every other citizen of the United States"; that "the right of the citizen to have his guilt or innocence determined by his peers * * * cannot be changed by reason of the fact that a particular party happens to be a plaintiff in one case and another party a plaintiff in another case"; and that the provision denying persons charged with indirect contempts trial by jury in case the injunction alleged to have been violated was issued in a suit brought by the United States "offends every sense of justice * * * and every principle of free institutions and equal rights."

Reed of Missouri made these trenchant remarks in support of the Borah amendment:

"I believe that if it is right to submit questions involving the right of life to a jury it is not dangerous to submit to a jury a mere question of contempt. If we can safely repose in a jury the power to try all questions of property, all questions affecting the honor of the citizen, all questions affecting the liberty of the citizen * * * there is nothing unsafe in submitting to the same kind of tribunal, summoned in the same way, the simple question of fact has this corporation or that individual violated the order of the Court * * *. So, Mr. President, I feel that it is safe, that it is proper, to support the amendment offered by the Senator from Idaho. I believe that the dignity and authority of the courts will remain unimpaired. At the same time judges inclined to tyrannical practices or who are influenced by prejudice or passion will find a wholesome check has been placed upon unjust and arbitrary punishment."

The Borah amendment was rejected by the narrow margin of three votes. The amendment to the Clayton Act did not suffice to end many of the abuses of the injunctive and contempt processes in industrial controversies. This was due in large part to the failure of the amendment to extend the benefits of jury trials and limited punishments to persons charged with indirect contempts based on supposed violations of injunctions issued in actions brought "in the name of, or on behalf of, the United States," and to persons charged with indirect contempts based on supposed violations of injunctions enjoining acts themselves not illegal under Federal or State laws.

Congress undertook to remedy these defects insofar as labor was concerned by the Norris-LaGuardia Act, adopted in 1932. One of the salient provisions of this act is now embodied in changed phraseology in section 3692 of title 18 of the United States Code which reads as follows:

"In all cases of contempt arising under the laws of the United States governing the issuance of injunctions or restraining orders in any case involving or growing out of a labor dispute, the accused shall enjoy the right to a speedy and public trial by an impartial jury of the State and district wherein the contempt shall have been committed. This section shall not apply to contempts

committed in the presence of the court or so near thereto as to interfere directly with the administration of justice nor to the misbehavior, misconduct, or disobedience of any officer of the court in respect to the write, orders, or process of the court."

In advocating the adoption of the Norris-LaGuardia Act, Senator Norris said:

"I agree, that any man charged with contempt in any court of the United States, * * * in any case, no matter what it is, ought to have a jury trial. * * * It is no answer to say that there will sometimes be juries which will not convict. That is a charge which can be made against our jury system. Every man who has tried lawsuits before juries, every man who has ever presided in court and heard jury trials, knows that juries make mistakes, as all other human beings do, and they sometimes render verdicts which seem almost obnoxious. But it is the best system I know of. I would not have it abolished; and when I see how juries will really do justice when a biased and prejudiced judge is trying to lead them astray I am confirmed in my opinion that after all, our jury system is one which the American people, who believe in liberty and justice, will not dare to surrender. I like to have trial by jury preserved in all kinds of cases where there is a dispute of facts."

In conclusion this phase of our report, we assert that no sound reason exists for enacting the provisions of S. 83 into law. This is true because existing Federal statutes afford ample remedies for the protection or vindication of all civil rights created by the Constitution or laws of the United States by means of criminal prosecutions by the United States, private actions at law for damages by the party aggrieved, and private suits in equity for injunctive relief by the party aggrieved.

To be sure, the defendants in the criminal prosecutions are accorded the right of indictment by grand jury, the right of trial by petit jury, and the right to confront and cross-examine adverse witnesses guaranteed to them by article III and the fifth and sixth amendments; the defendants in the private action at law for damages are accorded the right of trial by jury guaranteed to them by the seventh amendments; and the defendants in the private suits in equity for injunctive relief are accorded the benefits of jury trials and limited punishments secured to them by sections 402 and 3691 of title 18 of the United States Code in the event they are charged with contemptuous acts which are also crimes under Federal or State law.

Surely no one who loves the American constitutional and legal systems ought to object to these things.

III–B

S. 83 is deliberately designed to confer upon the Attorney General the autocratic and despotic power to rob State and local officials and other Americans involved in civil rights disputes of these basic and invaluable safeguards created by the Founding Fathers and Congress to protect all Americans from bureaucratic and judicial tyranny, namely: the constitutional right of indictment by grand-jury; the constitutional right of trial by petit jury; the statutory right of trial by jury in indirect contempt cases; and the statutory right to the benefit of limited punishment in indirect contempt cases. S. 83 undertakes to do these things by a perversion of the powers of equity.

The coverage of parts 3 and 4 of S. 83 extends to the civil rights defined either expressly or implied by sections 1971 and 1985 of title 42 of the United States Code. While section 1971 relates solely to the right to vote, section 1985 is concerned in general terms with all rights arising under "the privileges or immunities" and "the equal protection of the laws" clauses of the 14th amendment and in specific terms with definite rights arising under "the due process of law" clause of the 14th amendment and other articles of the Constitution. These things being true, S. 83 covers in substantial measure the entire spectrum of civil rights.

Deprivations or violations of the civil rights defined either expressly or impliedly by sections 1971 and 1985 of title 42 of the United States Code are punishable as crimes under other Federal statutes in criminal prosecutions instituted by the Federal Government. This is true because some of the deprivations or violations constitute felonies under sections 241, 372, and 1503 of title 18, and the other deprivations or violations constitute misdemeanors under sections 242, 243, and 594 of title 18.

Parts 3 and 4 of S. 83 specify, in essence, that whenever any persons have engaged or are about to engage in the deprivation or violation of any civil right expressly or impliedly defined by section 1971 or section 1985 of title 42 of the United States Code "the Attorney General may institute for the United States, or in the name of the United States but for the benefit of the real party in interest, a civil action or other proper proceeding for redress, or preventive relief, including an application for a permanent or temporary injunction, restraining order, or other order."

When this legal verbiage is recast in simple words, it means this: S. 83 proposes to confer upon the Attorney General the absolute power at his uncontrolled discretion to bring civil actions or proceedings of an equitable nature, in which juries are not available, to enforce or vindicate by injunctive and contempt processes the civil rights expressly or impliedly defined by sections 1971 and 1985 of title 42 of the United States Code.

The objective of S. 83 is to vest in the Attorney General the autocratic power at his absolute discretion to bypass, circumvent, and evade the constitutional rights of indictment by grand jury and trial by petit jury of State and local officials and other Americans in civil rights disputes arising under sections 1971 and 1985 of title 42 of the United States Code.

This objective is revealed with complete clarity by the statement made by Attorney General Brownell before the Subcommittee on Constitutional Rights of the Senate Committee on the Judiciary on February 14, 1957, as well as by an analysis of S. 83 in the light of relevant constitutional and statutory provisions.

Defendants in civil-rights cases will likewise often be deprived of their constitutional right to confront and cross-examine adverse witnesses if S. 83 is enacted by Congress. This is an inevitable consequence of the practice which prevails in actions for injunctive relief. Restraining orders and temporary injunctions are ordinarily issued by courts upon the most unsatisfactory evidence known to man, that is to say, Ex parte affidavits or pleadings drafted by partisan lawyers and attested by partisan witnesses not subject to confrontation and cross-examination by the adverse party. When a restraining order or temporary injunction is issued upon Ex parte affidavits or pleadings and the main object of the action becomes a fact accomplished during the pendency of the action as a result of the coercive influence of the restraining order or temporary injunction, as is frequently the case, the court will thereafter refuse to try the action on its merits on the ground that the matter originally at issue has become moot, thereby rendering it impossible for the defendant to confront and cross-examine the adverse witnesses.

The provision that the civil actions or proceedings are to be brought "for the United States, or in the name of the United States" is inserted in S. 83 for the deliberate purpose of depriving State and local officials and other Americans charged with indirect contempts for supposed violations of injunctions issued in civil-rights cases arising under sections 1971 and 1985 of title 42 of the United States Code of the benefits of jury trials and limited punishments to which they would otherwise be entitled under sections 402 and 3691 of title 18 of the United States Code.

This purpose is revealed with complete clarity by the speech which Assistant Attorney General Olney made before the Ninth Annual Conference of the National Civil Liberties Clearing House on April 5, 1957, as well as by an analysis of S. 83 in the light of relevant judicial decisions and statutes.

If this purpose should be consummated by the enactment of S. 83 in its present form, State and local officials and other Americans charged with indirect contempts for supposed violations of injunctions in civil-rights cases would be triable by judges without juries. Furthermore, they would be subject in such event to punishment under section 401 of title 18 of the United States Code by fines or imprisonments having no maximum limits whatsoever save those vague limits implied by the nebulous declarations of the eighth amendment that excessive fines shall not be imposed, nor cruel and unusual punishments inflicted. *United States ex rel. Brown* v. *Lederer* (140 F. (2d) 136); *United States* v. *Green* (140 F. Supp. 117). Federal courts have upheld the power of judges to sentence respondents to jail on trials without juries under section 401 of title 18 of the United States Code for 2 years (*Hill* v. *United States ex rel. Weiner* 300 U. S. 105; *Conley* v. *United States*, 59 F. (2d) 929), 3 years (*United States* v. *Hall*, 198 F. (2d) 726; *United States* v. *Green*, 140 F. Supp. 117), and 4 years (*United States* v. *Thompson*, 214 F. (2d) 545).

As one contemplates the efforts of the proponents of S. 83 to rob Americans involved in civil-rights disputes of such basic constitutional and legal safeguards as the right of trial by jury by a procedural device virtually identical with that employed by the British Parliament, at the urging of King George and his ministers, to rob American colonists of their right of trial by jury, he recalls observations made in the opinion in *Ex Parte Milligan* (4 Wall. 1, 120), where the Supreme Court vacated a sentence of death pronounced upon a civilian by a military commission in violation of the basic safeguards guaranteed by the Constitution.

After stating that the founders of our Government inserted the constitutional guaranties of indictment by grand jury, trial by jury and confrontation of adverse witnesses in the Constitution because wisdom and experience had demonstrated them to be necessary to protect those accused of crime from tyrannical rulers and "the clamor of an excited people," the Supreme Court said:

"Time has proved the discernment of our ancestors; for even these provisions, expressed in such plain English words, that it would seem the ingenuity of man could not evade them, are now, after the lapse of more than 70 years, sought to be avoided. Those great and good men foresaw that troublous times would arise, when rulers and people would become restive under restraint, and seek by sharp and decisive measures to accomplish ends deemed just and proper; and that the principles of constitutional liberty would be in peril, unless established by irrepealable law. The history of the world had taught them that what was done in the past might be attempted in the future."

And, now, after the lapse of more than 90 additional years, history repeats itself. The proponents of S. 83 attempt again "what was done in the past." They seek to avoid and evade in respect to State and local officials and other Americans involved in civil rights disputes basic constitutional and legal safe-

guards "expressed in * * * plain English words" for the security of all Americans.

The proponents of S. 83 justify their advocacy of its astounding provisions by laying to their souls the Machiavellian unction that the end they have in view excuses the evil they propose. They solicit the support of others for their proposal by these arguments: That the Federal Government is compelled by existing laws to depend solely on criminal prosecutions in cases involving alleged deprivations or violations of civil rights; that criminal prosecutions are "cumbersome," slow, and "often unduly harsh"; that "jurors are reluctant to indict and convict" defendants in criminal prosecutions for alleged deprivations or violations of civil rights; that S. 83 is merely designed to lodge in the Federal Government an additional power to bring civil actions of an equitable nature in which the comparatively mild injunctive process is to be employed to redress or prevent deprivations or violations of civil rights; and that the proposed injunctive process is superior to criminal laws because it would afford the Federal Government means of preventing the commission of crimes in the civil-rights field.

The argument that criminal prosecutions are "often unduly harsh" on defendants in civil-rights cases and that such defendants would be benefited by subjecting them to "the comparatively mild injunctive process" instead of criminal prosecution is rather intriguing because of its source. This argument is advanced by Government attorneys, who confess their fear that they might lose some of the civil-rights cases they wish to win if they are required to convince jurors of the truth of their allegations by the oral testimony of cross-examined witnesses according to the practice prescribed by the Constitution. Congress would do well to beware of Government attorneys when they profess to bear gifts to those they are obligated to prosecute.

The arguments that criminal prosecutions are "cumbersome" and "slow," and that "jurors are reluctant to indict and convict" are identical with those given for the establishment of the Court of Star Chamber, the enactment of the acts of Parliament depriving American colonists of the right of trial by jury, and the congressional opposition of former days to the jury-trial provisions of the Clayton and Norris-La Guardia Acts.

In commenting on this subject in his famous dissenting opinion in *Hopkins* v. *Ozley Stave Co.* (83 F. 912, 924, 925), Judge Henry Clay Caldwell, who served with rare distinction as presiding judge of the United States Circuit Court of Appeals for the Eighth Circuit, said:

"It is said by those who defend the assumption of this jurisdiction by the Federal courts that it is a swifter and speedier mode of dealing with those who violate or threaten to violate the laws than by the prescribed and customary method of proceeding in courts of law; that it is a shortcut to the accomplishment of the desired object; that it avoids the delay and uncertainty incident to a jury trial, occasions less expense, and insures a speedier punishment. All this may be conceded to be true. But the logical difficulty with this reasoning is that it confers jurisdiction on the mob equally with the chancellor. Those who justify or excuse mob law do it upon the ground that the administration of criminal justice in the courts is slow and expensive, and the results sometimes unsatisfactory. It can make little difference to the victims of shortcut and unconstitutional methods, whether it is the mob or the chancellor that deprives them of their constitutional rights. It is vain to disguise the fact that this desire for a shortcut originates in the feeling of hostility to trial by jury * * *. A distrust of the jury is a distrust of the people, and a distrust of the people means the overthrow of the government our fathers founded."

Happily for liberty and justice in America, the founders of our Government hated judicial tyranny more than they loved judicial haste, and for that reason spurned the argument that criminal prosecutions are cumbersome and slow. Believing, as they did, that all persons ought to be weighed in the same legal balance, they likewise rejected the argument that justice ought to descend from her pinnacle in particular cases for fear that jurors might acquit some persons who, in the opinion of Government lawyers, deserve punishment.

The argument that S. 83 is a comparatively mild bill is destitute of validity. Those who advance it are like Job. They multiply words without knowledge.

Let us weigh the argument of mildness in the light of what S. 83 would empower the Attorney General and a one-man Federal court to do to defendants in civil-rights cases. And let us, when so doing, remember that the overwhelming majority of these defendants will be State and local officials, who render essential governmental services at State and local levels for little or no compensation out of a sense of public duty, and who will be haled into court, in the final analysis, simply because their ideas as to how their public duties should be performed differ from those entertained by the Attorney General or his underlings.

Under S. 83, the defendants in all civil actions or proceedings instituted by the Attorney General for the avowed purpose of protecting or vindicating any supposed civil rights defined either expressly or impliedly by sections 1971 and 1985 of title 42 of the United States Code are to be automatically deprived by circumvention of these substantial and invaluable rights: (1) Their rights under the Constitution to indictment by grand jury and trial by petit jury on the charges made in the civil actions or proceedings; (2) their right under the Clayton Act to trial by jury on indirect contempt charges in subsequent contempt proceedings arising out of alleged violations of restraining orders, temporary injunctions, or permanent injunctions issued in the civil actions or proceedings; and (3) their rights under the Clayton Act and sections 241, 242, 243, 372, 594, and 1503 of title 18 of the United States Code to the benefit of the limited punishments prescribed by Congress for the acts and practices allegedly committed by them. After the Attorney General robs the defendants of these constitutional and legal safeguards by the devious device of using civil actions or proceedings under S. 83 instead of criminal prosecutions, the one-man Federal court, which convicts them of contempts on trials without juries, may punish them for the contempts by fines or prison sentences having no fixed or known limits whatever.

The legal woes of the defendants do not necessarily end when they have suffered all these things at the hands of the Attorney General and the one-man Federal court. Since S. 83 does not remove their liability to criminal prosecution, they may still be subjected to punishment under the criminal law for the same acts. They could not plead double jeopardy in such event, because they would be punished in the contempt proceeding for disobeying injunctions and in the criminal prosecutions for committing crimes.

This brings us to the argument that the injunctive process proposed by S. 83 is superior to criminal laws because it would afford the Federal Government means of preventing the commission of crimes in the civil-rights field.

This argument is pressed with vigor by those who would deprive defendants in civil-rights cases of such basic rights and benefits as the right of trial by jury and the benefit of limited punishment.

The argument is lacking in intellectual strength. It rests solely upon the fallacy that courts of equity can prevent crimes in some manner other than by fear of the penalties attending the violations of injunctions.

The prohibition of the equity court adds nothing of a deterrent nature to the prohibition of the criminal laws. This is so because criminal laws and courts of equity have no preventive whatever except the fear of punishment. When all is said, criminal laws and injunctions undertake to prevent forbidden acts in exactly the same way, i. e., by threatening to punish their commission by fine or imprisonment. There is no sound reason for believing that laymen, unversed in the niceties of contempt and criminal processes, would fear the sentence of a court of equity more than the sentence of a court of law.

The only use of the term "equity" in the Constitution is in the stipulation of article III, section 2, that the "judicial power shall extend to all cases, in law or equity, arising under this Constitution, the laws of the United States, and treaties, made, or which shall be made under their authority."

While the founders of our Government were at pains to have the Constitution specify that criminal prosecutions and suits at common law are to be tried by jury, they did not insert in that instrument any express limitation upon courts of equity.

Adequate reasons existed for this omission.

At the time of the adoption of the Constitution, writs of injunction and other equitable remedies were used for the protection of property rights only. As was made clear by the commentary of Alexander Hamilton on the extent of the authority of the Federal judiciary, which has been preserved in The Federalist as Essay No. 80, the founders of our Government contemplated that the equitable jurisdiction of the Federal courts would be exercised within similar limits.

When they placed in article III, section 2, the emphatic, and unambiguous declaration that "the trial of all crimes * * * shall be by jury," the founders of our Government intended these plain English words to mean exactly what they said. They believed that this constitutional declaration possessed sufficient vigor to thwart the efforts of those who would convert courts of equity into courts of star chamber and rob Americans of their right of trial by jury by the devious device of extending the powers of equity beyond their ancient limits.

History makes this manifest: If they had dreamed that Americans could be constitutionally robbed of their right of trial by jury by perverting injunctions and contempt proceedings from their historical uses to the field of criminal law, the people of the United States would have rejected the Constitution out of hand. If one is tempted to question the validity of this assertion, let him read Judge Story's affirmation that the omission from the original Constitution of the guaranty of jury trial in suits at common law later embodied in the seventh amendment raised an objection to the Constitution which "was pressed with an urgency and zeal * * * well-nigh preventing its ratification."

We submit that the constitutional declaration "the trial of all crimes * * * shall be by jury" does possess the vigor attributed to it by the founders of our Government, and that in consequence it necessarily invalidates by implication any proposal to rob Americans of their right of trial by jury by extending the injunction and contempt processes of equity to the criminal field. If this is not true, this solemn constitutional declaration is but an empty pledge expressed in idle and ironic words.

If power can be conferred upon Federal courts to suppress crime in the civil rights field by injunctions and contempt proceedings in trials without juries, there is no sound reason why power cannot also be conferred upon such courts to suppress in like manner any and all crimes in the whole catalog of crimes.

In concluding this phase of our report, we quote from an article by Judge Henry Clay Caldwell, which appeared in the American Federationist in May 1910:

"These mandatory provisions of the Constitution are not obsolete, and are not to be evaded or nullified by mustering against them a little horde of equity maxims and obsolete precedents which had their origin in a monarchial government having no written constitution. No reasoning and no precedents can avail to deprive the citizen accused of crime of his right to a jury trial guaranteed to him by the provisions of the Constitution, 'except in cases arising in the land or naval forces, or in the militia, when in actual service in time of war, or of public danger.' These exceptions serve to emphasize the right and to demonstrate that it is absolute and unqualified both in criminal and civil suits, save in the excepted cases. These constitutional guaranties are not to be swept aside by an equitable invention which turns crime into a contempt and confers on a judge the power to frame an extended criminal code of his own, making innocent acts crimes punishable by fine or imprisonment without limit, at his discretion" (American Federationist, May 1910).

IV

S. 83 is deliberately designed to empower the Attorney General to establish government by injunction in the place of government by law in the civil-rights field.

While diligent efforts are made to present S. 83 as a mere proposal to permit the Federal Government to use orthodox equitable actions or proceedings to enforce or vindicate civil rights, the truth is that S. 83 is based on a perversion of equity powers from their proper functions, a repudiation of the first requisites of equity jurisdiction, and a usurpation of the powers reserved to the States by the 10th amendment.

S. 83 proposes that the injunctive and contempt processes be used for purposes which bear no more resemblance to the ancient and proper uses of those processes "than the milky way bears to the sun." As we have already pointed out, injunctions were used at the time of the ratification of the Constitution to conserve property in dispute between private litigants and the Founding Fathers contemplated that such writs would be restricted to similar usage by the Federal courts. To be sure, other statutes have been enacted by Congress to authorize the use of injunctions in lieu of executions to enforce awards made under the Workmen's Compensation and Longshoremen's Compensation Acts and to enforce public rights belonging to the United States in its capacity as a sovereign nation. S. 83 goes many bow-shots beyond these other acts. This is true because it perverts the powers of equity beyond their ancient and proper uses to enforce the criminal laws of the Nation in the field of civil rights.

S. 83 repudiates these two basic rules of equity jurisdiction: (1) The rule that a litigant has no right to invoke the aid of a court of equity where he has an adequate remedy at law, and (2) the rule that equitable proceedings must be brought in the name of the real party in interest. The Federal Government has an adequate remedy by criminal prosecutions for any and all public wrongs arising out of deprivations or violations of the civil rights of individuals (43 C. J. S., Injunctions, sec. 150). Private persons have adequate remedies by private actions at law for damages and private suits in equity to redress or vindicate any and all actual or threatened denials of their civil rights. Parts III and IV of S. 83 specify that the new actions or proceedings to be authorized by it are to be brought "for the United States, or in the name of the United States, but for the benefit of the real party in interest." By this phraseology S. 83 stipulates in express terms that the new actions or proceedings are not to be brought in the name of the real party in interest. While we do not deny to anyone so minded the privilege of arguing that the United States has a sentimental interest in all persons within its borders enjoying their civil rights, we do assert without fear of successful contradiction that the United States has no legal interest whatever in actions or proceedings to vindicate the political or personal rights of individuals, even though they may be denominated civil rights. If it did, there would be no occasion for enacting S. 83, because the United States would possess the right to sue for this purpose under existing civil-rights statutes. We deem it not amiss to repeat that the provisions of parts III and IV of S. 83 providing that the new actions or proceedings are to be brought "for the United States, or in the name of the United States" are deliberately designed to deny defendants in civil-rights cases the right of trial by jury and the right to the benefit of limited punishments in proceedings for indirect contempt which they would otherwise enjoy under sections 402 and 3691 of title 18 of the United States Code.

The provisions of parts III and IV of S. 83 purporting to confer upon the Attorney General the autocratic and despotic power to nullify State laws prescribing administrative remedies has this twofold objective: (1) To abrogate the long-settled rule of judicial administration that no one is entitled to resort to the courts for judicial relief until he has used and exhausted the administrative remedies, and (2) to permit the Attorney General, acting with the sanction of a 1-man Federal court, to usurp the power of the State to determine, in the first instance, matters committed to the State under our constitutional system, such as whether a person applying for voting rights possesses the qualifications prescribed by State law for electors "of the most numerous branch of the State legislature" or whether the educational welfare of a particular child requires or justifies assignment to a particular school.

The powers of equity are thus perverted, the first principles of equitable jurisdiction are thus repudiated, and the powers of the State are thus usurped to establish government by injunction in place of government by law in the field of civil rights, and to insure that the government by injunction so established is not to be subject to any limitation whatever except that unknown and unpredictable quality called judicial discretion.

What is government by injunction? Government by injunction is government according to the personal convictions, inclinations, or notions of individual judges rather than government by certain and uniform laws applying alike to all men in like situations.

This being true, it is no wonder that Lord Camden, one of England's greatest lawyers, declared:

"The discretion of a judge is the law of tyrants; it is always unknown; it is different in different men; it is casual and depends upon constitution, temper, and passion. In the best it is ofttimes caprice; in the worst it is every crime, folly, and passion to which human nature is liable."

Edmund Burke, the great English statesman, used somewhat milder language in pointing out the dangers inseparable from government by injunction. He said:

"The spirit of any sort of men is not a fit rule for deciding on the bounds of their jurisdiction; first, because it is different in different men and even different in the same at different times, and can never become the proper directing line of law; and next because it is not reason but feeling, and when once it is irritated it is not apt to confine itself within its proper limits."

Government by injunction is abhorrent to those who love our constitutional and legal systems for these reasons:

1. Government by injunction denies to litigants the right to invoke for their protection basic constitutional and legal safeguards created by the Founding Fathers and Congress to protect all Americans from tyranny.

2. Government by injunction reduces the courts from the status of judicial tribunals to the status of administrative agencies of the executive department of the Government.

3. Government by injunction inevitably tends to bring the courts into disrepute.

4. Government by injunction may extend beyond prohibitions of lawless acts to make crimes of innocent acts and to coerce community conduct.

It is unnecessary to elaborate upon the first of these propositions. We pointed out in detail in section II–B of this report that S. 83 is deliberately designed to confer upon the Attorney General the autocratic and despotic power to rob State and local officials and other Americans involved in civil-rights disputes of those basic and invaluable safeguards created by the Founding Fathers and Congress to protect all Americans from bureaucratic and judicial tyranny; namely, the constitutional right of indictment by grand jury, the constitutional right of trial by petit jury, the statutory right of trial by jury in indirect contempt cases, and the statutory right to the benefit of limited punishment in indirect contempt cases.

This brings us to a consideration of the second and third propositions, which are interrelated.

Proponents of S. 83 urge injunctions to enforce civil rights on the theory that southern jurors do not convict in such cases. Let us examine this theory. What is charged, summarily and without substantiation, is that all southern jurors are utterly faithless to their oaths and duties. Else the proponents must maintain that the very possibility of acquittal, which is present in every jury trial, is reason enough in civil-rights cases for bypassing the jury. Thus the jury system is the pillar of liberty save where southerners and civil rights are concerned. Then, they say, it becomes a stumbling block to justice.

Yet, when it is suggested that the injunctive power is susceptible to grave abuse, these proponents say that such suggestions are an affront and a dishonor to the judiciary. Such suggestions are an affront, they say, despite the indelible record of judicial abuse of injunctions issued in labor disputes. While the advocates of S. 83 do not hesitate to indict the whole southern community as lawless, they would except the Federal judge as though he, in receiving the judicial robes, discards the passions and the clouded eyes which they attribute to all other southerners.

We would remind them of the words of Clarence Darrow given on March 23, 1900, before the House Judiciary Committee then considering limitation of injunctions in labor disputes. He said:

"I am not making any charges against the courts they are just like the rest of us. They go upon the bench with exactly (the same) surroundings in which they have lived."

He said further:

"If you give men arbitrary power, the tendency is to enlarge from year to year and from day to day; the tendency of the courts is to reach out and take more and more power."

And we would commend to them these words of United States Circuit Judge Henry Clay Caldwell:

"Honesty and ability do not exempt from error, and when coupled with error they become dangerous gifts. After all, the human skull is but the temple of human errors, and judicial clay, if you analyze it well, will be found to be like all other human clay. The rule is without exception that whenever the exclusive power of making or administering the law is committed

for any extended period to a single man or a few men—to a caste—the progressive restriction of the liberty of the people follows" (American Federationist for May 1910).

In saying that judges are fallible like other men, we do not assail the judiciary. We merely suggest that the provisions of S. 83 ought to be tested in the light of that fact and in the light of judicial history. This history shows that the Federal courts lost the respect and confidence of the people during the tragic years when government by injunction prevailed in labor controversies. George Wharton Pepper, eminent Philadelphia lawyer and statesman, attributed such loss of confidence to the fact that the Federal courts were assigned "the burden of solving for us our legislative and executive problems" growing out of industrial warfare. Pleading for the adoption of adequate means to restore confidence in the Federal courts, Mr. Pepper asked a question which bears repeating in view of the provisions of S. 83. His question was simply this: "To maintain such confidence must we not confine the courts to the sphere in which the creators of our constitutional system intended them to live and move and have their being?" (address before the American Bar Association, 47th annual meeting, 1924).

George W. Norris, the great liberal Senator from Nebraska, proposed the Norris-La Guardia Act, which severely restricted the issuance of injunctions and provided jury trials in cases of indirect contempt, as the most efficacious means for restoring confidence in the Federal courts. In a Senate speech on February 23, 1932, advocating the passage of the act, he pointed out:

"Is it any wonder that there has grown up a feeling of resentment against some of the actions of some Federal judges? Is it any wonder that there has gradually grown up in the minds of ordinary people a feeling of prejudice against Federal courts? Is it surprising that there should develop a sentiment against life tenure for Federal trial judges? Can anyone doubt that such action on the part of the Federal judiciary has gradually developed in the minds of ordinary people a fear that where a system of jurisprudence prevails which enables one man, endowed with a life tenure of office, to write a law and then order its enforcement, and then, refusing a jury, to try alleged offenders and punish them at his own sweet will, it will eventually lead us to the common knowledge and belief that where such things exist, as Blackstone says, 'There can be no public liberty.'

"It is difficult to see how any civilized people would indefinitely submit to such tyrannical treatment, and indeed, it would undoubtedly be true that there would not have been submission if this procedure were general and applied to all classes of people."

The proponents of S. 83 spurn the wise counsel of George Wharton Pepper. They propose that Federal courts of equity be extended far beyond the "sphere in which the creators of our constitutional system intended them to live and move and have their being." They propose, moreover, that the Attorney General be clothed with autocratic power whereby he can virtually convert Federal district courts into administrative agencies of the executive department of the Federal Government for the management of schools, elections, and other similar activities of a local nature in the civil-rights field.

In addition, they propose that Federal district judges be placed in a position identical to that described by Senator NORRIS in the quotation set forth above. Under S. 83 the Federal district judge, acting as both judge and jury, will be projected into the middle of the civil-rights controversy whose issues are highly charged with emotionalism and partisanship. On one side of the controversy will be ranged the legal and financial might of the Federal Government and on the other the State or local official who performs governmental services for little or no compensation out of a sense of public duty. Regardless of the merits of the particular case, the controversy will be viewed and interpreted as a conflict between the Federal and State Governments.

In this atmosphere and under these circumstances the single judge must decide, in the first instance, whether or not to issue an injunction and, in the second instance, whether or not to cite for contempt. In many cases he must so decide on the basis of affidavits drawn by partisan lawyers and executed by witnesses who are not subject to cross-examination.

In any proceedings for contempt for any alleged violation of the injunction, the judge is compelled to enact the varied and conflicting roles of lawmaker, injured party, prosecutor, judge, and jury.

And there are other subtle factors present, which may, consciously or unconsciously, influence the judge's decision. One is the very human danger that the judge may view an alleged violation of his own injunction as a personal insult to himself. Another is that the judge, as a Presidential appointee, may interpret his role as that of furthering the particular policies of government or even of his party.

Surely no judge ought to be compelled to act under such circumstances. And surely any decision which he may make under such circumstances will be suspect by considerable portions of the public as having been induced by some unworthy motive.

This being true, the very procedure established by S. 83 will tend to bring the courts into public disrepute, no matter how honest or intelligent the judiciary may be. For this reason we attempt to maintain the respect in which honest tribunals should be held when we urge the rejection of S. 83, whose unwise procedure is calculated to bring all judicial tribunals into disrespect.

The fourth proposition, that injunctions may extend beyond prohibitions of lawless acts to include acts which are innocent and may coerce community conduct, is amply shown by an injunction presently in force relating to school integration. There is now in Clinton, Tenn., an injunction in force which enjoins these things: "hindering, obstructing, or in anywise interfering with the carrying out of the aforesaid order of the court (the integration order of January 4, 1956), or from picketing Clinton High School, either by words or acts or otherwise." Where do we find the State or Federal statute which prohibits speaking, writing, or peaceful picketing? Of course there is none. But the injunction has declared this law and these legal acts are made crimes.

And who is enjoined in Clinton, Tenn., from these acts? The injunction, issued on August 29, 1956, and made permanent on September 6, 1956, was against six named defendants, "their agents, servants, representatives, attorneys, and all other persons who are acting or may act in concert with them." Yet the county attorney is quoted to have said that "this injunction has no limits; it applies to everyone everywhere, be they minors, adults, inside or outside of any building in this (Anderson) county." And on December 6, 1956, 16 persons, not parties to the suit, nor alleged in the writ of attachment to be "agents, servants, representatives, attorneys" or in active concert with the original defendants, were cited for criminal contempt of the injunction for alleged disturbances near the school grounds. These defendants, now 6 months later, are awaiting trial.

We do not believe that the Clinton case has lessened the tension or ill will in the community and we do not believe that the injunction has strengthened the trust and confidence of the people in the judiciary. Indeed, this single case should point out the grave dangers in the extension of the injunctive process proposed by S. 83 where additionally, unlike the Clinton defendants, the defendants would have no right to jury trial.

The thoughts of William S. Dunbar, posed in 1897 in the Law Quarterly Review, are worth heeding:

"It should not be forgotten that no course is more dangerous than to justify the exercise of a doubtful power by the supposed necessities of a particular emergency. Courts must adhere to fixed principles, lest the departure today by a present emergency itself justify tomorrow a departure inspired by some sinister motive. Courts of equity can in no event be made to replace permanently an able and honest administration of its duties by the executive branch of the Government. The attempt to do so may achieve a temporary success but ultimately will result in a lowering of the standard of the judiciary or a disregard of its decrees."

V

The claim of its proponents that S. 83 is simply a proposal to lodge in the Federal Government a limited power to enforce or vindicate by injunctions and contempt proceedings the right to vote and a few other civil rights of members of so-called minority groups is without foundation. If it should be enacted by Congress, S. 83 would empower the Attorney General to institute and prosecute at public expense lawsuits "as numberless as the sand" for the avowed benefit of any aliens, citizens, or private corporations within the territorial jurisdiction of any of the 48 States.

S. 83 is presented by its proponents as a simple proposal to lodge in the Federal Government a strictly limited power to prevent or redress by injunctions and contempt proceedings deprivations or violations of a limited number of civil rights of persons belonging to so-called minority groups.

This claim is without foundation. If S. 83 is enacted by Congress, it will empower the Attorney General to carry on litigation at the public expense for the supposed benefit of any alien, citizen, or private corporation within the territorial jurisdiction of any of the 48 States in instances "as numberless as the sand."

This is true because S. 83 specifies, in essence, that the Attorney General may bring civil actions or proceedings of an equitable nature to suppress by injunctions and contempt proceedings conspiracies, either consummated or unconsummated, to deprive any person or class of persons, either directly or indirectly, of "the equal protection of the laws" in violation of the 14th amendment (42 U. S. C., sec. 1985 (3)).

While the prohibition of "the equal protection of the laws" clause of the 14th amendment applies only to a State acting through an agency or instrumentality of its government, the scope and coverage of the clause are exceedingly broad.

The clause "means, and is a guaranty, that all persons subjected to State legislation shall be treated alike, under like circumstances and conditions, both in privileges conferred and in liabilities imposed" (16A C. J. S., Constitutional Law, sec. 502). The benefits of the clause extend to all aliens and all citizens of all races as well as to all private corporations within the territorial jurisdiction of any of the 48 States.

These things being true, S. 83, if enacted by Congress, would empower any Attorney General to litigate at public expense virtually all claims of virtually all aliens, citizens, and private corporations within the jurisdiction of the State in question that they have suffered intentional discrimination by the action of State or local officials taken under State statutes or municipal ordinances, or orders or regulations made under them, pertaining to elections; public education; business and trade; labor; charges,

prices, and interest; railroads, motor carriers, telegraph companies, public warehouses, and other public utilities; ad valorem, income, inheritance, license, and sales taxes; local public improvements; highways and streets; buildings; fish and game; the keeping of animals; civil remedies and procedure; crimes and criminal procedure; and all other matters committed by our system of government to State control.

Congress would be exceedingly unwise if it should approve a bill authorizing any Attorney General to open at the expense of the taxpayers a whole Pandora's box containing so many legal miseries.

VI

S. 83 provides for the establishment of a roving Presidential Commission on Civil Rights with drastic subpena and hearing powers to wander to and fro over such portions of the face of the United States as it may select to investigate such vague matters as "unwarranted economic pressures" and such unlimited matters as "developments constituting a denial of equal protection of the laws." The establishment of such commission is wholly unnecessary because committees of Congress are well equipped to make such investigations as may be necessary in the premises. Furthermore, the establishment of such commission is likely to be productive of much evil because its activities will foment controversies in racial matters and inevitably give rise to the charge that it is being used to exploit so-called minority groups for political purposes. S. 83 also provides for the establishment of a new Civil Rights Division in the Department of Justice which will necessarily have to be staffed by innumerable employees at an expense which no one can now estimate.

S. 83 proposes that Congress authorize the establishment of a roving Presidential Commission with authority to wander to and fro over the face of such portions of the United States as it may select for the purpose of investigating such vague matters as "unwarranted economic pressures by reason of color, race, religion, or national origin" and such unlimited matters as "economic, social, and legal developments constituting a denial of equal protection of the laws" under the 14th amendment.

There is absolutely no justification for the establishment of any such Presidential Commission. If it should be of the opinion that there is any occasion for conducting investigations in this particular field, Congress should conduct such investigations through the instrumentalities of existing Congressional committees, which are operated by men who are elected by the American people to legislate for them and who will necessarily take the political consequence of any errors committed in such investigations. The members of the Presidential Commission would not be responsible to anyone for any action which they might take.

It is submitted, moreover, that it would be exceedingly unwise for Congress to create a Presidential Commission as proposed by S. 83. Such a Commission could harass the American people beyond measure in the proposed investigations, because the bill contains no indications whatsoever as to what the phrase "unwarranted economic pressures" means, and because "the equal protection of laws" clause of the 14th amendment is so broad as to cover every economic, political, and other activity carried on under State statutes and municipal ordinances.

Some idea of the meaning attributed to the nebulous phrase "unwarranted economic pressures" by organizations advocating S. 83, may be obtained by a reading of the testimony taken before the Subcommittee on Constitutional Rights of the Senate Committee on the Judiciary. One of these organizations presented a witness before the subcommittee who testified that a bank had brought "undue economic pressure" upon his father, a member of a so-called minority race, by calling upon his father to pay his bank note when it fell due.

The Presidential Commission would undoubtedly be productive of great evils. This is true because the bill impliedly solicits the testimony of maladjusted persons suffering from delusions of persecution in the area of racial relations. Besides, it contemplates that the Commission would avail itself of the services of "voluntary * * * personnel" who will undoubtedly entertain in most cases fanatical opinions in the area in which the Commission is to operate. As a consequence of these matters, the activities of the Commission would undoubtedly foment considerable bitterness in the area of racial relations.

In addition, the Commission could be readily used as a means of exploiting so-called minority groups for political purposes.

S. 83 also proposes that Congress authorize the establishment of a new Civil Rights Division in the Department of Justice. In view of the fact that pressure groups would insist that this Division act as guardian for so-called minority groups, no one can foretell at this time the number of officers who will inevitably be required to exercise the autocratic and despotic powers which S. 83 is calculated and intended to confer upon the Attorney General. All that one can predict with any degree of certainty at this time is that the Attorney General would employ "swarms of officers to harass our people, and eat out their substance."

When all is said, S. 83 is deliberately designed to confer upon the Attorney General autocratic and despotic powers which may befit the office of commissar of justice in a totalitarian country, but which are incompatible with the office of chief law officer of a republic having a government of laws rather than a government of men.

Undoubtedly Daniel Webster had such tyrannical governmental actions in mind as those proposed by S. 83 when he uttered these eloquent words:

"Other misfortunes may be borne, or their effects overcome. If disastrous wars should sweep our commerce from the ocean, another generation may renew it; if it exhaust our Treasury, future industry may replenish it; if it desolate and lay waste our fields, still, under a new cultivation, they will grow green again, and ripen to future harvests.

"It were but a trifle even if the walls of yonder Capitol were to crumble, if its lofty pillars should fall, and its gorgeous decorations be all covered by the dust of the valley. All these may be rebuilt.

"But who shall reconstruct the fabric of demolished government?

"Who shall rear again the well-proportioned columns of constitutional liberty?

"Who shall frame together the skillful architecture which unites national sovereignty with State rights, individual security, and public prosperity?

"No, if these columns fall, they will be raised not again. Like the Colosseum and the Parthenon, they will be destined to a mournful and melancholy immortality. Bitterer tears, however, will flow over them than ever were shed over the monuments of Roman or Grecian art; for they will be the monuments of a more glorious edifice than Greece or Rome ever saw—the edifice of constitutional American liberty" (Daniel Webster, 1832).

THE SECOND BATTLE OF GETTYSBURG

Mr. HOLLAND. Mr. President, everyone knows that old soldiers like to talk over old battles and old campaigns. No one has ever surpassed old commanders as "second guessers" and "Monday morning quarterbacks," and probably no one ever will. Let us hope so, at any rate.

In recent days there has been much talk in press, radio, television, and almost everywhere else about the so-called second Battle of Gettysburg—the discussion of that famous battle by two great commanders, each of them almost as famous as Gen. Robert E. Lee.

I have noted in the New York World-Telegram of Tuesday, May 14, an editorial entitled, "And on Another Field," which I think may place the recent discussion between General Eisenhower and Field Marshal Montgomery in a more mellow perspective. I read this editorial into the RECORD as a part of my remarks, as follows:

AND ON ANOTHER FIELD

It was a rather wet, foggy morning last Sunday in the Ardennes Forest of France, as well as at Gettysburg.

No one noticed the gray-clad shade of Gen. Robert E. Lee and the blue-faded wraith of Gen. George C. Meade jeeping leisurely over the historic battleground in amiable conversation.

"And this," said General Meade to Lee, "is where von Rundstedt massed the cream of the German Army for a last-ditch counter-attack that Christmas of 1944."

"Yes," said Lee. "He had alined his forces to the south there along the 50 miles from Monschau Forest to Trier. This was his desperate, final attempt to change the whole course of the war."

"What about General Eisenhower's intelligence?" asked Meade.

"It was completely in the dark," said Lee, "when the Germans' Sixth Armored Army rushed in. The Allied defense was thin and the Germans hit in two columns. On the north they carved out a salient 10 miles wide and 6 miles deep. Their southern column, executing a pincers movement over that way, penetrated 5 miles. That was the opening of what they called the Battle of the Bulge."

"Where was Montgomery?" asked Meade.

"He was tidying up the battle area and massing to protect Antwerp—to the rear."

"So the Germans broke through," said Meade, shaking his head.

"They did, indeed," said Lee.

"An absolutely monstrous thing," said Meade.

"I would have sacked them both," said Lee.

"You're so right, Bob," said Meade. And the two shades—old soldiers once bitter rivals—solemnly shook hands in agreement at last.

VISIT TO THE SENATE BY JUNIOR CLASS of LaSALLE HIGH SCHOOL, CUMBERLAND, MD.

Mr. BEALL. Mr. President, I have the honor today to present the junior class of the LaSalle High School of Cumberland, Md. They are making their annual visit to Washington, and are at present in the Senate gallery. I ask that the members of the class rise, so that Senators may see them.

[The members of the class rose in their places, and were greeted with applause, Senators rising.]

The PRESIDING OFFICER. The Senate is very happy to welcome you here today.

EXECUTIVE SESSION

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed

to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. If there be no reports of committees, the clerk will state the remaining nomination on the Executive Calendar.

DEPARTMENT OF THE NAVY

The Chief Clerk read the nomination of J. Sinclair Armstrong to be an Assistant Secretary of the Navy.

The PRESIDING OFFICER. The question is, Will the Senate advise and consent to this nomination?

Mr. KEFAUVER. Mr. President, I intend to vote against confirmation of the nomination of Mr. J. Sinclair Armstrong to be an Assistant Secretary of the Navy, and I wish to explain why.

I take this step reluctantly, for ordinarily I believe in allowing the President to have whomever he wants in his Cabinet and subcabinet. Since President Eisenhower has been in office, I have opposed the confirmation of only one other nomination that has come before the Armed Services Committee, of which I am a member. Literally thousands of nominations have passed through the Armed Services Committee during those 5 years.

The other one to which I objected was that of Harold E. Talbott to be Secretary of Air.

Time has indicated that I was correct in that instance. I believe that I am correct in this one also.

In my opposition to Mr. Armstrong, there is nothing of a personal nature involved. Mr. Armstrong is a likeable man personally. He has simply shown himself to be unworthy of one high post, namely, Chairman of the Securities and Exchange Commission, and I see no reason to entrust him with another.

Let me, very briefly, tell Senators why I cannot endorse by my vote the nomination of this man, and then I shall be glad to answer any questions, for I am very familiar with this case.

Members of the Senate will recall that 2 years ago in July 1955 in hearings before the Subcommittee on Antitrust and Monopoly of the Senate Judiciary Committee, there was developed strong and compelling evidence of a conflict of interest in the handling of the so-called Dixon-Yates matter.

Members of the subcommittee, both Republicans and Democrats, participated actively in those hearings, as did the then chairman of the Joint Committee on Atomic Energy, the distinguished Senator from New Mexico [Mr. ANDERSON].

The conflict arose because of the dual role played by Adolphe Wenzell, then a vice president of the First Boston Corp., which served as financial agent for the Dixon-Yates combine, and at the same time a consultant for the Bureau of the Budget. Mr. Wenzell simultaneously worked on the Dixon-Yates contract for both parties. The subcommittee felt this was such a conflict that the contract was null and void, and the Justice Department—the Attorney General—and the Atomic Energy Commission now agree with us. In a pleading filed in the United States Court of Claims in the case of Mississippi Valley Generating Co. against United States—which is the suit of the Dixon-Yates group for alleged damages growing out of this case—the Justice Department, in the brief which it filed, maintained:

> The alleged agreement is contrary to public policy, unlawful, and null and void by reason of the activities of one Adolphe H. Wenzell, a salaried vice president of First Boston Corp., of New York City.

What was Mr. Armstrong's role in all this? He was Chairman of the Securities and Exchange Commission, a quasi-judicial, independent agency, an arm of the Government, which had to pass on the Dixon-Yates financing under the law as enacted by Congress. The case was proceeding before a trial examiner, Mr. Ewell. The case, as Senators will remember, was hotly contested. This was no pro forma proceeding before the Securities and Exchange Commission.

There was a series of controversies and questions raised as to whether the SEC, under the law, could approve the application for financing on behalf of the Dixon-Yates organization. Among the questions raised was whether the Holding Company Act had been and was being violated. There was very deep interest in the matter. There was also involved the question of whether, since TVA had not signed the contract, it would be affected by the contract. Therefore, a very serious judicial proceeding was under way before the hearing examiner of the SEC in connection with the Dixon-Yates financing.

The State of Tennessee and others, opposing the plan of financing, were represented by attorneys. The Dixon-Yates interests were represented by attorneys from New York. The Government had attorneys in the hearing room.

All these persons were present, secure in their belief that they were proceeding in a judicial way, with everything up and above board, according to the laws of evidence and quasi-judicial proceedings. But they were not. Their feeling of security was misplaced. For everything was not happening in that hearing room, where the hearing was taking place. Some shots were being called in the dark. Decisions affecting the proceedings in that room were being made over the telephone. On one end of the line was Sherman Adams, assistant to the President. On the other end of the line was J. Sinclair Armstrong, the Chairman of the Securities and Exchange Commission, the man entrusted by all those present to conduct the hearing in a judicial manner, to give them their day in court, to be truly an independent chairman of an independent agency.

The record is all here. It shows what happened. It shows that Mr. Sherman Adams called Mr. Armstrong at his home on Saturday afternoon, June 11, 1955, as Mr. Armstrong says, on a matter of great emergency. He asked that the Commission consider holding up its hearing scheduled for the following Monday, June 13, before the hearing examiner of the FCC.

What was significant about that hearing? It was the day on which Adolphe Wenzell was scheduled to testify before the hearing examiner. The whole sordid story, until then locked in the closets, might have been and would have been revealed during the course of the testimony. It was the intention of the attorneys for those opposing the Dixon-Yates financing to show by their questions directed to Mr. Wenzell, on that Monday, June 13, 1955, that Mr. Wenzell was engaged in a dual role, which constituted a conflict of interest, a conflict of interest which Mr. Brownell later on found made the contract null and unenforcible.

It was also the day, June 13, 1955, on which the House was scheduled to and did consider an appropriation of $6½ million for transmission lines from the Dixon-Yates proposed plant across the river to Memphis, Tenn. It was the day on which this issue was to be debated sharply in the House of Representatives, with great interest in the issue, and with newspaper stories on the question of whether there would be an appropriation made for TVA to build the Fulton steam plant or whether there would be an appropriation of $6½ million to build the transmission line across the river from Arkansas to Memphis, Tenn.

Obviously, Sherman Adams did not want this conflict of interest and the part played by Mr. Wenzell revealed at the same time the House was considering the appropriation.

I am certain that if the information which was later developed by the Subcommittee on Monopoly and Antitrust of the Committee on the Judiciary about the conniving of Wenzell and the part he played in this conflict of interest had been brought out, as it would have been if the SEC hearing had continued on that Monday, June 13, it would certainly have caused a great deal of interest, and probably would have changed the vote in the House of Representatives.

Mr. CARROLL. Mr. President, will the Senator yield?

Mr. KEFAUVER. I yield.

Mr. CARROLL. Do I understand correctly from the able Senator from Tennessee that a hearing was in progress before the SEC, with a trial examiner presiding at the hearing, and that that proceeding was interfered with by a Commissioner of the Securities and Exchange Commission as a result of a telephone call from the White House?

Mr. KEFAUVER. The Senator is correct. It was as a result of an urgent call on the Saturday afternoon before the Monday when the hearing was to be continued.

Mr. CARROLL. Will the Senator from Tennessee inform the junior Senator from Colorado how long the hearings had been proceeding before the trial examiner of the SEC?

Mr. KEFAUVER. The proceedings had been before the trial examiner for considerably more than a month. The hearings had been held from day to day before the trial examiner on the bond financing of Dixon-Yates, or the Mississippi Valley Generating Co.

Mr. CARROLL. Then, although the proceedings had been going on for some

weeks, on Saturday, June 11, a telephone call came, not to the trial examiner—and there was no official motion made before the trial examiner for a postponement—but to the Chairman of the SEC, asking the Chairman to postpone the hearing. Is that correct?

Mr. KEFAUVER. The Senator is correct. Mr. Sherman Adams called Mr. Armstrong on Saturday afternoon at Mr. Armstrong's home, and asked him to postpone the hearing before the examiner. The hearing which was to take place on Monday was a continuation of the previous hearings.

Mr. CARROLL. As I understand from the able Senator's statement, the significance is that on the following day Wenzell was to testify before the trial examiner?

Mr. KEFAUVER. Wenzell was scheduled to testify on Monday, June 13, at the proceedings before the SEC, which was scheduled to begin at 10 o'clock a. m. That was the same day the House of Representatives was scheduled to and did take up the sharply contested appropriation bill concerning the Dixon-Yates transmission line.

Mr. CARROLL. Is it not true that, according to administrative law, when a trial examiner begins a proceeding, he sits in judgment, very much as a judge does in a court of law, to hear all the evidence, upon which he will base his decision; which is subject to review by the Commission, in this case the SEC, which is an arm of Congress?

Mr. KEFAUVER. The Senator is entirely correct. Mr. Armstrong himself testified and Mr. Timbers, the attorney for the SEC, testified that of course the proper procedure and the regular procedure would have been for him to appear before the examiner and to state his reasons for the request. They said that never in their experience had they known of the Government interfering with and ordering an examiner to postpone a hearing, as was done in this case; or, it might be added, without even telling the examiner or the attorneys what the reason was, but leaving them absolutely in the dark as to why the matter was taken out of the hands of the examiner, and without telling them why the hearing order was postponed.

Mr. CARROLL. What Government department attorneys were concerned with this particular case?

Mr. KEFAUVER. Of course, the attorneys for the Securities and Exchange Commission were present. Attorneys from the Atomic Energy Commission were there as observers. High-level attorneys from the Department of Justice were present, including Mr. George S. Leonard, Mr. Warren Burger, and Mr. McGinnis. That is set forth on page 396 of the hearings before the Judiciary Subcommittee. Also present were Bill Mitchell, who, I believe, was General Counsel for the Atomic Energy Commission, and a Mr. Morrison, an observer from the Atomic Energy Commission. They were not told the reason for the postponement; they were in the dark as much as anybody else.

Mr. CARROLL. Is the Securities and Exchange Commission an arm of Congress?

Mr. KEFAUVER. The Securities and Exchange Commission is an arm of Congress, charged with the duty of enforcing and carrying out in a judicial manner the Securities and Exchange Act and the Holding Company Act.

Mr. CARROLL. So actually, if I interpret correctly the statement of the Senator from Tennessee, if the Sherman Adams was the Sherman Adams I have in mind, the Presidential assistant at the White House, he belongs to the executive branch of the Government. Here was a case of the executive branch of the Government interfering with a quasi-judicial function of the Securities and Exchange Commission, which is an arm of Congress, to get a continuance, not from the trial examiner, but from the Chairman of the Commission himself, who would ultimately have to pass upon the decision of the trial examiner.

Mr. KEFAUVER. That was exactly what was done; and the whole thing was secretive.

Mr. CARROLL. I thank the Senator from Tennessee.

Mr. KEFAUVER. I thank the Senator from Colorado.

Mr. Adams told Mr. Armstrong, according to testimony, that there were some Government attorneys who were out of town who might want to consider whether the Government should intervene with respect to the testimony of Adolphe Wenzell.

This, it seems to me, was a phony excuse, because, as has been brought out in the colloquy with the Senator from Colorado, lawyers in high positions from the Department of Justice and the Atomic Energy Commission had been present and were present at the hearing before the examiner.

Mr. HILL. Mr. President, will the Senator yield?

Mr. KEFAUVER. I yield.

Mr. HILL. I have before me what purports to be a copy of the Senator's address. As I understood the Senator, he said that Mr. Adams stated that certain Government lawyers, who were then out of town, might want to intervene. As I read the Senator's address, I wonder if he did not mean to say that it was Mr. Armstrong who made the statement to the other members of the Commission.

Mr. KEFAUVER. Mr. Sherman Adams first called Mr. Armstrong on Saturday afternoon on a matter of urgency, and told Mr. Armstrong that certain Government attorneys wanted to consider whether they should intervene and object to the testimony of Wenzell. He said they were Government attorneys who were out of town. Then, as I shall point out later, Mr. Armstrong related that information to the other members of the Commission.

Mr. HILL. Did Mr. Adams state who the Government attorneys were, or what their capacity was, or whom they might represent, so far as the Government was concerned?

Mr. KEFAUVER. He apparently did not tell Mr. Armstrong. There was evidently some indication later that the attorneys about whom he was talking were Mr. Gerald D. Morgan, counsel for the President, and the Attorney General, Mr. Herbert Brownell.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. KEFAUVER. I yield.

Mr. MORSE. I commend the Senator from Tennessee for his documentation of what I think is so typical of the malfeasance of this administration. Am I correct in my understanding that the nomination which is before the Senate is that of a man by the name of Armstrong?

Mr. SALTONSTALL. Mr. President, would the Senator from Oregon be willing to speak a little louder?

Mr. MORSE. Am I correct in my understanding that the nomination we are considering is that of a man by the name of Armstrong, who, following a telephone conversation with the President's No. 1 adviser, Mr. Sherman Adams, postponed a hearing of the Securities and Exchange Commission, and that the interesting part of the timetable was that the postponement was to be until after the House Appropriations Committee had held its hearings in connection with an appropriation which involved the very agency which the man headed?

Mr. KEFAUVER. The Senator is correct in everything except that it was not the House committee; it was the House of Representatives itself, which, on the floor, was passing upon an appropriation which involved the very matter which would come out adversely to the administration before the SEC. The appropriation was acted upon; and immediately after it was acted upon, the hearing before the examiner took place.

Mr. MORSE. I may say, good naturedly, that this simply affords me further amusement at the consternation of my Republican colleagues when I point out the proof of the political immorality of this administration. This is one other bit of evidence.

Mr. KEFAUVER. I thank the Senator from Oregon for his question.

Mr. President, I said that the suggestion of the Assistant to the President in calling up Mr. Armstrong that some high Government attorneys might desire to intervene was on its face phony, because the Government attorneys from the Department of Justice and the Atomic Energy Commission were in attendance. It is well known that the Department of Justice has hundreds of lawyers, including Deputy Attorney Generals; and if anyone wanted to have the hearing postponed for any legitimate reason, he could have appeared before the hearing examiner and stated the reasons. He could have made an application or a motion before the hearing examiner in open session. If his superiors had desired to intervene, all the attorney would have had to do was to make a motion stating the reasons for the postponement, and let the question be considered in the open, because that would have been the judicial way in which to handle the matter. Sherman Adams' and Sinclair Armstrong's way was above and beyond the law. Their way was one of dealing under the table, not above it.

Mr. HILL. Mr. President, will the Senator yield?

Mr. KEFAUVER. I yield.

Mr. HILL. As the Senator said, those hearings had been proceeding for some days.

Mr. KEFAUVER. For many weeks.

Mr. HILL. Certainly it was not contemplated that the hearing before the trial examiner would end on that particular Monday. There would have been plenty of time for anyone to file a motion, present a petition, or make any request he saw fit to make.

Mr. KEFAUVER. Oh, yes.

Mr. HILL. Certainly it was not contemplated that there would be an end of the hearing at, say, 12 o'clock noon on that particularly Monday.

Mr. KEFAUVER. The Senator is entirely correct. After the hearing had been postponed upon the telephone call of Adams, and after the appropriation bill had been acted upon, the hearings started again, and continued for several weeks.

Nevertheless, Mr. Adams, in speaking to Mr. Armstrong, said he had another problem, the appropriation bill in the House, and that, anyway, the whole matter might be academic soon, because the city of Memphis might build its own steam plant.

To this Mr. Armstrong says he answered, "That is no concern of mine."

So the only conclusion one can draw is to be gleaned from the little bits of testimony which it has finally been possible to pull out of Mr. Armstrong. Mr. Adams pleaded executive privilege and would not tell us anything.

I surmise that what happened, and had to happen, was that Mr. Adams, knowing that Wenzell's testimony, developed on that Monday, might defeat the administration's position in the House of Representatives on the appropriation bill, called Mr. Armstrong urgently on Saturday afternoon and told him that Wenzell was going to testify; that all the conflict of interest which might appear or be disclosed would adversely affect the debate in the House of Representatives, and that he should take the bull by the horns and postpone the hearings, although such action would deprive the public and the Members of the House of Representatives of very important testimony, which they needed, and which would have affected the outcome in the House of Representatives. Mr. Armstrong did what he was requested to do.

Mr. Armstrong fulfilled well the capacity of errand boy, or messenger boy, for someone who asked him to act outside the judicial course. He met with the other Commissioners on Monday morning, June 13, 1955. He called an extraordinary meeting at 9:30 a. m. When the other Commissioners were present, he told them only a part of the story, only a part of the telephone conversation. He told them that certain Government lawyers were out of town, and might want to intervene. They decided to postpone the hearing. Mr. Armstrong, having excluded the Secretary of the Commission, Mr. DuBois, from the meeting, then called in the secretary and dictated minutes, saying that the hearing before the trial examiner was continued, but giving no reasons. They did not even tell the trial examiner, Mr. Ewell, the reason why the hearing had been first postponed and then continued.

The scene in the hearing room that morning was one of surprise. There were present at that time the high-paid lawyers from New York, who were representing Dixon-Yates, and also Government attorneys, including the attorneys for the Atomic Energy Commission. Also present were the attorneys representing the State of Tennessee, and other attorneys. All of them were in the hearing room, before the trial examiner. Subsequently an order continuing the hearing was issued. No date was set for resumption of the hearing, because apparently they did not know when the House of Representatives would complete the debate on the appropriation bill.

The trial examiner testified that he was surprised. The attorneys for Dixon-Yates were surprised, and they tried to find out why the hearing was postponed. The attorney for the opponents went so far as to file with the Commission a motion asking the Commission to state the reason why the hearing before the trial examiner was so unexpectedly and so surprisingly postponed. But the motion—by means of which the attorneys were trying to ascertain the reason, which Mr. Armstrong refused to state—to disclose the reason why the hearing was postponed, was summarily dismissed by Mr. Armstrong.

Mr. Armstrong, dutiful to his outside conversations, if not to the parties before his court, immediately after ordering the hearing postponed on Monday, June 13, called Sherman Adams on the telephone and assured him that the hearing had been continued and that the job had been done. The House, denied knowledge of the skullduggery, passed the appropriation bill, and acted in favor of the administration's position, by a vote of one-hundred-and-ninety-odd to one-hundred-and-sixty-odd—in other words, a closely contested vote.

Then, on Thursday, June 16, after the House had acted, the hearing before the Securities and Exchange Commission was resumed.

That was not the only instance, Mr. President, in which Mr. Armstrong participated in conferences with only one side. Others were detailed at the hearings. Nor do I wish to indicate that he freely admitted these things. Instead, they had to be dragged out of him; and in the course of the examination, he tried to mislead the committee. He constantly coupled with his plea of immunity a protestation that he did not mean to indicate thereby that there were any conversations.

Mr. President, Mr. Armstrong has not changed his stripes. He still protests; and the record of the hearing conducted last week by the Armed Services Committee indicates that in his opinion it is all right to have secret telephone conversations and to act in the dark in regard to quasi-judicial matters, so long as the assistant to the President of the United States requests them. He has not changed his role from that of a puppet dancing to the strings manipulated by an unseen hand.

Mr. President, I am glad, indeed, that the Senator from Wyoming [Mr. O'MAHONEY] is present, because throughout those appearances he asked Mr. Armstrong many, many questions; and the Senator from Wyoming knows how hard it was finally to bring out, bit by bit, the pieces of testimony from which we finally developed the truth about this situation.

Mr. O'MAHONEY. Mr. President, will the Senator from Tennessee yield to me?

The PRESIDING OFFICER (Mr. SCOTT in the chair). Does the Senator from Tennessee yield to the Senator from Wyoming?

Mr. KEFAUVER. I am very happy, indeed, to yield to my colleague, the Senator from Wyoming.

Mr. O'MAHONEY. Mr. President, I wish to make the record clear, by stating that I sat in diligent attendance upon the hearings held by the Antitrust and Monopoly Special Committee on the Dixon-Yates contract proposal, and that the statements which have been made by the Senator from Tennessee to my personal knowledge represent exactly the situation which occurred there.

Without question, there was design on the part of subordinates in the White House, headed by Mr. Adams, to direct the action of the Securities and Exchange Commission in such a manner as to promote the Dixon-Yates contract. The Government agencies involved—including the Bureau of the Budget, the Securities and Exchange Commission, and other branches of the Government—were acting in unison, under instructions from White House subordinates as to what to do. To my mind, that was a violation of the established method for the operation of independent agencies and quasi-judicial tribunals which are established by law. So far as I now recall, all the laws creating such bureaus and quasi-judicial agencies were carefully drafted so as to prohibit partisan control. The objective in every instance was to provide bipartisan operation of the independent agencies of the Government, so as to guarantee a fair hearing to the citizens and the corporations appearing before them.

Of course, I acknowledge that under Democratic Presidents—for instance, under the Presidency of Franklin D. Roosevelt—appointments to some of the Commissions were extended to liberal Republicans—the type of Republican who, in the language of the day, is called a Modern Republican. There is no doubt about that. But the language used by Congress in creating the Commissions, namely, that not more than a majority in any case shall belong to one political party, is an indication of the intent of Congress to make certain that the organizations, commissions, boards, and quasi-judicial agencies would be impartial in their judgment upon matters affecting the public interest.

What has happened? I know personally that when Mr. Truman became President, it was his policy to appoint well-known members of the other party to

positions of this character. It was Mr. Truman who, when he wished to join the Congress in establishing a Commission on Reorganization of the Government, sought a former President of the other political party, Mr. Herbert Hoover, and made him President of the Commission, the duty of which was to recommend reorganization of the Federal Government.

When a vacancy occurred on the Supreme Court, Mr. Truman nominated, and the Senate confirmed, Mr. Harold Burton, at that time a Republican Senator. There was no question about the fact that Senator Burton was not a supporter of Mr. Truman or of Mr. Truman's policies. Senator Burton belonged to the other party. He was selected by Mr. Truman because he felt that Senator Burton would be a representative of bipartisanship upon the Supreme Court of the United States.

In recent years there has been a very sad development, Mr. President. That is why I am glad the Senator from Tennessee is making these representations today. Under the Hoover Commission, for the purpose of economizing in expenditures, there was made a recommendation that the law be changed so as to give the President the power to appoint the chairman of each of the various boards and commissions, and that the chairman should have the right to handle by himself the so-called houskeeping functions of the agency. In other words, he was to be the head of the purchasing department, he was to be the head of the personnel department. He was to be head of the expenditures department, whatever it might be. He was to carry on those functions which would be most effective in reducing the cost of operation. But it was carefully provided that he should have no authority or power to direct the policy of the commissions.

After the administration changed there developed a new procedure which resulted in the expansion of the power of the chairman of these commissions over the decisions to be rendered. It was notable in the CAB. Not only was that true, but then the practice began of sending telephone messages from the White House to the chairman or head of a board or commission, by which he was directed, or it was suggested to him, that it would be desirable, in the view of the White House, to have a certain policy followed.

I am convinced, from what we saw in the Dixon-Yates case, and in the hearings which the Senator from Tennessee so ably handled, that the President of the United States did not know what his subordinates were doing, and that they were operating without his knowledge.

I think the revelations which were made with respect to the grants of tax amortization clearly indicate that subordinates in the White House have attempted to frame the policies of ODM, and in some instances have framed them. The same is true all through the Government under this administration.

The sad fact is that the President, for whom I have the highest personal respect, has been under burdens which make it impossible for him to handle all the details of various matters. That cannot be done. I did not hesitate to say to Admiral Strauss, the head of the Atomic Energy Commission, during the investigation which the Senator from Tennessee carried on, that, in my opinion, he had deceived his own President in the recommendation he made for the scuttling of TVA, and the building of a private power company to do what the city of Memphis wanted itself to do.

Mr. CARROLL. Mr. President, will the Senator from Tennessee permit me to ask the Senator from Wyoming a question at this point?

Mr. KEFAUVER. First let me say to the Senator from Wyoming I certainly agree with him and appreciate the observations he has made and his analysis of what has been happening in the commissions. I hope that if this debate accomplishes nothing else, it will at least serve the useful purpose of putting these arms of Congress—the quasi-judicial commissions—on notice that they are responsible to Congress, and that they should conduct fair hearings, without being led around and interfered with and dictated to by officials in the executive branch of the Government or by outsiders.

I think I should make the observation that while the President undoubtedly did not know this conversation was taking place—many things are happening of which he does not know about, and which I am sure he would not condone—nevertheless, I do not see any evidence on his part of criticizing or stopping this kind of thing, which must eventually come to his attention.

Mr. O'MAHONEY. Mr. President, if the Senator will permit, we must give the President credit for having finally canceled the contract.

Mr. KEFAUVER. Yes. We do give the President credit for having finally canceled it, but it was only after evidence was brought out by congressional committees, which the President should have known about, in my opinion, that the contract was determined to be null and void.

Mr. O'MAHONEY. The Senator is quite correct. That is true.

Mr. CARROLL. Mr. President, will the Senator from Wyoming yield?

Mr. O'MAHONEY. The Senator from Tennessee has the floor. If the Senator from Colorado desires to ask me a question, I shall try to answer it, with the indulgence of the Senator from Tennessee.

Mr. KEFAUVER. I yield to the Senator from Colorado for that purpose.

Mr. CARROLL. I thank the Senator, and will proceed with the understanding that he will not lose the floor.

As a new Senator, I wish to say that, with reference to the $6½ million appropriation which was then under discussion in the House of Representatives, here was a witness, Wenzell, who was going to appear before a quasi-judicial body to give testimony which might throw light upon the debate which was to begin in the House of Representatives——

Mr. KEFAUVER. Which was bound to throw light on it.

Mr. CARROLL. As a new Senator, I wish to say if the courageous and distinguished Senators from Tennessee, Wyoming, and Alabama were not raising the issue, I would not know, and the public would not know, what is the background of this situation. Normally, we would accept the recommendation of the Chief Executive and take his choice as to an Assistant Secretary of the Navy, because we want to approve the Chief Executive's wishes, unless there are serious objections raised. However, as the distinguished Senator from Wyoming pointed out, just yesterday we observed another example of interference—yea, and dictation—from a group in the White House in a similar situation that will cost the taxpayers millions of dollars.

Mr. O'MAHONEY. Billions of dollars.

Mr. CARROLL. Did the Senator from Wyoming say billions of dollars?

Mr. O'MAHONEY. I said billions of dollars.

Mr. CARROLL. I was thinking of a specific case, so I said millions of dollars.

The Senator from Wyoming, it seems to me, has been very charitable and generous, as he always is, in his remarks about responsibility in this type of case. But somewhere along the line we have got to fix responsibility upon some person.

We have now seen—at least, I have seen—in a short time two instances of the same individual functioning, from the White House, where considerable sums of money are involved.

This is the question I want to ask: "Upon what meat doth this our Caesar feed that he is grown so great?" Is it not Presidential power that permits him to reach into this department and that department changing decisions, stopping quasi-judicial decisions, transforming and changing policies affecting millions of dollars? If we cannot hold the head of the Government responsible, whom can we hold responsible? If I may use a biblical expression, is this the voice of Jacob, with the hand of Esau? Where are we going to fix the responsibility for this short of skullduggery?

Then I ask the last question. I do not know the gentleman whose nomination is before this body. I would not impugn his character or his family relations. But the question is, Is he of sound, independent character, as a public servant, one who can reach his own decisions, or will he again be one who will be subject to manipulation from persons who want to interfere with important decisions, especially as in the case which the distinguished Senator from Tennessee has outlined?

I have asked 2 or 3 questions, and I sincerely trust the Senator will answer. I know my distinguished friend, the Senator from Wyoming, is informed of procedures under administrative law and the functions of a trial examiner. A trial examiner should not be interfered with in the middle of a trial.

Mr. O'MAHONEY. Mr. President, if the Senator from Tennessee will permit me to answer, I can say, with respect to Mr. Armstrong, that in the first place, when he was giving his original testimony and seeking to claim executive privilege as to his conversation with Sherman Adams, he felt that he was under the influence of the White House in

this respect: A call had come to him from the man who was recognized in the public eye as the President's right arm. He would naturally assume that Mr. Sherman Adams was acting for the President, with the full knowledge and consent of the President. It was natural, therefore, that he would do his best to refuse to give the committee of Congress the information which was sought. So I asked him if he would not, after the adjournment of the committee that day, consult the Attorney General and ask the Attorney General whether he should not tell the story fully, because it dealt with a question of public policy. He did consult the Attorney General, and the next day he was much more free with his testimony with respect to what had happened; and it confirmed what the Senator from Tennessee has now said.

I wish to invite attention to the fact that the President of the United States delivers his messages to Congress, or sends them here to be read. He makes television broadcasts and radio broadcasts. He is seen by the people delivering these statements of policy. He also conducts press conferences. But I have never yet heard of any press conference conducted by Mr. Sherman Adams. I have never yet heard that Mr. Adams was willing to allow the press to come into his office and interrogate him about the patterns of policy which he is carrying out as the delegated representative of the President.

I say without any hesitation that if the President of the United States is willing to confront a press conference and answer the questions which are propounded, then the "Assistant President" should do likewise, particularly when the policies involve alleged violations of law.

The danger which we now confront is that there may be built up in the White House an interior army of executives who will operate not only the executive agencies, but the quasi-judicial boards, and deprive the people of the United States of free and open hearing and adjudication of their disputes in public under the law. When pressure is brought by the White House upon those who are filling places created by law for the purpose of performing certain functions, and, because of the expression of a desire that comes by telephone from the White House, their judgment is diverted from the evidence that is produced, then we have lost—completely lost—the division of powers in this country.

It seems to me the Senator from Tennessee is performing a fine public service by inviting the attention of the Senate to what transpired in this matter. I am firmly of the belief that every person nominated for an executive office, when he comes before a committee of the Senate which is considering the confirmation of his nomination, should be required to stand up and take an oath that, if confirmed, he will serve the public in the position for which he has been nominated without fear or favor, without political pressure, and according to the evidence adduced. I have taken the occasion myself, as chairman of a few subcommittees of the Committee on the Judiciary, to administer such an oath, and I have never yet found any official who was not willing to take it.

I thank the Senator for permitting me to answer the question.

Mr. CARROLL. I thank the Senator from Wyoming for his very fine remarks.

Mr. KEFAUVER. I thank the Senator from Wyoming for his splendid statement and observations. I feel they are particularly pertinent and important, because the Senator from Wyoming, with his long service in the Senate of the United States and his interest in quasi-judicial commissions, has greater experience in connection with the legislative background, and better understands all of these commissions and laws than, in my opinion, any other Member of the Senate.

Mr. DIRKSEN and Mr. BEALL addressed the Chair.

Mr. KEFAUVER. Before yielding to other colleagues, in answer to the question of the Senator from Colorado [Mr. CARROLL] as to whether Mr. Armstrong has changed his opinion about the desirability of letting somebody on the outside tell him what to do, I wish to say that he has not. Only a few days ago, before the Committee on Armed Services, Mr. Armstrong said again that he thought it was a perfectly proper thing to postpone this hearing on the basis of a private telephone call from Sherman Adams.

I think I should also point out at this time, since we have talked about whether the President knew what Mr. Adams was doing, we not only invited Mr. Adams to testify on several occasions, but we wrote him several letters, copies of which were sent to the President, urgently asking Mr. Adams to give us information about his participation in this matter. He pled privilege all the way through, and the President never told Mr. Adams to testify, or to answer those letters.

Mr. DIRKSEN. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Tennessee yield to the Senator from Illinois?

Mr. KEFAUVER. I yield to the Senator from Illinois.

Mr. DIRKSEN. Mr. President, I wish to interpose this observation at this stage of the proceedings: I have enjoyed the moral lecture we have had this afternoon, and I enjoyed the moral lecture we had yesterday. I merely wish to indicate now that after a while we will set the record straight.

Mr. KEFAUVER. I will listen with much interest to the statement of the Senator from Illinois. If he knows of any misstatement of fact which has been made up to this point, I should be very glad to have it pointed out.

The testimony is all recorded in black and white. I have cited no part of this transaction which is not borne out fully, and even more fully than I have stated, by the testimony in the record, by the words of Sinclair Armstrong himself, and by other testimony which is in the record.

Mr. HILL and Mr. JACKSON addressed the Chair.

Mr. KEFAUVER. I yield to the Senator from Alabama.

Mr. HILL. Is it not true that there is not a question here of a moral lecture, but that the question is one which involves the chairman of an independent, quasi-judicial agency, not an officer in the executive branch of the Government under the President of the United States, or under the White House. The question involves the chairman of a commission created by Congress and beholden to Congress, a commission which is supposed to be entirely independent and entirely quasi-judicial in its actions.

The duty and responsibility of the chairman of this Commission was to make certain that he performed his work as chairman of the Commission entirely independent of any requests, pressures, or demands from the executive branch—from the White House or anyone in the White House. The chairman and the members of these independent, quasi-judicial commissions, who are faithful to their duties, will perform their duties and meet their responsibilities without in any way being subject to any requests, demands, or pressures from the White House, or from any other agency on the outside.

Mr. KEFAUVER. The Senator from Alabama is entirely correct. If that is not so, then these independent commissions have no place in our Government. In order to have confidence in the Government and the commissions, the parties who appear before them must know that they are to receive fair consideration, and that someone on the outside will not be able to dictate the turn of the case.

In my opinion there can be no doubt, as I shall show later in greater detail, that the decision in this case was dictated by the executive department of the Government, and that the decision as to what the Securities and Exchange Commission was to do was determined by Mr. Demmler and Mr. Armstrong before the Commission ever met to consider the evidence which was presented and the arguments of lawyers.

Mr. JACKSON. Mr. President, will the Senator yield?

Mr. KEFAUVER. I yield to my distinguished colleague from Washington.

Mr. JACKSON. Did Mr. Armstrong ever make a disclosure for the record in connection with the proceedings before the Securities and Exchange Commission, giving the reason or reasons for the postponement of the hearing set for June 13?

Mr. KEFAUVER. I appreciate the question of the Senator from Washington. I am glad he has brought this subject up.

Mr. Armstrong refused even to tell the examiner, the attorneys for the parties who were present, or the attorneys for the Government agencies who were present, why the hearing had been postponed.

One of the parties in opposition to the financing filed a motion before the Commission asking the reason for this unusual procedure. The motion was summarily dismissed, without any explanation whatsoever. Mr. Armstrong never told the reason until we finally got it out of him bit by bit, in sworn testimony before the subcommittee of the Committee on the Judiciary.

Mr. JACKSON. As I understand, in the proceedings before the Securities and Exchange Commission no reason was given by him.

Mr. KEFAUVER. Not only did he not tell any reason, but he refused to tell any reason, and even dismissed a motion asking for a reason.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. KEFAUVER. I yield.

Mr. SALTONSTALL. I intend to make a statement in my own time. The Senator from Washington may not be present when I make my statement. I wish the record to be clear that this postponement was granted by the unanimous vote of the full Securities and Exchange Commission.

Mr. KEFAUVER. Upon the recommendation of Mr. Armstrong, who told only half the story.

Mr. DIRKSEN. Mr. President, will the Senator yield?

Mr. KEFAUVER. I yield.

Mr. DIRKSEN. The Senator knows full well that the Commission could not adjourn without a vote of the Commission, or the approval of the majority. As the Senator from Massachusetts points out, the action was taken unanimously, and no side was prejudiced. Moreover, the chairman was under no obligation whatsoever to tell the examiner, or anyone else on the Commission's staff, the reason for the postponement of the meeting.

Mr. KEFAUVER. I can only say that that is a very poor way to conduct a judicial proceeding. Mr. Armstrong himself said that never in his experience had the Commission interfered with a hearing before an examiner. Mr. Timbers, the attorney, who has been with the Commission for a long time, said that he had never before known of a situation like this. Certainly, in the orderly procedure, if anyone wished a postponement, he should have filed a motion with the hearing examiner, stated the reasons, and given the other side an opportunity to reply. The examiner should have an opportunity to pass on the request one way or the other; and if the parties were not satisfied they could appeal to the Commission.

In this case there was a remarkable procedure. Mr. Armstrong told the Commission only that some high Government attorneys might consider whether they wanted to intervene, and recommended that the Commission follow the unusual procedure of ordering the hearing examiner to continue the hearing. He did not tell the Commission that Sherman Adams was interested in the testimony and the debate on the Hill with reference to the Dixon-Yates appropriation. Members of the Commission were entitled to have that information.

After having made the unusual order continuing the hearing, Mr. Armstrong showed that everything was not aboveboard, because he refused to tell the reasons.

Mr. CARROLL. Mr. President, will the Senator yield?

Mr. KEFAUVER. I yield.

Mr. CARROLL. Let me say to the the Senator from Tennessee that all these actions are governed by the plain, simple rules of common sense. Why did this incident happen? It is clear to me, from hearing the statement of the Senator from Tennessee and from reading the hearings, that the reason the call was made was that someone wanted to hold off the hearing because the debates were coming up in the House of Representatives, involving $6.5 million, in connection with an issue which had great political portent. That is why the call was made from the executive branch to this arm of the Congress, a quasi-judicial agency, to hold up a hearing, because both a policy and money were involved.

That is not only a moral issue. It is a legal issue. If such a thing were to happen in the State of Colorado, and if there should be some interference with a trial examiner by a public utility commissioner, the newspapers would tear him apart. The people do not want politicians interfering with judicial or quasi-judicial hearings or decisions. Perhaps so many things have happened around Washington and we have become so callous and indifferent to the public interest that we are no longer able to manifest a sense of indignation. This case involves a violation of fundamental legal rights, which, in turn, are based upon moral rights, to which the Senator from Illinois has so lightly referred.

Again, let me say to the Senator from Tennessee that I commend him for an excellent presentation, and for his courage and forthrightness in going into this subject, when it might very easily have slid by and not have been called to the attention of the public and of the Senate.

What is the real issue involved? In the words of the Senator from Wyoming [Mr. O'MAHONEY], is this a public servant who will render service in the public interest? Or will he be bound by some partisan consideration, and allow himself to be manipulated by telephone calls? Will he act in the public interest? That is the issue upon which we are passing today.

Again I thank the Senator from Tennessee.

Mr. KEFAUVER. Mr. President, the Senator from Colorado has made a fine contribution to this consideration, and a very excellent statement of the general duty of quasi-judicial commissions, which I hope will be useful to our Government and our people.

Mr. SALTONSTALL rose.

Mr. KEFAUVER. Does the Senator from Massachusetts wish me to yield to him?

Mr. SALTONSTALL. No. I thought the Senator was about to conclude.

Mr. KEFAUVER. I am only getting started.

Mr. President, I regret that more Members of the Senate are not present. It is very difficult for me to understand how anyone can have confidence in Mr. Armstrong if he will consider, one by one, the events which took place, all of which are documented, with page references in the RECORD, to which I can refer to support any statement I make.

I wish to list, one by one, briefly in summary, the points which show that the nominee is unfit for this office, based upon his record at the Securities and Exchange Commission, and based upon his testimony before the subcommittee.

First, Mr. President, he showed that he did not have the proper conception of government, particularly with reference to an arm of Congress, a quasi-judicial agency, when he let a man from the outside call him up and give him information which was not on the record, and when he let someone on the outside dictate to him what his recommendation should be in this quasi-judicial agency, the Securities and Exchange Commission. In other words, when he let himself be pushed around and handled by Sherman Adams, he did not come up to the qualifications for the high office to which he has been named.

Second, Mr. President, in presenting the matter to his fellow members on the Securities and Exchange Commission, he failed and neglected to tell them the part in which the skulduggery was contained. That is, he failed and refused to tell them that the reason why Sherman Adams called him and asked him to continue the case was that he did not want the information about Wenzell to get out before the public at the time when the House of Representatives was considering the appropriation bill.

Mr. President, a chairman of a commission, mindful of his public duty, would not only have been disgusted with a request of that sort, but he would have been even more determined than ever to see that the facts were publicized. It was his duty to see to it that any information from the SEC which Members of the House of Representatives should have was disclosed promptly, so that they could have the benefit. But, no, joined in the conniving and the conspiracy, and let the hearing be continued over until after the House had acted.

Third, Mr. President, obviously the excuse he gave to his fellow commissioners, that certain Government attorneys wished to intervene, was phony. It was phony because topflight Government attorneys from the Department of Justice and the Atomic Energy Commission were present at the hearing before the hearing examiner. They were capable of making any motion that had to be presented. The very idea that the assistant to the President should have to call the chairman of the commission on Saturday afternoon, on the ground that somebody in the Department of Justice might desire to intervene, is silly and phony on its face. That alone should have put Mr. Armstrong on guard.

Fourth, Mr. President, he joined in and played a part in a scheme to suppress information which Congress was entitled to have. It was information of the kind which was going to come out from Mr. Wenzell, which later resulted in the Attorney General himself saying that "the alleged agreement is contrary to public policy, unlawful, and null and void by reason of the activities of one Adolphe Wenzell."

Yet this man joined in the scheme to prevent the House of Representatives from having that testimony.

That shows that Mr. Armstrong is not entitled to public trust.

Mr. President, Mr. Armstrong misused his position as chairman in interfering with the hearing before the examiner. He excluded the clerk of the Commission when the Commission was meeting. He secreted the reasons from the examiner and the parties. He dismissed the motion of the State of Tennessee when it sought to find out the reasons for the postponement.

Mr. President, in my opinion what I have recounted is more than sufficient to show that Mr. Armstrong did not measure up to the trust placed in him as Chairman of the SEC, and that no trust should be placed in him now.

But that is not all, Mr. President. Let us see what else Mr. Armstrong did. The telephone call from Sherman Adams came on Saturday afternoon, June 11. The hearing scheduled for Monday, June 13, was called off. The appropriation bill was acted upon in the House of Representatives. The hearing before the SEC was resumed on Thursday, June 16.

On July 12 of the same year, Mr. Armstrong was called before the Judiciary Subcommittee of the Senate. On his first appearance, in answer to the question as to whether someone in the executive department of the Government had telephoned him about calling off the hearing, he pleaded immunity and refused to testify.

Anyone familiar with the nature of the agency, who recognizes that the SEC is an arm of Congress, not of the executive branch of the Government, would know that the privilege did not apply to an arm of Congress; and the SEC is an agency of the Congress itself.

Mr. Armstrong was not justified in refusing to testify. The Senator from Wyoming [Mr. O'MAHONEY] pointed that out to him very clearly. However, he refused to testify. He went to see the Attorney General, and the Attorney General said he should testify.

He came back on July 13, the following day. At that time he said that Sherman Adams had called him on Saturday afternoon about two attorneys who might wish to intervene and to object to the testimony of Wenzell. I asked him time and time again, "Have you made a full disclosure?"

I invite Senators to look at page 9 of the hearings before the Committee on Armed Services, at which time, on July 13, Mr. Armstrong said that he had made a full disclosure.

Mr. Armstrong said, as appears at page 381 of the hearings before the Judiciary Subcommittee:

> Senator KEFAUVER, I have given you the whole story.

Again, at page 382, I asked him whether there was not any other information he ought to give the committee. He said:

> Mr. Chairman, I have just stated that the SEC has made full disclosure to the subcommittee on this matter in this statement that I have just read.

Again, at page 384, I asked Mr. Armstrong:

> Are you willing now to tell us of the conferences that you have had with people in the executive branch of the Government with reference to this case?

Mr. Armstrong said:

> I have made full disclosure on that subject.

I then asked him:

> Have you told us about all the conferences that you have had?

Mr. Armstrong said:

> Yes, sir.

How can anyone ask a clearer question as to whether a person has told the whole story or whether he has told us about the conferences? He answered:

> Yes, sir; I have told the whole story.

Mr. President, he had not told the whole story; not by a long shot.

Then, after having said that he had told the whole story, I asked him the question:

> Well, did Mr. Sherman Adams tell you about the appropriation bill pending in the House of Representatives, and asked you to continue this hearing because of the pendency of that appropriation?

After having said he had told the whole story, he refused to answer that question.

Mr. President, it is difficult for me to understand how trust can be put in a man who so testified.

He refused to testify again. Then, finally, he came back on July 20, and told us about the other part of the telephone conversation, about the pendency of the appropriation bill in the House of Representatives.

There is a very important other part which I hope my colleagues will consider. On July 13, when Mr. Armstrong came the second time, I asked him about other conferences with people in the executive branch of the Government. He said he had told the whole story.

The next time he appeared was on July 20. Between July 13 and July 20 we had received some information which indicated that he had not told us the truth when he said he had had no other conferences with the executive branch of the Government. We had obtained information that in August 1954, Mr. Demmler, then the Chairman of the SEC, and Mr. Armstrong, a member of the SEC, had gone to the Atomic Energy Commission and had met with top representatives and lawyers of the AEC—I believe that representatives of the Department of Justice also were there—for the purpose of telling the Atomic Energy Commission how they would have to draw up and present the contract in order to get SEC approval of the bond financing and the equity financing when the matter came before the SEC.

Mr. President, this is vitally important. Before the trial of the case was ever started, Mr. Armstrong and Mr. Demmler met with the officials of the SEC and other agencies of the Government to tell them how to prepare the case, so as to be sure they would win it. As Mr. Demmler said, "We went before them to explain the hurdles they would have to go over."

What were some of the hurdles? One was the fact that the TVA had not signed the Dixon-Yates contract. Another was that the power was not going to be used for national defense at all, but was to be for the use of the consumers of the city of Memphis. Another one was that, on the face of things, this plan probably violated the Holding Company Act, because it brought together two holding companies, the Southern Co. and the Middle South Utilities Co., in one operation, whereas they were not adjacent to each other.

At that secret meeting, where the AEC and the others were told how to present the case in order to get the approval of the SEC, a meeting held in the dark, behind the backs of the parties, behind the backs of the contestants, before the case was ever heard, although they knew it was coming up for hearing, Mr. Demmler and Mr. Armstrong explained to those present how to present the case in order to be sure to win it.

Mr. Demmler and Mr. Armstrong were there, participating in the discussion. Their advice was that the case would have to be brought under the national defense aspect, just as the OVEC case was. OVEC was the Ohio Valley Electric Corp., comprising a group of companies in Ohio which had joined together to furnish electricity to the atomic energy installation at Portsmouth, Ohio. The parties were told by Mr. Demmler and Mr. Armstrong that the case should be brought under the national defense aspect in order to get by the Securities and Exchange Commission.

Mr. President, did you ever hear of anything like that? Parties were coming before the Securities and Exchange Commission, thinking they would get a fair hearing, thinking they could present the facts; but the case had already been decided. The hearing before the SEC was a farce. Mr. Demmler and Mr. Armstrong had already told the Atomic Energy Commission and others exactly how to present the case in order to get a favorable ruling. The people who were opposing the case were simply going through the motions. The parties had a right to believe that the case had not been decided. They had a right to believe that there had not been secret meetings in which Mr. Armstrong had engaged, and in which he had told the Atomic Energy Commission exactly how to present its case.

In my experience, I have never seen or heard of the commissioners of a quasi-judicial agency, an arm of Congress, meeting with interested parties and telling them exactly how they should present their case in order to get a favorable ruling. I have never heard of such a meeting held in the dark, even before the hearing of the case began.

Not only did Mr. Demmler and Mr. Armstrong violate their trust in doing that; but Mr. Armstrong testified on July 13 that he had had no other conference. Yet when we discovered and when he knew we had discovered, about the August 1954, conference, he finally had to admit that such a conference had been held. That testimony will be found on page 15 of the hearings before the Senate Committee on Armed Services. The

testimony makes reference to the other hearings.

The hearings show that Mr. Demmler and Mr. McDowell, from the Securities and Exchange Commission; Mr. Cook, of the Atomic Energy Commission, and Mr. Joseph Campbell, a member of the Atomic Energy Commission, were all at the secret meeting.

Mr. President, what will happen to people who have hearings before the SEC and who think they will receive a fair and impartial hearing; who think they can present evidence and have it acted upon honestly? Here was an instance when the Commissioner himself, Mr. Armstrong, had already met with certain interested parties and told them how to present their cases in order to get him to decide the case favorably. Of course, they presented the case as suggested and simply went through the motions of a hearing.

No one can tell me, Mr. President, that any person who would be a party to such a proceeding is entitled to have his nomination confirmed for a high position. Furthermore, Mr. Armstrong told an untruth about what happened. When he was asked if he had had other meetings of the kind described, he said, "No"; that he had told the whole story. But when he found out that we knew there had been another meeting, he had to admit it himself.

Mr. President, if any of my colleagues wish to ask any questions about any of the meetings or any of the dates to which I have referred, I have here the documentation to show them, if they wish to ask about it or see it.

In considering this nomination, there is something more important than Mr. Armstrong or Mr. Wenzell or Mr. Sherman Adams or Dixon-Yates, or any of the other persons about whom I have been talking. Here is a case history of the sorry decline of the status of quasi-judicial agencies of the Government; a decline from places where a citizen can go to get a fair and open hearing, to political offices where no one can be certain that his case will be decided on the merits, where no one can be sure that a secret call, hurriedly made, by someone interested in the executive branch of the Government, may not dictate what a commission is to do.

J. Sinclair Armstrong, at the behest of Sherman Adams, played his full role in this decline, and he still does. Anyone who is so lacking in a sense of responsibility and in fitness will not have my vote, as a Member of the Senate of the United States, to fill another important post. I cannot in good conscience vote for the confirmation of the nomination of this man.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. KEFAUVER. I yield.

Mr. FULBRIGHT. The Senator realizes, of course, does he not, that the confirmation of this nomination will improve the quality of the SEC?

Mr. KEFAUVER. That is something I have not thought about. It is very likely that the confirmation of this nomination will improve the quality of the SEC. I do not know who will follow Mr. Armstrong on the SEC, but I hope that whoever is nominated will improve the quality of the SEC.

However, I think too much of the Navy to impose upon the defense establishment of the United States, with my vote, a man who not only has been shockingly unconscionable about what he has done in the SEC, but who has told an untruth, time and time again in the record, about what he has done.

Mr. FULBRIGHT. I realize that the Senator is a member of the Committee on Armed Services, but I do not think he should be so partisan in his approach. The SEC happens to be under the jurisdiction of the Committee on Banking and Currency. I am quite willing to have Mr. Armstrong go on to the Navy. I think his discretion in the Navy will be far less than it is in the SEC.

Mr. KEFAUVER. There may be something to what the Senator from Arkansas says. I can see how the Senator, reading this record, will have a sense of relief. But it is my understanding that Mr. Armstrong is to be in charge of the finances of the Navy. I do not mean to imply that he would not handle the finances correctly, but that is a very important position. A man who will take his orders from Sherman Adams and do anything Mr. Adams calls upon him to do, and who will then conceal it and not tell the truth about it, is not, I think, the man the Senate wants to have handling the finances of the Navy.

For my part, I wish to say that although I join the Senator from Arkansas in not wanting Mr. Armstrong to be Chairman of the Securities and Exchange Commission, I do not want him to serve in either position.

Mr. President, I yield the floor.

Mr. SALTONSTALL. Mr. President, I desire to speak briefly in support of confirmation of the nomination of J. Sinclair Armstrong, of Illinois, to be an Assistant Secretary of the Navy.

In my opinion it is fundamental that a presidential nominee has a presumption in his favor, from the simple fact that he has been selected and nominated by the President. Unless the nominee is clearly unfit to perform the duties of the office for which he has been nominated, or unless there are serious questions respecting his integrity, I believe that a presidential nomination should be confirmed. I have attempted to follow this precept irrespective of the political affiliation of the President making the nomination. In the present case, Mr. Armstrong is clearly fit, on his record, to perform the duties of the office to which he has been nominated. Certainly there is no question about his integrity; his record and his experience in life bear that out.

Mr. Armstrong's professional qualifications to serve as Assistant Secretary of the Navy for Financial Management have not been questioned. He was graduated from Harvard University cum laude, and from the Harvard Law School.

In Chicago, he was a member of one of the most reputable law firms in the Middle West. His law practice was supplemented by legal work for the Navy during World War II, and by his experience, first as a member, and later as Chairman of the Securities and Exchange Commission. Such education and experience should enable him to serve effectively in the position for which he has been nominated.

The opposition to Mr. Armstrong relates solely to the postponement of a hearing before an examiner of the Securities and Exchange Commission on the financing of the much contested Dixon-Yates contract. As Chairman of the Securities and Exchange Commission, Mr. Armstrong was called to testify before the Subcommittee on Antitrust and Monopoly, of the Senate Committee on the Judiciary, during the 84th Congress. That was the subcommittee of which the distinguished senior Senator from Tennessee [Mr. KEFAUVER] was chairman, if I understand correctly.

Mr. KEFAUVER. That is correct.

Mr. SALTONSTALL. Mr. Armstrong testified, among other things, that on the afternoon of Saturday, June 11, 1955, he received a telephone call from Governor Adams, the assistant to the President. Governor Adams requested that a hearing scheduled for June 13 be postponed because of the absence from Washington to two Government officials whose advice would be important to a decision as to whether the Government should intervene in the SEC proceedings. Mr. Armstrong relayed this request to the other members of the Commission early in the morning of June 13, and the postponement of the hearing was granted. Although it has been suggested that the purpose of the postponement was to prevent the publication of information which might have militated against favorable consideration of an appropriations bill pending in the House on June 13, to me it is highly signficant that the decision to postpone was made by the full Commission, instead of by Mr. Armstrong acting arbitrarily. It also appears that the decision to postpone was a unanimous one.

Another instance in which Mr. Armstrong's actions have been assailed is his request of the advice of the Attorney General respecting the application of the doctrine of executive privilege and the extent to which Mr. Armstrong might testify about his conversation with Governor Adams. The Securities and Exchange Commission exercises quasi-judicial powers, in addition to administrative ones. For many purposes this status has served as the basis for differentiating the SEC and similar regulatory agencies from purely executive agencies of the Government. Without attempting to pass judgment on whether the Chairman of an Agency such as the SEC should seek his legal opinions from the Attorney General, the record will show that Mr. Armstrong sought this counsel in compliance with suggestions and recommendations of the members of the subcommittee before which he was testifying.

In summary, Mr. President, my conclusion is that none of Mr. Armstrong's actions in this matter were improperly motivated. I urge that the nomination of Mr. Armstrong, to be an Assistant Secretary of the Navy, be confirmed. I believe that Mr. Armstrong is fully quali-

fied; I believe he is a man of integrity and character; and I believe his experience and education qualify him for the office for which he has been chosen.

Mr. CASE of South Dakota. Mr. President, the junior Senator from South Dakota is a member of the Committee on Armed Services and was present during the appearance of Mr. J. Sinclair Armstrong before the committee the other day following his nomination by the President for the position of an Assistant Secretary of the Navy. It was the first time I had ever met Mr. Armstrong. So far as I know, I had never talked with him before in my life. I had never had the privilege of being in a committee where he appeared. So I approached this subject without any prejudice, without any preconceived ideas about the matter in any way, shape, or form.

I heard the statement made by the distinguished Senator from Tennessee before the committee. I have heard a good deal of his remarks here today. I examined the record of the testimony before the Subcommittee on Antitrust and Monopoly of the Committee on the Judiciary during the hearings in the Armed Services Committee the other day, and on the basis of that examination I asked Mr. Armstrong certain questions that pertain to the central issue before the Senate.

I know of no one who makes any point against Mr. Armstrong on the ground that he lacks the educational or professional qualifications for the position to which he has been appointed. He was an outstanding attorney. He had studied accounting, in addition to having his law degree. He is acquainted with the operations of the Navy to a certain extent, and, in fact, had some experience with it. He has had experience in several administrative positions.

The opposition to the confirmation of his nomination revolves around whether or not he conducted himself properly as Chairman of the Securities and Exchange Commission, specifically with reference to the suspension of hearings which were being held before an examiner of that Commission in June 1955.

The testimony, I think, is perfectly clear on these points: That on June 11, a Saturday, Mr. Armstrong received a telephone call at his home from Sherman Adams, assistant to the President, suggesting the Securities and Exchange Commission might consider the postponement of the hearing before the examiner for a few days, while responsible attorneys for the Government determined whether or not they desired to intervene.

On the following Monday morning, the 13th of June, Mr. Armstrong presented the matter to the Commission. By unanimous vote, they directed him to advise the hearing examiner that they would like to have the hearing suspended for a few days, pending the determination of this matter, which he did, and the hearing was suspended until 2 days later, when, on further communication or conversation between Mr. Armstrong and Governor Adams, Mr. Armstrong was advised that the Government attorneys had decided that they did not care to intervene. Whereupon, the Commission directed that the hearing be resumed, and it was resumed, either on that afternoon of Wednesday or the following day, Thursday, June 16.

The questions at issue hang upon whether or not there was good faith in the actions of Mr. Armstrong. Apparently, when he first appeared before the Subcommittee on Antitrust and Monopoly, he had been asked to testify with reference to his conversation with Governor Adams, and he declined to testify, on the ground of privilege, unless the privilege were waived.

As I gathered from statements before the committee the other day, pursuant to a suggestion made, the chairman of the Securities and Exchange Commission, Mr. Armstrong, consulted the Attorney General as to whether or not privilege could be exercised with reference to the conversation. In any event, the privilege was waived, if privilege existed, and Mr. Armstrong did testify with respect to the reasons given by Mr. Adams to him, and in turn, by him, Mr. Armstrong, to the Commission, for suspending the hearings.

Subsequently, it was asked whether or not that was all of the conversation. Mr. Armstrong again cited privilege, but agreed to see if privilege might be waived on that question. Privilege was waived, and he testified then as to the second part of the conversation.

I should like to read at this time, if I may, a few excerpts from the testimony, not before the Armed Services Committee the other day, but before the Subcommittee on Antitrust and Monopoly of the Committee on the Judiciary.

Mr. Armstrong was testifying, and I quote from the record:

> In conformity with the last paragraph of the Attorney General's opinion letter which I have just read into the record——

Mr. KEFAUVER. Mr. President, will the Senator yield? Will the Senator give us the page from which he is reading?

Mr. CASE of South Dakota. I am reading from the excerpt which was given in the hearings before the Armed Services Committee the other day, and, by reference, the quotation is taken from page 279 of the hearings of the subcommittee of the Judiciary Committee. That appears beginning on page 26 of the hearings before the Armed Services Committee. I now read from the hearings:

> In conformity with the last paragraph of the Attorney General's opinion letter which I have just read into the record, I should like to inform the subcommittee that the action of the Securities and Exchange Commission on Monday, June 13, 1955, in voting to continue temporarily the debt-financing hearings then pending before the Commission upon the applications of Mississippi Valley Generating Co., Middle South Utilities, Inc., and the Southern Co. was based upon the following information conveyed by me as Chairman of the Commission to my fellow Commissioners that morning at approximately 9:30 a. m.:
>
> That on Saturday, June 11, 1955, I received a telephone call from the assistant to the President of the United States, Hon. Sherman Adams, inquiring as to whether the Commission would consider the advisability of a brief adjournment of the debt-financing proceedings then pending before the Commission in the Mississippi Valley Generating Co. matter, for the reason that certain Government attorneys——

Senator O'MAHONEY. What was that date, may I ask?

Mr. KEEFE. Saturday, June 11.

Mr. ARMSTRONG. Saturday, June 11.

> For the reason that certain Government attorneys interested in this proceeding were away from the city of Washington and they desired an opportunity to determine whether the United States Government which is a party to the power contract between the Atomic Energy Commission and the Dixon-Yates companies, might wish, in the public interest, to seek permission of the Commission either to intervene or to participate as amicus curiae in the pending debt financing proceedings, specifically for the purpose of interposing objections to further testimony of the Witnesses Linsley and Wenzell.
>
> In response to Governor Adams' inquiry, I stated that I would be glad to convey his request to the full Commission for whatever action the Commission might deem appropriate.
>
> Accordingly on Monday, June 13, 1955, I stated to the Commission in substance the conversation I had had with Governor Adams on the previous Saturday as above set forth.
>
> After due deliberation the Commission voted to continue the hearings in the debt-financing proceedings, subject to reconvening at the call of the Commission and so instructed the hearing examiner, Mr. Ewell.
>
> We have available, and I should like to have placed in the record at this point, certified copies of the Commission's minutes of June 13, 1955, reflecting the action thus taken by the Commission as well as related action by the Commission in response to an inquiry by Hearing Examiner Ewell.
>
> The certified copies are being prepared and will be here in just a few minutes.

That was the direct testimony of Mr. Armstrong, that what he presented to the Commission was the request by Governor Adams that they consider continuing the hearing over until certain Government attorneys, who were away from the city of Washington, who were interested in the proceeding, could determine whether or not they wished to intervene in the proceeding, since the Government itself was a party to the contract with Dixon-Yates.

Then I asked Mr. Armstrong a direct question about the second portion of Governor Adams' telephone call. The Senators will recall that the able Senator from Tennessee [Mr. KEFAUVER], in referring to the matter, has invited attention to the fact that there was a second part of the Adams conversation which was not disclosed in the first testimony, but subsequently was disclosed when privilege was waived. That second portion of Governor Adams' call related to the pending action in the House of Representatives.

There are two things to be determined about that, it seems to me, Mr. President. One is whether or not that portion of the conversation was repeated to the Commission, in order to determine whether the Commission based its action upon that. The second is whether the chairman himself regarded it as germane or pertinent to the portion of Governor Adams' conversation which suggested the continuation of the hearing.

I asked Mr. Armstrong this question:

> Mr. Armstrong, I would like to ask you whether or not, when you presented the matter to the Commission, you stated to

them anything about the portion of Governor Adams' telephone conversation with you in which he referred to the House of Representatives?

Mr. ARMSTRONG. To the best of my recollection, the answer is, "No."

This was Mr. Armstrong's testimony the other day before the Committee on Armed Services.

Then I asked him:

Did you state to them that the reason you were proposing it or the reason that Sherman Adams proposed it was for the reason you state here? [Reading:]

"That certain Government attorneys interested in this proceeding were away from the city of Washington and they desired an opportunity to determine whether the United States Government * * * might wish, in the public interest, to seek permission of the Commission either to intervene or to participate as amicus curiae."

Mr. ARMSTRONG. Yes, sir; that is absolutely the basis on which I told them.

Then I asked Mr. Armstrong what he had to say with respect to the second part of the conversation, and I read to him his testimony before the subcommittee on Antitrust and Monopoly of the Committee on the Judiciary, where he had been asked questions with respect to that part of the conversation during which Governor Adams said that another matter was involved, namely, the pendency of the appropriation bill in the House of Representatives.

I invite the attention of Senators now to the record of hearings before the Armed Services Committee, on page 27 of which is a quotation from page 765 of the hearings before the Subcommittee on Antitrust and Monopoly:

Senator LANGER. Yes. Mr. Armstrong has repeatedly made a statement that he has given us the entire conversation on June 11.

Senator KEFAUVER asked you, sir, whether or not Mr. Adams, when you talked with him, mentioned the fact that the appropriation bill was pending over there in the House and you refused to answer. You have not answered it to this day.

Mr. ARMSTRONG. Oh, Senator, I have.

Mr. TIMBERS. He certainly has testified fully about that.

I then continued to read from the testimony given before the Subcommittee on Antitrust and Monopoly:

Mr. ARMSTRONG. I testified fully and completely on that subject. I said during the course of the conversation the governor stated that he had another worry and another concern, namely, that this TVA appropriation was pending in the House, and I answered that that does not concern the SEC, and he said, "That is right."

That is, that Governor Adams assured Mr. Armstrong that was right. Then Mr. Armstrong continued, and said:

I testified to that fully and completely. I testified to everything that was said between Governor Adams and myself on June 11.

Then I asked Mr. Armstrong:

You have indicated this morning that this was the portion of the first Adams conversation which you regarded as not being a part of the conversation relative to the Dixon-Yates matter.

And Mr. Armstrong said:

That is correct, sir.

Senators may wish to read the rest of the conversation or colloquy, but I have read the gist of it, and the heart of it. Mr. Armstrong did not regard the latter part of Governor Adams' conversation, relating to the pendency of the appropriation bill in the House of Representatives, as any concern of the Securities and Exchange Commission, and testified that he so stated to Governor Adams at the time, and that Governor Adams said, "That is right."

The record is perfecly clear—and there is nothing in the record to indicate anything else—that when Mr. Armstrong presented the matter to the Securities and Exchange Commission he presented it solely upon the basis of the suggestion that the Government attorneys were out of town, and that they wished a little more time to determine whether or not they should intervene. The record is perfectly clear, and there is nothing to the contrary, that Mr. Armstrong made no reference to the pendency of the appropriation bill before the House of Representatives when he brought the matter to the attention of the Commission. The Commission acted solely for the reason which was suggested, and they acted unanimously, and unanimously directed that the hearings be continued.

If Senators can find in that procedure anything that would warrant some of the terms the Senator from Tennessee has used today, they will have to look for something which I was unable to find by going through the record.

Mr. KEFAUVER. Mr. President, will the Senator yield?

Mr. CASE of South Dakota. I certainly saw nothing scheming, nothing shady, and nothing disreputable in that. It was a straightforward statement.

On that basis, I can see no reason for failing to vote to confirm the nomination by the President of Mr. Armstrong to be an Assistant Secretary of the Navy.

Mr. BUSH and Mr. KEFAUVER addressed the Chair.

Mr. CASE of South Dakota. I yield first to the Senator from Connecticut [Mr. BUSH].

Mr. BUSH. Mr. President, I think Senators should all be very grateful to the distinguished Senator from South Dakota for so completely clarifying the record. Those who know the Senator from South Dakota realize that he is always meticulous in detail on such important matters, and what he has just said certainly confirms that impression which we all have of him. I am only one of those, I am sure, who are very grateful to him for the clarification of this record, which is full of what I consider to be political attacks upon a very fine young man. I think that there are contingent objectives involved, in addition to the objective of attempting to destroy the career of a young man who has very faithfully served our Government.

Fortunately, we have in the record some statements about him, such as that from his own Senator, the Senator from Illinois [Mr. DIRKSEN]. I should like to place in the RECORD at this point a brief quotation from what was said by the Senator from Illinois when he introduced Mr. Armstrong to the Armed Services Committee. He said:

Two years later, after his confirmation, he was made the Chairman of that Commission. I come here with a great degree of pride this morning in presenting him for new responsibilities in the Navy.

I have had the opportunity to observe his work in the Government, and I think he is one of the most talented and most capable men who has come into the public service.

Skipping a few lines—

I have watched him in his capacity as a member of the Commission, and I have observed him as Chairman of the Commission; and when you stop to think how ranging this function is in all sections of the country, I think he has done a truly superb piece of work.

From a veteran like the distinguished Senator from Illinois, I think that is very high praise, indeed. It should be very convincing to Senators.

I wish to say in that connection that, as a member of the Committee on Banking and Currency, I voted to confirm the nomination of Mr. Armstrong as a member of the Securities and Exchange Commission in 1953. He has lived up to our very high expectations for him as a member of the Commission, and for the past 2 years as its chairman. I have found him to be in all respects a most thorough and hardworking man, a very conscientious man, and a thoroughly honest man. He is very direct, and is the last person in the world who would attempt to conceal anything of importance from a committee of the Senate. I think the allegations which have been made about him are most unfortunate, indeed.

Again, I thank the Senator from South Dakota for clarifying the record. I wish to associate myself completely with his endorsement of Mr. Armstrong, and to express the hope that the Senate will confirm the nomination by an overwhelming majority.

Mr. CASE of South Dakota. I thank the Senator from Connecticut for his very fine remarks.

I now yield to the Senator from Tennessee.

Mr. KEFAUVER. Mr. President, I thank the Senator for yielding.

The Senator from South Dakota has discussed various parts of the Armstrong record. I invite the attention of the Senator to the fact that, on page 9 of the hearings before the Armed Services Committee, Mr. Armstrong made it very clear that he had told about all the conferences he had had with persons in the executive branch of the Government with reference to this case. This testimony was given on June 13. Between that time and June 20, when he returned, we learned that Mr. Armstrong had been to the Securities and Exchange Commission with Mr. Demmler, on August 3, 1954, just about the time the case was to be presented to the Securities and Exchange Commission, to give them instructions about how to get over certain hurdles in order to get the financing approved. I wonder what the Senator from South Dakota thinks of that—first, as to the propriety of meeting secretly with parties interested in the contract, when the other parties were not present; and, secondly, with respect to his refusal to tell about such a conference, and his absolute declaim that there had been such a conference.

Mr. CASE of South Dakota. The junior Senator from South Dakota has not had occasion to look up the references with respect to the appearance with Mr. Demmler. I do not recall that that question arose before the Armed Services Committee the other day. However, I did endeavor to determine whether or not Mr. Armstrong considered that he had made a complete disclosure under the first waiver of privilege. I invite the Senator's attention to page 28 of the hearings before the Armed Services Committee, near the bottom of the page:

Senator CASE. You did not communicate that second part of the conversation, neither to the Commission, nor did you regard it as a part of the matter on which you had the release of the privilege the first time?

Mr. ARMSTRONG. Yes, sir.

Senator CASE. So, consequently, you had made a complete disclosure of the portion of the conversation relating to the Dixon-Yates matter by the first testimony?

Mr. ARMSTRONG. That is absolutely correct.

Senator CASE. When you sought a release of privilege on the latter part of the conversation, it was for the purpose of meeting the committee's desire to know what the balance of the conversation was about?

Mr. ARMSTRONG. Yes, sir.

Senator CASE. And you testified to that, even though you did not regard it as bearing upon the decision of the Commission to ask the examiner to suspend the hearing?

Mr. ARMSTRONG. That is correct, Senator CASE.

Mr. KEFAUVER. I may say to the Senator from South Dakota that in the hearing before the Armed Services Committee I did refer to the fact that there had been another conference about the case with other officials. That is in my original statement. The Senator will find, on page 656 of the Antimonopoly Subcommittee record, and also at the bottom of page 15 of the hearings before the Armed Services Committee, that, after having said that he had made full disclosure of all the meetings with others in the executive department, he finally admitted this meeting. A part of the colloquy in that connection is set forth on page 15. It is set forth in full in the hearings before the Antimonopoly Subcommittee, at page 656 and following. I read from page 657:

Senator KEFAUVER. Well, the purpose of the meeting, I take it, was that it was contemplated that soon the matter would be before the Commission in connection with the equity and capital financing of Dixon-Yates.

Mr. ARMSTRONG. That is right.

Then Mr. Demmler explained further as to the purpose of the meeting, namely, how to get over certain hurdles.

Mr. CASE of South Dakota. The portions of pages 13, 14, 15, and 16 of the hearings before the Armed Services Committee to which the Senator refers are excerpts from prior records. The junior Senator from South Dakota had not, perhaps, heard all of that when the Senator was reading it. I am not sure whether it was read, or whether it was placed in the RECORD as an excerpt.

Mr. KEFAUVER. If the Senator will look at the middle of page 11 of the hearings before the Armed Services Committee, he will see that I called attention to this subject in a prepared statement in the following language:

To climax his performance in this matter, he finally decided to relate to the subcommittee other conferences which were held with representatives of other agencies of the Government. Mr. Armstrong could not explain why, in the course of his earlier appearances before our subcommittee—see page 384—he claimed that he had made full and complete disclosure with respect to conferences with other agencies.

At page 656 of the printed hearings before the Antimonopoly Subcommittee reference is made to the meeting which he had with former Chairman Demmler and representatives of the Atomic Energy Commission.

Mr. CASE of South Dakota. As the junior Senator from South Dakota stated at the outset of his remarks, he is not familiar with every part of the record. He had not met Mr. Armstrong before this subject came before the Armed Services Committee the other day. I endeavored, during the time the nomination was pending there, to examine as many points as possible in the earlier record. I could not read a book of 600 or more pages and be sure that I found everything that might be contained in that book. I did not find the reference to which the Senator from Tennessee adverts, but I did note that when Mr. Armstrong appeared before the committee the Senator from Tennessee asked him whether he was prepared to tell us about any other conferences he had had affecting the Dixon-Yates matter, and Mr. Armstrong replied that he would be delighted to do so. Mr. Armstrong then proceeded to testify with reference to the meeting of August 19, 1955. Therefore, in any event, he testified relative thereto.

There are two other little side issues of the matter now under discussion. One is whether the telephone call should have been made by Governor Adams. That I am not in a position to say. I knew nothing about it before it came out in this record. In any event, Governor Adams' nomination is not before the Senate. Furthermore, so far as making the suggestion, or of leaving it to the subordinate Government attorneys who were present at the hearing, is concerned, the entire Commission was apprised of the fact that Governor Adams had made the call.

The other collateral issue that developed was as to whether or not the Attorney General was the proper person for Mr. Armstrong to consult in seeking a release of privilege so that he could testify as to the conversation.

The chairman, the Senator from Georgia [Mr. RUSSELL], raised that point, and said that, so far as he was concerned, he would think that possibly the Chairman of the Securities and Exchange Commission should have access to the solicitor for the SEC or the Attorney General. Therefore, Mr. Armstrong, in going to the Attorney General for the release of privilege, was following the suggestion of the chairman of the committee.

Since he was following the suggestion of the chairman, who was conducting the hearing, and I, I may add, because of the fact that the author of the communication was in the executive branch of the Government, and the authority would therefore rest with the author of the communication, no further attention was given to that point. We felt it was appropriate for the Chairman of the Commission to be guided by the opinion given by the Attorney General, since it had been suggested by the chairman of the committee that he seek his opinion.

In summary, then, it seems to me that we have a situation in which Mr. Armstrong did act in good faith. We have the nomination of a man who is qualified to hold the position to which he has been nominated, and I hope the Senate will confirm his nomination overwhelmingly.

Mr. DIRKSEN. Mr. President, in the colloquy between the senior Senator from Tennessee [Mr. KEFAUVER] and the Senator from Colorado [Mr. CARROLL], the Senator from Colorado used the terms "callousness" and "disregard of responsibility." It occurs to me that in connection with this case there is such a thing also as suspicion of the motive and suspicion of an official of Government to the point where the official, who was doing his very best, who was honorable in every respect, and whose motives and actions were unimpeachable, can be destroyed.

I see here some suspicion of Mr. Armstrong, all because of a set of circumstances which never for a moment persuaded me that anything sinister had occurred.

If I were to take one by one the items which I believe argue for the confirmation of Mr. Armstrong's nomination, I would first of all say that there is nothing in the record whatever which impeaches his character, and that there is nothing by way of reflection upon his honesty, his integrity, his honorable action as a Government servant and as the Chairman of a regulatory agency of Government with quasi-judicial capacities and functions.

There is nothing in the record from any side to impeach his character, and it stands out, as it always has, as absolutely unimpeachable.

Second, Mr. President, I argue in his behalf his educational background. At this point I ask unanimous consent to have printed in the RECORD the details with respect to his education and background as they appear at pages 3 and 4 of the hearings before the Committee on Armed Services.

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

Education: Allen-Stevenson School, New York City, 1923–29; Milton Academy, Milton, Mass., 1929–34 (graduated with distinction for high scholarship); Harvard College, Cambridge, Mass., 1934–38 (graduated bachelor of arts cum laude); Harvard Law School, Cambridge, Mass., 1938–41 (graduated doctor of laws); further study at Northwestern University School of Commerce (accounting department), 1942–44, 1946–48.

Legal qualifications: Passed New York State bar examination, June 1941, but not admitted to New York bar because moved to Chicago, July 1941; admitted to Illinois State bar, November 1941. Also member of the bars of United States District Court for the Northern District of Illinois, Eastern Division; United States Court of Appeals,

Seventh Circuit; United States Supreme Court.

Professional experience: Associated with Isham, Lincoln & Beale, 72 West Adams Street, Chicago, Ill., 1941–45. United States Naval Reserve, February 1945 to June 1946. Lieutenant (junior grade) assigned to Office of the General Counsel, Navy Department, Washington, D. C. Legal work relating to Navy contract termination and surplus property disposal. Associated with Isham, Lincoln & Beale, July 1946 to 1950. Became member of the firm January 1950. Legal work relating principally to corporation law and finance and, to some extent, to municipal finance. Resigned effective July 16, 1953. Appointed by President Eisenhower a member of the Securities and Exchange Commission. Assumed office July 16, 1953. Appointed Chairman of the Commission May 25, 1955. Representative of the Securities and Exchange Commission on the President's Conference on Administrative Procedure.

Professional associations: Chicago Bar Association (member, committee on corporation law, 1951–53), American Bar Association, Federal Bar Association, American Law Institute, American Judicature Society.

Other activities, education or charitable: A director or trustee of the following agencies affiliated with the Chicago Community Fund: United Charities of Chicago (member, legal aid committee, family service committee, personnel practices committee); Chicago Maternity Center (executive committee); Scholarship and Guidance Association. Also a director or trustee of Francis W. Parker School, Elizabeth McCormick Memorial Fund (Child Welfare), Schweppe Foundation (medical research), Chicago Tennis Patrons, Inc. (resigned from these in 1953).

Social: Saddle and Cycle Club of Chicago, Harvard Club of New York City, Chevy Chase Club, Chevy Chase, Md.

Hobbies: Tennis, golf.

Politics: Republican: 42d Ward Republican Organization (Chicago), 42d Ward Republican Business Men's Committee.

Church affiliation: Protestant Episcopal: St. Chrysostom's Church, Chicago, Ill.

Family status: Married Elisabeth Stillman, of New York, N. Y., June 1940; children: Katherine Chase Armstrong, 15; James Sinclair Armstrong, Jr., 13; Stephen Howard Armstrong, 10; Robert Stillman Armstrong, 8.

Mr. Armstrong was appointed to the Securities and Exchange Commission by President Eisenhower in July 1953 and on May 25, 1955, was designated by the President as Chairman of the Commission.

A graduate of Harvard College (A. B. cum laude, 1938) and the Law School of Harvard University (LL. B., 1941) Mr. Armstrong had been engaged in the general practice of law in Chicago, Ill., since 1941, first as an associate, and, from 1950, as a partner in the firm of Isham, Lincoln & Beale.

He passed the New York State bar examination in June 1941 and was admitted to the bar of the State of Illinois in November 1941. From 1942 to 1944 and from 1946 to 1948, he engaged in further study in the accounting department of the School of Commerce of Northwestern University. He is also admitted to the bars of the United States District Court for the Northern District of Illinois, Eastern Division; United States Court of Appeals, Seventh Circuit; and the United States Supreme Court.

From 1945 to 1946, he served in the Office of the General Counsel of the Navy Department in Washington, D. C., being separated to inactive duty as a lieutenant (junior grade). While a member of the Securities and Exchange Commission, he served as the Commission's representative on the President's Conference on Administrative Procedure.

He is a Republican and a member of the American, Federal, and Chicago Bar Associations, and, of the latter association, was a member of its committee on corporation law from 1951 to 1953.

He is also a member of the American Law Institute and the American Judicature Society, and has been active in charitable work, serving variously as a director or trustee of the United Charities of Chicago, Chicago Maternity Center, Scholarship and Guidance Association of Chicago, Francis W. Parker School, Elizabeth McCormack Memorial Fund, Schweppe Foundation, and the Chicago Tennis Patrons, Inc.

He is also a member of the Saddle and Cycle Club, Harvard Club of New York, and the Chevy Chase Club, Chevy Chase, Md.

A Protestant Episcopalian, he married the former Elizabeth Stillman, of New York, N. Y., in June 1940, and they have 4 children: Katherine Chase Armstrong, 15; James Sinclair Armstrong, Jr., 13; Stephen Howard Armstrong, 10; and Robert Stillman Armstrong, 8.

Mr. DIRKSEN. Mr. Armstrong is a graduate, with honors, of Harvard College. He received his law degree at Harvard. Then he went to Northwestern University and pursued accounting for a number of years. He then associated himself with one of the outstanding law firms in the State of Illinois. At long last he came to Washington to enter public service. Before he ever entered public service, he had the responsibility, even as a young man, of passing on nearly $1 billion worth of securities. That in itself speaks eloquently for his capacity, his sense of responsibility, and the confidence that the people in the business world repose in his judgment.

Along with all that, he is a family man, with a family of four fine children. I know the whole family quite well.

So, Mr. President, here is a young man of 42 years with an outstanding educational background. Certainly, if Government has ever needed a man of such talents, it needs him today.

Mr. MALONE. Mr. President, will the Senator yield?

Mr. DIRKSEN. I yield.

Mr. MALONE. I should like to ask the Senator from Illinois some questions. Has there ever been a time when Mr. Armstrong's integrity was questioned?

Mr. DIRKSEN. I have no idea that it ever has been. I have never heard his integrity assailed.

Mr. MALONE. The Senator probably would know, if it had been, would he not?

Mr. DIRKSEN. I should think so.

Mr. MALONE. Did he do a fair job in the SEC where he served as Chairman?

Mr. DIRKSEN. I may say to the distinguished Senator from Nevada that I was in the House of Representatives, long ago, when the SEC was created. I was on the Committee on Appropriations of the House, and later in the Senate, when from time to time appropriations for the SEC were considered. I remained in rather close contact with the SEC. There was an opportunity, therefore, to observe the work of the Commission. I believe Mr. Armstrong has done superb work in the public interest, not only as a member of the SEC, but as its administrative head and as its Chairman.

Mr. MALONE. Has any Senate committee ever brought him before it to question his actions as a member of the SEC?

Mr. DIRKSEN. Does a Senate committee ever call an administrative head before it?

Mr. MALONE. No. Has any Senate committee ever questioned Mr. Armstrong's integrity and honesty of decisions in the SEC?

Mr. DIRKSEN. Every Senate committee has jurisdiction over the matter and can properly call before it any administrative head.

Mr. MALONE. Has any committee ever questioned his integrity or said that he had betrayed his trust or lacked integrity in making his decisions?

Mr. DIRKSEN. Let me ask the Senator from Nevada whether the purport of his question is to indicate that it is a rather singular procedure which is taking place at the present time.

Mr. MALONE. No; it is to determine whether Mr. Armstrong has ever been accused of betraying his trust in public office.

Mr. DIRKSEN. None that I know of. To me it is rather singular that 2 years after he was brought before the Judiciary Committee that this matter should recur again.

There was ample opportunity in 2 years, if there was anything wrong with Mr. Armstrong, to impeach him and to assail him; but no effort was made until an adequate vehicle came along, in the form of the President's nomination of Mr. Armstrong as an Assistant Secretary of the Navy.

Mr. MALONE. If the Senator will yield further, I should like to ask my final question. Does he agree with me that if there is no question of integrity, no question of ability, and no question of loyalty, should not the President of the United States be able to appoint a man of that character to any responsible position to which the President desires to appoint him?

Mr. DIRKSEN. That is my notion about it. Some years ago I became curious about a certain person in Government, and I wondered whether his nomination could be recalled.

I searched the record, and I found some decisions to the effect that once the Senate has confirmed a nominee, his nomination cannot be recalled. I then discussed the matter with the late Senator Taft. He said the President is entitled to latitude in such matter, and unless there is an impeachment of character or there is something in sharp derrogation of the man's integrity, the President's judgment should not be assailed.

Mr. MALONE. Over the period of the 11 years I have been a Member of the Senate I have voted to confirm the nominations of a good many persons to high office, persons with whose previous decisions and general attitude I might not have agreed, but as to whom there was no question of integrity, character, or loyalty to the United States of America. I assumed that the President of the United States had the right to appoint persons in whom he had confidence, and I voted for them.

Mr. DIRKSEN. It should be pointed out that before Armstrong was ever appointed to the SEC, there was the usual rundown by the Federal Bureau of In-

vestigation. The FBI submitted its raw file to the committee. An opportunity was afforded to know what Armstrong's neighbors, friends, and associates, and everyone else, thought about him. You can bet all the tea this side of the Rocky Mountains, Mr. President, that if there is something in derogation of one's character, the FBI is pretty certain to find it.

Mr. MALONE. So far as this man is concerned, there is no question about him in the FBI report, is there?

Mr. DIRKSEN. None whatsoever.

The first point I make in behalf of Sinclair Armstrong is that he is a man of character, and his character has not been impeached in the course of this proceeding.

The second point I make is that he has mental endowment. He has the education, the background, and the experience to fill the position to which he has been chosen, as he had the background to fill the office of Chairman of the Securities and Exchange Commission.

The third point I make is that the whole Dixon-Yates matter was invested with public interest; so notwithstanding the fact that the SEC is at once an administrative agency and is also quasi-judicial in character, this matter was not in a vacuum. Not only the legislative branch, but the executive branch of the Government, also, had an interest in the matter.

I followed this proceeding pretty carefully. I appeared with Sinclair Armstrong before the Committee on the Judiciary, when he came before the Senator from Tennessee [Mr. KEFAUVER]. I sat and gave him encouragement, as a matter of fact, because I knew the type of person he really was. I told him to speak his piece. I would do it for any witness, no matter what his political identity might be, if I thought he was correct.

Mr. BUTLER. Mr. President, will the Senator yield?

Mr. DIRKSEN. I yield.

Mr. BUTLER. I had the pleasure of sitting beside Mr. Armstrong at one of the hearings. I am certain he was perfectly frank that day, and perfectly willing to answer any questions which he felt were within the scope of the ruling of the Attorney General.

Mr. DIRKSEN. Indeed so.

Mr. BUTLER. As a matter of fact, he conferred with me on several occasions as to how the questions should be answered. I think it was as a result of one of those questions that there was a request for the opinion of the Attorney General.

Mr. Armstrong was most anxious to give any information he could, without having the legislative branch invade the rights of the executive branch.

Mr. DIRKSEN. The Senator is quite right.

I make the point that the whole Dixon-Yates matter was invested with public interest. That is a cue to what finally happened. It is rather interesting to note that the President was assailed again today and accused of not knowing what was going on. In the same breath, we hear it said that we ought to do something more about implementing the Hoover reports, because there is too much of a burden upon the President of the United States. The President must depend upon his administrative advisers and counselors.

When a matter is invested with public interest, what is wrong with the Assistant to the President calling up an administrative head? Do we live in a vacuum today? I think not. What was the purport of the conversation? It has all been pretty well developed. The fact is that the Attorney General was out of town. He is the principal law officer of the Government. Still another legal adviser to the White House was out of town.

All that was involved in the conversation, in the first instance, was whether or not in the public interest there might be an adjournment of the hearing before the Commission until it could be determined whether one or more of the principal law officers, besides those who had sat in with the Commission, might be present as amicus curiae, a friend of the court. What was wrong with that?

After all, the President was assailed up and down the hill about the Dixon-Yates contract. I reemphasize that that contract was invested with a public interest. The President had a right to follow it through if he wanted to. So did Governor Adams. I see nothing wrong with calling up the head of a quasi-judicial body for the purpose of ascertaining whether that body would not be willing to have the top Government lawyers sit in as friends of court while the proceeding was in process to validate or to get a judgment from the Commission concerning the financing of the securities to be issued under the Dixon-Yates contract.

When the Commission did adjourn, under what circumstances did it adjourn? It adjourned only after Sinclair Armstrong conveyed the message to the Commission. Then the Commission voted unanimously to adjourn. It was not Sinclair Armstrong who adjourned the Commission. He submitted the question to his fellow Commissioners. They took a vote, and they voted that in the public interest they might adjourn. So they did adjourn.

Was Dixon-Yates prejudiced? Was the citizens' counsel from Tennessee prejudiced? Was any other group or party in interest prejudiced? In no way whatsoever. There was a postponement until it could be determined whether the top legal officers of the Government might be back in town and then could sit in on what was at once an administrative and also a quasi-judicial proceeding. What was wrong with that?

Our distinguished friend from Tennessee has taken a molehill and by a judicious accretion of words has made a mountain out of it, as much as to say that we live in a vacuum today. How strange that peculiar moral or immoral implications are read into a matter like this.

I said earlier that I am getting so that I enjoy the sermonizing, the homilies, and the moral lectures we receive on the Senate floor. One would think that everybody in Government was suspect today, as if there is no honor, as if there is no integrity, in the people who serve the public interest.

Sinclair Armstrong is one of the most honorable men I have ever encountered in my lifetime. I would put my hand in the fire in his behalf. So when it comes to the charge that the session was postponed, as if there were something ulterior about it, or as if it were going to have an impact upon a measure pending before the House Committee on Appropriations, what an amazing thing it is, because, as Armstrong so well testified, it was not any of his concern.

I have here the hearings before the Committee on the Judiciary. We covered a great many pages, I may say to my friend, the distinguished Senator from Maryland [Mr. BUTLER]. On page 631, here is the colloquy:

Senator KEFAUVER. And just exactly what did he say about the pendency of the legislation coming up Monday in the House of Representatives?

The Senator was referring, of course, to what Governor Adams might have said.

Mr. ARMSTRONG. Well, as I have just testified to, and as I recollect it right at this minute, he said, "I have got another problem to worry about this week."

Senator KEFAUVER. To worry about this week?

Mr. ARMSTRONG. The TVA appropriation coming up in the House of Representatives. And I said, "That doesn't concern me," and he said, "That's right."

It was no concern of his whatsoever. That was the testimony of Mr. Armstrong on that point. But it is made to appear that there was a peculiar implication involved which would be a reflection upon his conduct and his integrity.

Mr. KEFAUVER. Mr. President, will the Senator yield?

Mr. DIRKSEN. I yield.

Mr. KEFAUVER. Will the Senator read the next question and answer?

Mr. DIRKSEN. I shall be delighted to do so.

Senator KEFAUVER. Well, why do you think he mentioned Wenzell's testimony and the House of Representatives at the same time?

Mr. ARMSTRONG. I have no idea.

Senator KEFAUVER. Did he tell you that he didn't want Wenzell's testimony to get to the Members of the House?

Mr. ARMSTRONG. He did not.

Those are the answers. If I am wrong, then, of course, the record is wrong. It certainly is not my transcript.

So what is there to the argument that there was a postponement of a session of the Securities and Exchange Commission—having in mind that perhaps it might have some bearing on a $6,500,000 appropriation bill pending in the House of Representatives.

It was stated by the distinguished Senator from Tennessee [Mr. KEFAUVER] that Mr. Armstrong did not tell Mr. Ewell, the examiner, and did not tell the Commission staff and did not tell the committee staff and did not tell this person or that person. He ascribed no reason why the hearing was postponed. Did he have to? Was there an obligation upon him to do so? Was there any duty upon the Chairman of the Securities and Exchange Commission to say, "The reason we postpone it is as follows," and to make an explanation? It would be

amazing, indeed, if that had to be done. That judgment was made because they were waiting to see whether certain Government lawyers ought to be in attendance at the time, as "friends of the court," and nothing more; and that is all that can ever be made out of that portion of the case.

It is also said that Mr. Armstrong was playing fast and loose because he invoked privilege. Mr. President, I have seen executive privilege invoked a good many times in my life. Nowhere did I see it invoked oftener, I expect, than during the 6 weeks we spent under television lights in the caucus room of the Senate Office Building, in connection with the Army-McCarthy controversy, where there came the interdiction, on Executive order, which follows a line of precedents going back to George Washington, in connection with the first controversy he had with the first Congress of the United States. It is rather interesting that we belabor the whole question of executive privilege, but thus far Congress has never undertaken to do anything about it. Certainly, I am not going to belabor that issue today, because it stands off by itself.

Mr. BARRETT. Mr. President, will the Senator from Illinois yield to me?

The PRESIDING OFFICER (Mr. YARBOROUGH in the chair). Does the Senator from Illinois yield to the Senator from Wyoming?

Mr. DIRKSEN. I yield.

Mr. BARRETT. I quite agree with the last remark of the distinguished Senator from Illinois; but it occurs to me that if an error was made by Mr. Armstrong in conferring with the Attorney General on the matter of executive privilege—and I believe that is subject to question—nevertheless, to be perfectly fair, Mr. Armstrong did so at the instance and request of the distinguished Senator from Tennessee [Mr. KEFAUVER]. So certainly, it seems to me, it would be unfair and improper to criticize Mr. Sinclair Armstrong now for doing the very thing he was requested to do.

Mr. DIRKSEN. The Senator from Wyoming is correct. The question of privilege was interposed three times; and after consultation with the Attorney General it was withdrawn with respect to two of the points. But I ask my friend, the Senator from Wyoming, where does one go to obtain an opinion as to whether a certain matter lies within the interdiction of privilege or whether it does not, if one does not go to the Attorney General?

Mr. BARRETT. Certainly in this particular instance, I say to my distinguished colleague from Illinois, the Senator from Tennessee [Mr. KEFAUVER] felt precisely as the Senator from Illinois feels now; and the Senator from Tennessee suggested to Mr. Armstrong that that was exactly where he should go.

I would say there is some question as to whether an official of an independent agency should call upon the Attorney General for advice, or whether such an official should act independently, on the basis of his own judgment. But, regardless of that, in this case Mr. Armstrong pursued the course which was suggested to him by the distinguished Senator from Tennessee.

Mr. KEFAUVER. Mr. President, since my name has been mentioned, will the Senator from Illinois yield to me?

Mr. DIRKSEN. I yield.

Mr. KEFAUVER. It should be borne in mind that when Mr. Armstrong first came before the subcommittee, he came there with his attorney. Mr. Armstrong based his alleged privilege upon a letter the Attorney General had written Secretary Wilson, which had to do, as I recall, with certain testimony in the Army-McCarthy hearings. It was our position—as made very clear to Mr. Armstrong and to his attorney, Mr. Timbers, by the Senator from North Dakota [Mr. LANGER] and particularly by the Senator from Wyoming [Mr. O'MAHONEY] and myself—that we did not feel that he, Mr. Armstrong, had a privilege to withhold information from a competent Congressional committee, because he was chairman of an agency of the Congress. It was Mr. Armstrong who insisted that the letter written by the Attorney General to Mr. Wilson gave him, Mr. Armstrong, some privilege. Then it was the Senator from Wyoming [Mr. O'MAHONEY] who said—and I am sure that finally, when we could not get any information from Mr. Armstrong, I joined in saying it—"We do not think that is what it means. We do not think you have any privilege. We think the Attorney General would agree with us; and we suggest that you or your attorney talk with him with reference to the Wilson letter and the privilege which you are asserting today."

Mr. DIRKSEN. Mr. President, let us put the privilege in the instant case in its complete light. In the first place, the Senator from Tennessee [Mr. KEFAUVER] sent to Mr. Armstrong, on June 27, 1955, a letter, of which the last pertinent paragraph read as follows:

> I should like to inquire from you whether any request or representation was made to the Commission with respect to the suspension of the hearings. I should also like to inquire whether any representation was made to the Commission by any official or representative of the Government asking that the hearing scheduled for June 13 be canceled, or whether such cancellation was discussed by the Commission with any officials or representatives of any other branch of the Government.

There is the nub of it. That is what was before Sinclair Armstrong when he had to determine whether privilege was involved. He could have gone to Mr. Timbers, his own counsel. But what happens when one goes to a man with whom one is associated day after day? How easy it would be to impeach his judgment and finding on the ground that it was more or less self-serving of his own agency, since both of them worked in the same Government shop.

The proper person from whom to obtain that advice was the Attorney General; and that is precisely the person from whom Mr. Armstrong obtained it. Then, after he was released from the first two items in which privilege was involved, he could respond so far as the rest of the inquiry was concerned.

Mr. President, what is left of the case? There is the question of whether there was any impact upon the appropriation bill then pending in the House of Representatives. Mr. Armstrong testified that Mr. Adams did not say he did not want "Wenzell's testimony to get to the Members of the House." There was the question of whether Adolphe Wenzell's testimony would affect that appropriation bill. In my considered judgment, it would not have had the slightest impact on it, and Mr. Armstrong made that clear. He said that Mr. Adams did not say that he—Mr. Adams—did not want "Wenzell's testimony to get to the Members of the House." That is shown at page 631 of the hearings.

Then Mr. Armstrong testified that he did not "surmise" that that was the case. There was a good deal of surmising and assuming in the matter. That will also be found on page 631.

Mr. Armstrong also testified that personally he did not know of the fight which had been carried on in the Appropriations Committee with respect to the transmission line. That is also shown on page 631 of the hearings.

Then Mr. Armstrong repeated his earlier testimony that he told Governor Adams that the matter in the House of Representatives was not "any concern of mine."

In addition, Mr. Armstrong testified that he was not impressed by the fact that proposed legislation pending in the House of Representatives was mentioned in the same conversation. I would not be, either, Mr. President. In the Government atmosphere, those things happen almost every day, and one does not link one of them with the other.

Finally, Mr. Armstrong testified that Mr. Wenzell's testimony was not held up because of what was going on in Congress.

Mr. President, there is the whole record. It is extremely difficult for me to understand why there are read into Mr. Armstrong's conduct, into his words, into the conversation with Governor Adams, or into Mr. Armstrong's appeal to the Attorney General, in connection with the question of privilege, any implications which would in any way have an effect upon Mr. Armstrong's character, his capacity as a public servant, his reputation for honorable dealings, and the excellent job he has done in the Government for the people of the United States, in one of the most responsible regulatory agencies we have.

Mr. President, there is the whole case. What do you make of it, Mr. President? I make of it exactly nothing, because I sat through the testimony, and I re-echo the question which is in my mind, namely, how strange it is that, 2 years after all this was ventilated before the Senate Committee on the Judiciary, it has to come back now on the floor of the United States Senate.

There was ample opportunity to impeach Mr. Armstrong. There was ample opportunity to file a charge against him. There was ample opportunity to haul him up before the Senate, because that

is one of the prerogatives of the legislative branch. But in all that time, nothing was done. Criticism came only when the President sent his nomination to the Senate, so that he might assume greater responsibilties in the public service as an Assistant Secretary of the Navy.

There is the case. If Senators want a yea and nay vote on the question of confirmation, I am willing to summon Senators into the Chamber, because I have a pretty fair idea how the Senate is going to vote under these circumstances. I do not wish to inconvenience any of my colleagues this afternoon, but if any Senator wants a record vote, I am willing to have one, because I expect Sinclair Armstrong to go far in the public service, endowed as he is with talent, capacity, character, and honor. I want to be sure that the record is clear as to what transpired in this whole proceeding that emanated from the Dixon-Yates controversy of more than 2 years ago.

Mr. President, I yield the floor.

Mr. NEUBERGER. Mr. President, I desire that the record shall show that I intend to vote against the nomination of J. Sinclair Armstrong to be Assistant Secretary of the Navy. The able senior Senator from Tennessee [Mr. KEFAUVER] is to be commended for his efforts to protect the public interest. The Senator from Tennessee has always tried to protect the public interest and the public welfare in matters such as this. In my opinion, he is doing so in his efforts to prevent the confirmation of the nomination of Mr. Armstrong. That is why so many of us value the courage and leadership of the Senator from Tennessee.

Mr. KEFAUVER. I appreciate very much the remarks of the junior Senator from Oregon.

I have no desire to debate this matter further, Mr. President. I merely wish to add that I am convinced that on this record Mr. Armstrong showed himself to be unworthy of the trust that was placed in him as Chairman of the SEC. I see no reason why we should place greater confidence in him. I am certain that any Member of the Senate, including the Senator from Illinois, if he were a party to a contest before the SEC, or if he were a lawyer before the SEC representing a litigant, would feel that the SEC was being very poorly run, and improperly so, if, in the first place, before the hearing started, a member of the SEC got together with one of the interested agencies and went over all the hurdles to be surmounted and how the case was to be presented in an SEC proceeding. Such a procedure makes a farce out of a hearing before that quasi-judicial agency. The case was decided before it was started. Mr. Armstrong and Mr. Demmler had advised the parties how to present the case, and what their opinions were.

I am certain any party to a proceeding before the SEC, or any lawyer before the SEC, and many of my colleagues are lawyers, would feel very much disturbed over the fact that a fair hearing had not been had, if somebody interested in a matter on trial was calling on the telephone, and that telephone call resulted in a dictation of how the SEC was going to be run, and whether the hearing was going to be continued for some purpose.

Mr. President, I want the RECORD to show my opposition to Mr. Armstrong's nomination. I hope the proceedings today will serve the public purpose of letting some of the other quasi-judicial agencies, which are arms of Congress, know that at least some Members of the Senate think that they ought to decide cases on the facts presented under rules of evidence, and not let their agencies or commissions be affected by telephone calls from somebody on the outside, knowledge of which is secretly kept from the parties to the controversy, even though the somebody may be an assistant to the President of the United States.

I shall not ask for a yea and nay vote, but I think we should have a quorum call in order that more Senators can be present to vote.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. KEFAUVER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is, Will the Senate advise and consent to the nomination of J. Sinclair Armstrong, of Illinois, to be an Assistant Secretary of the Navy.

The nomination was confirmed.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the President be immediately notified.

The PRESIDING OFFICER. Without objection, the President will be notified forthwith.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States submitting nominations was communicated to the Senate by Mr. Miller, one of his secretaries.

EXECUTIVE MESSAGE REFERRED

The PRESIDING OFFICER (Mr. YARBOROUGH in the chair) laid before the Senate a message from the President of the United States submitting sundry nominations, which were referred to the Committee on Foreign Relations.

(For nominations this day received, see the end of Senate proceedings.)

LEGISLATIVE SESSION

Mr. JOHNSON of Texas. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

MESSAGE FROM THE HOUSE— ENROLLED BILLS SIGNED

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the President pro tempore:

S. 51. An act for the relief of Mary Barme and her two minor children Steran Barme and Dinah Barme;

S. 94. An act for the relief of Lee Chong Taik;

S. 124. An act for the relief of Josephine Suydam;

S. 162. An act for the relief of Jew Gim Gee;

S. 184. An act for the relief of Mary C. Frederick;

S. 271. An act for the relief of Johannes Sukevainen;

S. 754. An act for the relief of John (Ioannis) Legatos;

S. 799. An act for the relief of Eldur Eha; and

S. 1463. An act to amend the Medals of Honor Act to authorize awards for acts of heroism involving any motor vehicle.

AMENDMENT OF THE SMALL RECLAMATION PROJECTS ACT, 1956

The PRESIDING OFFICER. The Chair lays before the Senate the unfinished business, which will be stated by title.

The LEGISLATIVE CLERK. A bill (H. R. 2146) an act to amend the Small Reclamation Projects Act of 1956.

Mr. JOHNSON of Texas. Mr. President, I do not desire to foreclose any Senators from making statements at this time. However, before the Senate discusses the bill I shall wish to suggest the absence of a quorum.

A WATER RESOURCE PROGRAM FOR OREGON

Mr. NEUBERGER. Mr. President, tapping of the navigation and power potential of the waterways of the Pacific Northwest provides an opportunity for improving the economic status of a vast section of the United States. In support of this objective, I have had an opportunity this week to submit material to appropriations subcommittees of both the House and Senate, urging expansion of water-resource improvements in the State of Oregon.

One of the barriers to a larger volume of waterborne commerce on the Columbia River is the fact that the ship channel from Vancouver, Wash., to The Dalles has not been maintained to the authorized depth of 27 feet. Along with other worthwhile projects, I have urged the committees to appropriate funds necessary to open this section of the Columbia to deep-draft vessels. Accomplishment of this work would extend, by 85 miles, the inland route of the Columbia which could be traveled by oceangoing vessels.

Improvement of this and other water resources of Oregon is of vital importance to my home State. I ask consent to have printed in the body of the RECORD a portion of my statement to the House and Senate Appropriations Subcommittees on a water-resource program for Oregon, especially with respect to improved inland navigation on the Columbia River, where it cuts through the great Cascade Mountain Range.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

I am urging a greater amount of investment for improvement of Oregon's rivers and harbors because such action is necessary to stimulate the State's lagging income level and to achieve the greater degree of prosperity which will be possible from fuller use of the region's great potential for navigation, power, irrigation, and flood control.

The State of Oregon is blessed with unique, natural advantages in the way of water resources. But in recent years the Federal Government's responsibility for development of navigable waterways and for construction of flood-control facilities in Oregon has lagged far behind the need. It is well to point out, I believe, that the President's budget allocations for Oregon multipurpose projects during the coming fiscal year are some 40 percent below the level for the current year. I would like to emphasize to the committee that the granting of funds for the vitally needed projects I am urging in my statement will still leave the total some 20 percent below the sum appropriated for Oregon projects for fiscal 1957, and far below the total granted for water-resource improvement before the present administration came into power.

PER CAPITA INCOME DOWN

In the year 1937 per capita incomes in Oregon—and that means every man, woman, and child—were $9 below the national average. In 1938 they rose to $17 above the national average. A steady climb then set in, until in 1943 Oregon incomes were $299 higher than the average for the Nation. They dropped back somewhat in 1945 and 1946 to $147 above the average. Then they shot back to $202 above the national average during the year 1947. Since that time Oregon incomes have ominously and alarmingly been dropping behind in relationship to those prevailing in the United States as a whole.

Let's look at what has happened. These have been Oregon's per capita income levels as related to the entire country since that time:

1947	$202 above
1948	189 above
1949	180 above
1950	111 above
1951	102 above
1952	97 above
1953	23 above
1954	5 below
1955	13 below
1956	10 below

Thus, from 1947 through 1956, an elapsed period of 10 years, it may be said that Oregon's per capita incomes have steadily and inexorably dropped with respect to their comparison to the national average. It is obvious that we are not sharing in what has been described as the Eisenhower boom, although Oregon also was on the economic toboggan during the period when involvement in the Korean war had produced inflationary pressures and additional buying and selling activity.

What has been happening in Oregon, to cause the State to slide off the national rate of growth and expansion so far as economic development is concerned?

I have mentioned that Oregon attained quite a high pinnacle of incomes in 1947. It so happens that the period from 1939 to 1947 was the one decade in our history when manufacturing employment in the Pacific Northwest grew faster than in the entire Nation—329 percent for our region as contrasted with 284 percent for the whole United States. In addition, manufacturing employment in the Northwest expanded 67 percent as compared with a national growth of only 50 percent.

Some persons may contend that this growth during the decade from 1939 to 1947 was due to World War II. Armament needs dictated greatly expanded industrial production. That is quite true. Yet the whole country was involved in World War II, as well as the Pacific Northwest. But I think the more basic reason for the mushrooming of manufacturing in the Northwest during the 1939–47 period was that it marked the era when the Bonneville Power System's low-cost Federal kilowatts first came on the line. That situation did occur in the Northwest alone. No other region of the Nation shared in this 2-mill industrial power.

INCOME AND RESOURCE USE RELATED

Since 1953, there has been a great slowdown in starting new Columbia Basin projects needed to met the energy demands of the Pacific Northwest. As shown by the table of income in Oregon, the decline in per capita level coincides with curtailment of the Federal program for Columbia River Basin development. This is a fact which speaks for itself.

The relationship between development of Oregon's water resources and the economic health of the area seems apparent. This fact alone justifies Congressional action to provide funds for start of construction on John Day lock and dam project. This will add 1,100,000 kilowatts to the power storehouse of the Columbia River power system. Besides this vast contribution to the energy base of the Pacific Northwest, John Day Dam will complete the last slack-water navigation link between Bonneville Dam and the mouth of the Snake River, greatly enhancing the opportunities for inland-water transportation. As now planned by the Corps of Engineers, John Day Dam also would provide 500,000 acre-feet of surcharge flood-control storage. I would like to remind the committee of the Army engineers' statements that a minimum of 27 million acre-feet of flood-control storage is needed in the Columbia Basin to prevent destructive floods like the disastrous occurrence of 1948. Yet the entire Columbia Basin has only approximately 9 million acre-feet of flood-control storage—about one-third of the minimum needed.

The President's budget contains not a cent for construction of the great John Day project, although the Corps of Engineers will have completed the preconstruction planning by the end of the current fiscal year. The President has recommended expenditure of Federal funds in other regions for construction of dams with fewer benefits and far less dependable volume of water. I urge the committee to reverse this policy of discrimination against the people of the Columbia River Basin by approving an appropriation of $8 million to start the construction of John Day lock and dam.

WHY NEGLECT OF POWER AND FLOOD CONTROL?

The administration's neglect of the power and flood-control needs of Oregon again is reflected in the budget through inadequate allocations for further planning of the Green Peter-White Bridge multipurpose project. I urge the committee to override the administration's recommended sum of $225,000 and provide, instead, the $500,000 which will substantially complete preconstruction planning of this additional link in the Willamette Basin project system.

Aside from the inadequacy of the administration's provisions for Pacific Northwest power needs, perhaps the next largest field of neglect concerns development of Oregon's navigation potential. The Columbia River is the only navigable waterway in the North American continent to slice through a major mountain range. The inland water route through the Cascade Range offers extensive possibilities for tapping the resources of the rich inland empire, and as a means of transport for industrial and agricultural products. Yet vast stretches of this peerless inland waterway are choked with silt and underwater obstructions.

I urge the committee to approve a total amount of $2,325,000 to start the work needed to open a 27-foot-deep channel on the Columbia from Vancouver to The Dalles. The section of this improvement from Vancouver to Bonneville Dam has been authorized since 1937. The extension from Bonneville to The Dalles was approved by Congress in 1946. Since 1949, the channel has been maintained only to a depth of 15 feet, although the project is authorized for a depth of 27 feet and width of 300 feet.

The present condition of the channel is completely inadequate to meet the needs of the rapidly expanding area. Immediate action on the Vancouver to The Dalles channel restoration is justified by the potential river tonnage of agricultural products which apparently is available as soon as the present barriers to transportation are removed. One of the Nation's great wheat-producing regions lies in eastern Oregon and eastern Washington. The channel development would make it possible for oceangoing vessels to tap prospective bulk-cargo tonnage of inestimable amounts. Opening of The Dalles to ocean vessels would greatly improve cost factors which influence sale of surplus grain to the Orient.

DEEP-DRAFT CHANNEL TO THE DALLES

I have been informed that the Harvey Aluminum Co. has indicated its initial requirements of alumina will necessitate the annual movement of 18 round trip ocean vessels from the Orient by the end of 1957. By the year 1960—if sufficient power is available to permit increase of aluminum production—the company plans to double its plant capacity. This means that in a period of little more than 4 years, this company alone would need the ore cargo of 84 oceangoing vessels. After 1961, I am told, bauxite cargoes will take the place of alumina shipments at this plant, and on the basis of the company's requirements, the number of ship movements is expected to double. However, these requirements cannot be met through shipments from oceangoing vessels unless the proposed channel improvements are completed.

I wish that it were possible for members of the committee to witness for themselves the embryonic industrial development which is under way along both sides of the 85-mile stretch of the Columbia affected by this channel project. I am sure that the committee will be pleased to know that chambers of commerce, port commissions, utility districts, and commercial interests throughout the area are unanimous in their support of the Vancouver-The Dalles improvement. I am pleased that a number of residents from Oregon have come to present detailed information to the committee about the needs for this project and the benefits which will accrue from its completion. I will not take the time of the committee to go further into the justification for this section of Columbia River navigation improvement, but I feel sure that, after listening to individuals from the area most vitally affected, the committee will see that by investment of a relatively modest sum, widespread benefits will result.

The burgeoning of commerce on the Columbia River below Vancouver has exerted great pressure on the present capacity of the authorized and developed 35-foot channel from the mouth of the river to Portland-Vancouver. Actually, the channel depth has placed serious limitations on the type and amount of traffic which can traverse this section of the river. I have discussed with shippers, ship operators and port officials the need for reexamination of the presently authorized channel. As a result, Senator MORSE and I asked the Senate Public Works Committee to authorize by resolution a re-

survey of the channel from the mouth of the Columbia to Portland-Vancouver. The committee has given its approval to this request, and we have been advised by the Corps of Engineers that a total of $125,000 is needed for this investigation. In view of the fact that the work cannot be completed in 1 year, I am joining other members of the delegation in requesting an appropriation of $40,000 for this purpose.

CHANNEL STUDY NEEDED

I also ask the favorable consideration of the Committee of the Budget allocation of $1,150,000 for work which will essentially complete dredging of the Columbia's channel at the mouth to a depth of 48-feet. The committee wisely approved the start of this project 2 years ago, and I am pleased to report that this improvement last fall made possible movement of the largest shipment of wheat ever to leave the Columbia River. By virtue of the greater channel depth, a ship was at last able to cross the perilous Columbia River bar with a record load of grain.

I mention this advance in Oregon's seaborne commerce because it illustrates the expansion of shipping which also would be possible if improvement were undertaken at Garibaldi Basin, Chetco River, Coos-Millicoma River, Rogue River at Gold Beach and other sections of Oregon. I wish to join with other members of the Oregon delegation in urging the maximum amounts usable by the Corps of Engineers in advancing these projects during the coming fiscal year. Details of these projects are set forth in the chart which accompanies my statement, and I will not impose on the committee's time by more lengthy explanation of their vital functions. All play a major role in the economic future of the communities in which they are located, and evidence developed by the Army Engineers fully justifies their development. Because the budget provides adequate sums for continuing the work on The Dalles dam and lock, Cougar Reservoir, and Hills Creek Reservoir, I will not burden the record with comment, other than to say that the power and other multipurpose benefits are needed to meet the immediate requirements of the region.

Because of the breakdown in implementing the Federal flood-insurance program, I hope that the committee will take immediate action to set up a far more adequate local protection flood control than now exists in Oregon. For several years the annual appropriation for Willamette River Basin bank-protection work has been limited to $300,000. There is no apparent justification for freezing the sum at such a low level. Obviously it is inadequate because this phase of the Army engineers' work is falling further and further behind schedule.

Hundreds of acres of fertile Willamette Basin farmland has been inundated in recent floods. Farmers throughout the district have written to me of the loss they are suffering because funds are not on hand to do the necessary bank-protection work. Because of the very serious soil erosion and flooding problems present throughout the Willamette Basin, I urge the committee to provide a total of $800,000 for bank-protection projects, and $446,000 for the Amazon Creek unit.

I also call attention of the committee to the need for continuing and launching river-basin examinations and surveys on the Rogue River, Grande Ronde, Crooked River, Coquille River, Umpqua River, and Yamhill River and for completion of the review of the corps' 308 report on the entire Columbia Basin. This work is essential to carry out and plan in advance for water resource utilization of the future.

IRRIGATION EXPANSION SOUGHT

In connection with the Bureau of Reclamation projects, the committee should know that increased interest has been evidenced by local interests in determining the feasibility of irrigating vast sections of land in the humid western section of Oregon. Farms in this portion of Oregon have adequate rainfall during most of the year, but during the vital growing season the water supply is inadequate. Because of rising farm production costs and lower farm prices, they have been caught in a financial wringer. If irrigation were available during crucial growing periods, per-acre yield would be greatly improved. This would contribute greatly to the total income available from farming units. I urge the committee to provide funds adequate for the Bureau of Reclamation to continue its work on such projects as the Red Prairie-Mill Creek unit, the Dallas-Monmouth unit, Molalla unit, Hopewell unit, Bully Creek, and Yamhill unit. I also join with my Oregon colleagues in urging approval of the budgeted amounts for Crooked River, Wapanitia, Deschutes, Klamath, Arnold, Talent, Baker, Pendleton, Post, The Dalles western and eastern divisions, and upper Owyhee.

I thank the members of the committee for their indulgence in listening to my plea for a vastly expanded water-resources program for Oregon. I recognize that it is broad in scope. But it is also broad in the objectives it will achieve. Water is one of Oregon's most priceless assets, and I have tried to give recognition to the fact that we are merely the temporary stewards of these resources and not their permanent owners. They are a legacy which we must pass on in as good condition as they came down to us. I believe the adoption of the water-resources program which I have outlined to the committee will discharge the obligation of the Congress to present and future generations. It will greatly aid progress in Oregon.

PROPAGANDA OF THE SWISS WATCH CARTEL

Mr. CURTIS. Mr. President, five of Switzerland's largest cigarette manufacturers have sent a representative to the United States to confer with Maryland tobacco and Agriculture Department officials on the problems of the Swiss tobacco industry in obtaining Maryland tobacco. The representative, Mr. Schurch, spoke to Maryland tobacco growers in the courthouse in Upper Marlboro on Friday, May 10. What he said is interesting not only to tobacco growers, but to those who are interested in the American watch industry. I understand that Mr. Schurch, when asked whether his statements regarding tobacco had any relation to the Swiss watch industry, replied with an emphatic "No."

I would like to have printed following my remarks a report on this meeting which appeared in the Washington Star. Mr. Schurch made it very clear that the Swiss cigarette makers have not been able to get enough Maryland tobacco for a number of years. In a published statement he said:

In recent years there has never been enough of the high grades available to meet Swiss requirements, and stocks of fine Maryland tobacco are low. The bulk of the medium grades are purchased by the big American manufacturers who use a very small percentage of Maryland leaf in their blends.

Contrast this effort to get Maryland farmers to raise more tobacco for the Swiss tobacco industry with the propaganda of the Swiss watch cartel. Not many months ago, the Watchmakers of Switzerland, the propaganda agency of the Swiss watch cartel, circulated throughout all of the tobacco growing areas in the United States a statement that—

The Swiss would like to buy more United States produced farm products such as tobacco grown in Maryland. But their ability to do this is being sharply curtailed by high tariffs and other restrictions aimed at Swiss watches, with the American farmer being the ultimate victim.

This is another example of the misleading tactics of the Swiss watch cartel. They have been trying to make Americans believe that the steps our Government is taking to save the United States watch industry are injuring Swiss-American trade in other products. These misrepresentations are, of course, efforts to generate pressure on the Government to leave the American watch market to the Swiss.

The Swiss already have 80 percent of the American jeweled-watch market and a large proportion of the non-jeweled-watch and clock market.

The same tactics have been used with respect to cotton, fruit, and manufactured products.

There seems to be no way to make the propagandists for the Swiss watch cartel stick to the truth. But I do not believe that they are deceiving as many people as they think.

Mr. President, I ask unanimous consent to have printed in the RECORD, following my remarks, the article from the Washington Star to which I have referred.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MARYLAND WARNED ON TOBACCO CUTBACK—LOSS OF SWISS MARKET CALLED A POSSIBILITY

(By J. L. Michael)

Maryland's tobacco industry today faces a direct warning that it may lose its best foreign market unless the Federal acreage control, price-support program is revised.

The warning was voiced last night by Fritz Schurch, spokesman for five of Switzerland's largest cigarette manufacturers.

Mr. Schurch, managing director of United Tobacco Factories, Neuchatel, Switzerland, presented the Swiss viewpoint to more than 200 tobacco and business men gathered in the Upper Marlboro Courthouse.

Also present were several members of the Legislative Council's recently appointed tobacco subcommitee.

FEAR DROP IN SUPPLIES

Mr. Schurch made it clear that Swiss cigarette makers fear that continued reductions in planting quotas and land placed in the soil bank will lower supplies of type 32 leaf to such an extent that substitutes must be sought.

The central purpose of his talk, Mr. Schurch said, was to "stress the fact that acreage controls applied to all Maryland growers may lead to loss of the Swiss tobacco market."

He proposed, instead, selective acreage control, to be achieved by drastic changes in present rules. Under his plan, farmers who produce tobacco suitable for use in Swiss-Maryland cigarettes would be wholly or partially exempted from quota restrictions.

WOULD HAVE TWO GROUPS

That would, in effect, mean that administrators of the control-support program would be called upon to divide Maryland

planters into two groups—acreage uncontrolled good farmers and acreage-limited not-so-good farmers.

"Reasonable persons will agree," said Mr. Schurch, "that it would be unwise to punish a farmer who raises a crop of fine-quality Maryland tobacco for which there is strong demand at interesting prices because a less-efficient farmer has produced a surplus of undesirable tobacco which went into Government stocks and stayed there."

Several persons told Mr. Schurch in a question-and-answer period that higher prices would provide the best stimulus.

"Set the price at $1 a pound," said John B. Morsell, president of the Southern Maryland Tobacco Cooperative, "and you will get 40 million pounds."

STUDY GROUP URGED

At the suggestion of Dr. Paul Nystrom, director of the State extension service, and Walter W. Bowling, president of the Southern Maryland Farm Bureau, sponsors of the meeting, the group voted to appoint a committee to study the question.

Mr. Schurch said he came to the United States to confer with Maryland tobaccomen and Agriculture Department officials on Swiss-Maryland problems and he expects to remain here indefinitely.

He indicated that the factories he represents are willing to contract for purchase of all Maryland tobacco of the grades they use at prices above Federal minimums.

Mr. Schurch said that more than half of all cigarettes made in Switzerland are of the Maryland type and that the demand is increasing. Switzerland, he related, is the only country in the world where cigarettes made of 85 to 90 percent of the highest grades of type 32 are preferred by a majority of smokers.

RELY ON MARYLAND SUPPLY

Because of the formula, said Mr. Schurch, Swiss-Maryland cigarette makers must rely exclusively on the quality of Maryland tobacco.

In the last few years the Swiss, who buy about 30 percent of Maryland's normal $20-million annual production, have not been able to fill their poundage requirements, Mr. Schurch said. At the same time, he added, large quantities of low- and medium-grade leaf have been taken over by the Government.

Setting out of more plants per acre and heavier fertilization, a practice used in Southern and Burley Belts to obtain larger yields from smaller quotas, will not work in Maryland, in Mr. Schurch's opinion.

"By so doing, yields can be increased about 20 percent; but not 1 pound will be of Swiss quality," he declared.

"If the quality factor should be adversely affected," Mr. Schurch said, "the demand for Maryland-type cigarettes could fall like a house of playing cards."

"Maryland," he told the meeting, "now has the opportunity to retain Switzerland as a buyer of its best tobacco, but by one false move this market can be destroyed."

MARITIME DAY EXERCISES—ADDRESS BY SENATOR KNOWLAND

Mr. BUTLER. Mr. President, in New York City yesterday at the Maritime Day celebration of the Propeller Club for that great port, our esteemed colleague, the minority leader, the Senator from California [Mr. KNOWLAND], delivered a splendid address. The Senator has long been known as a great, good, and far-sighted friend of all segments of the American merchant marine. His speech yesterday served vividly to reemphasize that fact, and I ask unanimous consent to have it printed in the body of the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY HON. WILLIAM F. KNOWLAND, OF CALIFORNIA, MARITIME DAY EXERCISES, ROCKEFELLER CENTER, NEW YORK, N. Y., WEDNESDAY, MAY 22, 1957

I am glad to be here with you today to help celebrate in an appropriate ceremony our National Maritime Day. As most of you know, Maritime Day has been set aside by the Congress and the President to provide an occasion for the American people to focus their attention on the accomplishments and importance that this Nation's strong and healthy merchant marine plays in the lives of our people, to their economic well-being in peacetime and to their security in time of war.

One hundred and thirty-eight years ago today, an American merchant vessel, SS *Savannah*, started from our shores on the first transatlantic voyage ever made by a steamship. Since that time our country has gone through two world wars and the recent conflict in Korea in which the Nation's merchant marine played a primary and patriotic roll. Today our Government, in partnership with the construction industry, has already demonstrated its leadership in harnessing the force of atomic power for submarines. At the present time two atomic powered submarines are in operation and preparation has been made for the construction of 15 additional atomic submarines.

Our progress in this field has given a new stimulus to those vitally interested in a strong merchant marine and Congress has now supplied approval and appropriations for the construction of the first atomic powered merchant vessel. There is no question in my mind but that the application of nuclear energy to this Nation's merchant fleet is as necessary and will be as successful as it has been to the development of our Nation's defense plans in the construction of atomic powered submarines. According to the present schedule the keel for the first atomic merchant vessel will be laid by Maritime Day next year and plans have already progressed for the construction of two atomic powered bulk carrier vessels including tankers and ore carriers. The Merchant Marine industry has indicated its belief and confidence in this Nation's future by formulating a ship construction program which will require an expenditure of nearly $2 billion, 90 percent of which will be contributed by private industry itself.

At the present time there are contracts for over 88 oceangoing merchant ships for construction or conversion in American shipyards. The Congress of the United States stands firmly behind a strong American merchant marine and will be always ready and willing to participate in programs to insure that our merchant fleet stands first among the merchant marine fleets of the world.

We have heard it said that the merchant fleet is the fourth arm of this Nation's defense and in this day and age of continuing international crisis, it becomes more important than ever before in our Nation's history that we permit no weaknesses in the defense of our country to occur.

Our first President, George Washington, stated the problem as follows:

"We should not overlook the tendency of war to abridge the means, and thereby at least enhance the price of transporting productions to their proper markets. I recommend it to your (Congress') serious reflection how far and in what made it may be expedient to guard against embarrassments from these contingencies by such encouragement to our own navigation (merchant marine) as will render our commerce and agriculture less dependent on foreign bottoms which may fail us in the very moments most interesting to both these great objects."

The American people, upon learning the facts, will never approve of policies that compromise principle for expediency. Today, at home and abroad, we face tremendous problems that require a rededication of ourselves to a renewed faith in our free way of life. The menace of international communism still exists and still has its objective the destruction of free governments and individual liberty everywhere in the world.

Despite a massive Soviet propaganda buildup that is growing in volume regarding their peaceful intentions the following facts cannot be successfully disputed.

1. The Soviet Union has violated every international agreement or treaty it has had with a non-Communist power.

2. The Soviet Union to date has been unwilling to agree to any effective inspection system that would give equal protection to the free world.

3. If our atomic defensive capability was eliminated the Soviet-Communist strength in conventional forces would be sufficient to overwhelm Western Europe, the Middle East, and Asia.

4. There has been no reliable information indicating any change in long-term Soviet-Communist strategy—the destruction of human freedom everywhere.

5. Despite the well-advertised smiles of Khrushchev in the summer of last year, the inherent totalitarian blood lust of the Soviet Communist system was demonstrated by the ruthless crushing of freedom in Hungary in November.

No prudent person can ignore these facts.

The Communist bloc may be likened to an arsonist. With stealth and a penny box of matches he could destroy a great metropolitan area were it not for an extensive and expensive fire-alarm system and fire-fighting system.

There have been suggestions made that the full air inspection suggested by the President be modified so that in exchange for our air inspection over Siberia that the Soviets be allowed to inspect Alaska and all of the United States west of the Mississippi.

As an American, a westerner, and a Californian, I must in candor state that such a compromise proposal does not appeal to me. It sounds too much like a Communist recipe for rabbit stew of equal parts—one horse to one rabbit.

As long as the menace of international communism exists we must maintain a strong national defensive force in the air, on the land, on the sea, and this, of course, includes an adequate and modern merchant marine.

We also need to constantly encourage our allies abroad to face the facts and carry their fair share of the defense burden. This Nation cannot and should not be expected to do the job alone.

I believe we are at one of the great crucial turning points of history.

International communism which 40 years ago imposed its will upon the people of Russia has in the meantime, by conquest, subversion, and international blackmail, extended its power to where over 900 million people are enslaved behind the Iron Curtain.

Probably not as much as 10 percent of that number can be considered hard-core Communist Party members.

Never before in history have so few imposed their ruthless totalitarian will upon so many human beings.

Since the fall of Dienbienphu on May 7, 1954, international communism has added no territory and no people to its monolithic structure.

Since 1954, within the Communist empire cracks have been showing up which are of great significance.

1. The riots in East Germany and East Berlin.

2. Restlessness in Poland leading to the Poznan outbreak and the temporary attempt to placate the liberty-loving Poles with a

respectable Communist regime as if in fact there could be such an unlikely monstrosity.

3. The Hungarian revolt with its lesson that unarmed people can rise up, seize arms, drive out a secret police control and can only be destroyed when divisions of a foreign power are used to crush a victory the Hungarian freedom fighters had already won.

4. The strains and stresses, economic and otherwise, within Communist China, some of which were reported on Sunday, May 5.

5. The repudiation of $65 billion worth of Soviet Union bonds which is not only indicative of fiscal problems within the U. S. S. R. but a reemphasis, if any is needed, that Soviet commitments are not worth the paper upon which they are written.

6. The failure of the established agricultural and industrial programs in the Soviet Union and in most of the captive states.

Responsible men and women, in and out of government, must ask themselves these questions:

Would the world be a better place in which to live if the Godless international Communist tyranny should disintegrate? Can communism's political system endure if its economic base collapses? Can even a ruthless police state hold its people in subjugation if their economy cannot produce the minimum requirements of food, clothing, housing and a modest number of consumer goods?

At such a time it does not make sense to me that the United States and our free allies would embark upon a program to rescue the Communist world from its own evil shortcomings.

While the Communist world is reaching a crisis in its economic and political life it is now proposed:

1. That our allies open wider the doors of trade in both strategic and nonstrategic materials to Communist nations.

2. We assume the burden of supplying $100 million of credits to the Polish Communist regime. They in turn continue to supply strategic coal to the Soviet Union as well as other production which will strengthen the Soviet economy and hence its totalitarian government.

The Polish Communist government of Gomulka made loans and credits available to the Communist North Vietnamese of Ho Chi-minh and the Chinese Communists of Mao Tse-tung while their negotiators were in Washington seeking American aid.

We have already contributed over $1,200,000,000 to sustain Tito-type communism in Yugoslavia. It has been announced that we will send more jet fighting planes to Communist Yugoslavia.

We have many good and stout allies (free China on Formosa, Korea, Turkey, Pakistan, Vietnam, Thailand, and the Philippine Republic) that need more jet planes. All of them should have a priority over Tito's Yugoslavia.

I do not favor taxing the American people to support Communist economic or political systems abroad.

Other nations have been or now are larger in land area, in population, and in natural resources. Yet they have not been able to give to their people the freedom and the standard of living Americans have enjoyed.

As important as is the productive capacity of our Nation and its military strength, these are not the factors which alone could preserve our freedom or enable us to maintain a free world of free men. The inner strength of America has not been its great cities, its huge industrial plants, its extended transportation systems or its variety of natural resources as important as these are.

The factors which made America an inspiration to the rest of the world grew out of our Declaration of Independence, the Constitution of the United States and the spiritual values which the founders of our Republic recognized and by which they were guided.

We have recognized that there is a higher moral law to which governments are also accountable. We have humbly acknowledged the divine inspiration which has made and preserved us as a Nation.

We have read of and been inspired by the action of George Washington in kneeling in prayer during the dark days of Valley Forge and of Lincoln doing the same during his lonely vigil in the White House during the darkest days of the Civil War.

The priceless ingredient for our people has been our constitutional form of Government which guarantees our religious, personal, and economic freedom.

It was Lincoln who said:

"Fellow citizens, we cannot escape history * * * the fiery trial through which we pass will light us down to the latest generation * * * we, yes even we here, have the power and bear the responsibility * * * in giving freedom to the slave we assure freedom to the free * * * we shall nobly save or meanly lose this last best hope on earth."

THE AMERICAN MERCHANT MARINE—PRIZE ESSAY OF MISS JANE DENMEAD McCORMICK

Mr. BUTLER. Mr. President, for the past 22 years the Propeller Club of the United States has conducted an essay contest among the high-school students of the United States and its Territories for the purpose of bringing to the American citizen the realization that an adequate merchant marine is essential to the economy and defense of our Nation.

I am proud to announce that Miss Jane Denmead McCormick, of 576 West University Parkway, Baltimore, Md., has this year been awarded a national prize for her outstanding essay entitled "The American Merchant Marine: Its Importance to the American Farmer, Miner, Manufacturer in World Trade." As her prize, Miss McCormick will receive a marvelous round-trip voyage abroad one of the fine Moore-McCormack Lines ships from New York to the east coast of South America.

I ask unanimous consent to have printed in the body of the RECORD Miss McCormick's essay, and a copy of the covering letter from Mr. T. P. Wynkoop, national president of the Propeller Club of the United States, which brought it to my attention.

There being no objection, the letter and essay were ordered to be printed in the RECORD, as follows:

THE PROPELLER CLUB
OF THE UNITED STATES,
New York, N. Y., May 24, 1957.

Hon. JOHN MARSHALL BUTLER,
Senate Office Building,
Washington, D. C.

DEAR SENATOR BUTLER: We feel sure you will be pleased to learn of the good fortune of Jane Denmead McCormick, 576 West University Parkway, Baltimore, Md., who has just been awarded a national prize in the 1957 Harold Harding memorial essay contest for an outstanding paper on the subject The American Merchant Marine: Its Importance to the American Farmer, Miner, Manufacturer in World Trade. She will receive a wonderful voyage on the Moore-McCormack Lines, Inc., New York to east coast of South America and return. Her work reflects great credit on the student, also her school and State.

The Propeller Club has conducted this contest for the past 22 years for high-school students in the United States and its Territories, as a means to widen their educational horizons, and assist them in becoming aware of the problems they shall meet in the future.

We are endeavoring, with all the resources at our command, to bring to the American citizen the realization that an adequate American merchant marine is very important for the economy and defense of our Nation. With the knowledge this student has obtained, through research, we feel at least some progress has been made.

Knowing your interest in the welfare of the citizens of your State, especially those of the younger generation, we take the liberty to acquaint you of her success and enclose a copy of the prize-winning essay for your perusal.

Cordially,

T. P. WYNKOOP,
National President.

THE AMERICAN MERCHANT MARINE: ITS IMPORTANCE TO THE AMERICAN FARMER, MINER, MANUFACTURER IN WORLD TRADE

(By Jane Denmead McCormick)

"It is the lifeline of America's hopes and ambitions and ideals, the very tool of commerce and trade without which our economy would collapse." This statement could refer to none other than the American merchant marine, the very backbone of our Nation's foreign trade.

Even in its infancy our country recognized the tremendous value of the merchant marine by insisting upon the enactment of measures which would protect and encourage it. Thomas Jefferson was a stanch advocate of the American merchant marine. He asserted that shipping and sea commerce were essential to American industry and economic balance.

American shipping had to struggle and fight against tremendous odds to gain every inch of the power and prestige that it attained. It had to outwit and outbattle pirates, buccaneers, and privateers, and in 1812 it had to shed its blood for the unique theory that the oceans were the common property of all.

Following this assertion of supremacy the American merchant marine continued to prosper in such a degree that it soon vied with Great Britain for the title "mistress of the seas." But this honor was short lived for in about the middle of the 19th century it started to go into a near-fatal decline. The opening of the West, the need of capitalists, and the use of steamboats by England and France were a few of the numerous reasons for this decline.

With the exception of the sudden boom that lasted only as long as World War I, the rebirth of the American merchant marine did not occur until 1936 when Congress scraped together all existing maritime agencies and boards of the past and created the United States Maritime Commission. Then given two feet to stand on the American merchant marine began again to prosper, halted only momentarily by the Second World War.

This revival of the merchant marine was imperative to the well-being of the American exporters, because they "were placed at a disadvantage in their competition with exporters of those nations upon whose ships they depended." For a nation to whom importing and exporting is so important to place its shipping affairs in foreign hands would be like putting a juicy steak in the open jaws of a lion and asking him not to clamp down upon it.

Importing and exporting are definitely important to the national economy. For instance, take exporting in regard to the farmer. He exports 40 percent of his raw cotton, 30 percent of his rice, rye wheat, and grain sorghum crops, and 20 percent of his tobacco, soybean, and dried and evaporated fruit crops. Aside from the land produce there

is also the livestock to consider. Meat products make up a large portion of his export trade.

Where would the farmer be without the American merchant marine? Would he be as likely to make a profit on these products if he had to depend on foreign merchant marines? Maybe in the beginning, yes, but if this became a foreign monopoly it would eventually lead to his destruction.

Besides those who work on the soil there are also those who work below the soil who depend greatly on exporting. The miner exports almost half of his copper sulfate product and about one-fifth of his sulfur, petroleum coke, lubricating oil, and carbon black. Huge quantities of iron and steel are exported annually. Is not the American merchant marine of obvious advantage to him?

Last in this consideration comes the American manufacturer, the most important of all. His exports are innumerable and exceed all others. Some of these are textile machinery, sewing machines, tractors, graders, printing machinery, typewriters, motor trucks, locomotives, automobiles, paper, radio apparatus, cotton cloth, and chemical specialties, to name only a few of the million items.

In view of these facts we can safely say that "to these industries the export market obviously spells the difference between profit and loss." But this is only one side of the advantages that the American merchant marine has to offer to the farmer, miner, and manufacturer.

Exporting is just one-half of foreign trade; the other half lies in imports. We have to import all of our coffee, tea, cocoa, bananas, and sugar cane, and most of our natural rubber, tin, raw silk, industrial diamonds, graphite, mercury, and so on. All of these products are used daily by the farmer, miner, and manufacturer, either directly or indirectly. "We are gradually becoming more and more dependent upon foreign sources for supplies of certain materials in which we have hitherto been self-sufficient." The American merchant marine plays an integral part in obtaining these necessary products.

Evidently the American merchant marine "renders a high return to our Nation on a relatively small Government investment." It also makes a very direct monetary contribution to our domestic economy. Take, for example, the meals served to passengers and crew members annually represents approximately $55 million. Since American ships purchase their supplies in the American market, this means a very substantial contribution to our farm economy.

It is estimated that the American merchant marine consumes 3 million light bulbs and 9 million bars of soap. Also taking into consideration the American ships' purchases of such items as linens, glassware, dishes, washing machines, etc., "it is evident that our merchant marine affects almost every segment of our economy."

The American merchant marine is certainly essential to our economy and most deserving of the acclaim and pride of every American citizen. It is an invaluable aid to the farmer, miner, and manufacturer. It not only takes their products to market and brings back commodities essential to their livelihood, but also actually buys itself some of their products. Where else could they find a service that is so profitable and at the same time assures "the benefits of national security, stable commercial operations, and a continuity of trade development and promotion"?

OPERATION BOOK DRIVE—TRINIDAD

Mr. BUTLER. Mr. President, many valuable aspects of our American merchant marine, from the commercial and national defense standpoints, are often brought to the attention of the public. However, seldom do we stop to consider the tremendous social force it exerts in our behalf on foreign shores. I should like to call attention to a new and most commendable book distribution program recently inaugurated by the Alcoa Steamship Co. for the island of Trinidad. I ask unanimous consent to have an article from the Baltimore Evening Sun of May 1, 1957, and an editorial from the Baltimore Morning Sun of May 3, 1957, printed in the body of the RECORD.

There being no objection, the article and editorial were ordered to be printed in the RECORD, as follows:

[From the Baltimore Evening Sun of May 1, 1957]

CALYPSO ISLE HUNGRY FOR YANKEE BOOKS

(By Philip Robbins)

The carefree Caribbean island of Trinidad has an abundance of Calypso singers and steel bands, but a serious dearth of books of all types. It also has closer links to Baltimore than most of us realize.

In the last few weeks, the island's literary situation has been improved by more than 3,000 volumes, about 800 of them donated by persons in this area.

That number of books may be small compared with Trinidad's population of about 700,000 persons, but the program is just underway.

The Alcoa Steamship Co. conceived the idea of Operation Book Drive—Trinidad. The company hopes to have a shipment of books abroad each one of its ships that sail every second week from Baltimore for Port of Spain, the island's colorful capital.

AID TO UNITED STATES RELATIONS

Edward R. Collins, Alcoa's Baltimore manager who was general manager in Trinidad before coming here, reports that the drive can have an important effect on United States relations in the Caribbean.

From the information he's received, the books donated by Baltimoreans and persons in a dozen other cities have gotten as joyous a reception in Trinidad as Calypso has recently been accorded in the United States.

"Naturally, it's good for us," he said, "as our company and its parent concern are the second largest United States interests in Trinidad.

"But what we are really enthusiastic about is that the books mean so r .uch more to the people there than anyone here can realize."

NEW ARITHMETICS NEEDED

As an example, Mr. Collins pointed out that Trinidad has had no arithmetic books with which to teach the decimal system since the coinage basis was changed from pounds sterling to fractions of West Indian dollars more than a year ago.

The first shipment of arithmetic texts, donated by a New Jersey school and received in the island just short of 2 months ago, was better than a shipment of gold, Mr. Collins says.

The people of the island, not living in a mechanical society, have been particularly handicapped in work with American firms that involves mechanical skills.

But although technical books are still among the most desired, any sort of books will be gratefully accepted, Mr. Collins emphasized.

WHERE THE BOOKS GO

Many of the general books, along with magazines, are being distributed in hospitals, correctional schools, and homes for the aged as well as in the regular school system.

The drive began among Alcoa employees in the States, and has now expanded so that the company is asking anyone with worthwhile books to give them.

The procedure is simple, Mr. Collins said. Write or call the Alcoa Baltimore office with a description of the donations and instructions as to where and when to pick them up.

The steamship company will do the rest.

The day may not be far off when the Mighty Spoiler, Sparrow, or another of the Calypso kings of Trinidad may sing:

"Since the Yankees came to Trinidad
They make the schoolchildren mighty glad;
Trinidad poor but the U. S. rich,
With a little education we can make a switch.
Mother and daughter gone to college,
Working for that Yankee knowledge."

[From the Baltimore Morning Sun of May 3, 1957]

PRIVATE PRACTICE

Amid the hubbub caused by congressional proposals to cut United States Information Agency funds, it is a good thing to remember that all our friends overseas are not made officially by Government-sponsored cultural contacts. Often, a private agency can do as much as, and sometimes more than, official propagandizers.

There is a small but pleasant instance in the Alcoa Steamship Co.'s book drive, which is asking for good books for the natives of Trinidad, who apparently are hungry for educational reading matter. The company hopes to have a shipment of books aboard every ship sailing from Baltimore to Trinidad (they sail every second week) where the

cargo is sure of an enthusiastic welcome. There will be magazines, too, for schools and hospitals and homes for the aged. The plan, quietly launched and privately carried out, is the sort of thing individuals can do far more gracefully, and with less redtape, than any official agency.

RAPID TAX AMORTIZATION CERTIFICATES INVOLVING OREGON

Mr. DWORSHAK. Mr. President, in the light of criticism directed at the Office of Defense Mobilization for its action in the Idaho Power case, especially from some of our colleagues from the Pacific Northwest, I feel that it is only fair that information concerning rapid tax amortization certificates involving Oregon should be presented.

In order that rapid tax amortization may be seen in clearer perspective and not viewed in terms of an individual case taken out of context, I ask unanimous consent to insert in the body of the RECORD an Associated Press dispatch from Washington, D. C., published in the Idaho Daily Statesman May 18, 1957.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ODM LISTS WRITEOFFS FOR 97 OREGON FIRMS

WASHINGTON.—Nearly 400 corporations in the Pacific Northwest have been granted certificates during the last 7 years for an accelerated rate of depreciation on construction for tax purposes.

The Office of Defense Mobilization has said the effect of the program is to allow the companies to take larger than normal depreciation deductions during the first 5 years.

This is offset by smaller-than-normal deductions after the first 5 years. A committee of the Senate currently is considering repeal of this provision of the tax laws in favor of a more limited program.

ODM reports showed that 35 certificates had been issued in Idaho; Montana had 43; Oregon had 97; and in Washington State there were 223.

ODM lists these certificates in Oregon, with corporations, estimated cost of facilities and amounts subject to amortization in parentheses:

Hanna Coal Ore., Riddle, $3,566,000 ($3,031,000); Paulus Bros. Packing, Salem, $177,000 ($97,000); Lamb-Weston, Weston, $241,000 ($60,000), $222,000 ($56,000); Roseburg Lumber, Roseburg, $1,543,000 ($463,000), $1,667,000 ($667,000); C. D. Johnson, Toledo, $127,000 ($51,000), $59,000 ($24,000), $755,000 ($302,000); Pope and Talbot, Oakridge, $149,000 ($59,000), $86,000 ($26,000); Weyerhaeuser Timber, Springfield, $2,760,000 ($1,380,000), $2,296,000 ($918,000); Weyerhaeuser Timber, Klamath Falls, $3,046,000 ($1,218,000); W. A. Woodward Lumber, Cottage Grove, $523,000 ($288,000); Gardiner Lumber, Gardiner, $863,000 ($259,000), $1,950,000 ($780,000);

Willamette Builders Supply, Aumsville, $447,000 ($179,000); Edward Hines Lumber, Westfir, $1,331,000 ($665,000); Springfield Plywood, Lane County, $116,000 ($58,000); Valley Plywood, Junction City, $249,000 ($125,000); United States Plywood, Mapleton, $108,000 ($48,000), $57,000 ($26,000); Astoria Plywood, Astoria, $1,226,000 ($490,000);

Brookings Plywood, Brookings, $1,231,000 ($493,000); Menasha Plywood, North Bend, $257,000 ($103,000); Coquille Plywood, Coquille, $1,654,000 ($662,000); Bohemia Lumber, Culp Creek, $225,000 ($124,000); Martin Bros. Box, Oakland, $30,000 ($20,000); Oregon Fibre Products, Pilot Rock, $5,816,000 ($2,908,000); Cascades Plywood, Lebanon, $1,015,000 ($406,000);

Hanna Nickel Smelting, Riddle, $22,000,000 ($18,700,000); Harvey Machine, The Dalles, $65,250,000 ($55,462,000); National Metallurgical, Springfield, $433,000 ($372,000); Wah Chang Corp., Albany, $1,492,000 ($1,119,000); Eugene Truck & Machine, Eugene, $133,000 ($66,000); Astoria Marine Construction, Astoria, $42,000 ($28,000); Southern Pacific, Klamath Falls, $2,356,000 ($942,000), Springfield $91,000 ($36,000), Eugene $4,775,000 ($1,910,000);

Archer-Daniels-Midland, Condon & Ione, $55,000 ($28,000), $39,000 ($20,000); Jordan Elevator Co., Jordan Siding, $32,000 ($13,000); Terminal Ice Cold Storage, Woodburn, $567,000 ($312,000); California-Oregon Power, Klamath County, $13,871,000 ($9,016,000); Oil Terminal, Medford, $332,000 ($133,000); Texas Co., Coos Bay, $154,000 ($62,000); Screw Machine Products, Portland, $656,000 ($328,000), $359,000 ($251,000);

Powder Power Tool, Milwaukee, $247,000 ($124,000); Northwest Industrial Laundry, Portland, $50,000 ($35,000); McCormick and Baxter Creosoting, Portland, $144,000 ($58,000); Timber Structures, Portland, $330,000 ($198,000); Multnomah Plywood, Portland, $626,000 ($251,000); Publishers Paper, Oregon City, $122,000 ($49,000);

Pennsylvania Salt Manufacturing, Portland, $1,498,000 ($749,000), $702,000 ($421,000); Pacific Carbide and Alloys, Portland, $92,000 ($46,000); Industrial Air Products, Portland, $78,000 ($50,000); Standard Oil of California, Portland, $80,000 ($40,000); Shell Oil, Portland, $148,000 ($59,000), $226,000 ($91,000), $118,000 ($47,000);

Permanente Cement, Portland, $307,000 ($92,000); Oregon Steel Mills, Portland, $246,000 ($172,000); Electric Steel Foundry, Portland, $359,000 ($269,000), $149,000 ($97,000); Reynolds Aluminum, Troutdale, $475,000 ($380,000); Union Carbide and Carbon, Portland, $2,368,000 ($1,539,000);

Hyster Co., Portland, $1,165,000 ($641,000), $12,000 ($6,000), $431,000 ($216,000); Iron Fireman Manufacturing, Portland, $124,000 ($80,000); Tektronix Inc., Portland, $16,000 ($7,000), $292,000 ($102,000); Cascade Manufacturing, Portland, $111,000 ($100,000); Spokane-Portland-Seattle Railway, Portland, $23,000 ($9,000).

Oregon-Washington Railroad and Navigation, Portland, $65,000 ($26,000); West Coast Fast Freight, Portland, $450,000 ($270,000); Northwestern Ice and Cold Storage, Portland, $35,000 ($23,000); Portland Ice Cold Storage, Portland, $44,000 ($24,000); Silver Eagle, Portland, $150,000 ($90,000); Babbidge Holt, Portland, $64,000 ($38,000); Western Union Telegraph, Portland, $1,300,000 ($52,000).

Portland Central Electric Estacada, $4,250,000 ($2,762,000), $13,300,000 ($8,645,000); California Bag & Metal, Portland, $41,000 ($31,000), $69,000 ($52,000), $58,000 ($38,000); Schnitzler Steel Products, Portland, $158,000 ($103,000), $120,000 ($78,000); Bell Oil Terminal, Portland, $165,000 ($66,000); Douglas Oil Company of California, Portland, $195,000 ($78,000); M. L. Edwards, Garden Home, $12,000 ($7,000); Portland General Electric, Portland, $2,750,000 ($1,375,000), $22,260,000 ($14,469,000); and Pacific Power & Light, Portland, $26,170,000 ($19,628,000).

DENVER POST EDITORIALS CONDEMN QUICK TAX WRITEOFFS AND SUBSIDY TO IDAHO POWER CO.

Mr. MORSE. Mr. President, I think it would be particularly fitting to have appear in the RECORD immediately following the remarks just made by the Senator from Idaho some comments taken from a series of editorials in the Denver Post with regard to the giveaway to the Idaho Power Co. of millions of dollars of the money of the taxpayer by this administration, in keeping with the pattern of political immorality which has honeycombed it from inauguration day in 1953. So I should like to read a few quotations from these editorials.

The heading of the first one, which is dated May 9, 1957, is "Who's Being Suckered Now?"

The editorial reads in part as follows:

Slowly but surely, there is unfolding the eye-opening story of a $23-billion concession to United States industry, in the name of "fast tax writeoffs," in the guise of national defense, and at the expense of the Nation's taxpayers.

President Eisenhower, Treasury Secretary Humphrey and irate Senators and Congressmen led by Virginia's Senators BYRD and ROBERTSON said it is time to curtail what has become one of the most enduring and most abused wartime emergency programs.

This is the first of several editorials which will explain the accelerated tax amortization program (commonly called fast tax writeoffs), how it started, how it works, how much it has cost, and why it precludes budget cuts and a general tax reduction.

Fast tax writeoffs are a form of subsidy to private industry to encourage production and expansion. The intent, when first enacted in World War II coincident with the excess profits tax, was to stimulate construction of defense plants and output of military supplies.

As I have said on the floor of the Senate, and repeat today, the subsidy which American big business has been getting from the Eisenhower administration by way of the tax giveaway into the coffers of big business makes an agricultural subsidy look like peanuts.

It is about time the American people were told the kind of holdup this administration is committing upon them—within the law, it is true. However, as I have said before, and as I say again, the trouble with the immorality of this administration, or the characteristic of the immorality of this administration, is that it does its political stealing within the law. But that does not make it moral. It is politically immoral to use for that purpose a tax writeoff law which was placed on the statute books in the first instance for the purpose of encouraging the construction of wartime plants which would not be of great value for civilian production after the war. I was for that kind of a tax writeoff bill, and I voted for it, because I saw no reason why American industry, large or small, should be required, in behalf of the people, to build war plants which would be of practically no value for civilian production after the war was over, and which would become obsolete. Of course, I thought that under those circumstances there should be a quick tax writeoff, as a part of the war cost.

But it was never intended—and I ask Senators to read the congressional debates at the time—that the Eisenhower administration should make use of that kind of law in order to give to the Idaho Power Co. an interest-free loan which will involve a handout of millions of dollars over the years, when we consider

the interest savings made possible by the accelerated tax amortization certificate, and compute the interest on a reasonable basis. That is what the Denver Post points out in the series of editorials I am placing in the RECORD, buttressing the position which I have taken in opposition to the conduct of the Eisenhower administration in this field in recent years in connection with rapid tax amortization.

The time has come for the American people to know what is happening to them by way of taking their hard-earned tax dollars and giving them to a private utility as an interest-free loan. That is what it amounts to, as the Denver Post points out in this series of brilliant editorials.

The time has come to call a halt to this kind of giveaway. This administration has been pontifically and sanctimoniously telling us that the Idaho Power Co. will proceed with a program of low dams on the Snake River without cost to the taxpayers? Whom does the President of the United States think he is fooling? Some of us read. Some of us study. We recognize that we owe to the American people the duty of getting the facts on these issues.

The most kindly thing I can say about the President in connection with this issue is that he obviously did not study it.

I suppose he is in pretty much the same position he occupied at his press conference at the time of the Dixon-Yates scandal, when Doris Fleeson, a very wonderful newspaper woman in this city, asked the President what he had to say about the report which was on file, by a majority of the then members of the Atomic Energy Commission, and a brief which was also on file, by two members—there were only two members at that time—of the Tennessee Valley Authority Board of Directors, in opposition to the Dixon-Yates contract. What was the President's reply? He did not know about it.

Mr. DWORSHAK. Mr. President, will the Senator yield?

Mr. MORSE. I said then, and I repeat today, that he ought to get someone in his palace guard who will keep him informed. The President ought to be told what the facts are about these matters.

I now yield to the Senator from Idaho.

Mr. DWORSHAK. The Senator from Idaho has no desire to defend the rapid tax amortization program in peacetime. He invites attention to the fact that the Korean War ended almost 4 years ago, and asks the Senator from Oregon whether at any time during that interim he has used his dynamic capabilities to introduce legislation to terminate that particular program in peacetime?

Mr. MORSE. The Senator from Oregon spoke out against it during that period of time. I will supply the Senator from Idaho with copies of the statements which I made during that period in opposition to this kind of tax amortization program. I have heretofore taken the position—and I take it again today—that we cannot justify an accelerated tax amortization program for anything but a plant which will be obsolete when the war is over. That is what all of us voted for when we voted for the law in the first place.

What has happened is that administrations, including the one before this, in some instances—and I have criticized the previous administration on this account—used the law wrongfully, in my opinion, for purposes other than those for which the law was enacted in the first place.

Mr. President, I now go back to the Denver Post editorials, because they are a devastating account of what is happening in regard to the accelerated tax amortization certificates:

With war's end, the excess profits tax ended soon thereafter. And the fast write-off program lapsed. It was revived with the reimposition of an excess profits tax at the outset of the Korean conflict. That excess profits tax died on December 31, 1953, but fast tax writeoffs are still in effect.

Since the Korean peace of 1953, more taxes have been written off under this ostensible emergency wartime program than during all of World War II.

That is how far the Eisenhower administration has gone in its giveaway of unwarranted benefits to American big business. We have almost reached the point, in the minds of some people, at least, that when the name of Dwight D. Eisenhower is mentioned, we are expected to bow three times from the waist. I do not intend to bow, in view of this kind of record.

To the contrary, I intend to disclose to the American people the sorry record he is making. That is what I intend to do.

Mr. DWORSHAK. Mr. President, will the Senator yield?

Mr. MORSE. I say that Dwight D. Eisenhower, as my President and as President of 170 million other Americans, has had the moral duty to see to it that this kind of giveaway to big business was stopped. He had the authority and the power to do it. He had the power to make clear to the Office of Defense Mobilization that he wanted it stopped. He did not do it. The Senator from Idaho asks me whether I at any time introduced legislation in regard to this matter. I ask the Senator from Idaho whether the President of the United States ever issued an order to bring this to a stop. He could have done it. Of course, he did not.

Now I yield to the Senator from Idaho.

Mr. DWORSHAK. The Senator from Idaho, as did the Senator from Oregon, attended the National Republican Convention at Chicago in June 1952. The Senator from Idaho recalls vividly——

Mr. MORSE. The convention was held in July; was it not?

Mr. DWORSHAK. It was in June. The Senator from Idaho recalls very vividly that the Senator from Oregon was one of the most active delegates present at the convention. He was an ardent supporter of the nomination of Dwight D. Eisenhower as the Republican standard-bearer for the Presidency. Does the Senator from Oregon deny it?

Mr. MORSE. Oh, I am not only not denying it, but I have publicly confessed it as one of my great mistakes. It was before I was disillusioned. I did not know him really at that time. I know him now from his record. That is why in 1956 I thought he ought to be defeated.

I am satisfied that had the American people known all the facts of this administration, he would have been defeated. But he has been protected by such a reactionary press curtain of concealment of the truth of his administration that the people just now are beginning to wake up to what is happening in the Eisenhower administration. The American people are beginning to get an understanding of this kind of program on the part of the administration. People do not like it. I say this good-naturedly to the Senator from Idaho, although I do not agree with him on many things, that unless things are changed very quickly in the Senator's party, there will be a great many fewer seats over there occupied by Republicans than there are now.

Mr. DWORSHAK. Mr. President, will the Senator yield?

Mr. MORSE. The American people are going to take an accounting of the Republican Party in November 1958. That is my prediction.

Mr. DWORSHAK. Mr. President, will the Senator yield?

Mr. MORSE. I yield.

Mr. DWORSHAK. The senior Senator from Oregon apparently does not recall that last October one of our national periodicals published an article written by Paul Hoffman in which he read the senior Senator from Idaho out of the Republican Party.

Mr. MORSE. I think it would be a great mistake to read the senior Senator from Idaho out of the Republican Party. I think he is one of the great symbols of the Republican Party.

Now I wish to go back to the editorial:

In the last 6 years, fast tax writeoffs totaling $23 billion have been approved for nearly 22,000 plant expansions or constructions.

Fast writeoffs mean that favored industry can defer the payment of certain income taxes by depreciating their new facilities faster over the first 5 years and paying higher taxes thereafter. At the end of the depreciation period, say 20 to 25 years, the same amount of taxes is supposed to have been paid as if no tax writeoffs were granted.

But there are recognized authorities and public utilities commissions which have argued that this deferment really amounts to a permanent and discriminatory tax reduction for a growing industry.

Regardless of whether the same amount of taxes is paid in the long run, Secretary Humphrey has testified that fast writeoffs of the last 6 years will cost the Government $3 billion in interest.

I repeat that statement:

Secretary Humphrey has testified that fast writeoffs of the last 6 years will cost the Government $3 billion in interest.

Mr. President, that is a double-barreled shotgun that is used against the American taxpayer. First private companies like the Idaho Power Co. are saved interest. Then the taxpayers are soaked because the Treasury must borrow money which it otherwise would have in its possession; and then it has to pay interest on the money. In that way the American taxpayer is shot at twice. That is what the Denver Post is pointing out.

The Denver Post quotes the Secretary of the Treasury as saying that this means a loss to the taxpayers of $3 billion in interest alone. Yet some people become shocked and concerned because I say unkind things about the President of the United States. I have been mild so far in regard to what ought to be said in order to describe this kind of betrayal of the public trust.

Now let me go back to the editorial. It says:

This is because fast tax writeoffs actually are interest-free Government loans to industry. The Government, in turn, has to borrow the funds which industry otherwise would pay in taxes, and the Government must pay interest to get its money.

That is what I call the double-barreled shotgun.

Meanwhile, industry keeps the revenue it ordinarily would pay in taxes if there were no fast writeoff provisions. It can invest those funds, earn enough from them to pay off the deferred taxes when due after 5 years, and still retain a profit. Or it can use those deferred tax funds as interest-free money to finance more expansion.

This kind of tax reduction for favored groups, as Secretary Humphrey says, only postpones the day when general tax reduction can be enjoyed by all the people.

And it is a perversion of the free-enterprise system, the tax laws, and the intent of Congress when the initial defense purpose of such an emergency wartime program is subverted to the selfish peacetime interests of industry.

Mr. President, I ask unanimous consent that the entire editorial in its continuity be printed in the RECORD at this point in my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Denver Post of May 9, 1957]

WHO'S BEING SUCKERED NOW?—I

Slowly but surely, there is unfolding the eye-opening story of a $23 billion concession to United States industry, in the name of "fast tax writeoffs," in the guise of national defense, and at the expense of the Nation's taxpayers.

President Eisenhower, Treasury Secretary Humphrey, and irate Senators and Congressmen led by Virginia's Senators BYRD and ROBERTSON say it is time to curtail what has become one of the most enduring and most abused wartime emergency programs.

This is the first of several editorials which will explain the accelerated tax amortization program (commonly called fast tax writeoffs), how it started, how it works, how much it has cost, and why it precludes budget cuts and a general tax reduction.

Fast tax writeoffs are a form of subsidy to private industry to encourage production and expansion. The intent, when first enacted in World War II coincident with the excess-profits tax, was to stimulate construction of defense plants and output of military supplies.

With war's end, the excess-profits tax ended soon thereafter. And the fast writeoff program lapsed. It was revived with the reimposition of an excess-profits tax at the outset of the Korean conflict. That excess-profits tax died on December 31, 1953, but fast tax writeoffs are still in effect.

Since the Korean peace of 1953, more taxes have been written off under this ostensible emergency wartime program than during all of World War II. In the last 6 years, fast tax writeoffs totaling $23 billion have been approved for nearly 22,000 plant expansions or constructions.

Fast writeoffs means that favored industry can defer the payment of certain income taxes, by depreciating their new facilities faster over the first 5 years and paying higher taxes thereafter. At the end of the depreciation period, say 20 to 25 years, the same amount of taxes is supposed to have been paid as if no tax writeoffs were granted.

But there are recognized authorities and public utilities commissions which have argued that this deferment really amounts to a permanent and discriminatory tax reduction for a growing industry.

Regardless of whether the same amount of taxes is paid in the long run, Secretary Humphrey has testified that fast writeoffs of the last 6 years will cost the Government $3 billion in interest.

This is because fast tax writeoffs actually are interest-free Government loans to industry. The Government, in turn, has to borrow the funds which industry otherwise would pay in taxes, and the Government must pay interest to get its money.

Meanwhile, industry keeps the revenue it ordinarily would pay in taxes if there were no fast writeoff provisions. It can invest those funds, earn enough from them to pay off the deferred taxes when due after 5 years, and still retain a profit. Or it can use those deferred tax funds as interest-free money to finance more expansion.

This kind of tax reduction for favored groups, as Secretary Humphrey says, only postpones the day when general tax reduction can be enjoyed by all the people.

And it is a perversion of the free-enterprise system, the tax laws, and the intent of Congress, when the initial defense purpose of such an emergency wartime program is subverted to the selfish peacetime interests of industry.

Mr. MORSE. Mr. President, the second editorial is entitled "Fast Tax Writeoffs Promise Multi-Billion-Dollar Concessions."

This editorial was published in the Denver Post, which has supported Republican candidates, including President Eisenhower. It is a voice in the field of journalism and republicanism.

I wish to say—and I hope he can live it down; I hope he will not be embarrassed by the compliment I pay him on the floor of the Senate—that Palmer Hoyt is a great editor. I am certain my friend, the Senator from Idaho [Mr. DWORSHAK], will smile at this with me, because he knows a little about politics in my section of the country. No man was more responsible for my coming to the Senate in the first place than was Palmer Hoyt. I have joshed him about it. I told this story on him in Denver not so long ago, and he was very good natured about it.

In 1944, it was Palmer Hoyt, then the editor of the Portland Oregonian, who first came to me and urged me to run for the United States Senate. He got a little group together to urge upon me that I make the run. Now, I must quickly add that we all expected I would be defeated. I had no expectation of winning. I have always referred to myself as a political accident. Nevertheless, I have always been very appreciative of the friendship, both political and personal, of Palmer Hoyt when he was the editor of the Portland Oregonian. He left our State and went to Denver, where he is now the editor of the Denver Post.

An interesting thing about Palmer Hoyt is that, once he becomes convinced that a wrong is being done, no partisan consideration will stop him in his attempt to right the wrong.

As one studies these editorials, there can be no doubt that this great Republican editor of the Denver Post realizes that a serious wrong is being done to the taxpayers of the country by the accelerated-tax-certificate program.

Mr. President, I ask unanimous consent to have the second editorial printed in the RECORD at this point in my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

FAST TAX WRITEOFFS PROMISE MULTI-BILLION-DOLLAR CONCESSION—II

Since the Korean war began, 229 kinds of industry have received $23 billion in "fast tax writeoffs" for construction of 22,000 new plants or additional facilities for national defense.

Many of these industries can claim only a slim, if indeed any, connection with primary defense activities. Now the program has been pared to eight more-or-less essential defense categories. But the tax writeoffs allowed during the last 6 years will cost the United States taxpayer $3 billion in interest alone.

Over 20 to 25 years, industry may pay the same amount of taxes with or without special privileges of fast tax writeoffs, but there is some doubt. Meanwhile, the Government must borrow heavily to make up for the billions in taxes which preferred industry is permitted to "defer" for 5 years.

In effect, fast tax writeoffs are interest-free Government loans (of the taxes it otherwise would have collected) to private industry. It's the same as if the Government lent $100 at no interest to an individual who buys a savings bond with it. In 10 years his investment would pay off the loan and leave him a $25 profit.

The purpose of fast tax writeoffs is to offer industry an incentive to expand toward certain defense mobilization goals. This tax gimmick constitutes a subsidy, by way of temporary 5-year tax relief, to stimulate industrial development faster than civilian needs require.

Senator BYRD, chairman of the Senate Finance Committee, has opened a congressional inquiry into fast tax writeoffs. He contends they have been broadened far beyond Congress' original intent. He describes the program as a "hidden cost" which makes it "more difficult to balance the budget or reduce the tax burden of taxpayers not receiving such a benefit."

At BYRD's order the staff of the joint congressional committee on internal revenue taxation investigated fast writeoffs last year, and its report of December 27, 1956, recommended sharp modification or repeal.

The electric power industry was chosen as the first case study. During the Korean war, $4.2 billion of private electric utility expansion was approved for fast writeoff of $1.9 billion, postponing taxes on that amount of income for 5 years after completion of the new plants.

Writeoffs for power companies were not suspended until January 1, 1956, and in the last 12 months $281,080,113 in additional writeoffs were granted on applications filed before that deadline. More applications are being accepted now, against some future date when writeoffs may again be approved to keep the Nation's power capacity at 20 percent above normal, in order to provide energy for defense needs and possible full mobilization at any time.

Senator ROBERTSON, chairman of the Joint Congressional Committee on Defense Production, has joined BYRD in criticizing fast writeoffs and special tax considerations for private utilities, and steel companies, too.

As of last October, the Nation's steel corporations still had $1.2 billion worth of applications on file for defense writeoffs when, Senator ROBERTSON observed, any new steel plants "will be built for purely peacetime production."

Through 1956 it has been estimated that fast tax writeoffs have cost the Government a total of $5 billion in taxes. Because of construction schedules and 5-year tax deferrals, none of this sum will even begin to be collected until 1961, if then.

There is a question whether fast writeoffs merely postpone taxes, or whether they amount to a "thinly concealed tax reduction." Most utility regulatory bodies and various congressional committees have ruled fast writeoffs are tax deferrals, but the Pennsylvania, Washington, and Wisconsin commissions and a committee of the National Association of Railroad and Utilities Commissioners regard them as tax reductions.

The consensus of the courts and commissions is that tax deferrals belong to the utility until they become due, beginning after 5 years. This gives large interest-free funds to expanding companies during a time of high tax and interest rates, while the taxpayers foot the interest on funds the Government has to borrow to offset the corporate income taxes it isn't collecting.

And practically speaking, neither utility stockholders nor customers gain any benefit from increased dividends or lower rates because fast writeoffs, as generally interpreted and applied, offer no direct or immediate advantages to them.

Mr. MORSE. Mr. President, I shall read one paragraph from the second editorial:

In effect, fast tax writeoffs are interest-free Government loans (of the taxes it otherwise would have collected) to private industry. It's the same as if the Government lent $100 at no interest to an individual who buys a savings bond with it. In 10 years his investment would pay off the loan and leave him $25 profit.

That is the kind of man Palmer Hoyt is—precise; capable of taking highly complicated questions and bringing them down to the simple truth. The example he used is, I think, a fine example, which illustrates the position the Senator from Oregon has taken for some time in his protests against giveaways.

Mr. DWORSHAK. Mr. President, will the Senator yield?

Mr. MORSE. I yield.

Mr. DWORSHAK. I should like to know, if Palmer Hoyt has been the editor of the Denver Post for the past several years, why has he not editorialized and endeavored to do something sooner than now about ending the program which he denounces and condemns so vigorously?

Mr. MORSE. I cannot speak for Palmer. I am sure he would answer the question if the Senator wrote to him about it. I would not even presume to guess why he has not said something about this before—if he has not. I do not know whether he has or not. But I would not be a bit surprised if Palmer, like many other persons, simply was not aware of what was going on in this particular field of this administration's activities. But he has caught up with them; and having caught up with them, we have what I think is a great contribution by him to this subject.

The second editorial was published on May 10, 1957. The next one, published on May 12, 1957, is entitled "Fast Tax Writeoffs Are Public Subsidies." I ask unanimous consent that this editorial be printed in the RECORD at this point in my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

FAST TAX WRITEOFFS ARE PUBLIC SUBSIDIES

The granting of fast tax writeoffs of $65,199,134 to Idaho Power Co. has brought congressional attack upon the Government's entire rapid depreciation program for the delay of corporate income taxes.

Last year, pending Senate hearings, 19 Senators and Congressmen asked the Office of Defense Mobilization to delay approval of Idaho Power tax writeoffs on two small dams it is building on the Snake River in place of a bigger, multipurpose, Federal Hells Canyon Dam.

Idaho Power filed for the writeoffs in 1953, but action was held up until the Federal Power Commission issued the dam-site licenses and the courts passed on the FPC findings.

While the Hells Canyon case was being fought out in Congress, before the FPC and in the courts, the ODM closed out tax writeoffs for electric-power companies on January 1, 1956. Nevertheless, in the last 12 months it O. K.'d $281 million in fast tax writeoffs from 69 electric utilities which applied before the deadline, including Idaho Power.

Fast tax writeoffs were enacted during World War II to encourage defense production by offering an incentive to offset an excess-profits tax. After the war both the tax and the writeoff lapsed, to be revived in 1950 with the Korean war. In 1953 the excess-profits tax again died, but fast writeoffs were retained in the Internal Revenue Code of 1954 and are still in effect, 4 years after the war's end.

This tax gimmick has been used by 229 kind of industry to help finance $39 billion worth of construction on 22,000 new plants or expanded facilities. Fast tax writeoffs allow them to postpone taxes on $23 billion of that sum for 5 years.

In effect, fast tax writeoffs are subsidies to favored industries for economic expansion. They amount to an interest-free Government loan, because funds which companies otherwise would pay in normal income taxes can be withheld and used for 5 years before they begin to fall due. Meanwhile the Government borrows to make up for the deficiency in tax revenues—at a cost to the United States estimated at $3 billion so far in interest.

The tax writeoff program has been cut to eight essential defense industries now, but it can be enlarged at will by the ODM when and if it decides tax concessions again become necessary to attract private industry into various direct or indirect defense activities.

Last year Senators BYRD, chairman of the Senate Finance Committee, and ROBERTSON, chairman of the Joint Congressional Committee on Defense Production, declared the tax writeoff program had burgeoned far beyond the intent of Congress. They ordered investigations, set committee hearings, and asked ODM to hold up pending applications—particularly Idaho Power's.

BYRD wrote the ODM that the "original and continuing purpose of this wartime legislation has been to expedite production essential to national defense." In peacetime, he added, "such special privilege can be justified only in exceptional and rare cases." ROBERTSON informed the ODM that "none of these power projects can meet the test of the accelerated amortization law as being essential to the defense effort." That goes, he said, for steel plants, too.

Arthur Flemming, then ODM director, replied that the needs of the civilian economy would not influence writeoff decisions, and that "defense incentives should be used strictly for defense purposes." As of last October, Flemming listed $3.7 billion in pending writeoff applications from then ineligible industries and $4.6 billion in eligible writeoff requests.

In December the staff of the Joint Committee on Internal Revenue Taxation reported on the whole tax writeoff program, under orders from BYRD, and pointedly criticized its application to the electric power industry. Modification of the law so as to include only actual defense activities, or complete repeal, was recommended.

Then on April 29, 3 days before BYRD's Senate Finance Committee was scheduled to open hearings into the writeoff program in general and Idaho Power in particular, ODM granted the Idaho Power applications. Flemming had been replaced 3 months earlier by Gordon Gray, "Eisenhower Democrat," former Assistant Defense Secretary, and Army Secretary under Truman.

Senators MORSE, MANSFIELD, and O'MAHONEY joined BYRD and ROBERTSON in denouncing the ODM action. One of the first witnesses in the Byrd committee hearings was Treasury Secretary Humphrey, who testified fast tax writeoffs had already cost the Government $5 billion in taxes and $3 billion in interest. And President Eisenhower said he agreed with Humphrey and BYRD that the program should be curtailed.

Mr. MORSE. Mr. President, I wish it were possible to print cartoons in the CONGRESSIONAL RECORD, because they sometimes are the greatest editorials which are written. I have a "honey" here. It shows four characters, not lean and hungry looking, but plush. They are singing. Across their chests is written "Favored Industries."

Then there is a lovely old woman sitting in an old lady's rocker, and knitting away with yarn that is entitled "Fast Tax Writeoff."

The caption of the cartoon is: "'M' Is for the Money That You Made Me."

That is the title of the song: "'M' Is for the Money That You Made Me."

Even the cartoonists are getting wise to this gimmick.

The fourth editorial, dated May 13, 1957, is entitled "So This Is Why Private Power Is Preferable to Public Power." I should like to read a couple of paragraphs from the editorial:

The "fast tax writeoffs" given Idaho Power Co. for 2 dams on the Snake River amount to a $30 million interest-free Government loan, a subsidy from the United States taxpayers which over the years will yield the private utility $329 million.

Mr. BARRETT. Mr. President, will the Senator yield?

Mr. MORSE. I am delighted to yield.

Mr. BARRETT. I think the people ought to have the facts with reference to the action taken by the Federal Power Commission and the Office of Defense Mobilization. As has been pointed out, the Senator from Oregon well knows that similar action was taken in the case of many companies in his own State and elsewhere in the Pacific Northwest. This is not a writeoff in any way, shape, or form, as the Senator knows; it is merely rapid tax amortization. It does not amount to anything like $300 million. The taxes involved are less than $30 million—approximately $27,500,000.

The Idaho Power Co. will be required to pay back to the Government the entire $27,500,000 starting after the 5th year;

14 years thereafter, they will have repaid the Government half of it; and 20 years after that they will have repaid the entire amount to the Government. Did the Senator from Oregon object when similar tax amortizations were granted to some 900 other utility companies in the Pacific Northwest?

Mr. MORSE. I have already answered that question several times in this debate. I am also going to give the Senator from Wyoming my past speeches in opposition to this type of giveaway, any time, anywhere, to private utilities in my State, in Wyoming, or anywhere else. I have been against them consistently. I think they are wrong.

I voted for the tax amortization law in the first place for the use for which it was intended in the first place, namely, to build war plants which would have no civilian production use, or little such use, after the war. That has been my position.

Mr. BARRETT. Mr. President, will the Senator further yield?

Mr. MORSE. Oh, surely.

Mr. BARRETT. I may say to the Senator that the fast tax writeoff privilege granted by the Office of Defense Mobilization has been used very sparingly so far as my State is concerned, but it has been used in the Senator's State of Oregon to build plants which have afforded many employment opportunities to the people there and have made possible the development of industries at the expense of the Federal Government.

Mr. MORSE. I say to my friend from Wyoming, even if his description is accurate, that that does not make it right, wherever it is used. I will be glad to discuss with the Senator from Wyoming on the floor of the Senate any specific cases which the Senator from Wyoming wishes to mention. But I wish to correct the impression that the Senator from Wyoming is leaving in the RECORD that this action will not, at the taxpayers cost, come to benefits totaling $329 million.

Before the Senator from Wyoming came into the Chamber, I quoted from the editorials, the Secretary of the Treasury, who himself admits it is costing the taxpayers $3 billion by way of direct interest costs. I am going to correct the Senator's statement because I think it needs to be corrected.

When the Senator says it is not going to cost any such amount of money, what he forgets to put in the RECORD is that after the Idaho Power Co., or company X, Y, or Z, gets one of the interest giveaways it makes great savings over the 5-year period. They do not take the money and bury it somewhere and get no interest on those savings. When Palmer Hoyt in his editorial writes about the $329 million benefit at the cost of the taxpayers, he is figuring, quite properly, the interest return on the money which the taxpayers had a right to expect the Idaho Power Co. would pay if the money had not been given to the Idaho Power Co. in the first place.

What the Senator from Wyoming apparently wants us to fall for is a failure on the part of the average citizen to take out his pencil and compute the interest costs.

Mr. BARRETT. Mr. President, will the Senator from Oregon yield to me?

The PRESIDING OFFICER (Mr. CLARK in the chair). Does the Senator from Oregon yield to the Senator from Wyoming?

Mr. MORSE. Of course I yield.

Mr. BARRETT. I am sure the Senator from Oregon does not want to leave with either the Senate or the people of the country any misrepresentation of my position.

Mr. MORSE. That is quite true.

Mr. BARRETT. I wish to ask the Senator from Oregon specifically, here and now, whether Mr. Palmer Hoyt or anyone else in the United States has suggested to him that the action taken by the Office of Defense Mobilization involves $329 million, insofar as the Idaho Power Co. tax amortization is concerned?

Mr. MORSE. I shall read it right out of Palmer Hoyt's editorial:

> The "fast tax writeoffs" given Idaho Power Co. for 2 small dams on the Snake River amount to a $30 million interest-free Government loan—a subsidy from United States taxpayers which over the years will yield the private utility $329 million.

Mr. BARRETT. Mr. President, if the Senator from Oregon will yield further to me——

Mr. MORSE. I yield.

Mr. BARRETT. I wish to say that nothing could be further from the truth than that statement. As a matter of fact, if the Senator from Oregon will permit me to make an observation at this point, I wish to have the record show precisely what happened: The Idaho Power Co. was granted the license by the Federal Power Commission, which, by the way, is an agency of the Congress of the United States; and furthermore, I can say that the senior Senator from Oregon had as much to do with the action taken by the Federal Power Commission as did the President of the United States, in fact, more, because this action by the Office of Defense Mobilization was authorized by the vote of the senior Senator from Oregon and the votes of other Members of this body at a time when the President of the United States was in the service.

Mr. MORSE. I want the Senator from Wyoming to complete his statement; but I cannot let him make that kind of a misstatement about the Senator from Oregon. The Senator from Oregon never authorized the Office of Defense Mobilization to prostitute the accelerated tax amortization law which Congress passed. My criticism is that the Office of Defense Mobilization and the President of the United States have been prostituting that law; they have been misusing that law; they have been using it for purposes never intended by Congress when the law was passed.

Mr. BARRETT. I say that has been done repeatedly, over 900 times, without any objection on the part of the Senator from Oregon.

Mr. MORSE. Mr. President, again I must say that the statement of the Senator from Wyoming is not true, and the record will belie his statement.

Mr. BARRETT. Mr. President——

Mr. MORSE. I yield.

Mr. BARRETT. If the Senator from Oregon will permit me to make an observation, let me say that the facts, as I see them, in this case are very simple:

First, after the Idaho Power Co. was granted the license by the Federal Power Commission, after hearings which took more than 151 days, and covered 20,000 pages of testimony, the Idaho Power Co. determined, first, that it would construct the Oxbow Dam, which would supply its needs in Idaho. The Federal Power Commission itself—because of the shortage of power in the States of Oregon and Washington—insisted that the Idaho Power Co. build, first, the Brownlee Dam, which would generate twice as much power as would the Oxbow Dam, and later build the Oxbow Dam.

As a result, the Idaho Power Co. spent $67 million, or is spending $67 million, to construct the Brownlee Dam, and will spend $35 million to construct the Oxbow Dam.

Then the Office of Defense Mobilization said that because of the fact that it made a contribution to the Pacific Northwest pool and relieved the shortage in the State of the Senator from Oregon, the Idaho Power Co. was entitled to a rapid tax amortization of approximately two-thirds of the expenditures on those dams. As a result, the taxes which were saved for a period of 5 years, temporarily—or the rapid tax amortization over the first 5 years—amounted to $27,500,000, or $5,500,000 each year; and after the 5 years, the Idaho Power Co. was required to start paying back every penny of the $27,500,000.

Consequently, Mr. President, the statement made by the distinguished senior Senator from Oregon is completely erroneous.

Mr. MORSE. Well, Mr. President, that is interesting. I read all the statement of the Senator from Wyoming, in almost the same language, in private-utility-company literature. I wish to say it is the typical private-utility story, but it does not conform with the facts. The Senator from Wyoming cannot erase the facts, as pointed out in the editorials by Mr. Palmer Hoyt, and as stated by the Secretary of the Treasury himself.

Mr. President, the Republicans should get together on this matter; they should not have the Secretary of the Treasury tell the American people it will cost the taxpayers $3 billion in losses, and then have the Senator from Wyoming say on the floor of the Senate that it will not cost the taxpayers of the country any loss at all. I say, good-naturedly, that the Republicans should get together on this matter; and I say that it will cost the taxpayers of the United States $3 billion; and, as Palmer Hoyt points out, what it amounts to is that the taxpayers of the United States will pay a large share of the costs of the Idaho Power Co. dams.

Mr. BARRETT. Mr. President, does the Senator from Oregon desire to have this body understand that the Secretary of the Treasury said that the action taken by the Office of Defense Mobilization in the Idaho Power Co. case will cost the people of the United States $3 billion?

Mr. MORSE. Mr. President, I am sorry that the Senator from Wyoming was not in the Chamber when I made my statement on that matter.

Mr. BARRETT. But I have been in the Chamber.

Mr. MORSE. Then the Senator from Wyoming did not understand my recent statement.

Mr. BARRETT. I should like to have the Official Reporter read the statement the Senator from Oregon made.

Mr. MORSE. Very well; let the statement be read.

The PRESIDING OFFICER. The Official Reporter will read the statement referred to.

The Official Reporter (Herbert N. Budlong) read as follows:

Mr. MORSE. Well, Mr. President, that is interesting. I read all the statement of the Senator from Wyoming, in almost the same language, in private-utility-company literature. I wish to say it is the typical private-utility story, but it does not conform with the facts. The Senator from Wyoming cannot erase the facts as pointed out in the editorials by Mr. Palmer Hoyt, and as stated by the Secretary of the Treasury himself.

Mr. President, the Republicans should get together on this matter; they should not have the Secretary of the Treasury tell the American people it will cost the taxpayers $3 billion in losses, and then have the Senator from Wyoming say on the floor of the Senate that it will not cost the taxpayers of the country any loss at all. I say good naturedly that the Republicans should get together on this matter; and I say that it will cost the taxpayers of the United States $3 billion; and, as Palmer Hoyt points out, what it amounts to is that the taxpayers of the United States will pay a large share of the costs of the Idaho Power Co. dams.

Mr. MORSE. Mr. President, does the Senator from Wyoming take the position that that statement by me is addressed to the Idaho Power Co.?

Mr. BARRETT. Yes. That is what we have been discussing today.

Mr. MORSE. That is not correct. I have been discussing, in my entire speech, the loss the taxpayers of the United States will suffer as a result of this tax amortization program. I had quoted, before the Senator from Wyoming came to the floor, the Secretary of the Treasury; and in my present statement I am referring to that quotation. The Secretary of the Treasury had pointed out that the taxpayers of the United States have, under this program, lost $3 billion in interest. That is what the Senator is referring to.

Mr. BARRETT. Mr. President, we have been discussing for 20 minutes the Idaho Power Co. case, and nothing more.

Mr. MORSE. Mr. President, that is not accurate, either. I have been discussing the whole program of accelerated tax amortization; and I have referred to the Idaho Power Co.; and I have quoted from an editorial published in the Denver Post, which states that this particular example will at the cost of the American taxpayers benefit the company some $329 million; and the Senator from Wyoming rose to deny that statement.

Mr. DOUGLAS. Mr. President——

Mr. BARRETT. Mr. President, will the Senator yield to me for just one question?

The PRESIDING OFFICER. To whom does the Senator desire to yield?

Mr. MORSE. I yield first to the Senator from Wyoming.

Mr. BARRETT. Does the Senator from Oregon contend that the action taken by the Office of Defense Mobilization on the two dams in Hells Canyon will cost anybody $329 million?

Mr. MORSE. I am saying we gave to the Idaho Power Co. the benefit of $329 million. I say we took out of the pockets of the taxpayers a great many millions of dollars in interest that ought to have been left in the pockets of the taxpayers, and gave them to the Idaho Power Co., as Palmer Hoyt is pointing out in the editorial.

Mr. BARRETT. I am not asking anything about what Palmer Hoyt said. I am asking what the Senator from Oregon——

Mr. MORSE. Palmer Hoyt happens to be my documentaton. What the Senator from Wyoming apparently does not like is that I have authorities who back me up and who say the program is costing the American people great sums of money—the Secretary of the Treasury and the editor of the Denver Post.

Mr. BARRETT. The Senator is trying to confuse the issue. The issue I am trying to present at this time involves only the action taken by the ODM in regard to the Federal Power Commission's action on the two dams on the Snake River, where the Idaho Power Co. is involved, and where the expenditures are a trifle over $100 million and the rapid tax amortization amounts to less than $30 million. Now the Senator from Oregon adopts the reasoning of the editor of the Denver Post and contends it is going to cost the Federal Government $329 million, and, furthermore, he makes the statement in spite of the fact that, under the law at the present time, the Idaho Power Co. will be required to pay back to the Government the entire tax amortization after 5 years from the commencement of the contract.

Mr. MORSE. I should like to quote another authority. I read from the CONGRESSIONAL RECORD of yesterday, at pages 7365–7366. The Senator from Virginia [Mr. ROBERTSON] had this to say:

On yesterday, the Joint Committee on Defense Production, of which I am now chairman, learned that a part of the vast spending since 1950 has been due to losses under the Defense Production Act exceeding $850 million on materials contracted for by the Government for private as well as public use, plus a revenue loss growing out of the tax amortization program of ODM, estimated by the Secretary of the Treasury at $3 billion, but by others at a much higher figure.

Mr. DWORSHAK. Mr. President, will the Senator yield at that point?

Mr. MORSE. I yield.

Mr. DWORSHAK. Is the Senator from Oregon in general agreement with the figure set by the Secretary of the Treasury, a $3 billion loss from this program for 6 years?

Mr. MORSE. It is his figure. I would like to assume he knows what he is talking about.

Mr. DWORSHAK. The Senator from Oregon is contending the Government will lose $300 million from this specific grant by ODM to the Idaho Power Co. Is that correct?

Mr. MORSE. I am saying the Idaho Power Co. is going to get the benefit of $325 million I do not think it ought to get. I am saying what we have to do is compute the money the Idaho Power Co. makes in savings of interest as a result of this kind of handout.

Mr. DWORSHAK. If the $300 million loss in one specific tax amortization case is one-tenth of the total loss the Senator from Oregon and the Secretary of the Treasury claim resulted from the entire program, how can the Senator explain that, notwithstanding almost 23,000 separate tax amortization cases being made, the Idaho Power Co. will have one-tenth of the amount, but it is only one of 23,000 cases? Will the Senator explain that?

Mr. MORSE. I will be glad to ask the Secretary of the Treasury, if the Senator would like to have me do so, to break down his figure.

I have been reporting to the Senate of the United States what the Secretary of the Treasury has said. I am satisfied he is substantially right, and I am satisfied Senators on the other side of the aisle cannot erase, no matter how much they may try to erase, the great giveaway of this administration to the Idaho Power Co. by way of the interest savings out of the pockets of the American taxpayers. I think the fact cannot be erased that, in so doing, the purpose of the act has been prostituted in the first place.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. MORSE. I yield to the Senator from Illinois.

Mr. DOUGLAS. Is it not true that the $3 billion estimate of loss which was made by the Secretary of the Treasury is a minimum estimate, the most conservative estimate?

Mr. MORSE. That has been said. The Senator from Virginia [Mr. ROBERTSON] said yesterday that there were those who thought it was much more than $3 billion. I do not know.

Mr. DOUGLAS. Is it not true that, on the minimum estimate, the direct loss of interest on the subsidy given to the Idaho Power Co. is $30 million?

Mr. MORSE. The direct loss?

Mr. DOUGLAS. Yes. I do not want to misquote the Senator from Idaho. He admits to a direct loss of $30 million.

Mr. DWORSHAK. The Senator from Idaho did not mention $30 million. The Senator from Illinois is confusing the statement of the Senator from Idaho with that of the Senator from Wyoming.

Mr. DOUGLAS. Does the Senator from Oregon not think a subsidy of $30 million is a very large sum?

Mr. MORSE. I think a subsidy of $1, under this law, cannot be morally justified.

Mr. DOUGLAS. But $30 million is a very large figure, is it not?

Mr. MORSE. It is a terrific figure.

Mr. DOUGLAS. It is 30 percent of the cost of the two dams.

Mr. MORSE. That is what Palmer Hoyt has been trying to indicate, when he points out that the taxpayers paid for a part of the dams.

Mr. DOUGLAS. Did not the President and the administration say that the dams of the Idaho Power Co. would be constructed without the loss of a dollar to the American taxpayers?

Mr. MORSE. That is a point I shall make.

The editorial proceeds:

Senator BYRD has called the Idaho Power grant "an utterly indefensible act, because the law providing for the rapid writeoff depreciation was intended to apply only to those industries which were engaged in defense operations."

More than that, the Idaho Power case throws a whole new light on the Eisenhower partnership policy on development of the Nation's water and power resources.

* * * * *

But the Idaho Power dams, as finally licensed by the Federal Power Commission, will produce less power and flood control than a high Federal Hells Canyon Dam at one of the finest remaining sites.

However, the FPC said Idaho Power development of the Snake wouldn't cost the taxpayers a cent.

This is the point of view of the Senator from Illinois, to which I call his attention. I continue to read:

The company told Senator WATKINS, one of its supporters, that it would not seek a fast tax writeoff. In full-page advertisements in leading national magazines, the electric-power industry assured taxpayers Idaho Power would save them the $300 to $400 million cost of a Federal Hells Canyon Dam.

Administration spokesmen advanced the Idaho Power plan as a prime example of the partnership philosophy which reputedly offers comprehensive river development by local interests, without Federal power monopoly or cost.

The last paragraph I wish to read from the Denver Post editorial of May 13 is as follows:

Apart from its dubious defense contribution, the Idaho Power plan for the middle Snake raises these questions: This is comprehensive river development, as required by the Federal Power Act? This is partnership, as espoused by the Eisenhower administration? This is a savings to the taxpayers, as promised by the electric-power industry?

Of course, the answers are perfectly clear. This is a giveaway to favored business groups by the present administration.

I believe I have already obtained consent, Mr. President, to have the entire editorial printed in continuity in the RECORD. If I have not, may I do so at this time?

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

SO THIS IS WHY PRIVATE POWER IS PREFERABLE TO PUBLIC POWER?—IV

The fast tax writeoffs given Idaho Power Co. for two small dams on the Snake River amount to a $30 million interest-free Government loan—a subsidy from United States taxpayers which over the years will yield the private utility $329 million.

Senator BYRD has called the Idaho Power grant "an utterly indefensible act, because the law providing for the rapid writeoff depreciation was intended to apply only to those industries which were engaged in defense operations."

More than that, the Idaho Power case throws a whole new light on the Eisenhower partnership policy on development of the Nation's water and power resources.

Since 1950, more than 900 private utilities have been issued fast tax writeoffs on $3.34 billion to induce them to build powerplants. The utilities keep what they would pay in taxes without writeoff privileges, and put the money to work against the day 5 years hence when their postponed taxes begin to fall due.

At the end of 20 or 25 years the same amount of tax is supposed to be paid, with or without fast writeoffs. But no interest is charged on these tax deferrals, whereas the Government must "buy" the money to replace taxes utilities are postponing. So far, the writeoff program has cost the rest of the taxpayers $3 billion in interest and saved favored industry $5 billion in taxes.

Now the Idaho Power Co. finds itself in a congressional maelstrom again because it repeatedly assured the public that it could develop Hells Canyon as well as the Federal Government, and at no cost to the taxpayers.

But the Idaho Power dams, as finally licensed by the Federal Power Commission, will produce less power and flood control than a high Federal Hells Canyon Dam at one of the finest remaining sites.

However, the FPC said Idaho Power development of the Snake wouldn't cost the taxpayers a cent. The company told Senator WATKINS, one of its supporters, that it would not seek a fast tax writeoff. In full-page advertisements in leading national magazines, the electric power industry assured taxpayers Idaho Power would save them the $300 million to $400 million cost of a Federal Hells Canyon Dam.

Administration spokesmen advanced the Idaho Power plan as a prime example of the partnership philosophy which reputedly offers comprehensive river development by local interests, without Federal power monopoly or cost.

Then, a few days ago when the public power cause at Hells Canyon was all but lost, the Office of Defense Mobilization ignored 2 congressional committees and approved Idaho Power applications for fast tax writeoffs totaling $65,199,134, or two-thirds the cost of its 2 dams.

Gordon Gray, ODM Director, told the Senate Finance Committee that it was only fair to grant the Idaho Power writeoffs because the company filed for them 'way back in 1953, and met all the requirements of 900 other electric-power company writeoffs.

In a critical report on defense writeoffs for private industry, the staff of the Joint Committee on Internal Revenue Taxation said last December that electric-power company writeoffs are virtually automatic. When the electric-power expansion goal is open (it is closed for the time being), any applicant can get at least a 35-percent writeoff, up to a 65-percent maximum, unless the company is located in a target area.

Idaho Power got 65 and 60 percent, respectively, on its Brownlee and Oxbow Dams, although their power production will be barely sufficient to meet the load growths of its own customers—with little, if any, left over for defense industries.

It would appear that the farther power plants are from defense activities—like remote Hells Canyon—the faster they can be written off. This is supposed to promote decentralization of industry in the interest of national security.

Apart from its dubious defense contribution, the Idaho Power plan for the Middle Snake raises these questions: This is comprehensive river development, as required by the Federal Power Act? This is partnership, as espoused by the Eisenhower administration? This is a savings to the taxpayers, as promised by the electric-power industry?

Mr. MORSE. The last editorial is from the May 14 Denver Post, entitled "Stop the Plunderbund."

I desire to read three paragraphs from this editorial, but I ask unanimous consent that the entire editorial be printed in the RECORD at this point in my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

STOP THE PLUNDERBUND—V

Finally it is obvious that the intent of Congress in enacting fast tax writeoffs during World War II and the Korean war has been broadened far beyond original defense purposes into a multi-billion dollar peacetime subsidy to private industry.

How this came about and whether it is god or bad can be debated. The important thing is to recognize fast tax writeoffs for what they are, appraise them as such, and decide where to go from there.

Fast tax writeoffs amount to interest-free Government loans to private industry. Since 1950, they have allowed 229 kinds of industries to postpone income taxes on $23 billion for at least 5 years. In the meantime, the Government borrows at the average taxpayers' expense to make up for the taxes it is not collecting from privileged industries.

In turn, industry has taken advantage of this wartime tax gimmick to build 22,000 new or bigger plants in a $38 billion capital expansion of the national economy. The cost to the rest of the taxpayers, so far, is estimated at $3 billion in interest and $5 billion in deferred corporate income taxes.

Much of the industrial expansion stimulatd by the fast tax writeoff subsidy, or incentive as some prefer to call it had only the slimmest relationship with basic military activities and probably would have come about as normal growth anyway.

There are those, like Arthur Flemming, former ODM Director, who argue convincingly that in this nuclear missile age, industry is the frontline of defense, the mobilization base which will be first and hardest hit and which must launch the Nation's recovery and retaliation. Others contend the intent of Congress was not so much to promote defense industry as it was to encourage general economic expansion.

That may be so, but if it is then let's drop the defense disguise, acknowledge fast tax writeoffs as a public subsidy to private industry in the interest of national security, and judge them on their merits.

Senators BYRD, chairman of the Senate Finance Committee, and ROBERTSON, chairman of the Joint Committee on Defense Production, would repeal fast tax writeoffs now, except for strictly military development of new weapons. The administration has offered a milder but still drastic curtailment.

In addition to the apparent and immediate loss of Government revenues, BYRD says such special wartime inducements tend in peacetime to create unfair competition, overexpansion and damage to smaller unprivileged concerns. Senator MORSE points out the administration has abandoned its campaign pledge to reduce taxes for small business because the Treasury cannot afford it.

Fast tax writeoffs for private power companies have drawn the heaviest congressional fire. BYRD and ROBERTSON argue that private utilities are guaranteed their profits as a regulated industry and cannot qualify under the law for fast tax writeoffs. MORSE charges fast tax writeoffs, like the $65 million granted to Idaho Power Co., show up the Eisenhower partnership policy as a cynical hoax that gives away public damsites for

incomplete private development, and then subsidizes inadequate dams with multi-million dollar tax handouts from the public Treasury.

But fast tax writeoffs have an even greater national impact on the average citizen and taxpayer. They affect both the size of the budget, because of hidden interest charges, and the taxes everybody else must pay.

Senator MANSFIELD, we think, summed up this broader analysis in sound and simple terms when he said during Senate attack on the Idaho Power grant:

"We are confronted with the highest peacetime budget in our history. There is considerable talk about a tax reduction. However, there will not be any tax reduction unless there is a reduction in the budget * * *.

"But, nevertheless, the administration is, in effect, making it even a bigger budget by the amortization of such projects as this one, because funds which should be coming into the Treasury, for the purpose of tax cutting and lowering the debt, are being used to perpetuate a system which has long outlived its usefulness."

Mr. MORSE. The editorial states:

Finally it is obvious that the intent of Congress in enacting fast tax writeoffs during World War II and the Korean War has been broadened far beyond original defense purposes into a multi-billion-dollar peacetime subsidy to private industry.

The editorial goes on to say:

In addition to the apparent and immediate loss of Government revenues, BYRD says much special wartime inducements tend in peacetime to create unfair competition, overexpansion and damage to smaller unprivileged concerns.

* * * * *

But fast tax writeoffs have an even greater national impact on the average citizen and taxpayer. They affect both the size of the budget, because of hidden interest charges, and the taxes everybody else must pay.

Senator MANSIFIELD, we think, summed up this broader analysis in sound and simple terms when he said during Senate attack on the Idaho Power grant:

"We are confronted with the highest peacetime budget in our history. There is considerable talk about a tax reduction. However, there will not be any tax reduction unless there is a reduction in the budget * * *.

"But, nevertheless, the administration is, in effect, making it even a bigger budget by the amortization of such projects as this one, because funds, which should be coming into the Treasury, for the purpose of tax cutting and lowering the debt, are being used to perpetuate a system which has long outlived its usefulness."

I feel that the Senator from Montana [Mr. MANSFIELD] summarized very well, in the brief statement he made on the floor, I believe on April 29, in protest of the ODM order which granted this tax writeoff to the Idaho Power Co. His statement is quoted in the editorial.

Mr. LAUSCHE. Mr. President, will the Senator from Oregon yield?

Mr. MORSE. I yield to the Senator from Ohio.

Mr. LAUSCHE. Is the Senator from Oregon a member of the committee which has been discussing what action should be taken as to quick writeoffs for tax purposes?

Mr. MORSE. No, I am not. I testified before the Kefauver subcommittee, but I am not a member of the committee.

Mr. LAUSCHE. Is the Senator from Oregon able to express an opinion as to whether there will be presented to the Senate, in this session, legislation which would bring to an end this right, which has been exercised as he has described?

Mr. MORSE. I can give the Senator assurance such a legislative proposal will be presented. I had hoped we would be able to get the matter handled by administrative action, but that obviously is not going to be the case. I have not, at least to this date, observed such action. If other Senators do not introduce such a proposal before I have prepared mine. I shall introduce a measure on this subject.

Mr. LAUSCHE. Earlier in the remarks of the Senator from Oregon it was stated that some public utility commissions throughout the country have expressed the conviction that the writeoff the Senator is discussing will become a permanent writeoff.

Mr. MORSE. That is what the editorial said.

Mr. LAUSCHE. Has the Senator from Oregon analyzed that assertion in sufficient detail so as to be able to give any information as to how the conclusion was reached?

Mr. MORSE. No, I have not; but that will be done.

Mr. LAUSCHE. I thank the Senator very much.

Mr. MORSE. I wish to thank the Senator from Ohio.

I yield the floor.

JET FLIGHT ACROSS THE ATLANTIC OCEAN ON THE 30TH ANNIVERSARY OF THE LINDBERGH FLIGHT

Mr. THYE. Mr. President, on Monday last one of our jet fighters, an Air Force F-100, flew across the Atlantic from La Guardia Field to Paris, a distance of 4,203 miles, in 6 hours 36 minutes. This jet fighter was named *The Spirit of St. Louis II*, and its trans-Atlantic flight was made 30 years after the historic solo flight by Charles A. Lindbergh. It took Lindbergh more than 30 hours to make his Atlantic crossing in 1927, and in 1897—30 years before Lindbergh's flight—it required about 6 days to cross the Atlantic by steamship.

I desire to emphasize, Mr. President, that in a short span of a little more than 50 years—within our lifetime—the time required for crossing the Atlantic has been reduced from something like 6 days down to a mere 6 hours. This fact illustrates very vividly how close we have brought ourselves to our European neighbor nations and their affairs.

Charles A. Lindbergh spent his boyhood days in Little Falls, Minn. An article appeared in the St. Paul Sunday Pioneer-Press last Sunday marking the 30th anniversary of his solo crossing of the Atlantic, and I ask unanimous consent to have this article printed in the RECORD as a part of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LITTLE FALLS RECALLS LINDY'S LONE FLIGHT

(By Allen Doerr)

LITTLE FALLS, MINN.—Lindbergh flew the Atlantic 30 years ago Monday.

When folks here in his home town heard the news, they closed down everything and cut loose in one of the biggest celebrations in the city's history. Three months later, when the flier came home, they did it all over again, only bigger.

This year there will be no celebration.

A few more persons than usual probably will drive down the west side of the Mississippi River to prowl through the Lindbergh family home. Teachers may take a few minutes to tell their students the tale.

But the date, like its hero, has been obscured by time. And that is just what Charles Augustus Lindbergh, Jr., wants.

To most people, Lindbergh is the man of the legend his flight has become—a thin, young blond in an aviator's helmet, the boy men called Slim, or Lucky Lindy, or the Lone Eagle.

A few people here know him as a slightly balding man of 55 who avoids publicity and people, returns rarely and secretly to his hometown, and lives quietly at Scott's Cove, Darien, Conn.

"It seems the older he gets, the more shy he gets," said Arthur Ohlund, superintendent of Lindbergh State Park.

"He always was quiet. Never had many real close friends," said Martin Engstrom, a merchant who has known the Lindbergh family for years and is one of the home-town people closest to the flier.

Charles Lindbergh grew up here, the son of Congressman Charles A. Lindbergh, who represented the Sixth District from 1907 to 1917. A fiery independent, the elder Lindbergh was mentioned as a candidate for Governor on Teddy Roosevelt's Progressive Party ticket in 1912 and later was linked with the Nonpartisan League and the Farmer-Labor Party.

In 1917, he wrote an isolationist book Why Is Your Country at War? and became the target of violent attacks that were to be echoed when his son took a similar stand before World War II.

Young Lindbergh was a tinkerer who drove an early-model car and later a motorcycle around Little Falls. He farmed the family property for 2 years after he was graduated from high school in 1918 and then went to the University of Wisconsin.

No one here was too surprised when he quit after 2 years and went to Missouri to become a flier. From then until his flight to Europe he was in the air—as a parachutist, as a barnstorming stunt flier, as an Air Service officer and as a mail pilot.

He returned home several times, once to pilot his father on a campaign before the elder Lindbergh died in 1924.

His retreat from the public began almost as thousands of enthusiastic Frenchmen swarmed around him after his landing in Paris.

He accepted three awards—the $25,000 Orteig prize for the Paris flight, $25,000 for a Latin American air tour and a Guggenheim grant to tour the United States to promote commercial aviation. Other offers were turned down. Trophies and medals went into a St. Louis museum.

By the time Lindbergh arrived in Minnesota, 3 months after his flight, he was refusing press interviews and avoiding crowds, except to make speeches about aviation. The overwhelming adoration of the public had become too much for the shy Swede from Little Falls.

The tragic kidnaping and murder of his son in 1932 drove him to Europe seeking

peace and quiet. Threat of World War II brought him back.

Lindbergh toured German aircraft plants and fields—at the request of United States officials, it was later revealed. He mingled with Nazi brass. In a situation he could not escape without compromising his mission he accepted a medal from Herman Goering.

Impressed with German power, he reported to Washington, then to the American people, urging the United States to stay out of the war.

In Minneapolis, May 10, 1941, he told 12,000 persons, "We are not in a position to win this war for England." He said Britain should negotiate a peace with Germany.

Some Americans remembered the Goering medal and called Lindberg traitor. President Roosevelt called him "Copperhead," which hinted the same thing.

Here in his home town, though, "People thought he had the right idea," said Martin Engstrom. "We are conservative people and Colonel Lindbergh's attitude sort of reflected the part of the country he was from."

Dr. Austin Engel, of Minneapolis, was a resident of Little Falls from 1925 to 1953 and mayor from 1940 to 1944.

"I don't think the people of Little Falls ever felt like so many other people did about Colonel Lindbergh's stand," Mr. Engel said. "Most of us decided to wait it out and see if time would prove him right or wrong."

But, most people were less tolerant. Colonel Lindbergh resigned his commission and the Government would not take him back. He served in obscurity during World War II as a civilian consultant. In the South Pacific he flew 50 combat missions as a civilian and shot down Japanese planes.

Following the war, the story of his service, including the truth about the trips to Germany and the Goering medal, slowly unfolded. In 1953 President Eisenhower recommissioned and promoted him to general. Today he is adviser to the Air Force and to airlines and aircraft manufacturers.

Officially, the park and home were given the State as a memorial to Congressman Lindbergh.

"The colonel always tries to make it very clear he has nothing to do with it," said Park Superintendent Ohlund.

"Occasionally," he added, "we get a visitor who still resents the colonel's politics and wants to talk about them."

There has been no regular community observance of the Lindbergh flight since the colonel returned in June 1927. But businessmen here, stimulated by the recent movie based on the book, Spirit of St. Louis, which won for Lindbergh a Pulitzer prize in 1954, are trying again to get the idea rolling.

"It makes more sense to have a Lindbergh day here each year than it does to have, say, a Jesse James day in Northfield," said Chamber of Commerce President Al Spielman.

The State centennial committee is trying to get one of the duplicates of the Lindbergh plane, the Spirit of St. Louis, which were created for the motion picture. (The original is in the Smithsonian Institution in Washington, D. C.)

AMENDMENT OF SMALL RECLAMATION PROJECTS ACT

The Senate resumed the consideration of the bill (H. R. 2146) to amend the Small Reclamation Projects Act of 1956.

Mr. DOUGLAS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOUGLAS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. CLARK in the chair). Is there objection?

Mr. BARRETT. I object.

The PRESIDING OFFICER. Objection is heard.

The clerk will resume the calling of the roll.

The legislative clerk resumed the calling of the roll.

Mr. DOUGLAS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ANDERSON. Mr. President, the pending bill has been reported unanimously by the Committee on Interior and Insular Affairs. It results from the passage, a year ago, of the Small Projects Reclamation Act. We had a very difficult time with the Small Projects Act. I served as chairman of the conference committee which dealt with the bill for a period of more than a year. The conferees could not resolve their difficulties. Finally, after the passage of other legislation, it was agreed that a Small Projects Act might finally be enacted.

The conference committee finally agreed to a bill at the very end of the session. The conference report was adopted and the bill was sent to the President of the United States with a number of other legislative measures.

At the conclusion of the session of Congress, the President of the United States, after he had read the Small Reclamation Projects Act, particularly the provision requiring reports to be made to the Committee on Interior and Insular Affairs of the Senate and to the Committee on Interior and Insular Affairs of the House, was disposed to veto the Small Projects Act. A veto message was, in fact, in preparation.

Members of the Senate Committee on Interior and Insular Affairs called at the Office of the President and tried to intercede on behalf of the bill, and requested that the bill be not vetoed, because it represented countless hours of endeavor and because it would be bad if it were to be vetoed at that time.

The President finally asked one Member of the Senate if he thought the Senate would be disposed to correct the portion of the bill to which he took exception if he gave his approval to the bill which was then before him. The Member of the Senate to whom the question was addressed gave as strong a commitment as he could, and stated that he would endeavor to have sent to the President a bill incorporating the change the President desired. That Member of the Senate communicated with me. When the Senate resumed its session this year, one of the first things we did was to approve an amendment to the act, in order to carry out the commitment which the Member of the Senate had given, although unauthorized, to the President of the United States.

I wish to say here and now that I appreciate the action which the Senator took, and I appreciate the confidence which the President expressed that Congress would try to make good on that pledge.

My interest in this matter is to try to show that when a bill contains a defect to which the President takes exception, and a Member of the Senate pledges himself to try to correct it, there is upon us an obligation to endeavor to have Congress correct the defect as soon as we possibly can and to correct it in a manner satisfactory to the President.

Several bills came before the Committee on Interior and Insular Affairs. One bill, introduced by the able Senator from Utah [Mr. WATKINS] very nearly conformed to the desires of the President. There was also a bill introduced by the able Senator from Wyoming [Mr. BARRETT] which was not exactly what the President had suggested, but was perhaps more acceptable to him than was the bill which had passed the House.

Communications were had with members of the Bureau of the Budget and with representatives of the Department of the Interior, and it was felt that the best procedure to follow would be to send to the President the bill which had been passed by the House of Representatives. I think I should say that to the Senator from Utah and the Senator from Wyoming, who introduced bills which are more nearly in line with the President's desires.

Mr. BARRETT. Mr. President, will the Senator yield?

Mr. ANDERSON. I yield.

Mr. BARRETT. I appreciate the remarks of the distinguished Senator from New Mexico. I may say that in my judgment the pending bill meets the objections of the President of the United States, and that it will not interfere with the operations of the Small Projects Act. We are anxious to get this worthwhile piece of legislation on its final way in a form which will be satisfactory to the President of the United States. It will mean a great deal to the Western States.

There was a serious conflict in the conference committee a year ago between those, on the one hand, who wanted to retain in Congress the sole and exclusive authority to legislate on and to authorize these projects one by one, and those, on the other hand, who wanted to leave it within the discretion of the Secretary of the Interior.

After all, this bill is a compromise, as most legislation is, and I believe it is quite acceptable. I hope the Senate will pass the House bill without amendment.

Mr. ANDERSON. Mr. President, I thank the Senator from Wyoming for his statement. I think it would be appropriate to read from the President's statement of August 6, 1956:

> I have approved this bill only because the Congress is not in session to receive and act upon a veto message—

I think that is clear enough language to indicate that the President would have preferred to veto the bill.

It should be borne in mind that this legislation comes about as the result of a long study made by the reclamation States. In that study it was pointed out that there are many small reclamation projects involving only a few million dollars, and that it seems to be a mistake to require Congress to act on each one of those small projects.

For example, there was in my own State a project which would cost only a million dollars. It provided for a very large repayment on the part of the property owners. Congress spent a long time on it. The bill was finally passed and it was sent to the President for his approval. He disapproved of it, objecting to specific language. Long hearings were held again, and finally a measure was sent to the President which he could sign.

The original bill in this instance, H. R. 5581, contained the provision that on certain small projects, the State engineer, fully familiar with the project, should prepare a report, that the regular governmental agencies of the State should act upon it—the water conservation board, for example, or some other group—and that the project should then be submitted to the Secretary of the Interior, and if he felt it was all right, he would approve it. We felt it was a good bill.

It would take away from Congress some of the bills that tended to clutter up the calendar. However, when it got to the President, he took exception to the fact that the bill contained a provision to which he could not agree. I should like to read the language of the President.

The language I wish to quote from the President's message is this:

> Specifically, a provision found in section 4 (c) is seriously faulty. The section provides that—"* * * no such contract shall be executed by the Secretary prior to 60 calendar days * * * from the date on which the project proposal has been submitted to both branches of the Congress for consideration by the appropriate committees thereof, and then only if neither such committee, by committee resolution and notification in writing to the Secretary disapproves the project proposal within such period: *Provided*, That if both such committees, in the same manner and prior to the expiration of such period, approve the project proposal, then the Secretary may proceed to execute the contract: *Provided further*, That in the event either committee disapproves the project proposal, the Secretary shall not proceed further unless the Congress has approved the same.

The President then said:

> This language would thus require, before a project negotiated under the act is allowed finality, a further act by the legislature.

He said:

> Furthermore, the negotiation and execution of a contract is a purely executive function. Although the Congress may prescribe the standards and conditions under which executive officials may enter into contracts, it may not lodge in its committees or Members the power to make such contracts, either directly or by giving them the power to approve or disapprove a contract which an executive officer proposes to make.

Then I read this language from the Chief Executive:

> I believe it to be my duty to uphold the constitutional principle that only the Congress can make laws and only the executive branch can administer them.

The committee has considered the objection on the part of the President. It has felt that while some Members do not wholly subscribe to the objection, the President was well within his rights in making it. A majority of the committee agreed with the President, and the committee has undertaken to live up to the commitment which was made; namely, that an attempt would be made to pass a bill which would clear up the difficulty and send it to the President.

The President would have preferred that the entire section be stricken out. The committee felt that Congress does have the power of the purse. Therefore, it says, in the language of the bill, that the contract may be approved, but that no appropriation shall be made under it until the matter has been presented to Congress. I think that may result in almost the same thing, but it does keep the powers in their proper alinement. The President has the right to make contracts; Congress has the power of the purse and the right to approve grants of money. Therefore, we have dealt with the matter as the committee felt was best, by approval of the House language.

I may say that while I personally prefer, perhaps, the bill introduced by the able Senator from Wyoming [Mr. BARRETT], I felt it was important to take, if possible, the language of the House bill in order that we might not get into a tangle with the House at a subsequent time in a conference.

If I had not been the chairman of the committee of conference for more than a solid year during the previous disagreement with the House, I might feel a little bolder toward having a disagreement with the House on this issue.

Mr. BARRETT. Mr. President, will the Senator yield?

Mr. ANDERSON. I am happy to yield.

Mr. BARRETT. Is that not a good reason why the bill which has come from the House should be passed by the Senate without any changes whatsoever?

Mr. ANDERSON. Yes, I think it is; but I understand the Senator from Illinois has an amendment with reference to the 160-acre limitation.

I only say, as I have indicated previously, that I think our first obligation is to try to correct the part of the bill to which the President took exception. If we add to the bill a provision relating to the 160-acre limitation, which I hope we will not do, but which the Senate has a perfect right to do, then, of course, the proposed legislation will lie dormant, because it will never be agreed to in conference.

Therefore, we will have to refuse to do what the Members of the Senate attempted to pledge Congress to do, namely, to correct the language to which the President took exception.

I fully agree that no Member of the Senate has a right to pledge anyone else, and the individual who attempted to handle this matter realized that himself, but simply told the President of the United States or his officers that an attempt would be made to pass the necessary measure. I think an attempt ought to be made to do it. Therefore, I feel that the bill as passed by the House should be passed by the Senate without amendment, and should be sent to the White House as promptly as possible.

Mr. BARRETT. Mr. President, will the Senator yield?

Mr. ANDERSON. I yield.

Mr. BARRETT. Was it not the intention of the committee that if the bill which came from the House was passed by the Senate, action then would be taken on the proposal by the distinguished Senator from Illinois [Mr. DOUGLAS]?

Mr. ANDERSON. I do not want to have the word "action" construed as meaning favorable action. But if the Senator will permit me to modify it and say that a hearing would be held on the bill of the Senator from Illinois, I am willing to agree to that meaning.

Mr. BARRETT. I accept that modification. I did not mean by "action," favorable action, by any means.

Mr. ANDERSON. The point I have made steadfastly is that the President signed a bill which he would otherwise have vetoed on the ground that Congress imposed an improper restriction on the Secretary of the Interior. I think his point is a valid one and that Congress should proceed to correct the language. Had that general promise not been given the President, he would have exercised his power to veto the bill.

The States which are involved are most anxious to get the program underway. They have had a committee at work on the matter for a long time. The very able State engineer of Nevada and the water commissioner of New Mexico have been the chief sponsors of the proposed legislation, but all the Western States have participated in it. The State of California has a tremendous interest in the bill. There are a great many irrigation projects which should be acted upon, particularly in a time of water scarcity, such as we have now throughout the West, and the States should not have to come to Congress each time to get specific approval. The States themselves are well qualified, have excellent staffs, and can handle projects running up to a few million dollars. But when a large project such as the recent project in the Colorado Basin is considered, which runs into the hundreds of millions of dollars, we all recognize that such a project does not belong in the jurisdiction of a State water department. The bill does not deal with that sort of project at all, but deals with small reclamation projects, which the States and the local governments have adequate facilities to handle.

I close by saying that in this instance I feel Congress should act as promptly as it can, to assure the President of the United States that when he has reluctantly given his approval to a bill, and has done so not because he disagrees with the general purpose of the bill—because he agrees with it fully—but disagrees with the provision whereby reports would have to be submitted to certain committees of Congress, Congress will show him the courtesy of passing, as quickly as possible, a bill which carries out the understanding the President had as to what properly should be included in the legislation.

Therefore, I hope the bill without the amendment will pass, and will go to the President as promptly as possible.

The PRESIDING OFFICER. The bill is open to amendment.

Mr. DOUGLAS. Mr. President, I think I should say for the RECORD that an informal agreement has been reached between the Senator from New Mexico, who is in charge of the bill, the then acting minority leader, the junior Senator from Illinois [Mr. DIRKSEN], and myself that there will be no vote upon the bill tonight, but that there will be a discussion of the measure, so that the RECORD may be more complete when the vote comes on Monday.

Mr. KNOWLAND. Mr. President, will the Senator yield?

Mr. DOUGLAS. I yield.

Mr. KNOWLAND. I might say that I came into the Chamber after some of the discussion had taken place. I did not realize and did not know that there had been a formal agreement entered into concerning the bill.

Mr. DOUGLAS. There was an informal agreement reached with the acting minority leader.

Mr. KNOWLAND. I understand that. What I am getting at is that I have since heard that the majority leader was hopeful that the Senate could proceed to take action on the bill tonight.

Mr. DOUGLAS. I may say that I should like to have action taken on the bill tonight. That was why I asked that the order for the quorum call be rescinded. But the acting minority leader said that some Senators on his side of the aisle were not present and that he did not want a vote tonight. I was merely trying to be helpful to absent Senators. Therefore, I agreed not to have the quorum call concluded.

Mr. DIRKSEN. Mr. President, what my colleague says is substantially correct. But shortly thereafter it was intimated to me that the majority leader still wanted action taken on the bill tonight, and of course I could not speak for him.

Mr. ANDERSON. Mr. President, will the Senator from Illinois yield to me?

Mr. DOUGLAS. Certainly.

Mr. ANDERSON. I wish to say to the Senator from Illinois that I would prefer to have the Senate take action on the bill tonight. I think the bill should be disposed of, and I think the Senate can safely act upon it.

If the Senate attaches a 160-acre limitation to the bill, I believe the Senate will merely be saying "Let the bill die." But that is a matter for the Senate to decide.

Mr. MORSE. Mr. President, will the Senator from Illinois yield to me?

Mr. DOUGLAS. I yield.

Mr. MORSE. I have no objection to having the Senate take action tonight; but I shall have to send to my office now, for the material I had in the chamber a short time ago. Since then, I have returned it to my office, because I believed that the purpose was to have Senators make a record on the bill tonight, so as to have it available for absentee Senators to read in the RECORD, and to have the Senate vote on the bill on Monday.

Mr. DOUGLAS. I thought that was the agreement, too.

Mr. President, I am ready to remain here until midnight tonight, if necessary, in order to develop a full, live quorum of the Senate to deal with this measure.

Mr. President, who has the floor?

The PRESIDING OFFICER (Mr. CLARK in the chair). The Senator from Illinois has the floor.

Mr. DOUGLAS. Mr. President, I submit, and send to the desk, an amendment which I propose to the bill; and I ask that the amendment be stated.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. On page 3 after line 7, it is proposed to insert the following:

(d) Section 5 is further amended by striking out "and" at the end of clause (e); by striking out the period at the end of clause (f) and inserting in lieu thereof a semicolon and the word "and"; and by inserting after such clause (f) the following:

"(g) provisions conforming to the excess land requirements set forth in the third sentence of section 46 of the act of May 25, 1926 (44 Stat. 649), if the project furnishes irrigation service."

Mr. DOUGLAS. Mr. President, the amendment restores to the small-projects bill the so-called 160-acre limitation which was in the bill as it passed the Senate last year but which was omitted from the bill when it was finally passed and signed in 1956, which limitation is not included in the amending bill as it now appears before the Senate.

This principle of acreage limitation for the use of water was included in the original Reclamation Act of 1902 at the instance of 2 great Americans: Theodore Roosevelt, then President of the United States, and Francis G. Newlands, of Nevada. They are the original authors of the reclamation policy of this country. This policy was affirmed in the act of 1926.

So the purpose of the amendment I am proposing is to make the small-projects bill conform to the historic limitation upon the use of water.

I believe I should point out just what that original limitation is. It is called a 160-acre limitation provision; but it is not really that, because the 160-acre limitation applies to each entrant. So a man could have 160 acres credited to him, and his wife could have 160 acres credited to her; and if only the 2 of them comprised the family, they would therefore have a total of 320 acres thus credited to the family. However, if the man had a son, and if the son had a wife, each of them could have an additional 160 acres each, or a total additional acreage of 320, in which case the family could have a total limitation not of 160 acres but of 640 acres, or one square mile, or a full section, to which water would be furnished. If, in addition, the man had a daughter, and if the daughter had a husband, each of them could have a limitation of an additional 160 acres, or an additional 320 acres for the 2 of them, making a total limitation for the family of 960 acres upon which the Government would furnish water. So I wish to point out that the 1902 and 1926 provisions are somewhat elastic.

The second qualification I wish to point out is that this is not a limitation upon the amount of land a man can own. It is not really a land law, and it places no limitation whatsoever upon the acreage a man can own. It places a limitation upon the number of acres to which the Government will furnish water. That is a very essential point which needs to be realized from the very beginning.

Why was the principle of this acreage limitation applied in the original reclamation law, and why has it been part of the historic reclamation policy of the Government? It was adopted because the representatives of the United States felt that the water which was financed by the Federal Government should be used to protect the family-sized farms, and should not be used to give a further advantage to the big estates. In other words, it was part of the historic land policy of the United States which provided for 160 acres under the Homestead Act, passed during the Civil War, and which, when carried into effect, established the family-sized farm as the basis for farming throughout the Middle West; and it was intended that the same principle should be applied to the more arid regions where water would be furnished.

Mr. President, in this connection let me say that when irrigated land is used as orchard land, 160 acres is a very large farm. I think a living can be made on citrus farms of 30 acres or 40 acres. In the case of apple orchards, 160 acres is a very big farm indeed. Yet this is permitted under the so-called 160-acre limitation, which—as I have shown—is not really a 160-acre limitation at all, but can be expanded to 320 acres, 640 acres, or possibly even 960 acres.

Mr. President, this is the issue which I am trying to have established: That the resources which the United States Government furnishes for irrigation should be used, insofar as possible, to foster and protect the family-sized farms, rather than to foster and protect the huge estates and the enormous land holdings which characterize certain portions of California and the Southwest.

I believe it should be noted that on ordinary irrigation projects in the past, the Federal Government furnished the capital for the investment in irrigation. That was paid back out of irrigation earnings, and increasingly out of power earnings, as well, over a period of from 40 to 50 years. But no interest was paid on those advances made by the Federal Government. So, in effect, up to the present time, what has happened has been that the taxpayers of the United States have advanced interest-free loans over long periods of time for irrigation purposes.

I know that in the pending bill there is a slight departure from that principle—in subsection (c) of Public Law 984, which is the law the present bill amends, namely, that the cost of water put on land in excess of 160 irrigable acres for one entrant is to be repaid, not only with the principal but also with the average rate of interest, to the nearest one-eighth of 1 percent, which the Government has to pay.

Nevertheless, unless there is an acreage limitation, the financial resources

of the Government and the superior borrowing power of the Government will be used to provide irrigation on individual holdings in excess of 160 acres, and therefore that will be an indirect subsidy to the large holdings.

There is another advantage which accrues to those whose land is irrigated and to the irrigation interests of the so-called 17 semi-arid States, namely, that when the principal is repaid, it is my understanding that that sum does not go back into the general Treasury, but is used for future reclamation projects. So once the appropriation is made—and in this case the interest is paid—the taxpayers never get the money back. It becomes the basis for further advances to additional irrigation projects.

I may say that the irrigation law as it stands with these provisions is an eloquent tribute to the political power of the semiarid States in the United States Senate.

Now, Mr. President, let me say that this is not merely a sectional issue, or primarily a sectional issue. While the Small Projects Act in its present form is confined to the 17 semiarid States, or the so-called reclamation States, it should be noted that the practice of irrigation is moving east to the Mississippi River. I have in my hand a report by the Department of Commerce and the Department of Agriculture called Irrigation in Humid Areas from the 1954 Census of Agriculture which points out that in 1954 21,000 farms and a total of approximately 588,000 acres outside of the 17 States were irrigated. In 1 State 132,000 acres were thus irrigated. So that irrigation is moving out from the semiarid States into the country as a whole. I may say, parenthetically, that probably water applied to the land in the States east of the Mississippi will yield a larger return and produce larger crops than will water applied to land in high altitudes in the so-called semiarid States.

Therefore, Mr. President—and this is the point—we who live in the Middle West do not want to have any future development of Government fostered irrigation in our section of the country used to build big farms. We want, instead, to have it used to protect and to conserve as much as possible the small farms.

This may seem to be a minor matter, but it is a major consideration. The principle of acreage limitation embodied in the acts of 1902 and 1926 has suffered very severe erosion, both by special legislation and by administrative rulings.

I remember that when the Colorado-Big Thompson project was before this body, I offered an amendment to apply the 160-acre limitation to the project, and was voted down. That limitation was omitted from the Small Projects Act of last year. Although I was successful in getting it included in the Senate bill, it was knocked out in conference. The acreage-limitation provision is not included in the Fryingpan-Arkansas project, which has been reported by the committee, and which will shortly be before the Senate.

So, what we are seeing, Mr. President, is steady attrition by legislative action. As new projects are authorized, the 160-acre limitation, which we have heretofore regarded as basic, is omitted from proposed legislation. I believe nearly all Senators are familiar with the fact that there has been administrative failure to enforce the limitations in other irrigation projects, notably those of the Central Valley of California.

A tremendous struggle has taken place over irrigation in California. In California there were in force the old Mexican land laws under which enormously large estates, running into the tens of thousands of acres, and in some cases hundreds of thousands, were created. The owners of those large estates wanted to have the Federal Government make big investments in irrigation projects and to furnish water to as much land as they wished, and tear up the 160-acre limitation. A struggle took place on the floor of Congress, and before administrative tribunals, over the issue in the State of California, and in effect I think I can say that the opponents of acreage limitation have largely won.

We have gone very far, therefore, in reversing—without openly saying we are doing so—this historic American policy of fostering the family-sized farm. I regard this as one of many tendencies in America which are extremely dangerous and against the public interest.

This is not merely an academic belief on my part. Shortly after I was elected to the United States Senate in 1948, I went to California for a vacation. I wanted to take a busman's holiday, and so I spent a number of days traveling by auto through the great Central Valley in California. I started at the northern part of the valley, a little south of Sacramento, and I journeyed to the very southernmost tip of the Central Valley.

I shall never forget an experience which I had on one evening and the succeeding morning. One evening, just as dusk settled down, I came into a town on the west side of the valley. It was a town of several thousand inhabitants, according to the census. I found four stores in the town. One was a tavern. One was a pool hall and short-order restaurant. One was a general store, where the chief items sold seemed to be overalls—I believe on the Pacific coast they are called Levi's—rough work shoes, rough flannel shirts, and rough woolen stockings. There was another store, somewhat battered and dilapidated. That was all.

What kind of town was this and what was around it? It was a town which was the center for a series of big estates. There were a few owners of estates, but the estates were worked by large numbers of farm laborers, mostly Mexicans and Mexican-Americans. It was a sight such as I have seen in Sicily and in southern Italy, but not a sight which I like to see in the United States of America. It was not an American community. It was a community which might be characteristic of Sicily, or it might be characteristic of Spain, where land holdings are concentrated, where the land is worked by poor peasants, and where the whole cultural level of the community is at a low level and has never been allowed to rise.

The next morning I went to the east side of the valley, and there I saw another community of approximately the same size. It was a community which contained some 40 or 50 stores, several doctors, several dentists, a number of churches, and while the business section was not particularly attractive, it was no more unattractive than that in the average American town. I journeyed along the residential streets of that town. I found that there were lawns, trees, flower-beds, decent homes, and backyards. I found the town much like the communities in the Middle West and New England, where one finds this type of American life.

The reason why the town on the east side of the valley was different from the one on the west side lay in the difference in land ownership. The land of the town on the east side of the valley was split up into small holdings. There was an independent farming group, with family-sized farms. Many of the people lived in town and went into the countryside to cultivate the farms. Others supported the traders and professional men and the churches. It was the type of town which we see in the Middle West, and the type of town which as a boy I used to see in New England, before I grew up and was fortunate enough to go to the Middle West.

I think there is no doubt as to which town is more in conformity with American aspirations and ideals. It is, of course, the latter type.

Mr. President, the pending bill is a small part of a great issue, to my mind, the greatest issue which is before America. That issue is sometimes said to be bigness. I prefer to say it is hugeness or giantism. It is the issue of whether both economic and political power are to be concentrated among the few, or whether it is to be diffused among the many.

There has been too much of a tendency in America for manufacturing constantly to become concentrated in fewer and fewer firms, each one of them huge. The five largest industrial concerns in this country last year had, I believe, a gross business of $30 billion. I suppose the 200 largest concerns control considerably over half of the industrial property and resources of the country.

The same tendency toward giantism is found in our banks. I have examined the figures—and I think I put them in the record, in connection with the financial institutions and bank-holding company bills—which show that in city after city 1 or 2 banks control the vast proportion of the financial resources of the community.

Much the same thing is happening in the field of retail trade, with chain stores and giant stores driving out the small merchant. In part this occurs because of economic advantage, but in part it is fostered by law as well.

We now find the same tendency in agriculture. We have lost 600,000 farms in this country since 1952. In that year there were 5.5 million farms in America. The most recent estimate is 4.9 million farms. The farms which have gone out of existence have been the small farms.

The land has not gone out of cultivation. The small farms have been bought up by the owners of large farms, so the result has been that the average size of the farm has increased. Unless the agricultural policy of the country and of the administration is reversed, we are going to have a further decline in the number of farms.

Now come the proposals for these irrigation projects and the proposal to put the financial resources of the Government behind the huge farms and the huge plantations equally as much as they are behind the small farms.

Mr. President, I think we should know what we are doing. If we wish to line up with giantism, if we wish to line up with huge enterprise, if we wish to have an America which will have a relatively few masters and a large number of serfs, if we wish to introduce 20th century feudalism, we should vote down my amendment and pass the bill in its present form.

If we wish to try to reverse this tendency—if we wish to try to hold on to the smaller, self-sufficing farms, which produce independence of thought, because men have their living under their feet, then I suggest that the amendment I offer should be adopted.

There is no use smiling about this matter. This is no laughing matter at all; it is very serious. We are faced with one of the major decisions which we have to make from day to day and year to year.

If we wish to vote for giantism, we should go ahead and vote that way, but let us know and let the country know precisely what it is we are voting for.

Mr. President, the claim has been made that we should not amend the bill because to do so would be to break faith with the President. I hold in my hand the letter from the Department of the Interior dated March 20, 1957, addressed to the Senator from Montana [Mr. MURRAY], the chairman of the Committee on Interior and Insular Affairs, relating to the Fryingpan-Arkansas project.

I wish to read from page 15 of the report what the Assistant Secretary of the Interior said:

> While the provisions of the bill are not unprecedented—witness, for one example, the exemption by the act of June 16, 1938 (52 Stat. 764), of lands of the Colorado-Big Thompson project—there must be considered the relative weight of such considerations as, on the one hand, the substantial benefits from other project sources which the irrigators will be receiving and, on the other hand, the desirability of not disturbing those farms of an existent agricultural economy which already receive a substantial portion of their water requirements from nonproject sources.

That is a polite hint that the Secretary of the Interior would not look with disfavor upon a provision which in the Fryingpan-Arkansas project, would include the 160-acre limitation feature. If he would not look with disfavor upon that in the Fryingpan-Arkansas project certainly he would not look upon it with disfavor so far as the Small Reclamation Projects Act is concerned.

In a letter from the Bureau of the Budget on page 19 of the same report there is the following statement:

> The Bureau of the Budget believes that the question of excess land limitation should be dealt with on an overall basis rather than case by case.

I do not think we need fear a Presidential veto, but if there should be a Presidential veto I would be perfectly willing to meet that issue headon, because I have never thought that the Congress of the United States should subordinate its views and its decisions on public policy to what the opinion of the Executive might be. I have felt that we should vote for what we believe to be correct, and then, if the Executive disapproves, let him veto the measure, and we will fight it out in the field of public opinion.

Another objection which has been mentioned is that the House will never consent to such an amendment. I wish to say that if the House is wrong, as I believe it would be if it rejected this provision, then let us vote our convictions, rather than say that the House will not consent or that the President will not consent. The argument that the House would not consent did not deter Senators from almost the same States that are primarily involved in this issue from pressing for the adoption of the tungsten amendment earlier this week.

What we are doing in act after act is to give up the principle of acreage limitation, for which generations before us have struggled, and which they thought had been embodied in the laws of the United States.

Mr. ANDERSON. Mr. President, let me say, in comment upon what has been said by the Senator from Illinois, that I believe that a Small Projects Act does not enter the field of giantism. These are extremely small projects, and the only purpose in passing the act was to try to free the Congress of the United States from the detailed consideration of them, and permit individual States to submit them to their own water conservation boards and handle them through their State engineers.

I quite agree with the Senator from Illinois that, in connection with this particular legislation, we are not worried about a Presidential veto. What I am worried about is that we may not send to the President legislation which will give him an opportunity to have the Small Projects Act put in what he regards as the proper form.

I know something about the long hours that have been devoted, in the States and in the Congress, to the effort to get this legislation through. Therefore I believe it desirable to send a bill to the President, and not to try to prevent a bill from getting to him.

Of course, what the able Senator from Illinois said about the historic American policy in our reclamation program is true. I agree with him. But we were dealing with a completely different situation in the early days of reclamation. There was a time when an individual could file a desert entry. Try to find a piece of ground in the United States on which to file a desert entry today. At one time I filed a desert entry, and I allowed other members of my family to file them. In all, we filed on a total of some 10,000 acres available in the Rio Grande Valley. That was in 1922 or 1924. But there has not been an acre of that type of land available for 15 years.

The original act of 1902 was based upon a situation in which a great dam would be built, and water would be placed upon land which never had had a crop upon it before. That was happening in the Salt River Valley of Arizona. It happened in many other parts of the country.

This bill is designed to apply primarily to those regions which receive almost enough rainfall, but have periods of drought. In such periods of drought supplemental water is needed. The question of supplemental water has entered into the very things about which the Senator from Illinois has been speaking.

In the Colorado-Big Thompson project, Congress blotted out the 160-acre limitation, because it was not creating new lands. It was dealing with lands which were already under cultivation, where the rainfall varied from 10 to 14 inches a year, and where there was no absolute assurance of a crop year after year. An effort was made to make supplemental water available, so that if there were a moisture shortage, that land could be served.

The Senator from Illinois mentioned the Arkansas-Fryingpan project. The area served by the Arkansas-Fryingpan project is land now under cultivation. It is not sought to bring a whole series of new acres into cultivation. This project involves land which has normally almost enough rainfall. A crop is made almost every year.

During the past 3 or 4 or 5 or 6 years of drought, the farmers in that area have had a very difficult time. However, the reason why the 160-acre limitation was omitted from the Colorado-Big Thompson and the Arkansas-Fryingpan projects was that water was being fed to farms already under cultivation. There is, therefore, an entirely different situation than exists when we are dealing with a brand new project.

There might have been mentioned also the San Luis project in Colorado, in connection with which the 160-acre limitation was omitted. Why? Because a great deal of the land was devoted to the fattening of cattle. One man might have 2,000 acres under his control. I can testify, from knowledge of the area in Colorado served by that project, that a man with 2,200 acres in the San Luis project could not make as much off it, if he fed his cattle well, as a man could make if he had half an acre of alfalfa seed in the area near Yuma, Ariz.

The question of the family-sized farm is a somewhat difficult one. Give me an acre of vegetables in the Salinas, Calif., area, and I will trade for it several hundred acres of irrigated land in other parts of the country. The family-sized farm in the Salinas area might easily be 1 acre. Are we going to start writing limitations for that particular area, and say that the family-sized farm in that area shall be only 1 acre?

This problem has been before the committee recently. Many years ago in the

House of Representatives I was a member of the committee which considered the Columbia Basin Act. I was greatly interested in it, because, as a representative of the Federal Emergency Relief Administration, I had participated, in the early days, in trying to put a dam across the Columbia River, as a make-work project. Subsequently a great dam was constructed. Then the problem was, What shall we do with the land?

At that time the best possible planning was done, and it was decided that 80 acres would be enough, that only about 30 acres should be planted in ordinary crops, and the rest should go into pasture. Yet within the past few weeks Senators from the States affected have come to the Senate Committee on Interior and Insular Affairs asking for the removal of the 80-acre limitation, and for a substantial increase in it.

There has been a change in our farming methods since 1902. Whether we like it or not, a change has taken place in 55 years. Many times I have referred to the fact that on my particular farm in New Mexico I can remember when there were 40 workers in the haying crew. Two workers do it today, but they do it with machinery which costs a great deal of money. There has been a change in the ability of a man to make a living by farming a few acres.

If the Senator from Illinois desires an explanation as to why we lost 500,000 to 600,000 farms, he needs only to find out that in the present generation a man has difficulty buying the equipment necessary to make it possible for him to farm. There have been a great many changes. The able Senator from North Dakota [Mr. YOUNG] was commenting to me not long ago about what his children had to pay to start in the farming business, as compared with what he had to pay. Now it is necessary to buy a minimum of $10,000 worth of machinery. When my father came from Sweden, eventually to begin farming in the Dakotas, he had no $10,000 to put into agricultural machinery. He needed one horse and a plow to walk behind. Those days are gone. To say that every provision that was in the act of 1902 must be religiously followed now is to overlook entirely the fact that there has been a change from some of the great projects, such as that served by the Roosevelt Dam in Arizona, to a project in which a very small check dam can provide supplemental water.

The States desire an opportunity to build such projects, and I think they ought to have it. I do not believe that we are abandoning the 160-acre limitation project by project, but I point out that this particular bill is one which it is not necessary to pass to leave the 160-acre limitation situation as it is. The Congress has no obligation to pass this particular bill if it does not wish to do so. We can continue to let the small projects be reported to the Senate Committee on Interior and Insular Affairs, and considered by the Subcommittee on Irrigation and Reclamation. We can continue to let them come before the House committee for consideration, place them on the calendars of the Senate and House, and debate and discuss them. We can do it that way if that is the will of the Senate and of the House. But the purpose of the Small Projects bill was to take the small projects away from the Congress and let the various States handle them. That is the sole purpose of the bill.

Mr. MALONE. Mr. President, will the Senator yield?

Mr. ANDERSON. I yield.

Mr. MALONE. Was not one of the purposes of the bill with respect to the relatively small projects to give the States more responsibility in organizing the projects and in participating in the cost?

Mr. ANDERSON. Yes. I will say to the able Senator from Nevada that time after time in the consideration of this bill we were told that there would be projects running as high as $500,000, which the State Water Engineer had gaged. He knew exactly what the flow was in the stream. He knew about the size of dam which it was necessary to construct. Generally speaking, it was an earth dam. He could very quickly say, "This project could be constructed for a few hundred thousand dollars."

However, if the Bureau of Reclamation is to make a study of it, they must apply a wholly different yardstick. They begin to wonder how many tons of concrete will have to go into the project. I am not critical of the Bureau of Reclamation. I think it is a very wonderful organization indeed. However, I say it is like getting the finest mechanic in the garage to wash one's car. It does not require quite that much skill.

The construction of these small projects does not require the type of engineering work which the Bureau of Reclamation must put into a Grand Coulee Dam, a Bonneville Dam, or a Glen Canyon Dam, or a dam of that kind.

Therefore we feel it is desirable that the States which already have a water resources board or an engineer who is familiar with water problems, and which generally have a stream gager who is gaging the water in the streams, should work up the project in the State and then send it to the Department of the Interior. The Department would then check on the sufficiency of it, based on its own established yardstick, and if the Department liked it, it could approve it, subject only to study by Congress as to what its feasibility might be.

Mr. MALONE. Mr. President, will the Senator yield further?

Mr. ANDERSON. I yield again to the Senator from Nevada; then I shall yield to the Senator from Illinois.

THE SMALL PROJECTS ACT PROPOSED 160-ACRE LIMITATION

Mr. MALONE. I wish to emphasize the work that will be done by the area to be benefited and the State in which the project is located through the State putting up a reasonable amount of money in advance to help pay for the engineering that the Bureau of Reclamation must do to determine whether or not the plans submitted are feasible. The home folks submit the plans and specifications together with a water-supply study to be approved by the Department of Interior.

Therefore, as the Senator from New Mexico has already stated, in that way the expensive and time-consuming work that the Bureau of Reclamation would normally have to do is done by the State engineer or the engineer for the district, and a great deal of money may be saved.

The work by the State or district would include water-supply studies, borings for dam site, and plans and specifications.

Mr. ANDERSON. I remind the Senator from Nevada that in the previous Congress, or possibly it was the Congress before that, there was reported from the Committee on Interior and Insular Affairs, of which both the Senators from Nevada and I are members, a bill which permitted local reclamation districts to construct their own canals instead of requiring the Bureau of Reclamation to do a great deal of it. It was based on the fact that in the State of California alone it was found that a substantial sum of money could be saved—in some cases as much as 50 percent—by doing that work. That resulted in a saving to the Federal Government. I believe that by making use of the facilities possessed by the States themselves we will save a substantial sum of money.

I think that is very much worthwhile.

Mr. MALONE. If the Senator will yield further I should like to make a very brief statement. I listened to the Senator's statement with reference to the 160-acre limitation. I should like to say in that regard that the 160-acre limitation has been removed from several projects after they have been authorized for the very reason that in many desert areas farmers have been making a living on lands that had only a small amount of water for a part of their lands—that is a late priority for water from the stream system, therefore, it required more acreage for a family unit.

Then on most of these anticipated projects the storage or pumping as the case may be is to stabilize the water on such land, rather than to bring in new areas.

We started under the Reclamation Act in 1922, in the arid and semiarid areas of the West, to build dams for irrigation and incidentally furnish flood control. In the humid areas the flood control is paid for by the Government under certain specified conditions.

A farmer might have 300 or 400 acres, on which he had only enough water for partial irrigation, with a small acreage with a full water right.

However, as it becomes more feasible—and I know the Senator is entirely familiar with this—water is worth more as time goes on, and a small project or large project suddenly becomes feasible, and then the water is stabilized on these lands that have been partially irrigated, because of the stabilized water supply.

There have been very few acres of new land under an irrigation project, for a number of years. Organizing such projects and performing the engineering work was my profession before coming to the Senate.

The idea of the Small Projects Act was that when there was involved a project that was within the limitation set in the bill, without going through all the formalities that are required by the Bureau of Reclamation, it was thought and I think rightly so that the Government can

be properly safeguarded without doing all the detailed work. It can be likened to calling in a consulting engineer after a project is set up. The consulting engineer is paid a good fee, and he is brought in to examine the tests of the dam site and the water supply and general feasibility and adequacy of the plans and specifications, but he does not do the detail work.

I have listened to the debate and I know that the Senator from Illinois is very earnest in what he is saying. However, I do believe that there are certain aspects of the bill that he has not fully considered. I would appreciate it if he would consider further the purport of the bill already passed and signed by the President and the pending committee amendment designed to meet the President's suggestion.

Mr. DOUGLAS. Mr. President, I have great faith in both the Senator from New Mexico and the Senator from Nevada, but for the sake of the RECORD I should like to make the following reply.

First, let me say that I have not been criticizing the provisions which are in the pending bill. I have been criticizing the fact that it does not include the 160-acre limitation. I am criticizing what the bill omits rather than what it includes.

My good friend from New Mexico says that there is no need to fear that the bill will foster big farmers, because we are dealing with small projects. A small project is defined as one where the capital advance is less than $5 million.

Perhaps in the Southwest, where people deal in big figures, $5 million is a small sum. I assure the Senator, however, that in the Midwest we regard $5 million as quite a figure. Quite a big project can be built with a capital investment of $5 million. Furthermore even if the project is small, the water can be furnished to a few big owners. In other words, small projects do not mean small farmers. It is possible to have a valley, which will be irrigated at the cost of a few hundred thousand dollars or a few million dollars, but that valley may be held by 1 or 2 or 3 owners, so that the benefits will go to the large farmers, not to the small farmers.

The PRESIDING OFFICER (Mr. LAUSCHE in the chair). Will the Senator from Illinois acquaint the Presiding Officer with whatever limitation might be in the bill concerning the size of farms which can be supplied with water?

Mr. DOUGLAS. As I read the bill, there would be no limitation, except that on land in excess of 160 acres for one entrant the owner would have to pay not merely the capital amount but also the average rate of interest on Government securities. But there would be no limitation on the amount of water which could be furnished on land in excess of 160 acres.

I see the Senator from New Mexico [Mr. ANDERSON] nodding his head, so I take it he thinks my statement is accurate.

Mr. ANDERSON. Yes, I do; but I point out that the bill tries to correct a situation concerning another subject. I think we had a full discussion of the 160-acre limitation in the other bill. I am only trying to say that we have fought that out. We now want to get this bill passed.

Mr. DOUGLAS. I do not wish to bring up history, but it so happens that the senior Senator from Illinois was successful in having the 160-acre limitation included in the Senate bill. Then the conference report, which knocked out that provision, was brought up in the Senate before I could get to the floor, and I found, therefore, that I was faced with an accomplished fact. I have always felt very unhappy about the speed with which that report was acted on by the Senate, before I could reach the floor, make a protest, and ask the Senate to stand by its original decision.

Mr. ANDERSON. I think I might remind the Senator from Illinois that there was no yea-and-nay vote on his amendment. We took the Senator's amendment to conference and tried to have it adopted by the House. The House was adamant in refusing to accept it. There was no attempt made to slide something past the Senator from Illinois. If a yea-and-nay vote had been had on the floor, the Senator's 160-acre amendment would have met the same fate, I am quite certain, that it has met on the Fryingpan-Arkansas project and the Big Thompson project. The 160-acre limitation does not seem to be feasible.

The Senator from Illinois was very anxious to have his amendment included. We agreed to take it to conference and see if the House conferees would agree to it. They would not.

Mr. DOUGLAS. May I inquire of my good friend from New Mexico why they would not accept it?

Mr. ANDERSON. Because it is not a practical limitation to apply when supplemental water is being supplied. If one is starting originally to develop an irrigation district, and the land which is being developed has only the water that comes on the ground, then the 160-acre limitation applies.

The reason there has been difficulty in California on the Central Valley project is that there is enough water there, generally speaking; therefore, the 160-acre limitation does not apply.

In the Colorado-Big Thompson project, there is almost enough supplementary water; therefore, the 160-acre limitation does not apply.

Mr. DOUGLAS. The argument that the 160-acre limitation did not apply in the case of supplemental water confused the Senator from Illinois for some years, until he went to California and the Southwest and discovered what the real situation was. Virtually all of the land has some water on it, either from natural causes, by rainfall, or by pumping underground water through wells.

If it is said that the 160-acre limitation applies only where there is no water, either from the heavens or from subsurface deposits, then one is really saying that the 160-acre limitation should not apply at all, because I do not think there is an acre of land in the United States, even around Yuma, Ariz., where there is not some rainfall. Furthermore, it is the practice in most of those areas to pump water from the subsurface deposits.

Mr. ANDERSON. I only remind the Senator from Illinois that in California, to which he referred, there are at least two very large projects which I have visited. One of them has 45,000 acres; the other has 60,000 acres. That land is irrigated by pumping projects. We cannot restrict the amount of acreage on a pumping project anywhere in the United States.

Mr. DOUGLAS. The Senator from New Mexico, able, and thorough, and practical student of irrigation that he is, has missed the initial point I made; namely, that the 160-acre limitation is not on ownership. One can own as much land as he wants. The point is merely that the amount of water promised by the Federal Government has to be restricted on entries of less than 160 acres. I may say that in the case of a man and wife, the acreage is 320. If there is a son, and the son is married, the amount is 640 acres. If there are two children—they need not be male children; they can be daughters—and if they are married, that makes 960 acres.

Mr. O'MAHONEY. Mr. President, will the Senator yield for a moment?

Mr. DOUGLAS. I yield for a question.

Mr. O'MAHONEY. Yes; I should like to ask the Senator a question. Does the Senator realize that he is applying a rule which properly belongs to reclamation projects where there is an opportunity for the settler to settle upon open land?

In a case such as is embraced in the bill, where there is no free land to which a settler can go, where the land is already in private ownership, and where there is more than 160 acres in a farm or a ranch, and where the projects are small and the holdings are small, the only purpose is to supply additional water so that those who must live on the land can get the water which is needed to grow their crops.

Does not the Senator realize that if the 160-acre limitation were applied to such projects, it would force the present owners off the land, and it would be impossible to induce settlers who are within the definition of the 160-acre amendment, which the Senator offers, to settle upon the land, because they would not have land enough?

Mr. DOUGLAS. It really pains me to have my good friend from Wyoming make such an argument as that. I read the debates which occurred in this body some 10 years ago, before I came here, when the then senior Senator from California, Mr. Downey, argued just as the Senator from Wyoming is arguing now. If my memory serves me right, the Senator from Wyoming then punctured this argument and first convinced me that this position was wrong.

Mr. O'MAHONEY. That I completely acknowledge. I would take the same position now, I think.

Mr. DOUGLAS. I may say that I profited so much from the position taken then by the Senator from Wyoming that my eyes were opened to what was happening, because the Senator from Wyoming pointed out that the water was

being furnished by the Federal Government, and the legal question was not how large a man's holdings should be, but under what conditions would the Government furnish him water?

I see the Senator from Wyoming smiling and nodding his head.

Mr. O'MAHONEY. Certainly.

Mr. DOUGLAS. So in effect he admits I have given the correct version of the position he took 10 years ago in the great debate here, when he tangled with a former Senator from California, Mr. Downey, and defended the rights of the small farmers.

Mr. O'MAHONEY. The Senator from Illinois has confused the facts of the California case with the facts which arise in the dry-land States where the bill will have effect.

Mr. DOUGLAS. I have traveled through the Central Valley, and it is certainly a dry-land area in the absence of water coming down from the mountains.

Mr. O'MAHONEY. But that area has an undersurface supply.

Mr. DOUGLAS. Virtually every area has an undersurface supply.

Mr. O'MAHONEY. I can show the Senator areas all over the United States where the water level is sinking, sinking, sinking all the time, making it impossible for the farmer to live.

The position of the Senator from Illinois is one which would destroy existing farms and existing small ranches in the hopeless effort to bring settlers into an area where the 160-acre limitation on farms would not apply at all.

Mr. DOUGLAS. Mr. President, the Senator from Wyoming mistakes the issue. These large land holdings would get additional water on 160 acres, 320 acres, or possibly 640 or 960 acres, and the value of the land would be enormously increased. But under my amendment the Federal Government would ration the water—as it needs to do—so that water would not be furnished to holdings in excess of the acreage limitation.

Mr. President, that might have the effect of inducing some of the big landholders to sell to smaller holders. I see nothing wrong in that; the land would not go out of cultivation. We would simply be reversing the trend which has been occurring over the country; and in that way there would be an increase in the number of smaller farms, instead of so many large farms, or a smaller number of large-sized farms and a larger number of small-sized farms.

Mr. President, the Senator from New Mexico tried to reduce the argument of the Senator from Illinois to an absurdity by saying that he knew of land where a living could be made from one acre. I think probably that is true in certain cases; but I pointed out that probably a living could be made from 20 acres of citrus fruit, and possibly from 60 acres of apples, or perhaps less. Then he said that I was proposing that such a farmer be limited to 20, 30, or 40 acres. Mr. President, I am not proposing anything of the sort. My proposal would permit such farmers to have water on 160 acres, or, if the farmer was married, on 320 acres; or, if the farmer was married and had a married child, on 640 acres.

By means of what we are proposing, the desires of orchardists beyond the dreams of avarice would be met; and it really pains me to see the erstwhile great defender of small farms now become an apologist for the big holders. It really hurts me, because the Senator from Wyoming [Mr. O'MAHONEY] has been the foremost defender in the Senate of the United States of the rights of small business and small agriculture.

Mr. MALONE. Mr. President, will the Senator from Illinois yield to me?

The PRESIDING OFFICER. Does the Senator from Illinois yield to the Senator from Nevada?

Mr. DOUGLAS. I yield.

Mr. MALONE. Mr. President, I think the distinguished Senator from Wyoming [Mr. O'MAHONEY] still fights for that particular cause. He lives in one of those areas, as do I.

As a matter of fact, I think the Senator from Illinois has already debated that point sufficiently. However, it makes no sense at all to anyone living in the desert area to fix an ironclad limitation on the amount of land which can be benefited by the Federal Government in connection with advancing money for irrigation or flood control, for the reason that the climate in the arid areas is entirely dependent on elevation and latitude. Nevada is a good example; Nevada is 600 miles long and 400 miles wide. In southern Nevada, freezing temperatures are seldom reached, although once in a while there might be a little skim of ice on the trough of water from which horses drink. But in northern latitudes there are some places on the Humboldt River, where land is irrigated, where the temperature reaches 60 degrees below zero. Thus, as between those two places, there is a complete reversal of temperature conditions. So when we speak of land in the latitude of Las Vegas and land in the latitude of Wells, Nevada, we are speaking of complete opposites. Anything west of the meridian about halfway between east Kansas and west Kansas is semiarid; and anything in Colorado or farther west is arid. So we might as well provide a limitation of 2 acres or 20 acres; that would be just as logical as one of 160 acres.

If the Senator from Illinois will examine each project, he will find that even after Congress has imposed a limitation in such cases—as Congress often has done—it has been submitted to the Secretary of the Interior, and later has come back to Congress if the limitation was not feasible.

Therefore, if we were to provide a limitation in the case of irrigation projects, we would have to have a report on each project, before we would have any idea about how much land would be required.

In the case of a large project, there probably would have to be 4 or 5, or even 8 or 10 different limitations, because no one limitation would fit any project I know about, and I have had to do with practically all of the projects west of the Rockies; and I was consulting engineer for the central California project, to which reference has been made many times; and I was State engineer for the Hoover Dam; and I was in that business just before I came to the Senate. So I point out to the Senator from Illinois that such a limitation is not practical at all.

Previous to the present time, we argued the matter of the limitation; that was done in connection with another bill, which was passed by the Senate and was sent to the House of Representatives; and thereafter the House passed the bill, which went to conference, and finally the conference report was approved, and the bill was signed, and became law.

Today, we are trying to meet an objection. I do not understand that the President was adamant about the matter; but he suggested that there was a violation—and he may be correct, in view of the way the other measure was worded—of the reparation of powers within the Government.

Mr. President, on page 4 of the report, Report No. 293, on the pending bill, H. R. 2146, there is an explanation which I ask unanimous consent to have printed at this point in the RECORD.

There being no objection, the explanation was ordered to be printed in the RECORD, as follows:

EXPLANATION OF THE BILL

H. R. 2146 amends the Small Projects Act to provide a 60-calendar-day period (not to include periods of adjournment of either the Senate or the House of Representatives) for review of the Secretary of the Interior's findings and approval of small projects, which are required to be transmitted to the Congress. This period gives the Senate and House Interior and Insular Affairs Committees an opportunity to examine and act upon the project proposals, and to notify both appropriations committees in the event of disapproval of any project proposal. The appropriation of funds may be made at any time after the expiration of the 60-day period without notification of disapproval by either of the legislative committees. If either of the legislative committees disapprove a project proposal, appropriation of funds may be made only upon enactment of legislation authorizing the project in the usual manner. These procedures are not prerequisite to the appropriation of funds to be expended for construction, pursuant to the terms of the Small Reclamation Projects Act, of facilities whose construction had theretofore been authorized under the Federal reclamation laws.

Mr. MALONE. Mr. President, the explanation merely reviews the situation under the existing act, Public Law 984 of the 84th Congress. Under its provisions, a period of 60 days is provided for review of the findings and approval by the Secretary of the Interior of small projects. This period gives the Senate and the House Interior and Insular Affairs Committees an opportunity to examine the project proposals, and to notify the Appropriations Committees of the Senate and the House of Representatives in the event of disapproval of any project proposal. If either of the legislative committees disapproves a project proposal, the appropriation of funds may be made only upon action on the floor of the House of Representatives and the floor of the Senate in passing in the regular way a measure authorizing the project.

So the suggestion was not that the act be repealed; but we are trying to make the act meet the suggestion the President has made, so he will not find any constitutional objection.

That is all I have to say to the senior Senator from Illinois. I understand the point he is trying to make, but I merely offer the information as a practical matter, since I was in the business 30 years before I came to the Senate.

Mr. DOUGLAS. Mr. President, I appreciate the comments of the Senator from Nevada, and I recognize their constructive purpose.

The point has been made that the bill does not refer to the Central Valley project, in California, but refers to other projects. I hold in my hand the hearings on the small projects bill as of 1955; and on page 45 there is the following statement which was made by Mr. W. A. Alexander, of Porterville, Calif., when he appeared before the committee:

STATEMENT OF W. A. ALEXANDER, ENGINEER, PORTERVILLE, CALIF.

Mr. ALEXANDER. I am chief engineer and manager of one of the districts in the project. I have here a statement that I would like to file with the committee of some resolutions from the districts authorizing our appearance, and also I would like to file for the record my statement.

(The statement referred to follows:)

"STATEMENT OF W. A. ALEXANDER BEFORE SENATE INTERIOR AND INSULAR AFFAIRS COMMITTEE, HON. CLINTON P. ANDERSON, CHAIRMAN, IN SUPPORT OF LEGISLATION TO PROVIDE INTEREST-FREE MONEY TO CONSTRUCT IRRIGATION DISTRIBUTION SYSTEMS

"I am W. A. Alexander, engineer from Porterville, Calif., appearing before your committee in support of legislation to provide interest-free money for construction of irrigation distribution systems by local interests. I have been authorized, along with Howard Stoddard, consulting engineer from Los Banos, Calif., to represent the following irrigation and water districts located under the Central Valley project of California who are receiving or anticipate obtaining a water supply from this project:

	Acreage
"Lower Tule River Irrigation District	102,000
Sausalito Irrigation District	17,170
Tulare Irrigation District	75,514
Terra Bella Irrigation District	13,365
Orange Cove Irrigation District	25,435
Chowchilla Water District	64,087
Shafter-Wasco Irrigation District	37,528
South San Joaquin Municipal Utilities District	61,629
Lindsay-Strathmore Irrigation District	15,368
Lindmore Irrigation District	27,478
Stone Corral Irrigation District	4,927
Total acreage	444,501"

He was testifying on what later became the small projects bill.

Mr. ANDERSON. Not at all. The Senator is talking about a wholly different bill. I mentioned the fact that we put through a bill relating to small irrigation districts handling their own distribution systems. The Senator has talked about that bill. It has nothing to do with the small projects bill.

Mr. DOUGLAS. This is headed "Small Projects-Distribution Systems."

Mr. ANDERSON. That is right, "distribution systems." There is a difference between construction of a dam and the distribution system below the dam.

Mr. DOUGLAS. This is headed "Small Projects"—hyphen—"Distribution Systems."

Mr. ANDERSON. That is true. It has nothing to do with the Small Projects Act whatsoever.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield?

Mr. DOUGLAS. Before I do, I should like to clear up this point. In these hearings there is printed on page 1, one of the bills before the committee and on which these hearings were held. I quote from Senate Resolution 164, 84th Congress, 1st session, section 2 (d); which is printed on page 1:

The term "project" shall mean, first, any undertaking or feature or unit undertaking having an estimated cost of not to exceed $5 million—

Which is the precise limitation placed in the bill before us. As I understand it, the hearings I have before me were the only ones held on the original bill. I know of no others.

Mr. ANDERSON. We got into a wrangle. We divided the distribution system from the other and passed it in a separate bill. If the Senator will notice carefully, the acreage is 75,000; and at $200 an acre, it does not stay under the $5 million limitation.

Mr. DOUGLAS. I would appreciate it if the Senator from New Mexico would put into the RECORD support for that statement.

Mr. ANDERSON. I would say, roughly speaking, that 75,000 acres, at $200 an acre, I do not think would come within the $5 million limitation. As a result, I do not believe any of the projects the Senator has read would necessarily be regarded as small ones.

I would go even further, and would say to him there is a tremendous amount of confusion involved. Far be it for me to say that what the Senator has read was not read in the best of faith, but we get into difficulty. The able Senator from Louisiana [Mr. LONG] had some provisions that related to drainage districts and things of that general nature. We finally came to the conclusion that we had better divide the proposed legislation into two parts. I am quite certain the Small Projects Act was not primarily intended to apply and did not apply to the interest-free distribution act, which we passed ahead of the Small Projects Act.

Mr. DOUGLAS. I thought the division was on geographical lines, in which provision for the 17 States included in the Small Projects Act was put in one separate bill, and provision for the rest of the country was put into another bill. California has always been one of the so-called 17 reclamation States, which are included in the Small Projects Act and which are covered by the present bill.

Mr. ANDERSON. The remembrance of the Senator from Illinois is exactly correct, and small projects in the State of California will still be eligible under the interest-free distribution system act, but the distribution system bill was passed as a separate bill and signed by the President long ahead of this particular legislation.

Mr. DOUGLAS. The lower Tule River project involves a total cost of $880,000, but comprises 102,000 acres.

Mr. ANDERSON. Eight dollars an acre? It could not possibly be. Did the Senator say 102,000 acres? Let me say to the Senator from Illinois that the heading of the hearings contains a hyphen, indicating hearings were held on two bills at the same time. I only wish to say I have dealt with a great many irrigation projects while in the Congress, probably running into hundreds.

Mr. DOUGLAS. The acreage figures on page 46 differ from the figures on page 45. On page 45 the acreage is given as 102,000. On page 46 the acreage to be served is given as 49,958 acres, with an average cost of $17.62 an acre.

Mr. ANDERSON. That must refer to a distribution system. I only say to the Senator from Illinois that I have made this statement to him because I recognize that when hearings are held jointly the testimony can be confusing. Just the day before yesterday we started hearings and we heard Governor Clyde, of Utah, for a few minutes on a bill that relates to a wholly different subject. His testimony would be contained in the same record of the hearings, and would possibly be confusing.

Mr. DOUGLAS. Is it the contention of the Senator from New Mexico that the Central Valley California project, about which I have read, would not come under the Small Projects bill?

Mr. ANDERSON. Yes, very definitely.

Mr. DOUGLAS. That none of them would?

Mr. ANDERSON. May I differentiate the projects in California and the Central Valley project——

Mr. DOUGLAS. I think these are all Central Valley projects.

Mr. ANDERSON. All the Central Valley projects are outside the scope of the Small Projects Act. The Central Valley projects run into the hundreds of millions of dollars. I think the last time I checked, the amount was well over $1 billion for all of them. That has no relation to this type of project at all, but there are certain narrow fingers of land involved, and the witness testified as to one near Hemet, Calif., where a narrow finger of land is available, with a small amount of land on each side of the river. That is the type of project we feel is desirable under this bill.

Mr. DOUGLAS. Mr. President, I yield the floor.

Mr. JOHNSON of Texas. Mr. President, under the previous order, the Senate, when it concludes its deliberations, will adjourn until Monday. It had been hoped that a vote could be taken on the pending measure this evening. The Senator from Oregon tells me he plans to address the Senate for about 10 minutes. There are several Senators who have engagements and who have been inquiring about whether we would conclude by 7 o'clock. I express the hope it will be possible, because at the conclusion of the address by the Senator from Oregon I propose to suggest the absence of a quorum. I notify the attachés of the Senate of that fact now, so they can take judicial notice of this announcement. As

soon as the roll is called for a quorum, I hope we may have a standing vote on the pending measure.

Mr. MORSE. Mr. President, I shall be very brief in regard to this matter. I think the legislative history of the bill, however, should be made tonight, because I do not believe we shall finish with this problem tonight, so far as final legislation is concerned.

Of course, what I want to point out, Mr. President, is that if we are going to make a change in the acreage limitation, we ought to do it now, and agree upon a policy which will apply to different types of fact situations in the field of agriculture.

The Senator from New Mexico [Mr. ANDERSON] has clearly shown that great changes have occurred in American agricultural techniques since 1902. I go along with him in that regard, but I do not go along, Mr. President, with the idea of removing entirely all limitations. That is what is being attempted in this bill. In my judgment, a very bad precedent is set when there is removed the 160-acre limitation. I do not know what limitations are left once that limitation is removed.

I believe now is the time for us to agree upon a policy of limitation which will be applicable, as the Senator from New Mexico pointed out, to changes in agricultural techniques since 1902. So I wish to give the Senate a little bit of history on this matter tonight, for the purposes of future reference.

When I presented a statement before the Subcommittee on Irrigation and Reclamation of the Committee on Interior and Insular Affairs on March 13, I pointed out that the bills under consideration by the Subcommittee on Irrigation and Reclamation relating to the 160-acre excess land limitation of the reclamation law were of the utmost importance, I thought, as raising an important question of public policy.

As a cosponsor, with the Senator from Illinois and my colleague from Oregon, of S. 1425, I have urged its favorable consideration. It would amend the Small Projects Act, enacted last year, by applying the historic antimonopoly 160-acre limitation of the reclamation law.

A brief review of this proposal and the legislative history of the Small Projects Act is a necessary background. In 1955, when the original bill, S. 2442, was before the Senate, a 160-acre limitation was added by floor amendment proposed by the Senator from Illinois [Mr. DOUGLAS] and by me, with the support of the junior Senator from Oregon [Mr. NEUBERGER], who had filed separate views objecting to the omission of such a provision.

It should be recalled that the bill was reported to the Senate on May 4, 1955, but the bill was not scheduled for consideration until July 28, 1955, in the closing days of the session of the Senate. I think there is real doubt that Senate passage would have been possible had an extended debate developed on the proposed amendment.

The bill remained in conference almost 1 year. Once again it came to the floor of the Senate very late in the session, on July 20, 1956. In the confusion of the closing days of the session the 160-acre provision was lost in the shuffle. Public supporters of the antimonopoly provision had little opportunity to mobilize, and the measure became law without the traditional provision of the 160-acre limitation.

Now pending before the Senate is a proposal to change the project approval procedure. So far, little has been done under the act. Under the circumstances, it seems to me that amendments to the act to include the basic 160-acre limitation are very important.

The Small Projects Act authorizes a $100 million program. That is a lot of money. I think I am correct in stating that so far as that amount of money is concerned, it is interest-free.

Mr. President, I wish to stress the public interest, the public rights, and the public policy involved in this measure. At least to the extent indicated every citizen everywhere in the Nation has a little vested interest in this program, and I think we ought to decide as a matter of public policy what our formula should be by way of an acreage limitation. I think now is the time to do it.

I believe we will establish a bad precedent, so far as future change is concerned, and indeed, we will put a roadblock in the way of future change, once we pretty well establish that at least in this field we can go ahead without any limitations at all.

That is what bothers me, Mr. President. We are dealing here with a matter which involves a considerable amount of public money. If we pass the bill, I think we turn the benefits over really without any limitations, unchecked, to the big operators. I do not think that is good public policy.

It may be that I will find myself in complete agreement with the Senator from New Mexico [Mr. ANDERSON] as to modifications of the 160-acre limitation provision, in view of the changes in agriculture that have occurred in this country since 1902. I am perfectly willing to try to work out some such flexible formula which will be adaptable to different agricultural conditions in different parts of the country, or, for that matter, different conditions in the same region.

What I do not like is that it seems to me I would be voting away here the very principle of acreage limitations. The original public-policy purpose of the reclamation law remains, so far as public contributions are concerned. We passed the law in the first instance, I think, because we wished to encourage the development of the land by the family.

It is very easy to say that the family sized farm has changed in size in different parts of the country, but I think one could find out, as to any particular region, what it is. Then we could have a flexible formula which would provide a limitation, which would protect the family sized farm and at the same time prevent what I think is the great benefit which will accrue to the corporate farms in many sections of the country if we start weakening the family sized farm, 160-acre limitation.

Mr. O'MAHONEY. Mr. President, will the Senator yield?

Mr. MORSE. I yield.

Mr. O'MAHONEY. I can understand the Senator's being troubled by a consideration of the kind that he suggests. Of course, if we had the area upon which settlement could be made in family sized farms that would be a splendid thing to do.

The Hells Canyon Dam, for which the Senator has made such a great fight, is currently described as the only remaining power site in America of any size. I cite that to the Senator to show that the arable land in the United States has practically disappeared. The land which is capable of being brought into settlement by farmers who want only 160 acres has practically disappeared.

It was in 1939 that we had to amend the reclamation law so as to provide for the multiple-purpose projects, because there is no land left which is capable of raising a crop which will repay the cost of irrigating it. That is the situation which confronts us.

All we are proposing in the bill under consideration is to deal with the existing irrigated areas, which have been irrigated by private enterprise in the best manner possible, but which need supplemental water. The owners find that they cannot continue to exist as producing farmers unless they get additional water.

When we increase the size, it does not mean an increase in the size for settlement, but it merely means permitting the existing farms to get supplemental water. In order to make certain we were not serving the big interests, we have provided in this proposed legislation a specific limit in dollars as to the projects that could be taken.

Mr. MORSE. I understand that.

Mr. O'MAHONEY. Let us legislate realistically under the conditions that now exist, and not carry over a theory that was good when arable land was available.

Mr. MORSE. I understand the point of view of the Senator from Wyoming, but this is the point where I leave him: Under this bill there is no limitation whatsoever on the amount of land that can be bought by a great farm corporation, for example. I am perfectly willing to readjust the family-sized farm formula so that these areas can be provided with irrigation.

As the Senator from New Mexico [Mr. ANDERSON] pointed out earlier in the debate, 160 acres just will not do the job. But because 160 acres will not do the job, here it is proposed to blow the ceiling out completely. There would be no ceiling, and there could be bought any amount desired.

Mr. O'MAHONEY. What the Senator argues for would blow the existing farmers right off the land.

Mr. MORSE. No. What I am arguing for is that in this legislation we ought to reach some agreement as to a formula which will be based upon a realistic family-size farm area, and not simply provide under this bill that we can proceed, as the Senator from Illinois [Mr. DOUGLAS] has said, to adopt giantism in American agriculture and have no limi-

tation whatsoever. I am not wedded to this 160-acre limitation. What I do not go along with is the other extreme—if the 160-acre limitation is an extreme position—of no limitation whatever.

The Small Projects Act authorizes a $100 million program. Interest-free loans will be made to enable local groups to undertake reclamation and irrigation projects. Such loans are of immense value to the beneficiaries of the project. If they are justified in the general public interest, the direct beneficiary should be willing to conform to historic public policy.

If the facts are such, as the Senator from New Mexico leads me to believe, that a good case could be made for the proposition that we ought to change the 160-acre limitation, let us change it to meet this particular situation. What I am objecting to is the elimination of all limitations in the bill.

The historic public policy is that where public resources are employed, the benefits should be widely distributed among small farmers, and not conferred upon large landowners. As the Senator from Illinois points out, this policy goes back to the early 19th century. It was perpetuated in the Homestead Acts. It is rooted in the Reclamation Law of 1902, and preserved in all subsequent amendments.

It may be that some revision of the 160-acre limitation is sorely needed so as to make it more adaptable to different agricultural conditions in the reclamation States. In some areas, as was pointed out by the Senator from New Mexico [Mr. ANDERSON], an economic farm may be 320 or 500 acres; or it may be 30 or 40 acres, depending upon the kind of land. His point was that in some of the very rich areas of California half an acre or an acre would be better than several hundred acres in some of the arid areas. I know that to be so. But I think the problem should be considered on a scientific basis, and that any necessary changes should be enacted in a law of general application, with due regard and protection for the antimonopoly policy and promotion of the affirmative purpose of encouraging small family farms, which have been the foundations of reclamation for so long.

I have been heard to say before—and I should like to put it into the RECORD again tonight—that if I were asked to name the two things which I think are of the greatest importance in maintaining the American way of life, I would name home ownership in the city and family farm ownership in the country. I do not like to see them destroyed to any extent by a policy which would remove entirely the limitation which has done so much to develop the family farm in the places where we have our irrigation areas.

I understand that the Senator from Montana [Mr. MURRAY], chairman of the Committee on Interior and Insular Affairs, has requested the Department of Agriculture to make a study upon which a revision of the size of the acreage limitation could be based.

I am in favor of such a study, and of its application; but I am against establishing a precedent here tonight in regard to the small projects bill which would enable anyone to say, "The Congress passed a bill which entirely removes the acreage limitation."

Therefore I urge the Senate to adopt the amendment of which the Senator from Illinois [Mr. DOUGLAS] is the author, and of which I am one of the cosponsors. It would continue, at least for the time being, the 160-acre limitation, until we can revise it—as we probably should—on the basis of the kind of study called for by the Senator from Montana [Mr. MURRAY].

There is more than money involved in this issue. The reclamation policy will have a deep and enduring effect upon the pattern of agriculture in the West. The availability of water is the determinative factor for expanded agricultural capacity. The law will determine who shall participate in the use of water made possible by projects undertaken with Federal assistance. We can encourage family farming or promote the trend toward larger corporate enterprises, depending upon our steadfastness in adhering to the acreage limitation principle or its abandonment.

I am willing to modify the principle, so far as modification of the acreage limit is concerned; but I am not ready tonight to vote for a bill which, I am afraid, would be subject to the interpretation, by those who wish to encourage big farming, or giantism, as the Senator from Illinois has called it, that "The Senate has set a precedent. No longer is acreage limitation considered by the Senate of any great importance in our reclamation laws."

Exceptions are bad precedents. The least we can say about this bill is that it is an exception. I do not like to make such exceptions.

Mr. ANDERSON. Mr. President, will the Senator yield?

Mr. MORSE. I yield.

Mr. ANDERSON. There is not one line in the bill which touches the 160-acre limitation. It is an effort to correct an undesirable situation in connection with small projects. The bill does not touch the 160-acre limitation. If we can get the bill through, we shall try to make it possible to correct the situation which any of us think is bad.

Mr. MORSE. Mr. President, will the Senator check me in my statement of fact? Am I correct when I say that my conclusion from a study of the bill is that it contains no limitation whatsoever?

Mr. ANDERSON. The bill which was previously passed—I believe it was House bill 1881, passed in 1955, and again in 1956—contained no limitation. This bill does not deal with the 160-acre limitation in any way. It would merely change the provision of the original bill, which provided that the House Committee on Interior and Insular Affairs, and the Senate Committee on Interior and Insular Affairs, should have the right to disapprove the contracts once the Secretary of the Interior had entered into them.

The executive department took the position that the making of a contract was an executive function, and I subscribe to that contention. Therefore we base our position on the power of the purse, and we say that no appropriation shall be made unless the projects come before the Congress. Nothing else is involved in the bill.

Mr. MORSE. If we were to adopt the Douglas amendment, we would at least place in the bill a limitation which some of us thought should have been in the original bill, the omission of which we have been protesting ever since.

Mr. ANDERSON. I grant that the proposed amendment would establish a limitation. I only say to the able Senator from Oregon that giantism is not developed by means of these tiny projects. Giantism is developed by means of very large projects.

This week we held hearings on a project in Idaho with respect to which the total cost is to be $40 million. Thirty-nine million is to be paid from power revenues. $800,000 is to be charged to irrigation, and only $750,000 or a tiny fraction of the cost, will be paid by the irrigators.

We have exhausted the best dam sites. We have used up a great deal of the best land. We are now trying to make it possible for people who have moved into certain limited areas to enlist the aid of the Federal Government in obtaining an additional water supply.

I know the concern of the Senator from Oregon with respect to the 160-acre limitation. I have voted to include it in bills almost as many times as has the Senator from Oregon—although not quite as many times.

We felt that the proposal which is now before us was the best decision we could make.

Mr. MORSE. Mr. President, I shall conclude with this observation: When we start dealing with descriptive terms, such as "giantism," it is important to get down to definitions. The Senator from New Mexico says there is no reason to fear giantism in connection with projects such as these. The Senator from Illinois [Mr. DOUGLAS] has already pointed out that the cost of the projects may run as high as $5 million. When I think of that financial ceiling, and then think of local communities in the West where it might be applied, so far as the economy of such localities is concerned, giantism could develop, because if an individual corporate farming concern comes into a given locality in one of the irrigated areas and proceeds to buy up anywhere near $5 million worth of property, there is constituted a giant corporate farm which, from that time on, will exercise great economic influence on that locality.

In fact, if there are two or three of them in the area, there will be what the Senator from Illinois has referred to as modern feudalism, economically speaking. I do not mean that there will be control over the individual lives of the citizens, but certainly control over their economic welfare. It is a form of modern feudalism, and therefore I shall continue to support my colleague's amendment.

Mr. NEUBERGER. Mr. President, I do not intend to burden the time of the Senate at this late hour. I merely wish to state for the RECORD that on this issue

I support the enlightened position taken by my colleague from the State of Oregon and by the Senator from Illinois [Mr. DOUGLAS].

If we are to change the 160-acre limitation, which has been in effect in the West almost since the days of the frontier, we should do it in separate legislation, directed particularly to that issue. I do not believe we should attempt to modify so greatly the 160-acre limitation in this small projects bill. It is a separate question entirely.

That is all I have to say on this important issue at this time, Mr. President.

Mr. JOHNSON of Texas. Mr. President, I hope the attachés of the Senate will notify absent Senators that we want as many Senators as possible present before we vote on the pending bill. Therefore, Mr. President, I suggest the absence of a quorum, and I appeal to all Senators to please bear with us until we can be visited by some of our absent friends.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The legislative clerk proceeded to call the roll.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSON of Texas. Mr. President, I ask for a division on the Douglas amendment.

Mr. DOUGLAS. That is quite acceptable to me. I was about to ask for a division. Before the vote is taken, I would appreciate having the Clerk read the amendment. Then, if I may, I should like to speak for about 1 minute to explain the amendment.

The PRESIDING OFFICER. The amendment will be read for the information of the Senate.

The LEGISLATIVE CLERK. On page 3, after line 7, it is proposed to insert:

(d) Section 5 is further amended by striking out "and" at the end of clause (e); by striking out the period at the end of clause (f) and inserting in lieu thereof a semicolon and the word "and"; and by inserting after such clause (f) the following:

"(g) provisions conforming to the excess land requirements set forth in the third sentence of section 46 of the act of May 25, 1926 (44 Stat. 649), if the project furnishes irrigation service."

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Illinois.

Mr. DOUGLAS. Mr. President, the amendment puts into the Small Reclamation Projects Act the acreage limitation of 160 acres for each entry which was originally embodied in the Reclamation Act of 1902 and the act of 1926, but which was not included in the small projects bill passed last year or in the bill now before the Senate.

The purpose of the amendment is to carry out the historic American policy of having additional water supplied by the Government furnished for lands which do not exceed 160 acres for each entry, which in the case of a husband and wife would be 320 acres; and which, if they have children, would be from 480 to 960 acres, or an additional 160 acres for each member of the family.

The amendment is an attempt to continue the historic American policy of furthering the development of small farms, and to check the development of big plantations and big farms.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. DOUGLAS. I yield.

Mr. HUMPHREY. I commend the Senator from Illinois for his fight in this matter and for the consistency with which he has forwarded the program of the 160-acre limitation.

I regret that I was not present in the Chamber to share in the debate, but I associate myself with the very worthy efforts of the Senator from Illinois, and assure him of my support.

Mr. ANDERSON. Mr. President, I should like to take one minute of the time of the Senate to say that we who favor the bill do not feel the 160-acre limitation question should ever have come into this discussion.

The small reclamation projects bill was sent to the White House last year. The President expressed his intention of vetoing it. A member of the Senate Committee on Interior and Insular Affairs sent word to the White House that he felt the provision to which the President objected could be corrected. The President then signed the bill.

We have tried in good faith in this bill to meet the objection of the President.

The 160-acre limitation was not in the original bill. If it goes into this bill, then, of course, the pledge which a Member of the Senate sought to make on behalf of the Senate will not be carried out.

Mr. BARRETT. Mr. President, will the Senator yield?

Mr. ANDERSON. I yield.

Mr. BARRETT. I think it should be made abundantly clear to the Senate that the section of the Small Projects Act under consideration does not apply to public lands, and the matter of an entry on public lands is not involved. The bill provides in that section that where water is provided to privately owned lands in excess of 160 acres interest must be paid to the United States for the construction costs on all lands in excess of 160 acres. It applies solely to privately owned lands.

Mr. ANDERSON. The Senator is correct.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Illinois. Has the Senator from Illinois asked for a division?

Mr. JOHNSON of Texas. The Senator from Texas asked for a division. May we have the division?

The PRESIDING OFFICER. All those in favor of the amendment will stand and be counted.

Mr. NEUBERGER. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Oregon will state it.

Mr. NEUBERGER. Is the division on agreeing to the amendment of the Senator from Illinois?

Mr. JOHNSON of Texas. Mr. President, let it be made abundantly clear that the Chair has asked that Senators who favor adoption of the amendment of the Senator from Illinois [Mr. DOUGLAS] stand at this point. All Senators should realize that the vote now being taken is on the question of the adoption of the amendment of the Senator from Illinois.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Illinois. A division has been requested, and the Senate will now proceed to divide.

On a division, the amendment was rejected.

Mr. DOUGLAS. Mr. President, will the Presiding Officer state for the sake of the RECORD the approximate number of Senators who voted for the amendment and the approximate number of Senators who voted against the amendment?

The PRESIDING OFFICER. That is not done, under the practice and rules of the Senate.

The bill is still open to amendment. If there be no other amendment to be proposed, the question is on the third reading of the bill.

Mr. DOUGLAS. Mr. President, my eyes may not be entirely sharp, and I may not have noted accurately; but I counted 10 Senators as voting in favor of adoption of the acreage-limitation amendment, and approximately 20 Senators as voting in opposition to adoption of that amendment. I should like to have that statement a part of the RECORD.

The PRESIDING OFFICER. The Chair has already announced the result of the division on the question of agreeing to the amendment.

If there be no other amendment to be proposed, the question is on the third reading of the bill.

The bill (H. R. 2146) was ordered to a third reading, read the third time, and passed.

Mr. DOUGLAS. Mr. President, although my eyes may not be the sharpest, yet I wish to state that it seemed to me that the following Members of the Senate voted in favor of adoption of the acreage-limitation amendment: Namely, the senior Senator from Oregon [Mr. MORSE], the junior Senator from Oregon [Mr. NEUBERGER], the senior Senator from Tennessee [Mr. KEFAUVER], the junior Senator from Tennessee [Mr. GORE], the junior Senator from Rhode Island [Mr. PASTORE], the senior Senator from Maine [Mrs. SMITH], the senior Senator from Vermont [Mr. AIKEN], the junior Senator from Pennsylvania [Mr. CLARK], the junior Senator from Minnesota [Mr. HUMPHREY], and the senior Senator from Illinois [Mr. DOUGLAS].

LEGISLATIVE PROGRAM

Mr. JOHNSON of Texas. Mr. President, I should like to announce, for the information of the Senate, that on Tuesday, at 2:30 p. m., the Senate expects to receive Chancellor Konrad Adenauer, who will address the Senate. I should like to have all Senators informed of that fact.

From today, the Senate will adjourn until Monday. Under our present plan, the Senate will not meet on Thursday of next week, inasmuch as it is Memorial

Day, and customarily the Senate does not meet on that day.

We plan to have the Senate hold a session on Friday of next week, but Senators may expect that on that day there will be no quorum calls, and no business will be transacted, other than the making of insertions in the RECORD, if the wishes of the leadership are followed. The purpose of having the Senate meet on Friday is to permit the Senate to take a recess or adjourn from that day to the following Monday.

In the case of the following week, I cannot give assurances that certain days will be reserved for committee work by Senators, and to permit them to handle their office work. Probably it will be necessary to return to the schedule of meeting daily, if the Senate then has a calendar which will occupy the attention of Senators. I should like to have all Senators put on notice of that fact.

ENROLLED BILLS PRESENTED

The Secretary of the Senate reported that on today, May 23, 1957, he presented to the President of the United States the following enrolled bills:

S. 51. An act for the relief of Mary Barme and her two minor children Steran Barme and Dinah Barme;

S. 94. An act for the relief of Lee Chong Taik;

S. 124. An act for the relief of Josephine Suydam;

S. 162. An act for the relief of Jew Gim Gee;

S. 184. An act for the relief of Mary C. Frederick;

S. 271. An act for the relief of Johannes Sukevainen;

S. 754. An act for the relief of John (Ioannis) Legatos;

S. 799. An act for the relief of Eldur Eha; and

S. 1463. An act to amend the Medals of Honor Act to authorize awards for acts of heroism involving any motor vehicle.

THE HOUSING ACT OF 1957

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 374, House bill 6659, the so-called housing bill.

The motion was agreed to; and the Senate proceeded to consider the bill (H. R. 6659) to extend and amend laws relating to the provision and improvement of housing, to improve the availability of mortgage credit, and for other purposes, which has been reported from the Committee on Banking and Currency with an amendment.

Mr. JOHNSON of Texas. Mr. President, we do not plan to have the Senate debate the bill this evening. I hope I shall be able to get in touch with the distinguished Senator who will be in charge of the bill, and that the Senate will proceed to its consideration and discussion on Monday and on such other days next week as may be necessary. I have been attempting all day to reach him by telephone, but have been unable to do so. Accordingly, it may be that we shall have to change our plans in that respect.

SECOND ANNUAL STAFF CONFERENCE OF COMMUNITY SERVICES, AFL–CIO

Mr. MORSE. Mr. President, my attention has been called to a very interesting article written by Sidney Zagri, director of community relations for the teamsters union. The article was published in the St. Louis Labor Tribune of May 9, 1957. Mr. Zagri writes a column for that labor newspaper, and he is a very able columnist. I am pleased to ask unanimous consent to have the article printed in the body of the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

YOUR COMMUNITY AND MINE

(By Sidney Zagri)

ATLANTIC CITY, N. J.—The second annual staff conference of community services, AFL–CIO, here at the oceanfront in Atlantic City has not only the stimulus of the ocean breeze, but the fresh approach of its able director, Leo Perlis. In his keynote address, he debunked the "arrogance of humility" and the "arrogance of ignorance"—the dual barriers to responsible leadership by labor in the new complex field of community responsibility. He also leveled both barrels at the trend toward conformity, respectability, and "policy by headlines"—and called on labor leadership to vigorously meet the challenge of basic community issues in the spirit of nonconformity. He made the plea not only for effective work within community organizations but for a total approach in terms of the reorganization of the community.

This vigorous, creative approach presents a striking contrast to the labor leadership in some circles striving for respectability and conformity. Too many of our labor leaders are making decisions conforming to the editorial policy of their favorite newspapers. It was said of a prominent international union president recently that his union policies are largely determined by the reaction of the New York Times. He has become a victim of his own press relations. This type of thinking is partially responsible for the witch hunt going on within labor at a time when it is needed most—when all of labor is under attack. It accounts for opportunistic tinkering with constitutional liberties by placing punitive consequences on the use of the fifth amendment by any union official.

Here at the community services conferences, we find in Leo Perlis one labor official not to be stampeded by a jingoistic press, by a conformist trend within labor, or by the opportunistic incitement of those who would have him join the wolfpack. Instead, he has kept his eye on the ball, on the principal tasks confronting labor at the community level.

He has instilled in his staff an awareness of the power structure and before he approaches a community-organization job that power structure is carefully analyzed and understood. He frankly admits that it is not labor who calls the shots in community services even in cities where labor is strong. He asked the question "Who calls the shots in Pittsburgh—the steelworkers, in Detroit—the autoworkers, in Seattle—the teamsters? In these three, as well as in all American cities, the shots are called by the bankers and industrialists." Thus, we are faced with the problem of conforming to what is and accepting this domination as inevitable, or of responding to the challenge of organizing the community in terms of achieving first-class citizenship for labor in the councils of the communities of this country.

How we effect changes in the power relations within a community calls for deep understanding of our community structure and the role of labor in this structure. The organization of labor at the community level, therefore, is a more difficult job than organizing the unorganized in the shops. It calls for more ingenuity, more trained staff, and more of the instruments of education and propaganda to counteract the communitywide influences of the mass media largely in the control of banker-industrialists of the community.

It is this difficult job that community services is undertaking with varying degrees of success in over 60 cities of this country. In this pioneering effort, the AFL–CIO has not provided Perlis with labor-paid personnel at the community level.

This is the great weakness of the program. The labor staff representatives are paid by the community fund organization. "He who pays the piper calls the tune," is an old cliché but still quite true. In so far as a conflict of interest exists—and as Perlis points out the industrialist calls the shots—the staff representative of labor is forced to "walk on eggshells" and to "dance between the raindrops." His prime area of effectiveness under this arrangement is limited and circumscribed by the area of agreement, or to put it another way, the program that is acceptable to the industrialist who calls the shots. Within these limitations, the community services program has effectively established labor as a factor in the health and welfare programs of a community. It has also been able to develop rank and file leadership in these areas.

The important question for the future is this: Can the broad social action program envisioned by Perlis become a reality within the framework of the present community fund structure, or will it become necessary for labor to finance its own staff at the community level to achieve results in the spirit of nonconformity and controversy as the first prerequisite in achieving first-class citizenship for labor?

WITHDRAWAL OF OREGON FROM THE PACIFIC NORTHWEST GOVERNOR'S POWER POLICY COMMITTEE

Mr. MORSE. Mr. President, Gov. Robert D. Holmes, of the State of Oregon, announced recently the reasons why the State of Oregon is withdrawing from the Pacific Northwest Governors' Power Policy Committee. I ask unanimous consent that a statement released by the very able Governor of my State be printed at this point in the RECORD, as a part of my remarks. I wish to commend our Governor for his courage and statesmanship in withdrawing from the Pacific Northwest Governors' Power Policy Committee, because, as he points out very clearly in the statement, there was good reason for the withdrawal. Of course, I would add that the domination of the policies of the committee by the private utilities is all the reason I would need, anyway.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

Gov. Robert D. Holmes said Wednesday he was chopping off a program through which Oregon's two previous Republican Governors had contributed nearly $8,000 of State funds for promotion of so-called partnership power development.

The action also removes Oregon from the Pacific Northwest Governors' Power Policy Committee which Governor Holmes described as an arm of the private power lobby.

Governor Holmes said the records show that unapproved reports of the committee's technical engineers had been used recently to support Idaho Power Co.'s position in the Hells Canyon dispute before Congress and the Federal Power Commission.

"Besides that," the Governor said, "the committee has made no contribution to industry or development of the State of Oregon."

Records show that the late Gov. Paul L. Patterson, under whose administration Oregon became involved in the policy committee, and former Gov. Elmo Smith had authorized payments from the executive department funds to Portland General Electric Co. totaling $7,577.63, Governor Holmes said.

Governor Holmes said the case had been under investigation since he took office January 14, and that during that time he felt a moral obligation to authorize continuation of monthly payments though no contract had ever existed.

Oregon's share, bigger by almost twice than any other contributor's, went into a fund for expenses of Ebasco Services, a private firm which actually makes the studies for the committee. Governor Holmes described the Ebasco organization also as an arm of the private power lobby.

"Except for propaganda for partnership power," Governor Holmes said, "we could have gotten the same information supplied by Ebasco Services from the advance program of Bonneville Power Administration for nothing."

Compilations of billings for 1956 alone showed members contributed over $20,000 of which the major 15-percent share was paid by Oregon taxpayers, Governor Holmes said. "This is a case of State funds being contributed to further a cause in direct contradiction to what the taxpayers clearly demonstrated by their vote."

Records also show that 2 reports, 1 of them never approved by the committee, have been used by the Pacific Northwest Power Co. in Federal Power Commission hearings and before the Senate Interior and Insular Affairs Committee to support arguments for Idaho Power Co.'s opposition to a high Federal dam in Hells Canyon.

This has in effect misleadingly lent the weight of Northwest governors to the partnership program, though the last meeting of the policy committee was held in October 1955, over a year and a half ago, Governor Holmes said.

Governor Holmes said correspondence indicated Governor Patterson took on the 15-percent share for the State with the intention of collecting portions of it from Oregon's public power groups and PUD's. But all the public utility districts except one naturally declined to contribute on the basis that the program held no possible benefit.

TRIBUTE TO JOSEPH P. ADAMS, FORMER MEMBER OF THE CIVIL AERONAUTICS BOARD

Mr. MORSE. Mr. President, I had planned to make a speech today in paying my respects to Joseph P. Adams, a former member of the Civil Aeronautics Board, whom President Eisenhower did not reappoint. I think Mr. Adams made a fine record of public service on the Civil Aeronautics Board; and I should like to have the privilege of paying my compliments to him. Therefore, I ask unanimous consent that my speech be printed at this point in the body of the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

The public interest suffered another blow when President Eisenhower let the term of CAB member, Joseph P. Adams, expire without reappointment. According to the press, this was a victory for Secretary of Commerce, Sinclair Weeks, who is said to have influenced the President against Colonel Adams. Be that as it may, it is unquestionably a break for the monopolistic airline interests that have come to regard the CAB as their special protector. Joseph Adams never countenanced such a narrow view of the agency on which he served nearly 6 years.

For 6 years Joseph P. Adams was the "great dissenter" on the CAB—a conscientious protestant against CAB decisions that invariably kept the skies closed to the vigor of new competition and consistently overlooked the interests of the traveling public.

For too long the CAB has regarded its primary functions as twofold: (1) To preserve and protect the dwindling number of certificated "grandfather" passenger carriers, and to see to it that there is no intruder into the charmed circle; and (2) to act as referee and traffic manager for those 12 companies, whose enthusiastic appetite for a bigger slice of an ever-bigger pie sometimes requires a little fatherly arbitration.

In his understanding of the Board's duties and responsibilities, member Adams differed sharply with the majority. Very simply, Joseph Adams had read and digested the Civil Aeronautics Act and its legislative history, and he knew that "regulation" was only part of the CAB's duties. He knew there was a promotional obligation also. He expressed his feelings this way in one of his dissents:

"I disagree with the majority in their decision to ignore this vacuum in our present air transportation system. [He was speaking of the need for low-fare air coach service.] I believe that it is the duty and responsibility of this Board to direct a national air transportation policy and not to confine our efforts to the day to day approval or disapproval of matters brought to our attention."

Again, Adams said on another occasion when he was in the minority:

"I believe that a proper fulfillment of the objectives laid down for us by the Congress in section 2 of our act requires that we promote, develop and encourage air transportation as well as controlling it and regulating it—but in exercising any of these powers we must have the public interest uppermost in our minds."

The CAB's view of competition is a dim one. It has always clung to the position that instead of introducing new competition to provide better service, it should assume that the certificated carriers will meet all demands. Adams repeatedly attacked this position. In the Transcontinental Coach-Type Service case, the CAB turned thumbs down on the nonskeds on the ground that he certificated lines were capable of carrying the burgeoning air coach traffic by expanding their services. Protesting this view, Adams wrote:

"It seems to me that the question of 'capability' is completely beside the point. A much more important query, I believe, is, Will the certificated carriers do so, or even, on the basis of the entire record here, have they done so in the past and are they doing so now? This 'theory of capability' inevitably forces its pfoponent to the philosophy of 'preservation of the status quo'; a philosophy which at best is a strange one for the Board to adopt in the regulation and promotion of an industry as dynamic as the airline industry."

Joseph Adams brought to the Civil Aeronautics Board a practical aviation background and a consummate regard for the public interest. He was a Marine Corps flyer during the war. Following this experience he served as State director of aeronautics for the State of Washington, and was responsible for putting through a model State aviation act. His 6-year term on the CAB, which expired December 31, 1956, was notable for the fact that he was nobody's man but the people's. Such a man has become a rarity in the recent history of Federal regulatory commissions created by Congress.

As might be expected from an official who serves no interest but the public's, Joseph Adams introduced common sense into the opinions and orders of the agency he served. It is regrettable that this common sense had to find expression in dissenting opinions all too frequently.

More and more the CAB has become the shield of a growing monopoly in air transportation. It has taken the position that any type of nonsubsidized initiative in aviation constitutes a diversion of traffic from the major airlines. This argument of diversion is made even in such cases as air coach, where the independents clearly created their own market. It is made even in the face of air transport's amazing growth—a growth of close to $100 million a year. Repeatedly the Board arrives at its decisions by reasoning from the narrow premise that any certificated airline's desires must, in the long run, prove beneficial to the general public and to the industry as a whole. It has been the habitual position of the CAB that the public interest is synonymous with the betterment of the lot of the certificated airlines. In other words, what benefits the 12 major carriers—it used to be 16—is therefore good for the public. As all of us know, this is not necessarily so.

Over 5 years ago Joseph Adams was attempting to prod the major airlines into low-cost air coach service as a means toward the goal of mass air transportation. At that time the irregular airlines had entered their fifth year of coach-type operations. In the year 1950 alone they had carried close to half a million passengers. In a famous dissent, Adams pointed out that to the extent of those half-million passengers the certificated airlines had failed to fulfill the requirements of the traveling public for low-priced airline service. To that extent they had not met their obligations under the Civil Aeronautics Act.

Adams pointed out that it was CAB's duty to see to it that service was provided. He strongly dissented from the Board's refusal to grant exemptions to one or more irregular carriers to provide transcontinental coach service under CAB control. At the time he wrote his opinion the great San Francisco-Oakland Bay area of California was completely without transcontinental certificated air-coach service after 5 years of aid-coach operation by the irregulars. Of the three largest transcontinental certificated airlines, two were offering a total of only two daily round trip coach flights and the third carrier offering none. As Adams pointed out with justifiable irony: "Under the majority decision in this case * * * these are the operators who are to develop and promote low-fare air coach and mass transportation travel across this country."

It was only with the greatest reluctance that the certificated airlines entered the field of air coach after fighting it for years. But air coach proved to be such a travel-stimulator that it now accounts for over 40 percent of all air travel, and the revenues have helped to get the major airlines off Federal subsidy. And Joseph Adams, the farsighted "father of aircoach," now gets his reward in the form of unceremonious dumping from the Civil Aeronautics Board.

For the first time in its 18-year history, the Civil Aeronautics Board is today conducting a general passenger fare investigation. That such an investigation is long overdue seems hardly necessary to say. As a matter of significant fact, such an investigation was started in 1952, but called off abruptly a year later. This reversal brought sharp dissent from Adams and fellow member Josh Lee, a former member of the Senate.

Incidentally, it has been brought out in testimony before the Subcommittee on An-

ti-Trust and Monopoly of the House Judiciary Committee just how the 1953 fare investigation happened to be called off. The vote was 3-2. The controlling vote was cast by member Harmar Denny—still a member of the CAB—who had voted for the investigation when it was initiated in 1952. Testimony showed that Mr. Denny's vote switch followed a visit from Mr. Stuart Tipton, at that time a lobbyist for, and now president of, the Air Transportation Association, the trade association of the certificated airlines.

One item which had originally prompted the investigation was the $1-per-ticket fare increase which the Board had granted the airlines in 1952. This increase, incidentally, was vehemently opposed by Adams. It has cost the air traveler close to $100 million in the last 4½ years.

In his 1953 dissent against calling off the fare investigation which has only recently been reinstituted under pressure from the Anti-Trust Subcommittee, Adams made this eminently sensible comment:

"For 14 years, although many thousands of individual fare changes have been filed by our air carriers, and although at various times basic methods of constructing air fares by them have been drastically altered, this Board has never investigated the overall fare structure of the air transportation industry to determin whether the charges made for passenger services by the air carriers are in fact reasonable. The effect of the majority decision here is to perpetuate this obvious vacuum in the work of the Civil Aeronautics Board and I refuse to be a party to such continued neglect of our statutory duty."

Many of us are familiar with the exorbitant rates charged by the international airlines in their worldwide flights. It will interest Members of the Senate to know that these fares are uniform among the airlines and are set by a global, cartel-like organization known as the International Air Transportation Association. These fare schedules are then presented as a fait accompli to the various national regulatory bodies and approval is generally a formality. In 1953 a number of these fare agreements—involving our own international airlines as well as those of foreign countries—were filed with CAB for approval. Despite pious expressions of concern by the CAB majority over transatlantic fare increases the new schedules were approved.

Joseph Adams, however, dissented—in 34 well-chosen words:

"In light of the increase in fares across the North Atlantic which appears to me to be completely unjustified, I dissent from the majority's approval of the resolutions adopted at the IATA Traffic Conferences."

Another Adams dissent, this one dated December 17, 1954, protested a trunkline's acquisition of a local service carrier and pointed out its possible significance. The merger had been approved by the Board majority. But Joe Adams, the public's servant on the CAB, had this to say:

"Adoption of the majority opinion here will inevitably lead to numerous future cases where other trunklines will attempt (and perhaps successfully) to change the characteristics of their route systems—not in the proper new route case forums, but through the simple expedient of buying out other local air service carriers. I cannot subscribe to any such program of chaos."

Perhaps Joseph Adams' most famous dissent was delivered in an enforcement action against North American Airlines, a group of irregular airlines whose management pioneered air coach service back in 1946. This enforcement action, which consisted of outright revocation of the carriers' operating authority, is now in the courts. In his dissent Adams pointed to the great contributions of the revoked airline both in terms of price and service, and declared:

"I view the present • • • enforcement case as simply another in a series of matters which can and should be decided in the best interests of our traveling public if we, as a matter of policy, wish to stress our promotional and developmental obligations; or which can be decided otherwise if we are overly concerned with exercising our regulatory powers. The majority, I believe, has adopted the latter course and certainly from the standpoint of the traveling public, either servicewise or pricewise, this decision is an unfortunate one."

It is true that the circuit court of appeals has affirmed the CAB order in this case. But the court simply upheld CAB's authority to act as it did, and declined to look into the serious economic and public interest issues raised in Adams' dissent. I understand an appeal will be taken to the Supreme Court.

On November 28, 1951, Adams showed his keen appreciation of justice and of legal proprieties when he dissented in an opinion covering a complex labor problem. Here, as a result of the merger of two airlines, conditions had to be imposed for the integration of seniority of the employees of the two lines. Adams protested the action of the Board compromising the strict length-of-service tests as the yardstick for seniority. He wrote:

"This method, in my opinion, is a dangerous precedent and will destroy any validity or interpretation presently associated with the phraseology length of service as used in labor contracts."

Another notable Adams dissent protested the abandonment of Philadelphia as an international airport.

No better example exists of the CAB's desire to court the favor of the certified airlines than the decision to abandon Philadelphia. Pan American and Trans World Airlines provided international service to Philadelphia, the third or fourth largest city in the United States. These carriers, knowing full well that Philadelphians traveling internationally would journey anyhow whether airplanes came to their airport or not, sought permission to abandon the international flights to that city. The Board granted them permission to suspend transatlantic service to Philadelphia in one of the feeblest justifications ever to come out of an agency which distributed over half a billion dollars in subsidies in 6 years. The Board pleaded that the cost to the Government, in the form of mail pay, was not warranted by the service. The cost to the Government would amount to $37,500 per year. To provide a metropolitan area of 4 million with international air service at the expenditure of such a sum, according to Member Adams, "appears not only reasonable but highly proper."

As a result of its restrictive practices the CAB has over the years become tethered to its own mistakes. Today it regards competition as an attack not on the certificated carriers, but on itself. Aviation has become a blue sky club, and the CAB is little more than the doorman who sees to it that nonmembers do not crash the exclusive preserves which are reserved for the charter members. And in the case of air transportation the only charter members are those of the class of 1938.

Joseph Adams, practically alone among the members of the CAB, seemed to realize that the Board had wantonly thrown away its finest and most effective regulatory instrument—the instrument of competition. The Board knows only the check reign. It never uses the spur. It keeps aviation at a walk, retarding, hobbling, stifling, holding back every attempt to broaden and expand aviation by the simple introduction of free competitive enterprise into this hothouse industry.

Joseph Adams' dissents as a member of the Civil Aeronautics Board stand as an airways beacon—pointing the way to much-needed competition in an essentially monopolistic industry. They stand also as a challenge to a Federal agency charged with regulations and development of air transportation in the public interest but which too often acts on behalf of narrow private interests.

The only crime of Joseph Adams—Marine pilot, CAB member, public servant—was his consistently-expressed belief that the air traveler deserved a better break than he was getting. For this heresy he has been cast down, and his public career has been sacrificed to the greed of entrenched interests which Congress has allowed the Civil Aeronautics Board to protect and defend.

The Committee on Interstate and Foreign Commerce, headed by the distinguished senior Senator from the State of Washington, has jurisdiction over the Civil Aeronautics Board. I fervently hope it will look very closely at the policies and practices of the CAB to determine how far it has strayed from carrying out the Congressional intent as expressed in the Civil Aeronautics Act of 1938. I should like to see it conduct a thoroughgoing examination of the CAB's historical refusal to admit new competition into the trunkline passenger field. It can begin such an examination when it receives from the White House the nomination of Joseph Adams' successor.

I earnestly hope the result will be an expression of congressional insistence that the things for which Joseph Adams stood—new competition and the encouragement of mass air transportation in the interests of the traveling public—were the things we had affirmatively in mind when we gave civil aviation its charter nearly 19 years ago.

SOME PRACTICES OF THE IDAHO POWER CO.

Mr. MORSE. Mr. President, I have before me an article by Ed Emerine, of the Boise Journal, dealing with some of the practices of the Idaho Power Co. I would not want anyone to think that my criticisms of the Idaho Power Co. are foreign to any point of view within the State of Idaho. Therefore, I ask unanimous consent to have printed at this point in the body of the RECORD, as a part of my remarks, the article in which Mr. Emerine brings out some very interesting things about the Idaho Power Co., and gives further proof in justification of the position the senior Senator from Oregon has taken in criticism of the policies of that company.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

COMMENTS BY THE EDITOR

(By Ed Emerine)

It's your money Idaho Power will use. When T. E. Roach, president of Idaho Power Co., talks about "cash generation" and uses other confusing language to assure us poor suckers that "Idaho Power will pay back every cent of the taxes it owes," he makes sure that he doesn't get specific and spell it out in dollars and cents.

The ODM has just offered Idaho Power Co. a cash subsidy that will have to come out of your pocket—there's no other way to figure it. Using a defense certificate, IPCO will amortize its investment rapidly. The company will intercept the tax money which the consumer has paid. Instead of your tax money going into the Federal Treasury, it becomes "cash generation" for IPCO to be used as part of the financing of the low dams. As soon as actual power generation starts, your money will begin to earn a profit for the power company.

Then, to make up the deficit for not having received the tax money you have paid Idaho Power Co., the Federal Government—your Uncle Sam—will either raise taxes on you and everybody else, or borrow the money at interest, and the taxpayer—you, gentle reader—will pay again so that Idaho Power Co. can have an interest-free loan—of your money.

Mr. Roach brands all this as "distortion of fact and wholly misleading." He denies this slick deal will save Idaho Power Co. any money or relieve it of paying Federal taxes. There is, however, no assurance or guaranty that Idaho Power Co. will ever pay those back taxes. The deferral certificate is not a contract or note. It is an outright deduction and current tax forgiveness. How could any tax collector go through the power company's books 5 or 10 years from now and spot those forgiven millions of dollars? And you must remember that those millions were taken out of your pocketbook and bank account. And even if Idaho Power Co. wanted to pay those back taxes, all it could do would be to add them to your light and power bill so that you would pay the second time, while the rich and fat stockholders back East sit and clip coupons on IPCO stock. (You are also paying those coupon clippers, for an additional 6 percent or more is added to your light bill for that very purpose.)

Idaho Power Co. has been enjoying these writeoffs for years. It's time the whole mess was brought out into the light so the people can see what's happening.

Labor leader or Idaho Power, both are immoral. Senator WAYNE MORSE, of Oregon, pointed out in the United States Senate the other day that when a labor-union leader takes $200,000 or $400,000 "or X amount of dollars" for an interest-free loan to himself, he commits an act of immorality. And perhaps it is illegal, and the Internal Revenue boys will pour on the heat. But when the Eisenhower administration gives Idaho Power Co. an interest-free loan—not of thousands but of millions of dollars—it is perfectly legal, and Internal Revenue will do nothing about it.

Certainly the Office of Defense Mobilization had the right, under the law, to make this gift to Idaho Power Co.—at the taxpayers' expense. But, as Senator MORSE pointed out, it is an act of immorality.

The administration is putting its hands into the taxpayers' pockets to give this benefit of millions of dollars to Idaho Power Co. We agree with Senator MORSE when he says it is rotten. And perhaps there is no better word for it.

Just figure out what you will lose. Whether you live in Idaho, or Oregon, or Wyoming, or Alabama, or Kansas, the Hells Canyon bill in the House and Senate are important to you. If they do not pass, here are a few things the people of the United States—not just in Idaho and Oregon—will lose:

First of all, a great dam site—the greatest remaining dam site in the United States—one that should be developed for the good of all the people in the Nation.

Annually, you will lose 400,000 kilowatts of power. (You will get along with less electricity and pay more for it.) Lost also will be 3 million acre-feet of flood control and storage. Even the Eisenhower administration admits that, and is trying to find other sites to build other dams to make up for lost storage in case Idaho Power Co.'s small dams at Brownlee and Oxbow are built. Lost will be the recreational value of a big lake and more shoreline.

Getting right down to dollars and cents, here is another factor: If a high Hells Canyon Dam is built, it will provide electric energy at a lower cost than IPCO's small dams. In 50 years, the Hells Canyon project will pay back every cent put in it, and will not cost the taxpayers a dime. At the end of 50 years, the people will own it.

If Idaho Power Co. goes on with its deal, you will pay higher rates for 50 years—and at the end of a half-century of your paying and paying, you won't own a nut, bolt, wire, switch, or a piece of rock on Brownlee Dam. It will still belong to Idaho Power Co.

You have a vote on this project. You can be counted on one side or the other. You should vote on it. You can do it right now. Get a piece of paper and write your sentiments and your thoughts. Write to Senator HENRY DWORSHAK and Senator FRANK CHURCH. Address them "Senate Office Building, Washington, D. C." Write Representative HAMER BUDGE and Representative GRACIE PFOST. Address them "House Office Building, Washington, D. C." And write President Dwight D. Eisenhower, himself, the White House, Washington, D. C. Do this at once, for the Congress will vote on Hells Canyon during May.

Write a letter—write 5 or 6 of them. Or send postal cards. But do your duty now, so that generations to come will not be short-changed, too.

BUSINESS DEDUCTIONS BY UTILITY COMPANIES

Mr. MORSE. Mr. President, my attention has been called to an article that appeared in Sage, a newspaper published in Cactus, Ariz., on February 21. The author, Mrs. Lillian Stough, a sister of Mr. John Gilliland, president of the District of Columbia Congress of Parents and Teachers, and a former student of mine at the University of Minnesota, has some pointed remarks to make concerning the manner in which the huge private utility companies, through the use of educational advertisements, attempt to deceive the American people about the cost and the benefits received from full utilization of our great river basins, such as the Tennessee, the Missouri, and the Columbia.

At a time when economy is the watchword, perhaps my colleagues on the Finance Committee, in their never-ending search for additional revenues, might like to take a long look at this legitimate business deduction of the utility companies to see if here is a loophole that might, in the public interest, be sealed off.

To be frank about it, at the present time the public is paying the cost of these advertisements in large measure. The advertising, given the monopoly status of the private utility, can serve only the purpose of influencing a political decision.

I have no quarrel with the private power companies attempting to propagandize their point of view; I only question whether the public Treasury ought to bear the cost. By excluding such advertising from tax exemption in large part, these companies could then continue their program, but at a cost to their own dividend receivers, rather than, as at present, to the taxpayer.

Because of the provocative nature of the article, Mr. President, I ask unanimous consent that it be printed in the RECORD at the conclusion of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

EDITOR'S CORNER

(By Lillian Stough)

A crazy mixed-up argument is being handed out these days by the advertising brains of those so-called business-managed light and power companies. The line is being put out via full page ads in just about every national magazine that this writer has opened up lately.

"Are you aware of this strange use of your tax money?" the ad asks, and it makes the claim that your taxes are being used to help pay the electric bills for the people of Tennessee, who (and the ad doesn't mention this part of it) pay lower bills because of TVA.

Actually, the value to the entire Nation (including you) of such national defense essentials as TVA is incalculable. And actually they do pay their own way over a period of years.

But this is not exactly the point here.

Now, dear patrons of the local "business managed" light and power company, are you aware of this strange use of your money—that you used to pay your "business-managed"—and doubtlessly plenty high—electric bill? Who else is paying for these full page ads? Not the people of Tennessee, for sure. And your Government does not get any benefit out of it either, because advertising is a "legitimate" expense; it's deductible. If the private power companies pay a big tax, it's for one reason, and only one: their profits are big. And they are spending millions of your money to keep it that way. Every successful publicly owned power project is a threat, for the simple reason that through them the people learn that there might be a better way and a less costly one, to provide light and power than through franchised private monopolies. Of course, this is dangerous talk. People who engage in it get called names. And they very likely will not receive any of those nice juicy ads from the huge private combine of "business-managed light and power companies."

RADIATION HAZARDS

Mr. MORSE. Mr. President, I ask unanimous consent to have printed in the body of the RECORD a speech I made recently on the subject Radiation Hazards. In the speech I called for a cessation of the testing of hydrogen bombs, which in my judgment are jeopardizing the health of a great many people on this globe, to the detriment of the prestige of the United States.

Mr. President, at a later date I shall discuss this subject at greater length; but I should like to have this speech printed at this point in the RECORD, as a part of my remarks; and I wish to have printed along with my speech a letter I have received from Mr. Martin R. Haase, of Annapolis, Md.; and a Declaration of Conscience, by Albert Schweitzer, on the same subject, because I think the great religious leader and great humanitarian, Albert Schweitzer, is issuing a challenge to Christians around the world to put into practice, in connection with the testing of hydrogen bombs, what I consider to be great moral teachings.

There being no objection, the speech, letter, and article were ordered to be printed in the RECORD, as follows:

RADIATION HAZARDS

(Address by Senator MORSE over Oregon radio stations on May 4–May 10, 1957)

Fellow Oregonians, last fall perhaps the most far-reaching and profound issues that developed between the two presidential candidates and, to a large extent, between the Democratic and Republican Parties, was the question of continuing to explode nuclear weapons.

In a statesmanlike and humanitarian pronouncement, Adlai Stevenson called upon the American Government last year to take the initiative in ending nuclear explosions so that mankind might be spared the dreadful effects of radioactivity released by nuclear explosions.

I joined in making that appeal because I fear the consequences of pursuing a policy in the name of national security whose results can be just as terrifying as the threat we think we are guarding against; for the effects of increased radioactive elements in the atmosphere and eventually in our water and food are insidious. Make no mistake about it. They are real threats to our health.

Radiation diseases are primarily diseases of the blood whose effect upon the individual is slow but very deadly. More devastating is the effect of radiation upon future generations. Reproductive cells are particularly vulnerable to radiation, even when the individual's health is not otherwise impaired. We know enough about genetics to know that damage to these cells can be and often is, revealed in succeeding generations.

Because the administration opposed any change in the American policy of testing our hydrogen bombs periodically, no action was taken to end the tests. Subsequently, the Russians have held their own tests of nuclear bombs in Siberia, the traces of which are easily detected in Japan and even in the United States.

Following the most recent Russian tests, the Japanese radio has been warning the public that the atmosphere was rapidly becoming contaminated from Soviet tests, and advising housewives to boil drinking water and wash all fresh fruits and vegetables.

Two very important voices have been raised this last month that have pointed up the seriousness of radioactive fallout from nuclear-bomb tests. The first was that of Dr. Matsushita, a personal representative of the Japanese Prime Minister, whose mission has been to urge a halt in these tests in conferences with Government officials. He is speaking on behalf of the Japanese people, who are experiencing the aftereffects of the only two atomic bombs dropped on inhabited areas as well as the effects of experimental explosions.

Dr. Matsushita said: "If the United States continues the tests, it would lose its moral influence in Asia."

Another great world leader has spoken. Pope Pius has voiced his great sympathy for what Dr. Matsushita is trying to accomplish. As he did at Christmas of 1955 and in his Easter message this year, the Pope warned mankind against the destructive power of nuclear weapons. "In the case of natural disaster," the Pope told the Japanese envoy, "one cannot but bow before what happens at the command of the Almighty. But if catastrophe were to occur by man's perverse will for domination—with all the reprisals implied in it—how could such action not be condemned by every righteous soul?"

Another strong protest against any more nuclear tests came recently from the great religious leader, humanitarian, and winner of the Nobel peace prize, Dr. Albert Schweitzer. In an appeal broadcast to 50 nations of the world, Dr. Schweitzer described some of the serious effects of radioactive particles upon human health and on future generations. "It must be remembered," he said, "that even the weakest of internal radiation can have harmful effects on our descendants."

"From official and unofficial sources we have been assured time and time again," said Dr. Schweitzer, "that the increase in radioactivity of the air does not exceed the amount which the human body can tolerate without any harmful effects. This is just evading the problem. Even if not directly affected by the radioactive material in the air, we are indirectly affected through that which has fallen down, is falling down, and will fall down.

"None of the radioactivity of the air, brought into existence by the exploding of atom bombs," says Dr. Schweitzer, "is so unimportant that it may not, in the long run, become a danger to us through increasing the amount of radioactivity stored in our bodies."

The administration, speaking through our Secretary of State, Mr. Dulles, has rejected the pleas that we stop our own testing of nuclear weapons and challenge the Soviet Union to do the same. Mr. Dulles says the ending of nuclear tests now is—and I quote him—"impractical." He takes the view, and he so states in his most recent press conference, that present testing does not appear to have any appreciable effect upon the health situation, and until scientific evidence becomes more conclusive on the point, this Government will continue its experiments as needed, or until international control of these weapons is assured.

I say to the Secretary of State that such a narrow view of the national safety is not enough. The introduction of uranium and hydrogen explosives into warfare demands a new vision and foresight on the part of our national leadership. What will we have saved, if, by proving that we can match the Soviet Union in nuclear weapons, we and the Russians set loose radioactivity that increases the incidence of cancerous bone and blood diseases and produces mutation in human reproduction that alters the human race?

It is quite true that the present scientific evidence is not conclusive as to the effects of the radioactivity released by the present rate of bomb testing. This is primarily because the evidence will not be in, for final evaluation, until tens and hundreds of years from now, when present life spans have had time to show the effects of increased radiation and when future generations have been born.

One of the most authoritative scientific voices raised in support of suspension of tests has been that of Doctor William Neuman, a professor of biochemistry who heads a research project in this field for the Atomic Energy Commission. Doctor Neuman has said that it will take at least 10 years to discover how much cancer and leukemia will be caused by the deadly radioactive strontium which has been released by nuclear explosions. Pointing out that there is presently no treatment at all for the kind of bone cancer induced by radioactive strontium, Doctor Neuman has warned that a point of no return may be reached by heedless dumping of this element in the atmosphere.

Another warning has come from a Nobel prize-winning geneticist, Doctor H. J. Muller of the University of Indiana. He takes issue with a report by the Atomic Energy Commission which minimized the effects of radiation on unborn generations. Doctor Muller has asserted that "attempts in high places" to deny the damaging hereditary effects of radiation from atomic tests has weakened public morale and led to defeatist propaganda.

The upshot of these warnings has been a series of resolutions passed by the Federation of American Scientists, calling for an immediate worldwide agreement banning any further bomb tests. On many occasions, outstanding scientists in the fields of physics, genetics, and biochemistry have directed similar appeals, both as groups and as individuals, to the United Nations and to the governments doing the testing, urging that they stop.

They are entirely willing to concede to Secretary Dulles and to Admiral Strauss of the Atomic Energy Commission, who has scoffed at these dangers from the tests, that scientific knowledge of the effect of radiation on human life is incomplete, and that no definite conclusions can yet be reached about where the danger point really lies.

But they are worried about it, and worried enough to raise their voices against a continuation of tests until we do know just where the danger level is.

A few days ago, our spokesman in the disarmament talks taking place in London, Mr. Harold Stassen, stopped off at the Augusta golf course to report to the President on the progress being made toward disarmament. There has been some reason to feel that progress has been made in these talks. Since the danger we are risking now by continuing the tests is very real, and could mean the ruin of future generations, I would call upon the American Government to give a new impetus to disarmament by halting its nuclear test explosions right now, and challenging the Soviets to do the same. Development of our weapons can continue—and I certainly want it to continue—without their being detonated. And such an announcement by us would put the Soviet Union in the position of continuing them alone, in face of worldwide religious and scientific objections and in the face of worldwide public opinion. It could well mean the tests would be stopped entirely, by everyone.

This is not a matter in which the security interest of one generation of Americans can take precedence over all other considerations. When we are warned by such great religious and spiritual leaders as Pope Pius and Doctor Schweitzer that we are tempering with the forms of human beings and threatening all future life, we must stop, look and listen.

That is why I wired every major American radio and television network to urge that the Schweitzer statement be reported in full to the American people. A cessation of bomb tests by this country would be in keeping with the highest American tradition. It could mean the salvation of future generations, and would not, in my judgment, expose the American people to any threat of Soviet superiority of weapons so long as we continue our research and development.

As Schweitzer has said, to fail to consider the importance of increased radioactivity and its consequences would be a folly for which humanity would have to pay a terrible price. The American Nation must do everything within its power to lead humanity away from such a folly.

Fellow Oregonians, I have raised this very vital issue on this broadcast today because it gives you a good example of the type of problem that has to confront me as a member of the Foreign Relations Committee of the Senate. And I ask you the question, What would you do about this problem? Because, you see, here is an issue that demonstrates very clearly what I have said so many times in Oregon when I have urged you to support me only if you want me free to exercise an honest independence of judgment on the facts as I find them. And so, on this issue, as a member of the Foreign Relations Committee, I have before me a whole body of scientific data and information. I have before me the views of many scientists. And the interesting thing is that, uniformly they have urged that we consider the danger of radioactivity.

On the other side we have the military point of view. We have the political view of those that seem to think that we've got to continue to make these tests in order to scare Russia. But the fact is that Russia is making the tests too. And what I think we ought to do is follow where the scientific facts lead. And from the standpoint of the scientific facts in my judgment there is no moral obligation on the part of this administration to continue these tests. In fact, I think the continuation of these tests cannot be justified on the grounds of morality. And I think as a great religious nation we have the duty to follow the scientific facts, and we ought to be exercising world leadership in insisting that all

nations: the United States, Great Britain, France, Russia and all other nations, stop the testing of nuclear bombs in order to give assurance that future generations of boys and girls will not have their health ruined by a shortsighted course of action in our generation by a stubborn insistence that, in the name of military security, we continue to test these weapons and endanger the health of the world.

ANNAPOLIS, MD., *May 7, 1957.*

Senator WAYNE MORSE,
Washington, D. C.

DEAR SENATOR MORSE: You are to be commended for your efforts to get the press and radio to carry Dr. Schweitzer's appeal to stop nuclear weapons tests. I think the menace of radiation damage to the human race is the most important issue today. It transcends all other matters which may seem big at the moment but are insignificant in the long term view.

Perhaps you have already done so, but I think the full text of Dr. Schweitzer's message should be read to the Congress and become part of the CONGRESSIONAL RECORD. I would be happy to contribute $25 to help defray the cost of printing copies so they could be distributed to arouse the public from its apathy.

Respectfully yours,

MARTIN R. HAASE.

[From the Saturday Review of May 18, 1957]

A DECLARATION OF CONSCIENCE

(By Albert Schweitzer)

Since March 1, 1954, hydrogen bombs have been tested by the United States at the Pacific island of Bikini in the Marshall group and by Soviet Russia in Siberia. We know that testing of atomic weapons is something quite different from testing of nonatomic ones. Earlier, when a new type of giant gun had been tested, the matter ended with the detonation. After the explosion of a hydrogen bomb that is not the case. Something remains in the air, namely, an incalculable number of radioactive particles emitting radioactive rays. This was also the case with the uranium bombs dropped on Nagasaki and Hiroshima and those which were subsequently tested. However, because these bombs were of smaller size and less effectiveness compared with the hydrogen bombs, not much attention was given to this fact.

Since radioactive rays of sufficient amount and strength have harmful effects on the human body, it must be considered whether the radiation resulting from the hydrogen explosions that have already taken place represents a danger which would increase with new explosions.

In the course of the 3½ years that have passed since then [the test explosions of the early hydrogen bombs] representatives of the physical and medical sciences have been studying the problem. Observations on the distribution, origin, and nature of radiation have been made. The processes through which the human body is harmfully affected have been analyzed. The material collected, although far from complete, allows us to draw the conclusion that radiation resulting from the explosions which have already taken place represents a danger to the human race—a danger not to be underrated—and that further explosions of atomic bombs will increase this danger to an alarming extent.

This conclusion has repeatedly been expressed, especially during the last few months. However, it has not, strange to say, influenced public opinion to the extent that one might have expected. Individuals and peoples have not been aroused to give to this danger the attention which it unfortunately deserves. It must be demonstrated and made clear to them.

I raise my voice, together with those of others who have lately felt it their duty to act, through speaking and writing, in warning of the danger. My age and the generous understanding so many people have shown of my work permit me to hope that my appeal may contribute to the preparing of the way for the insights so urgently needed.

My thanks go to the radio station in Oslo, the city of the Nobel Peace Prize, for making it possible for that which I feel I have to say to reach far-off places.

What is radioactivity?

Radioactivity consists of rays differing from those of light in being invisible and in being able to pass not only through glass but also through thin metal discs and through layers of cell tissue in the human and animal bodies. Rays of this kind were first discovered in 1895 by the physicist Wilhelm Röentgen of Munich, and were named after him.

In 1896 the French physicist Henry Becquerel demonstrated that rays of this kind occur in nature. They are emitted from uranium, an element known since 1786.

In 1898 Pierre Curie and his wife discovered in the mineral pitchblende, a uranium ore, the strongly radioactive element radium.

The joy caused by the fact that such rays were at the disposal of humanity was at first unmixed. It appeared that they influence the relatively rapidly growing and relatively rapidly decaying cells of malignant tumors and sarcomas. If exposed to these rays repeatedly for a longer period, some of the terrible neoplasms can be destroyed.

After a time it was found, however, that the destruction of cancer cells does not always mean the cure of cancer and also, that the normal cells of the body may be seriously damaged if long exposed to radioactivity.

When Mme. Curie, after having handled uranium ore for 4 years, finally held the first gram of radium in her hand there appeared abrasions in the skin which no treatment could cure. With the years she grew steadily sicker from a disease caused by radioactive rays which damaged her bone marrow and through this her blood. In 1934 death put an end to her suffering.

Even so, for many years we were not aware of the grave risks involved in X-rays to those constantly exposed to them. Through operating X-ray apparatus thousands of doctors and nurses have incurred incurable diseases.

Radioactive rays are material things. Through them the radioactive element constantly and forcefully emits tiny particles of itself. There are three kinds. They are named after the three first letters of the Greek alphabet, alpha, beta, gamma. The gamma rays are the hardest ones and have the strongest effect.

The reason why elements emit radioactive rays is that they are in a continuous state of decaying. The radioactivity is the energy liberated little by little. There are other elements besides uranium and radium which are radioactive. To the radiation from the elements in the earth is added some radiation from space. Fortunately, the air mass 400 kilometers high that surrounds our earth protects us against this radiation. Only a very small fraction of it reaches us.

We are, then, constantly being exposed to radioactive radiation coming from the earth and from space. It is so weak, however, that it does not hurt us. Stronger sources of radiation, as for instance X-ray machines and exposed radium, have, as we know, harmful effects if one is exposed to them for some time.

The radioactive rays are, as I said, invisible. How can we tell that they are there and how strong they are?

Thanks to the German physicist, Hans Geiger, who died in 1945 as a victim to X-rays, we have an instrument which makes that possible. This instrument is called the Geiger counter; it consists of a metal tube containing rarefied air. In it are two metal electrodes between which there is a high potential. Radioactive rays from the outside affect the tube and release a discharge between the two electrodes. The stronger the radiation the quicker the discharges follow one another. A small device connected to the tube makes the discharge audible. The Geiger counter performs a veritable drum-roll when the discharges are strong.

There are two kinds of atom bombs—uranium bombs and hydrogen bombs. The effect of a uranium bomb is due to a process which liberates energy through the fission of uranium. In the hydrogen bomb the liberation of energy is the result of the transformation of hydrogen into helium.

It is interesting to note that this latter process is similar to that which takes place in the center of the sun, supplying it with the self-renewing energy which it emits in the form of light and heat.

In principle, the effect of both bombs is the same. But according to various estimates the effect of one of the latest hydrogen bombs is 2,000 times stronger than the one which was dropped on Hiroshima.

To these two bombs has recently been added the cobalt bomb, a kind of super atom bomb. It is a hydrogen bomb surrounded by a layer of cobalt. The effect of this bomb is estimated to be many times stronger than that of hydrogen bombs that have been made so far.

The explosion of an atom bomb creates an unconceivably large number of exceedingly small particles of radioactive elements which decay like uranium or radium. Some of these particles decay very quickly, others more slowly, and some of them extraordinarily slowly. The strongest of these elements cease to exist only 10 seconds after the detonation of the bomb. But in this short time they may have killed a great number of people in a circumference of several miles.

What remains are the less powerful elements. In our time it is with these we have to contend. It is of the danger arising from the radioactive rays emitted by these elements that we must be aware.

Of these elements some exist for hours, some for weeks, or months, or years, or millions of years, undergoing continuous decay. They float in the higher strata of air as clouds of radioactive dust. The heavy particles fall down first. The lighter ones will stay in the air for a longer time or come down with rain or snow. How long it will take before everything carried up in the air by the explosions which have taken place till now has disappeared no one can say with any certainty. According to some estimates, this will be the case not earlier than 30 or 40 years from now.

When I was a boy I witnessed how dust hurled into the air from the explosion in 1883 of the island Krakatoa in the Sunda group was noticeable for 2 years afterward to such an extent that the sunsets were given extraordinary splendor by it.

What we can state with certainty, however, is that the radioactive clouds will constantly be carried by the winds around the globe and that some of the dust, by its own weight, or by being brought down by rain, snow, mist, and dew, little by little, will fall down on the hard surface of the earth, into the rivers, and into the oceans.

Of what nature are these radioactive elements particles of which were carried up in the air by the explosion of atom bombs and which are now falling down again?

They are strange variants of the usual nonradioactive elements. They have the same chemical properties, but a different atomic weight. Their names are always accompanied by their atomic weights. The same element can occur in several radioactive variants. Besides iodine 131, which lives for 16 days only, we have iodine 129, which lives for 200 million years.

Dangerous elements of this kind are: Phosphorus 32, calcium 45, iodine 131, iron

55, bismuth 210, plutonium 239, cerium 144, strontium 89, caesium 137. If the hydrogen bomb is covered by cobalt, cobalt 60 must be added to the list.

Particularly dangerous are the elements combining long life with a relatively strong efficient radiation. Among them strontium 90 takes the first place. It is present in very large amounts in the radioactive dust. Cobalt 60 must also be mentioned as particularly dangerous.

The radioactivity in the air, increased through these elements, will not harm us from the outside, not being strong enough to penetrate the skin. It is another matter with respiration, through which radioactive elements can enter our bodies. But the danger which has to be stressed above all the others is the one which arises from our drinking radioactive water and our eating radioactive food as a consequence of the increased radioactivity in the air.

Following the explosions of Bikini and Siberia rain falling over Japan has, from time to time, been so radioactive that the water from it cannot be drunk. Not only that: Reports of radioactive rainfall are coming from all parts of the world where analyses have recently been made. In several places the water has proved to be so radioactive that it was unfit for drinking.

Wellwater becomes radioactive to any considerable extent only after longer periods of heavy rainfall.

Wherever radioactive rainwater is found the soil is also radioactive—and in a higher degree. The soil is made radioactive not only by the downpour, but also from radioactive dust falling on it. And with the soil the vegetation will also have become radioactive. The radioactive elements deposited in the soil pass into the plants, where they are stored. This is of importance, for as a result of this process it may be the case that we are threatened by a considerable amount of radioactive elements.

The radioactive elements in grass, when eaten by animals whose meat is used for food, will be absorbed and stored in our bodies.

In the case of cows grazing on contaminated soil, the absorption is effected when we drink their milk. In that way small children run an especially dangerous risk of absorbing radioactive elements.

When we eat contaminated cheese and fruits the radioactive elements stored in them are transferred to us.

What this storing of radioactive material implies is clearly demonstrated by the observations made when, on one occasion, the radioactivity of the Columbia River in North America was analyzed. The radioactivity was caused by the atomic plants at Hanford, which produce plutonium for atomic bombs and which empty their waste water into the river. The radioactivity of the river water was insignificant. But the radioactivity of the river plankton was 2,000 times higher, that of the ducks eating plankton 40,000 times higher, that of the fish 15,000 times higher. In young swallows fed on insects caught by their parents in the river the radioactivity was 500,000 times higher, and in the egg yolks of water birds more than 1 million times higher.

From official and unofficial sources we have been assured, time and time again, that the increase in radioactivity of the air does not exceed the amount which the human body can tolerate without any harmful effects. This is just evading the issue. Even if we are not directly affected by the radioactive material in the air, we are indirectly affected through that which has fallen down, is falling down, and will fall down. We are absorbing this through radioactive drinking water and through animal and vegetable foodstuffs, to the same extent as radioactive elements are stored in the vegetation of the region in which we live. Unfortunately for us, nature hoards what is falling down from the air.

None of the radioactivity of the air, created by the explosion of atom bombs, is so unimportant that it may not, in the long run, become a danger to us through increasing the amount of radioactivity stored in our bodies.

What we absorb of radioactivity is not spread evenly in all cellular tissue. It is deposited in certain parts of our body, particularly in the bone tissue and also in the spleen and in the liver. From those sources the organs which are especially sensitive to it are exposed to radiation. What the radiation lacks in strength is compensated for by time. It works day and night without interruption.

How does radiation affect the cells of an organ?

Through being ionized, that is to say, electrically charged: This change means that the chemical processes which make it possible for the cells to do their job in our body no longer function as they should. They are no longer able to perform the tasks which are of vital importance to us. We must also bear in mind that a great number of the cells of an organ may degenerate or die as a result of radiation.

What are the diseases caused by internal radiation? The same diseases that are known to be caused by external radiation.

They are mainly serious blood diseases. The cells of the red bone marrow, where the red and the white blood corpuscles are formed, are very sensitive to radioactive rays. It is these corpuscles, found in great numbers in the blood, which make it possible for it to play such an important part. If the cells in the bone marrow are damaged by radiation they will produce too few or abnormal, degenerating blood corpuscles. Both cases lead to blood diseases and, frequently, to death. These were the diseases that killed the victims of X-rays and radium rays.

It was one of these diseases that attacked the Japanese fishermen who were surprised in their vessel by radioactive ashes falling down 240 miles from Bikini after the explosion of a hydrogen bomb. With one exception, they were all saved, being strong and relatively mildly affected, through continuous blood transfusions.

In the cases cited the radiation came from the outside. It is unfortunately very probable that internal radiation affecting the bone marrow and lasting for years will have the same effect, particularly since the radiation goes from the bone tissue to the bone marrow. As I have said, the radioactive elements are by preference stored in the bone tissue.

Not our own health only is threatened by internal radiation, but also that of our descendants. The fact is that the cells of the reproductive organs are particularly vulnerable to radiation which in this case attacks the nucleus to such as extent that it can be seen in the microscope.

To the profound damage of these cells corresponds a profound damage to our descendants. It consists in stillbirths and in the births of babies with mental or physical defects.

In this context also, we can point to the effects of radiation coming from the outside.

It is a fact—even if the statistical material being published in the press needs checking—that in Nagasaki, during the years following the dropping of the atom bomb, an exceptionally high occurrence of stillbirths and of deformed children was observed.

In order to establish the effect of radioactive radiation on posterity, comparative studies have been made between the descendants of doctors who have been using X-ray apparatus over a period of years and descendants of doctors who have not. The material of this study comprises about 9,000 doctors in each group. A noticeable difference was found. Among the descendants of radiologists a percentage of stillbirths of 1.403 was found, while the percentage among the nonradiologists were 1.222.

In the first group 6.01 percent of the children had congenital defects, while only 4.82 percent in the second.

The number of healthy children in the first group was 80.42 percent; the number in the other was significantly higher; viz, 83.23 percent.

It must be remembered that even the weakest of internal radiation can have harmful effects on our descendants.

The total effect of the damage done to descendants of ancestors who have been exposed to radioactive rays will not, in accordance with the laws of genetics, be apparent in the generations coming immediately after us. The full effects will appear only 100 or 200 years later.

As the matter stands we cannot at present cite cases of serious damage done by internal radiation. To the extent that such radiation exists it is not sufficiently strong and has not lasted long enough to have caused the damage in question. We can only conclude from the harmful effects known to be caused by external radiation to those we must expect in the future from internal radiation.

If the effect of the latter is not as strong as that of the former, it may become so, through working little by little and without interruption. The final result will be the same in both cases.

Their effects add up.

We must also remember that internal radiation does not have to, in contrast to that coming from the outside, penetrate layers of skin, tissues, and muscles to hit the organs. It works at close range and without any weakening of its force.

When we realize under what conditions the internal radiation is working, we cease to underrate it. Even if it is true that, when speaking of the dangers of internal radiation, we can point to no actual case, only express our fear, that fear is so solidly founded on facts that it attains the weight of reality in determining our attitude. We are forced to regard every increase in the existing danger through further creation of radioactive elements by atom-bomb explosions as a catastrophe for the human race, a catastrophe that must be prevented.

There can be no question of doing anything else, if only for the reason that we cannot take the responsibility for the consequences it might have for our descendants.

They are threatened by the greatest and most terrible danger.

That radioactive elements created by us are found in nature is an astounding event in the history of the earth and of the human race. To fail to consider its importance and its consequences would be a folly for which humanity would have to pay a terrible price. We are committing a folly in thoughtlessness. It must not happen that we do not pull ourselves together before it is too late. We must muster the insight, the seriousness, and the courage to leave folly and to face reality.

This is at bottom what the statesmen of the nations producing atomic bombs are thinking, too. Through the reports they are receiving they are sufficiently informed to form their own judgments, and we must also assume that they are alive to their responsibility.

At any rate, America and Soviet Russia and Britain are telling one another again and again that they want nothing more than to reach an agreement to end the testing of atomic weapons. At the same time, however, they declare that they cannot stop the tests as long as there is no such agreement.

Why do they not come to an agreement? The real reason is that in their own countries there is no public opinion asking for it. Nor is there any such public opinion in other

countries, with the exception of Japan. This opinion has been forced upon the Japanese people because, little by little, they will be hit in a most terrible way by the evil consequences of all the tests.

An agreement of this kind presupposes reliability and trust. There must be guaranties preventing the agreement from being signed by anyone intending to win important tactical advantages foreseen only by him.

Public opinion in all nations concerned must inspire and accept the agreement.

When public opinion has been created in the countries concerned and among all nations, an opinion informed of the dangers involved in going on with the tests and led by the reason which this information imposes, then the statesmen may reach an agreement to stop the experiments.

A public opinion of this kind stands in no need of plebiscites or of forming of committees to express itself. It works through just being there.

The end of further experiments with atom bombs would be like the early sunrays of hope which suffering humanity is longing for.

Mr. MORSE. I cannot bring myself to give continued support, in the name of defense, to a hydrogen-bomb policy which I have become satisfied is not only endangering the lives of millions of innocent people, but may very well mar the lives of future generations.

ADJOURNMENT TO MONDAY

Mr. JOHNSON of Texas. Mr. President, pursuant to the order previously entered, I move that the Senate stand in adjournment until Monday next at 12 o'clock noon.

The motion was agreed to; and (at 7 o'clock and 13 minutes p. m.) the Senate adjourned, the adjournment being, under the order previously entered, to Monday, May 27, 1957, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate May 23, 1957:

DIPLOMATIC AND FOREIGN SERVICE

Ivan B. White, of Washington, now a Foreign Service officer of class 1 and a secretary in the diplomatic service, to be also a consul general of the United States of America.

The following-named persons, now Foreign Service officers of class 2 and secretaries in the diplomatic service, to be also consuls general of the United States of America:

W. Wendell Blancké, of New York.
Olcott H. Deming, of Connecticut.

The following-named persons for appointment as Foreign Service officers of class 2 consuls, and secretaries in the diplomatic service of the United States of America:

Eric E. Oulashin, of Maryland.
Philip Raine, of the District of Columbia.

The following-named persons, now Foreign Service officers of class 3 and secretaries in the diplomatic service, to be also consuls general of the United States of America:

William C. Affeld, Jr., of New Jersey.
Mervyn V. Pallister, of Michigan.

Thomas W. Simons, Sr., of the District of Columbia.

Charles D. Withers, of South Carolina.

Knox Lamb, of Mississippi, for appointment as a Foreign Service officer of class 3, a counsel, and a secretary in the diplomatic service of the United States of America.

The following-named persons for appointment as Foreign Service officers of class 4, consuls, and secretaries in the diplomatic service of the United States of America:

Roger G. Gifford, of Virginia.
Hugh C. Reichard, of California.
Edward H. Widdifield, of California.

Robert H. Miller, of Washington, for promotion from Foreign Service officer of class 6 to class 5 and to be also a consul of the United States of America.

The following-named persons for appointment as Foreign Service officers of class 5, consuls, and secretaries in the diplomatic service of the United States of America:

Miss Doris Meltana Luellen, of California.
Miss Josephine D. Wharton, of Florida.
Thomas A. Fain, of Oklahoma.

Robert E. Barbour, of Tennessee, now a Foreign Service officer of class 6 and a secretary in the diplomatic service, to be also a consul of the United States of America.

The following-named persons for appointment as Foreign Service officers of class 6, vice consuls of career and secretaries in the diplomatic service of the United States of America:

Dwight M. Cramer, of Nebraska.
Frank D. Durfey, of Minnesota.
Andrew J. Fink III, of California.
Richard Forschner, of New Jersey.
Miss Ellen Gavrisheff, of Texas.
Ralph M. Kearney, of Illinois.
George A. Mailloux, Jr., of Rhode Island.
Mrs. Louise deCourcy O'Grady, of Florida.
Miss Geraldine M. Oliva, of Oregon.
John H. Seate, of Texas.
Miss Eleanor M. Shields, of California.
Joseph Terranova, Jr., of Maryland.

The following-named persons for appointment as Foreign Service officers of class 8, vice consuls of career and secretaries in the diplomatic service of the United States of America:

George A. Anderson, of Iowa.
Michael S. Bank, of New York.
Richard C. Barnum, of Ohio.
Richard D. Belt, of Ohio.
Robert O. Blucker, of California.
Michael P. Boerner, of Maryland.
Miss Kathleen C. Bruguiere, of California.
Thomas B. Cummings, of California.
Ralph Estling, of California.
Miss Alta F. Fowler, of Virginia.
Rogelio Garcia, of New York.
James L. Gorman, of Oregon.
John T. Haldane, of the District of Columbia.
Ashley C. Hewitt, Jr., of California.
William P. Keasbey, Jr., of California.
Lowell C. Kilday, of Wisconsin.
Robert A. Krier, of New York.
Nelson C. Ledsky, of Ohio.
Perry W. Linder, of California.
W. Douglas McLain, Jr., of Illinois.
Miss Barbara J. Marvin, of California.
Noble M. Melencamp, of Kansas.
Alan C. Mencher, of California.
James K. Powell, of Texas.
Kenneth N. Rogers, of New York.
Peter Sebastian, of New York.
John P. Shumate, Jr., of California.
Herbert D. Swett, of California.
John J. Taylor, of Tennessee.
Richard H. Thompson, of Indiana.
John T. Vanderveen, of California.
Donald B. Wallace, Jr., of Indiana.
Leonard A. Warren, of California.
Alfred J. White, of the District of Columbia.
Edward E. Wright, of Louisiana.

The following-named Foreign Service staff officers to be consuls of the United States of America:

Joe B. Cox, of Ohio.
John C. Donnell, Jr., of Washington.
N. Marbury Efimenco, of Michigan.
Clyde J. Hanna, of California.
William J. Herget, of Maryland.
Wilford J. Kramer, of Illinois.
James M. McDonald, Jr., of New Jersey.
Roger P. Ross, of California.

The following-named Foreign Service reserve officers to be consuls of the United States of America:

Orville H. Bathe, of California.
Donald C. Ide, of Washington.
Sanford S. Marlowe, of Virginia.
William Grant Parr, of Nebraska.
Samuel R. Sanders, Jr., of Virginia.

The following-named Foreign Service reserve officers to be vice consuls and secretaries in the diplomatic service of the United States of America:

Duane A. Rames, of Virginia.
Harold M. Young, Jr., of California.

The following-named Foreign Service reserve officers to be vice consuls of the United States of America:

Robert G. Brewster, of Illinois.
Robert K. Heathman, of Florida.
Alfred Schelp, of Missouri.
Alvin L. Smith, Jr., of Florida.

The following-named Foreign Service reserve officers to be secretaries in the Diplomatic Service of the United States of America:

John E. Baker, of Virginia.
George W. Edman, of Massachusetts.
Frank F. Friberg, of Massachusetts.
Maurice J. Gremillion, of Texas.
John H. Leavitt, of Virginia.
Joseph F. McEvoy, of Florida.
John P. McKnight, of North Carolina.
William E. Nelson, of New York.
Bruce T. Odell, of Massachusetts.
Miss Evelyn M. Schwarztrauber, of Illinois.
Howard E. Stone, of California.
Maurice F. W. Taylor, of California.
Ghosn J. Zogby, of Virginia.

CONFIRMATIONS

Executive nominations confirmed by the Senate Thursday, May 23, 1957:

DEPARTMENT OF THE NAVY

J. Sinclair Armstrong, of Illinois, to be an Assistant Secretary of the Navy.

UNITED NATIONS

Harold M. Randall, of Iowa, to be the representative of the United States of America to the seventh session of the Economic Commission for Latin America of the Economic and Social Council of the United Nations.

PUBLIC HEALTH SERVICE

The following candidates for personnel action in the Regular Corps of the Public Health Service subject to qualifications therefor as provided by law and regulations (for appointment):

To be senior surgeons

Henry C. Huntley
Kazumi Kasuga

To be senior assistant surgeon

Edward V. Evarts

To be senior scientists

F. Earle Lyman
George W. Pearce

To be senior assistant scientist

Alfred L. Brophy, Jr.

To be senior assistant nurse officer

Ava S. Dilworth

The following candidates for personnel action in the Regular Corps of the Public Health Service:

To be senior assistant surgeons

James N. Windblad
John R. Lapp
John F. Commerford
Irving Mauer

Charles M. Bowyer
Samuel C. Alexander, Jr.
Bernard Kliman
John R. M. Phelan
C. Hunter Montgomery
Jack C. Robertson

To be assistant surgeons

Philip H. Geisler
Ellsworth Y. Ching
Ferdinand R. Hassler, Jr.
George H. Christ
Joseph M. Torruella
S. Ross Fox, Jr.
Kenneth N. Beers
David N. Smiley
Stanley R. Mohler
Richard I. Myers

To be senior assistant scientist

Thomas M. Asher.

To be senior assistant nurse officer

Catherine Wegner.

The following candidates for personnel action in the Regular Corps of the Public Health Service, subject to qualifications therefor as provided by law and regulations:

To be senior surgeon

Emil E. Palmquist.

To be senior assistant surgeons

Ernest E. Musgrave.
Aubrey F. Haynes.

To be assistant dental surgeon

James W. Miller.

To be senior scientist

Richard A. Ormsbee.

To be medical directors

Leland A. Hanchett
Fred Morse
Edgar W. Moreland
Paul T. Erickson
Ralph B. Hogan
Glenn S. Usher
Robert R. Smith
Robert L. Zobel
Travis P. Burroughs
Harry Heimann
Robert L. Cherry
Henry W. Kassell
R. Frank Reider
John B. Vander
Isidor Abrahamer
Welby W. Bigelow
Lewis H. Hoyle
Michael B. Shimkin
Joseph C. Sturgell
Benno K. Milmore
William J. Brown
Benjamin Highman
Daniel J. Daley
George F. Ellinger
John F. Oesterle
Gabriel P. Ferrazzano
Joseph H. Gerber
Horace De Lien
Clarence L. P. Hebert
Leslie W. Knott
Robert J. Anderson
William H. Stimson
William S. Baum
Kenneth W. Chapman

To be senior surgeons

Wayland J. Hayes, Jr.
Leonard T. Kurland
Thomas A. Burch
Alan D. Miller
Louis B. Thomas
Robert B. Dorsen
Robert P. Grant
Wilton M. Fisher
Richard S. Yocum
Murray C. Brown
Roy P. Lindgren
Robert H. Dysinger
Vincent E. Price
Robert B. Neu
Robert M. Farrier
Stewart M. Sessoms
Sheldon Dray
Donald Harting
Henry D. Smith
Henry C. Savage
Charles E. Smith

To be surgeons

Leslie T. McClinton
G. Gilbert Ashwell
Winthrop E. Hoyle
Tracy Levy
Sarah E. Stewart
Kamehameha K. Wong
Ernest C. Siegfried
John M. Buchness
Lester R. Nagel
John J. Walsh
Joseph A. Gallagher
Alexis I. Shelokov
Mirriam D. Manning
Maurice L. Sievers
Clermont S. Powell
Robert N. Phillip
John K. Irion
Agamemnon Despopoulos
John M. Lynch
Calvin R. MacKay
Joseph E. Jack
Daniel Steinberg
George W. Metcalf
William H. Stewart
Harry Y. Spence

To be senior assistant surgeons

Elbert E. Hines
John F. Ice
C. Lowell Edwards
Roy E. Tolls
Michael W. Justice
David H. Looff
John R. Trautman
Irwin B. Kaplan
Thomas E. Kiester
Neely E. Pardee
Gordon S. Siegel
John G. Mahaney
Ted L. Flickenger
James T. Worlton, Jr.
Donald A. Neher
Ralph J. Zecca
Duane L. Hanson
George C. Hottinger
Herman L. Smith
Leon N. Branton
Arnold R. Haugen

To be dental directors

William W. Calhoun, Jr.
Harry G. Trautman
Donald J. Galagan
Joseph E. Unsworth
Clovis E. Martin
James O. Blythe, Jr.

To be senior dental surgeons

Peter J. Coccaro
Richard P. French
Peter B. Drez

To be dental surgeons

Oswald Spence
William B. Savchuck
Carl J. Witkop, Jr.
Biagio J. Cosentino
John E. Frank
James E. Kelly

To be senior assistant dental surgeons

Robert R. Kelley
Calvin M. Reed
Winston H. Bowman
W. Frederick Schmidt
Stanley D. Sheriff
Bernard A. Yenne
E. Duane Oakes
Harry H. Hatasaka
James R. Dow
William D. Bowker
Howard B. Hancock
Ivan T. Shaurette
Robert A. Hesse

To be sanitary engineer directors

Hayes H. Black
Joseph E. Flanagan, Jr.
James G. Terrill, Jr.
August T. Rossano
M. Allen Pond
Ralph J. Vanderwerker
Russell W. Hart
Charles D. Yaffe
Robert R. Harris
Malcolm C. Hope
Harry G. Hanson
Wesley E. Gilbertson
Callis H. Atkins

To be senior sanitary engineer

Alfred E. Williamson, Jr.

To be sanitary engineers

Ronald E. Bales
Gerald N. McDermott
James A. Westbrook
Ronald G. Macomber
Charles E. Sponagle
Lester E. Blaschke
Donald E. Pecsok
Robert P. Morfitt
William H. Davis, Jr.

To be senior assistant sanitary engineers

Gene B. Welsh.
Ernest D. Harward.

To be assistant sanitary engineers

Archie E. Becher
James G. Gardner
Harry C. Vollrath III
Jules B. Cohen

To be pharmacist director

Guy H. Trimble.

To be senior pharmacists

Joseph P. Crisalli.
Victor F. Serino.
Arthur W. Dodds.

To be pharmacists

Joseph J. Hackett
John A. Scigliano
Richard F. Bolte
Allums F. Smith
Henry W. Beard
Alfred A. Rosenberg
Richard R. Sherwood

To be scientist directors

Jerry W. Carter, Jr.
Charles G. Dobrovolny
Malcolm J. Williams
Clarence M. Tarzwell
Harold M. Skeels
Emlen J. Bell
Howard M. Kline
Carl L. Anderson
Louis Block
Lewis J. Cralley
Pope A. Lawrence

To be senior scientists

Lewis J. Sargent.
Archie D. Hess.
William H. Ewing.

To be scientists

Harold J. Fournelle
William R. Carroll
Roy W. Chamberlain
Robert K. Ness
Clarence A. Sooter
William F. Durham
Leo Kartman
Jack J. Monroe
Bill H. Hoyer
Robert Holdenried
Charles R. Maxwell

To be senior assistant scientists

Seymour Rubenfeld
Donald S. Blough
Donald S. Boomer
Kenneth W. Walls

To be senior sanitarians

Nell McKeever.
Mary Jo Kraft.
Milton Wittman.

To be sanitarian

Wallace W. Jonz.

To be senior assistant sanitarians

Richard A. Steinmetz.
Grace M. Littlejohn.

To be senior veterinarian

Raymond J. Helvig.

To be veterinarians

Robert E. Kissling.
Ladd N. Loomis.
Karl R. Reinhard.

To be senior assistant veterinarians

Anton M. Allen.
Kenneth O. Quist.

To be nurse directors

Marion Ferguson
Hazel Shortal
Margaret K. Schafer
Donna Pearce
Lorena J. Murray
Elsie T. Berdan

To be senior nurse officers

Emily M. Smith
Margaret Denham
Helen M. Danley
Mildred Struve

To be nurse officers

Elizabeth W. Maher
Philomene Lenz
Loretta C. Parsons
Mabel N. Hay
Madge M. Neill
Myra I. Johnson
Jennie N. Rakich
Margaret M. Cahalan
Florence E. McKerrow
Lillian S. Dick
Florence E. Gareau
Mary E. Allen
Katherine Bastress
Albina A. Bozym
Mildred F. Barnett
Frances S. Wolford
Catherine N. McDuffie
Grace E. Mattis
Mary G. Damian
Mary R. Lester
Dorothy L. Connors
Merilys R. Porter
Hilda A. Nivala

To be senior assistant nurse officer

Dorothy C. Calafiore.

To be therapist

Nellie L. Evans.

To be senior assistant therapist

Royce P. Noland.
Dean P. Currier.

To be assistant therapist

Arthur J. Nelson.

HOUSE OF REPRESENTATIVES

THURSDAY, MAY 23, 1957

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D. D., offered the following prayer:

Eternal and ever-blessed God, Thou hast entrusted our chosen representatives with a high vocation and charged them with heavy responsibilities.

May Thy Holy Spirit reveal unto them its glorious opportunities and interpret its sacred meaning.

Grant that in times of misgiving and foreboding they may feel Thy gracious presence and be endowed with Thy conquering power.

Inspire them to plan wisely, pray fervently, and labor faithfully for everything that is well-pleasing unto Thee.

In Christ's name we bring our petitions. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. McBride, one of its clerks, announced that

the Senate had passed without amendment bills and a concurrent resolution of the House of the following titles:

H. R. 1400. An act for the relief of Mitsuko A. Hachita;

H. R. 1983. An act to provide for the conveyance of the reversionary interest of the United States in certain lands to the Clint Independent School District and the Fabens Independent School District in the State of Texas, or to either of them, and for other purposes;

H. R. 2018. An act to permit any State of the United States or any political subdivision of any such State to purchase from the District of Columbia Reformatory at Lorton, Va., gun mountings and carriages for guns for use at historic sites and for museum display purposes;

H. R. 2718. An act to amend the act entitled "An act to authorize the Secretary of the Navy to enlarge existing water-supply facilities for the San Diego, Calif., area in order to insure the existence of an adequate water supply for naval installations and defense production plants in such area", approved October 11, 1951;

H. R. 2797. An act to amend title 10, United States Code, to authorize the Secretary of a military department to furnish stevedoring and terminal services and facilities to commercial steamship companies, and for other purposes;

H. R. 4285. An act to authorize the sale of degaussing equipment by the Department of the Navy to the owners or operators of privately owned merchant ships of United States registry;

H. R. 5832. An act to increase the retired annuities of the civilian members of the teaching staffs of the United States Naval Academy and the United States Naval Postgraduate School;

H. R. 6454. An act to amend the act for the retirement of public-school teachers in the District of Columbia, and for other purposes; and

H. Con. Res. 174. Concurrent resolution authorizing the printing of additional copies of part 1 of the hearings on the Department of Defense appropriations for 1958.

The message also announced that the Senate had passed, with amendments in which the concurrence of the House is requested, bills, a joint resolution, and a concurrent resolution of the House of the following titles:

H. R. 192. An act to provide that members of the Board of Education of the District of Columbia may be removed for cause;

H. R. 6258. An act to amend the act entitled "An Act to provide additional revenue for the District of Columbia, and for other purposes," approved August 17, 1937, as amended;

H. J. Res. 247. Joint resolution for the relief of certain aliens; and

H. Con. Res. 89. Concurrent resolution approving the granting of the status of permanent residence to certain aliens;

The message also announced that the Senate had passed, with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H. R. 5788. An act making appropriations for the Executive Office of the President and sundry Government agencies for the fiscal year ending June 30, 1958, and for other purposes.

The message also announced that the Senate insists on its amendments to the foregoing bill, requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. MAGNUSON, Mr. HILL, Mr. ELLENDER, Mr. ROBERTSON, Mr. DIRKSEN, Mr. SALTONSTALL, and Mr. MUNDT to be the conferees on the part of the Senate.

The message also announced that the Senate agrees to the amendment of the House to a bill of the Senate of the following title:

S. 1463. An act to amend the Medals of Honor Act to authorize awards for acts of heroism involving any motor vehicle.

The message also announced that the Senate had passed bills and a concurrent resolution of the following titles, in which the concurrence of the House is requested:

S. 80. An act for the relief of Maria Adelaide Alessandroni;

S. 105. An act to exempt from taxation certain property of the National Association of Colored Women's Clubs, Inc., in the District of Columbia;

S. 153. An act for the relief of Tsui Yung Wong;

S. 160. An act for the relief of Georgios Ioannou;

S. 164. An act for the relief of John G. Michael;

S. 499. An act for the relief of Daniela Renata Patricia Zei;

S. 525. An act for the relief of Rhoda Elizabeth Graubart;

S. 526. An act for the relief of Tikva Polsky;

S. 534. An act to amend section 702 of the Merchant Marine Act, 1936, in order to authorize the construction, reconditioning, or remodeling of vessels under the provisions of such section in shipyards in the continental United States;

S. 553. An act for the relief of Oleg Antonowycz;

S. 583. An act for the relief of Stanislav Maglica;

S. 592. An act for the relief of Anton Revak;

S. 614. An act for the relief of Mary Pu Keui Min, and her children Susan Pyong Soon Min, Sally Pyong Yun Min, George Pyong Yu Min, and William Pyong Soo Min;

S. 749. An act for the relief of Loutfie Kalil Noma (also known as Loutfie Siemon Noma or Loutfie Noama);

S. 755. An act for the relief of Athena Nicholas Euteriadou;

S. 785. An act for the relief of Helga Binder;

S. 788. An act for the relief of Thelma Margaret Hwang;

S. 798. An act for the relief of Giuseppe Baffo;

S. 833. An act for the relief of Vida Letitia Baker;

S. 834. An act for the relief of David Ajuelo, Roza Ajuelo, Victoria Ajuelo, and Lizet Ajuelo;

S. 849. An act for the relief of Sydney Douglas Catchpole;

S. 886. An act to provide transportation on Canadian vessels between ports in southeastern Alaska, and between Hyder, Alaska, and other points in southeastern Alaska, or the continental United States, either directly or via a foreign port, for any part of the transportation;

S. 908. An act for the relief of Kuo York Chynn;

S. 916. An act to provide for the issuance of checks and continuation of accounts when there is a vacancy in the post office of the disbursing officer of the Post Office Department, and for other purposes;

S. 937. An act to amend section 4 of the Interstate Commerce Act, as amended;

S. 988. An act for the relief of Satoe Yamakage Langley;

S. 1035. An act for the relief of Alice Eirl Schaer (Mi On Lee);

S. 1089. An act for the relief of Salvatore Pantano;

S. 1112. An act for the relief of Matsue Harada;

S. 1147. An act for the relief of Kiyoshi Takahashi, Kyoko Takahashi, and Nosomu Takahashi;

S. 1169. An act for the relief of Herbert C. Heller;

S. 1264. An act to exempt from taxation certain property of the National Trust for Historic Preservation in the United States in the District of Columbia;

S. 1269. An act to amend the act entitled "An act to create a Board for the Condemnation of Insanitary Buildings in the District of Columbia, and for other purposes," approved May 1, 1906, as amended;

S. 1376. An act for the relief of Chong You How (also known as Edward Charles Yee), his wife, Eng Lai Fong, and his child, Chong Yim Keung;

S. 1390. An act for the relief of Roberto Mario Bettinzoli;

S. 1446. An act to amend title 14, United States Code, so as to provide for retirement of certain former members of the Coast Guard Reserve;

S. 1576. An act to exempt the sale of materials for certain war memorials in the District of Columbia from the District of Columbia Sales Tax Act;

S. 1586. An act to eliminate the financial limitations on real and personal estate holdings of the American Historical Association and to exempt from taxation certain property of such association in the District of Columbia;

S. 1589. An act for the relief of Nina Maslova Greenberg;

S. 1708. An act to amend the act entitled "An act relating to children born out of wedlock," approved January 11, 1951;

S. 1806. An act to amend the Sockeye Salmon Fishery Act of 1947;

S. 1833. An act for the relief of James Schreiner;

S. 1842. An act to amend the act entitled "An act to provide for compulsory school attendance, for the taking of a school census in the District of Columbia, and for other purposes," approved February 4, 1925;

S. 1884. An act to amend section 505 of the Classification Act of 1949, as amended;

S. 1906. An act authorizing the conferring of appropriate degrees by the District of Columbia Teachers College on those persons who have met the requirements for such degrees, and for other purposes; and

S. Con. Res. 26. Concurrent resolution to print additional copies of the report entitled "The International Petroleum Cartel."

The message also announced that the Vice President has appointed Mr. JOHNSTON of South Carolina and Mr. CARLSON members of the Joint Select Committee on the part of the Senate, as provided for in the act of August 5, 1939, entitled "An act to provide for the disposition of certain records of the United States Government," for the disposition of executive papers referred to in the report of the Archivist of the United States numbered 57–11.

SUBCOMMITTEE OF COMMITTEE ON THE JUDICIARY

Mr. WILLIS. Mr. Speaker, I ask unanimous consent that Subcommittee No. 3 of the Committee on the Judiciary be given permission to sit during general debate on Monday, May 27.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

REPEAL OF CABARET TAX

Mr. MAY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Mr. MAY. Mr. Speaker, the time is now before us for the Congress to give earnest consideration to repeal of the inequitable and discriminatory 20 percent cabaret tax. There is no longer any real or valid excuse for this tax to remain on the books. The contribution that it makes to the Federal Treasury has dropped in a period of 10 years from $72 million to $43 million. Clearly the effect of this taxation has reached a point of diminishing return.

The plain and indisputable fact is that we are retaining a tax that contributes only $42 million to the Treasury but, at the same time, contributes materially to unemployment and depression in the music industry. It is estimated, after thorough study, that over 200,000 musicians are deprived of earning a living in their chosen profession largely because of the unwillingness on the part of the public to add 20 percent to their entertainment bill.

Many of these musicians are working in other industries. Their return to their chosen profession would open up jobs for others who are now unemployed.

It would be only a short time until the Treasury would collect more than $43 million from the reopened places of entertainment and the many additions to the Nation's work force.

I was recently honored to have Secretary of Labor James P. Mitchell on a radio program with me. In answer to one of my questions on this tax, Secretary Mitchell stated, "I think that the cabaret tax is discriminatory legislation and I think that it should be repealed, because it is not conducive to employment in the musicians' field."

EXCISE TAX TECHNICAL CHANGES ACT OF 1957

Mr. COOPER. Mr. Speaker, I ask unanimous consent that the Committee on Ways and Means may have until midnight Friday, May 24, 1957, to file a report on the bill (H. R. 7125) to make technical changes in the Federal excise-tax laws, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

THE AUTHORIZED PERSONNEL STRENGTHS OF THE ARMED FORCES

Mr. THORNBERRY. Mr. Speaker, by direction of the Committee on Rules I call up House Resolution 257 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 7143) to amend the act of August 3, 1950, as amended, to continue in effect the provisions relating to the authorized personnel strengths of the Armed Forces. After general debate, which shall be confined to the bill and continue not to exceed 1 hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Armed Services, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. THORNBERRY. Mr. Speaker, House Resolution 257 makes in order the consideration of H. R. 7143 unanimously reported by the Committee on Armed Services.

The resolution provides for an open rule and 1 hour of general debate on the bill.

Under section 2 of the Universal Military Training and Service Act, the Armed Forces are authorized a personnel strength of approximately 2,005,000. This ceiling was first suspended by the act of August 3, 1950, and further extended in 1954 until July 31, 1957.

H. R. 7143 proposes to continue in effect this suspension of the personnel strengths of the Armed Forces until July 31, 1959, the date when the authority to induct individuals into the Armed Forces expires.

If the suspension of the limitation, as proposed by H. R. 7143, is not continued, it would be necessary to reduce the strength of the Armed Forces by about 800,000.

The legislation is recommended by the Department of Defense and the Bureau of the Budget offers no objection. The proposal will cause no increase in the budgetary requirements of the Department of Defense.

The Committee report complies with the Ramseyer rule and I urge the adoption of House Resolution 257 so the House may proceed to the consideration of this measure.

Mr. Speaker, I yield 30 minutes to the gentleman from Illinois [Mr. ALLEN].

Mr. ALLEN of Illinois. Mr. Speaker, I reserve the balance of my time.

Mr. THORNBERRY. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The resolution was agreed to.

A motion to reconsider was laid on the table.

AMENDING UNIVERSAL TRAINING AND SERVICE ACT AS REGARDS PERSONS IN MEDICAL, DENTAL, AND ALLIED SPECIALIST CATEGORIES

Mr. THORNBERRY. Mr. Speaker, by direction of the Committee on Rules I call up the resolution (H. Res. 256) providing for the consideration of H. R. 6548, to amend the Universal Military Training and Service Act, as amended, as regards persons in the medical, dental, and allied specialist categories, and ask for its immediate consideration.

The Clerk read as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 6548) to amend the Universal Military Training and Service Act, as amended, as regards persons in the medical, dental, and allied specialist categories, and all points of order against said bill are hereby waived. After general debate, which shall be confined to the bill, and shall continue not to exceed 2 hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Armed Services, the bill shall be read for amendment under the 5-minute rule. It shall be in order to consider without the intervention of any point of order the substitute amendment recommended by the Committee on Armed Services now in the bill and such substitute for the purpose of amendment shall be considered under the 5-minute rule as the original bill. At the conclusion of such consideration the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

Mr. THORNBERRY. Mr. Speaker, I ask unanimous consent that on page 2, line 4, the last word "the" be stricken out and the word "an" be inserted in lieu thereof.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

The resolution was amended accordingly.

Mr. THORNBERRY. Mr. Speaker, House Resolution 256 provides for the consideration of H. R. 6548, a bill to amend the Universal Military Training and Service Act, as amended, as it pertains to persons in the medical, dental, and allied specialist categories. The bill was reported with amendment from the Committee on Armed Services.

The resolution provides for an open rule and 2 hours of general debate on the bill. The rule would make it in order to consider the substitute amendment recommended by the Armed Services Committee now in the bill without the intervention of any point of order, and such substitute for the purpose of amendment shall be considered under the 5-minute rule as an original bill.

H. R. 6548 provides authority for the President to issue calls for physicians, dentists, and allied specialists for duty in the Armed Forces in lieu of calls under the so-called Doctor Draft Act which is scheduled to expire July 1, 1957. The calls will be limited to individuals who were deferred on or after June 20, 1951. Furthermore, individuals born prior to June 20, 1925, will not be affected. Thus, no physician or dentist will be inducted or involuntarily ordered to active duty under the provisions of this legislation who exceeds the age of 34.

The Department of Defense asked the Committee on Armed Services to increase the ratio of physicians from 3 per thousand troop strength to 3.4 per thousand troop strength. The Committee on Armed Services, however, adopted the ratio of 3 per thousand troop strength which will mean a total number of 4,100 physicians will be called on an involuntary basis in the next 2 years. The requirement for dentists is based on a ratio of 2 per thousand troop strength which means that 2,700 dentists will be called.

The bill will continue in effect the National Advisory Committee and the local and State committees who advise the Selective Service System with respect to the selection of needed physicians and dentists and allied specialists.

The proposed legislation also reiterates existing law in several instances. These provisions will, I am sure, be fully outlined and explained by members of the Armed Services Committee.

The bill provides a termination date of July 1, 1959, so the entire subject may be completely reviewed prior to that date.

The Department of Defense concurs in the amendments adopted by the Committee on Armed Services.

The committee report complies with the Ramseyer rule and I urge the adoption of House Resolution 256 so the House may proceed to the consideration of H. R. 6548.

Mr. Speaker, I yield 30 minutes to the gentleman from Illinois [Mr. ALLEN].

Mr. ALLEN of Illinois. Mr. Speaker, I yield 2 minutes to the gentleman from Michigan [Mr. HOFFMAN].

Mr. HOFFMAN. Mr. Speaker, late yesterday afternoon the gentleman from New York [Mr. ROONEY] seemed to feel that I had done something I should not have done. I mentioned his name three times as I did a couple of times that of the gentleman from Georgia who is now here, but neither of whom was on the floor then and had not been told that reference to him would be made. Now, it is not my understanding that either the rules or any consideration of warm personal friendship requires any Member to advise another Member he will be mentioned when debate is on. One might not know what is up on the floor for consideration. Unless one is being critical of some Member or of some of his views or if one is taking a Member to task, you might well advise him about it and that I will always do. But where you have gentlemen, especially like the gentleman from Georgia [Mr. VINSON] and the gentleman from New York [Mr. ROONEY]—why they have so many duties and their time is so occupied that it would be an imposition for me to tell them that they should come to the floor because he or his views will be mentioned. Suppose one wanted to say something praiseworthy about someone. If any apology is due to anyone, I am glad to apologize. I notice the gentleman from Georgia [Mr. VINSON] shakes his head. Or, I would be glad to apologize to the gentleman from New York [Mr. ROONEY] and each and every other Member of the House who may feel aggrieved right now.

Mr. THORNBERRY. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The resolution was agreed to.

A motion to reconsider was laid on the table.

CHIEF JUDGES OF CIRCUITS AND DISTRICT COURTS

Mr. SMITH of Virginia. Mr. Speaker, I call up the resolution (H. Res. 255) providing for the consideration of H. R. 985, a bill to provide that chief judges of circuit and district courts shall cease to serve as such upon reaching the age of 70, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 985) to provide that chief judges of circuits and district courts shall cease to serve as such upon reaching the age of 70. After general debate, which shall be confined to the bill and continue not to exceed 1 hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on the Judiciary, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the consideration of the bill for amendment, the committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. SMITH of Virginia. Mr. Speaker, I yield 30 minutes to the gentleman from Illinois [Mr. ALLEN].

I yield myself such time as I may require.

Mr. Speaker, this rule makes in order a bill relating to the Federal Judiciary. As you all know, now a senior judge of a circuit or a senior judge in a district where there is more than one judge, performs executive functions—administrative functions of the office. It involves a great deal of purely administrative work and is quite a burden in itself. This bill merely provides that when such justice who is the senior presiding justice of the court, either in a circuit or in a district, reaches the age of 70, he shall be relieved of the administrative functions, and they shall be performed by the next judge in order of seniority.

Mr. HOFFMAN. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Virginia. I yield to the gentleman from Michigan.

Mr. HOFFMAN. Does this in any way deprive him of his other duties, or prevent him from performing his other duties?

Mr. SMITH of Virginia. Not at all. It is really a measure in behalf of those elderly judges in order to relieve them of purely administrative functions that can be just as well performed by some other member of the court.

Mr. HOFFMAN. But not of the judicial functions?

Mr. SMITH of Virginia. When I referred to judicial functions, I meant the trial of cases. These are administrative duties of the office. As you will realize, in a circuit which involves several States, there are considerable administrative duties that can better be performed by some member of the court whose burdens are not so heavy.

Mr. HOFFMAN. Would it be comparable to giving all Members of the House who are past 75 or 80 years an assistant?

Mr. SMITH of Virginia. The gentleman and I have both been here for some years, and we are both reaching that unfortunate age.

Mr. HOFFMAN. Oh, I am past it long ago.

Mr. SMITH of Virginia. As a matter of fact, we have already passed the Biblical time of threescore years and 10. I am sure the gentleman will agree with me that any of the administrative burdens we could be relieved of would be helpful.

Mr. HOFFMAN. Well, it would be helpful, of course.

Mr. MASON. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Virginia. I yield.

Mr. MASON. We do have administrative assistants to relieve us of the details of the office, or some of us, who have passed three score years and ten. We could not attend to our legislative duties otherwise.

Mr. SMITH of Virginia. It is true not only of the elderly Members but true of the boys in this body, and even the ladies. They need them.

Mr. HOFFMAN. Will the gentleman yield again?

Mr. SMITH of Virginia. I yield.

Mr. HOFFMAN. I would like to have it distinctly understood that the gentleman from Illinois [Mr. MASON], when he is talking about these duties is speaking exclusively for himself, at least not for the Member from the Fourth District of Michigan. I still get along.

Mr. SMITH of Virginia. I yield to both of you.

Mr. Speaker, I do not know of any opposition to the rule.

Mr. O'HARA of Illinois. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Virginia. I yield.

Mr. O'HARA of Illinois. Will the gentleman inform me how old Oliver Wendell Holmes was when he rendered some of the great decisions of the Supreme Court?

Mr, SMITH of Virginia. I know he was a very remarkable man and he did render some very fine decisions, but this is not a question of that kind. This is a question of relieving him of the piddling administrative duties of that office.

Mr. O'HARA of Illinois. Will the gentleman tell me how old Mr. Justice Brandeis was?

Mr. SMITH of Virginia. I do not keep any tally on the ages of the members of the Court or of the Congress.

Mr. O'HARA of Illinois. Did the gentleman from Virginia read the report of the committee wherein the argument in support of this bill is based upon the ex-

perience of business that after a man gets along in life he loses his ability?

Mr. SMITH of Virginia. I do not happen to agree with that.

Mr. O'HARA of Illinois. Mr. Speaker, I raise the point of a quorum.

Mr. SMITH of Virginia. I would be glad to yield to the gentleman time to present his views if he desires.

Mr. O'HARA of Illinois. I think this is one bill of sufficient importance that the Members ought to be here to hear everything that is said.

The SPEAKER. The Chair will say to the gentleman from Illinois that in all probability the bill made in order by this rule will be the last one to be called up today.

Mr. O'HARA of Illinois. Then, Mr. Speaker, I withdraw my point of order.

Mr. SMITH of Virginia. Mr. Speaker, I yield to the gentleman from Illinois.

Mr. ALLEN of Illinois. Mr. Speaker, we do not desire any time on this side.

Mr. SMITH of Virginia. Mr. Speaker, I move the previous question.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

SUSPENSION ON TROOP CEILINGS IN THE ARMED FORCES

Mr. MILLER of California. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 7143) to amend the act of August 3, 1950, as amended, to continue in effect the provisions relating to the authorized personnel strengths of the Armed Forces.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 7143) with Mr. Bass of Tennessee in the chair.

The Clerk read the title of the bill.

By unanimous consent the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule the gentleman from Georgia [Mr. VINSON] will be recognized for 30 minutes and the gentleman from Illinois [Mr. ARENDS] for 30 minutes.

Mr. VINSON. Mr. Chairman, the bill will be handled on the majority side by the distinguished gentleman from California [Mr. MILLER].

The CHAIRMAN. The Chair recognizes the gentleman from California [Mr. MILLER].

Mr. MILLER of California. Mr. Chairman, I yield myself 15 minutes.

The CHAIRMAN. The gentleman from California is recognized.

Mr. MILLER of California. Mr. Chairman, the instant bill would amend the Universal Military Training and Service Act by extending until July 1, 1959, the present ceiling placed on the Armed Forces under the provisions of the act of August 3, 1950.

Under section 2 of the Universal Military Training and Service Act the Armed Forces are authorized a personnel strength of approximately 2,005,000.

Presently there are 2,800,000 people in the three branches of the Armed Forces. The authority for these 2,800,000 men expires on July 31 of this year. If the present bill is not enacted it would be mandatory for the Armed Forces to be cut back to 2,005,000. That is 795,000 less than are now in the forces. This would create a condition, I am sure, none of us would want to see. The bill extends the ceiling for another 2-year period. I am certain that the necessity for this bill is obvious to all of us.

Mr. ARENDS. Mr. Chairman, I yield myself such time as I may use.

Mr. Chairman, as the gentleman from California has just said, the purpose of this bill is obvious. It is a very simple extension of the present law on the subject and it is absolutely necessary and vital to the maintenance of our Armed Forces that we have at the present time.

Mr. Chairman, I yield 5 minutes to the gentleman from Michigan [Mr. HOFFMAN].

Mr. HOFFMAN. Mr. Chairman, I have been noticing in the papers—which is it?—Russia and Germany, 2 or 3 of the countries, are reducing their armed forces. I have been noticing also that the next war is to be fought not so much by men as by new weapons. War will require more skilled men, perhaps not so many as at present.

I would like to ask the gentleman from Illinois or the gentleman from California, in charge of this bill, a question. Before you answer, may I say that I read, too, that the President, and I am supporting the President, said we do not need so many men. Why do we need a continuation of so many men or employees?

Mr. ARENDS. This is the recommendation of the Joint Chief of Staff for the coming year. For the information of the gentleman, I will say that we are down 50,000 below what we were last year.

Mr. HOFFMAN. That is not an answer. All the gentleman is saying is that the staff wants them. Of course, the armed services is made up of individuals, just like the rest of us, and they want to grow and extend. We do not blame them for that. Maybe they think it is necessary for the protection of the country, and perhaps it is. What reason do they give as to why the present number of men should be continued to be drafted—and, as I understand it, they are under the control of the armed services for 8 years?

Mr. ARENDS. This is a recommendation, not only of the Joint Chiefs of Staff but of the President of the United States and it comes in here with the unanimous report of the Committee on the Armed Services of the House as to what we deem to be the needed requirements in manpower for the coming fiscal year.

Mr. HOFFMAN. For all of whom I have the greatest respect, but, at the same time, should not the country be told somewhere, other than in these reports or by the action of the House, the real reason why, after spending I do not know how many billion dollars—some say $160 billion—to prevent war, we need the same number of men in the armed services? That is what I want to know, the real reason.

I have the greatest respect, as has everyone else in the House, for the members of the committee, for the President and for the Joint Chiefs of Staff. But these young men are being sent abroad and being maintained over there with their families—and with that I have no fault to find. As long as they are drafted and sent away, maybe the families should go along. But tell me why?

Mr. MILLER of California. There has been a constant decrease in the number of armed services since cessation of hostilities in Korea. There has been a constant cut. The ceiling under the Universal Military Training Act is 2,500,000. We have decreased it.

We presently have 2.8 million men. We have reached that point from the peak of over 5 million. Now, the several branches of the armed services, under the direction of the Joint Chiefs of Staff, with the consent of the President and the committees of this House, find it possible to reduce and will continue to reduce the number of people in the armed services, but it has to be done in an orderly manner. If we do not pass this bill, it will force by January 31 a reduction of 800,000 or 795,000, almost 40 percent of the present strength of the armed services. And I am sure that you could not efficiently reduce the armed services in a month and a half by that time. On the other hand, it is necessary that we keep the present posture of defense until people in high places are in a position to tell us that we can in an orderly manner reduce it. There is nothing in the bill that requires them to stay at 2.8 million, and I join the gentleman in the hope that we can soon, in an orderly way, even go below that. We are asking for the extension of the law for 2 years, when it can again be examined.

Mr. HOFFMAN. Well, now, all right. That sounds reasonable enough.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. VINSON. Mr. Chairman, I yield the gentleman an additional 5 minutes.

Mr. HOFFMAN. Let me repeat, that sounds all right and reasonable enough, but this is the point I am trying to get at. I am trying to get some information. Over the last 10 or 15 years or more we have been sending billions abroad to buy friendship, to induce the people to fight the battles in which we might be interested—that is, the theory is that they will do the fighting and we will get out of it or will not need to do it—because of those appropriations, and we have been following that policy until billions and billions of dollars have gone abroad. Now, has that not lessened our need for a large armed force, or have we wasted that money? One or the other must be true.

Mr. MILLER of California. If you ask me that question, I would say to get that evaluation you will have to go to your Secretary of State and some of the other people involved.

Mr. HOFFMAN. Oh, the Secretary of State is not home enough. I cannot see him. He is away most of the time.

Mr. MILLER of California. He is your Secretary of State.

Mr. HOFFMAN. No, no, he is not my Secretary of State. I do not have any.

Mr. MILLER of California. I cannot take the responsibility of apologizing for him. That is his responsibility.

Mr. HOFFMAN. Just a moment.

Mr. MILLER of California. The gentleman asked me a question.

Mr. HOFFMAN. But you are not answering. You are talking about the Secretary of State. I am not asking about his views. I am asking about your reasons as to why, after all these expenditures abroad, we still must have the same number of men.

Mr. MILLER of California. I misunderstood the gentleman. I thought he asked me if by reason of the expenditures on the military assistance we have made abroad it made it possible to reduce the armed services. I am stating that through the Security Council and the Secretary of State and others we will have to evaluate it. You can evaluate it here in Congress when bills for that sort of thing come up. We are concerned with the military side of our defense. We are concerned with having a Military Establishment of 2.8 million people, which the Committee on Armed Services is satisfied is a reasonable force to keep in being at this particular time.

Mr. HOFFMAN. All right.

Mr. MILLER of California. We are concerned with the orderly reduction of it. Now, those are the facts. The other things are collateral. I wish that I could answer the gentleman's question, but he has been here longer than any of us, and he knows all of these facts himself.

Mr. HOFFMAN. Then, if I understand the gentleman's statement correctly—and I thank him for it—it amounts to this, that we should have a reduction in the armed services but that the law must be extended for 2 years so that they can make an orderly reduction. Is that what it amounts to?

Mr. MILLER of California. I said if there is a reduction, it must be an orderly reduction. Now, from time to time the whole matter is evaluated; it is continuously being studied, and it can be reduced. I am not going to say that it should be reduced at this time. I say at this particular time that 2.8 million men is a modest number to have in our armed services. But that is my opinion as against that of the gentleman.

Mr. HOFFMAN. Mr. Chairman, the answer I get as a Representative and as a servant of my people, when I ask why do we need all these men in the armed services, is that the Secretary of State thinks we do, the Joint Chiefs of Staff think we do, the armed services think we do, perhaps the President thinks we should have that many, although I recall something about his saying that the number should be reduced.

The answer, then, seems to be that, in spite of the fact that we are spending all this money for foreign aid to induce other nations to take over part of the responsibility which might fall on us if we become involved in war; in spite of the fact that we are spending millions upon millions—yes, billions, I guess—for new weapons, and I am not finding any fault with that—in spite of all those things, it is still necessary for us to have 2 million-plus men in the armed services. Where are we getting, and when, if ever, will be the end? Or are we to be a nation under the military? The folks want to know why you have to have these men after those things to which I referred have been done. That is what they want to know. And it is no answer to tell them that somebody else wants it.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. HOFFMAN. I yield to the gentleman.

Mr. GROSS. I was unable to get here when this debate started, because of a committee session. I wonder if the gentleman has ascertained, with our so-called allies cutting back their troop strength, notably the British, it is incumbent upon us to maintain our strength or perhaps increase our strength in Western Europe?

Mr. HOFFMAN. The only answer, apparently, I can get to the situation is that under this new philosophy, whatever it might be called, we have taken over, without any request so far as I know, the obligation to tell the whole world—they call them free nations and free people sometimes—that they should think and do what we think is for their best interest and for the best interest of everyone else. That is to say, we have become the policeman of the world; not only that, but the instructor, both religious—well, I do not know whether we want to get into religion or not; perhaps I had better not insist upon that. They want the Indians to eat beef. They want the Chinese to eat wheat instead of rice. We are just trying to remake the universe. And I have never found anything in either the Ten Commandments or in the Scriptures that tells us to do that.

I cannot get from those in charge of the bill any reason why we should continue to be the only nation which has drafted citizens for, let us say, 8 years to fight the wars which someone else may cause.

Mr. MILLER of California. Mr. Chairman, I yield 10 minutes to the gentleman from Texas [Mr. KILDAY].

Mr. KILDAY. Mr. Chairman, I feel that the RECORD should indicate just exactly what we are doing here, and the purpose and necessity for it. First of all, when we are talking about military strengths, we could be talking about any one of three figures. The first would be authorized strength; second, appropriated strength, and third, actual strength.

Authorized strength represents a figure under an authorization, such as we have under any other authorization. The bill we have under consideration affects that strength, the authorized strength.

The appropriated strength is that number of men who can be maintained on active duty under the money appropriated by the Congress for that particular fiscal year.

The actual strength is that number of men who have actually been enlisted or inducted and maintained on active duty.

We have always had these three varying strengths. Of course, the appropriated strength must be within the total amount authorized, so that we cannot have more money appropriated than the number of men authorized in the authorizing legislation. Of course, the actual strength must be some number within that for which the funds have been appropriated.

We are now projecting a military program of 2,800,000 men.

The permanent law on troop strength provides for only 2,005,000, so that with 2,800,000 as the projected strength and the permanent authorization of only 2,005,000, unless we extend the present suspension of that 2,005,000 ceiling after July 1 we face a demobilization of a substantial portion of our Armed Forces.

It is not a question of what the military wants. It is not a question of what the Joint Chiefs of Staff and the Security Council or anyone else might want. Our military program is based upon the evidence developed before our Committee on Appropriations as to the number of men whom it is anticipated to maintain on active duty during the fiscal year. The recommendation from that committee comes here and we here in this House have fixed the strength of our Armed Forces at 2,800,000. We have a provision of law the suspension of which must be extended in order to prevent a partial demobilization.

Of course we all know that this program has been justified on the basis of the number of divisions in the Army that will be on active duty, 17, I believe, is the fiscal 1958 figure. We have formulated a program as to the number of wings in the Air Force that shall be maintained. We have been attempting to get the 142 wings into 137 and now back to 128 wings.

The necessity for suspending this limitation is that we must maintain that force which is now in being and that we have worked for years in order to reach. As to whether the treaties and agreements we have with foreign nations would permit us to reduce at this time, I know of no reason why we should expect that. Remember that at the end of hostilities in Korea we had on active duty approximately 3,400,000 men. We are now down to 2,800,000. You ask me about reducing below 2,800,000. I think it would be just as reasonable as for me to ask you to tell me how many more men we would have to have on active duty if we did not have the NATO forces or any of the other agreements we have with foreign nations.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. KILDAY. I yield to the gentleman from Iowa.

Mr. GROSS. The gentleman has mentioned South Korea. South Korea was a United Nations action, was it not? That is, it was declared to the world as being a United Nations action?

Mr. KILDAY. That is true.

Mr. GROSS. There is a United Nations armistice in effect.

Mr. KILDAY. Yes.

Mr. GROSS. It is a military armistice. Will the gentleman tell us the troop strength of the United Nations in South Korea other than the South Koreans and the United States?

Mr. KILDAY. I do not know what the troop strength may be of other nations in Korea. I do not know what their troop

strength may be in NATO or SEATO or anywhere else. What I think I do know is that 2,800,000 Americans in the Armed Forces is the minimum required for our own safety, and that is the only figure in which I am interested. I am not willing to risk disaster or defeat because some other nation with which we have an agreement is not doing its full part. I am concerned with the interest and the welfare of the United States alone.

Our military leaders have submitted to this Congress and this Congress has confirmed an Armed Forces strength of 2,800,000 as the minimum for our own safety. This bill permits us to maintain after July 1957, 2,800,000, rather than dropping back to 2,005,000. I am supporting this bill which permits us to maintain what the Congress has found to be the minimum necessary for our present safety. This is the purpose of the bill, and I hope it passes.

The CHAIRMAN. If there are no further requests for time, the Clerk will read.

The Clerk read as follows:

Be it enacted, etc., That section 1 of the act of August 3, 1950, chapter 537, as amended (68 Stat. 27), is further amended by striking out the words "July 31, 1957" and inserting the words "July 1, 1959" in place thereof.

Mr. SHEEHAN. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I am not posing as a military authority. I am not a member of the Committee on Armed Services. I have very little knowledge of the exact military requirements of the United States, but I would like to address myself to the Members of the House in posing some questions that arise in my mind on this bill. I have read extensively—I know what is happening from reading the newspaper reports and from the magazine reports and so on. There arises in my mind some questions as to why we need 2,800,000 men. First of all, it is my opinion from reading many of the scientific journals—and we are told today that the atom capabilities now have been developed to the point where they can be reduced, and carried in a missile the size of a thimble. In other words, our field equipment is such that atom war shells can be delivered with firing equipment of very small caliber. You do not need an airplane to drop it. It can be fired by a cannon, I understand now, as small as 75 millimeters. If that is so, in the event of a future war, no country would permit a great number of men to be gathered together because it would be signing their death warrants. It seems to me from all that I have read that there is the question involved of maintaining the number of wings of fighter airplanes. Our latest B–58 bombers, if my memory is correct, are capable of flying over 1,000 miles an hour. I understand we have a very few jet fighters that are capable of that speed.

There is no reason why we should be wedded to any concept of military forces or strategy because of what has happened in the past. It seems to me, and I do not know the answer, that any large force required by this country would be required only in the event we needed an occupation force and that any war with any prospective enemy would be based on an atom war in which missiles would be the primary force used. And, if, and when, such a war were completed, occupation forces would be needed to occupy the other country. Then, it seems to me, would be the time when a large manpower force would be required. It has been stated that we had 3,400,000 men during the Korean police action. Whether they were United Nations forces or not, we supplied the greater number of them. Here we are technically at peace with all of this modern equipment and modern atom missiles, and we still have 2,800,000 men on hand, or at least being asked for. It seems to me that somewhere along the line, we should revise our thinking. We are also adequately informed and know that any future war would be, as I said before, fought primarily with guided missiles and atom warheads and men would be needed merely as occupational men. We are training today, and I understand with the 6 months' military training program being practically oversubscribed, we would at all times be able after a war of some duration, be it long or short, to train military men as occupational people—assuming, of course, that we win the war. With that thought in mind, certainly it does not make sense to teach a lot of men how to handle rifles and things like that when our main concern will be military policing and occupational men versed in government.

So it would seem to me, from the knowledge we have before us in this country that great and serious questions arise as they do arise in my mind as to why such a huge force is necessary. I do not think as Representatives in the Congress of the United States that we can blindly agree with everything that the Committee on Armed Services and the military men tell us because most of us go on the general assumption, and as we know the military men operate—they always want more than enough. If the taxpayers are to get any protection, and if we are to look at our common defense needs from a practical standpoint, certainly we should analyze this question of such a tremendous manpower pool which the military is keeping unto themselves.

Mr. GROSS. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, like the gentleman from Illinois [Mr. SHEEHAN], I pose as no expert in any sense on military matters, but I am very much concerned about what we are doing over this world, and what a lot of other people apparently are not doing.

A few minutes ago I raised the question of the troop strength in South Korea, which is supposed to be a joint action, that is, a United Nations action. As far as I know, and beyond the United States, there are no foreign troops in South Korea, except perhaps some gold braid representing other countries. Our so-called allies and friends are still conspicuous by their absence in South Korea. It is my understanding that we have two or more full divisions in South Korea. My question, which I would like to have answered, is why these other nations are not contributing, so that we can withdraw or at least cut down our troop strength there?

Since there is no answer to that question, let us take a look at NATO. I recall a joint meeting of Congress in the Library of Congress back in 1951 when the then General Eisenhower addressed Members of the House and Senate. If I remember correctly, at that time he talked in terms of the necessity of about 90 divisions to throw up a shield against communism in Western Europe; in the NATO force which was then to be established. Nothing approaching 90 divisions was ever obtained.

A short time ago the new Supreme Commander of NATO, according to the newspapers, said that the much smaller force could still be substantially reduced by virtue of the new weapons that had been developed. But the United States is still maintaining 5 divisions, at least that is my understanding, 5 divisions in NATO, with the British cutting down their troop strength and the French practically completely out of NATO; so that we carry the entire load.

The question I ask is "Why?" I think some member of the Committee on Military Affairs ought to be able to give me some of the answers as to why all of these other countries cut down on their troop commitments and yet we maintain or increase our troop strength overseas. To that and previous questions all I get is silence.

Mr. Chairman, I yield back the remainder of my time.

Mr. MILLER of California. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. Under the rule, the Committee will rise.

Accordingly the Committee rose; and Mr. MCCORMACK having assumed the Chair as Speaker pro tempore, Mr. BASS of Tennessee, Chairman of the Committee of the Whole House on the state of the Union, reported that that Committee having had under consideration the bill (H. R. 7143) to amend the act of August 3, 1950, as amended, to continue in effect the provisions relating to the authorized personnel strengths of the Armed Forces, pursuant to House Resolution 257, he reported the same back to the House.

The SPEAKER pro tempore (Mr. MCCORMACK). Under the rule, the previous question is ordered.

The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The bill was passed.

Without objection, a motion to reconsider was laid on the table.

AMENDING THE MILITARY TRAINING AND SERVICE ACT

Mr. KILDAY. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 6548) to amend the Universal Military Training and Service Act, as amended, as regards persons in

the medical, dental, and allied specialist categories.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H. R. 6548 with Mr. BASS of Tennessee in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule the gentleman from Texas [Mr. KILDAY] will be recognized for 1 hour and the gentleman from Illinois [Mr. ARENDS] for 1 hour.

The gentleman from Texas is recognized.

Mr. KILDAY. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, since 1950 we have had on the books a special doctors and dentists draft law. Under the provisions of that law doctors, dentists, and allied specialists are subject to induction because of their professions, and they are subject to induction up to a maximum age of 46 years.

The special doctors and dentists draft act will expire by its terms July 1, 1957. It is not proposed to extend or attempt to extend the special doctors and dentists draft law which will expire on July 1, 1957.

After July 1, 1957, doctors, dentists, and allied medical specialists will be subject to induction the same as any other individual. They will come within the provisions of the general Universal Training and Service Act, and they are subject to induction in exactly the same manner as everyone else. That, of course, will mean that should there be any doctors 26 years of age or under who have not discharged their military obligations they would be subject to induction the same as any other young man 26 years of age or younger.

In addition there has been on the books since about 1951 a provision that any person who is deferred from military service because of his occupation, whether it be as a student or in a critical industry, or for any other reason, shall remain liable to induction until age 35 rather than 26 as is the case of those who have not had any deferment.

Therefore, after July 1, 1957, doctors, dentists, and allied specialists will be subject to induction the same as anyone else. There are, of course, a good many young men coming out of our colleges and universities who have been deferred in order to complete their college course, or in order to complete a course in engineering, or law, the sciences, dentistry, medicine, and things of that kind. They all have the same obligation and they are subject to induction until the same age.

However, under the basic law you cannot call men in any category other than a category as to ages. Therefore, in order to secure the doctors and dentists which we must have for the armed services we would be required to induct all others within the same age category and we would be inducting some people who were not wanted because they were not needed at the time. We would have to take many thousands of men in order to secure the relatively few doctors and dentists that are needed. Therefore, this bill does nothing other than to provide that physicians, dentists, and allied specialists in the medical field may be called for induction. Actually, it is not anticipated that a single one will be inducted. As a matter of fact, they will all be permitted to apply for and will receive commissions in the Medical and Dental Corps of the various military departments.

There is an element of discrimination here in that they are going to be called when other young men in their same age brackets are not called. That may be somewhat discriminatory. However, the young lawyer, for instance, who is coming out of college and is subject to induction can anticipate being inducted as a recruit and progressing gradually to private, then to private first class. In other words, he can anticipate entering the Army and beginning his service at $78 per month. The physician who goes on active duty will be immediately commissioned as a captain and will be entitled to special pay because he is a physician. If he has dependents his minimum pay will be $624.88 per month. If he does not have dependents his minimum pay will be $607.78 per month. The dentist going on active duty will serve for 1 year as a first lieutenant, at the end of which time he will be eligible for promotion to captain. So that the dentist going on active duty who has dependents would draw a minimum of $577.48 per month. If he does not have dependents he will draw $560.38 per month. The slight discrimination against requiring him to go in because of his profession is counterbalanced by the amount of compensation he receives, and the rank he receives when he enters the service.

This bill has been endorsed by the American Medical Association and the American Dental Association. They take the position, as has the Assistant Secretary of Defense for Health and Medicine, that there is an element of compulsion necessary to motivate young doctors who are completing their education to enter the military service and to enter it without delay.

We have at the present time, as to dentists, a ratio in the service of 2 dentists for 1,000 men in our military service. It will be necessary to call 1,100 dentists during the fiscal year 1958 and 1,600 in the fiscal year 1959.

As to physicians the ratio is 3 physicians per 1,000 troop strength. There will be available in the pool approximately 3,542 physicians in the fiscal year 1958 who will be eligible for commissions and for involuntary call to active duty under the terms of this bill. From this number we expect to call approximately 1,400. In the fiscal year 1959 the physician pool will increase to 4,087 and, as I have stated, we will need 1,700. Among the dentists we will need 1,100 out of the approximately 1,478 available in 1958 and 1,600 out of the available pool of 2,020 in the fiscal year 1959.

The vast majority of these will be young men who are just completing their medical education and instead of going into private practice and beginning practicing in their communities they will serve for a perod of time in the military service, so that there is no interference or disruption in the medical care of the civilian population.

Mr. TEAGUE of California. Mr. Chairman, will the gentleman yield?

Mr. KILDAY. I yield to the gentleman from California.

Mr. TEAGUE of California. I am interested as to whether the committee has considered extending this same principle tc graduate engineers.

Mr. KILDAY. No. That question by itself, has not been considered by the committee. The gentleman will probably recall that this special draft legislation had its inception about 1950 when the Korean incident arose. We found ourselves in a critical condition as far as physicians were concerned. At that time we had a very large pool of young doctors and dentists who had been educated either in whole or in part at Government expense. They had been so educated during World War II. Some were deferred and permitted to remain in medical school. A great many were in the ASTP program where they drew their full compensation in the rank in which they were serving, and the only duty they were assigned to was as a student in a medical school. During the hearings I asked two questions: Do you remember how many doctors were in the pool who received assistance prior to graduation and also as to the number who had accepted Reserve commissions. There were 7,500 of those young men who had received their medical education (as well as other Government assistance) while other men had been fighting. When Korea began there were 33 who had entered the medical reserve corps of the various services, so that in 1950, when we found this critical shortage of medical personnel, we had a pool of young men who everybody believed owed a little bit of service to the United States. So, in its inception, the Doctors Draft Act had a very strong foundation in equity behind it, and we secured the services of young men who I imagine we thought would have been almost 100 percent in the reserve corps, and we found that out of 7,500 only 33 were in the Reserve and therefore subject to call. So, I do not believe we have the same position in equity for these young engineers who have received no assistance from the Government. So far as I know, we are doing pretty well as far as engineering personnel is concerned.

Mr. TEAGUE of California. I thank the gentleman.

Mr. COLLIER. Mr. Chairman, will the gentleman yield?

Mr. KILDAY. I yield to the gentleman from Illinois.

Mr. COLLIER. Did I understand the gentleman to say that there were at the present time two dentists for each 1,000 military personnel, or roughly that?

Mr. KILDAY. That is the ratio, yes.

Mr. COLLIER. Basically, are those dentists used to treat military personnel at the present time?

Mr. KILDAY. Yes. At the present time they would be used exclusively for military personnel. Bear in mind that on December 7, 1956, the new Medical

Care Act went into effect. Prior to that time dental care was available to members of the Army and the Air Force in military hospitals but not available to dependents of Navy and Marine Corps personnel in Navy hospitals. The Medical Care Act withdrew it from all, so now the dentists on active duty are treating military personnel and some few retired personnel.

Mr. COLLIER. Is it not true, though, at the present time, there are dentists and doctors in various parts of the globe, as a matter of fact in Germany at the present time, whose services are rendered almost entirely to civilian personnel or civilians of those countries?

Mr. KILDAY. I will have to amend my statement of a while ago. Dental care is given to dependents outside the continental limits of the United States and in very limited remote areas in the United States, and that will be necessary. You cannot very well send a man overseas and permit him to take his family and not provide dental care for that family. I do not know of any situation in which they are taking care of German citizens which is what I understood the gentleman to indicate.

Mr. COLLIER. I will say to the gentleman that I have a letter from one of my constituents who is a dentist, who is with a medical detachment in Germany, who has informed me that by and large most of the patients that he has treated were German civilians, in no way attached to the families of military personnel.

Mr. KILDAY. I am sure the committee would be glad to get the information, without revealing the dentist's name, so that we may examine into it. I suppose there may be some German civilians working for our military forces who are entitled to such care; but I believe we should be informed on that, and I would appreciate it personally if the gentleman made that information available to the committee.

Mr. Chairman, the question of the number of dentists and doctors in the service is always a rather troublesome thing. This does nothing with reference to the ratio. The ratio is fixed by permanent law of a long time ago, but for quite a long period of time the ratio of dentists to troop strength has been 2 per thousand, and for some time the ratio of physicians has been 3 per thousand of troop strength. This has no effect one way or the other on that. It is true there was a statement that they anticipated going to a higher ratio, and the committee in its report has stated that it does not feel, as long as there is any degree of compulsion on physicians and dentists, that that ratio should be changed. That is reflected in our report.

Mr. Chairman, I believe I have covered all there is in the bill. I feel it should be adopted.

Mr. BRAY. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, I think the matter has been very adequately explained by the gentleman from Texas [Mr. KILDAY].

Two years ago the committee was very interested in eliminating the doctors' draft as soon as possible, feeling that there was a certain amount of discrimination against doctors. That has been very adequately explained also by the previous speaker. We thought at that time that it might be possible entirely to eliminate this by this time, but we found it could not quite be accomplished, although this legislation almost eliminates what we call the doctors' draft.

I want to explain the reason why I state that. It says that no one born prior to June 20, 1925, will be affected by this draft, which means that this year no on beyond the age of 32 will be drafted, and at the end of this time that this bill extends the doctors' draft no one beyond the age of 34, will be drafted and then only those who have been presently deferred that is except those under 26 who would be subject to the general draft.

This is discriminatory legislation to a certain degree. But it is necessary that we have an adequate number of doctors and dentists for the Armed Forces.

In 1950, when this bill was first passed, they were allowed to draft doctors and dentists up to the age of 50, which did cause a great deal of hardship in many communities where doctors had been practicing for many years. Each time the matter came before the committee the age has been lowered. Now no one will be drafted under this bill at any time over the age of 34. The Medical Department of the armed services wanted to increase the number of doctors to 3.4 for each thousand and gave considerable reason for that. The committee was very much opposed to that. That is not in the bill, but in the report it is indicated that the committee is opposed to increasing the percentage of doctors beyond the 3 per thousand, which ratio has been in existence for some time.

I believe the dental force was left at 2 per thousand, which ratio has been in existence for a long time.

As stated earlier, we trust that it will not be necessary to extend this law in the future unless there is some emergency unforeseen at this time.

The CHAIRMAN. Under the rule, the substitute amendment recommended by the Committee on Armed Services, now in the bill, for the purpose of amendment shall be considered as an original bill. The Clerk will read the committee substitute.

The Clerk read as follows:

That section 4 (a) of the Universal Military Training and Service Act (50 U. S. C. App. 454 (a)) is amended by inserting the following new paragraph before the last paragraph thereof:

"No person in the medical, dental, and allied specialist categories shall be inducted under the provisions of this subsection if he applies or has applied for an appointment as a Reserve officer in one of the Armed Forces in any of such categories and is or has been rejected for such appointment on the sole ground of a physical disqualification."

SEC. 2. Section 4, Universal Military Training and Service Act, as amended (50 U. S. C. App. 454), is amended by adding the following new subsection at the end thereof:

"(1) (1) Subject to section 2 of this title, the President may order to active duty (other than for training), as defined in section 101 (22) of title 10, United States Code, for a period of not more than 24 consecutive months, with or without his consent, any member of a Reserve component of the Armed Forces of the United States who is in a medical, dental, or allied specialist category, who has not attained the 35th anniversary of the date of his birth, and has not performed at least 1 year of active duty (other than for training). This subsection does not affect or limit the authority to order members of the Reserve components to active duty contained in section 672 of title 10, United States Code.

"(2) For the purposes of computation of the periods of active duty (other than for training) referred to in subsection (1), credit shall be given for all periods of 1 day or more performed under competent orders, except that no credit shall be allowed for periods spent in student programs prior to receipt of the appropriate professional degree or in intern training.

"(3) Any person who is called or ordered to active duty (other than for training) from a Reserve component of the Armed Forces of the United States after September 5, 1950, and thereafter serves on active duty (other than for training) as a medical, dental, or allied specialist for a period of 12 months or more shall, upon release from active duty or within 6 months thereafter, be afforded an opportunity to resign his commission from the Reserve component of which he is a member unless he is otherwise obligated to serve on active military training and service in the Armed Forces or in training in a Reserve component by law or contract.

"(4) Any physician or dentist who meets the qualifications for a Reserve commission in the respective military departments shall, so long as there is a need for the services of such a physician or dentist, be afforded an opportunity to volunteer for a period of active duty (other than for training) of not less than 24 months. Any physician or dentist who so volunteers his service, and meets the qualifications for a Reserve commission shall be ordered to active duty (other than for training) for not less than 24 months, notwithstanding the grade or rank to which such physician or dentist is entitled."

Mr. KILDAY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Page 4, line 16, strike out "Subject to section 2 of this title, the" and insert in lieu thereof "The."

Mr. KILDAY. Mr. Chairman, this is a technical amendment. Section 2 of the Universal Military Training and Service Act deals with limitations on the Armed Forces which are now under suspension and will under other legislation be suspended until July 1, 1957. It is purely a technical amendment.

The CHAIRMAN. The question is on the amendment.

The amendment was agreed to.

Mr. KILDAY. Mr. Chairman, I ask unanimous consent that the further reading of the committee substitute be dispensed with and that it be open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The remainder of the committee substitute is as follows:

SEC. 3. Section 4 (j), Universal Military Training and Service Act, as amended (50 U. S. C. App. 454 (j)), is reenacted with the following amendments:

(A) Strike out the words "as referred to in subsection (1)" in the first sentence; and

(B) Strike out "fifty-first" and insert "thirty-fifth" in the last sentence of the second paragraph.

SEC. 4. Section 5 (a) of the Universal Military Training and Service Act (50 U. S. C. App. 455 (a)) is amended by striking out the third proviso and inserting the following in place thereof: *"Provided further,* That nothing herein shall be construed to prohibit the President, under such rules and regulations as he may prescribe, from providing for the selection or induction of persons by age group or groups or from providing for the selection or induction of persons qualified in needed medical, dental, or allied specialist categories pursuant to requisitions submitted by the Secretary of Defense: *And provided further,* That, notwithstanding any other provision of law, except section 314 of the Immigration and Nationality Act (8 U. S. C. 1425), no person who is qualified in a needed medical, dental, or allied specialist category, and who is liable for induction under section 4 of this title, shall be held to be ineligible for appointment as a commissioned officer of an Armed Force of the United States on the sole ground that he is not a citizen of the United States or has not made a declaration of intent to become a citizen thereof, and any such person who is not a citizen of the United States and who is appointed as a commissioned officer may, in lieu of the oath prescribed by section 1757 of the Revised Statutes, as amended (5 U. S. C. 16), take such oath of service and obedience as the Secretary of Defense may prescribe."

SEC. 5. Section 5 of the Universal Military Training and Service Act (50 U. S. C. App. 455) is amended by adding the following new subsection at the end thereof:

"(c) Notwithstanding any other provision of law, any qualified person who—

"(1) is liable for induction; or

"(2) as a member of a Reserve component is ordered to active duty,

as a physician, or dentist, or in an allied specialist category in the Armed Forces of the United States, shall, under regulations prescribed by the President, be appointed, reappointed, or promoted to such grade or rank as may be commensurate with his professional education, experience, or ability: *Provided,* That any person in a needed medical, dental, or allied specialist category who fails to qualify for, or who does not accept, a commission, or whose commission has been terminated, may be used in his professional capacity in an enlisted grade."

SEC. 6. Section 6 (b), Universal Military Training and Service Act, as amended (50 U. S. C. App. 456 (b)), is amended by adding at the end of paragraph (5) the following new clause:

"(E) periods of active duty performed by medical, dental, or allied specialists in student programs prior to receipt of the appropriate professional degree or in intern training."

"SEC. 7. Section 6 (d), Universal Military Training and Service Act, as amended (50 U. S. C. app. 454), is amended by adding the following new subsection at the end thereof:

"(4) It is the sense of the Congress that the President shall provide for the annual deferment from training and service under this title of the numbers of optometry students and premedical, preosteopathic, preveterinary, preoptometry, and predental students at least equal to the numbers of male optometry, premedical, preosteopathic, preveterinary, preoptometry, and predental students at colleges and universities in the United States at the present levels as determined by the Director herein."

SEC. 8. Section 7 of the act of September 9, 1950, chapter 939 (64 Stat. 826), as amended, is amended to read as follows:

"SEC. 7. This act, except for section 3 and section 5, terminates at the close of June 30, 1957."

SEC. 9. This act takes effect July 1, 1957, and shall terminate on July 1, 1959.

Mr. GROSS. Mr. Chairman, I move to strike out the last word, and ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. GROSS. Mr. Chairman, I take this time to call attention to the fact that this legislation, as well as the preceding legislation, is made necessary in part by the fact that our so-called allies overseas are failing to carry their share of the load.

I call to your attention the speech made in April 1957 to the British Parliament by the Right Honorable Duncan Sandys, Defense Minister of Great Britain, who said, in one of his recommendations with respect to the military of Great Britain:

> The Government has accordingly decided to plan on the basis that there will be no further call-up under the National Service Acts after the end of 1960.

Those acts refer to compulsory military training.

That is how Britain proposes to discharge her obligations to the rest of the world; to end all conscription, drastically cut military manpower and spending for that purpose.

I want to say here and now that increasingly, if I am permitted to sit in this Congress, I am going to oppose these extensions of our troop ceilings, extensions of drafts, and so forth. If foreign nations have not the will to take care of themselves, they who are more vulnerable to attack than we are, if they have not the will to provide the manpower, the troops, and so forth, to take care of themselves; to make their fair share of the contribution to their own defense, then it is about time that we in this country call a halt to sending troops over there.

A moment ago a question was raised about dental care for the dependents of servicemen overseas. We would not have nearly as many dependents overseas and there would not be the requirement for professional people in the Armed Services if foreign countries were contributing their fair share of military manpower. I am going to be increasingly unwilling to saddle upon the youth of America and the taxpayers of America the responsibilities and costs that foreign countries ought to be assuming themselves.

How much longer are we going to be duped by these foreign governments and some of our own people?

The CHAIRMAN. The question is on the committee amendment, as amended.

The committee amendment was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly, the Committee rose and the Speaker pro tempore [Mr. McCORMACK] having resumed the Chair, Mr. BASS of Tennessee, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill (H. R. 6543) to amend the Universal Military Training and Services Act, as amended, as regards persons in the medical, dental, and allied specialist categories, pursuant to House Resolution 256, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time and was read a third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The bill was passed.

The SPEAKER pro tempore. Without objection, a motion to reconsider will be laid on the table.

O. MAX GARDNER AND CLYDE ROARK HOEY

Mr. KILDAY. Mr. Speaker, I ask unanimous consent that the gentleman from North Carolina [Mr. WHITENER] may extend his remarks at this point.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. WHITENER. Mr. Speaker, in the hall of the house of representatives in Raleigh, N. C., tonight portraits of two of the late distinguished residents of the 11th Congressional District of North Carolina will be unveiled. These portraits are being presented to the State of North Carolina by the respective families of the late O. Max Gardner and the late Clyde Roark Hoey.

These distinguished men rendered service to their State and Nation which I believe is unsurpassed by any two residents of any one Congressional district. Each of them was the recipient of great trust by their people. Neither of them ever faltered in the performance of those trusts.

O. Max Gardner attended what is now known as North Carolina State College and was later graduated from the University of North Carolina. In 1908 he was selected by the late Josephus Daniels as State organizer of the Young Men's Democratic Clubs of North Carolina. In 1910 he was elected to the State senate where he served again in 1914 and 1915. In 1916 he was nominated and elected as lieutenant governor of North Carolina. Because of his excellent performance of duty in that position he was elected in 1928 as governor of our State.

Under his administration as governor many governmental reforms were instituted which are today adhered to in the State of North Carolina.

Upon the completion of his service as Governor, O. Max Gardner established a law office in Washington, D. C. He was eminently successful and was regarded as one of the outstanding lawyers in the Nation's Capital.

On many occasions Governor Gardner was called upon by President Franklin D. Roosevelt to render service to the Federal Government. In 1946 he was named by

President Truman as Under Secretary of the Treasury, where he served until he was designated by President Truman to become Ambassador to the Court of Saint James's.

As Governor Gardner was about to depart from the port of New York to assume this important role in world affairs, he was stricken by death and this Nation was deprived of the great service and leadership which he would have given in that high post.

He was always active in public affairs, but I think that his philanthropic pursuits and his desire to be of service to his fellow man and to the Baptist Church, which he loved so much, even transcended his public service.

Many of you knew the late Senator Clyde R. Hoey. He was a kindly, Christian man whose service in many capacities in Government always received the plaudits and approval of a majority of the people of his State.

Senator Hoey was an outstanding Methodist layman. He was always alert to take advantage of the opportunity to practice and preach the basic fundamentals of Christian living.

He attended the public schools and was graduated from the law department of the University of North Carolina. While studying law he was editor and publisher of the Cleveland Star and maintained his interest in newspaper work for some time after taking up the active practice of the law.

His many talents and his capacity for hard work soon caused the members of the public and of the bar to recognize him as one of the outstanding attorneys of our State.

While still a young man, he was elected and served for two terms in the State house of representatives. In 1902 he was elected and served a term as a member of the State senate. Therefore, in 1913 he became Assistant United States Attorney for the Western District of North Carolina where he served with great ability for 6 years.

When the late Edwin Y. Webb retired from Congress in 1919 Senator Hoey succeeded him and served only one term, declining to be a candidate for renomination in 1920.

Until 1936 Senator Hoey engaged in the private practice of law and appeared in many of the most renowned cases in the annals of the courts of North Carolina. In that year he was elected to serve as Governor of the State of North Carolina. For the next 4 years his leadership brought about many progressive steps in the advancement of the economy and the government of the Tar Heel State. He was perhaps the most popular Governor who has served North Carolina in modern times, and it was said that there were few, if any, schoolhouses in North Carolina in which he did not speak at one time or the other during his service as Governor.

In 1944 Senator Hoey commenced his service in the United States Senate where he continued to serve until his death on May 12, 1954.

His service in the Senate reflected great credit upon North Carolina and upon the Congressional district which I am privileged to represent at this time.

Mr. Speaker, while these two good men departed this world some time ago, the memory of their respective services to the people will remain indelibly carved upon the minds of all who were privileged to know them or to become familiar with their records of service.

I am delighted that I shall be privileged to attend the ceremonies in their honor tonight in our State capital at Raleigh and to join with many friends of these deceased leaders in paying tribute to their lives and their works. I commend their families upon their generosity in presenting to the State of North Carolina the portraits of their distinguished kinsmen.

JUDGES OF CIRCUIT AND DISTRICT COURTS

Mr. CELLER. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 985) to provide that chief judges of circuits and district courts shall cease to serve as such upon reaching the age of 70.

The SPEAKER pro tempore. The question is on the motion of the gentleman from New York [Mr. CELLER].

The motion was agreed to.

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 985) to provide that chief judges of circuits and district courts shall cease to serve as such upon reaching the age of 70, with Mr. BASS, of Tennessee, in the Chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

Mr. O'HARA of Illinois. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. [After counting.] Seventy-eight Members are present, not a quorum. The Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 82]

Albert	Engle	Morano
Allen, Calif.	Garmatz	Murray
Andresen, August H.	Gordon	Norrell
	Gray	Passman
Ashley	Green, Pa.	Patman
Ayres	Gubser	Patterson
Bailey	Hemphill	Pilcher
Barden	Hillings	Polk
Baring	Hoeven	Powell
Barrett	Holifield	Prouty
Betts	Holland	Reece, Tenn.
Bowler	Holtzman	Robsion, Ky.
Breeding	James	Rogers, Mass.
Burdick	Jenkins	Saylor
Byrd	Johansen,	Scherer
Canfield	Kearney	Schwengel
Cannon	Kearns	Siler
Carnahan	Kelley, Pa.	Steed
Carrigg	Kelly, N. Y.	Sullivan
Chelf	Kitchin	Taylor
Chenoweth	Kluczynski	Tollefson
Chiperfield	LeCompte	Vanik
Coad	Lennon	Westland
Cooley	Lipscomb	Widnall
Coudert	McGovern	Wilson, Ind.
Davis, Tenn.	McIntire	Wolverton
Dawson, Ill	Machrowicz	Zelenko
Eberharter	Miller, Md.	

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. Bass of Tennessee, Chairman of the Committee of the Whole House on the state of the Union, reported that that Committee having had under consideration the bill H. R. 985, and finding itself without a quorum, he had directed the roll to be called when 341 Members responded to their names, a quorum, and he submitted herewith the names of the absentees to be spread upon the Journal.

The Committee resumed its sitting.

Mr. CELLER. Mr. Chairman, I yield such time as he may consume to the gentleman from Ohio [Mr. BROWN].

Mr. BROWN of Ohio. Mr. Chairman, I appreciate very much the courtesy of the gentleman from New York [Mr. CELLER] in granting me this time to announce to the House the death of Walker S. Buel, the political correspondent for the Cleveland Plain Dealer here in Washington for the past 37 years.

Mr. Buel, who was well known to most Members of this House, died in a local hospital at 11:55 this morning, after a very short illness.

He was truly one of the great newspapermen of America. He was recognized by all newspaper people as perhaps the outstanding political reporter serving in the press galleries here in Washington.

It has been my pleasure and my privilege to have had the friendship and the companionship of Mr. Buel for more than 40 years. He was well known; especially well known to all of the Ohio delegation. For many years he was the ranking member of the Gridiron Club here in Washington, and was the author of most of the wonderful sketches which enlightened and gave enjoyment to all those who attended the famous Gridiron dinners during the past few decades. Known as "Mr. Gridiron" the passing of Mr. Buel has been an especial loss to that great organization.

Mrs. BOLTON. Mr. Chairman, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentlewoman from Ohio [Mrs. BOLTON].

Mrs. BOLTON. Mr. Chairman, we who make our homes in Cleveland, where the Plain Dealer brings us our news, are deeply saddened by the death, this noon, of one of the stalwarts of the newspaper world—Walker Buel.

His fine reporting, his ability to paint word pictures in brilliant or subdued colors, has made his column and all his writing of moment to us. Adjustment will come hard, I fear. His wit, his kindly humor, his fairness and honesty have been of far more influence than he in his modesty ever knew.

To his lovely and devoted wife and his family, go my understanding and heartfelt sympathy. And I shall hope that they may be able to feel in tune with James Martineau's prayer that—

We seem to have given him back to Thee, dear God, who gavest him to us. Yet, as Thou didst not lose him in the giving, so we have not lost him by his return. Not as the world giveth, givest Thou, O Lover of Souls! What Thou givest, Thou takest not away. For what is Thine is ours always, for we are Thine. And life is eternal; and love is immortal; and earth is only a horizon; and a horizon is nothing save the limit of our sight. Lift us up, strong Son of God, that we may see further; cleanse our eyes that we may see more clearly; draw us closer to Thyself, that we may know ourselves

nearer to our beloved who are with Thee. Prepare us for that happy place that where they are and Thou art, we may be. Amen.

Mr. MINSHALL. Mr. Chairman, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentleman from Ohio [Mr. MINSHALL].

Mr. MINSHALL. Mr. Chairman, I concur in everything that has been said here by the gentlewoman from Ohio [Mrs. BOLTON] and the gentleman from Ohio [Mr. BROWN] about my good friend, Walker Buel. Walker Buel was not only a distinguished newspaperman, a great newspaperman—he was peerless in his field. His passing will leave a great void not only in the Washington but national scene. His standard of reporting the news could well serve as a model for all—he was preeminently fair and forthright. His word was his bond, and he was always willing to give of his sound, judicious and able counsel.

I, too, should like to express my very deepest sympathy to his family.

Mr. BOW. Mr. Chairman, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentleman from Ohio [Mr. BOW].

Mr. BOW. Mr. Chairman, I should like to join my colleagues in paying tribute to Walker Buel and his great service in the newspaper field. All of us of northern Ohio will miss the very fine contributions Mr. Buel has made.

Mr. McGREGOR. Mr. Chairman, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentleman from Ohio [Mr. McGREGOR].

Mr. McGREGOR. Mr. Chairman, I want to join my colleagues in paying respects to the late Walker Buel. He was a great counselor, a guiding hand to all who believed in the principles of this great republic.

Mrs. McGregor joins me in extending our sympathy to Mrs. Buel and the family.

Mr. McCULLOCH. Mr. Chairman, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentleman from Ohio, [Mr. McCULLOCH].

Mr. McCULLOCH. Mr. Chairman, I, too, wish to join my colleagues in saying a word or two about Walker Buel. He was a great newspaperman. He wrote for a great newspaper. He will be missed not only in northern Ohio, but wherever the Plain Dealer goes all over America.

Mr. DENNISON. Mr. Chairman, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentleman from Ohio [Mr. DENNISON].

Mr. DENNISON. Mr. Chairman, I join with my colleagues on both sides of the aisle today in expressing my sadness upon the death of Walker S. Buel, head of the Washington bureau of the Cleveland Plain Dealer. Although I have only known Mr. Buel personally for a short time, I have known him by reputation for many years as an outstanding newspaperman, dedicated to reporting the facts as he saw them.

He was a part of the great tradition of fine newspaper coverage which has been the trademark of the Cleveland Plain Dealer, which he so ably represented here in Washington.

I wish to extend my deepest sympathy to Mrs. Buel and their family upon their loss.

Mr. FEIGHAN. Mr. Chairman, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentleman from Ohio.

Mr. FEIGHAN. Mr. Chairman, Walker Buel was a close friend of mine. He was a man whose warmth of personality made friends for him wherever he went. I feel a personal loss in his passing, though the loss to the public is much greater. Walker Buel in my opinion epitomized everything fine in a newspaperman. His writings and reports were always objective, honest, accurate, sincere, and unbiased. I regret indeed his passing.

Mr. HAYS of Ohio. Mr. Chairman, will the gentleman yield?

Mr. BROWN of Ohio. I yield.

Mr. HAYS of Ohio. It was a deep shock to me to hear of the death of Walker Buell. I have been reading his column for more than 20 years and have known him well for the past 9 years. He indeed was an outstanding newspaperman. As has been said, his column will be missed all over Ohio and wherever the Plain Dealer went. I would like to join those who have preceded me in expressing my deep sympathy to his family.

Mr. VORYS. Mr. Chairman, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentleman from Ohio.

Mr. VORYS. Mr. Chairman, I want to add my voice to those who have spoken in sorrow and in tribute on the passing of Walker S. Buell, my close personal friend for many years. He was an able and distinguished journalist. He understood what makes Washington tick. He was wise and witty, a delightful companion, a reliable friend. My heart goes out in sympathy to his lovely wife, his family, and his great circle of friends. We will mourn his passing, and cherish his memory through the years.

Mr. BROWN of Ohio. Mr. Chairman, I am sure every Member of this House who has known Mr. Buell joins me and those who have spoken in expressing our great regret over his passing and in extending our sympathy to his wife and family.

Mr. Chairman, I ask unanimous consent that all Members of the House be permitted to extend their remarks at this point in the RECORD on the late Walker Buell, and I again express my appreciation to the gentleman from New York [Mr. CELLER] for yielding this time.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. MARTIN. Mr. Chairman, I was very sorry to learn of the death of Walker Buel. He was an outstanding member of the Washington press corps for many years. He was not only a very able reporter; he was also honorable and fair. I considered it a privilege to have him as a friend for over 30 years. Walker Buel will be greatly missed by all who knew him. I extend my deepest sympathy to his widow and family.

Mr. BAUMHART. Mr. Chairman, when a great Washington reporter like Walker Buel passes on, we in Congress, especially those of us from the Ohio delegation who knew him so well, feel a great personal loss.

We sense that an equally great public loss is involved, too, because as perhaps few others in American life, we recognize that a well-informed and capable press is a keystone in the formation of public opinion and therefore exerts tremendous influence on the conduct of our unique American political system.

Walker Buel, whose friendship I was proud to share for nearly 30 years exemplified the highest traditions of alert, competent, and fair-minded reporting. His writings always bore an indelible mark of integrity on them and earned him universal respect throughout a career that spanned the most momentous 38 years in our Nation's history, the Wilson-to-Eisenhower era.

Anyone who knew Walker also knew that every story he ever filed represented many hours of laborious checking and rechecking. He was not content until he had uncovered all the facts of a news development and had presented those facts to his readers in the most lucid and incisive manner.

Our hearts go out to Walker's widow and two sons. We hope that the words we speak so sorrowfully today will properly convey to them the warm regard and respect we felt for their departed loved one.

Mr. VANIK. Mr. Chairman, Thursday the Washington press corps suffered the loss of one of its most popular and highly respected members, Mr. Walker S. Buel, head of the Cleveland Plain Dealer bureau in Washington for the past 37 years as well as chief Washington correspondent for the Cleveland News during the past 3 years. His death was caused by complications resulting during abdominal surgery.

Mr. Buel was born in Springfield, Ohio, on January 15, 1890, and was educated at Buchtel College and Western Reserve University. In 1912 he joined the Cleveland Plain Dealer and covered the Cleveland city hall and the statehouse in Columbus, Ohio, in 1917. In 1919 he became head of the Washington bureau of the Cleveland Plain Dealer.

Mr. Buel was elected to membership in the Gridiron Club in 1922 and served as its president in 1932 and as treasurer of the organization during the past 12 years. He was acclaimed for his many contributions to the famous Gridiron shows.

Through James C. Hagerty, White House Press Secretary, President Eisenhower expressed his regrets at losing a "very old and very dear friend." Mr. Hagerty described Mr. Buel as "truly a great gentleman and a distinguished reporter."

Following are several of the many editorials which appeared in newspapers of this country and which pay deserved tribute to this distinguished citizen:

[From the Cleveland Plain Dealer of May 24, 1957]

WALKER SHOWERS BUEL

Death comes to every man, but to some it is given that their influence will live on through the impact of their personalities on others, the opinions they molded and the

institutions they helped to build. Such is the case with Walker S. Buel, whose life was dedicated to this newspaper during more than one-third of the time it has existed. He was a part of the Plain Dealer, and the Plain Dealer was a part of him.

It is with sadness that we record his passing, but even sadness cannot exclude the memories of glorious days when he mingled with the great and the near-great and reported and interpreted momentous events in the Nation's capital for readers of this newspaper. He was on intimate terms with Presidents and Cabinet members, with Senators and Representatives, with politicians, and bureaucrats during the period which witnessed the transfer of more and more power from the State capitals to Washington and during which Washington became, for all practical purposes, the capital of the free world.

And there were days of fun, too, when, as one of the leading spirits of the famed Gridiron Club, he wrote lyrics and fashioned barbs which, always in good taste and never too harsh, deflated the egos of those in the seats of power and periodically reminded them that they were answerable to the people through the instrumentality of a free press.

We at the Plain Dealer knew him affectionately as "Sitting Buel," a nickname coined by his colleagues when he first developed the technique, which is now common practice, of utilizing the radio and television for fast coverage of Presidential campaigns and national conventions. Many a time, sitting in his compartment on a Presidential campaign train, or the workroom at a national convention, he was able to flash news of important events while his colleagues were fighting their way through crowds or waiting for packed elevators to get to telephones or wire facilities.

The reporters who worked with Walker at national conventions also knew him as "Papa Buel" and "The Good Provider," nicknames he was justifiably proud of being called. For he always saw that his associates were well taken care of in the way of lodgings and provender. But when it came time to work, there was no letdown, no relaxation, either for him or for his staff, until the paper had been put to bed and the wire had closed for the night.

The Plain Dealer is a better newspaper because of what Walker Buel put into it. That is the reward every dedicated newspaperman strives for. Regretfully we say farewell to one who achieved it.

[From the Cleveland Press of May 24, 1957]

THAT WALKER S. BUEL BYLINE WILL BE GRIEVOUSLY MISSED

To oldtimers in the newspaper business, it seems as if it were only yesterday that Walker S. Buel, a tall gangling youth, was covering the justice courts in Cleveland and cutting his eyeteeth on less important stories.

The Plain Dealer reporter had all the attributes of a good newspaperman, an inquiring mind, the faculty of making and keeping friends, the ability to put into words what he found out.

It was not surprising that Mr. Buel moved on to Columbus, where he was legislative correspondent for a couple of years, and then to Washington.

He knew all the Presidents from Warren G. Harding to Dwight Eisenhower, and was on easy terms with Senators and Congressmen. The newspaper profession loses an able craftsman with his death.

[From the Cleveland News of May 24, 1957]

WALKER S. BUEL, WASHINGTON STAR

Walker Showers Buel, chief of the Washington news bureau of this paper and the Cleveland Plain Dealer, who had served there for nearly 40 years, was a fine political editor and writer, whose death ends one of the longest careers of the kind in the Capital.

Schooled on the Plain Dealer staff starting in 1912, Mr. Buel became a political expert in print by instinct, and was the newspaper's politics reporter here and in Columbus before his Washington career. Such men as Newton D. Baker, James M. Cox, Maurice Maschke, and Vic Donahey, whose campaigns he reported in those days, became his lifelong friends and admirers. Seven Presidents of the United States knew and liked him for his great fairness, perspicacity, and warmhearted companionship. The Gridiron Club of Washington correspondents turned to him for its top wit and music for every dinner-show for more than 30 years. The Ohio-born boy who grew to national stature never lost his modesty or his kindness, and the personal sense of loss for us is considerable.

[From the Washington Evening Star of May 24, 1957]

WALKER S. BUEL

Walker S. Buel, who died yesterday at 67, was a veteran of 45 years on the staff of his distinguished newspaper, the Cleveland Plain Dealer. He was a senior, a widely known and respected member of the Washington corps of correspondents, which he joined in 1919. In his newspaper life he witnessed many changes in the personnel and practices of journalism and in the customs and attitudes of the readers to whom he reported. Yet one of the qualities which so endeared him to his colleagues and to an unusually large number of friends here and around the country was that they found so little change in Walker Buel. Disabilities of advancing age and recurring illness failed to dim a gay enthusiasm and zestful interest which kept him young. He was a shrewd and competent recorder and critic of the art of politics. He never watched its repetitive patterns through the tired eyes of a cynic; he looked forward to them as fresh adventures in reporting, new items for "my column." He had become a delightful fixture, in the columns of the newspaper he served so long and so well; in the Gridiron Club, of which he was the beloved dictator, and in the hearts of so many friends who found his courage, his loyalties and prejudices, his optimism and unyielding determination the sources of strength and comfort.

[From the Washington Post and Times Herald of May 26, 1957]

WALKER S. BUEL

Washington has lost a newspaperman who was a professional in the best sense of the word with the death on Thursday at 67 of Walker S. Buel. As a correspondent here for the Cleveland Plain Dealer since 1920, Walker Buel chronicled the politics of seven administrations with an unfailing sense of the high drama beneath the facade of everyday political maneuver. He remained unstaled by cynicism despite his long tenure, and—like every good newspaperman—he retained the enthusiasm of a cub reporter when he came upon a startling news development or a provocative item for his ably written and deservedly influential column.

Walker Buel's many friends in the National Press Club will remember him both for his almost courtly manners and his infectious humor. In a city where Potomac air sometimes puffs out the shirt and turns men into statuary prematurely, Walker Buel was in large part responsible for the success of the Gridiron Club. The satiric skits he contributed helped redress the balance in this frequently all-too-solemn Capital. A shrewd observer, a lucid writer, and a stanch friend, Walker Buel won the confidence and affection not only of men high on the pyramid of political power, but of his colleagues as well.

Mr. CELLER. Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania [Mr. WALTER], the author of the bill.

Mr. WALTER. Mr. Chairman, the measure under consideration was reported unanimously by the Committee on the Judiciary. It merely relieves the senior circuit and district court judges of the housekeeping duties connected with such positions.

I introduced a similar bill several years ago at the request of a senior circuit judge who has since retired, but this bill is recommended to the House by the Judicial Conference of the United States. All of the judges affected desire this legislation. The American Bar Association approved it at its last meeting, and some local bar associations have also. The Attorney General of the United States has recommended the bill, as has the executive committee of the Attorney General's Conference on Court Congestion and Delay in Litigation.

Certainly by no stretch of the imagination could this be considered a reflection on these elderly judges or else they would not request this legislation. This bill is here because they feel that these duties should be performed by the younger men.

It will affect in the circuits Judge Hutcheson of the Fifth Circuit, who is 77, Judge Simons of the Sixth Circuit, who is 80, Judge Gardner of the Eighth Circuit, who is 89, and Judge Denman of the Ninth Circuit, who is 84.

As far as the district court judges are concerned, the ages are comparable.

It certainly seems to me that in this day and age—when there are so many housekeeping chores—these judges ought not to be required to perform them, when you consider the fact that they all sit and have to write opinions and perform their other judicial services.

I do not know what more there is to say about this legislation. Certainly I cannot see any legitimate opposition to it.

Mr. FEIGHAN. Mr. Chairman, will the gentleman yield?

Mr. WALTER. I yield to the gentleman from Ohio.

Mr. FEIGHAN. I congratulate the gentleman on his very explicit explanation of this bill, but it seems to me reasonable that the age limitation be reduced to 70, so that undue burdens would not be placed upon these elderly distinguished jurists.

Mr. WALTER. I strongly suspect that within a very short time there will be an attempt made to amend the bill, because actually, as the gentleman well knows, there were two judges who did not want to be relieved of these duties because they felt that by so doing perhaps some of the patronage that they enjoyed might be interfered with. That was the reason the age was changed from 70 to 75.

Mr. LONG. Mr. Chairman, will the gentleman yield?

Mr. WALTER. I yield.

Mr. LONG. This does not provide for compulsory retirement; does it?

Mr. WALTER. This is not retirement in any sense of the word. Under the law, the senior circuit judge is required to make assignments and perform other administrative duties. This bill relieves him of those duties. It does not compel

retirement and it in no wise affects his tenure of office as a judge. He is, as you know, appointed, in effect, for life.

Mr. LONG. I thank the gentleman.

The CHAIRMAN. The time of the gentleman has expired.

Mr. KEATING. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, the Committee on Court Administration of the Judicial Conference of the United States has given a great deal of study to means of relieving congestion in the Federal courts.

A part of the program, which is evolving as a result of the committee's study, is a recommendation that chief judges of circuits and district courts cease to serve as such upon reaching the age of 70.

We should remember that this recommendation has been made by the judges themselves, based upon years of experience.

A chief judge is responsible not only for the execution of his judicial duties, but in addition, must supervise and direct the numerous administrative details of the circuit or district. The purpose of H. R. 985 would be to relieve senior judges of these extra duties in order that their judicial experience may be best utilized in their later years.

While the Committee of the Judicial Conference recommended that chief judges be relieved of their administrative duties upon reaching the age of 70, it was the opinion of the Committee on the Judiciary that those duties could be performed without undue hardship until the age of 75, and the original bill was amended accordingly.

Mr. Chairman, although the enactment of H. R. 985, will not, of itself, solve the problem of congestion in Federal courts, it is my opinion that it represents a constructive and progressive forward step necessary to the solution of the problem. I urge favorable action on this bill.

Mr. HOFFMAN. Mr. Chairman, will the gentleman yield?

Mr. KEATING. I yield.

Mr. HOFFMAN. Does this proposed legislation have the support of the administration?

Mr. KEATING. It has been recommended by the Attorney General, yes.

Mr. HOFFMAN. Is there any assurance that if Members vote for it, the Congressional Quarterly will count it in on the score?

Mr. KEATING. I am not familiar with the way the Congressional Quarterly compiles its statistics.

Mr. HOFFMAN. I can enlighten the gentleman a little bit. They do not regard the facts. They put in 14 marks on 1 vote, that is, they multiplied 1 vote 14 times when they gave the majority leader credit for voting in favor of the administration 95 percent of the time. They had to count 1 vote 14 times in order to get that figure.

Mr. KEATING. I am always glad when the majority leader is in support of the administration.

Mr. HOFFMAN. So am I. I wish he would do it at election time.

Mr. KEATING. I am sure I share the gentleman's views.

Mr. CELLER. Mr. Chairman, I yield 10 minutes to the gentleman from Illinois [Mr. O'HARA].

Mr. HOFFMAN. Mr. Chairman, will the gentleman yield?

Mr. O'HARA of Illinois. I yield to my good friend from Michigan.

Mr. HOFFMAN. Will the gentleman please say a word for those of us who are older?

Mr. O'HARA of Illinois. I will do my best, although I think the distinguished gentleman from Michigan is the best proof that youth is eternal.

I had never thought that I would be in this well in disagreement with that great liberal, my fond friend, "MANNY" CELLER of New York. During the years I have followed his leadership, always fighting discrimination wherever its ugly head was raised. It was never a matter of who or what was the target for discrimination. It was discrimination itself we were fighting—discrimination which is the poison that destroys both individuals and States.

Now because a few Federal judges have been allegedly disagreeable, and there is a desire to get rid of them, it is proposed for the first time in the history of this Congress to enact a law discriminating against age.

My good friend "MANNY" CELLER knows that when people of evil minds seek to create a prejudice against those of any group they begin by picking out a few individuals of disrepute and falsely holding them up as representatives of all the people of that group. This is the strategy of hatred as old as mankind. Now because there may be 2 or 3, or perhaps more, disagreeable Federal judges, who have reached the age of 75, we are asked to legislate on the conclusion that all persons of 75 or over are to be judged by the measure of these few exceptions.

Mr. ROGERS of Colorado. Mr. Chairman, will the gentleman yield?

Mr. O'HARA of Illinois. I yield.

Mr. ROGERS of Colorado. Does the gentleman know at what age Federal employees must retire under the civil-service law?

Mr. O'HARA of Illinois. By any law enacted by this Congress or by the rules of the Civil Service Commission?

Mr. ROGERS of Colorado. Do you know what that law is?

Mr. O'HARA of Illinois. I know the Civil Service Commission has for some positions an age range. At 75 a person might not qualify for a job requiring hard manual labor. This does not mean that he would be disqualified for duties as a presiding judge.

Mr. ROGERS of Colorado. Is not that age 70—compulsory retirement at 70?

Mr. O'HARA of Illinois. That I do not know. But I can tell the distinguished gentleman from Colorado who at the tender age of 34 was a great Attorney General of the State of Colorado, and now when he is 57 is a mighty good Congressman; I can tell him that one of the greatest wastes from which our country is suffering is in compulsory retirement and the refusal to employ thoroughly competent persons merely because of their age. Many persons not yet 40 have had the doors of employment slammed in their faces. We are increasing the span of human life, and at the same time we are increasing the difficulty for one past 35 to get a job. Many of the personnel managers of our business concerns frankly say to applicants over 35, and otherwise qualified, "We cannot employ you, because it costs us a great deal of money to educate and train a worker, and we must have enough years of his prime remaining to get our money back." I know of many young men and women who have gone place after place, and they could not find employment, because they had passed 35. I do not want to see this Congress put into the laws of the land that concept.

Mr. Chairman, in the historic hall in which we are meeting there is a richness of tradition in which we are enveloped as we pursue our legislative duties. In this Chamber in every generation have been young Members and those of greater years and experience and Members, too, who were near the close of their years of service. This would not be the greatest deliberative body in the world if those who constituted its membership were of one age group. Each group makes its contribution and the combined contribution of all the groups working together in mutual respect and in friendly understanding is the triumph of democratic government.

Today is the first time in the history of this historic body the question of age is being raised to destroy the democratic unity that long has prevailed in this body and to separate its Members, not by the measure of character but by the dates of a calendar. For the first time in the history of the Congress of the United States we are asked to write into the laws of the land a new and a startling rule that men are not to be judged by what they are but by the number of years that they have lived. The proponents of this bill will say that it relates only to judges in the Federal courts, and is intended merely to divest those who have reached the age of 75 of the burden of administrative duties. But what is the argument that is given in support of this position? Let me read from pages 2 and 3 of the report of the committee, and I respectfully ask that all my colleagues carefully weigh the implications:

> Nevertheless, it cannot be denied, as indicated in the experience of private business, that the toll of years has a tendency to diminish celerity, promptitude and effectiveness.

When on April 15, 1957, I objected to this bill being called on the Consent Calendar the distinguished gentleman from Colorado [Mr. ROGERS] said:

> I may say to the gentleman that we have a number of judges who are past the age of 75 and who insist upon handling mere details of the administrative functions of the court with the result it has impared the efficiency of some of the district courts and some of the circuit courts.

That well may be true that there are judges who are not as chief justices good and wise administrators. But to say that their lack of qualification is due to the fact that they are 75 years old

or older and that it follows therefore that one who has reached the age of 75 is lacking in the necessary qualifications is open to the challenge of every Member of this body who takes the time to look around.

The great and beloved Speaker of the House, probably the most efficient presiding officer in the world, as evidenced daily in this Chamber and on occasions as chairman of great national conventions nominating candidates for President and Vice President of the United States, is 75. Because 1 or 2 judges in the Federal courts lack poise and respect for the rules of courteous deportment are they to be accepted as the criterion or are we to accept as the guide to our thinking the performance of the Members of this body who are 75 or older?

The chairman of the Committee on Appropriations, the distinguished gentleman from Missouri, is well past 75. But every night until close to midnight he is at work in his office on the 7th floor of the New House Building. I know because he and I are always the last to leave the building.

Are we to write into the law of the land the implication that CLARENCE CANNON lacks administrative ability because 1 or 2 judges in district courts are probably at 75 just as impossible as they were at 21?

Mr. HOFFMAN. Mr. Chairman, will the gentleman yield?

Mr. O'HARA of Illinois. I am glad to yield to the gentleman from Michigan.

Mr. HOFFMAN. Now that my distinguished friend has started out on a new House Office Building and its occupants, and the older men, I do not think he intended to, but if you did, will you leave me out of it? Because the folks in my district, some of them, are still emphasizing the fact of my age, and I do not want any more of these self-starters for me.

Mr. O'HARA of Illinois. I may say to the gentleman from Michigan that I understand he works as long or even longer than the gentleman from Missouri [Mr. CANNON]. He is certainly a prodigious worker. But it happens that because of the location of our respective residences the gentleman from Michigan leaves by the front door and the gentleman from Missouri and the gentleman from Illinois by the back door.

The distinguished gentleman from North Dakota, USHER BURDICK, in his college days was one of the great football players of this Nation. Every day you see him on the floor of this House, and he is as physically active and as mentally alert as he was when he was a star of the gridiron. Because some judge who probably at 21 was not too alert and not too popular with his mates at 75 is a prototype of what he was at 21, are you to accept him as a criterion and close your eyes to that which is daily before you in the dynamic performance of USHER BURDICK?

Let me read again the sentence on pages 2 and 3 of the report of the committee:

> Nevertheless it cannot be denied, as indicated in the experience of private business, that the toll of years has a tendency to diminish celerity, promptitude and effectiveness.

I will admit that in some private businesses age has been made a factor in obtaining employment. I have talked to many discouraged and disillusioned young men who have sought to obtain employment and have been turned away because they were 39 or 40. This results from a policy that some private businesses have adopted not to employ anyone past 35 years of age on the calculation that it costs the employer a fantastic amount of money to train the worker and that there must be a sufficient number of years of his prime left for the employer to recoup on his investment.

I do not want this Congress to give countenance to that policy. The committee, in basing its argument for this bill on the grounds that it is recommended by the experience of private business, has made that the issue upon which we will soon be voting. I shall ask for a rollcall, and I depend upon the forthrightness of my colleagues whether they intend to vote for this bill or against this bill to join with me in the demand for that rollcall.

There are in this body many Members who have reached the age of 75. I am proud to be among that number. The very moment that I cannot do my job, the very moment that I cannot keep at my desk in the hours of the night as well as in the hours of the day, I will not wish to be a Member of the Congress. As Oliver Wendell Holmes, Justice of the Supreme Court of the United States, the great dissenter, said on his 90th birthday: "For to live is to function. That is all there is in living."

And meanwhile, Mr. Chairman, if we are to place upon men the measure of age, I prefer to be judged, even though I am very humble in comparison with their measure, not by 2 or 3 disagreeable Federal judges, but by BRENT SPENCE, who never once has entered the well of the House that he did not speak with a clearness and clarity that reflected the working of a brain that time had made only the keener, TOM O'BRIEN, DAN REED, NOAH MASON, CLARE HOFFMAN, JOHN TABER, CHARLIE VURSELL, MRS. ROGERS, and others in this body who have grown richer in all the qualities of leadership and of statesmanship with every passing year. I may not always agree in philosophy and on measures that come before us with all my colleagues who have reached the age of 75, but in none have I ever detected any proof to substantiate what the report of the committee says is the experience of private business that celerity, promptitude, and effectiveness diminish with the increasing years that the good Lord has allotted.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. KEATING. Mr. Chairman, I yield the gentleman 5 additional minutes.

Mr. O'HARA of Illinois. Mr. Chairman, I thank the gentleman for yielding me the additional 5 minutes in which I wish to refer to Oliver Wendell Holmes. He was 91 years old when he retired from the Supreme Court of the United States. After he had reached and passed his 75th birthday he wrote those great dissenting opinions that established respect for legislative authority. What lawyer is there in this body who would dare say that when he reached 75 Mr. Justice Holmes "as indicated by the experiences of private business" had begun to find "that the toll of years has a tendency to diminish celerity, promptitude and effectiveness." Poppycock. At 90 Mr. Justice Holmes would have shamed them to death, singlehanded.

Mr. Justice Brandeis, one of the greatest jurists that ever graced a court, was 83 years of age when he resigned from the Supreme Court bench. What lawyer is there in this body who would dare to say that when Mr. Justice Brandeis reached 75 he became prey to diminishing celerity, promptitude and effectiveness?

Mr. Chairman, I have profound respect for the membership of the great Committee on the Judiciary and for several of its members I hold a deep affection and I appreciate its problems. I appreciate that there are some chief justices who might wish to be divested of administrative chores, and others whose divorcement from the responsibilities of administation might be in the best interest of the courts. But there is no justification of attaining the desired objective in this manner. Let us understand clearly what this bill does. By its implication it casts a reflection on every Member of this body who is 75. It casts a reflection upon the memory of Mr. Justice Brandeis. It casts a shadow upon the memory of Mr. Justice Holmes. For the first time in the history of this Congress it will write into the laws of the land the dictum that persons in the Federal judiciary are not to be measured by their integrity, their ability, their industry and devotion, but by their age.

Mr. Chairman, I hope this bill will be sent back to the committee for further study. The keen legal minds of the learned members of the Judiciary Committee surely can find some better way of meeting the problems of the courts than legalizing age discrimination.

Mr. Justice Holmes was buried on his 94th birthday. More than half his fortune of $553,000 he left to the United States of America without restriction.

It is scarcely complimentary to the memory of this outstanding American jurist to pass an act about 2 decades after his death stating in substance that at 75 he was not competent to hold the office of chief justice of a Federal district court.

Mr. KEATING. Mr. Chairman, I yield 2 minutes to the gentleman from Illinois [Mr. ARENDS].

Mr. ARENDS. Mr. Chairman, I do not know how much we should argue about age here because to me and those of my district everything is relative.

Mr. Chairman, may I say that recently I attended a banquet in honor of the oldest living Mason of the United States, who was 100 years old. I enjoyed that banquet very much. During the course of the meal I heard some gentleman behind me say, "I will be 91 shortly."

When the opportunity presented itself I turned around to visit with this distinguished gentleman. The 91-year-old was watching the 100-year-old autograph menus and doing a fine job of it. The only thing about him was he was a little hard of hearing, but he autographed menus in a very legible hand.

I said to this 91-year-old, "You say he is all right, he is in fine shape? How about you?" He said, "I am all right." I said, "Are you 91?" He said, "Yes, I am." I said, "That is fine, you are here as a 91-year-old youngster to attend this celebration in honor of a 100-year-old man." I asked him, "Do you get about very much yourself? Do you go out nights?" He said, "Oh, yes, I enjoy myself thoroughly. I like to attend things like this, particularly when it is honoring an individual like Mr. Decker."

He said, "There is only one thing the matter with this program." I asked him what that was and he said, "They are drawing it out too long. The first thing you know they are going to wear that old man out."

Mr. CELLER. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, I want to state at the outset that I have the most affectionate regard for the gentleman from Illinois [Mr. O'HARA]. I respect his opinion, but I must gently but firmly disagree with him.

There was no intention by the offering of this bill to rid the bench of any specific chief judge. What we do is to say that they shall not have the added burdens of administration of the courts. We do not do anything with regard to their judicial functions whatsoever. Now, we simply state that they shall not have the administrative burdens of the chief judgeship. Those are for the most part housekeeping and time-consuming chores, such as the court's personnel and the like. That is all we do by this bill.

Now, the names of distinguished judges were offered here today; Mr. Justice Holmes, Mr. Justice Brandeis, both late lamented distinguished judges. They would be unaffected if they were judges and we had passed this bill, because they were not chief judges and also this bill does not touch the Supreme Court. This bill only refers to those who are the senior judges of the circuit and district courts; that is, the court of appeals or the District court.

Now, if we are going to be consistent, in accordance with what the gentleman from Illinois says, we would have to repeal all of our civil service compulsory retirement acts. As you know, you must retire, when you are in the Federal service, at 70 years of age. We also provide for the voluntary retirement of our Federal judges when they reach 65 years of age if they have 15 years of service, or if they reach the age of 70 with 10 years of service. But, that is no reflection upon any of those judges who seek voluntary retirement.

Now, most industrial concerns provide for compulsory or mandatory retirement at 65. There is no reflection on those men who are thus compelled to retire. With reference to Congress, Members of Congress can stay here at any age, but there is a big difference between a Member of Congress and a member of a court. If a judge, for example, becomes senile, becomes inefficient, or becomes a drunkard—they could not properly carry on their duties; we are practically helpless; we cannot do anything except by impeachment, because they are appointed in effect for life. But, if a Congressman is guilty in that way, there are sanctions; the electorate simply does not reelect him.

Now, I have a letter of great interest here which I received from Judge Denman, head of the ninth judicial circuit, which reads as follows:

UNITED STATES COURT OF APPEALS,
NINTH JUDICIAL CIRCUIT,
San Francisco, Calif., May 3, 1957.

Hon. EMANUEL CELLER,
Chairman, Judiciary Committee,
House of Representatives,
House Office Building,
Washington, D. C.

DEAR MR. CELLER: I am strongly in favor of requiring the administration of the courts of appeal and multiple judge district courts by persons under 70 years of age, for the reasons hereafter stated.

In the fiscal year 1956 in my 84th year I was able to write 57 fully considered opinions on final judgments, none of which has been reversed and but one of which is now pending in the Supreme Court. On the administrative side, the court's heavy arrearages in 572 cases pending at the beginning of that year were reduced so that but 349 were pending at the end, by my procuring of the participancy of circuit judges of other circuits and many of our own district judges. This came about by an extraordinary inherited longevity from the families of both my parents, with many immediate ancestors living into the late nineties and one to 102.

However, I have know a number of able judges whose energy and drive has begun to fade in their sixties and early seventies and their litigants have suffered from it.

It is much better that the few of us who have such an inheritance should give up our administrative work at 70 than have the litigants subject to the courts' delays and arrearages from those who are less fortunate.

Very faithfully yours,
WILLIAM DENMAN,
Chief Judge.

He is not worrying about this bill. Of course we have increased the age to 75.

I would be the last man in the world to cast any reflection upon old age, on anyone in general or anyone in particular. I have the greatest respect for old age.

I remember hearing the great concerts conducted by Toscanini when he was 89 years of age. And I know that Beethoven wrote his best symphonies when he was over 80, although deaf.

Barney Baruch, away over 80, is still the elder statesman. And Churchill was just as strong at 80 as he was at 70.

I remember Orlando, who was a little fellow, and the way he bounced around at 91. I met him when he was one of the Big Four, during the First World War He married a third time when he was 91. He was a chain smoker. I never saw a man with the great energy that Orlando had, at 91 years of age.

I remember from the days when I was a kid Longfellow's poem "We Who Are About To Die Salute Thee."

I might read it, if the Members will bear with me for a moment.

But why, you ask me, should this tale be told
To men grown old, or who are growing old?
It is too late! Ah, nothing is too late
Till the tired heart shall cease to palpitate.
Cato learned Greek at eighty; Sophocles
Wrote his grand Oedipus, and Simonides
Bore off the prize of verse from his compeers,
When each had numbered more than four-score years.
And Theophrastus, at fourscore and ten,
Had but begun his Characters of Men.
Chaucer, at Woodstock with the nightingales,
At sixty wrote the Canterbury Tales;
Goethe at Weimar, toiling to the last,
Completed Faust when eighty years were past.
These are indeed exceptions; but they show
How far the gulf-stream of our youth may flow
Into the arctic regions of our lives,
Where little else than life itself survives.

That was Longfellow and what he said those many years ago is still true today, and I am sure the gentleman from Illinois [Mr. O'HARA] will agree with me. But that does not weaken one iota the bill that is before us.

Mr. O'HARA of Illinois. Mr. Chairman, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from Illinois.

Mr. O'HARA of Illinois. I understood the distinguished gentleman from New York to say that in the case of a judge who was a drunkard and a disgrace to the court, there was nothing we could do about it. I should like to ask two questions. First, is he more apt to be a drunkard and a disgrace at 75 than at 35?

Mr. CELLER. No. I just cited that to show that in the case of the judiciary we are powerless to remove. We cannot remove these judges except by impeachment.

Mr. O'HARA of Illinois. Can we not impeach a judge?

Mr. CELLER. It is not a question of how old they are. They could be drunkards at 40 or at 80. But when it comes to somebody else, such as a Member of the House, he is subject to the scrutiny of the electorate who can take action.

Mr. O'HARA of Illinois. I am asking the gentleman whether or not a judge, in the case of a drunkard or one guilty of disgraceful conduct, would not be subject to impeachment.

Mr. WALTER. Mr. Chairman, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from Pennsylvania.

Mr. WALTER. Not only is their tenure for life, but under the law, when a man becomes a chief judge, he keeps those duties until he leaves the bench.

Mr. CELLER. That is correct. Finally I want to say that I know of some men who are old at 40 and some who are young at 80. I remember what Emerson said:

We do not count a man's years until he has nothing else to count.

The CHAIRMAN. The time of the gentleman from New York has expired. All time has expired, and the Clerk will read.

The Clerk read as follows:

Be it enacted, etc., That subsection (a) of section 45 of title 28 of the United States Code is amended to read as follows:

"(a) The circuit judge in regular active service who is senior in commission and under 70 years of age shall be the chief judge of the circuit. If all the circuit judges in regular active service are 70 years of age or older the youngest shall act as chief judge until a judge has been appointed and qualified who is under 70 years of age."

With the following committee amendments:

Page 1, line 6, strike out "seventy" and insert "seventy-five."

Page 1, line 8, strike out "seventy" and insert "seventy-five."

Page 2, line 1, strike out "seventy" and insert "seventy-five."

Page 2, line 1, strike out "age." " and insert "age, but a judge may not act as chief judge until he has been a member of the court for 1 year." "

The committee amendments were agreed to.

Mrs. PFOST. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I live in a judicial district served by only two Federal judges. We in Idaho are fortunate in having as our senior judge a former Governor of the State. He is an able, an active, and a most efficient chief judge.

Judge Chase Clark became 73 on August 20 of last year. If this bill is passed he will therefore be relieved of his administrative duties on August 20, 1958—just a little over a year from now.

This means that the people of Idaho will be deprived of Judge Clark's seasoned judgment, his abundant wisdom, and his vast experience at a time when they are critically needed. I do not want to see this happen, and I am confident the people of my State feel exactly as I do. I am therefore going to vote against this bill.

The Clerk read as follows:

SEC. 2. Subsection (a) of section 136 of title 28 of the United States Code is amended to read as follows:

"(a) In each district having more than one judge the district judge in regular active service who is senior in commission and under 70 years of age shall be the chief judge of the district court. If all the district judges in regular active service are 70 years of age or older the youngest shall act as chief judge until a judge has been appointed and qualified who is under 70 years of age."

With the following committee amendments:

Page 2, line 8, strike out "seventy" and insert "seventy-five."

Page 2, line 10, strike out "seventy" and insert "seventy-five."

Page 2, line 13, strike out "seventy" and insert "seventy-five."

Page 2, line 13, strike out "age." " and insert "age, but a judge may not act as chief judge until he has been a member of the court for one year." "

The committee amendments were agreed to.

The Clerk read as follows:

SEC. 3. The amendments to sections 45 and 136 of title 28 of the United States Code made by this act shall take effect at the expiration of one year from the date of enactment of this act.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. BASS of Tennessee, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H. R. 985) to provide that chief judges of circuits and district courts shall cease to serve as such upon reaching the age of 70, pursuant to House Resolution 255, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gross.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time and was read a third time.

The SPEAKER. The question is on the passage of the bill.

Mr. O'HARA of Illinois. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. O'HARA of Illinois. I am opposed to the bill, Mr. Speaker.

The SPEAKER. The Clerk will report the motion offered by the gentleman from Illinois.

The Clerk read as follows:

Mr. O'HARA of Illinois moves to recommit the bill H. R. 985 to the Committee on the Judiciary for further study.

The SPEAKER. The question is on the motion to recommit.

Mr. O'HARA of Illinois. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were refused.

The question was taken; and the Speaker announced that the noes appeared to have it.

Mr. HOFFMAN. Mr. Speaker, I object to the vote on the ground that a quorum is not present, and make the point of order that a quorum is not present.

The SPEAKER. Evidently, a quorum is not present.

The Doorkeeper will close the doors, the Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 47, nays 292, not voting 93, as follows:

So the motion to recommit was rejected.

The Clerk announced the following pairs:

On this vote:

Mr. Hemphill for, with Mr. Hébert against.

Until further notice:

Mr. Holtzman with Mr. Hoeven.
Mr. Holifield with Mr. Beamer.
Mr. Kitchin with Mr. Widnall.
Mr. Anfuso with Mr. Patterson.
Mr. Zelenko and Mr. Morano.
Mr. Green of Pennsylvania with Mr. Cramer.
Mr. Holland with Mr. Cole.
Mr. Carnahan with Mr. Mason.
Mr. Vanik with Mr. Miller of Maryland.
Mr. Albert with Mr. Gubser.
Mrs. Sullivan with Mr. Allen of California.
Mrs. Kelly of New York with Mr. Ayres.
Mr. Byrd with Mr. Kearney.
Mr. Bailey with Mr. Kearns.
Mr. Hull with Mr. Scherer.
Mr. Baring with Mr. Smith of California.
Mr. Shuford with Mr. Taylor.
Mr. Kluczynski with Mr. Wilson of Indiana.
Mr. Barrett with Mr. Dixon.
Mr. Dawson of Illinois with Mr. Chiperfield.
Mr. Philbin with Mr. Coudert.
Mr. Donohue with Mr. Latham.
Mr. Durham with Mr. McIntire.
Mr. Ashley with Mr. Prouty.
Mr. Barden with Mr. George.
Mr. Buckley with Mr. August H. Andresen.
Mr. Dollinger with Mr. Baker.
Mr. Garmatz with Mr. Hillings.
Mr. Gordon with Mr. Burdick.
Mr. Preston with Mrs. Rogers of Massachusetts.
Mr. Pilcher with Mr. Siler.
Mr. Multer with Mr. Tollefson.
Mr. Healey with Mr. Wolverton.
Mr. Polk with Mr. Krueger.
Mr. Kelley of Pennsylvania with Mr. Jackson.
Mr. Breeding with Mr. Jenkins.
Mr. Thompson of New Jersey with Mr. Schwengel.
Mr. Coffin with Mr. James.
Mr. O'Brien of New York with Mr. Dawson of Utah.

Mr. WILLIAMS of Mississippi changed his vote from "nay" to "yea."

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the passage of the bill.

The bill was passed.

The title was amended so as to read: A bill to provide that chief judges of circuit and district courts shall cease to serve as such upon reaching the age of seventy-five."

A motion to reconsider was laid on the table.

GENERAL SERVICES ADMINISTRATION

Mr. McCORMACK. Mr. Speaker, my remarks are addressed to a bill I have introduced—H. R. 7694—which would in essence give Cabinet status to the General Services Administration. This need was brought to my mind by the size of the budget we are being called upon to consider at this time. The President should have all the assistance he can summon in the discharge of his duties. The Cabinet should have broad-gaged advisers in the public interest. It is only perhaps an oversight that Cabinet status is not afforded GSA, the agency to which Congress gave the important standards, you recall, of "economy, efficiency, or service."

This is not a proposal to elevate or honor just another agency. My bill would gain for the President immediate contact with his property manager, his chief purchasing agent for critical and strategic materials, his civilian supply officer, archivist and records keeper, his civilian transportation and public utility management consultant. More than any other member of his official family, the Administrator of this agency was given sweeping powers to coordinate the activities of the executive agencies. The results of these efforts are not best carried to the ear of the President by the spokesmen of the departments and agencies subject to the GSA Act. This information the President needs first hand. His budget and operating programs would have strong validity then; he would know his soft areas; he would be confident in his areas of strength.

GSA serves the entire executive branch but with proper independence—which is as the Congress intended. Cabinet status now will demonstrate a desire to aid the President by assuring access to an objective view from an agency conceived by the Congress and the first Hoover Commission, to provide it, and also be beneficial to the taxpayers.

I have a number of other advantages to mention in connection with my bill; they are:

(a) GSA is the service agency of the executive branch and is familiar with the programs, and in fact performs many functions of the present Cabinet complement.

(b) It is a logical Cabinet member as it would provide a reporting center for many small Government organizations, nominally reporting to the President, but in fact reporting to no one. This was a circumstance deplored by both Hoover Commissions.

(c) Public Law 152, 81st Congress, created GSA—Cabinet status would strengthen it and render its mission a less difficult assignment, especially when directly supported by the Presidential knowledge it could develop by reason of being a member of the official family.

(d) GSA as an agency in size is almost as large as the Department of Justice and much larger in personnel than the Department of Labor as well as some other departments. If the functions it performs were diffused, as they were previous to our passing Public Law 152, 81st Congress, the number of personnel would have to be doubled. You recall that GSA welded 5 agencies into 1 unit to perform services common to all departments and agencies; so its existence further and to that extent avoids duplication of function elsewhere. Cabinet status could smoke out any lone agency holdouts against these desires of the Congress or the Hoover Commissions.

(e) Cabinet meetings now include the Director of the Bureau of the Budget, the "Secretary of Peace," the Administrator of Civil Defense, Office of Defense Mobilization, and others. However, the GSA Administrator should not be included on an informal basis, based on personality or some concept of incidental invitation, his general interest and knowledge of agency programs, his operating responsibilities in servicing them, underscore his contribution to any President.

(f) His responsibilities in the national stockpiling, transportation, and Government buildings, as well as his residual public-works experience as successor in functions Federal works agency, offer him for inclusion as a Cabinet member in the National Security Council. His responsibilities in Federal civil defense, foreign-aid procurement, and shipment, Operation SAGE of the Air Force are among security considerations within his scope of attention.

Lastly, there is as we know a matter of protocol downtown that often impedes the effectiveness of congressional enactments. For instance, a matter of mutual interest to a secretary and an administrator is unfortunately referred most times to an assistant secretary—so policy is often not decided because while the administrator has power of decision, an assistant secretary may not. This is a good argument from a practical viewpoint for Cabinet status.

This proposal was considered at the time of the original enactment of the law establishing that agency under the provisions of the Federal Property and Administrative Services Act of 1949, as amended—63d Statute, page 377. However, it was decided to defer that action until the then new agency would function and operate.

You will recall how this agency, GSA was created by the Congress without dissent in either this House or the other body. It was a major achievement of the first Hoover Commission.

Eight years of operations have gone by, a second Hoover Commission has reviewed its work, reaffirming the executive-legislative wisdom of its establishment. To the extent of its financing, it has performed well. Every session of the Congress seemed to add new duties, although we must be equally frank to say that we did not overburden it with funds. Under Administrators Jess Larson, E. F. Mansure, and now Franklin G. Floete, it has sought to make an effective contribution to the work of the executive branch,

only cabinet status can render it more effective.

My proposal is not a partisan matter, you will recall my bill in the 82d Congress to relieve the workload of the President which that Congress enacted. I have maintained an abiding interest in the matters that can accord any measure of relief to any President from the crushing burden of that office. I want for him the best assistance, removal of mere detail, and access to available information from those qualified to give it. I believe my bill is a constructive step and must come to be recognized by passage of this proposal or by a reorganization plan submitted to this body, in the interests of economy, efficiency, or service.

PACKERS AND STOCKYARDS ACT

Mr. HILL. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

Mr. HILL. Mr. Speaker, I am today introducing a bill to amend the Packers and Stockyards Act.

The Packers and Stockyards Act provides an integrated regulatory program with respect to the marketing of livestock and live poultry and the meat packing industry, its primary purpose being to prevent unfair practices and insure free competition in the marketing of livestock and livestock products and byproducts and poultry, thus, protecting the producers of livestock and poultry from unfair, discriminatory, or unreasonable practices or charges and members of the meat packing industry and the public from the harm which flows from unfair practices, restraint of trade, and monopolistic practices with respect to the marketing of livestock, its products and byproducts and poultry. The changes in the method of marketing livestock in recent years, particularly those resulting from changes in modes of transportation and decentralization of packing and marketing facilities, and the changes in the marketing of meat, meat food products, and livestock products, such as the integration of limited slaughtering and preparation of meat and meat food product activities with substantial retail distribution and other activities, have given rise to the need for clarification of the jurisdiction of the Secretary of Agriculture over activities and practices of the livestock and meat packing industries.

The purpose and effect of the amendments to the Packers and Stockyards Act which I have introduced are to allow the Secretary of Agriculture to concentrate the Department's efforts on regulating those who are principally engaged in the livestock, meat packing, and poultry industries. The activities of such persons have the most direct and substantial impact upon the interest of producers of livestock and live poultry.

Under these amendments those having an interest in such industries, but not principally so engaged, would not be freed from regulation with respect to their practices but would be subject to the jurisdiction of the Federal Trade Commission.

I append a copy of the bill.

A bill to amend the Packers and Stockyards Act, 1921, as amended, regulating interstate and foreign commerce in livestock, livestock products, dairy products, poultry, poultry products and eggs, to clarify the jurisdiction of the Secretary of Agriculture thereunder, and for other purposes

Be it enacted, etc., That the Packers and Stockyards Act, 1921, as amended (42 Stat. 159, as amended; 7 U. S. C. 181 et seq.), is amended as follows:

(1) By amending section 201 (7 U. S. C. 191) to read as follows:

"SEC. 201. When used in this act—

"The term 'packer' means any person principally engaged in the business (a) of buying livestock in commerce for purposes of slaughter, or (b) of manufacturing or preparing meats or meat food products for sale or shipment in commerce, or (c) of buying livestock in commerce for purposes of slaughter and of manufacturing or preparing meats or meat food products for sale or shipment in commerce, or (d) of manufacturing or preparing livestock products for sale or shipment in commerce, but no person engaged in such business of manufacturing or preparing livestock products shall be considered a packer unless also engaged in any business referred to in clause (a) or (b) above.";

(2) By striking the words "It shall be unlawful for any packer or any live poultry dealer or handler to:" at the beginning of section 202 (7 U. S. C. 192) and inserting in lieu thereof "It shall be unlawful for any packer or live poultry dealer with respect to any activity, or any other person with respect to buying livestock or live poultry for purposes of slaughter, to:"; and

(3) By inserting after the word "person" in the second sentence of section 503 (7 U. S. C. 218b) the word "principally."

WHO LIKES IKE?

Mr. HOFFMAN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. HOFFMAN. Mr. Speaker, this morning it was my privilege to read with amusement, as well as with interest, yesterday's debate made on the floor, but which fortunately I did not hear—because otherwise I might have participated and interfered with the continuity of thought.

The contest seemed to be an attempt to determine whether the Republican or the Democratic leadership, and party organizations and individual members of the two parties, were the more consistent in their admiration and support of Ike. That is, which party—the members of which party—were really and honestly entitled to wear an "I like Ike" button.

Strange as it may seem to those of us who are familiar with the facts, the determination of the issue, that is, as to who really loved Ike and supported him, was to be based upon certain statements and figures carried in the Congressional Quarterly.

Just why anyone with a knowledge of that publication's bias and inaccuracy should use it as a source of information is a mystery.

True, the title "The Congressional Quarterly," assumed by the publication, in the minds of many implies that it is an official congressional publication, similar perhaps to the CONGRESSIONAL RECORD. The contrary is true, as has several times been pointed out.

In July of last year—CONGRESSIONAL RECORD, volume 102, part 11, page 15395—the gentleman from California [Mr. UTT] called attention to the fact that the Congressional Quarterly was owned and published—and I quote—"by Nelson Poynter, of St. Petersburg, Fla."

Mr. UTT, on that occasion, further stated that he was not implying that Mr. Poynter or his wife were "necessarily Communists, Communist sympathizers, or fellow travelers," but, he added, that "it must be admitted by even the most casual observer that they have been keeping 'biased' company." Mr. UTT added:

Mr. Poynter's pious protestations of political unbias are clouded seriously by the strong New Deal flavor of his St. Petersburg newspaper and by the fact that files of the House Committee on Un-American Activities reveal that Press Research, a publication also organized and published by Nelson Poynter, was an admittedly biased periodical.

To complete the picture, records indicate that Mr. Poynter served with the Office of War Information under a Democrat administration.

The files of the House Un-American Committe also show that Mr. Poynter was a member of the Political Action Committee and that he arranged with a Mr. C. B. Baldwin, assistant chairman of the PAC of CIO, to give PAC free copies of his publication even though they were prepared for other clients who were paying for the service.

The hearings also contained admissions that the Poynter publication, Press Research, contained the personal opinions of Mr. Poynter and his managing editor. If further evidence than the above is needed to determine Mr. Poynter's strong personal prejudices toward the New Deal philosophy, a look at some of these Press Research reports should satisfy even the most skeptical.

Another statement indicating the biased character of the Congressional Quarterly will be found in the CONGRESSIONAL RECORD, volume 102, part 9, page 12784, where a Member of the other body, among other things said:

Raymond Moley has written a series of articles which review the support President Eisenhower has received from the two parties in the Congress. In Newsweek for July 16, on the newsstands today, under the title, "Who Helps Ike?" he analyzes the methods used by the Congressional Quarterly to rank Members of the Congress in their support of President Eisenhower.

The Congressional Quarterly, as most everyone knows, is used by many newspapers as an objective source of information on Capitol Hill. It is for this reason that I am particularly interested in the current piece by Mr. Moley which shows that the Congressional Quarterly's methods of ranking the Congress has an inherent statistical bias in favor of the Democrats.

The Congressional Quarterly is owned by Henrietta and Nelson Poynter, who also publish the St. Petersburg, Fla., Times. They endeavor to give the impression of being completely nonpartisan, and that they are only doing a factual piece of reporting. The

number of newspapers who depend upon the Congressional Quarterly for their political analyses attests to their success in creating this appearance of objectivity.

Mr. Poynter is, of course, entitled to his own political beliefs. However, it is a matter of record that he was a member of the National Citizens Political Action Committee, which was organized to work for the reelection of President Roosevelt in 1944. The group who constituted the National Citizens Political Action Committee, were the extreme leftwing Democrats as well as independents with strong leftwing leanings.

The St. Petersburg Times, it might also be noted, gave its editorial support to Claude Pepper, a leftwing Democrat, in his last race for the Senate when he was successfully opposed by Senator SMATHERS. In view of this record, Mr. Poynter can hardly be regarded as a disinterested reporter.

The Congressional Quarterly was established in 1945, and its address at that time was 732 17th Street NW., Washington, D. C. Prior to the first issues of the Congressional Quarterly, Mr. Poynter operated a similar service at the same address known as Press Research.

The Dies committee held hearings in connection with their investigation of the National Citizens Political Action Committee on October 4, 1944, which shed considerable light on the political sympathies of Mr. Poynter, and on the activities and personnel of Press Research.

If the reader is interested further, information as to the nature of this publication and its editorial views will be found by a reference to the CONGRESSIONAL RECORD, volume 102, part 11, pages 15068–15072.

But, back to yesterday's debate on the issue as to who did or did not "like Ike." The gentleman from Massachusetts [Mr. MCCORMACK], the very capable floor leader of the party which is in control of the Congress, was credited with voting 95 times to support the President, with 5 votes against Ike's policy. That stanch Republican, likewise from Massachusetts, JOE MARTIN, minority leader, was listed as having voted but 55 times in support of the President, 45 times against his policy.

That record, if based upon the facts, or if accurate, would seem to indicate one of two things. Either that Ike, in making his determination as to party affiliation, made an unpardonable error when he accepted the Republican nomination, or the gentleman from Massachusetts, the Democratic Party leader, should openly and publicly have supported Ike during the last campaign. Either the President or our delightful friend from Massachusetts [Mr. MCCORMACK] is in the wrong political pew.

No one, however, should be too greatly disturbed by the charges or misstatements carried in the Congressional Quarterly. Other than Drew Pearson, it is doubtful if any more inaccurate or biased statements are put out than those publicized by the Quarterly.

It not only is publicized under a deceptive name, "The Congressional Quarterly," but the foundation on which it rests its conclusions is intentionally selected and used to mislead.

For example, in its tabulation of votes for and against Ike's so-called policy, 14 votes are on one bill. That is to say, the Congressional Quarterly multiplies 1 vote just 14 times, then uses the total as part of its findings.

A New Deal publisher, one who has shown so much interest in left wing publications, who undoubtedly is engaged in a legitimate money-making enterprise, but under a misleading name, and who obviously does not state the facts, should not be seriously considered by anyone seeking an accurate knowledge of what is happening in the Congress. The Daily Worker would be as reliable and accurate a source.

Apparently, the purpose of the publisher of the so-called Congressional Quarterly is to make money, further his political objectives, regardless of facts.

Ike has frequently said he did not expect or want a yes-man Congress. Ike certainly knew when he accepted the nomination of the Republican Party that Republicans were free thinkers and free wheelers. If he did not then know, he has since learned, that the average Republican has rather firm convictions and that he will not for political support abandon those convictions. It is my understanding that, with that in mind, Ike accepted the nomination and the support of those who were thoroughly disgusted with and afraid of New Deal candidates and policies.

The Democratic Party is as deeply divided on issues as is the Republican Party. It is ridiculous for anyone to intimate that the members of any party, consisting as it does of millions of individuals, will ever channel their words, their thoughts, or their votes down one avenue. If that policy were followed, we might just as well call in a dictator. Few, if any, of us want that.

If, after reading the proceedings in the House of late yesterday afternoon, anyone is in doubt as to who really likes Ike, information can be obtained by reading the proceedings in the other body—yesterday's RECORD, pages 7354–7363.

Evidently the Members of the House occasionally enjoy, indulge, in the political sport of needling each other as to who is or is not supporting a very popular President endeavoring to do what he thinks is best for the country.

REDUCTION OF FEDERAL INCOME TAXES

The SPEAKER. Under previous order of the House, the gentleman from Connecticut [Mr. SADLAK] is recognized for 10 minutes.

Mr. SADLAK. Mr. Speaker, I need not remind my colleagues in the House of the demands of all our citizens for more effective control of Federal spending and tax reduction as soon as possible. I am sure that their mail reflects this desire as much as does the correspondence pouring into my office.

On March 28, 1957, I introduced H. R. 6452 with the hope that this would provide a basis for a sound solution to the dual problem of ever-increasing Federal spending based on increased yields from our high and discriminatory income tax rates.

My bill would provide tax reductions in all brackets for personal income taxpayers and would also reduce the corporate tax over a period of 5 years. The scheduled tax reductions would result in a top rate of 42 percent for both the personal and corporate tax.

In other words, my bill not only would reduce taxes, but would reform the present rate structure with the greatest long-term benefit going to key people in the middle income ranges and to small-business men. Rate reduction rather than new complex mitigating devices is the basic answer to the tax problems of small business. My bill would provide these reductions and, further, would introduce a new and important principle into our tax law; that is, that the unincorporated business should not pay a higher top rate of tax than a corporation.

H. R. 6452 anticipates that the almost $15 billion of tax reductions it provides for would be paid for out of the revenue growth resulting from the high level operation of our economy. However, it also recognizes that any of the scheduled tax reductions could be postponed for a period of 1 year and not more than once if budget balance was threatened. This means that the 5 years of reductions could be spread over a maximum of 9 years.

This latter feature of H. R. 6452 is attracting increasing interest as evidenced by the mail I have been receiving from all over the country.

It appears from the interest of our citizens in H. R. 6452 that they are strongly in favor of Congressional action which would set up a series of forward-scheduled tax reductions and at the same time control Federal spending rather than wait for onetime tax reduction when a substantial budget surplus is actually at hand, but not knowing when such a reduction would take place again and not being sure that the emergency-enacted rate structure would be reformed to meet the needs of our growing population.

I am, of course, heartened by the progress being made to reduce Federal spending in the 1958 budget, but am aware that the effect of some of these reductions will not be appreciable until later fiscal years.

However, I am disturbed by reports that the estimated surplus of $1.8 billion for fiscal 1958 will be somewhat less than this figure and, further, I am disturbed by the widespread feeling that we cannot look forward to lower taxes until a surplus of somewhere between $3 to $5 billion is in sight.

For these reasons, I would like to point out to my colleagues that even if substantial spending reductions do not show up in fiscal 1958, my bill could be enacted and the first reductions go into effect January 1 next without impairing budget balance. If the first of the five reductions contained in H. R. 6452 went into effect on January 1, 1958, the revenue effect in the fiscal year 1958 would be only about $1 billion.

The reason my bill would have only a $1 billion revenue effect in fiscal 1958 is that only half of the effect of the personal tax cut would occur in fiscal 1958 and none of the corporate reduction would be reflected in that fiscal year. The cost, of course, would be greater for each of the succeeding years, but the

competition between increased spending and lower taxes that would be set up by H. R. 6452, I am certain, would result in spending control that would easily permit all of the reductions to take place with little or no resort to the postponement procedures.

The effectuation of the first of the reductions under my bill, I feel certain, would give our citizens renewed confidence and spur them to greater economic effort when they realize that similar reductions would be forthcoming over the immediate years ahead. In other words, tax cuts properly applied, instead of resulting in net revenue loss, should result in substantial future revenue gain because of the release of funds to further economic growth.

We have a recent illustration of this economic contention. In 1954, taxes were reduced a total of $7.4 billion which it is now estimated have resulted in total tax saxings of a minimum of at least $25 billion. Despite this tax saving enacted in 1954, overall Federal revenue has increased in the fiscal years 1955, 1956, and 1957 an estimated net amount in excess of $11 billion. Clearly, this tax reduction resulted in substantial net revenue gain and I am convinced that such would be the case if my bill were enacted.

For the information of my colleagues, I should like to call to their attention the following sampling of my mail since I introduced H. R. 6452. I am particularly gratified at the support I have received from my own State of Connecticut, but my colleagues will note that I have heard from every section of the country, and while I have not had time to check because of the heavy volume of mail, I believe that I have heard from every one of the 48 States.

FROM CONGRESSMAN SADLAK'S MAIL BAG ON H. R. 6452

This is a sound basis on which to proceed to gradually reduce the back breaking burden of taxation we have so long been enduring. (J. R. N., April 10, 1957, Bath, Maine.)

You are working in the interest of a tremendous share of the population which needs and must get relief from overwhelming tax burdens. (G. A. B., April 16, 1957, Greenwich, Conn.)

Your bill * * * will go a long way toward returning to me the discretionary power to determine myself the uses to which I want to put the income I have earned. (H. E., April 16, 1957, New York, N. Y.)

By far the most practical and most urgently needed piece of legislation this or any Congress in recent years has had an opportunity to consider. (G. B., April 11, 1957, Short Beach, Conn.)

I have talked with many accountants and I have not yet found one who is not strongly in favor of the bill. (L. C. A., April 12, 1957, Hartford, Conn.)

I want to let you know that the effort you are making * * * is greatly appreciated by me and I am sure by very many of your constituents and millions all over the country. (G. F. M., April 16, 1957, New York, N. Y.)

In my judgment offers advantages for all taxpayers over the several other proposals which have appeared in the press. (W. C., April 15, 1957, Milford, Conn.)

I do want to congratulate you for coming up with something that makes sense. (H. C. S., April 15, 1957, Torrington, Conn.)

Please know that from out here in the Midwest the merits of your H. R. 6452 are obvious. * * * Your bill is a step in the right direction and you are to be commended for it. (T. W. B., April 8, 1957, Alton, Ill.)

Painless and seems to restrain wild spending by our Government. * * * It is hoped that popular approval will influence your committee and the Congress to pass it. (H. F. P., April 15, 1957, Collinsville, Conn.)

Would be quite a stimulant to individuals to invest, and small businesses to expand, both supplying a greater abundance of products at a lower consumer cost. (H. S. C., April 5, 1957, Ansonia, Conn.)

These reductions, based on the increase to be realized from economic growth, are both feasible and realistic. (E. J. F., April 19, 1957, Memphis, Tenn.)

Represents a forward step toward tax relief for individual citizens as well as business, and thus it is good for the many rather than the few across the whole country. (D. E. W., April 17, 1957, Framingham Center, Mass.)

We * * * compliment you on the courageous stand that you have taken. * * * We are certainly in agreement with your thoughts that there is something fundamentally wrong with a tax structure which penalizes hard work, risk taking, and achievement. (W. C. D., April 5, 1957), Manchester, Conn.)

Deserves whole-hearted support from both parties. In the minds of the voting public it should be the most popular bill that has been put in the hopper in many years. (F. I. N., April 3, 1957, New Haven, Conn.)

It has renewed my faith in our democratic processes. (L. H. R., April 8, 1957, San Francisco, Calif.)

Believe your gradual tax cutting bill an excellent one * * * flexible enough for the Government to work under, yet clearly sets the pattern for reduction in spending. Good luck. (T. J. W., April 15, 1957, South Norwalk, Conn.)

May I congratulate you and wish you the best of luck on this fine bill. (R. L. N., April 16, 1957, Winsted, Conn.)

You are to be congratulated most heartily for the forthright manner in which this bill attacks the really serious problems of our present highly discriminatory income-tax rates. (H. F., April 15, 1957, Detroit, Mich.)

This is a note of appreciation and encouragement from a fellow citizen and to inform you that I am writing certain members of the Ways and Means Committee urging favorable consideration of your bill. (R. C., April 15, 1957, Stamford, Conn.)

A healthy approach to tax reductions and Federal spending. * * * The final result should leave more after-tax income dollars for personal determination or choice in spending. (D. Y., April 16, 1957, Chappaqua, N. Y.)

A measure which is long overdue. (R. L. P., April 5, 1957, Montville, Conn.)

Deserves the support of your fellow members of the Ways and Means Committee and of all Representatives. * * * Thank you for your thoughtful patriotism. (F. E. S., April 16, 1957, Coraopolis, Pa.)

I want you to know that we are behind you. (H. W. S., April 15, 1957, Bridgeport, Conn.)

You are certainly to be congratulated upon the forthright approach which you are taking to the problem. (H. D. K., April 12, 1957, Peoria, Ill.)

I sincerely hope that this sensible piece of legislation will get the support of our legislators. (L. A. D., April 15, 1957, Naugatuck, Conn.)

A pleasure to support your bill. * * * Is certainly a credit to yourself and the people of Connecticut. (E. S. M., April 15, 1957, Botsford, Conn.)

You are to be complimented on your courage in introducing this type of bill. * * * I'm sure you will find many persons who agree with your objective. (R. I. C., April 15, 1957, Peoria, Ill.)

The objectives * * * must meet with the approval of every taxpayer. (W. G., April 12, 1957, New Britain, Conn.)

I wish it success in passing. (L. T. H., April 15, 1957, St. Louis, Mo.)

A logical solution to our growing tax burden. We hope this bill will receive favorable action. (C. M. P., April 15, 1957, Stratford, Conn.)

It seems to me * * * an extremely sensible solution to one of our greatest problems. I strongly urge * * * public hearings on this fine piece of tax legislation. (R. W. G., April 15, 1957, Danielson, Conn.)

We express our appreciation * * * America may preserve her economy. (H. C. S., April 16, 1957, Chicago, Ill.)

Nothing could be more constructive toward the sound development of our domestic economy. (W. P. B., April 2, 1957, Fort Worth, Tex.)

Statesmanlike approach to taxes * * * my sincere congratulations. (H. M. H., April 12, 1957, East Hartford, Conn.)

Would require our Congress to keep Government spending within realistic and reasonable bounds. (N. B. B., April 15, 1957, Hartford, Conn.)

We're counting on men such as you. (A. S., April 1, 1957, Bloomfield, Conn.)

This bill most certainly has my approval and will receive my support * * * My confidence has been restored quite somewhat by the deep thought put into H. R. 6452. (W. H. F., April 4, 1957, Waterbury, Conn.)

It is my humble opinion that this deserves very serious consideration. Tax relief * * * seems essential if the American economy is to retain proper incentives for the development of future leadership. (B. W., April 3, 1957, New Haven, Conn.)

We * * * commend you on your action in introducing this bill to the Congress and we would certainly be most happy to do anything in our area to assist you in gaining support for the bill. (C. S. C., April 9, 1957, Elyria, Ohio.)

Your approach to the problem seems to me eminently sound and I sincerely hope that it can command the support which I believe it deserves. (R. W. S., April 10, 1957, Worcester, Mass.)

You will have our every assistance by informing as many people as we possibly can of your proposals to reduce this (tax) burden. (B. J. V., April 10, 1957, Poughkeepsie, N. Y.)

I compliment you on the introduction of this measure and I hope it may be enacted into law. (A. W. B., April 4, 1957, Bridgeport, Conn.)

My appreciation to you for the courage to introduce a bill for a reduction in taxes. (H. A. G., April 5, 1957, Bridgeport, Conn.)

Had we enough statesmen of your stature in Washington in past years, we would not be now dangling over the precipice of socialism as is unfortunately the case. (L. B. L., April 11, 1957, Altavista, Va.)

I think you are to be congratulated by people in all walks of life for your very able presentation of this subject. * * * Your action * * * confirms the opinion that I have long held that Connecticut has not in many years had more capable representation in Washington than it is receiving from you. (N. W. F., April 3, 1957, West Hartford, Conn.)

This is one of the most constructive pieces of legislation that has been introduced for a long time, and should receive the approval of not only businessmen, but every man, woman, and child in the country. (E. M. F., April 3, 1957, West Hartford, Conn.)

This is a practical and feasible plan which, if adopted, would strengthen our national economy and greatly benefit people at all levels of income. I congratulate you on your wisdom and foresight in introducing this bill. (C. D. M., April 5, 1957, Meriden, Conn.)

This approach is the best solution to this problem which has been suggested and you are to be complimented on it. (T. P. B., April 11, 1957, Quincy, Ill.)

Great gratification * * * that our Representative at Large from the State of Connecticut has taken the initiative and introduced a tax-cutting bill. (N. H. P., April 5, 1957, South Norwalk, Conn.)

The most constructive step yet taken in the direction of reducing the heavy taxation with which we are all burdened and at the same time keeping our budget in balance. (G. L. T., April 5, 1957, Bridgeport, Conn.)

You are to be highly congratulated on your efforts to bring about a very necessary reduction of both individual and corporate taxes. * * * Continue your efforts in bringing about this much needed legislation. (J. H. W., April 4, 1957, Danbury, Conn.)

Makes a great deal of sense to me. (R. G. T., April 11, 1957, Winona, Minn.)

High time we started down the path of tax reduction. * * * You are to be congratulated for your forthrightness in meeting the problem head on. (R. M. B., April 7, 1957, New Haven, Conn.)

A constructive move. * * * Scheme is more sensible and has more chance of success than an immediate one for which sufficent preparation has not been made. (S. M. C., April 5, 1957, New Britain, Conn.)

There is complete agreement on my part with the approach you are taking. You certainly are to be congratulated on this proposal, which will help meet one of the pressing problems of our times. (B. L. O., April 11, 1957, St. Paul, Minn.)

Action such as the bill you have introduced is essential if this country is to continue free and prosperous. (C. B. S., April 8, 1957, New Haven, Conn.)

I have had very favorable reports from various persons I have spoken to about this bill. (H. C. B., April 8, 1957, East Hampton, Conn.)

Something that is long overdue and should be presented in all fairness to small businesses as well as individuals. (D. E. H., April 12, 1957, Peoria, Ill.)

My congratulations for your forward look. (A. D. B., April 8, 1957, New Haven, Conn.)

I am sure you are well aware of the growing concern over Government expenditures and I commend you for this businesslike program of brinking the income-tax structure down to reasonable levels. (R. L. W., April 5, 1957, New Britain, Conn.)

A very important legislative step, and you are to be congratulated on taking it. (E. S. G., April 8, 1957, Hartford, Conn.)

We believe that your bill provides a sound approach to the tax-reduction problem and we hope that its gets full support of Congress. (W. D. S., April 15, 1957, Racine, Wis.)

I think you have approached the matter of tax reduction along well-conceived lines, and I feel that it is a reasonable and practical solution. (H. B. D., April 19, 1957, Nashville, Tenn.)

I am greatly encouraged by your approach. * * * Some action needs to be taken along the lines of your proposal to restore to individuals and corporations, the incentives which have largely disappeared under present tax laws. (J. F. W., April 19, 1957, Cincinnati, Ohio.)

It sounds very reasonable and practical. (R. A. M., April 12, 1957, Stafford Springs, Conn.)

We are watching this bill with keen interest. (F. B. G., April 12, 1957, Meriden, Conn.)

A decisive step in the right direction to relieve unreasonable and pyramiding taxes prevalent for so long. (E. E. S., April 17, 1957, Glen Falls, N. Y.)

It is the work of a statesman and will relieve the present unbearable heavy tax load. (R. S. L., April 19, 1957, Louisville, Ky.)

The sooner you can get that bill passed both in the House and the Senate, everybody will be pleased. (J. O. K., April 12, 1957, New Haven, Conn.)

Sincere gratitude for your aggressive efforts to cut the total tax bill, which certainly is a "must." (M. D. C., April 19, 1957, Westbury, N. Y.)

Fine job you have done on this bill and assure you of my respect and confidence. (D. W. P., April 12, 1957, Plymouth, Conn.)

This is something we have needed for some time * * * best wishes for the successful passage of this bill. (B. G. B., April 12, 1957, South Norwalk, Conn.)

In my opinion, it illustrates some very clear thinking on a subject which is of national importance and offers a solution both to the taxpayers of this country and to the departments of Government. (A. A. L., April 12, 1957, Middletown, Conn.)

I hope that you will be able to arrive at a constructive, concrete, legislative result along the lines that you have suggested in H. R. 6452. (W. R. H., April 22, 1957, New York, N. Y.)

I commend you upon the practicality of your approach to this problem of creeping confiscation and upon the boldness and clarity of your presentation. (J. W. H., April 23, 1957, Wallingford, Pa.)

Tax reform of this kind is long overdue and I wish you success in your efforts. (L. T., April 24, 1957, Hagerstown, Ind.)

The proposed legislation ties together two problems—increasing expenditures by the Government with inflationary results, and the current tax structure which prevents small-business men, professional people and others from acquiring and providing the risk capital needed by our expanding economy—and provides a realistic solution. (L. G. P., April 19, 1957, Schenectady, N. Y.)

I hope your bill will pass so that I might be in better shape to look after some of my bills. (S. L., April 13, 1957, New Britain, Conn.)

Believe your H. R. 6452 bill has many beneficial features to business and individuals. Hope you are successful in securing its passage. (O. B. H., May 1, 1957, Seattle, Wash.)

Would lay down a firm commitment on the Congress to keep its word to the American people that it intends to lighten the almost unbearable load that is being added year by year until now, the saturation point is practically here. (J. J. B., April 13, 1957, Milford, Conn.)

It strikes me as being a very sound piece of legislation and is also most timely. (E. D. W., April 24, 1957, New Orleans, La.)

This is "must" legislation to encourage the availability of risk capital for the continued advance of our standard of living. (C. N. F., April 19, 1957, Stafford Springs, Conn.)

Keep up the good work. (T. M. M., April 17, 1957, El Dorado, Ark.)

I sincerely hope your bill will receive the support it deserves. (W. E. S., April 24, 1957, Hendersonville, N. C.)

A sane and reasonable approach to the solution of a problem which is becoming extremely serious. (H. R. W., April 17, 1957, Scotia, N. Y.)

Your bill * * * serves as a much-needed damper on Federal spending. (D. A. S., April 27, 1957, Erie, Pa.)

I heartily approve of your actions and congratulate you for your stand on such an important issue. (C. R., April 19, 1957, West Hartford, Conn.)

It travels so effectively in the direction that we think Government tax policy should take that it will have our wholehearted support. (W. J. G., April 23, 1957, Milwaukee, Wis.)

This is most assuredly a step in the right direction and I wish you every possible success in your undertaking. (E. C. B., April 17, 1957, Houston, Tex.)

I feel that the Sadlak bill goes a long way toward remedying the gross inequities in our tax system. (R. H. W., April 19, 1957, Wilton, Conn.)

I have written to my Representative * * * expressing my opinion that your bill should be given his unqualified support. (A. C. B., April 29, 1957, Hickory, N. C.)

It appears to me as though the people are fed up with the confiscatory and punitive taxes now in effect and I see no reason why your bill should not pass both Houses with a substantial majority. (G. D. M., April 29, 1957, Duncan, Okla.)

I think that your general plan for a 5-year schedule of tax reduction is well thought out. * * * I think it is a definite step in the right direction, and I would like to give my wholehearted support to a bill of this kind. (E. G. C., May 1, 1957, Westerly, R. I.)

It is good to see your alertness to this income-tax burden, which has become a malignant growth on the economy of our Nation. (C. E. V., April 18, 1957, New Haven, Conn.)

We think this is one of the best bills that has been introduced so far for the reduction of taxes that will be beneficial to all of the people of our country. (D. T. J., April 18, 1957, Birmingham, Ala.)

Sincere congratulations for your forthright, courageous, and timely stand on tax reduction. I join with the many people over the Nation in wishing, and hoping, and working for the complete success of your program. (W. M. D., April 18, 1957, Schenectady, N. Y.)

This bill has the overwhelming support of all citizens who have any knowledge of it. (K. A., May 8, 1957, Denver, Colo.)

I congratulate you on this very sensible piece of legislation. (H. M. T., April 23, 1957, Atlanta, Ga.)

The bill shows that careful research has been done before it was submitted, and I am sure you will find wide public support for it. (E. B. C., April 24, 1957, Hartford, Conn.)

Allow me to applaud most heartily your introduction of H. R. 6452. (H. P. B., April 23, 1957, Louisville, Ky.)

My sincere commendation and appreciation for the real contribution which you are endeavoring to make to the people of America. (G. G. K., April 19, 1957, Baltimore, Md.)

Congratulations on * * * H. R. 6452 leaving more tax dollars for personal choice in spending, also leaving a few extra dollars for risk taking in high income groups. (R. S. B., April 30, 1957, Salt Lake City, Utah.)

Meritorious and deserves the benefit of scheduled public hearings. (W. J. B., April 16, 1957, Bristol, Conn.)

May your courageous approach in this area stimulate the thinking and action of all your colleagues toward the reduction of high taxes. (R. R. P., April 19, 1957, Timonium, Md.)

I agree very much with your point concerning the risk-taking factor and the factor on accumulation of new capital. (W. W. N., April 18, 1957, Cleveland Heights, Ohio.)

Bravo. * * * Your proposal in H. R. 6452 is one of the most outstanding pieces of progressive future thinking legislation I have seen in quite some time. (W. E. W., April 18, 1957, Bridgeport, Conn.)

Workable and it makes sense. It has neither too much nor too little. (J. H. A., April 18, 1957, South Bend, Ind.)

I am very much interested. * * * Would you be kind enough to send me 100 copies. (J. M. H., May 13, 1957, Charleston, S. C.)

I hope and urge that you leave no stone unturned to obtain passage of this legislation. (K. D. S., April 17, 1957, East Cleveland, Ohio.)

I believe there is a compelling need for legislation of this type to relieve the strangling effect of the present heavy tax burden upon our entire economy. (C. H. H., April 16, 1957, Liverpool, N. Y.)

H. R. 6452 would be good for individual citizens, good for business, and those business serves, good for the security of our Nation, and thus good for the many across

the whole country. (E. E. B., April 18, 1957, Wynnewood, Pa.)

Commonsense approach to a tax reduction program. (L. H. M., April 18, 1957, South Bend, Ind.)

I have attached for your information and encouragement a copy of the letter I sent to my own Congressman urging the adoption of your bill. (F. J. W., April 16, 1957, Schenectady, N. Y.)

I would like you to know that the thoughts expressed in your speech give me considerable encouragement and hope that efforts such as yours may result in a more realistic Federal tax system. (H. J. C., April 17, 1957, Ipswich, N. H.)

In our opinion your bill would be greatly beneficial to the country's economy. (J. P. H., April 22, 1957, Niles, Ohio.)

My friends and I are very much interested in * * * H. R. 6452. (J. L. A., April 24, 1957, Chicago, Ill.)

Of vital importance to every citizen and the Nation as a whole (K. G. A., April 17, 1957, Scotia, N. Y.)

It is certainly most refreshing to note a carefully considered appraisal of our important Federal tax policies, together with what I am convinced are sound proposals that would lead to their significant improvement. (C. S. L., April 23, 1957, Norwalk, Conn.)

We believe your bill would benefit all earners in all income tax brackets. (D. O. D., April 23, 1957, Waynesboro, Va.)

Most encouraging development in the entire field of Federal tax legislation * * * will have wide public support. (C. R. O., April 23, 1957, New York, N. Y.)

I heartily approve of your bill to reduce the percentage brackets in the income tax system. I wish you all possible success. (R. C. W., April 22, 1957, Cleveland, Ohio.)

I congratulate you on the fine bill * * * you have presented. I wish you every success. (J. T. W., April 23, 1957, New Haven, Conn.)

My congratulations to you for an unusually well balanced approach to the problem. (C. S. H., April 18, 1957, Alplaus, N. Y.)

H. R. 6452 should receive favorable action. May I congratulate you on this practical and intelligent approach. * * * Thank you for your efforts in behalf of the taxpayer. (J. H. M., April 22, 1957, Knoxville, Tenn.)

One of the most important bills introduced in Congress. (A. S. R., April 23, 1957, New Haven, Conn.)

Your proposals are most enlightening. * * * I want to commend you for your courageous and forward-look attitude. (G. R. F., April 23, 1957, New York, N. Y.)

It is worthy of the support of your fellow Congressmen, both Republican and Democrats, and hope it will be enacted into law. (F. G. R., April 23, 1957, Jacksonville, Fla.)

The bill you have designed holds promise. (J. B. C., April 22, 1957, Birmingham, Ala.)

We are certainly interested * * * and you are to be commended for your action. (J. M. D., April 22, 1957, Boise, Idaho.)

In the public interest promptly to schedule public hearings on H. R. 6452. The proposed bill certainly embodies some very constructive thinking as well as an ingenious approach to curb irresponsible spending. (R. K., April 23, 1957, Springdale, Conn.)

I sincerely hope your recommendations will be given serious and favorable consideration by all who have responsibility for framing legislation affecting the bright future we're aspiring to. (H. N. S., April 23, 1957, New Lebanon Center, N. Y.)

Your efforts * * * are very much appreciated. (V. L. C., April 22, 1957, Portland, Oreg.)

My congratulations for your courage and statesmanship when you introduced your bill, H. R. 6452. * * * I assure you it is most encouraging to see the grasp of this situation you have. (N. W. K., April 18, 1957, Roanoke, Va.)

A sound approach in curbing the present inflationary rise and trend of Government spending. (H. A. O., April 23, 1957, Stratford, Conn.)

Congratulations to you on this fine piece of legislation. (H. J. M., April 22, 1957, Brooklyn, N. Y.)

You are deserving of congratulations and high praise for the introduction of such a sound and equitable tax bill as H. R. 6452. (F. W. D., April 18, 1957, Grand Rapids, Mich.)

I think you have approached the matter of tax reduction along well-conceived lines, and I feel that it is a reasonable and practical solution. (H. B. D., April 19, 1957, Nashville, Tenn.)

My congratulations to you on your clear thinking and action which is designed to benefit all Americans and relieve all taxpayers. (A. N. W., April 17, 1957, St. Louis, Mo.)

Congratulations for the ingenuity shown by you in the drafting of tax reduction bill H. R. 6452. (C. S. S., April 23, 1957, Jacksonville, Fla.)

I think you would * * * be interested in a song introduced last week at the Kiwanis Club. The words are attached hereto. The melody is that of the Whiffenpoof song.

"We're taxpayers all
Let's face the facts—
Tax, tax, tax
For dear Uncle Sam
We break our backs—
Tax, tax, tax
Men of Kiwanis, all are we,
Taxed from here to eternity,
God have mercy on such as we,
Tax, tax, tax."

(J. H. I., April 22, 1957, New Haven, Conn.)

We are all for you and we think your proposal is very timely and I know that there are many people that I have talked to that feel the same way about these reductions that you do. Please keep up the good work. (F. T. S., April 24, 1957, Roanoke, Va.)

Sincerely believe this to be one of the most constructive pieces of tax legislation introduced in many years. (P. H. H., April 23, 1957, Birmingham, Ala.)

It is seldom that I find myself in such complete agreement with the views of someone else. I am sure that your proposed tax reductions would be a boon to all Americans. (J. R. M., April 16, 1957, Fairfield, Conn.)

Bill is fundamentally sound and good for the country. (J. N. P., April 19, 1957, New Hartford, N. Y.)

Sound forward thinking and the needed deterrent to increasing Federal spending. (F. E. H., April 17, 1957, Teaneck, N. J.)

The time is long overdue for some relief for the American taxpayer and your bill is so drawn that it does give relief to all groups. (A. E. L., April 16, 1957, Hartford, Conn.)

Your bill, I am sure, can ultimately bring about a balanced budget, and fair and equitable taxation program for individual incomes. (M. J. D., April 18, 1957, Ossining, N. Y.)

My gratitude for your splendid efforts * * * your tax relief bill H. R. 6452 is exceptionally good. (W. J. M., April 16, 1957, Schenectady, N. Y.)

My hat is off to you on your bill, H. R. 6452. It is the most sensible approach I have seen of reducing taxes which are so oppressive to everyone. (H. H. C., April 16, 1957, Hartford, Conn.)

Best of luck to you in success with your tax-relief bill, H. R. 6452. (J. R. P., April 17, 1957, Chappaqua, N. Y.)

I am heartened by your tax-relief bill, H. R. 6452. (C. W. L., April 17, 1957, New York, N. Y.)

It is a sensible, workable and necessary piece of legislation. (C. L. E., April 18, 1957, Waterbury, Conn.)

Very much pleased with your action and with the principal features of this bill. (L. L. F., April 18, 1957, Larchmont, N. Y.)

AGRICULTURAL EXPORTS UNDER PUBLIC LAW 480

The SPEAKER. Under previous order of the House, the gentleman from Wisconsin [Mr. LAIRD] is recognized for 20 minutes.

Mr. LAIRD. Mr. Speaker, Public Law 480, the Agricultural Trade Development and Assistance Act of 1954, was enacted by the 83d Republican Congress in July of 1954 with strong bipartisan support. The bill which was aimed at putting our mounting agricultural surpluses to constructive use abroad had four major purposes:

First. It authorized the sale of commodities to friendly countries for their own currencies. This enabled us to open up markets in many countries of the world, particularly underdeveloped nations, which desired to buy our commodities but which were short of the necessary foreign exchange.

Second. It authorized the use of Commodity Credit Corporation surpluses in meeting emergency relief needs abroad such as the victims of floods or earthquakes.

Third. It encouraged and expanded the barter program under which surpluses are exchanged for strategic materials. In other words, it provided for the exchange of farm surpluses for foreign-produced critical materials which would be useful in the event of international emergency.

Fourth. It encouraged the use of surpluses by American private relief and church agencies to help feed needy persons abroad on a continuing basis.

OVERALL RESULTS OF TITLE I, PUBLIC LAW 480

Operations under the law have grown rapidly in volume. Agreements were signed during the first year the law was effective, 1954–55, totaling $488 million at CCC cost and $362 million at export market value. In 1955–56, new agreements were signed in the amount of $1 billion at CCC cost and $686 million at export value. To date this year, additional agreements negotiated total $1.4 billion at CCC cost and $939 million at export market value. Thus, in 9 months of 1956–57 new agreements were concluded almost as large in total as in the previous 2 years.

Included in agreements signed to date are: Wheat, 430 million bushels; feed grains, 75 milion bushels; rice, 22 million hundredweight; tobacco, 145 million pounds; cotton, 2.5 million bales; fats and oils, 1.6 billion pounds.

I think it would be useful to clarify one point—that is, the difference between CCC costs and export-market value. As you know, the fund limitation in the law is in terms of CCC costs. This means that the authorization is charged the full cost of any commodities supplied under the program. Such costs include the cost of acquisition and carrying charges of price-support commodities, processing, transportation, and handling charges. Thus, during 1955–56 a bushel of wheat delivered to port resulted in an average charge of about $3.30 to the authorization. The foreign buyer paid about $1.65 a bushel which was the prevailing export price and this was the amount he was required to pay

in his own currency. In general, to date the authorization has been charged $3 for every $2 worth of commodities purchased by foreign buyers.

Looking at results another way, exports in 1954–55 were small totaling about $73 million at export value or about 2 percent of total agricultural exports. In 1955–56 title I shipments jumped to $435 million which was 12 percent of agricultural exports. In the first 8 months of 1956–57, title I exports averaged about $60 million monthly, 16 percent of our farm exports. And this rate should hold for the balance of the year. This is solid evidence of the contribution the title I program has made and is continuing to make to the booming export outlook.

The current $3 billion authorization is virtually exhausted at the present time. Agreements have been signed for almost $2.9 billion at CCC cost and the small balance will be used in a very short time. That is why action should be taken promptly on the administration's request for additional funds. I understand that hundreds of millions in new requests have been received which cannot be considered until new funds are made available.

TOTAL UNITED STATES AGRICULTURAL EXPORTS AND TITLE I OF PUBLIC LAW 480

I am sure all of us heartened by the progress which has been made in expanding agricultural exports. These exports have increased in value from about $2.8 billion in 1952–53 to $3.5 billion in 1955–56. On a volume basis, the increase was even more impressive. Last year's exports were the highest in quantity for the last 30 years.

The gain in exports is proceeding at an accelerated rate during the current season. For the first 8 months of 1956–57, overseas shipments totaled about $3.2 billion in value. This is 50 percent higher than the export total on the same date last year. It appears that for the entire 1956–57 season our agricultural exports could total as much as $4.5 billion. The attainment of such a level would mean new all-time highs in both value and volume, far above previous records.

The improved export outlook results from many factors including a stepped-up program to dispose of price support stocks and more competitive export pricing policies, particularly for cotton, greater needs abroad because of poor crop conditions, some forward buying abroad because of the uncertainty resulting from the situation in Suez and behind the Iron Curtain, and the effects of special surplus disposal programs especially those undertaken under title I of Public Law 480.

Very briefly, it appears that the title I program has had the following major commodity effects:

First. The program is largely responsible for the commitment of the rice surplus accumulated from the 1953, 1954, and 1955 crops and a part of the potential surplus from the current crop—this has materially strengthened marketing conditions for rice producers during the current season.

Second. Title I has made a major contribution to a tremendous expansion in wheat and wheat flour exports during the current season which could total as much as 450 million bushels. This would make possible a reduction in surplus wheat stocks of about 50 million bushels, the first reduction in carryover in 5 years.

Third. Exports of nearly 600 million pounds of cottonseed and soybean oil moved under the foreign-currency program during 1955–56, which helped to raise our total exports of vegetable oils to a new record level—this was the major factor in maintaining firm soybean prices to producers last year and it kept soybeans and cottonseed out of CCC hands under the support program.

Fourth. Title I exports of over 100 million pounds of lard made in 1955–56 have been of material help along with other actions taken by the Department of Agriculture in the present strength in hog prices.

Fifth. Public Law 480 exports of 71 million pounds of tobacco last year represented about three-fifths of the increase in tobacco exports as compared with the previous year and helped push exports to the highest level in 10 years.

Sixth. Title I programs were responsible for the movement of over 20 percent of total cotton exports last year despite the fact that prices were not competitive most of the year and the movement of as much as 1½ million bales of cotton this season which will help swell cotton exports to the highest level in 23 years.

TITLE I, PUBLIC LAW 480 COMMODITY HIGHLIGHTS

DAIRY PRODUCTS

Dairy products sales for foreign currency under title I of Public Law 480, are helping us keep the commodities (butter, cheese, nonfat dried milk) under the price-support program down to a current basis. Out of 800 million pounds of nonfat dried milk, over 15 million pounds are disposed of under title I, Public Law 480. India is expected to import about 10 million pounds of this 800 million pounds. Twenty to twenty-five million pounds out of 150 million pounds of butter will be disposed of under this program. It is expected that about 5 million pounds of cheese will be taken under title I during the next fiscal year. During the program to date the major countries involved in programing the cheese have been Israel, Greece, and Korea. USDA is now able to take care of the surpluses on a seasonal basis so that it can dispose of everything acquired by CCC under the price-support program.

RICE

The story on rice must certainly be most welcome to rice producers. At the beginning of the current year about 22 million bags on a milled rice basis were in CCC inventory or under loan. By June 30, CCC stocks should be cut in half. This huge reduction in surpluses will result from a record export year of about 25 million bags. And about two-thirds of these exports are being made under title I programs with India, Korea, Pakistan, and Indonesia. Thus, in the space of 12 months expanded export disposals largely stimulated by Public Law 480 are resulting in the liquidation of the rice surplus accumulated from the 1953, 1954, and 1955 crops and a substantial part of the potential surplus from the current crop. Rice producers are benefiting from improved marketing conditions for the current crop and 1957 marketings will not be depressed by the weight of heavy surpluses.

WHEAT

The surplus holdings of wheat have grown larger each year since 1952–53. But in 1956–57 for the first time in 5 years the surplus should be reduced by about 50 million bushels.

The reversal in surplus accumulations is due almost entirely to expanded exports which have risen from 220 million bushels in 1953–54 to 344 million last year. The Department of Agriculture some time ago estimated wheat and flour exports for the current season at a minimum of 415 million bushels. Now it appears that exports should reach 450 million bushels.

A large share of the credit for this gratifying outlook must go to Public Law 480 and particularly to title I. Exports for foreign currency have increased from 24 million bushels in 1954–55 to 93 million bushels last year and are expected to equal or exceed 150 million bushels this year. Much of these shipments are going to countries like India which is finding it possible to expand consumption of wheat as the result of their ability to make purchases in their own currency.

The possibility of a cut in the surplus wheat stockpile is even brighter for 1957–58. With prospects good for continued high-level exports and a substantial reduction in wheat production because of the soil-bank program, the reduction in the wheat carryover at the end of next season should be much larger than the 50 million bushels in sight this year.

COTTONSEED AND SOYBEAN OIL

The programing and shipment of cottonseed and soybean oil under title I in 1955–56 was the key factor in keeping cottonseed and soybeans out of CCC hands. These activities have added millions of dollars to the incomes of soybean and cottonseed producers. Nearly 600 million pounds of these oils were shipped abroad under the foreign currency program last year and this helped push edible oil exports to a record level of almost 1.2 billion pounds, about 55 percent higher than the previous record level. The large exports of oils together with record exports of soybeans kept soybeans and cottonseed above support levels last year. Despite the fact that farmers placed about 30 million bushels of soybeans under price support in 1955–56, only a few thousand bushels were taken over by CCC and these were sold easily.

The record 1956 harvest of 456 million bushels of soybeans, almost 84 million bushels higher than last year's level, made marketing conditions look dark last fall. But again title I has proved of great help. For the entire season, combined exports of cottonseed and soybean oil should approximate last season's record with the continued strong help of Public Law 480.

LARD

Lard exports which totaled about 625 million pounds in 1955–56 have done much to ease the pressure on the livestock industry. Public Law 480 title I shipments accounted for 100 million pounds of this total. This was of material assistance in reaching this export total. It is expected that lard exports under the foreign currency program will be at the same level this year. These exports helped to bolster lard prices during the last few months which in turn contributed to the improvement in prices that hog producers have been experiencing.

TOBACCO

Tobacco exports last year of about 580 million pounds were the highest in 10 years and about 115 million pounds more than in 1954–55. About three-fifths of this increase over the previous year resulted from exports financed under the title I program. The program helped to increase stocks in a number of countries, such as the United Kingdom. It also opened up a new postwar market for tobacco in Korea. The usual marketing requirements under the program have been an important factor in helping increase dollar sales, which accounted for 88 percent of our total tobacco exports in 1955–56.

This year tobacco exports, although expected to be high, may be down to 500 million pounds. The decrease will result from greater competition from other exporting countries, and foreign-buyer resistance to price rises in stronger flavored tobacco and to those varieties of flue-cured tobacco produced last year, which lack flavor and aroma. The title I program will help to prevent a further decline in exports by moving about 55 million pounds of tobacco abroad this year.

COTTON

The big news in cotton is without doubt that American cotton is fully competitive in world markets. This has been the outstanding factor in prospects for exports of at least 7 million bales this year, more than triple last year's low level. Additional factors were rising consumption abroad and a desire to add to low inventories. This sharp change in export outlook means that for the first time in 6 years instead of adding to the existing surplus, carryover stocks should be reduced by more than 2 million bales.

But title I helped to move cotton last season, and the large programs negotiated last year are helping considerably with the strong export movement this year.

In 1955–56 we exported only 2.2 million bales of cotton. This was primarily because our prices were not competitive in world markets during most of the season. But title I helped to keep exports from going lower. Such foreign currency shipments were responsible for about 22 percent of last year's exports. And it is interesting to note that countries with which there were title I cotton programs last season took 99 percent as much cotton as they did the season before, whereas non-Public Law 480 countries took only 40 percent as much cotton in 1955–56 as the year before.

Japan is an outstanding example. We exported 833,000 bales to that country for dollars and yen in 1955–56 which was almost 30 percent higher than exports in the previous year. The United Kingdom, on the other hand, with which there was no program reduced their takings from us by 64 percent.

I repeat that this year, the major reason exports are zooming is because of competitive pricing and so far 7 million bales have been sold for export by CCC. But the fact that title I agreements were outstanding on August 1, 1956 for the movement of about 1.2 million bales of cotton gave considerable strength to the market. Traders could buy with confidence that in addition to improved dollar markets mainly in Europe, cotton purchased could be moved in large volume to title I countries which in most cases are short of foreign exchange. This year it appears that exports under the title I program may be as high as 1½ million bales. And much of this is going to countries like India, Spain, Indonesia, Burma, and Pakistan whose purchases of cotton from us would otherwise be severely limited because of foreign exchange difficulties.

HOW TITLE I, PUBLIC LAW 480 FOREIGN CURRENCIES ARE USED

Commodities are sold under title I of Public Law 480 for foreign currencies. The $3 billion current authorization will result in payments of approximately $2 billion. The $1 billion difference reflects the cost of commodities to the Government under the price support program and the lower world market prices at which commodities are sold for foreign currency.

In round figures, about one-fourth of the $2 billion total will be used to meet United States expenses abroad. This use will return dollars to the Commodity Credit Corporation. Examples of such use are the construction of United States military bases in Spain and Turkey, and the construction of housing for United States military personnel and their dependents in the United Kingdom. About one-tenth will be given to our allies to strengthen their military forces. These funds are being used in the same way as foreign aid defense support funds, and certainly they cut down on the amount of foreign aid dollars that would otherwise have to be appropriated for this purpose.

About 6 percent of the $2 billion will be used for a variety of purposes including the purchase of strategic materials for the United States national stockpile; the purchase of goods for other friendly countries; grants for economic development; the international educational exchange program; translation and publication of books and other literature; and for help to American colleges abroad.

Somewhat less than 2 percent of the total will be used by the Department of Agriculture to develop longer-time commercial markets for agricultural commodities abroad. This program clearly supplements the regular market development work carried on by the Department. These activities are conducted in cooperation with United States trade associations and they give promise of helping boost commercial exports long after the Public Law 480 program has ended.

The largest part of the currency, over half the total, will be loaned to participating countries for economic development. There is no question that these loans help to reduce the amount that the Congress would otherwise have to appropriate for the foreign-aid program. And certainly it makes sense to use our surpluses as capital to help in the development of other friendly countries. As their economies expand, they will be better commercial customers for our farm products.

I would like to point out that many people have referred to title I as a giveaway program. This is not true. Many of the countries receiving loans of foreign currency under title I are also receiving loans, primarily for the import of American industrial materials, from either the Export-Import Bank or the World Bank. If Public Law 480 loans are not regarded as a sound investment, then none of the loans made directly or indirectly with United States funds are a sound investment to these countries. Furthermore, it should be pointed out that the loans are to be repaid, and as repayments take place, they may be used to meet the dollar expenses of the United States in the participating countries.

WHY THE TITLE I, PUBLIC LAW 480 EXTENSION SHOULD BE LIMITED TO 1 YEAR AND $1 BILLION

The Department of Agriculture has requested a 1-year extension in the time in which new agreements may be negotiated under title I of Public Law 480, and an increase of $1 billion in title I funds.

There is general agreement that this disposal program has worked effectively. However, some have suggested that the program should be extended for 2 or 3 years and the funds increased by $2 or $3 billion, rather than the limited extension and addition proposed by the Department of Agriculture.

I believe we should support the recommendations of the Department of Agriculture for the following reasons:

First, an additional $1 billion will permit the same or a larger rate of shipments in 1957–58 as during the current year. This year title I shipments will be about $700 million. Of the agreements already signed, a balance will remain for shipment in fiscal year 1958 of about $400 million. The additional $1 billion will result in new programs totaling about $650 million at export value. About two-thirds of this amount should be shipped in fiscal year 1958. So it is evident that actual shipments next year will be at least as large as this year.

Second, the rate of new programing at a $1 billion annual rate compared favorably with the rate of new agreements signed in the past. Some have assumed that the Department of Agriculture's request represents a decrease in the rate of new agreements, since about $1.4 billion in new agreements have been negotiated since last July 1. We should keep in mind that of this total about $500 million represents second- and third-year portions of the 3-year agreements with India and Brazil. Thus, the $1 billion

request compares favorably with the programing done during the current year if the fiscal year 1957 and 1958 parts of 3-year agreements are excluded.

Third, a 1-year extension assures that the Congress will take another look at this law during the next session of Congress to decide if it should be extended further or altered. After all, our major aim is to sell our agricultural products for dollars. Public Law 480 was passed as a temporary measure to help move the accumulated surplus into channels which did not have dollars to pay us. We are making progress in whittling down the surplus. I think it is healthful for us to have a periodic review of the progress made in surplus disposal. During this review we can also take a close look at the way in which the disposal tools are being used, and whether any changes should be made.

And fourth, and this is entirely a personal reason, I am happy to support request for an authorization from an agency which says do not give us more money than we request. It is refreshing and most unusual. The people in the Department of Agriculture know this program. If they thought they should use more funds effectively, I am sure they would have asked for more. They have done a good job—let us go along with their recommendation.

THE HUN SCHOOL CREW OF PRINCETON, N. J., COMES TO TOWN

Mr. SIEMINSKI. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. SIEMINSKI. Mr. Speaker, in a few days, on Saturday, the 25th of May, many crews of the Schoolboy Rowing Association of America will compete for the national championship in the 23d annual 8-oar rowing classic here on the Potomac.

One of the crews coming to Washington is the Hun School Crew of Princeton, N. J. They will be my guests, and I deem it an honor to have them as my guests, for lunch tomorrow in the Speakers' Dining Room. I attended the Hun School of Princeton.

It was my honor, my privilege, and my pleasure, Mr. Speaker, on May 25, 1929, 28 years ago, to stroke the Hun School crew to victory in the American Henley Regatta to win the Franklin Challenge Cup on the Schuylkill River in Philadelphia. Mrs. Stotesbury, that great lady of ladies, presented the trophy and gave each member of our crew a pewter platter.

As the New York Times put it, on pages S–1 and S–3 of the sports section in the Sunday issue of May 26, 1929, the gruelling race was rowed as follows:

HUN SCHOOL LEADS KENT

(By Robert F. Kelley)

PHILADELPHIA, May 25.—The schoolboy crews opened the 8-oared racing with a blistering mile sprint that shattered the record for the course and found Johnny Schulz's Hun School 8 outlasting Kent School to shoot over the line at the finish ahead of a gruelling race a half length in front.

West Philadelphia Catholic High, after staying for almost the entire distance with the leaders, fell back in the last quarter mile. Germantown Academy was never a serious threat.

Hun School led pretty much over the entire course, with Kent losing a bit of water in the first half of the race, with poor steering. The New Jersey schoolboys rowed a pretty race and had enough left at the finish to stand off a determined challenge from Kent that made the finish a thrilling one.

Hun's time at 4:50⅕ broke the record of 5:04⅖ set by West Philadelphia in 1927.

It was a beautiful race, Mr. Speaker, a beautiful race. Father Sill's Kent school crew was terrific. What fighters. They had Bo Bates and others on it. Mrs. Stotesbury was thrilled with the race.

And as we gather in the Speakers' Dining Room tomorrow, I trust that the Hun school crew of 1957, here to row on the Potomac this Saturday on May 25, will forgive me if I hark back, for just a moment, to another May 25, 28 years ago, in 1929, to pay my respects to our crew then, as I do to the Hun crew now. It is something to set a record that has lasted 28 years, is it not?

On the 1929 Hun crew we had, as the New York Times listed it:

Bow, Kerr; No. 2, Wood; No. 3, Davis; No. 4, Roome; No. 5, Williams; No. 6, Myer; No. 7, Waltz; stroke, Sieminski; coxswain, Kennedy.

That was a great day 28 years ago, Mr. Speaker. The lead lines in the article of the New York Times lists some spirited crews: "Columbia Is Beaten in 150-Pound Race"; "Harvard Crew Wins Title From New Yorkers by Half Length in American Henley"; "First Defeat For Losers"; "Will Not Change Plans for Trip Abroad—Yale 3d, Penn 4th, and Princeton 5th"; "Hun School Leads Kent"; "Princeton Freshmen Beat Penn and Navy Plebes—Codman Victor in Feature Singles."

I have taken the floor at this time, Mr. Speaker, to invite the entire membership of the House to view the 23d annual schoolboy rowing classic on the Potomac this Saturday. The Evening Star and the Washington Post and Times Herald carry details and will report the Regatta. It promises to be a thriller.

George Washington High School is the defending champion. Washington and Lee High School of Arlington, Va., is the favorite. They recently covered the mile course in Philadelphia in 5: 01.8.

But if the spirit of May 25, 1929, the 4 minute 50 4/5 seconds spirit is alive, as I am led to believe that it is, then I think that the Hun school crew of 1957 will show the boys open water at the finish line, beating even our 1929 performance. Good luck, Hun.

Facts on the 1957 Hun School crew are as follows:

Coach: C. Alan Inglesby. Mr. Inglesby is also dean of students.

Manager: J. Hooker Hamersly, Tuxedo Park, N. Y.

Coxswain: Yung Wong, Taipei, Formosa.

Stroke: C. Norman Jones, Clayton, Mo.

No. 7: William S. Hagenbuch, Princeton, N. J.

No. 6: James B. Campbell III, Princeton, N. J.

No. 5: Thomas D. Tilton, Jr., Lawrenceville, N. J.

No. 4: Charles J. Barren, Port Allegany, Pa.

No. 3: Saud Faisal, Saudi Arabia.

No. 2: Fred M. Blaicher, Princeton, N. J.

Bow: Bruce C. Beckman, Sea Girt, N. J.

Spares: Philip H. Foote, Short Hills, N. J.; Henry Huber, Mexico, D. F.; Arthur A. Blaicher, Princeton, N. J.

This year's record: 2 wins, 1 loss.

In closing, Mr. Speaker, I look forward with great pleasure to meeting the Hun School crew in my office tomorrow at around 11:45 a. m. With them will be Dr. and Mrs. Paul Chesebro. Dr. Chesebro is headmaster of the Hun School, founded in 1914 by Dr. John Gale Hun.

From my office, we will proceed to the Speaker's Dining Room. After lunch, the boys will take a spin on the Potomac. They will attend a banquet tomorrow night. On Saturday, they will row their hearts out.

May their memories 28 years hence, in 1985, be as pleasant as mine are of 1929, and will be, of 1957.

It is not known whether the Stotesbury Cup was formerly known as the Franklin Challenge Cup, renamed after Mrs. Stotesbury passed on. The schoolboy regatta on the Schuylkill is 32 years old, starting in 1925.

With the Hun School of today, as it was with Dr. Hun in 1914, the word was always boy: As Dr. Chesebro says in his booklet on the school:

A boy is the future in microcosm, the past forgiven, the world made new. A boy is unformed loyalties, asking guidance. He is strength looking for purpose. He is doubt demanding an honest answer.

Dr. Hun's life work was to point out that answer. He believed from the establishment of his school until his death in 1945, that any normal boy could learn with good instruction. He knew a boy's past record could often be misleading, could tell of the failure of those who had dealt with the boy. Dr. Hun knew a boy has more future than past.

Good luck, boys.

COMMITTEE ON RULES

Mr. SMITH of Virginia. Mr. Speaker, I ask unanimous consent that the Committee on Rules have until midnight tonight to file a privileged report.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

There was no objection.

TRANSFER OF TWO NAVY DESTROYERS TO THE SPANISH NAVY AT SAN FRANCISCO

Mr. SHELLEY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. SHELLEY. Mr. Speaker, on May 15, 1957, under the authority previously granted by Congress, Vice Adm. Robert L. Dennison, United States Navy, commander of the 1st Fleet, delivered title of two United States destroyers to His Excellency, D. Jose Maria De Arellza,

Ambassador of Spain, as respective representatives of the Government of the United States of America and the Government of Spain.

As a native San Franciscan, I am indeed proud of the fact that these two American combat vessels were delivered to the naval forces of Spain in the city of San Francisco. This pride stems from the fact that actually there could have been no more appropriate place for such a transfer of title in view of the historical background of San Francisco and, indeed, all of California. San Francisco Bay was first discovered by the great Balboa, a Spanish explorer, who immediately upon seeing it recognized its value as a seaport, its importance as a base for naval and military operations, and foresaw at that early time its growth as the great metropolitan center of the Pacific coast.

California as a State is rich in Spanish tradition. The first culture brought to California was actually brought in by the Franciscan Friars who built the missions along El Camino Real—the King's Highway—from the Mexican border to Sonoma in northern California. Practically all of those missions still stand and are in use today as a reminder to Californians and all Americans of this generation of our relationship with Spain in the early days of our history. As a matter of fact I, myself, was confirmed in the Mission Dolores Church in San Francisco, which was the last of the missions founded by Father Junipero Serra, whose remains still rest in Mission San Carlos below Monterey, Calif.

We are a State which has, among its population, a great many people who are natives or descendants of the Spanish-speaking countries. In fact the language of Spain is more widely used and understood in California than the language of any country other than our own. The Christian traditions left by the Spanish founders of California still prevail in that great State.

Mr. Speaker, I deem it an honor to make these few brief remarks commemorating this occasion and under unanimous consent I include with my remarks the presentation address made by Vice Adm. Robert L. Dennison and the acceptance address made by His Excellency the Ambassador of Spain, D. Jose Maria De Areilza.

The addresses follow:

ADDRESS DELIVERED BY VICE ADM. ROBERT L. DENNISON, USN, COMMANDER FIRST FLEET, ON THE OCCASION OF THE TRANSFER OF TWO UNITED STATES NAVY DESTROYERS TO THE SPANISH NAVY ON MAY 15, 1957, AT SAN FRANCISCO, CALIF.

Mr. Ambassador, distinguished guests, officers and men of the Spanish and United States Navies, ladies and gentle .en, we are honored to have with us the Ambassador from Spain. His presence underlines the importance of this occasion to the Spanish Government and to our own. We are also honored by the friendly interest of other great nations as expressed by the gracious presence of their representatives.

I am pleased to be here to represent the Chief of Naval Operations, Admiral Burke, and to present his greetings.

It is a pleasure for me, for my colleagues in the United States Navy, and for my Government to see this further stride in the direction of friendly relations between ourselves and Spain.

It is only natural that we, in the Navy of our country, which has a seafaring tradition as old as our history, should feel a strong common bond with the navy of a nation which has made seafaring tradition through the centuries.

The history of Spanish maritime adventure was written in deeds by men of daring, imagination and seafaring genius when others of the Old World feared the open seas. Then our country was still a wilderness, awaiting the coming of those mariners for its discovery, its exploration, and its development. Much of our country was first visited by explorers from Spain.

Today we appreciate and admire the great vision of the Spanish mariners who, even in those days, were thinking and acting in global terms.

The culture of Spain is the proud heritage of many of our good neighbors in this hemisphere, and in large areas of our own country.

This particular occasion is important to me, as a representative of the United States Navy, for reasons far beyond its meaning as a sign of friendship between our peoples. The transfer of these ships is one of many steps designed by the leaders of two proud navies, in these trying and challenging times, to advance our common cause.

These fine ships come from our own arsenal. They are being transferred to the friendly foreign navy of Spain with the mutual belief that they will add effective strength and prestige to the Spanish Navy.

Aggressive forces abroad are pursuing the domination of the entire world and all its peoples. These forces are dedicated to a purpose directly opposed to our own. Our purpose is peace. These forces must be deterred by every available means. This must be clear to the peoples of our two countries.

Through three agreements, signed in 1953, the United States and Spain acknowledged the need of one for the other in the common defense of the Free World. The Joint Resolution passed by Congress on April 12 clearly reaffirms the position of the United States in support of Spanish membership in the North Atlantic Treaty Organization.

Collective security assumes an importance far greater than ever known before. It is a basic necessity for survival of the Free World. Strength is the only deterrent.

For these reasons, we are happy to see the growing strength of the Spanish Navy on the side of the West.

It is more than sentiment that prompts rejoicing in seeing ships come alive again as we do on this occasion. As they warm to their task of training sailormen in the arts of naval warfare, they carry with them our pride and our confidence in their integrity. These ships, which have served so well under the Stars and Stripes, will now proudly fly the flag of Spain, and under it will challenge the forces of aggression.

We recognize the compliment which is implicit in the incorporation of these ships into a navy of a nation long used to building, as well as sailing, its own fine ships. We hope and believe that these ships, added to the naval strength coming from the Spanish building yards, will perform well in company with the products of Cartagena and Ferrol.

It is fitting that the United States ship *Capps*, which served so valiantly in the great battles of the Pacific, will bear the name of *Lepanto*, the battle in which, nearly 400 years ago, the ships and seamen of Spain served to keep the freedom of the seas in the Mediterranean.

It is also fitting that the United States ship *David W. Taylor*, which until today has borne the name of America's greatest naval constructor, should become *Almirante Ferrandiz*, and honor the man who did so much for the development of the Spanish Navy of today.

Your Excellency, as you accept these ships, I would ask you to accept with them the hand of friendship and the very good wishes of the people of the United States.

Captain Blanco, as from one sailor to another, and from one navy to another, I, and also the service I represent, wish to express our highest esteem and best wishes toward the officers and men of the Spanish Navy.

To the officers and men who form the crews of the *Lepanto* and the *Almirante Ferrandiz*, we wish a good voyage, fair winds, and happy sailing.

ADDRESS GIVEN IN SAN FRANCISCO, CALIF., ON MAY 15, 1957, BY HIS EXCELLENCY THE AMBASSADOR OF SPAIN IN WASHINGTON, D. JOSE MARIA DE AREILZA, COUNT OF MOTRICO, ON OCCASION OF THE RECEPTION OF TWO DESTROYERS GIVEN TO SPAIN BY THE GOVERNMENT OF THE UNITED STATES

Admiral, it is with deep satisfaction that I receive, in the name of my government, these two naval units, which in pursuance of our present agreements of military cooperation, will now pass to our fleet.

I am deeply touched by the fact that this brilliant ceremony is taking place in the marvelous bay of San Francisco, to which our sailors gave a name and a place in the maps more than two centuries ago and in which today, names as Alcatraz, Yerbabuena, San Mateo, Vallejo, and many others are a living proof of our former presence.

You may be sure that the Spanish Navy, whose historical tradition made possible the California epic, will know how to utilize these ships, using them for the prime motive for which they are assigned—train our personnel in the employment of the most modern equipment used in naval warfare, and keep our navy in top condition.

Our fleet today is not very powerful, neither in number or in tonnage, but the old strategic concepts are now changing due to the revolutionary advances of the nuclear technology. Now the strategy, as the medicine, is more of a preventive science than a healing one and bases its hopes more in the capacity of reprisal to avoid a war, than in the war itself, which if it was nuclear, would mean for all of us a universal hecatomb.

That is why today the fighting morale, the spirit of service and the loyalty to the principles or ideals by the men that constitute the Navy are as important as the number of ships or the modern armament that they carry.

The Spanish Navy, whose whole life is molded in the dies of honor and patriotism, will always serve during peace and wartime the cause of the Christian West which is also the cause of the Free World. It will do it working in an intimate and chivalrous comradeship with the United States Navy.

The generosity of your act transferring these ships to us, and the near entrance in service of the naval base at Rota, the most important base the United States is going to have abroad, reinforces once more the bonds of our agreement.

I would like to ask, if it is possible, for more units of this type to be able to complete the training of a young and numerous body of officers who are full of enthusiasm and hunger of knowledge. They want to know the new techniques used in modern ships.

In the Atlantic as in the Mediterranean, the navy that discovered America, the navy that circled for the first time the roundness of the earth, the navy that won the battle of Lepanto—that decisive battle of Christianity and whose name will be carried by one of these new ships—will honor its pledges and will cooperate intimately in the defense of the free seas against the increasing danger of a Communist world tyranny.

MEDICAL CARE

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to address the House for 15 minutes and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Speaker, on May 6, 1957, I introduced H. R. 7238 which will provide proper yet minimum medical services to sick senior citizens of this great country, the bedridden, the handicapped, and disabled of all ages, and the crippled and maimed children. I believed, as did many of you on both sides of the aisle, that Congress, in its wisdom, had so provided the old, the sick, the blind, and the handicapped in 1956 (the 84th Congress) by enactment of Public Law 880. I now find, as many of you have also discovered, that in the closing days of the 84th Congress, a provision was written into Public Law 880 and this provision will prohibit States from providing the adequate medical services intended by Congress for the old, the sick, the blind, and the handicapped. This provision, unless corrected by the enactment of my bill, will, on July 1, 1957, curtail also the existing medical services for aged and sick recipients of public assistance.

Public Law 880 interferes with the administration of medical care by the several States. Centainly Congress did not intend this by enactment of Public Law 880. We probably made it necessary for thousands of our beloved, the sick, bedridden, and enfeebled patients in our great religious, charitable, and municipal hospitals to be declared legally incompetent so a conservator would be appointed to handle their affairs.

The economy of many of our States will be seriously affected by this provision in Public Law 880. The States are looking to us to correct this error. Many State legislatures have recessed. They made State appropriations for public assistance and medical services based upon their understanding of the intent of Congress, which I, and most of you believed was to provide proper yet minimum medical services for our needy citizens.

The present provision in Public Law 880 will lead to a system of confused administration and will create doubt, uncertainty, anxiety, and fear for hundreds of thousands of our country's aged, sick, and blind, plus the crippled and fatherless children. The economy and solvency of many of our great voluntary charitable hospitals and, indeed, the very continued existence of some of them, is threatened by the potential loss of funds if Public Law 880 is not amended. My bill is designed to correct and forthrightly correct this mistake.

The majority of the members of this body are already informed and familiar with this problem. The State directors of public welfare unanimously endorse this legislation. They desire its enactment. Our sick and our poor citizenry need and merit this relief.

For years the American Hospital Association, the American Medical Association, the American Dental Association, the American Public Welfare Association, and the American Public Health Association have strongly advocated and have strongly endorsed a system of purchasing medical care on behalf of the needy-sick-poor by the vendor-payment method. That is the American way of life today. Indeed, you and I have our medical and hospital bills paid in our behalf by either nonprofit or commercial insurance companies from whom we purchase such protection. Can we do less for the needy sick? Or equally undesirable, should we do differently and more meagerly for our less fortunate aged, sick, blind, and disabled? H. R. 7238 guarantees medical care, assures payment for medical care, and reaffirms the intent of Congress in passage of Public Law 880. It will not cost 1 cent more than we intended to spend wher we passed Public Law 880.

H. R. 7238 is concerned with the more effective distribution of Federal funds for medical care. It serves to simplify administrative practices. It rescinds interference with State methods of assistance and accomplishes and is, in fact, what Congress intended in 1956. I urge your approval of H. R. 7238.

SECTION-BY-SECTION ANALYSIS OF H. R. 7238

SECTION 1

The first section contains a short title to amend the public assistance provisions of the Social Security Act to provide a more effective distribution of Federal funds for medical and other remedial care. The first section also repeals part I of title III of the Social Security Amendments of 1956 (Public Law 880) effective August 1, 1956. The date of repeal is established as August 1, 1956, since part I of title III would not have become effective until July 1, 1957.

The repeal of this part I of title III of the Social Security Amendments of 1956 reaffirms the definition of old-age assistance in section 6 of title I of the Social Security Act, of aid to dependent children in section 406 (b) in title IV of the Social Security Act, of aid to the blind in section 1006 of title X of the Social Security Act, and of aid to the permanently and totally disabled in section 1405 of title XIV of the Social Security Act.

Part I of title III of the Social Security Amendments of 1956 would have compelled the States, effective July 1, 1957, to provide money payments for medical and remedial care for recipients of public assistance within the Federal matching formula of part V of said amendments, and vendor payments for the special medical matching formula in said part I of said amendments. This would have compelled, effective July 1, 1957, two distinct methods of administration of medical and remedial care for public assistance recipients, and would create confusion and misunderstanding for recipients of public assistance, State and local welfare departments, and the professional suppliers of medical and remedial care.

SECTION 2

The second section amends section 3 (a) of the Social Security Act by adding clause (4) to provide the special matching formula for medical and remedial care for old-age assistance recipients in the same manner as had been provided in clause (4) of part I of title III of the Social Security Amendments of 1956.

SECTION 3

The third section amends section 403 (a) of the Social Security Act by adding clause (4) to provide the special matching formula for medical and remedial care for aid to dependent children recipients in the same manner as had been provided in clause (4) of part I of title III of the Social Security Amendments of 1956.

SECTION 4

The fourth section amends section 1003 (a) of the Social Security Act by adding clause (4) to provide the special matching formula for medical and remedial care for recipients of aid to the blind in the same manner as had been provided in clause (4) of part I of title III of the Social Security Amendments of 1956.

SECTION 5

The fifth section amends section 1403 (a) of the Social Security Act by adding clause (4) to provide the special matching formula for medical and remedial care for recipients of aid to the permanently and totally disabled in the same manner as had been provided in clause (4) of part I of title III of the Social Security Amendments of 1956.

SECTION 6

The sixth section makes the effective date of this act July 1, 1957 in the same manner as had been provided in part I of title III of the Social Security Amendments of 1956.

The entire bill makes it unmistakably clear that States may elect to establish a program of medical and remedial care by purchasing all such medical and remedial services directly from medical suppliers or by purchasing a portion of such medical and remedial services from the suppliers of medicine and making money payments directly to public assistance recipients for a portion of the medical and remedial services necessary.

LIST OF STATES IMMEDIATELY AND VITALLY CONCERNED

California, Connecticut, Florida, Illinois, Indiana, Iowa, Kansas, Louisiana, Maine, Massachusetts, Michigan, Minnesota, Missouri, New Hampshire, New Jersey, New Mexico, New York, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, Utah, Washington, Wisconsin.

Territories: Alaska, Hawaii, Puerto Rico, Virgin Islands.

A SALUTE TO MADISONVILLE, KY., AND HOPKINS COUNTY

Mr. NATCHER. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. NATCHER. Mr. Speaker, I would like to take this means of saluting Madisonville, Ky., and Hopkins County.

On May 25, 1957, Madisonville, Ky., and Hopkins County will celebrate their 150th birthday. In 1791 Daniel Boone and Col. Richard Henderson carved from the wilderness Henderson County and other counties adjoining Hopkins County. Ten years later Robert McGary and others designated to perform the task removed from Henderson County that section known as Hopkins County. On founding day Robert McGary and Solomon Silkwood offered 40 acres of their land for the use of the city which was named Madisonville in honor of James Madison. In 1810 Madisonville had a population of 37, and the last census in 1950 shows a population of 11,132.

A firm belief in the future is held by the citizens who compose this progressive city and county. Long known as "the best town on earth," Madisonville

has the natural resources and outstanding people which make a city great. The Madisonville Messenger has all the attributes of an excellent newspaper. In publishing all the news, the Messenger serves as a forum of public opinion, and its strong editorial column provides a guide in formulating policies which are to the best interests of all the people. Radio station WFMW serves its listeners by broadcasting local and national news and by providing entertainment.

Hopkins County is not only one of the great coal producing counties in Kentucky, but it is rich in agricultural commodities producing both burley and dark tobacco, wheat, corn, and many other agricultural commodities. The Western Kentucky Coal Co. is one of the largest suppliers of coal in America, and, in addition, there are several other prominent coal companies in Hopkins County.

The city has for its mayor, David Parish, an outstanding citizen and successful businessman. Madisonville has all the characteristics which make it a wonderful city in which to live—lovely homes, recreation centers, parks, churches of every denomination, and a highly creditable school system. Hopkins County is the home of three excellent hospitals: Outwood Veterans' Administration Hospital, Kentucky Tuberculosis Hospital, and Hopkins County Hospital. Eminent men from every walk of life have come from Hopkins County. The Madisonville Bar Association has long been recognized throughout Kentucky for its excellent lawyers, and the medical, dental, and other professions have enjoyed the same reputation.

The people of Hopkins County and Madisonville are justifiably proud of their many achievements in the past, and the future promises even greater accomplishments. This progressive city possesses the unbeatable combination of an abundance of natural resources and citizens with a fine community spirit.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. PROUTY (at the request of Mr. MARTIN), through May 27, on account of illness.

Mr. HEMPHILL (at the request of Mr. PRESTON), for the remainder of the week, on account of illness.

Mr. DAVIS of Tennessee, for the balance of the week, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. LAIRD, for 20 minutes, on today.

Mr. BRAY, for 15 minutes, on Monday next.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. LANE and to include extraneous matter.

Mrs. KEE.

Mr. PELLY and to include a speech of Senator BUTLER, of Maryland.

Mr. CURTIS of Missouri (at the request of Mr. ARENDS).

Mr. REED and include related matter.

Mr. HOSMER (at the request of Mr. KEATING).

Mr. THOMPSON of New Jersey.

Mr. ASHMORE and to include a speech by Mr. HEMPHILL.

Mr. HARRIS (at the request of Mr. MCCORMACK) and to include extraneous matter.

ENROLLED BILLS SIGNED

Mr. BURLESON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H. R. 1400. An act for the relief of Mitsuko A. Hachita;

H. R. 1983. An act to provide for the conveyance of the reversionary interest of the United States in certain lands to the Clint Independent School District and the Fabens Independent School District in the State of Texas, or to either of them, and for other purposes;

H. R. 2018. An act to permit any State of the United States or any political subdivision of any such State to purchase from the District of Columbia Reformatory at Lorton, Va., gun mountings and carriages for guns for use at historic sites and for museum display purposes;

H. R. 2781. An act to amend the act entitled "An act to authorize the Secretary of the Navy to enlarge existing water-supply facilities for the San Diego, Calif., area in order to insure the existence of an adequate water supply for naval installations, and defense production plants in such area," approved October 11, 1951;

H. R. 2797. An act to amend title 10, United States Code, to authorize the Secretary of a military department to furnish stevedoring and terminal services and facilities to commercial steamship companies, and for other purposes;

H. R. 4285. An act to authorize the sale of degaussing equipment by the Department of the Navy to the owners or operators of privately owned merchant ships of United States registry;

H. R. 5832. An act to increase the retired annuities of the civilian members of the teaching staffs of the United States Naval Academy and the United States Naval Postgraduate School; and

H. R. 6454. An act to amend the act for the retirement of public-school teachers in the District of Columbia, and for other purposes.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 51. An act for the relief of Mary Barme and her two minor children Steran Barme and Dinah Barme;

S. 94. An act for the relief of Lee Chong Taik;

S. 124. An act for the relief of Josephine Suydam;

S. 162. An act for the relief of Jew Gim Gee;

S. 184. An act for the relief of Mary C. Frederick;

S. 271. An act for the relief of Johannes Sukevainen;

S. 754. An act for the relief of John (Ioannis) Legatos;

S. 799. An act for the relief of Eldur Eha; and

S. 1463. An act to amend the Medals of Honor Act to authorize awards for acts of heroism involving any motor vehicle.

SENATE BILLS AND CONCURRENT RESOLUTION REFERRED

Bills and a concurrent resolution of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 80. An act for the relief of Maria Adelaide Alessandroni; to the Committee on the Judiciary.

S. 105. An act to exempt from taxation certain property of the National Association of Colored Women's Clubs, Inc., in the District of Columbia; to the Committee on the District of Columbia.

S. 153. An act for the relief of Tsui Yung Wong; to the Committee on the Judiciary.

S. 160. An act for the relief of Georgios Ioannou; to the Committee on the Judiciary.

S. 164. An act for the relief of John G. Michael; to the Committee on the Judiciary.

S. 499. An act for the relief of Daniela Renata Patricia Zei; to the Committee on the Judiciary.

S. 525. An act for the relief of Rhoda Elizabeth Graubart; to the Committee on the Judiciary.

S. 526. An act for the relief of Tivkva Polsky; to the Committee on the Judiciary.

S. 534. An act to amend section 702 of the Merchant Marine Act, 1936, in order to authorize the construction, reconditioning, or remodeling of vessels under the provisions of such section in shipyards in the continental United States; to the Committee on Merchant Marine and Fisheries.

S. 553. An act for the relief of Oleg Antonowyycz; to the Committee on the Judiciary.

S. 583. An act for the relief of Stanislav Maglica; to the Committee on the Judiciary.

S. 592. An act for the relief of Anton Revak; to the Committee on the Judiciary.

6. 614. An Act for the relief of Mary Pu Keui Min, and her children Susan Pyong Soon Min, Sally Pyong Yun Min, George Pyong Yu Min, and William Pyong Soo Min; to the Committee on the Judiciary.

S. 749. An act for the relief of Loutfie Kalil Noma (also known as Loutfie Siemon Noma or Loutfie Noama); to the Committee on the Judicary.

S. 755. An act for the relief of Athena Nicholas Euteriadou; to the Committee on the Judicary.

S. 785. An act for the relief of Helga Binder, to the Committee on the Judiciary.

S. 788. An act for the relief of Thelma Margaret Hwang; to the Committee on the Judiciary.

S. 793. An act for the relief of Giuseppe Baffo; to the Committee on the Judiciary.

S. 833. An act for the relief of Vida Letitia Baker; to the Committee on the Judiciary.

S. 834. An act for the relief of David Ajuelo, Roza Ajuelo, Victoria Ajuelo, and Lizet Ajuelo; to the Committee on the Judiciary.

S. 849. An act for the relief of Sydney Douglas Catchpole; to the Committee on the Judiciary.

S. 886. An act to provide transportation on Canadian vessels between ports in southeastern Alaska, and between Hyder, Alaska, and other points in southeastern Alaska, or the continental United States, either directly or

via a foreign port, for any part of the transportation; to the Committee on Merchant Marine and Fisheries.

S. 908. An act for the relief of Kuo York Chynn; to the Committee on the Judiciary.

S. 916. An act to provide for the issuance of checks and continuation of accounts when there is a vacancy in the post office of the disbursing officer of the Post Office Department, and for other purposes; to the Committee on Government Operations.

S. 937. An act to amend section 4 of the Interstate Commerce Act, as amended; to the Committee on Interstate and Foreign Commerce.

S. 988. An act for the relief of Satoe Yamakage Langley; to the Committee on the Judiciary.

S. 1035. An act for the relief of Alice Eirl Schaer (Mi On Lee); to the Committee on the Judiciary.

S. 1039. An act for the relief of Salvatore Pantano; to the Committee on the Judiciary.

S. 1112. An act for the relief of Matsue Harada; to the Committee on the Judiciary.

S. 1147. An act for the relief of Kiyoshi Takahashi, Kyoko Takahashi, and Nosomu Takahashi; to the Committee on the Judiciary.

S. 1169. An act for the relief of Herbert C. Heller; to the Committee on the Judiciary.

S. 1264. An act to exempt from taxation certain property of the National Trust for Historic Preservation in the United States in the District of Columbia; to the Committee on the District of Columbia.

S. 1269. An act to amend the act entitled "An act to create a Board for the Condemnation of Insanitary Buildings in the District of Columbia, and for other purposes," approved May 1, 1906, as amended; to the Committee on the District of Columbia.

S. 1376. An act for the relief of Chong You How (also known as Edward Charles Yee), his wife, Eng Lai Fong, and his child, Chong Yim Keung; to the Committee on the Judiciary.

S. 1390. An act for the relief of Roberto Mario Bettinzoli; to the Committee on the Judiciary.

S. 1446. An act to amend title 14, United States Code, so as to provide for retirement of certain former members of the Coast Guard Reserve; to the Committee on Merchant Marine and Fisheries.

S. 1576. An act to exempt the sale of materials for certain war memorials in the District of Columbia from the District of Columbia Sales Tax Act; to the Committee on the District of Columbia.

S. 1586. An act to eliminate the financial limitation on real and personal estate holdings of the American Historical Association and to exempt from taxation certain property of such association in the District of Columbia; to the Committee on the District of Columbia.

S. 1589. An act for the relief of Nina Maslova Greenberg; to the Committee on the Judiciary.

S. 1708. An act to amend the act entitled "An act relating to children born out of wedlock," approved January 11, 1951; to the Committee on the District of Columbia.

S. 1806. An act to amend the Sockeye Salmon Fishery Act of 1947; to the Committee on Merchant Marine and Fisheries.

S. 1833. An act for the relief of Janos Schreiner; to the Committee on the Judiciary.

S. 1842. An act to amend the act entitled "An act to provide for compulsory school attendance, for the taking of a school census in the District of Columbia, and for other purposes," approved February 4, 1925; to the Committee on the District of Columbia.

S. 1884. An act to amend section 505 of the Classification Act of 1949, as amended; to the Committee on Post Office and Civil Service.

S. 1906. An act authorizing the conferring of appropriate degrees by the District of Columbia Teachers College on those persons who have met the requirements for such degrees, and for other purposes; to the Committee on the District of Columbia.

S. Con. Res. 26. Concurrent resolution to print additional copies of the report entitled "The International Petroleum Cartel"; to the Committee on House Administration.

BILLS AND JOINT RESOLUTIONS PRESENTED TO THE PRESIDENT

Mr. BURLESON, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, bills and a joint resolution of the House of the following titles:

H. R. 1400. An act for the relief of Mitsuko A. Hachita;

H. R. 1983. An act to provide for the conveyance of the reversionary interest of the United States in certain lands to the Clint Independent School District and the Fabens Independent School District in the State of Texas, or to either of them, and for other purposes;

H. R. 2018. An act to permit any State of the United States or any political subdivision of any such State to purchase from the District of Columbia Reformatory at Lorton, Va., gun mountings and carriages for guns for use at historic sites and for museum display purposes;

H. R. 2781. An act to amend the act entitled "An act to authorize the Secretary of the Navy to enlarge existing water-supply facilities for the San Diego, Calif., area in order to insure the existence of an adequate water supply for naval installations and defense production plants in such area," approved October 11, 1951;

H. R. 2797. An act to amend title 10, United States Code, to authorize the Secretary of a military department to furnish stevedoring and terminal services and facilities to commercial steamship companies, and for other purposes;

H. R. 4285. An act to authorize the sale of degaussing equipment by the Department of the Navy to the owners or operators of privately owned merchant ships of United States registry;

H. R. 5832. An act to increase the retired annuities of the civilian members of the teaching staffs of the United States Naval Academy and the United States Naval Postgraduate School;

H. R. 6454. An act to amend the act for the retirement of public-school teachers in the District of Columbia, and for other purposes; and

H. J. Res. 133. An act for the relief of certain spouses and minor children of citizens of the United States.

ADJOURNMENT

Mr. McCORMACK. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 3 o'clock and 2 minutes p. m.) the House adjourned until tomorrow, Friday, May 24, 1957, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

886. Under clause 2 of rule XXIV, a letter from the Assistant Secretary of Defense (Supply and Logistics) transmitting reports on Army, Navy, Air Force, and Military Petroleum Supply Agency prime contract procurement actions with small and large concerns for work in the United States for the first 9 months of fiscal year 1957, pursuant to Public Law 268, 84th Congress, was taken from the Speaker's table and referred to the Committee on Banking and Currency.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HARRIS: Committee on Interstate and Foreign Commerce. A report on International Health; without amendment (Rept. No. 474). Referred to the Committee of the Whole House on the State of the Union.

Mr. TRIMBLE: Committee on Rules. House Resolution 263. Resolution for consideration of H. R. 3753, a bill to enable the Secretary of Agriculture to extend financial assistance to desert-land entrymen to the same extent as such assistance is available to homestead entrymen; without amendment (Rept. No. 475). Referred to the House Calendar.

Mr. O'NEILL: Committee on Rules. House Resolution 264. Resolution for consideration of H. R. 6974, a bill to extend the Agricultural Trade Development and Assistance Act of 1954, and for other purposes; without amendment (Rept. No. 476). Referred to the House Calendar.

Mr. BOLLING: Committee on Rules. House Resolution 265. Resolution for the consideration of S. 469, an act to authorize the United States to defray the cost of assisting the Klamath Tribe of Indians to prepare for termination of Federal supervision, to defer sales of tribal property, and for other purposes; without amendment (Rept. No. 477). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BONNER:

H. R. 7734. A bill to exempt certain teachers in the Canal Zone public schools from prohibitions against the holding of dual offices and the receipt of double salaries; to the Committee on Merchant Marine and Fisheries.

By Mr. FRAZIER:

H. R. 7735. A bill to amend title 28 of the United States Code, so as to provide for the appointment of one additional district judge for the eastern district of Tennessee; to the Committee on the Judiciary.

By Mr. GRAY:

H. R. 7736. A bill to incorporate the Veterans of World War I of the United States of America; to the Committee on the Judiciary.

By Mr. HARRIS:

H. R. 7737. A bill to amend the act of March 3, 1901, to give the Secretary of Commerce authority to acquire land for field sites for the National Bureau of Standards, to undertake the construction and improvement of buildings, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. KEATING:

H. R. 7738. A bill for the relief of the State of New York; to the Committee on the Judiciary.

By Mr. KEOGH:

H. R. 7739. A bill to amend the Internal Revenue Code of 1954 to reduce from 10 percent to 5 percent the manufacturers excise tax on certain truck bodies; to the Committee on Ways and Means.

By Mr. CURTIS of Missouri:

H. R. 7740. A bill to amend the Internal Revenue Code of 1954 to reduce from 10 percent to 5 percent the manufacturers excise tax

on certain truck bodies; to the Committee on Ways and Means.

By Mrs. KNUTSON:

H. R. 7741. A bill to extend for 8 years the Hospital Survey and Construction Act; to the Committee on Interstate and Foreign Commerce.

By Mr. ROOSEVELT:

H. R. 7742. A bill to restore certain public lands of the United States within the Angeles National Forest to location and entry under the mining laws of the United States; to the Committee on Interior and Insular Affairs.

By Mr. HILL:

H. R. 7743. A bill to amend the Packers and Stockyards Act, 1921, as amended, regulating interstate and foreign commerce in livestock, livestock products, dairy products, poultry, poultry products and eggs, to clarify the jurisdiction of the Secretary of Agriculture thereunder, and for other purposes; to the Committee on Agriculture.

By Mr. KEATING:

H. J. Res. 343. Joint resolution proposing an amendment to the Constitution of the United States relative to disapproval of items in general appropriation bills; to the Committee on the Judiciary.

By Mr. HERLONG:

H. J. Res. 344. Joint resolution to authorize the Secretary of Commerce to sell certain coal-burning vessels to certain citizens of the Federal Republic of Germany; to the Committee on Merchant Marine and Fisheries.

By Mr. BERRY:

H. Con. Res. 178. Concurrent resolution favoring congressional recognition of the National Cowboy Hall of Fame and Museum to be located at Oklahoma City, Okla.; to the Committee on Interior and Insular Affairs.

By Mr. LANE:

H. Res. 262. Resolution establishing a select committee of the House to choose five outstanding persons (none of whom shall be living) who have served in the House of Representatives; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BARTLETT:

H. R. 7744. A bill to authorize the conveyance of certain lands in Alaska to Martha L. Babinec as administratrix of the estate of Laurence Starns, deceased; to the Committee on Interior and Insular Affairs.

By Mr. JAMES:

H. R. 7745. A bill for the relief of Piera Dioni; to the Committee on the Judiciary.

By Mr. KEATING:

H. R. 7746. A bill for the relief of Elmer L. Conrad and others; to the Committee on the Judiciary.

By Mr. McCARTHY:

H. R. 7747. A bill for the relief of Michelle Germain Cormier Albrecht (nee Michelle Germain Cormier); to the Committee on the Judiciary.

By Mr. McCONNELL:

H. R. 7748. A bill for the relief of Gaudencio C. Cristobal, M. D.; to the Committee on the Judiciary.

By Mr. McINTOSH:

H. R. 7749. A bill for the relief of Anton Bering; to the Committee on the Judiciary.

By Mr. MADDEN:

H. R. 7750. A bill for the relief of Anneliese F. Meinssen; to the Committee on the Judiciary.

By Mr. PHILBIN:

H. R. 7751. A bill for the relief of Mrs. Ingrid Goguen; to the Committee on the Judiciary.

By Mr. UTT:

H. R. 7752. A bill for the relief of Wintford Jesse Thompson; to the Committee on the Judiciary.

By Mr. VORYS:

H. R. 7753. A bill for the relief of Hisako Hadaway; to the Committee on the Judiciary.

By Mr. YOUNGER:

H. R. 7754. A bill for the relief of Mrs. Faustina Albright; to the Committee on the Judiciary.

By Mr. ZABLOCKI:

H. R. 7755. A bill for the relief of Zdenka Elizabeth Wukovich; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII.

256. Mr. HORAN presented a petition of Mrs. C. S. Stauffer and 17 citizens of Spokane, Wash., and vicinity urging the Congress to pass legislation prohibiting alcoholic beverage advertising on television broadcasts, which was referred to the Committee on Interstate and Foreign Commerce.

EXTENSIONS OF REMARKS

The Canada Council and Drew Pearson

EXTENSION OF REMARKS

OF

HON. FRANK THOMPSON, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 23, 1957

Mr. THOMPSON of New Jersey. Mr. Speaker, in his syndicated column Drew Pearson on Sunday, May 19, 1957, made a statement which I feel must be rectified or it will do untold damage to the friendly relations that have existed from the very beginning between the United States and Canada.

In fairness to Mr. Pearson, I am confident that it is misinformation rather than ill will which is responsible for this egregious error.

Mr. Pearson said this in the course of an article on American-Canadian relations at this time: "Parliament just voted $200 million to set up the Canada Council, ostensibly 'to encourage Canadian arts, letters, and sciences' but actually to combat United States influence in Canada."

As soon as I read this I got in touch with the Canadian Embassy in Washington and, fortunately, was furnished with articles from several leading Canadian newspapers which puts the matter in the proper light.

In view of these articles, which I include here, I think it is up to Mr. Pearson to review the matter in an early article which will present the true facts about the Canada Council.

The Members of this House are, of course, aware of the fact that the arts are an international language whose ends are peace and understanding between peoples.

The international exchange of art and artists is carried on under the Fulbright Act, the Smith-Mundt Act, and the Humphrey-Thompson Act, measures adopted by the Congress in recent years.

As a matter of fact, President Eisenhower told the Congress in his 1955 message on the state of the Union that—

> In the advancement of the various activities which will make our civilization endure and flourish, the Federal Government should do more to give official recognition to the importance of the arts and other cultural activities.

In an historic speech before the Conference on the Arts and Exchange of Persons, held by the Institute of International Education in New York City on October 4 and 5, 1956, Senator J. WILLIAM FULBRIGHT had this to say:

> So, I feel, the more I see of it, that exchanges in the field of the arts can be made a very important influence in our international relations. Perhaps that should not be said. I suppose one should be interested in art for art's sake. It is an interest and end in itself and that is a perfectly legitimate attitude for those of you who practice it. For my part, I want to use art to help the human race avoid committing suicide.
>
> It was an extraordinary, mysterious thing that in 1914, after 100 years of relative peace, the most civilized peoples of the world fell upon one another and tried to commit suicide. I have never heard a satisfactory reason for it, nor do I know why they fought. None of the reasons, economic, racial, or political, make any sense to me. I think it was a wholly irrational thing. Perhaps the human race is not capable of ever achieving peace or a rational international relationship. But I think there is sufficient chance to justify exerting ourselves in a field which has never been tried; that field is the exchange of persons and exchanges of the arts. Such exchanges may result in mutual understanding and sympathy.
>
> Contemplation of the fine arts or even competition among peoples in this field does not lead to bloodshed and hatred, as competition in the field of economics tends to do. I often think of the story they tell about Lenin, who refused to listen to music because it tended to soothe his passions and made him less forceful and cruel. If that story is true, and I rather think it is, it encourages me in the direction I hope we are moving.

I include here articles from the Financial Post, Toronto; the Toronto Star; the Ottawa Journal, and the New York Times which may be helpful to Mr. Drew Pearson in arriving at a true assessment of the aims of the Canada Council.

The Reverend Sister Elizabeth Parente, MPF, music director of Villa Victoria Academy, Trenton, N. J., recently wrote me, in part, as follows re my own interest in the arts:

> Permit me at this time to commend you most highly for introducing a bill for Federal aid for the arts. It is one of the finest moves ever made. The arts and sciences should work together, and there should be equal emphasis on both. Our country should never hesitate to make great use of the one and only universal language—music. There are no boundary lines with this art.

If there is one thought I can leave today with those leaders in Government and private life who have worked so

fruitfully to establish the Canada Council, it is this line by the Reverend Sister Parente:

The arts and sciences should work together, and there should be equal emphasis on both.

The United States and Canada should never hesitate to make great use of the one and only universal language, music. There are no boundary lines with this art.

In the hands of the Canada Council for the Arts, Humanities, and Social Sciences the vast sum of $100 million has been placed to develop ways for the arts and sciences to work together with an equal emphasis on both.

A new day is dawning in Canada; indeed, the sun that is lighting Canada may encourage leaders in the United States to give new emphasis and importance to our own cultural activities to peaceful ends.

The above-mentioned articles follow:

[From the Toronto Financial Post of March 2, 1957]

SUBSIDY OF ARTS NOTHING NEW, BUT NATIONAL PATTERNS VARIED

(By John P. Maclean)

OTTAWA (Staff).—When the Canada Council starts distributing money to support Canadian art, music, drama, and letters, it will be following a course which most of the Western nations have followed for a long time.

It will probably look abroad for some guidance about what other countries do, and it will find great variation both in the amount of public funds devoted to cultural activities, and in the way they are distributed.

In the United States the only relevant comparisons are with private foundations like the Guggenheim, Rockefeller, or Ford Funds. And none of them can provide a complete parallel to the Canadian problem.

(The chairman-designate of the Canada Council, Brooke Claxton, has already been quizzing the directors of the principal United States foundations.)

But the United States is about the only major country of the West where private bequests are adequate to provide the main support for arts, letters, and social sciences.

In most countries, the private patron of the arts has long been too rare and too poor. Public funds have been filling the gap, more or less fully, in most of Western Europe for generations.

The Canadian plan is characteristically Canadian. It seeks as usual to blend the methods of the Old World with those of the dominant country of the New World.

The public is to provide an original endowment of $50 million. (And this, incidentally, is a precedent new to the democratic world. Cultural funds are usually a straight part of the parliamentary appropriation each year.)

But the Government recognizes this is quite inadequate for the development of Canadian talent. It is relying on private donors to supplement it.

If Canadians are not rich enough to establish huge foundations of their own on the United States model, at least some of them can add to the thin Government capital.

One such offer has already been received—prematurely, since it came before there is a Canada Council. It was from a Toronto widow, offering $200,000 for the encouragement of ballet. Government hopes this first swallow will herald a real summer of private gifts and bequests.

The most culture-conscious nations of the West now include: United Kingdom, France, Italy, Germany, Austria, Russia, Belgium, Holland, and the Scandinavian countries.

ITALY

In Italy, the federal authority cooperates with local authority in many projects, keeps a close eye on culture through a part of the Ministry of Instruction.

Since World War II the National Government has spent an average of $5 million a year just to refurbish war-damaged buildings. Top-rated movie companies get special tax deals (for instance the proceeds of a special levy on foreign films) to spur production of such cinematic gems as Bicycle Thief.

WEST GERMANY

In West Germany, plays, operas and ballet in a recent year received subsidies of $22 million; museums and art galleries got $5.3 million. Chief support comes from the provinces or states, plus private donations.

RUSSIA

In Russia, the Bolshoi Theater, operating two large theaters in Moscow, receives about $11 million a year in subsidies for opera and ballet. Live drama in some 30 theaters in Moscow is subsidized, while provincial theaters also receive assistance.

Here's how the United Kingdom and France have and are aiding culture on a nationwide scale:

UNITED KINGDOM

Guide and mentor of British culture at present is the Arts Council, chartered in 1946. It grew out of the World War II-spawned Council for the Encouragement of Music and the Arts.

CEMA began in late 1939, was set up in 1940 with an initial £25,000 grant from the Pilgrim Trust, then headed by Lord Macmillan, Minister of Information. John Maynard Keynes, the economist, headed CEMA from 1942 to his death in 1946.

In 1945, the British Government decided CEMA should be continued in peacetime. Treasury, instead of Education, took it over, renamed it the Arts Council.

It's not a government department, doesn't resemble some foreign ministries of art. It is composed of not more than 16 persons, experts in one or more fields of art, who are picked by the Chancellor of the Exchequer but are not responsible to him.

It has a small specialist staff: Secretary-general, deputy secretary, and finance officer; directors for art, music, and drama. Staff totals 97.

Arts Council money comes in annual grants from Parliament. The hope is that as soon as United Kingdom finances are past the wolf-at-the-door stage the annual grant will become a statutory amount.

At present the Arts Council submits its requests to Parliament, has them scrutinized by committees on public accounts and on estimates. The auditor-general checks the books.

In 1955–56 Parliament granted £820,000 (up from the first, 1945–46 grant of £235,000). Simplified, the books show the money went £614,000 to general art expenditure, £97,000 to general operating costs, £76,000 to the Scottish committee, and £33,000 to the Welsh committee.

The £614,000 was split:

1. Music, £514,000.

Covent Garden got £250,000; Sadler's Wells, £100,000; Intimate Opera Society at the lower end of the scale got £1,000.

Three of the big orchestras, London Philharmonic, Liverpool Philharmonic, and City of Birmingham Symphony each got £12,000, and the Society for the Promotion of New Music got £800.

2. Drama, £65,000.

Old Vic got a total of £18,500 and Royal Vic got £10,000. The Playhouse, Kidderminster, got £39 9s.

3. Art, £23,000.

Exhibitions took £19,000 but grants went to such as the Finsbury Art Group (£40) and the Open Air Exhibition of East Anglian Sculpture (£20).

4. Poetry, £1,000.

Help for Spoken Poetry got £497 10s. 4d. and the Cley Women's Institute got £3 11d.

5. Festivals, £6,000.

Bath Festival Society and Cheltenham Arts Festivals each got £1,000; at the bottom of the list, Hovingham Festival drew £90.

6. Arts centers and clubs, £3,000.

7. General arts activities, such as Langley Moore Museum of Costume (£350) were given close to £2,000.

All groups which are subsidized are nonprofit. In fact, the Arts Council is incorporated as a charity and prohibited from using its money for profit-seeking purposes.

All money goes to the support of professional, not amateur activity.

MAIN PURPOSE

Main purpose of the arts council, according to its charter, is to preserve and improve standards of performance in the various arts. This means, in effect, support of a limited number of institutions where the highest standards can be developed. Prime example is the Sadler's Wells Ballet at Covent Garden.

Intention is to get—and keep—powerhouses of opera, music, and drama in London, see that culture is spread throughout the nation by frequent tours.

Outlook in the United Kingdom is for more money to go to the arts council. It now, with local authorities' help, spends only about £1 million.

This compares with about £485 million for education (it's calculated about £50 million of this goes into in-school culture), £13 million for public libraries, £3 million for art galleries and museums.

Arts council is, therefore, bucking for about £2.5 million a year. This, it thinks, would support a proper program plus a long-term capital projects rebuilding plan.

The projection of British culture abroad is conducted by the British council.

In 1955–56 it spent £2.8 million, broken down: £1.8 million in foreign countries, £.5 million in colonies, £.4 million in Commonwealth countries, and £.1 million in colonial development and welfare.

FRANCE

Culture in France comes under a special branch of the ministry of education called Direction-Generale des Arts et des Lettres.

Head is a secretary of state for fine arts who reports to the minister of education still, although there's a growing feeling education and culture shouldn't be mixed.

Arts et Lettres has five divisions:

1. Direction des Musees de France.

There are about 900 museums, including 30 considered national ones like Le Louvre.

Close to $3 million was spent—$1 million for salaries, $400,000 for maintenance expenses, $300,000 in subsidies to local museums, and about $1 million in capital construction and equipment. Six $300-a-year scholarships were given to students at the Louvre school.

2. Service des Spectacles et de la Musique.

Promotion of theater attractions and musical programs isn't allowed to clash with artistic freedom.

Money distributed in 1956 went to L'Opera and L'Opera-Comique (total of more than $3.5 million), Comedie-Francaise ($1 million), and the Theatre National Populaire ($200,000).

Regular subsidies are given on the advice of a panel of experts to the best performances in private theaters and to talented young playwrights looking for a push to get started. There's an annual $3,500 prize for the best play produced by an amateur society. Total cost, about $200,000.

Another $200,000 goes to help various drama festivals throughout France. The International Festival, now a regular feature of the Paris season, gets $125,000.

Some $300,000 goes to other theatrical enterprises throughout the country, for general expenses. In addition, about $285,000 went to provincial organizations to produce operas of various kinds.

About $1 million went into capital project subsidies for the building of theaters, conservatories, art and music schools.

The National Conservatory of Dramatic Art got $300,000.

More than $600,000 was spent to support music. The National Conservatory of Music got about $360,000 and another $100,000 for scholarships; various other municipal groups a total of $130,000; Les Jeunesses Musicales, $35,000; ballet companies, $15,000; and composers (who also get help with the cost of printing their scores), $20,000.

Writers get little, but are in line to get more. At present there's an annual prize of $1,800 awarded to a well-known writer as a kind of recognition for general excellence. A newly formed Culture Bank will begin providing social-security benefits to struggling young writers from state funds and with revenue from established writers' royalty contributions.

3. Service des Lettres.

Important among its activities is a general responsibility to promote celebration of special literary events. Some $70,000 was spent in 1956.

4. Service de l'Enseignement et de la Production Artistique. Under teaching and artistic production come: Schools of fine arts, decorative arts, and architecture; state-controlled tapestries and ceramics industries; official commissions to painters, sculptors, engravers and tapestry makers.

Some $1.4 million in salaries and $500,000 in maintenance went into the state schools—Ecole Nationale des Beaux-Arts and the advanced Ecole Francaise de Rome, for example. Each has a strong program of scholarships.

Official commissions worth $450,000 were ordered in 1956 for decoration of public buildings, official residences and universities.

5. Direction de l'Architecture.

In 1956 this bureau spent $7.2 million on maintenance of historical monuments and $5 million on restoration; for example: $2 million for the Chateau de Versailles.

Total budget for archeological works ($70,000 in 1956) and preservation of historical sites and general expense is a substantial $30 million.

[From the New York Times of January 9, 1957]

CANADA PLANNING CULTURE COUNCIL—ENDOWMENT OF $50 MILLION AND FUND FOR COLLEGES ASKED OF PARLIAMENT

(By Raymond Daniell)

OTTAWA, January 8.—The Government's plans for aiding the cultural development of Canada were revealed today at the opening of the 5th and last session of the 22d Parliament.

They included the establishment of a Canada Council for the Arts, Humanities, and Social Sciences with a $50,300,000 endowment for scholarships and assistance to artists, musicians, dancers, writers, and scholars.

Another grant of $50 million was requested for the council to help Canadian universities' construction projects to keep pace with the increasing demands upon them.

The Government also sponsored a measure to provide for the division of the National Museum of Canada into two institutions to be known as the Canadian Museum of Human History and the Canadian Museum of Natural History.

The cultural council was proposed 5 years ago by the Royal Commission on National Development in the Arts, Letters, and Sciences, headed by Vincent Massey, now Governor General.

SPEECH FROM THRONE READ

It was he in his tricorn hat and full regalia as representative of Queen Elizabeth II, who read the speech from the throne, containing the Government's recommendations. The speech was delivered in the red upholstered senate chamber before an audience that included most of the diplomatic corps.

ECONOMIC REPORT MADE

For years the Liberal government of Prime Minister Louis St. Laurent has hesitated to propose the council, because of uncertainty about the reaction in Quebec, a party stronghold.

[From the New York Times of May 5, 1957]

CANADA COUNCIL INITIATES ACTION—GROUP WITH $100 MILLION FUND TO PROMOTE CULTURE HOLDS FIRST MEETING

(By Tania Long)

OTTAWA, May 4.—The Canada Council, which recently was armed with $100 million for the promotion of Canadian culture, got down to work last week to plan a program that will go into effect this fall.

The first meeting of the newly appointed Council was attended by Governor General Vincent Massey and four executives of United States foundations.

It was Mr. Massey, before he became representative of the Crown in Canada, who headed the royal commission that recommended the establishment of the Canada Council to assist the arts, humanities and social sciences.

The guests from the United States were Dean Rusk, president of the Rockefeller Foundation; W. McNeil Lowry, vice president of the Ford Foundation; Stephen H. Stackpole, executive associate of the Carnegie Corp., and John Marshall, director of the Rockefeller Foundation.

One of the first acts of the council was to establish a factfinding body to conduct a survey into what is already being done by private and public bodies for the promotion of cultural matters in Canada.

An executive committee of seven also was set up to deal with the day-to-day developments of interest to the council between full council meetings, which are planned to take place three times a year. The permanent staff will consist of five officers under Dr. A. W. Trueman, former National Film Board commissioner, and about a dozen stenographers.

Brooke Claxton, chairman of the council, has said the council will make every effort to keep operational expenses down.

The Canada Council will have $50 million to invest, the revenue from which will be used for grants to deserving cultural enterprises. These grants are estimated at about $2 million a year.

Mr. Claxton said at the close of the 2-day meeting that the council in 4 years would have as much money to devote to the arts as the Rockefeller Foundation has spent in Canada in 44 years.

The remaining half of the $100 million will be used to assist universities in constructing more buildings for the teaching of the arts and sciences. University building is drastically insufficient for the growing demand in Canada.

A meeting with university heads will be held by the council in June to work out a formula for making the grants.

Address by Hon. John M. Butler, of Maryland

EXTENSION OF REMARKS

OF

HON. THOMAS M. PELLY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 23, 1957

Mr. PELLY. Mr. Speaker, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD an important address delivered by the Honorable JOHN M. BUTLER, the distinguished senior Senator from Maryland. This speech was given at a dinner of the Port of Washington, District of Columbia, Propeller Club on National Maritime Day, May 22, 1957. The Senator's remarks on our merchant marine and in particular in reference to the Panama Canal merit the careful reading of all Members of Congress.

The address follows:

Mr. Chairman, members of the Propeller Club, ladies and gentlemen, I always look forward with a great deal of pleasure to Maritime Day. It gives me an opportunity to renew old friendships in the maritime fraternity and, I hope, to make some new ones. And it usually affords an opportunity to talk a little about maritime matters.

This evening, there are several thoughts I should like to discuss with you. But before so doing, may I join with you in paying tribute to the steamship *Savannah*. One hundred and thirty-eight years ago today—on May 22, 1819—she left her home port of Savannah, Ga., on the first transocean voyage by any steamship. Twenty-five days later she arrived in Liverpool.

It took the Congress somewhat longer to recognize the significance of that historic voyage. One hundred and fourteen years later—to be exact, in 1933—the Congress finally passed a joint resolution designating each May 22 as National Maritime Day.

Think for a moment what a lonely, dangerous, and great adventure for American capital and American seamen that trip of the little steamship *Savannah* must have been. Remember, it took place only 7 years after the War of 1812. In those early days when sailing ships ruled the waves and steam vessels were considered infernal contraptions, I doubt that many people were as respectful of the owners, and officers, and crew of the *Savannah* as they should have been. Instead of recognizing them as forerunners of things certain to come, most of their contemporaries must have considered the *Savannah* and her crew outright freaks.

However, they are rightly honored today by countless celebrations all over the United States for the feat they accomplished and for their courage and wisdom. That courage and wisdom has been a sound investment and we as a Nation—and the entire world for that matter—are the beneficiaries of their brave deeds.

Now, my friends, I want to touch briefly on a few general matters of vast importance to the American merchant marine.

First, a word about American shipbuilding. Here we have much for which to be thankful.

However, with the shortage of steel plate as it is, we have nothing about which to be complacent. At last count, there were 118 oceangoing ships building or on order in privately owned American shipyards.

In addition, the Navy is now building 43 ships in private yards. Compared to the fact that in May 1954 not a single American yard had received an order for an oceangoing vessel for more than 18 months, I think

we have done well in the short span of 3 years.

Within the framework of free enterprise, and without the need for governmental controls, the steel companies must produce the types and quantities of steel plate which our private shipyards must have if our ships are not to be built in foreign yards. I am confident that the steel industry will meet this pressing challenge.

I have been extremely pleased to observe that high-ranking Government officials and industry leaders are cooperating closely on many matters of advanced maritime research and development.

To overcome the tremendous competitive advantage possessed by foreign low-wage maritime nations, it is incumbent upon us to exploit to the fullest the advantages we have in the way of advanced technological know-how. Bold, brave maritime research, performed by private industry, with a maximum of Government cooperation, is needed now, more than ever before, as we stand at the threshold of replacing our war-built merchant fleet. Some of the same spirit and courage which brought about the epic voyage of the *Savannah* will serve us well in these days when we are trying to design and build ships, and shoreside facilites, to serve—continuously and effectively—the commercial and defense needs of this country.

Our tramp fleet is doing well—all things being considered. Unfortunately, the tramp owners are not replacing their fleets with vessels built in American yards. In fact, what profit they are now making comes from cargoes they obtain under the provisions of the cargo preference, or 50–50 bill. This I firmly believe. These cargoes, as you know, are generated in large part by Public Law 480, our surplus agricultural disposal program.

The continued existence of our tramp fleet depends in large measure on the preservation and perhaps extension of our cargo preference bill. For that matter, the continuation of what prosperity our subsidized lines are enjoying also depends on this vital law.

A word concerning the cargo preference bill.

First, it is my present intention to introduce later in this session of the Congress a bill which will require that at least 75 percent of all Government-financed cargoes must be carried aboard privately owned American-flag vessels. Such a measure seems fully justified. First, cargoes generated by our own Government should be carried in major, not equal, part by privately owned vessels flying our flag if they are available to perform the service at market rates reasonable for such vessels. Second, I am hopeful—and perhaps this is wishful thinking—that foreign aid, especially that of a non-defense nature, will in the near future take a sharp decline. I cannot believe that the American taxpayer is going to stand for many more shipments of jet planes to Yugoslavia, and the like.

If foreign aid declines, thereby making it possible to give some long-overdue tax relief to our people, there will be less giveaway cargoes carried by our own vessels unless we boost their share.

In the hearings which should result from the introduction of such a bill, I will be particularly interested to learn how the Government agencies charged with the administration and implementation of the present cargo preference law are in fact carrying out their responsibilities. There are rumors that one or more construe the law as authorizing them to refrain from offering Government-generated cargoes to American-flag vessels in excess of 50 per cent of such cargoes. Certainly it was the intention of the Congress that the requirement that at least 50 per cent be carried by American-flag vessels would establish a minimum and not a ceiling on the American-flag share.

If administrative abuses are taking place in disregard of the spirit of the Congress and the express language of the statute, now is the time for the Congress to take appropriate steps to put an end to these practices and omissions.

In this inquiry, it will be important to ascertain how the agencies administering and implementing the present cargo preference law go about offering American-flag vessels their share. I would think it grossly unfair for an agency to first assign 50 percent of the tonnages to foreign-flag vessels; and thereafter offer, on a short-notice basis, the remainder to American-flag ships. Such a practice undoubtedly would afford the American-flag vessels too little time to make adequate arrangements. It would prevent them from preplanning their participation and might cause undue rate squeezes.

Such a practice might give an unsympathetic agency an excuse to grant or recommend waivers, thereby permitting shipment via foreign-flag vessels. If this practice exists, it must be stopped.

And ladies and gentlemen, these hearings should establish the policies of the agencies in allocating cargoes as between conference and nonconference United States lines.

I would be remiss this evening if I did not say a word or two about the splendid job done by the administration—legislatively and administratively—to encourage American-flag lines to begin an orderly, phased replacement of their war-built fleets. As we all know, probably the most serious problem confronting the American Merchant Marine today is the orderly replacement of over 1,000 privately owned vessels by the end of 1966. Over 900 of these vessels will be 20 years old, or older, between 1962 and 1966. Firm commitments for the construction of at least 21 ships have already been made; and, with such well-conceived plans as its "trade-in and build" program, the Maritime Administration and the shipping industry are intelligently facing up to the problem.

Now, ladies and gentlemen, I would like to direct your attention to a certain matter which I believe vitally affects the defense of this Nation—a vital matter which could directly affect the American Merchant Marine. I refer to the recently accelerated campaign to bring about the internationalization of the Panama Canal.

One of the greatest maritime investments of the United States was the Panama Canal. It has proven indispensable to our maritime commerce and to our national defense.

On May 6, 1957, in my weekly newsletter, I predicted, and I quote: "With jurisdiction of the Suez Canal still in delicate imbalance, it can be anticipated that the call for internationalization of the Panama Canal will soon be sounded by the far left quarter of the political spectrum."

We did not have long to wait. According to the Washington Star of May 8, 1957, the cry to give away the Panama Canal was made on May 7 right here in Washington.

Dr. Norman Cousins, editor of the Saturday Review, declared in all seriousness that America should give up control of the Panama Canal and place it under the jurisdiction of the United Nations; the United Nations, let us not forget, where Soviet Russia has equal voting power with the United States in the Security Council and where she can completely frustrate the work of that body with the veto.

Dr. Cousins saw what he considered a "fortunate" opportunity for the United States to show the world that it practices what it preaches in insisting on the internationalization of the Suez Canal.

Disregarding the completely different historical backgrounds of the two waterways, he expressed the belief that, and I quote: "We are in the fortunate position of being able to use the canal" to help bring peace to the troubled Middle East. To continue quoting: "Our relations with the Arab countries would profit more from such an example than from the kind of military aid that is now being sought," Dr. Cousins claimed.

This dangerous brand of naive idealism during these perilious times when hard-headed realism should be at a premium must not be allowed to gain the upper hand in the conduct of our international affairs. I will go even further and say that if the United States internationalizes the Panama Canal at this dangerous juncture in international relations it will sign the death warrant for the entire Western Hemisphere.

As a passionate advocate of world government, Dr. Cousins has often proposed fuzzy-minded schemes, designed to relegate the United States to the position of a mere vassel state in a world government where we would pay the lion's share of the cost and be out-voted on every issue. Of course, if one is willing to give away the entire country, it is not surprising that he might also want to give away the canal.

There is little or no analogy between the Panama Canal and the Suez Canal.

The juridical basis for American control of the Panama Canal rests in three important treaties; 1901, 1903 and 1914.

There is one overriding fact which must be kept ever in mind: The Panama Canal and the Panama Canal Zone for all practical purposes is the sovereign territory of the United States of America. The United States has permanent rights to occupy, use, and defend the area; and the canal is available to the commercial vessels and warships of all nations, without discrimination, except during wartime.

We foresaw its importance and under the inspired leadership of Theodore Roosevelt and Col. George W. Goethals of the Army engineers, dug it, paid for it by the terms of the treaty, and authorized its secured sovereignty under the Canal Zone until the end of time. Any attempt to abrogate or nullify that treaty is strictly an affair between the United States of America and the Republic of Panama and no unilateral decision can be made to change the status quo.

No other nation or combination of nations—and this would include the United Nations—has a right or even the legal means to upset this status quo.

The Suez Canal, on the other hand, has been operated by the private corporation which created it. This company is incorporated in accordance with the laws of France, has Egyptian nationality, and is international in character. It held concessionary rights to operate the canal until 1968, after which the waterway was to revert to the Egyptian Government.

The net investment of the United States in the Panama Canal, which has been called the greatest engineering feat of all times, as of June 30, 1955, was $368,004,765. To this staggering sum must be added the very heavy costs over the years for the maintenance of the Armed Forces on the Isthmus for defense purposes.

The Suez Canal, on the other hand, is a 105-mile lockless waterway cut across barren desert land and cost only about $92,414,000 to construct. The cutting of this channel across the Isthmus from the Mediterranean to the Red Sea, was mere child's play, compared to the construction of the Panama Canal. In fact, when the work at Panama was at its height, the American Government was excavating the equivalent of a Suez Canal every 15 months—and it took 10 years to build the Panama Canal.

To claim that because the United States advocates the internationalization of the Suez Canal it must, to be consistent and show good faith and to earn good will, internationalize the Panama Canal, is utterly ridiculous.

If this brand of perverted logic is to be the criteria for the conduct of our affairs, then the next step would be to internationalize the Erie Canal or the St. Lawrence Seaway. I have no doubt but that some of our more dedicated internationalists would rejoice if we did just that. But so long as I am a United States Senator, I shall jealously guard the sovereign rights of this Nation and its pledged word in treaties with other nations.

I can readily understand the motivation of some of those in our midst who would like to see the most valuable maritime possession of the United States lying outside its continental limits internationalized. For it is an established fact that it is a fundamental object of Soviet Russian foreign policy to place the Panama Canal under Communist control.

There have been reliable reports that, to accomplish this, Communist agitators, trained at the State College of Political and Economic Science at Prague, Czechoslovakia, the propaganda educational center of international communism, are being sent to Central America to direct it.

This dedicated effort of international communism to wrest control of the canal from the United States is not something new or novel.

On March 25, 1954, before the Internal Security Subcommittee of the United States Senate, Mr. Spruille Braden testified that this Communist agitation has been going on for some time. Mr. Braden, our former Ambassador to Colombia and former Assistant Secretary of State for Latin American affairs, said, and I quote: "Going back to 1941, when I was in Colombia, I began sounding warnings to the State Department about the menace of communism in this hemisphere, and during the war—1943 and 1944—there were repeated dispatches in which I said that this is the gravest peril we face and that after the war it is going to be most serious."

Then Mr. Braden revealed to the subcommittee evidences that pro-Soviet officials of the State Department tried in vain to sabotage America's interests in the Panama Canal through the United Nations.

We have seen in the past 10 years the deadly tentacles of international communism spread first over eastern Europe and the Balkans; then over China; and then into southeast Asia. Now we see these tentacles probing the Middle East and Africa. The wanton death, destruction, and human slavery which they have left in their wake is a matter of history. We know the masterminds of the Kremlin have their eyes leveled on the Central American and South American land mass. We know that those deadly tentacles are probing in that area. A thrust was made in Guatemala only to be repulsed by the stout-hearted patriots of that nation. The key to the control of Central and South America—and eventually the United States—is the Panama Canal. If that waterway can be wrested from American control, Communist infiltration into this hemisphere would be made manifestly simple.

Free, uninterrupted use and control of the Panama Canal is absolutely vital to our domestic and foreign commerce.

It brings Seattle 7,800 miles nearer to New York; San Francisco 8,800 miles nearer to New Orleans; Honolulu 6,600 miles nearer to New York than by the Strait of Magellan. With respect to the foreign commerce of this Nation and the free world, the importance of the canal is equally impressive.

The United States, by virtue of the Monroe Doctrine, has always assumed an inherent responsibility for the defense of the Western Hemisphere. The long journey of the U. S. S. *Oregon* around Cape Horn from the Pacific Ocean to the theater of the war with Spain in the Caribbean waters, in 1898, served to impress upon the American mind the absolute necessity of a canal across the Isthmus of Panama for this defense. Now that the canal has been built, it stands as a veritable Gibraltar for the American defense of this hemisphere.

This suicidal proposal to dissolve American control of the Panama Canal has been voiced by many Americans in high place and low. I do not charge that these people are necessarily pro-Communist. I do charge, however, that the proposal itself, should it be carried out, would place the right hand of international communism at the very throat of the Western Hemisphere.

Dr. Cousins, I am confident, is sincere in his proposal. I am sure that he is motivated by the highest ideals and seeks only a world of peace and harmony. However, these are trying times when dubious experiments in good will must not be allowed to take precedence over hardheaded realism. For the very survival of our Nation and the entire Free World hangs in the balance.

Thank you very much.

Report on International Health

EXTENSION OF REMARKS
OF
HON. OREN HARRIS
OF ARKANSAS
IN THE HOUSE OF REPRESENTATIVES

Thursday, May 23, 1957

Mr. HARRIS. Mr. Speaker, as chairman of the Interstate and Foreign Commerce Committee, I have filed today with the House of Representatives a report on international health. The report summarizes testimony given by the Public Health Service and the Department of State at hearings held during the 84th Congress on the organization and financing of, and the participation of the United States in, international health programs.

On this occasion I released the following statement which explains the circumstances which led to the preparation of the report:

Congressman OREN HARRIS, Democrat, Arkansas, chairman of the Interstate and Foreign Commerce Committee, announced today the filing with the House of Representatives of a report on international health. The report summarizes testimony given by the Public Health Service and the Department of State at hearings held during the 84th Congress on the organization and financing of, and the participation of the United States in, international health programs.

"While at this time, the committee does not offer any conclusions with respect to the role which the United States plays in international health programs," Congressman HARRIS stated, "the programs are of such scope and far-flung character that it seemed appropriate to make public for the benefit of the Congress and the American people, this summary of testimony, thus bringing together in one place information available on the organization and financing of, and United States participation in, international health programs."

Congressman HARRIS pointed out that the release of this report coincided with the annual meeting at the Assembly of the World Health Organization in Geneva, Switzerland, in which Congressman JOHN E. FOGARTY, Democrat, Rhode Island, the chairman of the Subcommittee on Labor, Health, Education, and Welfare of the Appropriations Committee, and Congressman CHARLES A. WOLVERTON, Republican, New Jersey, the ranking minority member of the Committee on Interstate and Foreign Commerce, were participating as congressional advisors to the United States delegation. Mr. HARRIS expressed the opinion that Mr. WOLVERTON's designation as one of the congressional advisors to this important meeting constituted a recognition of the committee's continuing interest in, and contributions to, the field of international health.

Congressman HARRIS called attention to the possible overlapping of activities of the several agencies operating in the field of international health. He stated that, while it appeared that substantial efforts had been made to avoid unnecessary duplication through full exchange of information and formal consultation among the officials concerned, it was not clear whether all had been achieved in this respect that may be desired. Congressman HARRIS indicated that the Committee would give its attention to this problem in its continuing scrutiny of international health programs.

Congressman HARRIS pointed out that the Committee on Interstate and Foreign Commerce has legislative jurisdiction in the field of health, and that in the exercise of its responsibilities in this field, the Committee in the past had frequent occasion to inquire into international health programs in different parts of the world. These inquiries included the operation of the Public Health Service in foreign countries, and the health and quarantine problems attending the facilitation of international air commerce. Previous reports of the Committee on Interstate and Foreign Commerce, however, dealt only with international health activities in particular functional fields or in particular geographic areas. The instant summary is intended to supply comprehensive background information for future inquiries in this field.

Speech of Hon. Robert W. Hemphill, Lancaster, S. C., Armed Forces Day, May 18, 1957

EXTENSION OF REMARKS
OF
HON. ROBERT T. ASHMORE
OF SOUTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES

Thursday, May 23, 1957

Mr. ASHMORE. Mr. Speaker, under leave to extend my remarks I desire to include an address delivered by Hon. ROBERT W. HEMPHILL, Member of Congress, Fifth District of South Carolina, at the Armed Forces Day celebration in Lancaster, S. C., on Saturday, May 18.

The address follows:

SPEECH OF HON. ROBERT W. HEMPHILL, LANCASTER, S. C., ARMED FORCES DAY, MAY 18, 1957

Mr. Chairman, distinguished guests, ladies, and gentlemen, it is a privilege to be with you today and join and have a part in the celebration of Armed Forces Day in the great county of Lancaster.

This is the first speaking engagement I have accepted in the district since the Congress convened, and I am delighted to be here among so many friends and with such pleasant recollections of my past association with you in the courthouse and elsewhere.

America today is, from a military standpoint, at a stage of development and preparedness which most of us believe vital at all times. Because of improved methods of communication, our people are alerted and

aware of world conditions which make necessary the maintenance of experienced Armed Forces.

The two major factors affecting current defense policies are the persistent threat to the security of the United States and the rapid scientific and technological developments in recent years.

The first requires the continued maintenance of a ready and flexible defense establishment to deter aggression of any size. The second demands special emphasis on an effective research and development effort and the progressive adjustment of the Armed Forces to take advantage of the new weapons and equipment available.[1]

The Western Hemisphere cannot hope to win the world race in numerical manpower. We have neither the initial number of people, the time, nor the inclination to match the hordes of China, Russia, and their satellites.

As Americans we have refused to sacrifice our standards of living in order to have numerical advantage. Before World War II we were criticized for this attitude, but the American soldier of World War II in combat warfare proved that our way of life makes for the best men and the best soldiers.

I am thankful that I live in a country which has never debased its national philosophy by the support of brothels for the productivity of humanity in a manner such as was exhibited in Nazi Germany in the 1930's.

Since we cannot put into the field great numbers of soldiers, sailors, and airmen, we must concentrate on smaller units, highly specialized, with striking power trained to near perfection.

Improvement in aircraft in recent years has inaugurated a new air age and almost daily some new weapon, or improvement, takes its place in this the supersonic decade. Guided missiles of all types—surface to surface—surface to air—air to air—and air to surface, are augmenting our retaliatory and defensive strength and implementing the offensive power of each arm of our service.

On June 30, 1953,[2] we had 1,026,000 men in the Army, some 83,000 less than a year earlier, and although the force level declined, combat effectiveness continued to improve and is unparalleled in modern military history. Our Navy is at the approximately same strength, having a manpower increase of only 9,000 men. We have superior carriers, mobile airfields, to carry the nuclear warheads, and, because of mobility and evasive potentialities less likely to suffer as a target than stationary land air bases.

The Air Force added 10 new weapons during the fiscal year 1956 and only last week added a vital type aircraft capable of performances which 10 years ago were only a dream.

Our objective is to see that war does not occur. Our present military leaders operate on the assumption that the Communist threat to our national security is one of the present and of the future, and that we must be adaptable to new weapons and new techniques. Our new weapons do not eliminate, at any time, our need for good men and women. In the Air Force, particularly, we face the problem of spending vast sums in training personnel, only to lose their technique because private business has more to offer at the end of the enlistment period. The Congress has attempted by various legislations to offset this situation. I speak of the Dependent's Medical Care Act of 1956, of the Military Public Works Act of that year, as well as the inclusion of the soldiers in the Federal Social Security System. Effective January 1, 1957, survivors received increased benefits and well they should.

You and I as citizens want the best. In typical American fashion, we demand it. We expect it in the future, and we believe that those who serve in our Armed Forces today, including those in our Reserve programs, are the best on earth. Unfortunately, we cannot complete the defense picture by citing military strength alone. In the event of a nuclear war, triggered by some fanatic across the water, we find upon us certain catastrophe, the limits of which no man can accurately predict. For the first time in mankind's history partial defense is not enough to protect our citizens from atomic-hydrogen weapons so powerful that one bomb could destroy the great city of Los Angeles.

We are confronted with these harsh facts of the contemporary world. We must strive to increase the deterrent factors against war. The two most powerful deterrents we possess today are the military power to strike back against an aggressor's blows and the military defenses within the Nation. Our third powerful deterrent can be created—to strengthen our capacity to substantially withstand attack, our national resiliency, by insuring the continuity of civil government and the protection of civilian life. For want of a better phrase we speak of "civil defense."[3]

Nonmilitary defense is as much a necessity to our survival as any weapon or any branch of the service. In the event of war, we must face such necessities as organization, cooperation, and authority. We must be able to quickly inventory, not only the damage, but the surviving raw and manufactured materials. Otherwise, you could conceivably be permitting people to make jukeboxes out of the only steel that might be left.[4]

In the testimony before the congressional subcommittee, known as the Holifield Military Operations Subcommittee, Committee on Government Operations, the former Governor of Nebraska, Hon. Val Peterson, now Administrator, Federal Civil Defense Administration, brought out the fact that in the past wars we have had the luxury of time. We could organize and get ready. His statement before the committee was, "I think it is absolutely clear that if we are not prepared when the first atomic bomb falls, we just can't get prepared following the explosion of the first bomb assuming that we have a large attack."[5]

Suppose the supply of drinking water in some area was completely contaminated. What would be the effect on the population? To what authority could we turn? What productive capabilities would remain if a single hydrogen bomb can release more destructive explosive power than all of the bombs dropped on Europe and Japan during World War II? It is estimated that we dropped the equivalent of 2½ million tons of TNT on Europe as compared with the equivalent explosive power of 12 million tons of TNT in the first hydrogen bomb, which has since been improved to twenty-or-more million tons.

Now I have talked of men and of weapons and of fear and of war, and now let us talk about people. Our Western civilization is neither more able to fight nor ready to defend, than we ourselves. The fiber of the individual must be as strong as his forebears.

At the risk of increasing the trend toward statism, I believe we should develop our national pride, drumbeat loyalty to our country, inoculate the young and the old with the determination that we must survive regardless of the impending or realized catastrophe.

Many military men will tell you that military effectiveness for any length of time is dependent upon supply. Supply, called logistics by the soldier, means civilians. Civilians mean Americans like you, who in World War II produced for and fed the American fighting force, sacrificing daily in the war effort.

We must support our military. We must give them more than money and weapons. We must give them our moral support, evidenced by our appreciation of their effort and our acknowledgment that the uniform of the American military man, except for the cloth of the church, is the garment of highest honor.

We must be prepared on the home front. We should back up our civil defense with all the power at our command. We must have a determination for peace, but we must also have the determination that my child and your child would better die for the United States than live under the heel of a foreign tyrant.

I speak of these things because it is my conviction that our ultimate victory will be achieved by our spiritual, mental, and moral preparedness. We are people with a heritage of hardships and conquest over those hardships. If any enemy believes us prepared in mind and body, individually or nationally, there will be no war.

Weapons are no defense to bacteriological and psychological warfare, and propaganda. A sudden flare on the horizon—a hysterical announcement over the radio or television—an untrue newscast describing unheard-of destruction and potential dislocation, the American people would in less than an hour be put to the test.

The determination to fight or not to fight would still be left with the civil authorities. The decision of the Government might be made upon what they believe the American people wanted in such time of crisis.

So all of us here can realize that this is our day and our generation, and whether we wear the uniform, or have worn it yesterday, or have been civilians who backed up the Armed Forces, paid the taxes, produced and gave the soldier the moral backing, we must face the perils of our age.

The mind and the heart and the attitude of each American here is foremost for this country. I join with you in the determination we will not let America down.

United States Armed Forces—A Power for Peace

EXTENSION OF REMARKS

OF

HON. THOMAS J. LANE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 23, 1957

Mr. LANE. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to include my speech for the Armed Forces Day on May 18, 1957, which was carried over several Boston radio stations.

UNITED STATES ARMED FORCES—A POWER FOR PEACE

Ladies and gentlemen of the radio audience, Saturday, May 18, is Armed Forces Day.

It marks the eighth annual observance of the day that we set aside to salute our fellow

Americans who are serving in the Armed Forces.

They in turn, at their duty stations throughout the world, will emphasize our country's power for peace, during the period from May 12 through May 19.

On Sunday, May 12, your attention was called to the religious aspect of our Nation's 20th century crusade for international understanding and peace.

Saturday, May 18, will be devoted to public displays and demonstrations by the Armed Forces.

Sunday, May 19, the power for peace theme will highlight the fact that our capacity to defend freedom gives us the opportunity to work for that day when it will be impossible for any nation to employ aggression as an instrument of national policy.

As civilians, it is incumbent upon us to honor the full significance of Armed Forces Day. To realize that as Europe declines in prestige and power, we have thrust upon us a graver and more weighty responsibility. This responsibility is both moral and military, and the two are sides of a single shield, which is America's power for peace.

Our Armed Forces will be the hosts—and you, the guests—on Armed Forces Day.

Millions of men, women, and children will attend open house programs at our posts, bases, and units all over the world. They will be entertained by service bands, and thrilled by precision parades. They will view some of the latest weapons we have developed for defense. They will learn how the Armed Forces operate—on land, sea, and in the air.

During the ages of sail and steam, with two broad oceans to isolate us from conflicts elsewhere, we only maintained token military forces. With the world wars of this century, our allies bore the brunt of the fighting until we could raise, train, and equip enough military strength to turn the tide of battle.

In this age of atomic bombs and guided missiles, however, we shall not be given any time to make up for lack of preparedness.

Until the Communists abandon their fanatical ambition to enslave the world, we must have the retaliatory force to strike back hard, should they mount a massive and surprise attack against our homeland.

It is no secret that the Commnuists could cripple us in the first few minutes of an attack if our guard is down. Unopposed, they could devastate us in the first few hours of war.

As Gen. Nathan F. Twining, Air Force Chief of Staff, has said: "The long-range airplane coupled with the nuclear bomb has forever erased our ability to buy time."

As a result, we are maintaining the largest peacetime Armed Forces in the history of our Nation.

For this security, the average American has to pay hundreds of dollars each year in Federal taxes.

Much as we have to sacrifice for this purpose * * * we recognize the necessity for it. Without it we would invite enslavement by the Communists.

The cost of this insurance policy for peace is over $40 billion a year. Ninety percent of this is spent on the upkeep of our own Armed Forces both in the United States and on bases that ring the Communist Empire. The other 10 percent is spent for assistance to our allies.

The rulers of Soviet Russia are engaged in an all-out effort to become superior to us in military power, in their drive to extend Communist control over the rest of the world. They are devoting one-seventh of Russia's gross national productive effort to military expenditures. They are spending over $500 million a year for foreign propaganda alone.

The way in which Russian Communist tanks ruthlessly suppressed the heroic struggle of the Hungarian people to recover their independence, is a recent and frightening example of the fate that we would suffer, if we ever allow the Communists to gain the upper hand in military strength.

United States military bases gird the globe. They stand ready and alert at the frontiers of the Free World, all of which is on guard. As Secretary of State John Foster Dulles said: "If we were relatively feeble in relation to the vast military power possessed by unscrupulous men, then we would not be the master of our own destiny."

Thus, we must first be militarily strong if we are to gain lasting peace.

International communism, led by the rulers of Soviet Russia, respects only power, To deal with the Soviets successfully, we must first possess power they will respect. Having such power, we are than in a position to negotiate with them on other issues and strive for measures that will ultimately change their thinking and their actions.

Our Armed Forces possesses this deterrent power.

Our Armed Forces possess this deterrent maintained in peacetime. It is deployed on 3 continents, and its representatives are stationed in 73 countries. Our soldiers' presence along the iron and bamboo curtains is heartening evidence to our allies that we share their perils; that we stand ready to oppose aggression or to preserve the peace.

Atomic missiles have greatly increased the Army's firepower. The Army is constantly moving forward in the technological race for better weapons and for better organization and tactics for atomic warfare. An example of modernization is the recently reactivated 101st Airborne Division, whose new organization makes it completely air transportable. Also introduced during the past year were the M-56 self-propelled 90-mm gun, the helmet radio, and the mechanical mule.

The Navy, which successfully engineered the first nuclear-powered ship, the submarine *Nautilus*, is constructing others of the same advanced design. These vessels, armed with guided missiles and torpedoes, will be capable of sustained high speeds under water, and almost indefinite endurance without refueling.

Two guided-missile cruisers, the *Boston* and the *Canberra*, have joined the fleet. The heart of the Navy's striking power is the modern attack aircraft carrier, since naval aviation is the most important offensive element of the Navy, as well as being a most necessary defensive element. The aircraft carrier *Saratoga*, sister ship of the *Forrestal*, was commissioned last year, and another, the *Ranger*, was launched, and two more are on the way. Our carrier forces are daily being strengthened as older planes are replaced by new supersonic fighters and high-performance jet medium bombers capable of delivering nuclear warheads at a great distance. Today, our Sixth and Seventh Fleets are standing by in overseas trouble areas, ready for any eventuality, adding another dimension to our total deterrent power for peace.

The Air Force is daily increasing its effectiveness. In its nuclear weapons and its ability to deliver them thousands of miles away, the Strategic Air Command provides the principal deterrent to the Communists * * * our ability to strike back to the heartland of the enemy. The Tactical Air Command, equipped with fighters and light bombers, presents a deterrent to local wars and provides combat air support for Army ground forces. TAC now has nuclear weapons aerial refueling, and the growing ability to move by air from bases in the United States, to bases anywhere in the world. The Continental Air Defense Command, has improved its capacity to destroy attacking aircraft. Supersonic interceptors, equipped with air-to-air guided missiles, are becoming a functional part of our defense units.

As a combat force in readiness, the Marine Corps plays a vital role in preserving our Nation's security. The nature of beach assault has been radically altered by helicopters, which speed up operations, permit easy initial dispersion and then concentration to knock out enemy defenses and lay enemy coastlines open to helicopterborne assault while our ships are well out at sea. At the Marine Corps Development Center at Quantico, Va., still more new tactics, equipment, and techniques are under study, emphasizing speed and flexibility in the use of modern weapons.

The Coast Guard maintains constant watch against possible threats of subversion and sabotage to ships and waterfront areas. Its icebreakers take part in resupply missions to Thule Air Force Base in Greenland, and to weather stations in the far north. The chain of Loran stations, one of the Coast Guard's most important navigational aide systems, extends all the way from Greenland to Tokyo. This provides valuable assistance to transoceanic ships and aircraft.

Power for peace is based first, then on United States military might. It is based, secondly, on a system of alliances and cooperation with other free nations. It depends, thirdly, on the homefront * * * on the productive and technological abilities of our country, and on the unity of purpose and dedication to principle that unite us as a people. And, finally, it is inspired by prayer and Divine Guidance, to give us the strength and the opportunity to secure freedom and promote international cooperation.

Our men and women in uniform invite you to attend their open house programs. To see the reviews, the equipment, and the installations. And, in every way possible, to honor Armed Forces Day.

Witness, for yourself the strength of our defenses.

And appreciate the part that you play in maintaining the power for peace, which is the enlightened policy of the United States.

Prospects for Tax Reduction—The Past Is Prologue

EXTENSION OF REMARKS

OF

HON. DANIEL A. REED

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 23, 1957

Mr. REED. Mr. Speaker, it is currently popular political sport for elected representatives of the people to speak in a knowing manner about tax reduction. Much of this discussion stems from politically motivated efforts to impress the people with the fact that the political proclaimer not only promised tax reduction "firstest," but that he also promised the "mostest." In early April when these tax-cut promises began to reach their full crescendo, I labeled them as "premature" and pointed out that for the most part they were being uttered by those who have traditionally been among the ranks of the spenders in Congress.

These premature political promises were made before the committees of Congress had made any substantial progress in the consideration of appropriation bills. These premature political promises were made before a review had been made of estimates of Federal receipts for the fiscal years 1957 and 1958.

The spenders in Congress in promising tax relief before sufficient consideration had been given to appropriation bills and before revised estimates of tax receipts were available were premature in their pronouncements. They also were indicating a determination to use the proverbial meat-ax approach to budget reduction without regard to the national need for the goods and services provided for the people of our Nation under the proposed expenditure program provided in the 1958 budget. That these political proclaimers were premature in their tax reduction promises has now been demonstrated by publication of the revised estimates of Federal receipts for fiscal years 1957 and 1958 by the staff of the Joint Committee on Internal Revenue Taxation. These estimates indicate a substantially reduced budgetary surplus for each of the fiscal years involved as follows:

TABLE 1.—*Receipts, expenditures, and surplus of the Federal Government, actual for fiscal 1956, estimates for fiscal years 1957 and 1958*

[In billions of dollars]

	Actual, 1956	Estimated, 1957		Estimated, 1958	
		January budget estimates	May staff estimates	January budget estimates	May staff estimates
Receipts	68.2	70.6	70.7	73.6	74.3
Expenditures	66.5	68.9	69.5	71.8	73.0
Surplus	1.6	1.7	1.2	1.8	1.3

Fiscal responsibility in the conduct of our Federal affairs demands that these minimum surpluses be preserved and that we avoid deficit financing that would result from either a further increase in Federal expenditures or an unjustifiable tax reduction in advance of substantially less Federal spending.

Mr. Speaker, I believe that my record in the House of Representatives clearly demonstrates that no one has sought tax reduction with greater consistency or more earnestly than I have. I have always believed that the people rather than the Federal Government could more effectively spend the taxpayer's dollar. My tax philosophy has been predicated on three cardinal principles: First, the Nation's tax policy must provide sufficient revenue for the conduct of essential governmental affairs; second, that policy must fairly and equitably apportion the tax burden among our citizens according to ability to pay; and third, that tax policy must stimulate the dynamic development of our free enterprise economy and remove those influences which stifle the development of individual initiative and enterprise.

In the caption to these remarks I have indicated that the past is prologue. Because previous events portend the future, I believe it is appropriate at this time to review the tax record of each of the two major political parties in the United States so that the American people can derive a realization as to the causes of the current tax problems that beset us and an indication as to which party is more likely to provide our citizens with responsible tax reduction in the future.

With the advent of the 16th amendment, on March 1, 1913, the Federal income tax collector visited the American people and he has since continued that visit without interruption. In September 1916 the Federal estate tax collector began his visit with the American people and he too has stayed without interruption. In addition the Federal excise tax collector has plagued our American families with sporadic visits, particularly during the First World War when a host of these excise taxes descended upon us. Most of these World War I excises were repealed by the Republican Revenue Acts of 1921, 1924, 1926, and 1928, but they were all dusted off and revived as part of the blessings of the New Deal and they grew in size and number under Democrat paternalism. The Republican Party in 1954 substantially reduced and in some instances repealed these excises.

During the period from 1919 to date the Democratic Party has been responsible for 14 increases and 3 reductions in individual income taxes. During this same period the Republicans were responsible for 9 tax reductions and 1 tax increase in individual income taxes. The Democrats' fiscal tax policy has traditionally been dedicated to the principle of tax and tax, spend and spend. By consistent and I might add—unconscionable, adherence to this Democratic policy, the Democrat Party has broadened the tax base and increased the tax rates every time that party has been in power. Starting with a personal exemption for a single person of $3,000 and an exemption for a married couple of $4,000, the Democrat Party through a series of tax increases reduced the personal exemption until it reached a level of $500 for a taxpayer and each of his dependents in 1942. This Democrat reduction in the exemption level not only meant that more of a taxpayer's income was subject to tax, but it also meant that millions more Americans were required to pay taxes. In addition to decreasing the personal exemptions the Democrat Party piled tax rate increase on top of tax rate increase.

On the other hand the traditional fiscal policy of the Republican Party has been tax reduction, expenditure reduction, and debt reduction. It is no mere chance occurrence that under this Republican fiscal policy the two greatest tax reductions to ever occur in the history of our Nation were Republican-sponsored. During the Republican 80th Congress, tax reduction legislation was enacted that saved the American taxpayers an estimated $5 billion annually. During the Republican 83d Congress tax reduction occurred in the total amount of $7.4 billion. In the CONGRESSIONAL RECORD, on page 6143, I inserted a factual description of the accomplishments of the Republican Party in achieving tax reduction and expenditure reduction. To further inform my colleagues in the House about the tax record of the Nation's two major political parties, I will insert in the RECORD at this point a summary table of Federal individual income-tax exemptions and first and top bracket rates for the period from 1913 through 1957. By reference to the years indicated in the left-hand column of the table, the party responsibility for tax changes can be determined.

TABLE 2.—*Federal individual income tax exemptions and 1st and top bracket rates 1913–57*

Income year	Personal exemptions					Tax rates			
	Single	Married				1st bracket		Top bracket	
		Dependents				Rate	Amount of income	Rate	Income over—
		No	1	2	3				
						Percent		*Percent*	
1913–15	$3,000	$4,000	$4,000	$4,000	$4,000	1	$20,000	7	$500,000

[1] If net income exceeds $5,000, married person's exemption is $2,000.
[2] After earned income credit equal to 25 percent of tax on earned income.
[3] Before earned income credit allowed as a deduction equal to 10 percent of earned net income.
[4] Exclusive of Victory tax.
[5] Subject to maximum effective rate limitation: 90 percent for 1944–45, 85.5 percent for 1946–47, 77 percent for 1948–49, 87 percent for 1950, 87.2 percent for 1951, 88 percent for 1952–53, and 87 percent for 1954–55.
[6] Additional exemptions of $600 are allowed to taxpayers and their spouses on account of blindness and/or age over 65.

The Democrat Party did not content itself with merely increasing individual income taxes and excise taxes. Table 3 sets forth corporation income tax rates for the period 1909 through 1957 indicating the corporate tax changes. By referring to dates in the left-hand column of the table it is possible to determine the action taken with respect to corporate tax rates by our two major political parties.

TABLE 3.—*Corporation income-tax rates, 1909–57*

Calendar year	Reduced rates on small corporations	General rate
1909–13	$5,000 exemption	1
1913–15	No exemption after Mar. 1, 1913	1
1916	No exemption	2
1917	do	6
1918	$2,000 exemption	12
1919–21	do	10
1922–24	do	12½
1925	do	13
1926–27	do	13½
1928	$3,000 exemption	12
1929	do	11
1930–31	do	12
1932–35	No exemption	13¾
1936–37	Graduated normal tax ranging from 8 percent 1st $2,000; over $40,000. Graduated surtax on undistributed profits ranging from 7 percent to.	15 27
1938–39	12½ to 16 percent 1st $25,000 over $25,000.	[1] 19
1940	14.85 to 18.7 percent 1st $25,000; 38.3 percent $25,000 to $31,964.30; 36.9 percent $31,964.30 to $38,565.89; over $38,565.89.	24
1941	21 to 25 percent 1st $25,000; 44 percent $25,000 to $38,461.54; over $38,461.54.	31
1942–45	25 to 29 percent 1st $25,000; 53 percent $25,000 to $50,000; over $50,000.	40
1946–49	21 to 25 percent 1st $25,000; 53 percent $25,000 to $50,000; over $50,000	38
1950	23 percent 1st $25,000; over $25,000	42
1951	28¾ percent 1st $25,000; over $25,000	50¾
1952–57	30 percent 1st $25,000; over $25,000	52

[1] Less adjustments: 14.025 percent of dividends received and 2½ percent of dividends paid.

In addition to the tax changes indicated in table 3, the Democrat Party enacted excess profits taxes during the three wars in which our Nation became involved while the Democrat Party was in control of our Federal Government. The World War I excess profits tax was in effect from 1917 to 1921, the World War II excess profits tax was in effect from 1940 to 1945, and the Korean war excess profits tax was in effect from 1950 to 1953.

Despite the ever-increasing tax burden imposed on the American people by the Democrat Party, that party has also led our Nation down the path of unbridled inflation, deficit financing, and mounting public indebtedness. That fact is demonstrated by table 4, which I will include as a part of my remarks at this point showing budget receipts and expenditures and public debt for the fiscal years 1915 through 1958.

TABLE 4.—*Budget receipts and expenditures and public debt*

[Fiscal years. In billions of dollars]

Fiscal year	Budget receipts	Budget expenditures	Surplus or deficit	Public debt at end of year
1915	0.7	0.7	−0.1	1.2
1916	.8	.7		1.2
1917	1.1	2.0	−.9	3.0
1918	3.6	12.7	−9.0	12.2
1919	5.1	18.4	−13.4	25.5

1953	64.8	74.3	−9.4	266.1
1954	64.7	67.8	−3.1	271.3
1955	60.4	64.6	−4.2	274.4
1956	68.2	66.5	+1.6	272.8
1957 est	70.7	69.5	+1.2	271.5
1958 est	74.3	73.0	+1.3	270.2

NOTE.—The change in the public debt from year to year reflects not only the budget surplus or deficit but also changes in the Treasury's cash balances, the effect of certain trust fund transactions, and direct borrowing from the public by certain Government enterprises.

It is significant to note that with the advent of the New Deal in 1933 our Federal Government consistently engaged in deficit financing until the Republican-controlled 80th Congress when Republican fiscal policy provided lower taxes, less Federal spending, budgetary surpluses, and debt reduction. It is also significant to note that the fiscal years 1956 through 1958 provide for budgetary surpluses and that the last time that we had 3 successive years of budgetary surpluses occurred with respect to the fiscal years 1928 through 1930—again under the leadership of the Republican Party.

Mr. Speaker, much has been said about the proposed budget for fiscal year 1958. It is likely that much more will be said about it in the months to come. I have previously expressed both regret and misgiving that the President's budget message to the Congress called for such a high level of Federal expenditures. I would call attention to the fact that much of the current criticism of the budget comes from that very vocal group that is composed of the traditional spenders in Congress—the group that has consistently voted in opposition to economy measures, in favor of an ever-increasing Federal bureaucracy, in support of legislation piling a tax on a tax, and in support of measures that have inevitably resulted in mounting public indebtedness.

A review of fiscal statistics supports the great Republican record for economy and gives further evidence to the indictment of the Democrat Party as the spenders. During the period of the Republican 83d Congress there was a sharply declining total of Federal spending from 1953 to 1955, and under the Democrat controlled 84th Congress there was an equally sharp rise from 1955 through 1958. The total budget reduction in the first phase was approximately $10 billion and the total increase in the second phase was approximately $8 billion.

It is significant to note that the fiscal year 1955 was the pivotal point in the recent budget record—it was the year of lowest Federal spending. It is also significant to note that fiscal year 1955 represented a budget that had been prepared by a Republican administration supported by a Republican Congress. In the 84th Congress the Democrat majority resumed its practice of piling expenditure on expenditure through the enactment of new and expanded Federal programs. In the 84th Congress the Democrats provided for nearly 200 new or increased programs largely imposing Federal-aid programs on the States. These Federal-aid programs in effect taxed the citizens of the States and then doled the money back to the States for programs that the States could better operate themselves if Federal taxes were reduced so that State taxes could be made adequate to finance the programs.

Mr. Speaker, no expenditure can be made by the executive branch of the Government unless it has been authorized by the Congress. The authorization may take the form of an appropriation, either current or permanent, or an authority to spend from debt receipts. Consequently the amount of expenditure in any year by the executive branch is determined by the action of Congress. There is, therefore, a responsibility on the Congress to act with deliberate restraint in the expansion of existing programs and in the beginning of new programs. We must recognize our responsibility to the needs of the whole Nation as distinct from the special interests of articulate organized minorities.

Mr. Speaker, it is estimated that the burden of Federal spending programs under the 1958 budget upon my State of New York will be approximately $11 billion. A comparable figure for California is $7 billion, for Texas $3 billion, and for Virginia $1 billion. The allocation of burden among the other States in our great Nation is equally as alarming. It is apparent that one of our most urgent national responsibilities is to spend less, not more. I would stress the fact, however, that in achieving these expenditure reductions the Congress must act with the greatest wisdom possible so as not to impair our national security and so as to continue those Federal programs that are essential and that can be performed most efficiently by the Federal Government.

Mr. Speaker, reduced Federal expenditures, reduced Federal taxation, and reduced Federal indebtedness are essential objectives that we must achieve if we are to realize the maximum development of our national potential under the American free enterprise system. The record that I have cited conclusively demonstrates that the greatest hope of attaining these objectives lies with the Republican Party and

the fiscal principles for which that party stands. It is well to remember the record of the past in evaluating the promises of tax reduction uttered by the Democrat spenders in Congress whose adherence to the Democrat program of tax and tax, spend and spend, has made the restoration of our Federal Government to a position of fiscal integrity such an arduous task.

The Area Redevelopment Bills Versus Foreign-Aid Programs

EXTENSION OF REMARKS
OF
HON. ELIZABETH KEE
OF WEST VIRGINIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 23, 1957

Mrs. KEE. Mr. Speaker, as I listened to the President of the United States deliver his talk to the American people this past Tuesday evening, May 21, I was forcefully reminded that there is presently pending in the Congress legislation the purpose of which is to establish an effective program of Federal aid to economically depressed areas within the United States where excessive and persistent unemployment, want and deprivation still exist.

Actually, three versions of this proposed legislation have been introduced in the House as exemplified by H. R. 1239 and 2527, H. R. 6215, and H. R. 1949, which I have been privileged to introduce. These bills might best be identified as representing respectively the conservative, the moderate and the liberal points of view with respect to a domestic rather than a foreign-aid program.

Briefly, all of these bills would—to a more or less generous extent—provide for loans and grants by the Federal Government to economically depressed areas of the country which have been officially designated "industrial and rural redevelopment areas." These Federal loans and grants would be used to assist such areas in the financing of industrial and commercial projects, the acquisition of land sites, the construction, rehabilitation and alteration of industrial plants and useful public facilities, the purchase of machinery or equipment, and the technical advice and planning needed to restore the economies of these depressed areas.

In addition the Federal Government would also be authorized to provide suitable training and retraining programs, and to make weekly subsistence payments to the unemployed workers in these areas during such training periods.

Mr. Speaker, let me assure you that this legislation is of the utmost importance to West Virginia—as it is to the States of Illinois, Pennsylvania, Kentucky, Massachusetts, Minnesota, and other regions of the United States where hardship, hunger, and dire poverty still linger in the shadows of the great overall national prosperity.

I have before me a report to which I would respectfully call the attention of our colleagues. It is the report "Federal Assistance to Labor Surplus Areas" which was prepared by the Legislative Reference Service of the Library of Congress at the request of the Chairman of the Committee on Banking and Currency of the House. Through it there runs, like the recurrent theme in a great symphony, the recorded story of West Virginia's economic woes and unemployment problems.

Tabulated and analyzed in the report are lists of West Virginia's numerous areas of substantial labor surpluses; her 17 counties—representing 25.7 percent of the State's total population—that are among 315 counties nationally, having the lowest farm income and levels of living; the lack of industrial diversification which causes unemployment; and the technological changes and increased productivity in the basic bituminous coal mining industry which has created depressed conditions in Kentucky and Illinois as well as West Virginia. One has only to turn the pages of this report to understand why the enactment of an area redevelopment bill is so essential to the present and future economic progress and prosperity of our State.

Mr. Speaker, President Eisenhower has also indicated his support of such legislation. But the bills he favors—the so-called administration bills—place a limitation of $50 million upon the amounts which can be spent for the purposes of such legislation, whereas the bills which Senator Douglas and I have introduced would provide revolving funds for loans and grants of up to $225 million in any 1 year.

For some time now, I have felt that it was high time we in West Virginia saw something more of the much-vaunted great prosperity of the Nation than a bunch of beautiful statistics. But I never felt more strongly on this subject than I did as I listened to the President address the Nation last week on the subject of his proposed spending for mutual security and foreign aid. Indeed, some of the things he said made me feel for a moment that he must be talking about Scranton and Wilkes-Barre, or Lowell, Mass., or possibly Ronceverte, Welch, and Williamson, W. Va., instead of a foreign land 3,000 miles away across a wide expanse of ocean.

The freedom of nations—

The President said—

can be menaced not only by guns—but by the poverty that communism can exploit. You cannot fight poverty with guns. You cannot satisfy hunger with deadly ammunition.

And a little later in his speech, talking of the burden of poverty borne by the people of the 19 nations which have won their political independence since World War II, he said:

In these lands no government can justly rule or even survive which does not * * * offer its people hope of progress * * *. We seek to help these people to help themselves. We cannot export progress and security to them. Essentially, they must achieve these for themselves. But there are practical ways by which we can help * * *. Because their inherited poverty leaves these people so little for savings * * * they need the help of some capital to begin essential investment in roads, dams, railroads, utilities * * * the sinews of economic strength.

Our program of technical cooperation * * * will cost $150 million next year—

He declared.

Mr. Speaker, I am prompted to agree with much that the President had to say in this second of his TV talks in defense of his huge spending proposals for the next fiscal year. Much as I desire to see substantial cuts in the budget and eagerly as I am willing to work for constructive economies in Government spending, yet I am forced to recognize that the mutual security and foreign aid programs are of tremendous importance to this Nation. But not more important than bread and milk for coal miners' children, good jobs for their fathers, new industries and increased business activity for economically depressed American towns and cities, and bigger markets, better roads and higher incomes for American farmers.

I am not willing to vote nearly $4 billion of our taxpayers' money to pay the bills of mutual security abroad and nothing to fight the poverty that communism can exploit—here at home.

Address by Hon. James B. Utt, of California, at the Dedication of St. Judes Hospital, Fullerton, Calif.

EXTENSION OF REMARKS
OF
HON. CRAIG HOSMER
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, May 23, 1957

Mr. HOSMER. Mr. Speaker, under leave to extend my remarks in the CONGRESSIONAL RECORD I include a dedication speech made by the Honorable JAMES B. UTT, of California, at the dedication of the St. Judes Hospital in the city of Fullerton, Calif.

I feel that it contains historical data of general interest and expresses the humanitarian spirit of our citizens for the welfare of their fellowmen.

The speech follows:

Mr. Chairman, His Eminence Cardinal McIntyre, Mother Superior, reverend fathers, Sisters of St. Joseph, ladies, and gentlemen, I am deeply and humbly grateful for the honor that you have bestowed upon the office which I represent and it is a pleasure for me to have a small part in this very happy occasion for the city of Fullerton and for all of Orange County. I offer my hearty congratulations to all of my friends here for their fine community spirit upon the erection of this hospital for the much needed community service which it will render.

The Sisters of St. Joseph of Orange are loved and admired throughout the State of California and have established an excellent reputation in Fullerton through the operation of their Santa Maria Convalescent Home and I know that the people of Fullerton are grateful that the Sisters have expanded their operations here to include this hospital of 127 beds and 32 bassinets. The dedicated Sisters of St. Joseph are carrying on the work and tradition begun by Father Serra over 180 years ago in this great State of ours. Under the direction and encouragement of Antonio Bucareli, the greatest viceroy which

Spain sent to the New World, Father Serra established the great chain of missions, from San Diego to San Francisco, to minister to the physical and spiritual needs of the native population. How many times Father Serra strode over this very highway between the Mission San Juan Capistrano and the mission at San Gabriel, none of us will ever know, but I do believe that he contemplated the very things that have transpired in this great State, including the hundreds of hospitals and churches, and to him should be given great credit for establishing the early Christian civilization of our State. That is why his statue is in the Hall of Fame in Washington. Perhaps he paused to rest on this very spot. I can see him sitting there, his eyes closed in contemplation, his face turned to Heaven, and saying, "Someday by the grace of God, there will be a house of mercy built upon this hilltop.'" Prophetic? Yes; but here it is.

It is fitting on this occasion, when the hospital is being formally dedicated in the name of St. Jude and thereby placed under his patronage, that we turn our thoughts to the life of this saint and recapture what little is known of his life through scripture and through tradition, and to thereby better understand the suitability of dedicating a hospital to him. I am not a theologian and, therefore, do not wish to be held in strict account for the impressions which I have gathered concerning him. Even the scholars differ somewhat in their interpretation of the scripture, but I shall choose to ignore controversy and uncertainty and to give you the impressions which I have gathered over the years.

Saint Jude is the author of the last and the shortest of the Epistles in the New Testament. He was 1 of the 12 Apostles and 1 of the 4 sons of Alphaeus. His family was a close relative of the Blessed Virgin Mary. His family name was Thaddeus and he was often referred to as Jude Thaddeus.

After the crucifixion and resurrection of Christ, Jude did not long remain in Jerusalem as did his brother, James, but, following the admonition of his Master, "Go ye into all the world and preach the gospel," he went into Mesopotamia and into Syria preaching the gospel, and proclaiming the acceptable year of the Lord, performing many miracles and converting many souls to Christianity among the gentiles. Tradition has it that he always wore the image of his Saviour upon his breast. One of his most noted miracles was the healing of the King of Edessa, to whom Christ had promised to send one of his Disciples. The story is told that the King, having heard of the healing powers of Jesus, sent for Him to come to Edessa and cure him of leprosy. Jesus could not go at that time but sent word that he would send one of his Disciples. The King then sent a young artist to paint a picture of Jesus.

In the presence of Christ and beholding the light of His countenance, he became so entranced and so dazzled he could not paint a single stroke. Upon seeing this, our Saviour took the canvas, and held it in front of his face. The image was transferred upon it. It is believed that Jude was then commissioned to go to Edessa, although he did not leave until some time after the Resurrection. From there he went into Persia and joined another Apostle, Simon the Canaanite, where they continued to preach and to convert.

Saint Jude never referred to himself as a relative, but rather as a servant of Jesus Christ. He preached amid untold sufferings and persecutions in countries which had sunk into the depths of immorality and idolatrous worship. Magicians and high priests of idolatry tried to destroy the effect of these two great Apostles, but were unsuccessful. Jude was always considered a symbol of hope in healing the most desperate cases, he never failed to respond to the call for help by the hopeless, the sick and the dying, and like most of the disciples, his life came to a violent end through martyrdom. Both Jude and Simon met martyrdom together and therefore share the same feast day of October 28, as brothers in martyrdom and the Kingdom of Heaven,, not as brothers in the flesh, although he did have a blood brother by the name of Simon.

Tradition has adopted St. Jude Thaddeus as a patron of hope in desperate cases and it is most fitting that this hospital should be dedicated to him, for nowhere is hope more essential than for those who enter as patients and for those who labor in the hospital as doctors and nurses. They need to know with deepest confidence that we are all in the hand of God. They need the inspiring and vitalizing awareness that there is no illness nor injury that God cannot cure, whether through miraculous and spiritual powers or through the working of his providence through physical beings. We must always remember that He who permits suffering also supplies the grace and strength to endure it.

In this massive structure of steel and stone, are the gifts of the rich and the gifts of the poor, all cemented together by the sacrifice of the Widow's Mite, but steel and stone and the most modern equipment do not in themselves fulfill the demands of this or any hospital. It must have the skilled talents of the surgeon and of the doctor, the tender ministrations of the nurses and the dedicated spiritual inspiration of the Sisters of St. Joseph, to complete the mission.

There are three distinct facets of such a hospital, yet all of them within the same solid sphere of human and spiritual service.

First, there are those who will enter this hospital, but will not return to their home and to their friends, but who will make final preparation for that long journey across the river which marks the boundary of that unknown land where they will go to dwell in the eternal mansions of Heaven. It is good that our Heavenly Father stretches forth his hand and gathers in His little children—that they may find a perfect peace and a perfect rest. While we who are left behind my grieve, we must remember that death is the beginning of a new and beautiful life and we may better understand what the Psalmist meant when he said, "Precious in the eyes of the Lord is the death of his Saints."

Second, there are those who will enter this hospital and through the surgeon's skill, the doctor's care and the dedicated ministrations of the nurses and of the Sisters, will be cured and will return to their homes and to their families, rejoicing.

There is a third facet which commands unbounded considerations of joy and hope, and that is the maternity ward. Here the noble and gallant mothers will enter into this hospital and give birth to the forthcoming generation. To witness this greatest miracle of God, creates within us a surge of faith and causes us to "lift up our eyes on high and behold who hath created these things," and to know that He hath made them a little lower than the angels and hath crowned them with glory and honor. What potential there will be in these 32 bassinets—or any 1 of them—perhaps another Einstein or another Lincoln—perhaps another Billy Graham or even a Bishop Sheen. Time only will tell. So, this hospital is dedicated to Saint Jude, the Patron Saint of Hope, and to those who will labor in this hospital, to those who will suffer and die here, to those who will suffer and be healed, but most of all to those babies who will be born in Saint Jude's Hospital, may I give the concluding message of Saint Jude as given in the Saint James version of his epistle. "Now unto Him who is able to keep you from falling and to present you faultless before the presence of His Glory with exceeding joy, to the only wise God, our Saviour, be glory and honor, dominion and power now and ever. Amen."

The Congressional Quarterly Is Neither Authoritative Nor Nonpartisan

---

EXTENSION OF REMARKS

OF

HON. THOMAS B. CURTIS

OF MISSOURI

IN THE HOUSE OF RERRESENTATIVES

Thursday, May 23, 1957

Mr. CURTIS of Missouri. Mr. Speaker, yesterday under special order the gentleman from New Jersey [Mr. THOMPSON] discussed the President's legislative program with particular reference to the party allegiance of the Members of the House who allegedly were or were not supporting this legislative program.

The sole authority for determining whether a Member of the House was or was not supporting the President was the Congressional Quarterly, a private publication presumably for profit published by Henrietta and Nelson Poynter, who are also publishers of the St. Petersburg, Florida Times.

The gentleman from New Jersey [Mr. THOMPSON] refers to this private publication as "nonpartisan." The publication refers to itself as "The Authoritative Reference on Congress". Neither, in my judgment, is correct.

EXTREME PARTISANSHIP

The documentation of extreme partisanship on the part of the Congressional Quarterly was made by Senator SCHOEPPEL (Kansas) last year and appears in the CONGRESSIONAL RECORD, volume 102, part 11, pages 15068–15072, under the title "Analysis by Congressional Quarterly of Congressional Support of President Eisenhower." This was a followup of some remarks Senator SCHOEPPEL made at the time he placed an article by Raymond Moley accusing the Congressional Quarterly of extreme partisanship. In the CONGRESSIONAL RECORD, volume 102, part 9, pages 12784–12785, in his remarks of July 27, 1956, Senator SCHOEPPEL very properly places a letter from Mr. Poynter which undertakes to refute the charge of partisanship made by Mr. Moley and the Senator in his July 16 remarks.

If Mr. Poynter has made any reply to the charges of partisanship appearing in the July 27, 1956 CONGRESSIONAL RECORD, I have been unable to find it. I would be happy to place any reply that may have been made or any reply that might now be made answering the charges of extreme partisanship in the CONGRESSIONAL RECORD.

The Congressional Quarterly for the week ending May 17, 1957, devotes several pages to "Individual Eisenhower Support and Opposition Scores Through May 12, 1957, and for the 84th Congress" of both House and Senate Members. The manner in which these alleged support and opposition scores are computed

show basic partisanship and are designed seemingly only for one purpose, to deceive whomever might read them.

26 ROLLCALL VOTES

Although there were only 26 rollcall votes in the House, 22 rollcall votes were used, apparently as a base for the scores. Yet the votes used were not set out in the article so that a reader could judge for himself whether the vote was on an issue that the President had clearly stated his position. The first vote of the House, of course, was for the Speaker. Presumably, this vote was used in the base and thus prevents Congressman McCORMACK, of Massachusetts, the Democratic majority leader, from receiving a 100-percent Eisenhower support instead of 95 percent.

The fact that 14 votes were on 1 appropriation bill and followed a basic pattern was unmentioned. Furthermore, it is obvious that President Eisenhower could not have specific views on budget cuts which in many of these 14 items were less than a million dollars. One item was for $30,000. Following such a point of view would rule out any person serving on the Appropriation Committee from ever performing his constitutional duty of reviewing the executive budget, if he was at the same time to support the Executive then in office. The same principle applies to the individual Members of the Congress.

Although the 14 budget-cut votes were obviously used in the base apparently the vote on the Democratic proposed resolution to ask the President to recommend to the Congress how to cut the budget was not included. There were three rollcall votes on this matter, on the rule, on recommital, and the passage of the bill itself. Majority Leader McCORMACK was a ringleader in this partisan anti-Eisenhower maneuver. Or perhaps the Congressional Quarterly did not use in the base rollcall No. 31 which was designed to permit Congressman PATMAN to investigate the national monetary policies. This was very definitely an anti-administration maneuver again led by the majority leader, Congressman McCORMACK. Or perhaps rollcall No. 60 was eliminated which called for the investigation of the various Federal boards, commissions, and so forth, by a House committee. This, too, was a definite antiadministration maneuver led by the Majority Leader McCORMACK. Yet Congressman McCORMACK, according to the Congressional Quarterly, has only one antiadministration vote.

There should be little question in any citizen's mind that the Democratic Senators and Congressmen as a group are not behind the Eisenhower administration. As loyal opponents—and this is as it should be—they criticize Secretary Dulles and our foreign policy. Hardly a day goes by on the floor of the House when some Democratic Member does not make some uncomplimentary remarks about Secretary of Defense Wilson. What the Democrats call the "hard money" policy lies at the base of their constant attack on the Treasury Department and the fight over tax reduction led by partisan Democrats is not in the too distant past and is certainly in the immediate future. The Justice Department under Attorney General Brownell is a constant target for the Democratic Congressmen. The Department of Agriculture and Secretary Benson certainly are unaware of any support they have received from the Democratic leadership in the Congress. The basic dispute in the handling of private and public power, the leasing of mineral rights and so forth, in the Department of Interior divides Democrats from the administration constantly. The handling of TVA by the administration and the control of atomic energy involve basic differences between Democrats and this administration. The list could be enlarged and at the appropriate time I will undertake to do that.

NOT AUTHORITATIVE

The purpose of these remarks has been to point out that the Congressional Quarterly is not nonpartisan; it is not authoritative. On the contrary it is highly partisan and it speaks out for a certain school of political thinking. I have no objection to it or any other magazine or newspaper taking the position it wishes to take, but I do object to the deception that is being used in taking that position.

I think it is time that the Congress did something about the Congressional Quarterly using the name "Congressional" and using the line "The Authoritative Reference on Congress" on its title page. This deceives the public and should not be permitted.

HOUSE OF REPRESENTATIVES

FRIDAY, MAY 24, 1957

The House met at 12 o'clock noon.

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. McCORMACK). The Chair lays before the House the following communication:

The Clerk read as follows:

MAY 24, 1957.

I hereby designate the Honorable JOHN W. McCORMACK to act as Speaker pro tempore on today.

SAM RAYBURN.

PRAYER

The Chaplain, Rev. Bernard Braskamp, D. D., offered the following prayer:

Most merciful and gracious God, as we again turn to Thee in prayer, wilt Thou fill our minds with the truth that emancipates and our hearts with the love that consecrates.

Grant that by Thy grace we may be the masters over our troubles and temptations, our doubts and discouragements, our fears and frustrations.

In thought, word, and deed may we seek to be worthy followers of Him who lived the victorious life and went about doing good.

May we be builders of a social order in which righteousness and justice shall rule and the spirit of love and brotherhood shall be triumphant over hatred and strife.

Show us how we may have a larger part in helping to mingle all the members of the human family into an alchemy of friendship and good will.

Hear us in Christ's name. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. McBride, one of its clerks, announced that the Senate had passed without amendment a bill of the House of the following title:

H. R. 2146. An act to amend the Small Reclamation Projects Act of 1956.

APPROPRIATIONS FOR EXECUTIVE OFFICE OF THE PRESIDENT AND SUNDRY GENERAL GOVERNMENT AGENCIES, 1958

Mr. ANDREWS. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H. R. 5788) making appropriations for the Executive Office of the President and sundry general Government agencies for the fiscal year ending June 30, 1958, and for other purposes, with Senate amendments thereto, and ask for their immediate consideration.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. ANDREWS. Mr. Speaker, I ask unanimous consent to consider en bloc the amendments of the Senate numbered 1, 2, 3, 4, 6, and 7.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The Clerk read the amendments as follows:

Page 3, line 2, strike out "$1,500,000" and insert "$1,375,000."

Page 4, line 18, strike out all after "$700,000" down to and including "act" in line 25.

Page 5, line 8, strike out "$2,100,000" and insert "$2,214,000."

Page 5, line 9, strike out "$150,000" and insert "$182,000."

Page 9, line 4, strike out "$15,000" and insert "$18,500."

Page 9, line 18, strike out "$20,000" and insert "$30,000."

Mr. ANDREWS. Mr. Speaker, I move that the House concur in the amendments of the Senate numbered 1, 2, 3, 4, 6, and 7.

Mr. FENTON. Mr. Speaker, will the gentleman yield?

Mr. ANDREWS. I yield to the gentleman from Pennsylvania.

Mr. FENTON. Will the gentleman be kind enough to explain his purpose to the House?

Mr. ANDREWS. Mr. Speaker, the motion which I have just made, and an-

other to follow, will dispose of the general Government matters appropriation bill for 1958. The House cut the estimates by $4,900,500 when it passed the bill on March 13. On Wednesday, the other body reduced the total of the bill by an additional $11,000 by changing two appropriation figures. The other body also made several adjustments in limiting amounts, struck out some House-approved language—a proper legislative bill has been substituted—and inserted language in two instances. It is my intention to move to disagree to the two language items inserted by the Senate, and to agree to the other changes. The detail involved in each amendment is:

Amendment No. 1: Reduces appropriation for "Special projects" by $125,000.

Amendment No. 2: Strikes out language providing five supergrade positions for the National Security Council. Separate legislation to accomplish this has been reported.

Amendment No. 3: Increase appropriation for the Office of Defense Mobilization by $114,000.

Amendment No. 4: Increases limitation for Interdepartmental Radio Advisory Committee by $32,000.

Amendments Nos. 6 and 7: Increase travel limitations for the Foreign Claims Settlement Commission and the Subversive Activities Control Board.

(Mr. FENTON and Mr. ANDREWS asked and were granted permission to revise and extend their remarks.)

The SPEAKER pro tempore (Mr. McCORMACK). The question is on the motion.

The motion was agreed to.

Mr. ANDREWS. Mr. Speaker, I ask unanimous consent to consider en bloc Senate amendments numbered 5 and 8.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the amendments.

The Clerk read as follows:

Senate Amendment No. 5: On page 6, line 14, insert "together with the unobligated balance on June 30, 1957, of the appropriation granted under this head for the fiscal year 1957."

Senate Amendment No. 8: On page 10, line 4, insert *"Provided,* That the cost of any special feature or equipment required for the use of the vehicle in carrying out investigative, law enforcement, or intelligence duties shall be in addition thereto."

Mr. ANDREWS. Mr. Speaker, I move that the House disagree to the amendments of the Senate numbered 5 and 8.

Mr. FENTON. Would the gentleman be kind enough to explain these two amendments?

Mr. ANDREWS. Amendment No. 5 makes available the unobligated balance for President's Emergency Fund—National Defense. The action of the other body would be in violation of the rules of this House, and furthermore, the amount of $1 million provided annually has proven more than ample over the past several years. I shall move to disagree on this item.

Amendment No. 8 provided that certain special equipment required on automobiles for police work be in addition to the dollar limit contained in section 201. The purpose of this amendment may well be desirable, but the House Committee should hear the need. In addition, the words used appear hastily drawn and do not provide a practical limit on the extent to which such special devices can be supplied to the various Government agencies. This is the other amendment on which I shall move to disagree.

Mr. FENTON. Will the gentleman yield?

Mr. ANDREWS. I yield to the gentleman from Pennsylvania.

Mr. FENTON. As the gentleman knows, we have discussed this matter in subcommittee and are in agreement with the actions which the gentleman proposes to take.

Mr. ANDREWS. I thank the gentleman.

The SPEAKER pro tempore. The question is on the motion.

The motion was agreed to.

Without objection, a motion to reconsider was laid on the table.

RELIEF OF CERTAIN ALIENS

Mr. WALTER. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the resolution (H. J. Res. 247) for the relief of certain aliens, with Senate amendments, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments as follows:

Page 1, lines 9 and 10, strike out "Pearl (Pik Chun) Ma."

Page 1, line 10, strike out "Ying Lun Ma."

Page 3, line 1, strike out "Roger Eugene Caillaud."

Page 3, line 3, strike out "Kerttu Poutiainen Mayblom."

Page 3, strike out lines 12 to 20, inclusive.

Page 3, strike out all after line 20 over to and including line 3 on page 4.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania [Mr. WALTER]?

Mr. MARTIN. Reserving the right to object, Mr. Speaker, I would like to inquire of the gentleman from Pennsylvania, as I understand, this has been approved by the ranking minority member of the gentleman's committee?

Mr. WALTER. Yes. Actually, what happened was this: The Senate struck from the resolution seven names and they did it because certain information was not available. We had the information but the Senate did not. So, pending such time as they received this information, the names had been stricken from the resolution, but we believe and we know there will be another resolution later.

Mr. MARTIN. I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania [Mr. WALTER]?

There was no objection.

The Senate amendments were agreed to.

Without objection, the motion to reconsider was laid on the table.

STATUS OF PERMANENT RESIDENCE TO CERTAIN ALIENS

Mr. WALTER. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the resolution (H. Con. Res. 89) with Senate amendments, and concur in the Senate amendments.

The Clerk read the title of the concurrent resolution.

The Clerk read the amendments as follows:

Page 6, strike out line 6.

Page 6, strike out line 7.

Page 27, strike out line 9.

Page 37, line 5, strike out "A-8881704" and insert "A-6881704."

Mr. MARTIN. Mr. Speaker, reserving the right to object, will the gentleman explain the amendment?

Mr. WALTER. This amendment deletes three names withdrawn by the Bureau of Immigration and Naturalization from the resolution they sent to us some time ago.

Mr. MARTIN. And this action has the approval of the ranking minority member of the committee?

Mr. WALTER. That is correct.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania

There was no objection.

The Senate amendments were concurred in.

A motion to reconsider was laid on the table.

THIRD SUPPLEMENTAL APPROPRIATION ACT, 1957

Mr. CANNON submitted a conference report and statement on the bill H. R. 7221, making supplemental appropriations for the fiscal year ending June 30, 1957, and for other purposes.

PROGRAM FOR NEXT WEEK

Mr. MARTIN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. MARTIN. Mr. Speaker, I take this time in order to ask what the program will be for next week.

Mr. BOGGS. Mr. Speaker, the program for next week is as follows:

If we conclude general debate on the Defense Department appropriation bill today, we will begin to read the bill for amendment on Monday. The reading of the bill will probably continue through Tuesday.

There will be no rollcalls on Tuesday because of a primary in Kentucky.

Upon conclusion of the Defense Department appropriation bill, we have scheduled the following bills:

H. R. 6974, extend Agricultural Trade Development and Assistance Act.

S. 469, termination Federal supervision, Klamath Indians.

H. R. 3753, agriculture, loans homesteaders, and desertland entrymen.

Thursday is Memorial Day. There will be no business on that day. The House will meet and adjourn over to Monday.

Friday there will be no session.

ADJOURNMENT OVER

Mr. BOGGS. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet on Monday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

WILLIAM S. GIRARD

Mr. LONG. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks and include related matter.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. LONG. Mr. Speaker, a very serious matter stands before the people of the United States at this very moment, one which demands the positive action of every citizen. I refer to the case of Specialist 3/c William S. Girard, of Ottawa, Ill., who may be released for trial to Japanese authorities by Adm. Miles S. Hubbard. This young man, while performing his assigned duties, fired a mortar shell that killed a Japanese woman in Japan on January 30 while she was on the Camp Weir military firing range without authorization. The incident, while extremely regrettable, was purely an accident and it should be borne in mind that the victim was trespassing in an area clearly marked as dangerous by virtue of the fact that it was an established firing range.

I cannot, for the life of me, understand why the authorities who have jurisdiction over this matter should permit this sort of thing to happen. Here is a young man in the service of our country, while in the performance of his official duties, purely by accident was involved in a mishap wherein the victim was entirely at fault and a trespasser in a restricted area. It rankles my soul to think that an American citizen should be turned over to stand trial in a foreign court according to the rules and precedence of a foreign land, a land which opposed our own United States in mortal combat only a few short years ago.

It should be kept in mind that customs and traditions vary in every nation and likewise do laws and the various types of punishment which may be imposed for the violation of such laws. Our system of justice in the United States and in the military are based on our way of thinking, and if our system was not a good one, it would not be in use today. We should not permit citizens of our country to be subjected to the court procedures of a foreign nation wherein the entire viewpoint could be completely different from our own.

I think it is high time that we, here in the Congress, wake up and take corrective measures. We draft our young men and send them to the four corners of the world to serve our country in foreign lands. Surely we should send with them the protection of this great Government of ours.

Mr. Speaker, I have received the following telegram which I should like to include:

ALEXANDRIA, LA., *May 24, 1957.*

Congressman GEORGE S. LONG,
Washington, D. C.:

The Alexandria Chapter Reserve Officers Association requests you use your influence to keep S/3C William S. Girard from being tried by a Japanese civilian court. We further request that you use your influence to keep any member of our military forces from being tried by a foreign civil court.

Capt. EARL F. HENDRICKS,
Retired Executive Secretary, The Alexandria Chapter Reserve Officers Association.

AMERICAN COUNCIL TO IMPROVE OUR NEIGHBORHOODS

Mr. REUSS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. REUSS. Mr. Speaker, I wish to bring to the attention of the House the fact that the American Council To Improve Our Neighborhoods, the nonprofit public-service organization, commonly known as ACTION, is having a special Congressional showing of its moving-picture presentation entitled "Our Living Future," at 8 o'clock Monday evening, June 3, at the Statler Hotel in this city.

Our Living Future will be here to climax its 8-month tour of 100 cities of our Nation. It is a progress report to us on the urban problems caused by overcrowding and blight and the reaction of officials and the public to these problems. It shows the many efforts being made to improve homes, neighborhoods, and communities and to eliminate and prevent slum conditions in a great number of cities, small as well as large.

The directors of ACTION will be delighted if you are able to attend this show. I believe that you will find it interesting and instructive.

The evening after the presentation for the Members of the Congress, there will be a public showing at the Lisner Auditorium of the George Washington University. This second showing is under the auspices of the Commissioners of the District of Columbia, the Commissioners' Urban Renewal Council, and its affiliated organizations.

ACTION's directors include these distinguished members from the Washington area: Mr. William G. Carr, executive secretary, National Education Association; Mrs. T. S. Chapman, former president, General Federation of Women's Clubs; Dr. Dorothy Ferebee, medical director, Howard University; Mr. George Garret, president, Federal City Council; Mr. Philip Graham, president and publisher, the Washington Post Co.

EXTENDING FINANCIAL ASSISTANCE TO DESERT LAND ENTRYMEN

Mr. MARSHALL. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. MARSHALL. Mr. Speaker, the Committee on Rules yesterday granted a rule providing for 1 hour of debate on H. R. 3753, a bill to enable the Secretary of Agriculture to extend financial assistance to desert-land entrymen to the same extent as such assistance is available to homestead entrymen.

It is my purpose, Mr. Speaker, to inform the House that while I remain opposed to the bill, I am not opposed to the rule permitting debate of this bill by the House. My opposition to the bill stems from what I believe to be an erroneous statement in the report. The report says:

> This bill would not require any additional appropriation at this time. Available direct and insured loan funds would be adequate to permit loans to be made under the amendment, and the administrative expense funds would absorb the cost of making, insuring, and servicing such loans.

It may be true that additional administrative money will not be required, but I want to point out to Members of the House that we are presently acting upon the third supplemental appropriation bill, which includes loan funds for the Farmers Home Administration. These loan funds are required for existing applications. No new funds to carry out the proposals made in H. R. 3753 are provided in either the third supplemental or in the regular appropriation bill for the Department of Agriculture recently passed by the House.

While our subcommittee heard considerable testimony from the Farmers Home Administration in justifying their request for funds, this new proposal was not considered by us.

In reading the report, I find no indication of the amount of money required for such loans and any limitation would have to be established by the Committee on Appropriations in making the funds available. Before passing a bill of this kind, it would seem that Members of the House ought to be given more information about the amount of money which may be required.

As I said before, there may be a certain amount of satisfaction in the old dream of making the desert bloom, but the House ought to consider if this is the time for such an undertaking. We do have an accumulation of agricultural surpluses. The Department of Agriculture blames these supplies for depressing the market. Is it then advisable for this same Department to make loans to increase production in desert areas? Members of the House deserve an opportunity to debate and decide so important a question. I take this opportunity to acquaint Members with some of the questions involved in this bill which will soon come before the House.

PROSTHETIC APPLIANCES

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I have just witnessed a most remarkable demonstration of prosthetic appliances for veterans, civilians, and little children. I would like to express my deep appreciation to the House for passing some years ago a bill that authorized yearly $1 million in research on prosthetic appliances. It was because of Col. Robert F. Alton and the Walter Reed amputees that the bill was introduced. It is another thing that we must be grateful to the veterans for. Since that time, under General Strong's chairmanship, with money expended through the VA, marvelous cures have been accomplished working with the veterans and with the civilians. The House passed that bill unanimously some years ago, and every year they have continued the appropriation. I do not believe you ever appropriated $1 million more wisely or one that would thrill your hearts more if you could have seen that demonstration.

The exhibition was held before the Committee on Labor and Public Welfare. Senator LISTER HILL, of Alabama, the chairman of that committee, presided. He has been tireless in both veterans and civilian rehabilitation.

LIST OF PARTICIPANTS IN DEMONSTRATION BEFORE THE COMMITTEE ON LABOR AND PUBLIC WELFARE, UNITED STATES SENATE, MAY 24, 1957

Gen. F. S. Strong, Jr., chairman, Prosthetics Research Board, National Academy of Sciences—National Research Council.

UPPER-EXTREMITY PROSTHETICS

Dr. Charles O. Bechtol, associate professor of orthopedic surgery, Yale University.

First Lt. Sheila McDonnell, AMSC, physical therapist, Walter Reed Army Hospital.

Mr. William E. Hitchcock, prosthetics instructor, Postgraduate Medical School, New York University.

Amputee demonstrators

Mr. Daniel J. Dennehy, Mt. Rainier, Md. (above-elbow amputee).

Pfc. Jack R. Northrup, Washington, D. C. (shoulder-disarticulation amputee).

Mr. Lewis A. Rice, Frederick, Md. (elbow-disarticulation amputee).

Sgt. Alonzo Spencer, Appomattox, Va. (below-elbow amputee).

LOWER-EXTREMITY PROSTHETICS

Dr. Cameron B. Hall, clinical professor, Department of Surgery (Orthopedics), School of Medicine, University of California at Los Angeles.

Miss Irene Waters, physical therapist, Institute of Physical Medicine and Rehabilitation, New York University.

Mr. Charles Hennessy, prosthetics instructor, School of Medicine, University of California at Los Angeles.

Amputee demonstrators

Miss Mary Heasty, Fairfax, Va., (hip-disarticulation amputee).

Mr. Herbert Kramer, Little Neck, N. Y. (above-knee amputee).

Mr. Leonard McCarthy, Trenton, N. J. (below-knee amputee).

CHILD-AMPUTEE PROSTHETICS

Dr. George T. Aitken, consulting orthopedist, Michigan Crippled Children Commission.

1st Lt. Sheila McDonnell, AMSC, physical therapist.

Amputee demonstrators

Diana Beckett, Beltsville, Md. (below-elbow amputee).

Donna DeYoung, Grand Haven, Mich. (bilateral knee-disarticulation amputee).

David J. Dodge, District Heights, Md. (below-elbow amputee).

Eugene Sanchez-Saavedra, New York, N. Y. (elbow-disarticulation amputee).

VOCATIONAL REHABILITATION AND PROSTHETICS

Mr. James J. Segars, supervisor, physical restoration, State Department of Education, Atlanta, Ga.

Dr. Harriet E. Gillette, director of physical medicine and rehabilitation clinic, Atlanta, Ga.

CALL OF THE HOUSE

Mr. SCRIVNER. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

Mr. BOYLE. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 84]

Addonizio	Feighan	Nicholson
Albert	Fino	O'Brien, N. Y.
Allen, Ill.	Fogarty	Passman
Andresen, August H.	Garmatz	Patterson
	Gordon	Perkins
Anfuso	Green, Oreg.	Philbin
Ashley	Green, Pa.	Pilcher
Barrett	Griffin	Pillion
Bass, N. H.	Gubser	Polk
Baumhart	Gwinn	Powell
Beamer	Healey	Preston
Belcher	Hemphill	Prouty
Betts	Hillings	Rains
Blatnik	Hoeven	Reece, Tenn.
Blitch	Holland	Robsion, Ky.
Bonner	Holtzman	Rodino
Bosch	James	Sadlak
Bowler	Jenkins	St. George
Bray	Kearney	Saund
Buckley	Kelley, Pa.	Saylor
Byrne, Pa.	Kelly, N. Y.	Scherer
Carnahan	Kirwan	Schwengel
Celler	Kitchin	Scott, Pa.
Chelf	Kluczynski	Sikes
Chiperfield	Knutson	Siler
Chudoff	Lennon	Simpson, Pa.
Clark	Lesinski	Steed
Coad	McCulloch	Sullivan
Cooley	McGovern	Taylor
Coudert	McIntire	Teller
Davis, Tenn.	May	Thomson, Wyo.
Dennison	Miller, Md.	Thornberry
Dollinger	Miller, Nebr.	Tollefson
Dowdy	Moore	Vursell
Eberharter	Morano	Watts
Edmondson	Morgan	Whitener
Elliott	Morrison	Wilson, Ind.
Fallon	Multer	Wolverton
Farbstein	Murray	Zelenko

The SPEAKER pro tempore (Mr. MCCORMACK). On this rollcall 313 Members have answered to their names. A quorum is present.

By unanimous consent, further proceedings under the call were dispensed with.

CONGRESSIONAL QUARTERLY

Mr. LAIRD. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. LAIRD. Mr. Speaker, in today's mail I received a letter from Mr. Thomas N. Schroth, executive editor of the Congressional Quarterly. This letter calls my attention to the fact that in my remarks on page 7461 of the CONGRESSIONAL RECORD of May 22, 1957, I indicated that the vote used by the Congressional Quarterly with reference to support or opposition to the President's position on Federal aid to school construction was the vote on final passage. Mr. Schroth calls to my attention the fact that the vote used by the Congressional Quarterly with reference to support or opposition to the President's position on school-construction legislation was the vote on the so-called Powell amendment.

On May 22, 1957, I did not have the Congressional Quarterly before me, and on checking the Congressional Quarterly today I find that the rollcall used was on the so-called Powell amendment, and at this point in the RECORD I would like to insert my letter of August 2, 1956, addressed to Mr. Schroth.

The letter follows:

MARSHFIELD, WIS., *August 2, 1956.*

Mr. THOMAS N. SCHROTH,
Executive Editor,
Congressional Quarterly,
Washington, D. C.

DEAR MR. SCHROTH: I was indeed surprised to read a copy of your letter of July 13 addressed to Mr. John Denson, editorial director of the Newsweek magazine.

In your letter you stated that President Eisenhower was opposed to the Powell anti-segregation rider to the school-aid bill. It is true that President Eisenhower did not favor the original Powell amendment. However, you will find upon checking into this matter further that President Eisenhower did support the Powell amendment as finally passed and voted on by the House of Representatives. There was a great deal of difference between the original Powell amendment and the amendment which was finally voted on by the House of Representatives. The final Powell amendment was, as you know, merely a one-sentence statement of support for the United States Supreme Court decision on school segregation. The Republican leadership in the House was advised before this vote was cast not only of the President's position, but also of his position relative to the establishment of a "need test" in the distribution of any Federal school-construction aid to the 48 States. The statement which you made undoubtedly does apply to the original Powell amendment, but you are completely in error as to the President's position regarding the final Powell amendment, which was adopted on a rollcall vote and supported by the entire Republican leadership.

With best wishes and kindest personal regards, I am,

Sincerely yours,

MELVIN R. LAIRD,
Member of Congress.

Mr. Speaker, I certainly believe that, regardless of whether the rollcall on final passage or the rollcall on the Powell amendment was used, the point which I made in my statement of May 22, 1957, still stands. The use of either of these rollcalls deliberately misrepresents the position of a majority of the members of my party as regards their support of President Eisenhower's legislative program.

CHIEF JUDGES OF CIRCUIT AND DISTRICT COURTS

Mr. CRAMER. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. CRAMER. Mr. Speaker, I ask inclusion in the RECORD of my position on H. R. 985, a bill to provide that chief judges of circuits and district courts shall cease to serve as such upon reaching the age of 70, pursuant to H. R. 255. I was not present at the time of a vote on the motion to recommit having to leave the House and travel to Portland, Maine, where I was asked, as a member of the House Committee on Public Works, to address the State meeting of the Maine Good Roads Association. If I were present I would have voted "Nay" on the motion. I wish to indicate my support of this legislation.

DEPARTMENT OF DEFENSE APPROPRIATION BILL, 1958

Mr. MAHON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 7665) making appropriations for the Department of Defense for the fiscal year ending June 30, 1958, and for other purposes.

Pending that motion I would like to make an arrangement with the gentleman from Massachusetts with regard to time for debate. I suggest that general debate continue throughout this afternoon, the time to be equally divided between the gentleman from Massachusetts [Mr. WIGGLESWORTH] and myself, and later in the day reach an understanding as to the time for ending general debate.

Mr. WIGGLESWORTH. That is agreeable to me, Mr. Speaker. I do not believe it will be possible to finish general debate today, but I think we can arrive at an agreement later in the day when we see how things are moving.

Mr. MAHON. I might say for the benefit of the Members that after we get into this bill and move rapidly on Monday we may even be able to have a vote on Monday. That, of course, would depend on the mood of the House.

The SPEAKER pro tempore. Will the gentleman from Texas inform the Chair if there is any additional request beyond his motion to go into the Committee of the Whole?

Mr. MAHON. There is no additional motion or request at this time except that general debate continue throughout the day. We will see if we can make a further arrangement later in the day.

Mr. WIGGLESWORTH. The time to be equally divided.

Mr. MAHON. Yes, the time to be equally divided between the gentleman from Massachusetts and the gentleman from Texas.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 7665) with Mr. KEOGH in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the consent agreement debate will continue throughout the day, the time to be equally divided between the gentleman from Massachusetts [Mr. WIGGLESWORTH] and the gentleman from Texas [Mr. MAHON].

The gentleman from Texas is recognized.

DEFENSE APPROPRIATION BILL

Mr. MAHON. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, a very brilliant May day sun beams down upon the Capitol today and I hope it is a good omen and that in this debate on the Defense Department appropriation bill we may throw some light on the most tremendous appropriation bill of this session, probably the most important bill of the year. It is the $33½ billion defense bill for the operation of the Army, Navy, Air Force, and the Marines for the fiscal year beginning July 1, 1957. There are no funds provided herein for military public works.

Mr. Chairman, I took my pencil a couple of days ago after having listened to a statement which I thought could hardly be believed and I discovered that since the birth of Christ there had only been about a billion minutes. Today we are talking about a $36 billion budget. There is no one in the Congress or in the administration, no one person, who could possibly comprehend every program and every detail of such a gigantic undertaking of our Government.

Again we have the defense appropriations bill before us. Again we talk of war and peace, debate the adequacy of the budget, seek to evaluate the threat to American security, and argue about the comparative strength of the United States of America and the U. S. S. R.

We agree again that the best hope for the world lies in good will and better understanding among the nations, but we hastily add, and properly so, that we must keep up our guard lest we invite aggression. We say again that any defense program is relatively cheap if we can continue to deter a major war, avert economic collapse within our country, and move toward an era of peace and good will.

INTERNATIONAL SITUATION

It would be of little benefit for me to discuss the international situation. All the Members of this body have their own views and no one can be absolutely certain about the future or the accuracy of his own views or the views of others. Personally, I am not aware of any drastic change since we considered the Defense appropriations bill last year except that, as a result of advances in weapons, in the event of war all countries would be placed in a much more hazardous position.

WEAPONS OF WAR

As to weapons of war in being or in prospect, I would now like to make a general observation. No nation can get a corner on the weapons of war. The vulnerability of all mankind to destruction in war continues to increase with every passing month. No nation can or will for long have a corner on any important weapon though some may temporarily have more effective types and more of them. Among the cavemen there was no corner on rocks and clubs. No nation made effective for long a corner on gunpowder. We had hoped to be the only nation possessing the atomic bomb for a much longer period of time. But this hope was impossible of fulfillment and this awesome weapon of destruction is still in its infancy from the standpoint of development and ultimate possession among nations.

We are now in a nip-and-tuck contest with the U. S. S. R. for the development of ballistic missiles, the so-called ultimate weapon, which will race toward the target with an atomic warhead at speeds up to 15,000 miles per hour and with intercontinental range. Great progress is being made in this area. We are testing the intermediate range ballistic missiles and will soon have the intercontinental ballistic missile under active test. Operational intercontinental ballistic missiles will be in the arsenal of the United States of America within a few years, and there is no reason to conclude that the U. S. S. R. will be far behind.

Even though all research and development on new weapons should be stopped abruptly at this moment, the world know-how in mass destruction of people and property is already so great there can be no real hope for civilization as we know it unless all-out war between the east and the west can be averted. The President was frightfully accurate when he said there is no alternative to peace.

IF WAR COMES—ATOMIC

The testimony as to the probable nature of the next war contained in the first part of volume 1 of the hearings is most interesting. It is clear to me that if war comes, either big or little, a war of any real significance, atomic weapons will be used.

I caution against the claim—the wishful thinking—that inasmuch as we were prepared for gas warfare in World War II, and gas was not used, it follows that if world war III comes, atomic weapons will not be used. Such a comparison completely misses the mark.

There is every likelihood that in the next war of any significant magnitude, if it comes, atomic weapons will be used and will be decisive. To accept any other conclusion is dangerous. In my judgment, one of the major deterrents to war between the east and west is the firm conviction by the leadership of both sides that such a war would be atomic in character and bring about unspeakable destruction on both sides, making even victory by either side a wholly unacceptable goal.

I repeat again what President Eisenhower said, "There is no alternative to peace." That significant sentence needs to be emphasized until the whole world accepts it. Then our peace efforts will succeed.

RIVALRY AMONG SERVICES

Some rivalry among the services may be in the public interest but the present tensions and rivalries among the services

are unwholesome and dangerous. Dangerous for the reason that rivalry which greatly promotes excessive duplication causes defense costs to become so great that the economy of the Nation may be jeopardized. The American taxpayer is pretty tolerant but there is a point beyond which he very probably will not go in peacetime. Defense costs are necessarily going to be high, and if those costs include excessive waste of money and manpower, the defense program may grow more inadequate from year to year. We cannot get a dollar in value for a dollar spent with rivalry running riot.

The new weapons we are now perfecting and the weapons that are likely to be developed over the next decade will be fabulously expensive.

The country cannot afford to provide these new weapons and also support an outmoded military structure which promotes unwholesome interservice rivalry and duplication.

The basis for the tensions among the services is real and understandable. The tensions could readily be eased if defense weapons were static in nature. But we are going through a revolution in weapons and in concepts of warfare. The guided missile, particularly the ballistic missile, is creating a drastic change in thinking and in plans. Missiles were of minor importance in the military budget of a few years ago. In the current budget nearly 3 billion—a billion more than it cost to develop the atomic bomb and use it—is provided for the missile program. We will always have manned aircraft, particularly for transport, but missiles will supplant manned aircraft to a very great degree within a few years, and to a marked degree in 10 years, and military planners in the Pentagon are already working on programs for the 1960's.

Able and ambitious officers have devoted their careers to 1 of the 3 services. Will they have a place in the sun in the 1960's or will their careers go into decline? The present presumption is that any service which fails to have a part in the utilization of intermediate range and intercontinental ballistic missiles will be relegated to a lesser role. I may be oversimplifying the picture but it should be clear to all that the stakes are high and that the desperate struggle for power and position among the services is quite understandable, and real, and quite expensive and wasteful, I may add.

The vested interests of military personnel as reflected in our present departmental and military organization concepts must be set aside in the broader interests of all. But we must make it possible for our men in uniform to set aside their vested interests and be somewhat secure in their careers.

A part of the answer is a greater degree of unification instead of tension and disunity, something approaching a merger. People who do not think these tensions exist have not looked for months as some of us have into the faces of our military leaders who have earnestly pleaded for appropriations and discussed problems of defense.

It has been argued that the means of locomotion and movement is no longer a valid basis for a military force. They were valid in the old days, but they are no longer valid as a basis for military organization and command. I leave that problem to others, but it is worthy of exploration, particularly in the executive branch of the Government and in the Congress.

Speaking broadly and with some degree of oversimplification, let me say this: It would appear that under present circumstances each of the three services is seeking to be prepared to do the entire job—fight the whole war. This, of course, is not the announced policy of each service, and I am speaking loosely in order to make my point clear. The Army wants a strategic-type missile so it can attack distant targets and will not be dependent on the Air Force even for reconnaissance. The Navy wants a strong air and missile capability to take care of its own strategic needs and concepts. The Air Force may well want to keep its strategic aircraft mission even after missiles have replaced the strategic mission of manned aircraft. The real battle at present results, of course, from the anxiety which arises over the question of who will dominate the picture in the missile-atomic age. All of these individuals are looking to the future, and for this they should not be condemned. The country must have military officers possessing vision and courage. However, it is imperative that some logic and order be injected into this extremely unhealthy situation. The time has come to tear down the costly iron curtain which separates the services.

President Eisenhower, for whom I have the profoundest respect, is the one man in our Nation who, by reason of position, prestige, experience, and ability, can step into this picture and bring order and effectiveness and a saving of tax dollars out of a situation which promises something approaching colossal waste and havoc generally.

NEED FOR STABLE PROGRAM

I should like to approach this problem from a little different slant and commend it for your consideration. The great problems of the world which seem to bar a settlement between the United States of America and the U. S. S. R. continue to exist, and we must continue big and expensive armament programs. This sort of thing can go on for years, and it no doubt will. In 10 years at $35 billion a year for the Armed Forces we would spend $350 billion, approximately the cost of World War II.

It would seem that since we are in a long-range defense program we ought to fix a figure for defense spending which is within the bounds of reason and stay with it in a general way pending a decisive change in world conditions. As long as there is no fixed policy, and admittedly a ceiling should not be completely arbitrary, each of the three services is striving manfully, and that is an understatement, to edge upward defense spending each year. Each service wants far more than it gets each year. Real economy of money and manpower is too painful to the military services. The American people have found the high cost of living troublesome, and we find economy in our personal budgets a bit painful. The Defense Department finds economy too painful to bear. The military prefer what is from their standpoint the easier remedy, which is the increasing total expenditures and appropriations from year to year. To compress more defense into the same number of dollars or into fewer dollars would cramp the style of the military in the doing of things as they are accustomed to do them. They want no part of it.

This policy would be painful to the military; the up-up policy of more and more spending is painful to the taxpayers. Who, therefore, will be served, the will of the Pentagon or the will of the people? A clearer military fiscal policy setting as a target say $35 billion per year would probably tend to change the direction of military thinking. The present emphasis is on how to get more and more money out of the Congress and the taxpayers. The alternative emphasis would be how to get more and more defense out of the dollars provided. That is the only course that will save us from bankruptcy through present trends.

During calendar year 1953, President Eisenhower's first year, he did not submit a formal budget. He submitted his first budget in January 1954 for the fiscal year beginning July 1, 1954. This budget, the first real Eisenhower budget, totaled something over $29 billion, excluding military public works. There were some extenuating circumstances from carryover funds, but that was the first 100-percent Eisenhower budget for the Defense Department, $29 billion plus. But now, 4 years thereafter, the budget is $38 billion. I am dealing in some oversimplification of the problem, perhaps, but I want to make the point crystal clear, that at this rate funds for the Army, Navy, and Air Force will before too long exceed $40 billion and edge on upward to $50 billion. And that does not include foreign military aid, atomic energy, and other related programs. If we do not take steps to save ourselves, nobody else is going to do the job for us. The stakes are high, and the battlelines are drawn. The taxpayer's head is on the block, and the taxpayer's security is also at stake. Vast savings could be made. And do not tell me that we could not have a reasonable and adequate defense program for approximately $35 billion a year rather than $38 billion a year, as presently budgeted. That figure edging upward, as I have pointed out, must be studied carefully. Somebody must call a halt and rethink this problem and do something about it. So we have called a halt in a very modest and delicate way. Under the Constitution, it is our authority to raise and equip defense forces.

REDUCTIONS OF BUDGET

When the committee began consideration of this bill in January, I did not think that we could cut $2½ billion from this budget because I think military budgets are getting better in many ways. They are better prepared and better presented. In dealing with budgets of this type there is no room for partisanship. In matters of security, we are all

in the same boat. One cannot be a Democrat or a Republican. One must be an American. There is no alternative. In my judgment, no political benefits are to be gained in raising or reducing defense budgets. Cutting the defense budget could be an extremely dangerous business. We have proceeded with the greatest care and caution. Nothing can be permitted to transcend the interest and the welfare of the people of our country. This morning, as I thought of this problem, I wrote a line which I hope may be helpful. We tried to make the cuts in this bill so that if war should break out next month or next year or the year after, there would be no additional hazard to our country. I think that is a worthy objective.

There is one thing we must avoid at all costs. We cannot afford to embark upon a course of gradually whittling away at our defense program. We cannot start a trend toward a position of military weakness which would inevitably lead toward a national policy of appeasement, which we know is the road to war. I repeat, what we said in the committee report. We must become adjusted to an indefinite period of high level defense costs without costly peaks and valleys. That is the policy which the committee and the Congress and the executive branch have followed since the Korean war—a high level and stable defense program. It is utter folly, however, to conclude that the Congress in exercising its duties under the letter of the United States Constitution cannot properly adjust and revise upward or adjust and revise downward within safe limits the defense budget.

For a period of 4 months now, experienced men, members of the committee and members of the staff, have studied in detail the various budget programs and amounts of funds estimated as necessary to implement those programs—and bear in mind that the budget is nothing more than an estimate, the preparation of which begins more than 18 months before the end of the fiscal year for which appropriations are made.

We found, for example, that $516 million could be subtracted from the Army budget for procurement and production purposes. The Army would not concede this but later the President substantially agreed with the Committee on Appropriations on April 18 when he made the following statement:

> The House may wish to give attention to an additional item of $516 million requested for Army procurement and production. The existing authority, granted by the Congress during the Korean war, plus certain reimbursements received since then have made it unnecessary to request new spending authority for this purpose in recent years. Beginning in fiscal year 1959, the Army's need for such spending authority will recur. The $516 million item is requested now to enable the Army to phase efficiently into this new period to ease the impact of the adjustment in fiscal year 1959. At the expense of efficient programing, the sum can be withheld if the House so chooses. Such action would, of course, increase by $516 million the large amount that will have to be authorized for Army procurement and production in fiscal year 1959.

The executive branch has made some concessions, but bear in mind that none of them were made prior to the time we began our examination of the budget and discovered certain weaknesses.

While the budget did recommend certain transfers of surplus cash resulting from stock and industrial fund operations, such recommended transfers would have had no effect on reducing the overall obligational and expenditure authority for the Department of Defense in 1958. A thorough review of stock and industrial fund operations in the Army and Navy convinced the committee that these excess funds could more appropriately be transferred to the pay of personnel of the Army and Navy which are 1-year appropriations.

Some have argued that of the approximately $2½ billion reduction, that $1.2 billion may be considered as bookkeeping adjustments and that this reduction would not reduce expenditures in 1958 by 1 cent. Those who make that claim must agree that the $1.2 billion represents a bona fide reduction in the budget for 1958 and of funds previously provided. The funds transferred from the stock fund account of previous years could have been expended for the expansion of stock fund inventories. They were available for that purpose and could have been so used without prior approval of Congress. The transfer of these funds to regular activities of the Department thereby reducing the total availability to the Department must, it seems to me, be regarded as good business practice which should produce some savings.

As to the reduction of $516 million in the Army for procurement and production, I am not convinced that it will have any adverse effect on an orderly procurement program for the Army. Although funds cannot be obligated until they are appropriated, the procurement programs always have been developed by each of the services months, and even years, prior to the time that appropriations are made. I feel that when excess authority continues to remain on the books of the services, the less chance there is for efficient and orderly procurement and close review of requirements by the services and by Congress.

An editorial writer in the Evening Star yesterday afternoon said that we should restore the $1,200,000,000 cut. He said all the rest of the cuts were paper cuts. He said we ought to restore the $1,200,000,000 because we had been warned that any cut could mean ultimate disaster. I say that if we ever have a military dictatorship in the United States it will be because the people elect to the Congress men of so little courage and devotion to duty, that they jump through the hoop every time reckless statements are made calculated to embarrass the Congress in the eyes of the people.

So this editorial writer, in discussing the budget, condemns the inclusion of an item which he says is a million dollars wasted. Let us grant that there is some merit in his argument as to the $1 million he wishes to save, but he does not raise one finger to question the need of the $1 billion he blindly wishes to spend. I refer him to that portion of some very authoritative writing wherein it is said that the scribes and Pharisees had a tendency to strain at a gnat and swallow a camel. I am afraid the editorial writer simply had not had the opportunity to study the defense budget.

DEFENSE BUDGETS

How do you find out about defense budgets? At 10 o'clock in the morning you go into the committee room and you pore over these stacks of volumes and programs, past and proposed, and you talk to the witnesses, big and small, civilian and military, and at noontime you suspend for a time. Later in the afternoon you go back into this closed room and sit there until 4 or 5 o'clock. You do this the next day and the next day and the next week and the next month and you do this for about 4 months each year. I know the editorial writer would not mean to indicate that there is not enough intelligence in Congress to study the defense budget and find out where you could cut just a few dollars in the interest of the Nation.

I do not blame Secretary Wilson and the President for defending the budget. They more or less have to defend the budget. If they keep on giving here and giving there, confidence is lost. So the Defense Department put its foot down and said, "This is it." That is all right and I do not quarrel with that attitude as a practical proposition. Now there is no man in a Cabinet position who has sat and studied this budget continuously as long as the gentleman from Massachusetts [Mr. WIGGLESWORTH], and others who have sat on this committee. Cabinet officers do not have the time or the opportunity. The job does not lend itself to that. They are out doing other things. They are busy in the operation of the program. There is no place for the expression of an attitude in an editorial or otherwise which would point scornfully at the Congress, and say intolerantly, "Mr. Congress we have no patience with you. Give what you are asked to give without regard to your views." I say to those people that they miss the mark in their appraisal of what our democracy really is. In making that statement I make no reference to the President or the members of the Cabinet, or Government officials because they have been tolerant in their views with respect to this problem.

Mr. SCRIVNER. Mr. Chairman, will the gentleman yield?

Mr. MAHON. I yield.

Mr. SCRIVNER. I do not know whether the gentleman said exactly what he meant to say or not. In all the years I have been a member of this committee I have not felt the resentment that you have expressed for the lack of respect for Members of Congress. Every witness is a champion for his cause, but I do not recall that any member of the Cabinet or any of the witnesses who appeared before us ever did show any sign of contempt for the members of this committee or Congress as a whole.

Mr. MAHON. I appreciate the gentleman's reference, and may I say that we get the finest of cooperation from all the people in the Department of Defense

in their appearance before us. They show the utmost respect for Congress and for the committee. I made no application whatever to those people. I find them very good men, and I resent some of the charges that are made against them from time to time, because under a system which lends itself to waste they are trying to do a good job.

ISSUES INVOLVED

I would like to discuss for a moment the broad issues that are drawn here. The real issue in this contest between the Pentagon and the Congress is: Are we going to agree with increasing defense budgets, or shall we insist that we compress more defense into the same or a fewer number of dollars?

Here is the issue: Shall we provide the Defense Department with a total spending authority throughout next year in the sum—get this, please—are we to provide the Pentagon with a total spending authority next year in the sum of $68,900,000,000 that was requested, including carryover funds—shall we provide the Pentagon next year with $68,900,000,000? Or shall we provide it with only $66,900,000,000 as suggested in this bill?

Shall we provide in new spending authority next year the budget figure of $36 billion or the committee bill of $34 billion? That is the issue.

Putting it another way: Shall we provide in the bill that the Pentagon may have $8½ billion carryover at the end of the next fiscal year of unobligated funds? Or shall that figure be kept in the area of $7 billion?

Putting it another way, shall we as a Government, the executive and the legislative branches, look the overburdened taxpayer in the face and say to him: We propose to tighten our belts and try to provide more defense for fewer dollars next year and get new added defense for $34 billion, which, with a carryover of the unexpended funds, will give a total for spending next year of $67 billion. When we carry forward military public works funds, the amount available to the Pentagon next year would be in excess of $71 billion.

I challenge the assumption that there is no way to secure more economy in defense spending.

The question is about like this, Mr. Chairman, Shall we give the Pentagon every dollar it requests? Shall we, in a sense, give the services a blank check? Shall we abdicate our constitutional responsibility and authority? Or shall we carefully and cautiously weigh all the factors involved like men of experience and courage ought to do, and try to provide just an equitable amount that is needed, and show our regard for the people from the standpoint of their tax dollars as well as their security, exercise our will and our judgment, and the will and the judgment of the people we represent?

Shall we be mere yes-men or "yeomen" in the service of the people who elected us to the high position which we hold?

PERIL POINT BUDGET

There seems to be some impression that this is a peril-point budget; and that is a good word. I want to commend whoever selected it for the attack on what the House has done in this budget. We did hear from Secretary Wilson—and I have great admiration for him. In a letter to me on May 15 in response to my question, Has there been any change since along about January when you were before us?

He wrote a very good letter, stating in part:

> The budget as submitted to you is already an austere one and represents a great push for economy. A good case could be made for increasing it somewhat rather than decreasing it. In the opinion of many of us it is already a peril point budget.

Now, what does the Pentagon mean by "peril point" budget? It is not the same conception of the budget that you and I would have. For example, in this budget which was submitted—and it is a budget they are asking us to approve—there are $516 million, half a billion, for Army procurement that we discovered would not be required for obligation at all in the next year, yet it was in the budget. I have already referred to that. The President when he reported as to how his budget might be cut agreed with us in the stand we take today that the Army did not need this $516 million. I do not know whether you could drive a truck through this peril point budget or not, but you can subtract a half billion dollars and everyone says it will not hurt anything or anybody, except that the Army is a little unhappy about it.

The previous statements I have made about the stock-fund money indicates that little peril was involved there.

I must add that the budget took some note of these funds. Some of it had already been pinpointed in the budget.

The people write and say that Congress should get control of the purse strings, the Congress should control spending. We took control of this $590 million in stock funds and we applied it to pay of the Army and Navy. We thereby reduced the obligational authority, the right to spend money by the Pentagon to that extent. In this bill we have reduced the right of the Pentagon to spend money to the extent of $2.5 billion. The actual reduction insofar as the bill before you is concerned is $1,996,000,000. That is where the cut is, but in the overall spending, including availability from previous years, it is $2.5 billion. We went through the hearings and justifications and we said, "Why can you not save here, why can you not save there?" Finally we came out with a $2.5 billion figure.

SPECIFIC REDUCTIONS

We did not cut Air Force aircraft. There is some duplication in the programs in the Navy. We said to the Navy: "According to the testimony, you now appear to be ready to make up your mind on two planes that are practically identical. Make up your mind and we will give you the money for the one that you need."

The gentleman from California [Mr. SHEPPARD], chairman of the Navy panel, will explain that better later today.

We cut aircraft and related procurement for the Air Force by $354 million. But there is a lot in the aircraft and related program, such as modification of aircraft, spare parts, expansion of industrial facilities, and so forth. They wanted over $600 million for modification of aircraft. We cut that down to the extent of about $83 million.

Witnesses came in and wanted $2.3 billion for spare parts for aircraft. We found that they have over $9 billion in inventory in this item and hundreds of millions of dollars of spare parts which are of no use whatever. We said: "You have got to do a more realistic job." We have cut $200 million out of this item. We tried to make reductions in some other area where we thought we might encourage a greater degree of economy and better planning.

We even cut missiles a bit, but nobody is going to suffer greatly because we nicked this program about $75 million. After all, the entire departmental budget for missiles totals about $3 billion. We only made a slight cut. There are more than 40 different types of missiles under development. Each service wants a complete assortment of missiles to do the whole job. There is considerable duplication and waste in this area and we are pushing them, therefore, for better unification of that program. A new czar has been appointed with greater authority and I think it is going to be productive of good.

The mother with a large family is never going to get economy among her flock of children if she gives them everything they want. If she gives them less and asks them to do a little better they will do a better job and they will be better citizens. A little more discipline in Government would be in order.

We made cuts in amounts requested for travel. Have you ever talked to those boys who go from one side of the continent to the other and then overseas within a period of 1 or 2 years? We have hammered on this problem for years, and this year we whacked off a few million dollars from travel in an effort to enforce some degree of economy in this area.

Well, we were asked for funds to pay what the German Republic will probably pay. We cut that out. It is a bookkeeping reduction.

But, let me say this, that all of the reductions to which we have referred in the $2.5 billion are bona fide reductions. They are not just paper reductions. They are reductions in the funds available for expenditure in the Department of Defense in the coming fiscal year.

Now, I have been speaking here somewhat at random and in a general way in regard to the budget. I do not want to press this thing too far.

Mr. WIER. Mr. Chairman, will the gentleman yield?

Mr. MAHON. I yield to the gentleman from Minnesota.

Mr. WIER. I am interested in these carryover items that each agency of government seems to have available. How far back do these unexpended, unobligated funds run? They do not run for just 1 year, do they?

Mr. MAHON. Some of them, and a very tiny fraction, would run back as far as 5 years, but generally it is over the period it takes to build a carrier

or series of aircraft, 2 or 3 years. And, speaking of the carrier, we have put into the bill the first nuclear aircraft carrier amounting to $314 million. The powerplant has not been perfected. It might have been wise to have delayed it 1 year, but we did not want to deny the Navy, that is, the majority of us did not want to deny the Navy, the privilege of going ahead on one of these nuclear carriers. But, we make it very clear in the report, and I want to make it very clear now, that in my judgment next year this nuclear carrier will not have progressed to the point where we will know whether or not it will be capable of doing the job, and I do not anticipate that the Congress next year will provide an additional nuclear carrier, because this thing has got to be looked at for a much longer time before we will be sure of our decision in that field.

Mr. MASON. Mr. Chairman, will the gentleman yield?

Mr. MAHON. I yield to the gentleman from Illinois.

Mr. MASON. The gentleman is giving us the clearest and the finest picture of this forest of defense that I have ever heard. It is a magnificent picture that he is presenting. It is very enlightening, and I feel that I personally have secured from the picture already the information and the need for this defense and the possibilities of reducing the overall appropriation. I commend the gentleman very highly for this excellent picture that he has painted for us.

Mr. MAHON. I want to say to my friend from Illinois that those words of high commendation would have been discounted somewhat coming from some of my colleagues, but from such a conservative friend as the gentleman from Illinois I am overwhelmed, and I thank him. Seriously, I am greatly honored to have such a high compliment from one of the ablest Members of the House.

Mr. ARENDS. Mr. Chairman, will the gentleman yield?

Mr. MAHON. I yield to the gentleman from Illinois.

Mr. ARENDS. I, too, agree that the gentleman's statement has been very splendid and very informative, and I was very anxious to hear all of it. There are some items which we can discuss later on as we go through this bill, but one particularly intrigued me as the gentleman discussed it, and that was with relation to the possibility of rivalry within the services. We all agree that the disturbance caused by rivalry between the services is not healthy, but I hope the gentleman does not go so far as to say that the only way to cure it is with a single Chief of Staff.

Mr. MAHON. I had no thought of making that decision. The Germans said they lost World War II because they did not have a single Chief of Staff, but I do not think we want to go that far.

Mr. ARENDS. I do not, either.

Mr. MAHON. I think my friends here realize that we have been too generous with the Department of Defense from time to time during the years because of our desire not to hurt the program. We cannot play havoc with the defense of our country. It transcends any political consideration. We all know that it is bad politics to whittle away at the security of the country. So there are no political considerations involved. Nobody in his right mind would want to cut this budget except in a sincere desire to get more for the taxpayer, and at the same time secure an adequate defense program that we can sustain during a long period of years and actually tighten and strengthen the defense of this country. And, I want to say this, and we all agree, with a total availability of $67 billion next year which includes a carryover in estimated unobligated funds of $10 billion, a $1 billion cut can be lived with.

I read in the paper this morning where someone was quoted as being fearful that if we cut the budget by $1.2 billion we would take away from the President his chips in the international poker game. It would be a sad admission to say that a $1.2 billion cut will deprive our country of its initiative and its status and its posture in international affairs. Certainly we would not collapse by a change of $1.2 billion in a $67 billion availability. Do not let us sell America short. Do not let us sell the servicemen short in the eyes of America and in the eyes of the world.

So I, for one, will not admit that this great country, with all its genius and capability cannot have a reasonably adequate defense program, with new appropriations of $34 billion and a total availability next year of $67 billion.

Mr. COLMER. Mr. Chairman, will the gentleman yield?

Mr. MAHON. I yield to my able friend from Mississippi.

Mr. COLMER. Mr. Chairman, like the gentleman from Illinois [Mr. MASON], I have been sitting here in almost amazed admiration at the splendid picture that the gentleman from Texas [Mr. MAHON] has painted of this program. I want to commend him for that statement. I thought that I would wait until he had finished before saying anything, but since he has been interrupted already, I did want to make that observation.

I want also to comment on this, and I assume perhaps the gentleman will comment upon it. That is the thought that some of us have advanced here for the past decade, that Russia wants neither war nor peace, but she wants to follow the Lenin doctrine of destroying the United States by requiring that it spend itself into bankruptcy. I think the gentleman will agree that that thought is gaining more and more substance.

As the gentleman knows, I have talked to him through the years about this very program; that this is not sacred, that the Members of Congress and particularly of the Committee on Appropriations have just as much right to have their views considered, as do those in the Pentagon.

I commend the gentleman for his statement.

Mr. MAHON. I thank the gentleman very humbly.

We are spending about 10 percent of our gross national product on defense. The Soviets are spending much more. That is one of the problems here. I believe the experts estimate that the Soviets are spending nearly one-third of their national product on defense.

The problem is, if we try to solve all our difficulties in international policy and in the military field just by spending more and more money; if that is the only answer we can come up with, then we are headed for disaster and that which the gentleman from Mississippi [Mr. COLMER] has so well pointed out.

We are moving toward a $40 billion and ultimately a $50 billion budget and we are moving to the point when the people, in a state of revulsion, might say, "No," and then we will cut these defense funds too low and we will be weak, as we were before Korea, a dangerous prospect.

We were woefully and inadequately prepared prior to Korea. We cannot let that condition come about again. We must stand firm for a stable, long-range program that gives us what we need.

I should like to say to the gentleman from Mississippi further that too high a budget creates more inflation. You get more money and you keep on spending and get less and less for what you spend.

In the second place, there are a limited number of scientists, and there is all sorts of competition for these scientists by these big corporations with Government contracts. They are trying to get these skilled engineering people one from the other. We are using about all we can get in the defense program.

OTHER ECONOMY CONSIDERATIONS

Then there is another thing involved here. There are some decisions that need desperately to be made and that have not been made. We should not go too far with some of these programs until we have made some decisions.

Another thing, certainly we need at this hour to encourage some economy, and as long as we consider this budget as absolutely untouchable we will never get the economy we seek.

Mr. CANFIELD. Mr. Chairman, will my good friend, the gentleman from Texas, yield?

Mr. MAHON. I yield to my able friend from New Jersey.

Mr. CANFIELD. In filing his report on the defense appropriation bill 1 year ago this month, that is, to provide funds for the current fiscal year of 1957, the very distinguished and very able gentleman from Texas, chairman of the committee, had this to say in part:

> Advances in Soviet education in the scientific and engineering fields could under present conditions result in their overcoming our present marginal superiority in the development of advanced and up-to-date weapons and equipment without which war, as it is known today or as it will be fought in the future, cannot be won—if it can be said that either antagonist can win a war in this age.

Then the gentleman went on to say this:

> The committee and the Congress, as a result of testimony and recent evidences of Soviet progress in weapons development, are greatly concerned over the continuing trend in this area and feel that an immediate and bold approach must be made if we are to solve this pressing problem.

A year ago the gentleman and his committee were telling the Defense Estab-

lishment, "Get busy and engage in a bold approach to meet this challenge of the Soviet." What is his comment on that approach today?

Mr. MAHON. That is a very interesting question. I did not realize last year that those words would read so well this year. I hope the words in the report last year and the words in the current report and what we say today, this year, and next year, will continue to read well, come war or come peace.

In the contest for power between Soviet Russia and the United States, Soviet Russia is closing the gap and getting strong faster than the United States is getting stronger. They are seeking to overhaul us in this race from an industrial standpoint and a military standpoint. They have not done it yet, but the threat is always there.

So what do we do about it? We try to build a defense program that is adequate to meet our requirements. Last year the Pentagon made a mistake. You would think from some recent reports that this would never happen.

Last year officials told us the Soviets were building the long-range intercontinental bomber faster then we were building it and that we were in jeopardy. So we gave them a reasonably adequate appropriation in the House. When the bill went over to the other body, on the basis of this announcement from the Pentagon, that body gave them some $800 million more for the B–52 and other aircraft programs, in order to meet this threat the Pentagon said existed. But, late last year, after Congress had adjourned, officials revised the estimate and they said the situation was not as they had portrayed it earlier in the year, that they had misinformed us. We did not find out about it until we started the hearings this year. Then, we were told that the information given to us last year was not correct. So that is the situation with respect to that matter. I said again last year, and I say it again this year: Get busy in the Pentagon with your essential defense programs and make a bold approach to these problems, particularly to resolve these differences and to end these rivalries and get busy in the promotion of economy and a better program for the defense of the country. Particularly in the field of ballistic missiles, the sky is the limit—and I say this for all to hear—from the standpoint of the committee and the Congress—the sky is the limit in the most highly competitive field now between the Soviet Union and the United States, and that is in the ballistic missile area. Hundreds of millions and billions of dollars are available and we say: Do not pull any punches. To tell you the truth, I looked at the ballistic missiles program last fall. I want to say publicly, and as I have said before, officials are doing a magnificent job in trying through a crash program—pretty wasteful in money—to be the first to develop this so-called ultimate weapon.

Mrs. ROGERS of Massachusetts. Mr. Chairman, will the gentleman yield?

Mr. MAHON. I yield to the gentlewoman from Massachusetts.

Mrs. ROGERS of Massachusetts. I would like to raise my voice also in tremendous appreciation of the very wonderful presentation of the gentleman's bill. It is a very remarkable performance, one of the most remarkable I have ever listened to in the Halls of Congress. I would also like to thank the gentleman for his extreme courtesy always. I would like to ask the gentleman this. Perhaps I will not ask the question. But I would like to say for myself and speak in the deepest appreciation of what our very great Secretary of National Defense Charles Wilson has done. Under him, we have the greatest military might and national defense in the world today.

Mr. MAHON. Mr. Chairman, I do appreciate the gentlewoman's very generour words of encouragement and I share her esteem for Secretary Wilson.

Mrs. ROGERS of Massachusetts. I thank the gentleman.

Mr. ABERNETHY. Mr. Chairman, will the gentleman yield?

Mr. MAHON. I yield.

Mr. ABERNETHY. I commend the gentleman for his very fine statement. His remarks in support of this bill are excellent and I am in agreement with them. Knowing the gentleman as I do, his sincerity, patriotism, and devotion to duty, I am sure the gentleman has not sacrificed the security of our country simply to write a record of economy into this bill. Nevertheless, I wish the gentleman would tell the House whether or not he resolved all doubts as to the advisability of cuts in favor of the Pentagon?

Mr. MAHON. My feeling is that I would rather provide too much than too little. We cannot take chances with the security of our country. I do not think there is any doubt but that we have provided an adequate sum so that no missile program which deserves to be promoted will be seriously affected, and no aircraft program is to any degree in serious jeopardy.

Mr. ABERNETHY. In brief, then, the gentleman and his committee, or at least the majority of the committee, and particularly the gentleman have played it absolutely safe by resolving all doubts in favor of the Penatgon and security?

Mr. MAHON. I would say we have resolved all doubts in favor of strength.

Mr. ABERNETHY. Yes; then to put it that way, the gentleman has resolved all doubts in favor of strength; is that correct?

Mr. MAHON. That has been our objective. I am pleased that my friend has raised this significant question.

One of my colleagues the other day asked me if the Committee was confident that reasonably adequate funds were being provided for research and development. I pointed out that we were providing well in excess of $1½ billion for research and development specifically, but that the total funds provided in the bill for research and development, experimental models of aircraft, missiles, and so forth would run the grand total in the broad sense for research and development to about $5 billion. This program ought to be adequate. Certainly the sums involved are very big indeed.

Mr. Chairman, having received unanimous consent to revise and extend my remarks, I wish to insert at this point some material which I did not have time to present in my statement to the House.

I made reference to the need for a greater degree of unification among the services and I made reference to the President in discussing that subject. I would like to make the following additional references to the problem:

Last week at his press conference the Pulitzer prize-winning reporter of the New York Times asked President Eisenhower about the problem of unification among the services, and I quote below portions of the colloquy:

JAMES RESTON, of the New York Times. Going back to the budget, sir, some observers, some very well experienced men, including your old friend, Vannevar Bush, have said on the budget that the problem is essentially the old question of the unification of the services, the elimination of duplication, the agreement upon a strategic plan, and so on. Could you comment on that, and give us your impression of what progress has been made on that?

Answer. Well, as you people, some of you here, you older ones, may know, in 1946 and 1947 I was a great supporter of unification.

I had come back from a war where I had responsibility of commanding all services, dealt with all services, and I thought the day of the separate services was really gone. And I thought we could bring this about. Well, I encountered a very fierce opposition, but I stuck to my guns.

Now, there never was produced a law that, I believe, would have been the best, because there was nothing in that law that give—gave anyone, any one official, the specific job of uncovering all of the possible duplications, making certain that we were—all of our logistics and supply problems were met in the most economical manner.

Now, I think Mr. Bush, Dr. Bush, may be overestimating to some extent the savings that are to be made there. But I still believe they are considerable, and if we could today get rid of service prejudices, to the point of such things as real unification in hospitalization and doctors, in depots where it can be done, and distribution, supply, procurement, a lot of these things, I believe there was—there is a chance to save money.

Now, this, of course, has its limits. After you are purchasing in a certain amount, it doesn't save a great deal to purchase in double that amount except as it eliminates the competitive factor.

If you and I are both trying to get 5,000 blankets, and there is only one factory making blankets on a very limited scale, we would run the price up against ourselves very hurriedly. That kind of thing could be eliminated.

But progress is being made, that is the hopeful part about it. Progress is being made, but is not as fast and it is not as complete, and I certainly hope when I was preaching and praying for unification, which never did take place quite in the form that I thought it should be.

Question. I think the point Dr. Bush was trying to get at, sir, was not the question primarily of procurement, but the question of the philosophy of the Joint Chiefs.

Answer. Yes.

Question. And his charge was that there was a kind of tacit agreement among the Chiefs so that one would not oppose the demands of the other, and you came out not with 1 war plan but with 3 war plans, as he put it.

Answer. Yes. Well, I don't believe that. I don't believe there is three war plans, but I do believe this: That each one, trying to protect very earnestly the, what he believes

should be his own capabilities, and to get the things for him, for example, guided missiles of all kinds, every kind of bomb. They—I believe then that the war plans are not clear enough in fixing responsibility, possibly, and we could do it cheaper there.

The clear implication of this colloquy is simply this: That the President concedes that savings could be made if we could get rid of prejudices and unnecessary duplications in the three armed services. It is perfectly clear that the President, and the President alone, is in the position to lead the way.

I should now like to insert in the RECORD some excerpts from our committee report on the defense appropriation bill which we are now considering. I would call attention to table I, which gives a summary of appropriations:

TABLE I.—*Summary of appropriations*

Title	Appropriations, 1957	Budget estimates, 1958	Recommended in bill, 1958	Bill compared with—	
				Appropriations, 1957	Budget estimates, 1958
Title I—Office of the Secretary of Defense	$14,950,000	$17,175,000	$16,350,000	+$1,400,000	−$825,000
Title II—Interservice activities	643,875,000	687,825,000	682,375,000	+38,500,000	−5,450,000
Title III—Department of the Army	7,572,280,000	8,465,000,000	[1] 7,239,425,000	−332,855,000	−1,225,575,000
Title IV—Department of the Navy	9,989,793,080	10,487,000,000	[2] 9,801,355,000	−188,438,000	−685,645,000
Title V—Department of the Air Force	16,477,625,000	16,471,000,000	15,801,720,000	−675,905,000	−669,280,000
Total	34,698,523,000	36,128,000,000	33,541,225,000	−1,157,298,000	−2,586,775,000

[1] In addition, $400,000,000 to be derived by transfer: $350,000,000 from the Army stock fund and $50,000,000 from the Army industrial fund.
[2] In addition, $190,600,000 to be derived by transfer: $70,000,000 from the Navy industrial fund, $100,000,000 from the Navy stock fund, and $20,000,000 from the Marine Corps stock fund.

I now insert pages 7, 8, 9, and 10 of the report. These pages contain authoritative information in regard to the reductions which we have provided in the bill and obligational and expenditure figures. The figures used exclude previous appropriations and appropriations in the budget for military public works:

REDUCTIONS IN BUDGET

It is to the above background of facts and conditions that the committee gave continued recognition in its consideration of the fiscal 1958 requirements of the Department of Defense, excluding military construction. The inescapable conclusion, however, is that so long as present world conditions prevail, a defense program calling for high level expenditures, but without costly peaks and valleys, will have to be continued.

The total amount of the estimate, $36,193,600,000, contained in the President's budget included $65 million for military construction, Army and Navy Reserve forces. This amount is deleted from the bill and comparative tabulations for the reason that the amount requested exceeded the still outstanding authority. It is understood that a bill to increase and extend this authority is now under consideration. The committee will subsequently consider this item on the basis of authority made available.

The budget estimate, as indicated, in the preceding tabulation, is reduced by $2,586,775,000, and the recommended appropriation of $33,541,225,000 is $1,157,298,000 below the amount appropriated for 1957. Of this total reduction in new obligational and expenditure authority, the amount of $1,996,775,000 represents a direct reduction in the Defense budget, and $590 million is a reduction in funds appropriated in prior years, but currently available to the Department for obligation and expenditure under stock and industrial fund operations. This surplus cash is recommended for transfer to items of appropriation contained in the accompanying bill, and, accordingly, is added to the amount of $33,541,225,000, resulting in total obligational authority for items in the bill of $34,131,225,000, or a net reduction of $1,996,775,000 in the budget estimates.

Although the above amount of $590 million is recommended for transfer to the regularly budgeted items which were considered by the committee it should not be regarded as a paper cut. It is a reduction in that amount in total obligational and expenditure authority requested by the Department for fiscal year 1958. In explanation, it should be stated that these funds, differing from directly appropriated funds only as to purpose and methods by which they are administered, are just as much a part of the Department's financial resources as all other funds which, on the books of the Treasury, are credited to the Department of Defense.

With respect to the direct reduction of $1,996,775,000 in the budget request, two specific amounts, which are parts of this total, should be mentioned.

The first is the reduction of $516 million in the Army request for procurement and production. The President, in his recent message to the House of Representatives on possible reductions in the Federal budget, suggested that this amount which is estimated to remain unobligated as of June 30, 1958, could be considered for deletion. As of March 31, the amount available to the Army for procurement and production during 1957 is $3,421,366,000. Obligations against this amount through March 31 total $884,522,000. Fiscal year 1958 obligations are estimated at $1.5 billion. This would indicate that the Army will not only have adequate financing for this item through fiscal year 1958, but that a sizable unobligated balance will remain even with this large reduction in the budgeted amount of $583 million.

The second item is the amount of $126,741,000 which is deleted from the total request on the assumption that the Federal Republic of Germany will continue to render goods and services in the equivalent amount rendered during 1957. It is understood that negotiations on the extent of German Republic contributions are now in progress. The delay experienced in building up the military forces of the West German Republic necessities continued heavy burdens in that area by our military.

Certain items of reduction in requested new authority are based on additional recoupments, in both 1957 and 1958, resulting from price redeterminations and announced stretchouts of certain programs. Increased unobligated balances over amounts estimated when the 1957 bill was considered, and on the basis of which certain appropriations were recommended for 1957, made further reductions possible.

In effecting these reductions, the committee was particularly cautious in seeking not in the slightest to jeopardize the projected increase in military striking power, in particular, or the national security in general. It is convinced that even when the more or less uncontrollable cost increases of $576 million in 1958 over 1957, subsequently shown, are included, the total of over $45 billion in carryover and new obligational authority is fully adequate for continuation of the planned buildup of our Defense Establishment.

More detailed explanations of reductions effected by the committee are contained in following portions of the report covering the three Services and other activities of the Department.

OBLIGATION SUMMARY

The tabulation on the following page shows in summary form, actual or estimated, the total funds available for obligation for fiscal years 1956, 1957, and recommended for 1958. Amounts for military public works are not included.

The matter of large unobligated balances in the Department of Defense at the end of each fiscal year has been a subject of discussion and analysis during every hearing on the Department's request for funds. Much has been said and written on the subject for many years, and in some instances, unfortunately, by individuals possessing no grasp of the subject. It is, admittedly, a difficult matter to explain to anyone not in constant touch with the workings of the Department of Defense.

It must be borne in mind that procurement activities of the Department are, and must be, continuing in nature. The procurement of aircraft, ships, guided missiles, and hundreds of other major items of equipment cannot, for reasons of efficiency and economy, take cognizance of or be limited to a specific period of time.

The primary reason for large unobligated balances is the practice of full funding of programs. Committee actions on requests of the Department are taken on the basis of programs presented for approval and programs approved. Funds necessary to carry out the approved program are made available through the appropriation procedure.

Although a program has been approved and funded for the procurement of a given number of certain aircraft, the entire number may not be contracted for at the same time, or even during the same fiscal year. The result is an unobligated balance as of June 30. Further, many components of all aircraft, especially the shorter leadtime items, are ordered on a time schedule so that delivery will be phased in as required for installation.

A program is approved for the procurement of a specific number of a certain guided missile. Development and improvement of this missile is constantly going on. A sought-for solution to a technical problem may occur early in the fiscal year, justifying procurement of a certain number of missiles. Unforeseen technical difficulties may preclude the obligation of any appropriated funds by June 30. The result is an unobligated carryover. Aside from this aspect, most missiles contain hundreds of components which must be placed on order at intervals as required for assembly.

It takes several years to build a major combatant vessel. Although the full cost thereof is provided in appropriations, only the cost of the hull may be obligated during the first year. Propulsion equipment, armament, electronics, and subsequent costs for testing, etc., will not be obligated for until the following year or more. The result, again, unobligated balances.

Delays encountered as a result of technical difficulties, preparation of specifications, protracted negotiations with contractors, etc, are also elements which create unobligated balances. The main consideration is the program. The fact that balances, representing a portion of funds appropriated for a program, are on hand as of June 30 does not

mean that the funds are not required to complete that program.

Another point, generally overlooked, is the requirement of law that all obligations must be firm commitments of the Government. Although a contract may have reached the signature stage and there is no question of its validation, it cannot be recorded as a valid obligation until all legal requirements have been met.

The military services each year prepare analyses of their estimated unobligated balances. The total for each activity under each appropriation is broken down into (a) amounts reserved for outstanding commitments for specific programs; (b) amounts required for completion of approved programs, (c) amounts applied to requirements for ensuing year; and (d) unprogrammed amounts. All of these categories are considered by the Office of Secretary of Defense, the Bureau of the Budget, and the committee when requests for each succeeding year are reviewed. What appear to be requests for funds in excess of program requirements are denied, or rescinded.

The matter of unexpended balances needs no discussion since these balances consist of the above-described unobligated balances, plus funds obligated for specific goods and services, the bills for which remained unpaid as of June 30. Funds in amounts equal to obligations incurred are reserved, but remain in the Treasury.

[Millions of dollars]

Fiscal year	Unobligated carry-over [1]	New authority	Congressional transfers and rescissions	Reimbursements	Total available	Obligations
1956	11,889	31,893	−766	4,902	47,918	36,000
1957 (estimated)	11,536	34,735	−47	2,535	48,759	38,562
1958 (estimated)	10,017	[2] 34,131		1,278	45,426	39,601

[1] Excludes expired balances.
[2] Includes $590,000,000 to be transferred from stock and industrial funds.

EXPENDITURE SUMMARY

Funds available for expenditure and the actual and estimated expenditures for fiscal years 1956, 1957, and 1958 are given below. Amounts are exclusive of military public works.

The budgeted total expenditures of the Department for the fiscal year ending June 30, 1957, is $36,000 million of which, it was estimated 33,917 would be for functions excluding military public works and items proposed for later transmission to the Congress.

Latest estimates of 1957 expenditures furnished by the Office of Secretary of Defense indicate that total expenditures will approach nearer $38 billion. Most of the increase is due to the higher rate of expenditures for aircraft and guided missiles.

[Millions of dollars]

Fiscal year	Unexpended carry-over [1]	New availability	Congressional transfers and rescissions	Total available	Expenditures
1956	42,583	31,932	−2,411	72,104	33,756
1957 (estimated)	35,817	34,784	−795	69,897	[3] 35,917
1958 (estimated)	32,803	34,180		66,983	[3] 35,704

[1] After lapses to Treasury surplus fund.
[2] Based upon latest Department of Defense estimates, reflecting an increase of approximately $2 billion over budget estimates.
[3] Based on budget estimates.

I wish to insert at this point a general statement in regard to the actions of the committee with respect to the Air Force.

Air Force

Total request in this bill	$16,471,000,000
Committee recommendation	15,801,720,000
Reduction in request	669,280,000

The reduction in Air Force estimates are summarized in a few brief statements. I will not discuss these items in detail. Interested Members can find a detailed explanation of the reduction in the committee report beginning on page 65.

First. A $354 million reduction in aircraft and related procurement from a total request of $6,200,000,000, as follows:

(a) A $195,500,000 reduction in the $2,359,700,000 request for spare parts. The total estimate for spare parts has been increasing but the formula on which requirements for such items are based is supposedly decreasing. The committee found that preproduction and development costs carried in the estimate were causing the increase. Accordingly, a reduction has been made in the amount of $175 million. In addition, a $20,500,000 reduction has been made on the basis of reduced flying hours.

(b) Seventy-five million dollars has been cut from the $1,520,500,000 requested for missiles. The Air Force is continuing work on a number of questionable missiles. They are buying what the committee feels are too many of certain types of missiles.

(c) Eighty-three million five hundred thousand dollars has been cut from the $633,500,000 estimate for modification of aircraft. The purpose of this reduction is to check this growing program and force a review.

Second. A $100 million reduction in procurement other than aircraft from a request of $1,225,000,000 to hold this appropriation to the 1957 level or slightly below.

Third. A $12 million reduction in research and development to emphasize the need for economy.

Fourth. A $162,880,000 reduction in operation and maintenance from a requested $4,225,000,000, as follows:

(a) Seventy five million two hundred and fifty-five thousand dollars to reflect a reduction of 500,000 in flying-hour program.

(b) Twenty-one million nine hundred and twenty thousand dollars for the contribution of Western Germany to the support of the Air Force in Germany.

(c) Sixteen million nine hundred and fifty thousand dollars in travel to hold the travel estimate to the 1957 level and in line with the numbers of civilian and military personnel.

(d) Sixteen million dollars for procurement of furniture and the maintenance of housing units that will not be ready as soon as previously programed.

(e) Ten million dollars for major repairs, because the total increase requested appeared excessive.

(f) Two million eight hundred thousand dollars for printing requested on the assumption that certain authority to buy printing along with items of equipment and in the equipment price might not be extended.

(g) Two million dollars reduction in the procurement operating budget to balance the request between other objects of expense and decreasing personnel.

(h) Fourteen million nine hundred and fifty-five thousand dollars in training support to keep the budget for this program in line with the training workload.

(i) Three million dollars in Korean resupply program because the Air Force wanted $7 million to do a job previously done by the Army for $3,500,000.

Fifth. A $38,400,000 reduction in military personnel from a requested $3,840,000,000 to reduce the number of changes in station moves and generally hold down expenses.

Sixth. A $2 million reduction in the $57 million requested for Reserve personnel pay on the basis that the Air Force will not be able to attain the numbers estimated for the Reserve program in 1958. This is still $6 million over the program for 1957.

Mr. WIGGLESWORTH. Mr. Chairman, I yield myself 30 minutes.

Mr. Chairman, this bill comes to you today after 78 days of hearings, morning and afternoon, by your subcommittee.

The work of that subcommittee is reflected in six volumes of hearings, over 6,200 pages in length, and in the committee report before you, 115 pages long.

The subcommittee has worked long and conscientiously, and I express my appreciation to the majority members of the subcommittee, for their consideration, particularly to the chairman, and to the members of the Navy panel, with whom I personally served; and to our highly competent expert staff, five in number, whose help has been invaluable.

IMPORTANCE OF MILITARY POWER

Mr. Chairman, this bill is in all probability the most important bill that will come before this session of the Congress.

It is vitally important because it provides for the maintenance and development of adequate military power, upon which is dependent not only the

United States of America but the entire free world.

It is this military power, combined with that of our allies, which has maintained peace in the world in recent years.

It is this military power which has compelled the Kremlin to abandon military aggression, at least for the time being, and to resort to other tactics in the field of the cold war.

Military power is language that is understood by any potential enemy today.

Without adequate military power it is impossible to wage peace. No one here, I know, would knowingly jeopardize adequate military power.

DANGER OF JEOPARDIZING MILITARY POWER

This bill is also important because of the fact that it carries $33.5 billion of appropriations, plus another $590 million of transferred funds, or a total of $34.1 billion, and because it deals with requests aggregating $36.1 billion, or about half of the entire Federal budget for 1958.

By reason of its very size it presents on the one hand the opportunity for substantial reductions in the budget figures, and on the other hand the danger that those reductions may be excessive.

Personally, it is my opinion that the reductions recommended by the committee are deeper than they should be.

PROGRESS UNDER SECRETARY WILSON

In view of what has been said, Mr. Chairman, I want to emphasize certain facts in recent history in connection with the consideration of this bill. It is easy to criticise in general terms without supporting facts.

Let us go back to fiscal 1954.

That was the first full year in which Secretary Wilson was in charge of the Department of Defense.

For that year, the budget was reduced by the administration and by the Congress in the amount of $6.3 billions below the figures previously submitted by President Truman.

In the following year, fiscal 1955, a further reduction of $5.3 billion was made. In other words, a total reduction in the budget of $11.6 billions was made in those first 2 years.

That reduction, Mr. Chairman largely made possible the reduction in our annual tax burden of $7.4 billion, now aggregating almost $25 billion, the largest tax reduction in the history of this country.

The request which the Defense Department submitted for fiscal 1958, and which is now before us, is still $2.6 billion below the figures of President Truman for 1954; and it requires only 8.7 percent of our gross national product as compared with 11.2 percent in fiscal 1954.

Furthermore, Mr. Chairman, in the past 4 years very great progress has been made toward efficiency and economy. Military personnel has been reduced to the extent of 775,000 with, of course, tremendously increased fire power all along the line. Civilian personnel has been reduced 400,000—250,000 at home, 150,000 overseas. There is a 5,000 reduction in the budget now before us.

If you will examine the justifications for the increases we have under consideration you will find time and time again that the increase involved is substantially offset by savings that have been effected during the past year in the Department of Defense.

Many of us are interested in the recommendations of the second Hoover Commission. I call your attention to the fact that the record indicates that out of 351 recommendations in reference to the Department of Defense, 320 have been partially or fully implemented.

Every year for the past 4 years I have asked the Department of Defense to submit for the record a summary of the steps taken with a view to bringing about economy and efficiency during the preceding year. You will find reference to them in each of my major statements on this bill on the floor in the last few years. You will find the reports in full in the applicable committee hearings.

This year is no exception to the rule, and if you will look at page 173 of the hearings on the Defense Department you will find 66 pages—66 printed pages—listing steps taken in the direction of economy and efficiency just in the calendar year 1956.

Secretary Wilson modestly states:

I believe great progress has been made in achieving greater economy and efficiency in the day-by-day operations of the Defense Department. Organizations and procedures throughout the Defense Department have been improved. Obviously, there is always room for further improvement and we are still working on it.

Assistant Secretary McNeil, who, as you know, has served for many years under both Democratic and Republican administrations, puts it this way: "There is a dramatic story in the last few years of improvement in the whole Department of Defense."

But for that dramatic story, Mr. Chairman, the budget before us today would be billions of dollars in excess of what it is.

SECRETARY WILSON

In my opinion, Mr. Chairman, Secretary Wilson is the greatest Secretary of Defense we have had. The country is indebted to him for the great contribution which he has made.

He began life, as we all know, at the bottom of the ladder, rose to be head of the greatest corporation in the world, took over his present position 4 years ago at great financial sacrifice, and has done much to bring the Department toward a businesslike administration from the chaotic conditions which existed when he took over.

UNCONTROLLABLE INCREASES

Mr. Chairman, the budget request for this year is just about a billion and a half dollars in excess of the funds appropriated for the current year. That is an increase of a little under 5 percent.

I want to point out, however, that the budget was submitted in the light of certain important factors which it is necessary to keep in mind.

In the first place, it was submitted in the light of new duties, new obligations, devolving upon the Department, such as the contribution to the civil service retirement fund, the demands of dependent medical care legislation, survivors benefit legislation requirements, and other items summarized on page 13 of the report. These items aggregate $576 million. Here they are:

Cost increases

	1957	1958	Increase
Civil service retirement fund	------	$301	$301
Extra day for civilian pay	------	20	20
Deutschemark support	------	127	127
Payment of claims	$11	15	4
Survivors benefits	68	130	62
Retired pay	515	555	40
Dependent medical care	41	63	22
Total	635	1,211	576

The budget was also submitted in the light of increasing price levels which are estimated for the last 12 months at 4 percent for labor and 6 percent for materials. Incidentally, no provision is made in the budget for price increases in the fiscal year 1958, which are highly probable.

It was also submitted in the light of increasing cost and complexity in weapons and equipment, in this nuclear-supersonic guided-missile atomic-weapon era in which we are living. Each new model, as you know, becomes more expensive than the last.

Referring to this fact, Secretary Thomas pointed out during the course of his testimony that a World War II submarine cost about $5 million whereas today a nuclear submarine costs $45 million. A World War II 5-inch shell cost about $100; a Terrier missile today costs $6,200. A World War II fighter plane cost about $120,000; today a comparable plane costs $1,200,000.

You will find other examples in the committee report at page 12.

Mr. Chairman, I call your attention also to the fact that the initial requests of the three armed services for the fiscal year 1958 were reduced to the extent of $12 billion by the Secretary of Defense and the President before being transmitted to the Congress.

That is perhaps not unusual, but it is certainly evidence of a desire to hold expenditures to the minimum.

OUTLINE OF CONTEMPLATED MILITARY POWER

Now, Mr. Chairman, what does this overall expenditure contemplate in terms of military power for 1958?

Briefly, to give a general outline of the picture, it contemplates a total Regular armed force of 2.8 million men, about the present level, with increased firepower all along the line, and with a combat ratio of 64 percent as compared to 52 percent in December 1952.

It contemplates a Reserve force of 1,049,000 men, an increase of about 63,000 as compared to the force at the end of this fiscal year.

THE ARMY

The Army will have 1 million men. It will have 17 divisions, 2 divisions less than at present, but it will also have an increase in other types of organization, notably in atomic support units. The divisions are to be somewhat smaller, but they will have more overall power and be better suited for modern warfare. Real progress is reported in terms of mobility, communications, Reserve strength, and, of course, firepower.

THE NAVY

The Navy is to have 675,000 men, 983 ships in the active fleet, and about 1,411 ships in the reserve fleet. It will also have something like 10,000 planes in its active inventory. The Navy is moving steadily from a conventional Navy to a nuclear-powered guided-missile Navy. It reports greatly increased cruising range, greatly increased speed, greatly increased firepower, and predicts that it can soon encircle the entire periphery of Russia and reach almost any portion of Russian territory. We have and shall continue to have the greatest seapower in the world.

THE MARINE CORPS

The Marine Corps will remain at 200,000 men with 3 divisions and 3 wings. The divisions are to be slightly reduced in size, but are to have increased firepower. The adoption of the so-called vertical airlift is expected to increase the efficiency of the corps materially.

THE AIR FORCE

The Air Force will have 925,000 regulars, 128 wings in addition to 27 for the Guard and 24 for the Reserve Corps. The figure 128 compares with 98 as of January 1, 1953 and 48 just prior to the Korean war. Planes in many instances are to be increased 50 percent per wing. The overall power of the 128 wings now in contemplation will be considerably greater than that contemplated for the 137 wings which we have previously talked about.

If we add up the active inventories of the planes of the Army, the Navy, and the Air Force, we will find that we have almost 40,000 planes in the active inventory as well as several thousand others in an inactive status.

The record indicates that while we are behind Russia in certain types of planes, primarily those in which Russia is most interested, such as tactical bombers and day fighters, we have marked superiority in other types which are the types that are most necessary for us, such as the strategic bomber, all-weather interceptors, and transports.

General Twining tells us that our relative position is better now than it was expected to be a year ago, and states that we can deliver far greater firepower on more targets than ever before. The record indicates also that if we add United States airpower to allied airpower and compare it to Russian airpower plus captive nation airpower, the balance is heavily on the side of the Free World.

MISSILES

We are spending great sums of money, as we all know, in the missile field. There are many types of them and they are in various stages of research development and operation for all three branches of the services; surface-to-surface, surface-to-air, air-to-air, and air-to-surface.

We have made rapid progress. Dr. Furnas, the Assistant Secretary of Defense in charge of Research and Development states clearly on the record that in his opinion America is well ahead of Russia in the ballistic missile field, both with reference to the IRBM and the ICBM.

CONTINENTAL DEFENSE

Continental defense is also calling for very large expenditure and that expenditure is increasing. It is vital, however, and is proceeding according to schedule. It is proceeding as rapidly as possible under existing conditions.

FORCE GOALS

Generally speaking, we have been building and are maintaining tremendous offensive and defensive military power.

That power is vital in view of the fact that Russia has an army three times the size of our own, the second largest navy in the world, including over 400 submarines and an air force which is powerful and steadily increasing in strength.

The force goals recommended are designed to give us a military power capable of dealing with the initial phases of any type of war, global or otherwise; a military power providing an ample base for rapid expansion when necessary; a military power which can play its part in a balanced allied force representing the Free World, a military power which we can carry over the years without undermining our economic strength.

The force goals recommended are considered adequate. This seems to be the unanimous opinion of all concerned.

Secretary Wilson had this to say in this connection:

We have now and through this proposed budget will continue to have, the military power required for the support of our foreign policy and for the security of the United States as well as our responsibility to the Free World as a whole.

I also quote Admiral Radford, who stated:

I feel that we have a Military Establishment today which is responsive to almost any situation that can be foreseen and within a reasonable period of time we can take care of anything. We are respected. Our power is respected.

Under leave to extend my remarks, I include at this point in the RECORD a table entitled "Military Personnel Strengths":

Military personnel strengths (excluding reimbursables)

[In thousands]

	Actual end strengths		Projected					
			End strengths			Average strengths		
			June 30, 1957			Fiscal year 1957		
	June 30, 1956	Dec. 31, 1956	Approved fiscal year 1957 funding	Revised in fiscal year 1958 estimates	June 30, 1958	Approved fiscal year 1957 funding	Revised in fiscal year 1958 estimates	Fiscal year 1958
Department of Defense:								
Officers	349.5	348.7	349.9	345.3	345.9	352.4	348.8	344.6
Enlisted	2,445.0	2,418.0	2,502.9	2,438.8	2,442.4	2,465.8	2,429.4	2,437.2
Subtotal	2,794.5	2,766.7	2,852.8	2,784.1	2,788.3	2,818.3	2,778.2	2,781.8
Officer candidates	11.1	13.0	12.4	11.6	11.7	13.5	13.6	12.5
Total	2,805.6	2,779.7	2,865.2	2,795.7	2,800.0	2,831.8	2,791.8	2,794.3
Total personnel by service:								
Army, excluding cadets	1,023.2	988.9	1,043.5	998.2	998.0	1,031.8	997.5	994.5
Cadets	1.7	2.4	1.8	1.8	2.0	2.3	2.3	2.5
Total Army	1,024.9	991.3	1,045.3	1,000.0	1,000.0	1,034.1	999.8	997.0
Navy, excluding midshipmen, cadets, and OCS	663.8	665.6	672.0	668.5	668.5	664.5	668.2	669.0
NAVCADS	2.5	2.3	1.6	1.8	1.7	1.8	2.1	1.8
Midshipmen	3.6	3.8	3.5	3.6	3.5	3.6	3.7	3.6
OCS and AOCS	(1)	1.4	1.1	1.1	1.3	2.0	2.2	1.5
Total, Navy	669.9	673.1	678.2	675.0	675.0	671.9	676.2	675.9
Marine Corps	200.8	200.8	205.7	200.0	200.0	205.0	200.9	200.0
Air Force, excluding aviation cadets and cadets	906.7	911.4	931.6	917.4	921.8	917.0	911.6	918.3
Aviation cadets	3.0	2.6	3.9	2.8	2.5	3.3	2.8	2.4
Cadets	.3	.5	.5	.5	.7	.5	.5	.7
Total, Air Force	910.0	914.5	936.0	920.7	925.0	920.8	914.9	921.4

[1] OCS and AOCS are included in the Navy enlisted strength on June 30, 1956, but are shown separately after that date.

Mr. BALDWIN. Mr. Chairman, will the gentleman yield?

Mr. WIGGLESWORTH. I yield to the gentleman from California.

Mr. BALDWIN. The gentleman mentioned a few minutes ago the discrepancy between the number of submarines in this country and the number possessed by Russia. Can the gentleman inform the House as to whether the budget reductions made by the committee will slow down the submarine construction program over the one proposed in the budget?

Mr. WIGGLESWORTH. I certainly hope not. I am confident that they will not.

Mr. COLE. Mr. Chairman, will the gentleman yield?

Mr. WIGGLESWORTH. I yield to the gentleman from New York.

Mr. COLE. Early in the gentleman's statement he indicated some concern that there were some areas in the

recommendations of the Committee on Appropriations where it thought the cuts were perhaps too deep. Is the gentleman in a position to advise us at this time what those areas are?

Mr. WIGGLESWORTH. If the gentleman will permit me to complete my statement, I shall discuss that a little before I conclude.

Mr. COLE. I thank the gentleman.

DOLLARS AND CENTS

Mr. WIGGLESWORTH. Turning now to the matter of dollars and cents, Mr. Chairman, I call attention to the two tables in the committee report appearing on page 8 and page 10 of the report. You will see in those two tables the picture presented in terms of availability, in terms of unexpended balances, and in terms of unobligated balances.

OBLIGATION SUMMARY

The tabulation below shows in summary form, actual or estimated, the total funds available for obligation for fiscal years 1956, 1957, and recommended for 1958. Amounts for military public works are not included.

[Millions of dollars]

Fiscal year	Unobligated carryover [1]	New authority	Congressional transfers and rescissions	Reimbursements	Total available	Obligations
1956	11,889	31,893	−766	4,902	47,918	36,000
1957 (estimated)	11,536	34,735	−47	2,535	48,759	38,562
1958 (estimated)	10,107	[2] 34,131		1,278	45,426	39,601

[1] Excludes expired balances.
[2] Includes $590,000,000 to be transferred from stock and industrial funds.

EXPENDITURE SUMMARY

Funds available for expenditure and the actual and estimated expenditures for fiscal years 1956, 1957 and 1958 are given below. Amounts are exclusive of military public works.

The budgeted total expenditures of the Department for the fiscal year ending June 30, 1957, is $36 billion, of which, it was estimated, 33,917 would be for functions excluding military public works and items proposed for later transmission to the Congress.

Latest estimates of 1957 expenditures furnished by the Office of Secretary of Defense indicate that total expenditures will approach nearer $38 billion. Most of the increase is due to the higher rate of expenditures for aircraft and guided missiles.

[Millions of dollars]

Fiscal year	Unexpended carryover [1]	New availability	Congressional transfers and rescissions	Total available	Expenditures
1956	42,583	31,932	−2,411	72,104	33,765
1957 (estimated)	35,817	34,784	−795	69,897	[2] 35,917
1958 (estimated)	32,803	34,180		66,983	[3] 35,704

[1] After lapses to Treasury surplus fund.
[2] Based upon latest Department of Defense estimates, reflecting an increase of approximately $2 billion over budget estimates.
[3] Based on budget estimates.

You will note that based on the original budget request there would be available for expenditure in fiscal 1958 the sum of $66.9 billion, or about $3 billion less than available in the current fiscal year; and available for obligation the sum of $45.4 billion or $3.3 billion less than available in the current year.

I may mention in this connection also that the record indicates that the unexpended balance figure has been reduced since 1953 by about $24 billion, and that the unobligated balance figure in the same period of time has been pulled down about $7 billion.

COMMITTEE ACTION

The action recommended by the subcommittee as a whole appears in a brief table entitled "Summary of Appropriations" on page 2 of the committee report, which under leave to extend my remarks, I include at this point in the RECORD:

Summary of appropriations

[Thousands of dollars]

Title	Appropriations, 1957	Budget estimates, 1958	Recommended in bill, 1958	Bill compared with—	
				Appropriations, 1957	Budget estimates, 1958
Title I—Office of the Secretary of Defense	14,950	17,175	16,350	+1,400	−825
Title II—Interservice activities	643,875	687,825	682,375	+38,500	−5,450
Title III—Department of the Army	7,572,280	8,465,000	[1] 7,239,425	−332,855	−1,225,575
Title IV—Department of the Navy	9,989,793	10,487,000	[2] 9,801,355	−188,438	−685,645
Title V—Department of the Air Force	16,477,625	16,471,000	15,801,720	−675,905	−669,280
Total	34,698,523	36,128,000	33,541,225	−1,157,298	−2,586,775

[1] In addition, $400 million to be derived by transfer: $350 million from the Army stock fund and $50 million from the Army industrial fund.
[2] In addition, $190 million to be derived by transfer: $70 million from the Navy industrial fund, $100 million from the Navy stock fund, and $20 million from the Marine Corps stock fund.

You will note that it is indicated that budget requests amounting to $36,128,000,000 if the recommendations are approved will be reduced to $33,541,000,000, giving a total reduction of $2,586,000,000, and a reduction below the current year level of $1,157,000,000.

It should be emphasized, however, as I view the overall picture that about $1,433,000,000 of the total reduction of $2,586,000,000 will have little or no effect on the military operations of the armed services.

A reduction of $516 million in Army production and procurement has been effected in accordance with the suggestion of the President, because it is not needed for obligation until fiscal 1959.

A reduction of $590 million has been effected by substituting excess funds in stock funds and industrial funds of the Army, Navy and Marine Corps for new funds called for by the budget.

A reduction of about $200 million has been effected as the result of savings and unobligated balances in the Navy Department.

A reduction of $127 million has been effected, on the assumption that the equivalent sum in deutschemarks will be made available as heretofore for the support of our Armed Forces overseas by the German Government.

Those four reductions aggragate $1,433,000,000 leaving a balance in cuts, what I might term real cuts, of about $1,150,000,000 or a little more.

That balance, as I view the picture, is applied roughly: $200 million to the Army, $300 million or perhaps a little more, to the Navy, and $650 million to the Air Force.

Mr. Chairman, so far as I know there is no objection, or very little objection on the part of the Department of Defense, to the four items aggregating $1,433,000,000.

Objection has been raised to a large portion of the $1,150,000,000.

The latter sum percentagewise amounts to an overall cut of just about 3 percent. It is not great from a percentage angle. But, $1 billion is $1 billion after all.

As I have already stated, I personally believe that the cuts that have been made are deeper than they should be, particularly in the light of rising costs to be anticipated in fiscal year 1958.

Without going into detail at this time, I might mention by way of example as far as the Army is concerned, a reduction of $254 million in its request for operation and maintenance, of which $104 million is a deutschemark reduction. I am sure the able gentleman from Michigan [Mr. FORD], chairman of the Army panel, will go into that item at the proper time.

I might also mention with respect to the Navy that there appear to be 2 or 3 cuts which may prove to be too heavy, and which might well justify, if assumptions are not realized, a request for supplemental funds.

I have been particularly concerned about the Air Force, because under the recommendations of the committee the Air Force is to receive $676 million less for 1958 than it received in 1957. The greatest reduction recommended is in respect to aircraft and related procure-

ment in the amount of $354 million, resulting in a reduction as compared with the current fiscal year of over $1 billion. This appropriation deals with planes, with missiles, with spare parts, and with their modernization.

I do not think the recommendation can be justified, particularly as it comes on top of two other heavy Air Force cuts, $100 million in respect to procurement other than aircraft, and $162.8 million in respect to operations and maintenance.

Mr. Chairman, I think that is about all I shall say on the bill at this time.

I repeat that I know we all want to make all possible cuts, provided those cuts can be made safely. I know we all agree that it would be a tragedy to make any cut which would impair the fighting power of the Armed Forces at this critical period in the history of the world. I know also, Mr. Chairman, that there is no Member of this House who would knowingly contribute to that end.

The CHAIRMAN. The gentleman from Massachusetts has consumed 38 minutes.

Mr. MAHON. Mr. Chairman, I yield such time as he may desire to the gentleman from California [Mr. SHEPPARD], Chairman of the Navy Panel.

Mr. SHEPPARD. Mr. Chairman, I want at this time to pay my compliments to my fellow members of the Defense Department Subcommittee with whom I have worked for many years. In particular do I want to express my appreciation to the members of the Navy panel of the subcommittee. They have been most diligent in their efforts in formulating this bill and I am deeply appreciative of their cooperation. I have worked with them for many years and can say that we have a most harmonious relationship and enjoy a relaxation in our work which is made possible only by the confidence which we have in each other.

Mr. Chairman, may I express appreciation for myself and my colleagues on the Navy panel to the former Assistant Secretary of the Navy for financial management, the Honorable William B. Franke. As Assistant Secretary, Mr. Franke was also the Comptroller of the Navy. His consistent attendance at our hearings, his ready availability combined with his intimate and detailed knowledge of the Navy. Its budget and its problems, were valuable assets to us in our deliberations. He has set an example for his successor and for those who occupy similar positions in our Government that is worthy of emulation. We shall miss him as the Comptroller, but look forward to working with him as the Under Secretary of the Navy.

The budget estimates for the Navy as considered by the committee total $10,487,000,000. The committee recommends $9,801,355,000, a reduction of $685,645,000. This is $188,438,000 less than the funds appropriated for fiscal year 1957.

The total reduction of $685,645,000 is made up of three major items: First, $190 million is derived from the transfer of excess funds from the Navy and Marine Corps stock funds and the Naval Industrial Fund to the appropriation for military personnel, Navy; second $400 million has been deleted from major procurement estimates; third, $95,645,000 has been deleted from estimates for annual operating funds and minor procurement. Of course the details of these reductions will be found in the committee report, starting on page 42.

The major procurement reduction of $400 million is comprised of the following: First, $80 million in the request for Marine Corps procurement largely because of unrealistic unobligated balances; second, $120 million from aircraft and related procurement based on savings in future repricing determinations in the various programs and by directing the Navy to make an earlier decision on which of two allweather fighter aircraft—F8U3 or F4H1—it shall place in production; third, a reduction of $120 million in the shipbuilding and conversion request based on a $40 million reduction because of savings in prior year programs as a result of contracts let since the formulation of budget estimates, $60 million because of future savings through repricing determinations, a $2 million reduction in administrative expenses and $18 million through the deletion of the request for the conversion of an existing ship to a seaplane tender, and fourth, a reduction of $80 million in the procurement program for ordnance and ammunition largely because of a large, unrealistic unobligated balance and the fact that reimbursement from the sale of shelf items to MDAP countries are not included in this budget estimate. It is estimated that some $10 million of these funds will be available to apply to the regular ordnance procurement program.

Now may I point out to you some of the items which this bill does include. Funds contained therein will provide for the operation of an active fleet at an approximate level strength of 983 active ships.

Operating aircraft will number approximately 11,800 of which slightly less than 10,000 will be in daily operational status. This strength is approximately equal to fiscal year 1957 but contains a larger number of modern, supersonic aircraft. The bill provides for the procurement for approximately 1,200 aircraft.

The funds will provide for the construction of 19 new ships and 11 major conversions. Included are a nuclear propelled attack carrier of the Forrestal class, 5 guided missile destroyers, 4 nuclear submarines, including 3 with guided missile launching capabilities. Included in the conversions are one attack carrier and a guided missile cruiser.

I would like to comment briefly on two committee actions on the shipbuilding appropriation request. The request of the Navy for the construction of a nuclear-powered attack carrier has been approved. As is stated in the committee report, this carrier will be a major step forward in the operation of combatant surface ships. Due to its unique propulsion the carrier will be able to operate at high speeds for long periods of time. It will represent a tremendous advance in the development of nuclear propulsion and in the striking power of the fleet.

I must emphasize, however, that this must be regarded as a new venture into the field of combatant surface ships. No other such ship has been built. The Navy and the Atomic Energy Commission have been more than successful in the adaptation of nuclear propulsion to submarines. There is no reason to doubt but what they will meet with equal success in the adaptation of this propulsion to surface craft, but until they do this must be regarded as a prototype vessel. Therefore, in approving these funds it should be clearly understood by the Navy and the Congress that the committee is not approving the entire program of the Navy for 5 additional nuclear-powered carriers in the next preceding 5 years. It is the desire of the committee that requests for funds for these carriers be withheld until such time as the ability of the Navy and the shipbuilding industry to produce such an acceptable ship in an efficient and economical manner has been more clearly demonstrated. In other words, let us see where we are going before we waste money trying to get there.

The committee has deleted funds for the conversion of an existing ship to a seaplane tender. The primary purpose of this ship is to tend the large seaplanes, such as the P6M, better known as the Seamaster. This conversion involves a rather radical change in the accommodations within the ship and in its external configuration. As you know, the Navy has experienced some difficulty with the Seamaster program. I am certain that time will prove the feasibility of this plane, but as yet that time has not come. The committee believes that this ship should be stricken from the shipbuilding program until the Navy has more basic data with reference to the large seaplanes, especially the F6M and the other new planes which have been funded in the present budget.

Now let me turn to a problem which has been a concern for many years, the submarine threat to our control of the seas. I wish that every member of the House could have been privileged to have attended the top-secret hearing on our antisubmarine warfare capabilities which the Navy panel had during our deliberations on this bill. Security prevents my divulging the contents of these hearings on the floor of the House, but I can assure you that your Navy and your Defense Department are making rapid strides in containing and destroying this threat to our control of the seas. If I might quote the words of the Chief of Naval Operations as they apply to research and development activities:

> We also are pushing harder our antisubmarine warfare research and development than we otherwise would. That is probably the greatest thing. We are putting everything we can into getting all the scientists and everybody that has an idea to develop antisubmarine warfare technique.

Another major feature of the antisubmarine warfare effort is in the field of ordnance. The program approved by the committee for fiscal year 1958 will provide for the introduction of several new weapons systems to the fleet for antisubmarine warfare. Advances have

been made in antisubmarine warfare ammunition and weapons which can be used against the modern submarines of any potential enemy, and these items are now being introduced into the fleet. This program includes funds for the purchase of 4 new types of torpedoes, 3 of which can be launched from surface vessels. One of these three is also a submarine-launched torpedo. All of these new, high-performance torpedoes have a basic antisubmarine mission. Provision has also been made for the first increment of a program to outfit 50 active fleet destroyers with a new antisubmarine weapons system. This will increase the potential of the active fleet destroyers greatly beyond that which they now enjoy. Funds in this bill also provide for the purchase of four new types of mines. One of these is ready for production and three more for final evaluation. All of these can be used for antisubmarine purposes. Funds in this bill will allow these new mines to be phased into service use.

The ships in the program approved by this bill will greatly improve the Navy's antisubmarine warfare capability. Practically every ship in this program will have a strong antisubmarine warfare capability. The three heavy cruisers being converted will have long-range sonar and antisubmarine weapons. The guided-missile destroyers and submarines will have greatly improved submarine detection and destruction equipment. Of course the carriers, with their modern planes to seek out and destroy submarines, submarine planes, and to assist in hunter-killer operations, remain one of our most valuable assets in this field.

You will be interested in the statement Rear Adm. F. D. Warder, Director of the Underseas Warfare Division, Office of the Chief of Naval Operations made to the Committee, with which I am in accord. He said:

> Today we believe we can meet the challenge of the Soviet submarine fleet in contesting our control of the seas. We are devoting great effort in research and development to insure that we retain this capability for the future.

Such efforts must be continued and can be continued quite adequately within the funds appropriated in this bill.

The position of the Navy in our military posture is unique. Through the Marine Corps it must be prepared to fight on the ground and in amphibious operations. Through Naval aviation it must be prepared to fight in the air and to assist our Air Force when required to do so. Yet, with it all, it must be primarily prepared to maintain our control of the seas.

It must be ready to play its part in the defense of this country and in the projection of our military power, in coordination with the other services, throughout this world wherever it is necessary for the protection of our Nation.

It must be prepared to play its part in the so-called total war—on land, on the sea and in the air. At the same time it must be prepared to maintain its essential position for the so-called small or limited war.

Needless to say it must continue to act in support of our foreign policy as it has been called upon to do on many occasions in the past. The recent actions of the Sixth Fleet in the Mediterranean area continue to clearly demonstrate the capability of the Navy in this respect.

These diversified objectives must be met if the Navy is to portray its proper role in this Nation's defense efforts. It can be met only by a balanced seapower program, capable of employing the latest nuclear, guided missile and other technological developments in successful operation against an enemy no matter where he might be.

No single portion of the Navy's program can be emphasized at the expense of another. All elements must be in proper balance. It is as important that the Navy have the proper number of amphibious craft as it is that they have the proper number of carriers. It is as important that submarines be modern, well equipped and operated in the proper manner as it is that they have the most modern supersonic airplanes flying in the fleet.

Failure to maintain this balanced seapower can only lead to formulation of ineffectual naval power completely incapable of realizing the objectives which must be attained if this Nation and the free world are to continue to exist.

This Free World of which we speak is actually a large oceanic confederation, tied together through lifelines maintained on the oceans of this world. The raw materials which keep the industrial heart of this Nation running move to a large extent over our sea lines of communication. If this country and the Free World are to survive we must maintain supremacy of the seas. It is the primary mission of our Navy to control these seas.

The United States has not been alone in recognizing the need for strong sea power. One of the major changes in the military posture of the various countries of this world has been the unprecedented efforts the Soviet Union has made since World War II to build up its Navy. It stands today as the chief threat to our control of the seas. I believe that the bill before you will provide funds for a Navy capable of maintaining our supremacy of the seas. Future budget submissions must continue to make provisions for such a Navy. I do not think I need to reiterate to you that supremacy of this country on the seas as well as in the air and on the land be maintained.

Mr. Chairman, our Armed Forces exist today primarily as a power for peace.

The first Secretary of Defense, the Honorable James V. Forrestal, once said:

> There can be no question, however, that the maintenance of well balanced and effective sea-air power vested in the United States is the most potent guaranty of world peace that can be provided.

I echo those words to you today. Such power combining, as it does, the capabilities of our Army, Navy, and Air Force all with the blessings of Almighty God, whose desire for peace transcends even ours, combine to give this Nation the greatest guaranty for world peace that can be provided. Such a guaranty will exist only so long as we continue to place our trust in God and do our part by providing military forces capable of maintaining supremacy in the air, on the land and on and under the seas.

Mr. HOFFMAN. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. [After counting.] Fifty-four Members are present, not a quorum. The Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 85]

Addonizio	Fino	Nicholson
Albert	Flynt	O'Brien, N. Y.
Allen, Ill.	Fogarty	O'Neill
Andresen, August H.	Frelinghuysen	Passman
Anfuso	Garmatz	Patterson
Arends	Gordon	Philbin
Ashley	Green, Oreg.	Pilcher
Ayres	Green, Pa.	Pillion

Fascell	Morgan	Wolverton
Feighan	Morrison	Zelenko
	Multer	

Accordingly the Committee rose; and the Speaker pro tempore having resumed the chair, Mr. KEOGH, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill H. R. 7665, and finding itself without a quorum, he had directed the roll to be called, when 286 Members responded to their names, a quorum, and he submitted herewith the names of the absentees to be spread upon the Journal.

The Committee resumed its sitting.

Mr. BALDWIN. Mr. Chairman, will the gentleman yield?

Mr. SHEPPARD. I yield to the gentleman from California.

Mr. BALDWIN. My question involves the Pacific Fleet. On page 56 of the committee report there are four sentences as follows:

> Another major problem of concern to the Committee is the matter of fleet maintenance. As reported by the Pacific and Atlantic Fleet, the material condition of ships in

these range from barely satisfactory to good. The trend of unsatisfactory condition is increasing. Already, the overall condition of amphibious ships in the Pacific Fleet is termed "barely satisfactory."

This implies that the Pacific Fleet is in worse condition than the other fleet. Has the committee taken any steps to see that this fleet will be in a similar state of readiness as the other fleets we have?

Mr. SHEPPARD. Answering the gentleman's question, the first assumption is correct, some elements of the Pacific Fleet are in less desirable condition than is true of the Atlantic Fleet. We have emphasized the fact in our report and in the hearings with the Navy that we want those ships brought into an adequate position as rapidly as possible and it is our understanding they are going to comply.

Mr. BALDWIN. I thank the gentleman.

Mr. WIGGLESWORTH. Mr. Chairman, I yield 45 minutes to the gentleman from Kansas [Mr. SCRIVNER].

Mr. SCRIVNER. Mr. Chairman, at the outset I would like to comment on some of the statements made by our committee chairman, the gentleman from Texas [Mr. MAHON], with whom I first started serving on the Military Appropriations Subcommittee involving the Army and Navy in 1946. Neither he nor I nor any member of this committee makes any claim to knowing everything. We do not claim to see all, we do not claim to know all, and certainly we do not hear all. We do realize that each of us has our own individual responsibility as a Member of the House of Representatives, and particularly as a member of the Committee on Appropriations dealing with funds for the Defense Department.

DUTIES AND RESPONSIBILITIES

We realize, too, that the President and the Secretary of Defense and all the secretaries and the military officers have their duties and responsibilities which we expect them to accept and fulfill just as we have our duties and responsibilities which we ourselves must accept and fulfill. But, one of the fundamental principles upon which this great Republic was founded, a representative republic, was that the control of the military should be under the civilian portion of the Government, especially Congress and for that reason very strong constitutional limitations were placed upon the availability of funds for the military department. We are in a position in between the military and the public. We must see to it that the needs of the defense are fulfilled, and yet we must see to it that the military does not run rampant and that the people, the payers of the taxes, must not be too unnecessarily hurt. That is what is commonly called the control of the purse.

The gentleman from Texas [Mr. MAHON] did point out that military budgets have a habit of going up and up and up. That is true in any administration. And, I can foresee the time, if we continue to develop some of the fields of science that we are now entering, that you may well see in the next few years military defense requests as high as $75 billion and perhaps $100 billion, because a strong national defense is not cheap.

ADMINISTRATION ECONOMY

In spite of the fact that this has been a $36-billion request presented to us, through the President, through the Bureau of the Budget, and through his budget message, had it not been for the great economies which have been achieved in the last 4 years under this administration and under Secretary of Defense Wilson and those working with and under him, you might well have been here today faced with a request for as much as $45 billion. These economies have been recognized by all of the members of the committee and every one of the witnesses who have come before us has received very high praise from them.

LOOKING BACK

Now, we can all look back. I can remember a lot of things, looking back. As a matter of fact, I can recall that in 1954, just about now or maybe a little later in the year, we were considering the first request which came to us under the Republican administration. We did a pretty good job whittling on that. Of course, the funds had been requested in President Truman's last budget request. We cut that quite a few billion dollars, and then we even reduced President Eisenhower's revised request by $1.3 billion. There are some people who are now going pretty strong for economy who at that time wanted to increase that first budget in 1954 from $1.5 billion to $2 billion. And, I can recall last year there was a move on—and it was accomplished—to force upon the Defense Department $900 million for which they had made no request. Then we can look a little further back to the pre-Korea days and remember that the Congress of the United States provided funds for an increase from 48 to a 70-wing Air Force, and the funds for that increase were frozen. Hindsight is always better than foresight, but all the way through I believe the committee has done a very fair and well-reasoned job with the task we had before us.

BILLION DOLLARS

Now, I am going to make a little different presentation than those normally seen in the House. I suppose some of you have seen this stack here, this bundle. Now, if those were $1,000 bills, which they are not, that stack, that little package there, would represent $1 million. That would be 1,000 thousand-dollar bills. That is only $1 million. This stack is about 8 inches high. We are talking about a lot of money, and maybe this will make you understand just a little bit what we are talking about. A billion dollars is one thousand million. That would make a stack of thousand-dollar bills right at 8,000 inches high. That is 666 feet. The Washington Monument, as is shown on this chart, is 555 feet. So just $1 billion would make a stack of thousand-dollar bills 111 feet higher than the Washington Monument. What we are talking about here are 34 stacks of $1,000 bills such as I have described.

If you want to go just a little further in the realm of mathematics, just figure how many $100 E-bonds the taxpayers are going to have to buy just to provide for 1 year's request for national defense.

The next chart shows in a pictorial way a comparison of the breakout of the military forces. You will notice that we have provided for the Air Force $15,801,000,000 and a military strength of 921,400. Next, we have provided for the Navy $9,801,000,000, for a total strength of 875,900 of which 200,000 are United States marines. And third, the Army is provided with $7,239,000,000, with a military strength of just under 1 million, namely: 997,000 men.

BIG BUSINESS

The Department of Defense is the biggest business in all the world. We are now talking funds which you can roughly break it out this way. About one-third of what we are providing goes for military pay and allowances. About one-third goes for what we call hardware. It goes for planes, tanks, guns, missiles, and so forth. The other third goes to operate and maintain the various bases we have in the services, including civilian pay, water, lights, fuel, paint. The very items required to maintain a municipality and a home.

This next chart shows how widespread we are. Throughout the world we are operating over 1,000 bases—1,068 bases ranging all the way from a small radar outpost or an early warning outpost on up to your gigantic bases and depots involving thousands upon thousands of acres. Seven hundred and thirty-three of those bases are here in continental United States. The remainder, 335, are outside.

Here, on this chart, you see what you are getting into in the way of expenditures, here is what the military is operating. With these funds they are operating 48,000 airplanes of various sizes, shapes, and descriptions all the way from a little puddle jumper up to the newest and latest B–52 bombers.

You are paying for the operation of nearly a million—780,000 trucks, cars, tanks, and jeeps—and just under 3,000 ships. And they are not all in the Navy. The Army operates a few vessels themselves.

FUEL COST

Let us take just the sheer cost of fuel. The consumption is tremendous. Every minute of every day there are at least 1,000 military planes in the air upon some kind of a mission. It may be on an alert; it may be on a test flight; it may be on training; it may be on transport; it may be on any one of a number of missions. But every minute of every hour a thousand planes are in the air. One of our newest and latest jet engines, just one of them in 10 minutes consumes more fuel than the average 8-cylinder automobile consumes in a year.

Mr. MAHON. Mr. Chairman, will the gentleman yield?

Mr. SCRIVNER. I must yield to my genial chairman.

Mr. MAHON. The gentleman is making a most unusual and fascinating presentation. In connection with some of the figures the gentleman is giving, I got some figures today which I think are of

UNIVERSITY OF MICHIGAN LIBRARIES

interest about aircraft. Last year the takeoffs and landings of all American aircraft, civilian and military, came to a grand total in excess of 55 million. Considerably more than one-half of the takeoffs and landings were of military aircraft. I thought that might be an interesting contribution to the figures the gentleman gave.

Mr. SCRIVNER. I thank the gentleman for his contribution.

But, to proceed with the subject of fuel cost, the cost of fuel and oil alone is fantastic. That is why we express many times the necessity for cutting down to the barest possible minimum the matter of flying hours. For fuel and oil only for a B–52 the cost is $330 an hour. For the B–36 it is $272. For the B–47 it is $198 an hour. For the new jet tanker it is nearly $250 an hour. These costs are just for fuel and oil alone. For other planes, refer to the table on page 1164, part 1, Department of Defense hearings.

This chart shows the 1956 figures. You can see here that each year we are called upon to procure right out $1 billion worth of fuel; that is, a thousand million dollars' worth of fuel, or 220 million barrels.

I said a minute ago that our military operation is the biggest business in the world. We have built, as you will see from this chart, and we maintain, 51,000 miles of roads and streets. That is enough pavement to take you twice around the world. We have built and we maintain 4,500 miles of runway 150 to 250 feet wide. We operate over 12,000 miles of railroad. That is halfway around the world. The military communications alone cover 191,000 miles, 7⅔ times around the world. Yes; this is big business, and the bigger it is the more opportunity there is for economy and good management.

UTILITIES USED

The electric-light bill alone is a tremendous thing. To operate and maintain and provide power for all of these more than a thousand bases and all of the operations thereon we have consumed over 6 billion kilowatt-hours. The water consumption itself is a billion gallons a day, more than New York City, as shown by this chart before you.

GROCERY BILL

The grocery bill to keep these men fed, and they are the best fed in all the world, is $650 million. This next chart gives you an idea where those millions go. Listen to some of these figures. If the housewives think they have a shopping problem to take care of their families, look at what, among many other items, Uncle Sam has to buy to take care of his 3 million: 386 million pounds of flour, 300 million pounds of beef, 107 million pounds of chicken, 68 million pounds of frozen vegetables, 60 million pounds of coffee, and it is all good to the last drop, 24 million pounds of frozen fruits, and 12 million pounds of frozen juices.

The defense business is big business. It is the biggest business in all of the world.

On the corner of the committee table is a stack of 6 volumes of hearings, 7,000 pages. As the gentleman from Texas [Mr. MAHON] told you a while ago, we started our hearings early in January starting at 10 o'clock in the morning and running until 4:30 and 5 o'clock every evening up to about 10 days ago. We had hundreds of military and civilian witnesses before us. But, almost half of the testimony is not printed and properly not printed. As a matter of fact, in these 7,000 pages there is far more information than we should ever be called upon to print. It certainly would be most helpful for us if the Soviet legislative body would hold hearings and then print them for us to read so that we could know everything that they plan to do just as we put the information here in our hearings. It would be helpful if our news reporters could listen to their debates, just as representatives of the Russian press can do here. We have cut it down some for security reasons. However, there is still too much printed.

Of course, I am sure that all of the Members here on the floor and elsewhere realize that it is never pleasant for a Member of the House to find himself at variance in his views with his President, particularly when that President is of his own political party. But, the conclusions I have reached on this bill after these months of hearings and after much discussion I have reached just as honestly and conscientiously as he arrived at his conclusions.

As much as I admire President Eisenhower, I do not believe, I cannot believe, that he has any greater love of country or any greater concern over its security than I do.

All of the conclusions reached by this committee were not unanimous. I had differing views from some of the other Members. But, after we sat down and argued back and forth, and finally came to a conclusion, I approved of the report which the staff and the members of the committee have prepared. It is 100 pages long and one of the most complete and concise reports that this committee has ever furnished to the House of Representatives. We have put our finger on each one of the reductions which we made and the reasons why they were made. I differed, for instance, with the gentleman from Texas. He was stressing the fact that there were $71 billion or $76 billion available for expenditures as soon as this bill is passed. Expenditure is not the important item. It is the amount of obligations and unobligated funds. If you will look at page 8, you will see what I am talking about in the way of unobligated funds. In other words, it is money for which there has been no contract made. Those carryover unobligated balances since the Korean war have been big. They have been cut down and cut down. There is about a billion dollars' decrease in this unobligated balance, or there will be by the end of 1958. We felt that it should be still smaller because they will have $10 billion; that is, ten thousand million dollars of unobligated funds with which they can do many things if they find themselves running short.

A-POWERED CARRIER

Personally I felt that, in view of the glowing predictions of the capabilities of the admittedly experimental—page 55, report—A-powered carrier, it might be well if the Navy would forego completion of the conventional powered carrier authorized a year ago, for which the blueprints are not yet complete and use those funds if they wanted an A-carrier. Personally, I would rather delay construction a year or so and have the reputedly superlative atom-powered carrier which would be with the fleet for 30 years, rather than an already obsolete though new conventional powered carrier and at the same time save two hundred and fifty to three hundred million dollars. My view did not prevail. The committee provided funds for the A-powered carrier. In fact, I question whether the atom-powered carrier is worth its eventual cost of half a billion dollars.

Since I have been on the Navy Appropriations Subcommittee since 1946, I have watched this carrier program grow. I remember when the first Key West conference was called. That was at a time when there was some discussion about this first big heavy experimental carrier. They said it was going to be a prototype. The Key West conference provided for it. I can remember the then Air Force Chief of Staff, upon his return from Key West, being asked if he had given his approval to the carrier. He said, "No, I was told the Navy would have it." And before that first carrier was even completed, they talked about six carriers. Then one of the Secretaries of the Navy some years ago said that there was going to be 10, that they wanted 1 new carrier each year. Now their goal is 15 supercarriers. In view of that, perhaps, you can understand why I predicted a few moments ago that this defense cost could very well run to $75 billion or $100 billion a year in a few years time.

I have felt that the Navy should do still more on antisubmarine warfare, in view of the constantly repeated story they have been telling us for years about how many more submarines the Russians have than we.

NO AIR FORCE PLANE REDUCTION

I should stress emphatically that there has been no reduction in the funds for Air Force planes. Somebody must have given the President some erroneous advice.

But just to show you that we do not take these things blindly, we do not accept the word of these military men as gospel. They are men of honor. They tell us the truth, but they do not always tell all the truth. In other words, if you get the right question they will give you the honest answer, but they volunteer nothing.

JET TANKERS

The Air Force did not make all the efforts that they should have converting some of our planes, of which we had a great number, into satisfactory tankers, instead of asking for a fleet of new jet tankers. In connection with those jet tankers I have every reason to believe that they were really procured because of the desire on the part of the Air Force to have a fleet of jet transports. On the last page of the Air Force hearings you

will find a statement that will bear out some of the reasons why I believe that that is what was being done. We found that the Navy has done a very good job of converting from their conventional types to fuelers.

The Air Force could have done that and have saved quite a few hundred million dollars.

As a matter of fact they are now experimenting with transforming a B–50, according to a recent issue of Air Force Times.

SPARES

The committee, and myself particularly, have been quite critical for a number of years about the Air Force program of procurement and airplane spares and spare parts. It is hard to control, but now we are coming into a new field of spares and spare parts, guided missiles, which will be even more difficult, but for a period of years, as a result of the constant hammering by this committee, there has been improvement made in the spare part procurement program. There have been at least $5½ billion saved in this one program as a result of this hammering by the committee. More must be done. But even now they have more than $9 billion worth of spare parts on hand, and this provides for the procurement of quite a few more. The ultimate disposal of those spare parts runs into a great deal of money. Recently the Air Force disposed of about $60 million worth of J–47's which they overprocured. That is only a part of the overprocurement. As a matter of fact, as it relates to this one item in the budget, we could have very well been justified in making a further reduction right at $125 million and still left this program at the level that they had in 1957.

SERVICE RIVALRY

One point that the gentleman from Texas [Mr. MAHON] made that I agree with: As the hearings proceeded it became quite evident to us that all branches of the service felt that it and only it had the sole responsibility of safeguarding this country, and that it should have everything in its hands necessary to fight and win any war any time any place, whether it was an all-out atomic war or just a small brush fire. There must be a complete restudy of the roles and missions of the services; and the cardinal principle must be that all our military forces are fighting under one flag and that they have just one goal; it is a joint goal, shared, that is, the security of this republic.

There is enough glory, there is enough responsibility, and there is enough work to be shared and spread among all the services, and there is not any one service paramount to the other, in my opinion; they are all needed, and the interservice rivalry must be replaced by interservice teamwork.

DEFENSE STUDY NEEDED

As I said, there ought to be a new study made to clearly define the roles and missions as they now exist and then I feel that there should be a realistic test made as to some of the claims which each of the services is making.

When the Navy comes in you get their presentation and you just could not quite believe they knew there was such a thing as the Air Force; and when the Air Force comes in you can hardly believe that they understand there is a United States Navy. Then the Army comes in and they believe that both the Navy and the Air Force are purely supporting forces for the Army.

At any rate, some of the claims on all sides are overoptimistic, and now is the time to find out and not later. You ought to ask some questions like this: How effective is our Navy against submarines?

How invulnerable is a carrier against detection and destruction by airplanes?

How good are our bombers and our raiders?

Can a carrier task force be located and kept under surveillance and finally destroyed?

Both the Air Force and the Navy cannot be right in their contentions.

Mr. VORYS. Mr. Chairman, will the gentleman yield?

Mr. SCRIVNER. I yield to the gentleman.

Mr. VORYS. Is the gentleman permitted to give us an outline of what the answers are?

Mr. SCRIVNER. I have a suggestion here. It is not the ultimate answer, of course, but some of these suggestions I am throwing out so that some place, somewhere maybe somebody will pick up the ball and run with it.

Mr. McGREGOR. Mr. Chairman, will the gentleman yield for a question?

Mr. SCRIVNER. I shall be pleased to.

Mr. McGREGOR. The gentleman is making a splendid statement. I am wondering if the RECORD tomorrow will show the various charts the gentleman referred to?

Mr. SCRIVNER. Only as I have explained them.

The Defense Department or perhaps some outsiders ought to do this—ought to sit down and make some studies. Now, we are talking about A–bombs and H–bombs, we are talking about megaton yield, thousands of times greater than the yield of TNT. One plane today can carry more potential death and destruction by 1 drop in 1 bomb than all of the planes carried in all of the sorties during all of World War II in both the Pacific and the Atlantic. These bombs are expensive. They are explosive, of course. Somebody ought to tell us how much it is going to cost to deliver a megaton bomb, whether it is an atom bomb or a hydrogen bomb, by missile, by bomber, by carrier, by submarine. Somewhere, some place, there ought to be an answer as to which is the best and the most economical method.

You know and I know that all of our services cannot be kept perpetually at peak effort to fight an atomic war all the time, one which may never come; and the plans should be more clearly made for some possible smaller wars. It should be quite clear that one small war calls for entirely different plans and programs than the big ones. Yet the roles and missions are entirely different in these different emergencies. They ought to be more closely arrayed with the strategic, the tactical and defense plans in connection with the carrying out of some of the ideas expressed by the chairman of the committee, the gentleman from Texas [Mr. MAHON].

NEW DEFENSE APPROACH

The gentleman from Texas herein has referred to the problems of our present military organization in the light of modern weapons development. I agree almost completely with what he has said in that the present basic concepts behind our ground, sea, and air division of military responsibility is no longer valid. Men at all levels in the military services recognize this fact. Military science is somewhat confused because the old concepts on which the present military organization, and strategy, have been based are changing as a result of more modern weapons, particularly in the atomic missiles and to a certain extent the aircraft fields.

I am convinced that vast sums can be saved if our concepts of military organization are realined to take the best advantage of atomic armed missiles, aircraft, and other weapons and by eliminating the previously mentioned present rivalries and tensions that exist between the services as now constituted regarding the roles and missions that they are to carry out, and the weapons which they are to use. If this is not done, vast sums will be wasted.

To accomplish this end it will be necessary to realine the 3 services into 3 basic commands without regard for the present Army, Navy, Air Force approach to the problem. These three basic commands, I feel, should be strategic, tactical, and defense. The present Department of the Army, Navy, and Air Force as they are now constituted would have to be given the job of support only as their basic assignment, and this support, would of course, be in the areas which they are equipped to supply. However, all three services, as presently constituted, would be involved in each major command insofar as they have a basic contribution to make somewhat as the Air Defense Command now operates. Of course, the strategic command would be primarily an Air Force operation, but it would include Navy carrier task forces that might have a strategic capability. The strategic forces would of course also include the long-range missile capabilities of any of the services including the capability of launching missiles from submarines offshore. The tactical force would be predominantly Army, but would include close air support, short range tactical missiles, the airlift service transport capability and the job of keeping shipping lanes open to the areas where such tactical forces may be involved. While I say such a tactical force would be predominantly Army, it would, of course, include sizable portions of all three services as presently constituted including the Marine Corps. The defense force would, of course, be primarily an air and missile defense effort. This air and missile defense command would be predominantly air, for the present, but would naturally have to include Army antiaircraft and antimissile forces,

UNIVERSITY OF MICHIGAN LIBRARIES

much as now set up. It would also include those portions of the Navy forces involved in offshore patrol and close-in antisubmarine defense. It would eventually involve the development of an antiballistic missile defense capability.

There is nothing too radical in these ideas. Much has been written in recent years along these lines and the services themselves are more or less setting up their forces along such lines. The element that is radical in this suggestion is that the present Joint Chiefs of Staff structure and functions would, of necessity, be abolished and rightly so, because at the present time the Joint Chiefs appear to be operating more as independent representatives of the individual services and their advocates of the service points of view to see which can get the biggest slice of the money and manpower, rather than to develop grand defense strategy.

Mr. Chairman, the missile program is now the popular horse to ride. Jet bombers are costly, carriers are costly, and each service has an idea of its own as to its particular popular weapon. They want everything new and do not like to give up everything old. That is the reason we have a lot of stuff in depots and have saved some money in operation and maintenance by disposing of some of this material.

COST FOR NEXT 10 YEARS

Somebody ought to sit down and work up by next January when we return a compilation of figures showing what the ultimate cost of all of these very popular and necessary programs are going to be over the next 10-year period. Secretary Humphrey made a statement that something could happen which would make your hair curl. When you see some of these figures for a 10-year program I would expect your hair to sizzle. It would run into countless millions. I do not know how many hundreds of billions it would run into, but somebody should find out and tell us so that we can find out where we are going.

Mr. GROSS. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. [After counting.] Sixty-nine Members are present, not a quorum. The Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 86]

Addonizio	Bray	Elliott
Albert	Buckley	Engle
Allen, Ill.	Burdick	Fallon
Anderson, Mont.	Byrne, Pa.	Farbstein
Andresen, August H.	Carnahan	Feighan
Anfuso	Carrigg	Fino
Arends	Celler	Flynt

McCulloch	Robsion, Ky.	Whitener
McGovern	Rodino	Williams, Miss.
McIntire	Sadlak	Wilson, Ind.
Mason	St. George	Wolverton
May	Saylor	Zelenko
Meader	Scherer	
Miller, Md.	Schwengel	

Accordingly the Committee rose; and Mr. MCCORMACK having resumed the chair as Speaker pro tempore, Mr. MILLS, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill H. R. 7665, the Department of Defense appropriation bill, 1958, and finding itself without a quorum, he caused the roll to be called, when 280 Members responded to their names, disclosing that a quorum was present, and he submitted herewith a list of the absentees for printing in the Journal.

The Committee resumed its sitting.

The CHAIRMAN. The gentleman from Kansas [Mr. SCRIVNER] will resume.

SAVINGS

Mr. SCRIVNER. Mr. Chairman, as I pointed out earlier, the Defense Establishment is the biggest business in the world. Secretary Wilson has proven his ability as a businessman and as Secretary of Defense; many improvements have been made under his direction. Hundreds of millions of dollars have been saved. Economy and efficiency in many instances have replaced waste and duplication, but more must be done. However, no matter how good the top directors may be, results must be obtained down where the expense is incurred. Few, if any, of our regular officers have had business training. Entering the service as they do at an early age, they have had no experience in business management. None of the academies can furnish this. Neither can the services.

ECONOMY AT BASE LEVEL

As pointed out in the report, economy and self-restraint must start at the base level if costs of operating our far-flung bases is ever to be reduced.

GREENBACK POULTICE

Many references have been made during the hearings to the difficulty of keeping men in the service. Nearly every remedy suggested was a greenback poultice—more pay. That seemed to be the only answer. The reports that we have indicate that it is not the lack of pay that is the big reason for leaving the service. Unsatisfactory family life, frequent changes of station, desire for more education, all were more often given as reasons than pay. After many years of committee criticism some progress has been made in stabilizing assignments. Much more must be done.

Here again I find myself in disagreement with the majority of the committee, because I personally do not think too much of the suggestions made as they relate to the so-called Cordiner report.

RECRUITER

Work and effort is the answer to the manpower problem. What can be done in the way of recruiting is well demonstrated by a recent new article from Fort Riley, Kans., showing that M. Sgt. George R. Patton had reenlisted 667 men since 1954. A reasonable estimate of the savings to Uncle Sam just by his action alone amounts to better than $2 million; and what Sergeant Patton has done others most certainly can.

ENGLAND CUTS BACK

During the hearings headlines were carried of England's proposed military reductions for reasons of economy, a move which seemed to be generally approved as necessary. We need economy too, so why should not we make some reductions? Our defense program does have a tremendous impact on our taxpayers, too; and inflation proves as great a power in wrecking this Nation as Russia.

Prime Minister MacMillan of England, a nation right under the threat of Soviet guns, planes, and missiles, said:

Insurance is a good thing, but overinsurance is debilitating.

So England is going to cut their fighter force; they are going to reduce the size of their army; they are going to end conscription. They are going to missiles, most of which, I assume, Uncle Sam will furnish.

Yet, when we suggest a modest reduction of $1,200,000,000 which it actually is, we are "wrecking the national defense." I do not believe it. And despite what some may say, our lead is not lost. Certainly, Russia has improved in many lines, but the only way to go when you are down is up, and they were down; yet although we are right at the top we still continue to climb.

UNITED STATES POWER

Our Strategic Air Force has been, it is now, and it will continue to be with these funds, capable of striking and destroying targets anywhere in the world. When you realize that one of today's bombers can carry more potential destruction on one trip than was carried by all of our planes on all of their trips in World War II, as I have mentioned previously, in both the Atlantic and Pacific, you can see we are well and perhaps overly insured at the cost of a very high premium.

Mr. Chairman, today we have and this bill will continue, the biggest and best Air Force in the world; it provides the biggest and best Navy in the world. It gives us the best, though not the biggest Army in the world. Our troops are, on the whole, the best paid, the best dressed, the best equipped, the best entertained, the best housed, the best cared for troops in all the world; and the funds provided by this bill as reported by the committee will maintain that supremacy.

Mr. MAHON. Mr. Chairman, I ask that our distinguished colleague, the gentleman from Arkansas [Mr. NORRELL], may extend his remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. NORRELL. Mr. Chairman, I wish to relate for the information of my distinguished colleagues in the House both the history of the establishment of the Army and Navy General Hospital at Hot Springs, Ark., and the reasons why, in my judgment, the recent proposals of the Republican administration and the Department of Defense to close this exceptionally fine hospital are unwise from the viewpoint of national defense, unsound from the viewpoint of the national economy, and wholly unjustified in depriving great numbers of military-service personnel and their dependents, in active and retired status as well as veterans of all wars, of the outstanding medical facilities available for the specialized treatment of victims of such crippling diseases as polio and arthritis.

I want to urge the Members of Congress to review the facts, to evaluate the position taken by the Department of Defense, and to determine whether this legislative body is willing to be guided by its long experience in the knowledge of our fundamental responsibility to provide hospital and medical care for military personnel and their dependents—whether this can be accomplished adequately, readily, and economically, both now and in the event of a national emergency, through the continued operation and use of this exceptional hospital at Hot Springs, Ark.

The Army and Navy General Hospital has the distinction of being the only service hospital established by a special act of the Congress. It was in 1882 that Senator John A. Logan, of Illinois, introduced a bill in the Senate authorizing an appropriation of $100,000 to build a 30-bed hospital at Hot Springs, Ark.

Senator Logan had served as General in the Union Army under General Grant. During his prominent service in the United States Senate he became seriously ill and went to Hot Springs for medical care. The restoration of his health, his intimate knowledge of the beneficial use of the thermal waters in many other cases, and the naturally healthful and beautiful environment of the site of Hot Springs led to the decision to introduce the bill. Within 30 days the bill passed the Senate, and was thereafter passed quickly by the House and approved by President Chester A. Arthur. Subsequently, it was President William McKinley who issued the executive order to the Surgeon General to admit honorably discharged soldiers of the Civil and Spanish-American Wars to the Army and Navy Hospital at Hot Springs, when the capacity of the hospital was not required by active-duty personnel.

The record of service of the hospital over a period of 4 decades was unquestionable. In 1929 the late Senator Thaddeus Caraway introduced a bill to rebuild and enlarge the Army and Navy Hospital. This proposal was carried in a House measure which increased the number of beds from 169 to 425, and the bill passed both legislative bodies and was approved by former President Herbert Hoover.

At the outbreak of World War II, the hospital was filled beyond its capacity, with more than a thousand patients. There were 2,000 Veterans' Administration applications for hospitalization on the waiting list. Thus in 1942 the Department of the Army purchased an adjacent 466-room hotel, later referred to as the Eastman Annex, to provide additional facilities.

In 1943 the Surgeon General designated the Army and Navy Hospital as 1 of 2 arthritic centers. The treatment and care provided was so successful that thousands of American military men afflicted with rheumatic diseases were returned to useful life.

The hospital was staffed during the war years by such famous arthritis specialists as Dr. Phillip Hinch, who received a Nobel award for his work with cortisone, and who is the rheumatologist with the Mayo Foundation. Dr. Hinch and the other top-ranking medical men from civilian life set up the techniques of physical therapy and medical procedures in use at the Army and Navy Hospital. At the end of the war, when these men returned to civilian practice, a regular Army officer carried on their work as a rheumatologist and served as chief of medicine at the Hospital until 1952. Treatment for arthritic, rheumatic, and polio patients continued to be the primary function of the hospital: 1,100 of these patients in 1947 and in 1948. The physical medicine department of the institution kept up an average of a thousand treatments each month during those years, accounting for an amazingly high record of men returned to useful life.

The thermal waters that are piped into the hospital from the Government-owned springs are an important part of the treatment, just as thermal baths mechanically heated are used in treatment at the Mayo Foundation. Rheumatologists point out that while remarkable strides have been made in the treatment of arthritis by the use of cortisone and ACTH and many other medicines, there is no question that hot thermal baths are important in its treatment.

The city of Hot Springs itself is an important factor in the hospital's treatment of its more seriously affected patients. Unique among American cities, it accommodates wheel chair patients with ramps instead of curbs at the street intersections. Special sections in its theaters are reserved for wheel chair patients. Waiters, cab drivers—every resident—accepts the wheel chair patient as one of hundreds of thousands of visitors annually who come to Hot Springs seeking relief from the excruciating pain and limitations of arthritis and polio.

Medical authorities agree that this attitude in the city is a psychological factor of inestimable value in the treatment provided. Patients who usually cannot move about are able to go from the Army and Navy Hospital into the life of a busy city, and are thus immeasurably encouraged.

The physical plant of the hospital is as modern as any in the world, and has been widely known as one of America's finest medical institutions. The present main building, a nine-story reinforced concrete structure veneered with light face brick and trimmed with limestone, was completed in 1933. It contains 200,000 square feet of floor space. The entire post, located on a 28-acre landscaped slope of Hot Springs Mountain, has a total of 59 buildings. The Department of the Army has spent millions of dollars in making the plant up to date in every respect, and only several years ago added air conditioning. As an example, two stainless steel Hubbard tanks were installed for nonambulatory patients, including burn cases, and these provide a mechanical massage with moving water. There is a $100,000 therapeutics pool, specially equipped with an electric lift that permits polio and acute arthritic patients to be lowered into deep water for aiding exercise of wasted muscles. No other Army hospital has such a pool for treatment.

At the height of its capacity operation in World War II and the late 1940's, the hospital had a patient load in excess of the 600 men for which it was designed, and a staff of more than 60 physicians, including outstanding specialists in half a dozen fields. During its long operation for the Armed Forces, important divisions of the hospital were the general medicine section, where many repatriated prisoners of the Japanese were treated for malaria and other illnesses incurred in distant countries during the war; the neuropsychiatry section; a special cardiovascular section for heart patients; a women's section for women members of the Armed Forces; an orthopedic section in charge of all polio treatment; a radiology section specializing in X-ray an radium therapy; and laboratory, dental, pharmaceutical and similar services. In a single year, more than 11,000 patients were treated with radium or X-ray for cancer, tumors or spinal arthritis; and the Army and Navy Hospital is 1 of only 3 United States Army hospitals with facilities for such treatment.

Among the many citizens of the city of Hot Springs who deplore the Army's proposal to close the hospital, none are more deeply concerned than the more than 400 families of retired Army men who have chosen Hot Springs as their permanent home. Many settled in Hot Springs in order to receive needed treatment for service-connected disabilities as outpatients of the hospital.

In January of 1955 the Defense Department ordered the Army and Navy Hospital to be placed on a stand-by basis by March 1, and closed on June 30 of that year. In spite of the fact that the House committee had said in its report on the appropriation bill that "It is the sense of the committee that the Murphy General Hospital in Waltham, Mass., and the Army-Navy Hospital in Hot Springs, Ark., should remain open and continue to be operated and therefore recommends the additional funds in the amount of $1,700,000 to be applied

UNIVERSITY OF MICHIGAN LIBRARIES

to the purpose" and that the Senate committee had included language in the bill, concurred in by the House, that both Murphy and Army-Navy shall be continued in operation, the Department proceeded, in defiance of the expressed will of Congress, to close the hospital. No sooner had it completed the closing in late June, after denuding the plant of all movable equipment and transferring the personnel, at great expense to the Government, than it announced its reopening in September. The Army-Navy Hospital was reopened in September with only a skeleton staff.

After 4 months of operation the Department again in January of 1956 announced the closing of the Army-Navy Hospital by September of that year. Before the announced intention of the Department again to close the hospital was accomplished, Congress passed the Armed Forces medical care bill which became Public Law No. 569 of the 84th Congress. In its report accompanying that bill the House Committee on Armed Services said:

> The proposed legislation does not contemplate any new expansion of the medical facilities for the uniformed services; nor, on the other hand, does it contemplate any reduction in the medical facilities of the uniformed services that are now in existence or planned.

The Congress again, in the Department's appropriation for fiscal year 1957 expressed its will that the two hospitals be continued by making the same provisions for their operation as for the previous year. In the report of the House committee, concern was expressed over the apparent attitude of the Department to ignore the directive of Congress stating:

> While the Army-Navy Hospital was reopened no effort was made to operate it as much more than a dispensary. Only a token number of doctors were assigned and due to this it was deemed that only a limited number of patients could be sent to the hospital. This resulted in an average patient load of 40 or less. The committee feels that a wholehearted effort should be made to operate the hospital in a proper manner that will be to the good of the Army and its personnel.

Since the closing of the hospital at Hot Springs and its reopening within 3 months on a dispensary basis, urgent appeals have come to me from time to time from service personnel and their dependents for treatment or surgery at the Army-Navy Hospital not available there due to the Department's failure to equip and adequately staff the hospital. Those patients are entitled to treatment, under the law, and have to be sent to other hospitals at greater distances. We have not had full patient loads at the Army-Navy Hospital, not because of a lack of patients, but because of the Department's actions in diverting patients to other hospitals.

Army-Navy is the only existing major service hospital in a geographically central location, the others all being in the East, the West and the Far West of the Nation, where they are more vulnerable to attack. The other such hospitals are:

Approximate distance from Hot Springs (central United States)

	Miles
At Army posts:	
Madigan, Ft. Lewis (Tacoma) Wash.	2,400
Beaumont, Ft. Bliss (El Paso) Tex.	900
Brooke, Ft. Sam Houston (San Antonio) Tex.	500
Letterman, Presidio of San Francisco, Calif.	2,100
Not at Army posts:	
Valley Forge, Phoenixville, Pa.	1,200
Fitzsimons, Denver, Colo.	1,000
Walter Reed, Washington, D. C.	1,100
Murphy General, Boston, Mass.	1,500

When the United States back in the 1880's had a total population of 50 million people we had a need for a 30-patient Army-Navy Hospital at Hot Springs. During four major conflicts since that time we have had great need for it, and it has been known and loved by thousands of patients from the lowliest private to and including Gen. John J. Pershing who was a patient there on numerous occasions. At least one of our former Presidents has been there for treatment from time to time. We presently have a population of 170 million and many many thousands of service men, active and retired, with dependents. In the present state of world conditions, no hope is now to be seen that we shall not continue to need the services which the Army-Navy Hospital affords. We cannot afford the closing of this superb institution, in its unequaled location sheltered from enemy attack, and potentially adequate for the finest treatment medical science can provide for the men and women who have borne, and who are bearing, the burden of our Nation's defense. The Congress created this hospital. There is and there will remain a continuing need for its specialized facilities for rheumatic and other diseases, and I feel that this Congress will wisely insist upon the continued operation of the Army-Navy hospital by the administrative branch.

Mr. Chairman, I wish to include in the RECORD certain letters attesting the opposition of individuals and organizations to the proposal of the Department of Defense to close the Army-Navy hospital, one of which is from Hon. CHARLES E. BENNETT, Member of the House from the Second Congressional District of Florida:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D. C., November 6, 1953.

President DWIGHT D. EISENHOWER,
The White House,
Washington, D. C.

DEAR MR. PRESIDENT: It has come to my attention that there is a proposal to close the Army and Navy General Hospital at Hot Springs, Ark. As you undoubtedly know, this hospital is very modern and up to date and takes advantage of the presence of unlimited quantities of naturally hot water in the treatment of polio, arthritis, etc. The institution has been in existence a great many years, and I understand that there is ample room for its expansion through the utilization of the Eastman Annex, an existing adjacent structure which was, and is, owned by the Government and which was used for this purpose during the peak loads of World War II. I was personally a patient in this hospital. I was treated there for polio for about a year and a half near the close of World War II. I believe that the institution is a very fine one, modern and well equipped. In addition, the spirit of the community is conducive to the recovery of patients who need assistance in walking. The community has provided ramps at all the street intersections and is very hospitable and understanding to men in the service, and particularly to those with difficulties. Also, the immediate proximity of the Hot Springs National Park and other recreational facilities make the town a delightful place for convalescence.

It would seem to me to be very unwise to close this institution, and it would be difficult for me to see how any economy could be effected by such a move. I sincerely hope that the matter will be reconsidered and that the hospital can be retained.

With kindest regards, I am,

Sincerely,

CHARLES E. BENNETT,
Member of Congress.

NOVEMBER 5, 1953.

Senator RICHARD B. RUSSELL,
Senate Office Building,
Washington, D. C.

THE HONORABLE RICHARD B. RUSSELL: There are two suggestions which I would like to bring to your attention in the interest of economy and good government. First, is there any need for the various branches of the Government to have their own medical service, such as the Army, the Navy, Coast Guard (maritime seamen), veterans, and now the Air Force. It is believed that hospitals could be strategically located to take care of the needs of all branches of the Government, thereby having better talent and better operation at considerable less cost. Certain hospitals could specialize thereby giving all personnel better treatment.

Second, the closing of the Army and Navy Hospital at Hot Springs, Ark., is quite a blow to service personnel, particularly those retired and the community of Hot Springs.

In order to acquaint you with the value this hospital has been to me, I will give you a brief history of my case. I developed arthritis in line of duty and was sent here for treatment in 1947 by the military service. It gave me a great deal of relief and I returned to duty. Sea duty aggravated my arthritic condition so I was retired from military service in 1948.

Since that time, I have been going to Hot Springs semi-annually for the baths and treatment. The excruciating pains are greatly relieved during the treatment and baths. However, as time passes they gradually build up, so that at the end of 6 months, it is very necessary that I return for treatment. It is suggested that the Army and Navy Hospital be kept operating and specialize in treating of arthritic and polio patients as they are extremely well equipped for this purpose.

Your consideration and action in the above suggestions will be greatly aprpeciated.

Respectfully yours,

Lt. Comdr. J. S. LOEWUS,
United States Coast Guard, Retired.

NOVEMBER 5, 1953.

The Honorable ROBERT S. KERR,
Senate Office Building,
Washington, D. C.

DEAR SENATOR: I am writing this letter as a former resident of Oklahoma City, having married an Oklahoma City girl and all my in-laws still reside in Oklahoma. I bought a home and lived in Oklahoma City from 1948 to 1953. For economical reasons I sold my home and moved to Hot Springs, so that I would be near the Army and Navy hosiptal, which offers me the treatments I needed for arthritis.

Having moved to Hot Springs and being here a month, our Defense Department suddenly decided to close the Army and Navy

hospital which serves all active and retired personnel in the great Southwest. It being the only hospital specializing in arthritic and polio patients, the Defense Department, up until the present time, sent all patients with these conditions to this great hospital.

If this hospital is closed, it would be a great blow to the Defense Department as well as the great Southwest, which your State of Oklahoma could and would be affected by all the retired and active personnel in this great Southwest.

I am writing this letter as a former resident of Oklahoma and now as a retired Air Force major that came here to receive the treatments offered.

Yours truly,

MAJ. ALFRED S. CARTER,
Army Air Force, Retired.

HOT SPRINGS, ARK., *November 4, 1953.*
Congressman W. F. NORRELL

DEAR SIR: I am writing to you in behalf of the Army and Navy Hospital in Hot Springs.

I have been a sufferer of arthritis for 34 years, since I was a child. Have been in hospitals in Alabama, Tennessee and Georgia. In 1938 my mother wrote to President Roosevelt about getting me in Warm Springs, Ga. He advised her to bring me to Hot Springs, Ark., which she did, a helpless cripple.

After 6 weeks I could walk without my crutches. I came here for the baths each year and have since been fortunate enough to marry a retired army man. We now own our little three-room home in Hot Springs, and for the first time in my life I live a happy, normal life. The thermal baths and treatment I get at the Army and Navy Hospital have kept me from being an invalid for life. If the hospital is closed we will have to move near another Government hospital and it will be impossible for me to come back to Hot Springs and pay for the baths on our retired pay.

So you can understand what this hospital means to me. It's the difference between years of more suffering or being able to stay here in Hot Springs where I can get the benefit of the baths and be free from all pain. The doctors at the Army and Navy will take the brace off my foot and leg next week and I will be able to walk without it. I'm only praying that if I do have to give up my home and these curative waters here in Hot Springs that I won't have to have the brace put back on.

Respectfully yours,

Mrs. HUGH GROVE.

CRANSTON, R. I., *November 4, 1953.*
Hon. JOHN FOGARTY,
Representative from Rhode Island,
House Office Building,
Washington, D. C.

DEAR REPRESENTATIVE FOGARTY: I was shocked when word reached me that the Defense Department had ordered the Army and Navy General Hospital, Hot Springs, Ark., closed and placed on a standby basis as of March 1, 1954.

This great medical institution is distinctly equipped to aid our service personnel in recovering from such crippling diseases as polio and arthritis and its personnel treated represents 48 States and Alaska.

The facilities of this hospital greatly aided me in the recovery from polio.

Therefore, I request and urge you to take the necessary action to see that the doors of this great humanitarian institution remain open so that others may receive the services as I have.

Respectfully,

ROBERT W. BATES,
President, Army and Navy Polio Veterans' Association.

OCTOBER 23, 1953.
The PRESIDENT,
The White House,
Washington, D. C.

Mr. PRESIDENT: We, members of the newly organized group to be known as the Army and Navy Polio Veterans Association, now holding our first convention at Hot Springs National Park, Ark., today passed a resolution of deep despair and concern, after reading press releases stating that this distinctively equipped institution, known as the Army and Navy General Hospital, which so greatly benefited us, would close its doors to all future service personnel after October 31 and discontinue all service after March 1, 1954.

Our resolution sets forth:

"Whereas no other military or veterans hospital is supplied with natural hot water such as is found available here; and

"Whereas we who have banded ourselves together in this nationwide organization, which currently numbers approximately 275 members representing the 48 States and Alaska, received results here from both the hydro and physical therapy treatments, and pray others in the service will not be denied these treatments in this ideal setting where all the main sidewalks and public buildings are constructed with wheelchair ramps to ease travel and to facilitate the individual patient's ability to transport himself from place to place without the aid of others, thus making the patient more self-reliant and self-sufficient, and where all public service people and citizens in general have been accustomed for generations to look out for the welfare of the physically handicapped without fanfare; and

"Whereas we feel that this town and hospital are peculiarly equipped for the handling of victims of infantile paralysis, arthritis and other rheumatic diseases, due to years of service to those crippled by said ailments; and

"Whereas because of the sympathetic understanding of this community and its citizens definitely contributing to the uplifted morale of the individual patients, which helps to hasten their recovery;

"Therefore our group humbly appeals to you to see that every effort be made to keep this great humanitarian institution open."

Respectfully,

ARMY AND NAVY POLIO VETERANS ASSOCIATION,
By ROBERT W. BATES, *President.*

THE USE OF RADIOACTIVE SPRING WATER AND ITS EFFECTS AS OBSERVED AT HOT SPRINGS, ARK.

(By Francis J. Scully, M. D.)

(Abstract of a paper read before the 58th annual meeting of the Arkansas Medical Society in Hot Springs, Ark., May 4, 1933)

The effect of the radioactive properties of natural spring waters has long been a subject of great interest. Natural spring waters have been used since primitive times in the treatment of disease, and judging from the results that are obtained, there can be no doubt as to their value as a curative agent. Whether the radioactive properties of the water is the essential factor, or whether the results are due to the proper application of the waters, has brought about considerable controversy.

Many natural spring waters are radioactive, some to a greater degree than others. As the waters that supply the spring pass up through the earth containing radium ores, they either take up some of the radium salts and carry them in solution, or they absorb the gaseous emanation—radon, which is held in solution until the water has been exposed to the air for some time. In either event the waters become radioactive.

Radium has been shown to be a very unstable element and slowly undergoes disintegration. Various rays are given off as it breaks down and in addition there is also thrown off a gaseous emanation—radon. This emanation is rapidly diffused into the surrounding air and is readily soluble in water. When it comes in contact with other substances, the radioactive properties of the emanation are imparted to them. Radium emanation can be taken into the body by drinking water in which it is held in solution, or it can be breathed in with the air or vapors arising from the radio-active spring waters.

Observation has shown that radium emanation has a powerful influence on the human body. Certain tissues of the body are more strongly affected than others, particularly the blood-making organs, and the lymphatic tissues. Radium emanation activates cell function and facilitates the elimination of waste products and toxins. There is an increase in the intensity of the vital energy of the cells. We know that the vital energy of the growth and repair is most active in young children and that it gradually diminishes as the individual grows older. It has been found that radium emanation has the effect of strengthening or fostering this vital energy.

One must understand that the action of the emanation is transient. When water containing the emanation is taken by mouth, only part of it is broken up in the body, the larger part being quickly excreted through the lungs. This excretion takes place rapidly, nearly 80 percent being eliminated in the first hour, and all free emanation being excreted in 4 to 5 hours. This rapidity of elimination emphasizes the fact that no dangerous accumulation can occur in the body. It also indicates that small doses of the emanation are effective in producing the stimulating effects noted after its use. It has been observed that the effects of radium emanation are more marked about the fourth day of treatment, as it requires about that length of time to build up a saturation in the body. This reaction is probably due to the stimulation of the body cells and it subsides when the waste products have been eliminated. It is generally most marked in weak individuals and indicates the necessity for proper directions before taking such treatment.

The effect on the body from radium salts is quite different from that of radium emanation, particularly in its late effect. By taking water which contains even a very small amount of radium salts in solution, there is a gradual accumulation in the body. Since the action of radium is long continued, the effect of any accumulation in the body persists for a long time and may lead to serious consequences and a gradual failure in health. From this it will be seen that there is no comparison in the use of radium salts and radium emanation. In using radium emanation, the amount present in the body is always diminishing and at a known rate, so that proper doses can be given and repeated according to the results obtained, whereas with radium salts, the action continues indefinitely and finally leads to the destruction of vital tissues in the body. It is well, therefore, to recognize that water which contains radium salts in solution in appreciable amounts, can have a dangerous effect, whereas radium emanation can be employed for a long period of time without any danger whatever. I wish to emphasize this very strongly in view of the apprehension and misunderstanding that have arisen about the effects of radioactive spring waters.

While practicing in Hot Springs, I have had an opportunity to observe the effects of the baths and the drinking of these natural radioactive spring waters here, and to note the role that the radioactive properties play in the results that are obtained. As we have just noted, radium emanation has a very powerful effect on body functions.

UNIVERSITY OF MICHIGAN LIBRARIES

There is a general stimulation of the circulation, an increase in metabolism, an increase in the elimination of waste products and toxins, an increase in the nervous tone, and a stimulation of the vital energies of the body cells. With this effect we should see beneficial results in conditions of faulty elimination, impaired circulation, anemia, and nervousness. Such results have been obtained.

The thermal waters of Hot Springs, Ark., come from 47 springs located at the base of Hot Springs Mountain. All have been found to be radioactive. Tests were made several years ago by Professor Boltwood, of Yale University, and he found the waters to be radioactive, and it is to be emphasized that he found this radioactivity to be due to radium emanation and not to radium salts in solution. During the past year Professor Schlundt, of the University of Missouri has been studying the radioactive properties of these thermal spring waters. Since the waters from all the springs are now collected in a common reservoir before distribution to the various bathhouses, he made tests on the water from the reservoir. Tests were taken each day for a time to determine whether there was any variation in the radioactivity, and it was found that the activity of the waters remains practically uniform and compares favorably with well-known European springs.

There are 19 bathhouses in Hot Springs, which are completely equipped for the hydrotherapeutic application of these thermal waters. These bathhouses are the equal of any in this country and those of the continental European spas. In the application of these waters a certain amount of radium emanation is absorbed by the body in the different procedures of the bath and also by the taking of the spring waters internally.

If it is admitted that radium emanation which is dissolved in water is beneficial, why would not drinking of water which has been exposed to radium be just as good as the natural radioactive spring water? Why could not one take water that has been artificially made radioactive, and have just as good results as coming to Hot Springs for treatment? The answer is that if only the effects that are due to the radioactive principle are sought, and if the benefits derived from taking the baths and drinking the water here were due solely to the radioactive principle of the water, there could be no advantage in coming to Hot Springs. But the effects and benefits derived from the Hot Springs thermal waters are not wholly due to its radioactive properties, but are due as well to the careful and regulated application of these thermal waters to the body.

Heat, when applied to the body in its various ways such as the hot baths, hot packs, and vapors, has a very definite and beneficial effect which is due wholly to the stimulation from the hot water itself. It is this effect we expect when we have our patients drink the hot water and take these baths. The radioactivity of these thermal waters gives an additional advantage in their therapeutic application. We feel fortunate in having this benefit to add to the effects that are obtained by the proper use of the hot water itself. It has been found that radioactivity combined with heat acts far more quickly and this may account for the greater benefits that are obtained from bathing in natural hot radioactive spring water.

A large percentage of the patients coming to Hot Springs now are suffering from arthritis or chronic rheumatic disorders. Many of these are completely relieved, and the large majority are improved. It is surprising at times to see the rapidity with which these cases improve, to note the reduction in the swelling of the joints, and the decrease in the stiffness and soreness in the muscles and ligaments. The relief from pain is often very striking. I realize, of course, that there are some advanced cases with low vitality and exhausted bodily resources who do not seem to obtain any benefits. Some do not remain long enough to get the best results. One cannot expect chronic joint changes of years' duration to be cleared up with a course of 21 baths. It generally requires a longer time with the rest periods between courses of baths, and in addition competent medical supervision with proper attention to foci of infection, proper elimination, building foods, and manipulative exercises to aid in bringing about the recovery of these patients. The early stages of infectious joint diseases as well as the associated rheumatic disorders, neuritis, neuralgia, and muscular rheumatism are also benefited.

In gout the results are equally striking. There is a decrease in the swelling and discomfort, due to the stimulation of the purin metabolism and the increased elimination of uric acid salts. This agrees with the results observed by Burnham who found that the action in many cases, if not every case, was a favorable one.

In such conditions as chronic malaria, and chronic kidney disease in which there are toxins and waste products retained in the body, the action of the radioactive water has proven very beneficial. There is an increased activity of the kidneys and a general stimulation of the body functions, so that the waste products are rapidly eliminated.

Heart disorders, especially those associated with high blood pressure are often greatly relieved. There is a relaxation of vessel spasm especially in the peripheral circulation which allows the blood pressure to fall in this way relieves the heart of the extra burden it has been carrying. Regulated baths have a tonic effect on the weakend heart muscle, and bring about a more normal muscular tone.

The blood-making organs are also stimulated as seen by the increase in red cells and in their iron content. The increase in white cells and in their iron content. The increase in white cells also gives increased resistance to infections. Patients with secondary anemia are therefore greatly benefited.

In nervous conditions, small doses of emanation have a pronounced sedative and anodyne action. Nervous restlessness and sleeplessness are often greatly benefited. Large doses, however, have the opposite effect, which indicates the need of medical advice, in employing these baths in nervous disorders.

When radioactive waters are taken by mouth there is a stimulation of the digestive ferments. Due to this effect, beneficial results have been obtained in catarrhal conditions of the stomach and bowels, as well as in the liver and gall bladder disturbances. When absorbed and distributed through the body, it gives a more normal function of the ductless glands.

Another interesting observation is the ability of the patient to tolerate larger doses of medicine than usual. Such drugs as iodides, salicylates, mercury, and quinine can be given in large doses, or over a longer period of time without toxic effects. This has allowed more intensive treatment to be carried out on those patients who are taking the baths.

I realize, of course, that one cannot attribute all these results that have been obtained to the radioactive properties of the water, but there is no doubt that results are achieved here that cannot be duplicated elsewhere with ordinary waters. While the claims for radium emanation have been exaggerated at times, one has only to observe the results that have been, and are now being obtained here to overcome any skepticism he may have in regard to its value.

SUMMARY

1. Radium therapy in the form of radium emanation has a stimulating effect on cell matabolism and in fostering the vital energy of the body cells.

2. There is a marked difference in the results from the use of radium salts and radium emanation. The emanation has no dangerous aftereffects and can be used for a long period of time without serious consequences.

3. Repeated small doses of radium emanation give the best results.

4. The thermal waters of Hot Springs, Ark., are radioactive, due to the presence of radium emanation in solution.

5. Radioactivity gives an additional benefit to the various hydro-therapeutic applications of thermal waters.

6. Chronic inflammatory disorders such as chronic arthritis and rheumatism and those resulting from faulty elimination are especially benefited by its use.

7. The proper and regulated application of these spring waters is the essential factor in the beneficial effects that have been observed. The radioactivity facilitates, or adds to the results obtained.

LEO N. LEVI MEMORIAL HOSPITAL,
Hot Springs National Park, Ark.

The Leo N. Levi Memorial Hospital, a nonsectarian institution with 116 beds, accepting all races and creeds, was founded by B'nai B'rith, the largest and oldest of the Jewish Service Organizations in Hot Springs, Ark., in 1914.

The reason that this community was selected was for this particular type of institution was because of the famous thermal waters found here. It has been supported by this national organization for this reason.

There are some ten and one-half million Americans afflicted with arthritis. Approximately 1 million of this number has rheumatoid arthritis, which is the crippling type. There is more arthritis of all forms in this country than there is heart disease, cancer, tuberculosis, and diabetes combined. The arthritic diseases constitute a heavy drain annually on our economic resources, costing America more than 100 million days lost for work, school, or other productive activities.

World War I alone caused 35,000 cases of arthritis in veterans, who are receiving disability compensations for arthritis, and with the added burden of those from World War II plus the Korean situation it is probable that between 75,000 and 100,000 veterans alone are drawing disability compensation from our Government because of some form of this disease.

A patient who is sent to the Leo N. Levi Memorial Hospital by the B'nai B'rith organization throughout the United States, is the so-called "failure" of medical treatment. The majority of them have received treatment using all known arthritic drugs, including the "wonder drugs," and physical and hydrotherapy in modern medical centers.

So far in 1953, we have given approximately 19,000 days of patient care, and while we have not cured a single patient of this dread disease, we have been able to return 39.6 percent to gainful employment, have dismissed 47 percent of our patients moderately improved, 8.9 percent slightly improved, and only 4.5 percent unimproved. We must bear in mind that we have nothing to offer the patient that he cannot receive elsewhere, except the use of the thermal waters of Hot Springs. While the research departments in all the big institutions in the United States are hunting for the cause and cure, and while we too, are striving to find the answer, our greatest asset is at the present time the hot springs of Hot Springs, Ark.

Our out-patient clinic department functions for those persons not financially able to pay for their treatment in any of the private clinics here, but who need medical help while they are receiving baths from the United States Government free of charge. So far in 1953, we treated 754 persons in this outpatient department.

The Leo N. Levi Memorial hospital is nonsectarian and receives its support solely from contributions given through the B'nai B'rith throughout the United States. Since our budget is approximately $400,000 a year, we are certainly showing results or we would not be able to continue to operate.

Respectfully submitted.

(Mrs.) FANNIE B. MCLAUGHLIN, R. N.,
Administrator.

Leo N. Levi Memorial Hospital, Hot Springs, Ark., statistics for the first 9 months for 1951, 1952, and 1953

	1951	1952	1953
Number of patients admitted	1,479	1,069	345
Number of patient-days	20,976	15,453	18,452
Number of arthritic patients	209	214	345
Number of arthritic patient-days	12,498	9,348	18,452
Number of nonarthritic patients	1,270	855	------
Number of nonarthritic patient-days	8,480	6,105	------
Average daily stay, arthritic	56.3	43.6	53.4
Average daily census, arthritic	45.6	32.9	67.5
Number of outpatients arthritic clinic	616	629	754
Percentage schedule of results of patient treatment:			
Unimproved	7.2	7.9	4.5
Slightly improved	10.0	8.9	8.9
Moderately improved	55.5	51.5	47.0
Greatly improved (returned to gainful employment)	27.3	31.7	39.6

Mr. MAHON. Mr. Chairman, I yield 20 minutes to the gentleman from Mississippi [Mr. WHITTEN].

Mr. WHITTEN. Mr. Chairman, I hope that I can have the attention of the membership. What I hope to say is not easy to say and I have learned that in saying it it is not easy to get attention and if you get attention it is not easy to get any acceptance by American business or much attention by those who get news to the people. I say that not in a desire to get any personal acclaim about this situation because I have had the opportunity to obtain some information that goes very deeply into the matter that is before us today.

First, let me say there are many things you could quote from the witnesses who have appeared before our committee, there are many things that should be considered in determining how much appropriations you should have for the military. Presumably, we need this great National Defense Establishment because of the intention of Russia and because of the ability of Russia to carry out that intention. If I am correct, if that is the reason for this defense expenditure, the prime question that any reasonable man would wish to make up his mind as to how much and where and how would be the facts on Russia's ability to strike the United States. I want to say to you that if you agree with me on that, we are following in this country a ridiculous procedure to determine how much national defense appropriation we should have.

I wish to say now that the intelligence agency—and I use that advisedly because everybody knows the true name, I understand it is not right to call it—that agency which makes its determination as to Russia's ability does not come before our committee. We do not hear from those who make the estimates as to what Russia's capacity and ability is. We do not even hear them. We hear the people to whom they have talked. We get it second hand.

Mr. Chairman, we have had so little information whose accuracy we had any chance to pass on, in my judgment, that last fall I asked that I be permitted to go to Russia and see if all information was hidden from our people because of the Iron Curtain, and I was surprised at what I found. I asked permission to go, and before I went I was told things that were important to our country, and I say this here for the first time, things that our people thought were important to our security. And then when I got there the Russians would invite you to take pictures of them.

Mr. Chairman, Russia is a country largely of dirt roads and 35-mile-per-hour trains. I rode through the heart of White Russia. There I saw tourist hotels half completed and highways under construction. They were so proud to tell you that next year tourists drive from Brest, which is the principal western entry, all the way to Moscow on a completed highway. They had built a western-type waiting room and had an English-speaking headwaiter. I was in and around Moscow and down through the heart of the Ukraine. You could drive 200 or 300 miles and not see a hard-surfaced side road. You could drive the main highway, which had about 2 inches of blacktop, and see the farmers with grain spread over half the highway trying to get it to dry.

I grant you I did not learn all about Russia in the period I was there, but I will say that I lived with our top people who work for our Government and who speak the Russian language; I rode on trains on which the Russian soldiers would offer you a drink, which, incidentally, we did not do. Upon learning we were Americans they were friendly as they could be and asked about your country. I talked to the average people over there and in English, because, apparently, they teach English in the schools.

Mr. Chairman, do not misunderstand me. I am not talking about the Communists in control of the Government and as to their intent. As far as I know, it is exactly like our military leaders tell us. But why is it on this committee where supposedly I should hear the truth from our top military people, a man in my situation, where I am supposed to be informed when I go to the place I find it the opposite to what I have been led to believe?

When I got there I found trains pulled by old coal-burning engines. I am talking about the railroad through the heart of the country, the mainline that runs from Brest, on the border of Poland, right to the capital, on the mainline, down through the heart of the White Russia. Why is it that we are not told that Russia only has about 90 million Russians and the rest of them speak various other languages and are scattered all over one-sixth of the world with little transportation and little communication. Now, with a government that is controlled at the top by the Communists, they can throw their weight behind any one thing. We went out to see this great Moscow University. You can drive in Berlin and see 2 blocks as fine as any place you will find any place in the world, but get away from those 2 blocks and get back a little distance, and you will see the rest of it lags far behind. As you go through Russia, that is typical. Where the weight of government has been thrown behind anything they can make a shining example, but away from that example, you will find they lag back on a 1910 basis. Now, I cannot believe that our people in the military do not know that. I cannot believe that they are ignorant of that, when I went as freely as I did into the areas that we went into. I just cannot believe it. Why is it that the next Chief of Staff of this country told our committee that after all Russia is the only country that has a jet-propelled civilian air transport service and then quit, leaving what amounts to a false impression? I said to him, "Why don't you tell the rest of it?" "You know most of their passenger planes are 2-motored. They are in aviation so far as passenger service, about like we were in this country 20 years ago. Not only do they not have jet-transport civilian service; they do not have any other civilian airplane service that compares with any country in Western Europe." What made him admit it? Because I rode the air service; I rode the lines in Russia. Now, they are a rough, rugged people, but they, by and large, lack a whole lot of coming up to the standards we have.

Now, let me repeat again. I have wondered why our people don't admit the evident. As you go there and talk to our people over a 2-week period, our folks who work there, and you realize that our military people are saying that the Russians are putting more and more of their production in the military, our people over there say it is not true; that they have given more and more attention to agriculture in recent years, and our military witnesses, when I faced them with it, were unable to back up their charge. Now, why is it that we are in this situation and continuing to go ahead? Again, I do not know what Russian intentions are. I said what our people say it is. May I say further that some people question why there is an Iron Curtain. My friends, it is not to hide strength; it is to hide weakness. By skillfully pulling this curtain back and letting the West see down the slot and see Moscow University, and they tell you that they will have more scientists than all the rest of the world and by hiding the rest, an impression is formed. You can look at corn and see where the frost has ruined it. And, yet they will tell you that the frost has not hurt the corn and their production will exceed the West. Well, if you have any knowledge of farming, you will see that that is not so. It makes you wonder why that is. I can understand the Russian wishing to make big but false claims. What is bad is that apparently our military wishes to claim they believe such big claims. I wonder why.

I think my distinguished chairman made a marvelous presentation to you here today. I could not do any better, and I am sure, as good a job of presenting the facts and figures in this overall bill which he did, which you need to have and which I know you ought to have, but

UNIVERSITY OF MICHIGAN LIBRARIES

I am taking this time to point out something else which needs pointing out. I subscribe to what my chairman said, and he handled it so marvelously. But, this is a situation that I think somebody else or somebody needs to point out, too. Now, let us get down to this situation. How can anyone conscientiously say the cuts in this bill will jeopardize or hurt anything?

In the Air Force alone—listen to this—in the Air Force alone on the 1st of July they will have $17 billion unspent, though committed. They start off the next year with $17 billion in cash. July 1 they will have $3.7 billion not even obligated. The Air Force appropriation is in 8 parts, and within each of those 8 parts there is the right of transferability. Now, in this bill we give them $15 billion plus more. At the end of next year, at the end of July 1, 1 year from now, they will have as much then on hand as is appropriated in this bill. Is there any way to say that they cannot meet any emergency that might arise in the next 12 months? If there is not, why so much complaint about this? I will tell you why. I have tried to analyze the complaint of our top leaders. Let me repeat. The whole of the defense necessity is built on Russia, her intent and her capability. And the people who make the determination as to that capability do not even come before our committee. We do not hear from those who build up those figures. I have every reason to question the indications that I do get second hand. But if what I think is true, why all this agitation about this bill?

As the chairman has said, there is a carry-over in the bill of more than $8 billion. I will tell you why it is. It is because to a degree we have our civilian economy wrapped up in military spending. I have before me a list of the names of 50 corporations with whom we have spent $80 billion in 5 years. This information is in the hearings. In 5 years the value of the stocks of those corporations has increased from $57 a share to $149 a share. They are doing pretty well, it strikes me, with Government contracts.

Why is it, if the Navy, Air Force and Army have all these funds and will wind up the year with just as much money as we appropriate here, with the right of transferability, that there is so much screaming about getting more money? It is because your aircraft factories, your business people want the Department of Defense to enter into more and more contracts.

I have before me the report of the aircraft industry as of April 4. It shows that the aircraft industry this year has made a net profit of 3.9 percent of total sales. That is an increase from last year when the figures was 3.7 percent. Yet the cost of these facilities was largely provided by the Government. The companies had no risk worthy of the name. Whatever money they did put up, the Government permitted them to take a 5-year mark-off instead of the usual 20 years.

I am not condemning the planes produced by aircraft factories. They have done a wonderful job. However, aircraft industry, before we even act on this bill, has a backlog of contracts of over $4 billion. It looks to me like they should be satisfied.

May I say again, when we get to where we cannot reduce this bill, in this case in actuality by $1,200,000,000 and with all this carryover of funds, and with all these profits the record shows have been made, then it is representative of the fact that we are getting our economy tied into this appropriation. And what does that mean? It means that here is the secret of your inflation. The military has such a great share of the total number of scientists, with the competition for the ones that remain by industry, that it jacks up the cost of all scientists. And under the type of contracts we have with these people who produce for the Government we find the reflection in the overall cost, which really means very little to them.

Not only that, but if we analyze the matter further, we can cut this amount of money out, and tell the Department of Defense to cut out these wasteful practices.

We had military procurement policies and practices investigated last year. I will not repeat the findings here. You will find them in last year's hearings. Suffice it to say it was so bad that Secretary Wilson said it made him "sad" and "mad" to know his Department had such a poor record with our committee.

They are promoting General LeMay to become Assistant Chief of Staff of the Air Force. Incident to promoting General LeMay there will be 177 changes in command throughout the world at a cost of untold thousands upon thousands of dollars. The Prussians in ancient Germany never asked for any more than we find our military asking for in this day and time. Three hundred and fifty thousand dollars was requested of our committee to build a home for the Chairman of the Joint Chiefs of Staff, and the poor Vice President of the United States has to buy his own home.

Mr. SCRIVNER. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman.

Mr. SCRIVNER. I think the gentleman will find that that request, which by the way was not granted, included not merely a home, but some other installations including some emergency communications.

Mr. WHITTEN. That is right. The Chief of Staff could not rely on the tremendous setup that we have at the Pentagon and everywhere else; he wanted a duplicate set in his own home. But the total amount is $350,000, and I am glad our committee has not approved that.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Iowa.

Mr. GROSS. I should like to know if this home is still to be built on Government-owned land.

Mr. WHITTEN. The request was for it to be constructed at Fort McNair, so I assume it would be, as far as that is concerned. So there is no cost as to the land.

There are other things that are rather ridiculous. This intelligence agency, whose name I cannot afford to call because everybody already knows it, after I came back and made this report on what we did see over there, varied their estimates and said, "We overestimated Russia last year."

Last week one of the agents of that agency came to our Appropriations Committee looking for another agent of that agency. When the clerk asked him, "What is his name? Who are you looking for?" He said, "Under the rules, I cannot tell you his name." The clerk said, "How in the world do you ever expect me to find him?"

Is it not ridiculous? When you turn any group loose not having to report to anybody you have a group that is likely to be irresponsible, you have one that is likely to give to your military the highest possible estimate of Russia's capacity because then they cannot be found short.

What we need now, as I see it, is a chance to go along and be sure that we do not wreck ourselves before the game starts. We need to keep ourselves where, when the military put out the call that they really need it, we will know they are not crying, "Wolf, wolf." And we need it worse than you think.

I asked Admiral Radford when he was before our committee, "Admiral, can you tell me in the history of the world of a single major country that ever started spending more than half of its annual appropriations on the military over a long period of time which did not end up in a war?" He could not name a single one.

We had before our committee a distinguished German scientist, whose name I shall not repeat. He participated in the German war in World War II. He said, "Yes, Mr. WHITTEN, one of the major causes, in my judgment, of World War I and World War II was the fact that the German civilian economy had gotten wrapped up in military expenditures." So it was in Japan and so it has been everywhere else.

I like to think we are smarter than other peoples. I think that is natural of any nation. But I say the danger signal it out. When you see top military people telling you only part of the truth—I did not say misrepresent or lie, as the gentleman from Kansas has said—if you can ask them the right questions they will tell you the truth, but it is pretty hard for those of us who are merely laymen and not military experts to think of the right questions all the time.

Mr. CURTIS of Missouri. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Missouri.

Mr. CURTIS of Missouri. I want to join with the gentleman in his statements in regard to the economic abilities of Russia. The Joint Economic Committee made studies of that matter that I think will bear out what the gentleman has been saying. I personally made some studies in one area, which was transportation, because it seemed to me that was one field that you could not hide from our intelligence. I think that the proof of what the gentleman has seen and what others have seen and what any real study indicates is exactly

what the gentleman says, that Russia is about a 1910 country. The main thing I want to know, and the gentleman asked that question, too, is why that information is not printed throughout this country because it is available to the press. I have put remarks in the RECORD right along this line. I commend the gentleman for bringing this very important matter to the attention of the Congress.

Mr. WHITTEN. I thank the gentleman. I am sure he agrees with me. In raising these points, I am treading where angels fear to tread, for I buck all the vested interests. I had better say this right here and now—I have voted for national defense appropriations and I am going to vote for this one. You cannot afford to get caught short not supporting national defense. So I am going to support it. So I can say these things. I want to say again I am not professing that I have learned all about Russia in the time that I was there even though I did travel early and late and had our top people with me all the time. What I am saying is this. From my observation and what I learned from our top people who have been there, it was the direct opposite to the impressions conveyed to me by our top military people. I cannot say that my impressions or what I learned from my people is correct. Neither can I say that what the military tells us secondhand from our Intelligence is incorrect. But, I do say that they are at such wide variance that there is no excuse in the world not to have the primary source, the Intelligence Agency before the Congress in connection with what is the real capacity of Russia. I sincerely believe our military helps hold up the Iron Curtain. That is a serious charge, but I can document evidence to support my belief. That is all I say. May I say, and I will not call names, but we have had investigations that have had nationwide publicity under the names of Senators and Congressmen, and it was testified before our committee that those investigations started off accepting as the starting point that Russia has this—this—and this, conclusions of the Intelligence Agency. But, the hearings did not dig into the soundness of these estimates.

May I say again, the crux of the whole thing is—what is Russia's ability to do something, and it was testified here that conditions have changed since a number of years ago, today air fields surround Russia, which air fields are under the control of the United States or under the control of its allies. Some of these leaders who are trying to get all the money in this budget, and who testified before our committee, admitted that in their judgment it would be suicidal under present conditions for Russia to strike anywhere because of the ability of this Nation and its allies to retaliate. Let me repeat again. In my judgment, we are getting about 70 cents worth of defense for each dollar spent, and I can cite the record to show places where we are wasting the other 30 percent. We have reached the point where any community in this country which wants a new payroll comes before the committees here to ask for a defense establishment in their community. We pass laws letting the President distribute the benefits of this public spending. We passed a law that you could not buy more real estate unless you got the approval of a committee of this Congress. The committee has largely ended up being the group to determine where you put it and not whether you put the Defense Establishment anywhere. I can show you page after page where they have approved more and more acquisitions. Then, do you know what the military does? Presumably, to get more support in Congress, in our committee now there is another $1,500,000,000 request for more public works, two-thirds of which are in United States. In order to line you all up behind this new request, after they have all of these other things, they list them by States so that each one of you can see that there is something in your State and, surprisingly there is, not only in each one of the States, but also in the Territories and the possessions.

What have I done? I have tried to point out some danger signals, to sound some warnings. I have tried to do it in this report by filing "additional views." I am not at variance with my chairman and the very fine men with whom I work on this committee. They do a marvelous job with a terrific problem. I say again if Russia intends all these things, the crux of it is: What is her ability? And the starting point to handle that or any other national policy matter is to go to the heart of how sound are our estimates with reference to that ability. We get it secondhand. I could cite you, if I had the time, example after example, which would convince you we do not get such information because somewhere they want contracting with more and more big companies for more and more profits. It is a serious thing that I am trying to point out to you today. It is a hard thing to get anyone to pay any attention to. There are too many papers and too many magazines that are interested in their advertisers and the advertisers get the money to advertise from those with contracts with the Military Establishments. It is a round, round robin. Think, my friends, of what has happened to every other country that has thought its prosperity was tied to its military machine.

Everyone knows the military power of the United States and its allies far exceeds that of Russia. If we doubled our military machine by giving more and more contracts to companies which not only almost trebled their stock value in 5 years but doubled that. What we need is more courage to stand up for right. We already have the means.

Mr. CURTIS of Missouri. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. CURTIS of Missouri. Mr. Chairman, I asked permission to extend my remarks immediately after the remarks of the gentleman from Mississippi [Mr. WHITTEN] so that I could call the attention of the House to some remarks I made on the floor on February 15, 1957, concerning Russia's economic and military strength. These remarks are pertinent to the debate on this military appropriation bill, particularly with the emphasis that the gentleman from Mississippi, a member of the Appropriations Military subcommittee, has made. I again commend him for taking this little understood and therefore courageous position.

Incidentally, I disagree with the statement in the subcommittee's report on page 3 "The nature and extent of a military threat against the United States and its allies appears, in certain respects, to have somewhat abated." I think the threat such as it is just as real and strong, if not somewhat stronger, than it was a year ago. What has happened is that the committee members are obviously beginning to get a better understanding of just what that threat consists. That threat, in my judgment, should be overestimated rather than underestimated. There is little question in my mind that the budget as presented by the subcommittee still overestimates considerably Russia's military and economic capabilities so whatever error there may be in estimates is still on the safe side.

Hereafter follows the statement I made on the floor of the House minus the article by Charles Benedict to which I refer. The article is well worth reading and appears on pages 2552–2553 of the CONGRESSIONAL RECORD of February 25, 1957:

RUSSIA'S ECONOMIC AND MILITARY STRENGTH

Mr. CURTIS of Missouri. Mr. Speaker, I am inserting into the RECORD an article appearing in the January 19, 1957, issue of the Magazine of Wall Street by Charles Benedict, entitled "As I See It! The Seriousness of Russia's Economic Deficiencies," along with some remarks of my own which I excerpted from a speech I recently made on this general subject.

For some time I have been concerned about the assumption that seems to prevail in this country that Russia is a strong economic and military threat to the United States and to the non-Communist world. That Soviet Russia is an ideological threat, I have believed for some time. I have also felt that much more than has been done should be done to meet this threat. The Comintern and its successor, the Cominform and the present successor of this head of international communism, whatever may be its undisclosed name, is all too real. Yet it is this reality which is denied by many people in this country and the economic and military assumption which is believed.

The Joint Economic Committee has made some studies about the economic condition of Soviet Russia. I made some personal studies on one aspect of the Soviet economy. I chose a specific economic item because I felt it was necessary to concentrate in order to obtain knowledge beyond generalities. I chose transportation for the following reasons: No strong economy can exist without good transportation. No modern war can be waged any length of time without a strong economy and indeed without good transportation. Transportation developments are almost impossible to hide from intelligence.

What do the studies of Russia's transportation system reveal? A strong and modern railroad system and rolling stock? A highly developed highway system? With trucks? An internal waterway system and shipping? A highly developed air transport system with airports, facilities, and transport planes? Pipelines for transporting petroleum? A

UNIVERSITY OF MICHIGAN LIBRARIES

coastline transportation system with coastal shipping and port facilities?

The answer to these questions is available to anyone who wants to do a little studying and a little questioning of people who have visited Russia and used any of the transportation facilities available. The answer is that Russia's transportation system is inadequate to an extreme degree. This answer should revise the thinking of even the strongest believer in overestimating rather than underestimating the strength of an enemy. The article of Charles Benedict comes to the conclusion that a great hoax has been perpetrated by Russia, another Potemkin display.

If this thesis is at all correct, the United States has been playing up Russia's game of bluff. Russia's game of bluffing whom? Not the United States, but the countries on its perimeters and the countries of the non-Communist world. The bluff serves two purposes: One, the obvious one, the creation of fear, of potential military strength and aggression; two, the less obvious one, but by far, in my judgment, the most dangerous, the creation of the impression that if Russia is this strong militarily and economically, then maybe the system of communism is not so bad after all. Maybe it is a pretty good system.

Right now the Asiatic and African world is watching two countries, Red China and India, to see which is able to industrialize and modernize the best. Red China is following the Communist pattern. India though, hardly following the private enterprise system—which is really the best—is following a system which is not communistic. If China wins, then the Communists will have won a tremendous victory. By the nature of things, China cannot win because communism is contrary to human nature. But there is a good part of the world watching to see. They are watching because they half believe that Russia has already accomplished these results under communism. They half believe it not because Russia has said it, because they disbelieve Russian propaganda as we do, but because the United States has said it, not only in words but in action. Our newspapers and periodicals are full of Russia's alleged prowess. Our military budgets translate these words into deeds.

A good bit of this Russian buildup comes from our own Military Establishment's propaganda machine which uses this theme to bolster its requests for appropriations. The biggest lobby by far in Washington, D. C., is the Military Establishment and it utilizes almost all techniques known to any lobby group to promote its interests. The Military Establishment is dedicated and loyal to our country, in fact, it is this very dedication which seems to make it blind to what is the welfare of our country. It goes back to a simple attitude of mind—no supply sergeant was ever busted for having too much supplies, but many a supply sergeant has been busted for not having enough of each particular thing thought to be needed at a specific time. The Military Establishment is led by dedicated leaders who remember the twenties and early thirties when it was so starved that it could not carry out its basic function to defend our society against external forces. They are determined to see that this does not happen again. But, in doing this and pursuing their course, and using the tactics they have used and are still using, they are hurting the ability of our country to meet the problems that face us in the world today. They are playing up Russia's game of bluff.

A few months ago we had a rash of news stories and statements from people who should know better about Russia's amazing and tremendous advancement in educational training. In tracing back to find out where this all came from it became quite apparent that a study by Nicholas DeWitt, Russian Research Center, Harvard University, published a book entitled "Soviet Professional Manpower, Its Education, Training and Supply"—1955—was the source for almost all of it. However, if anyone really read the book, which was a very fine scholarly work, he would not have become greatly alarmed. He would have seen what was quite obvious, that Russia was very far behind the Western world in scientific, as well as all other forms of education, and that the Russian leaders had decided to put on a forced draft to catch up, but that in putting on the forced draft they were committing some rather basic mistakes in education. Furthermore, that they were somewhat dependent upon outdated Western civilization material for much of their teachings. But basically what should have been seen is the very thing some people saw, if Soviet Russia was freeing up its educational system, it was sowing the seeds for destruction of communism. Education, search for the truth, and communism do not go along together. And, indeed, is that not what is happening? Russia did put on this forced draft in its endeavor to catch up educationally and throughout Russia there is the rumbling of revolt.

But, in the meantime, by our playing up the Russian move in education, partly I suppose to force our own educational system to get a move on, we played right into the Russian game of bluff. Our people in education were so desirous, just like our Military Establishment, to channel funds into our educational programs that they used any argument near at hand to promote this end. The Russian threat was readily available and so, without examining the situation as people in education are supposed to be trained to do, they went out and played up Russia's game.

I picked up a piece of information in Denmark last December when I was there discussing trade and economic problems. I was asking what the Baltic countries were doing in reference to gasoline and oil supplies with the closing of the Suez Canal. In the course of the conversation, it was mentioned that Finland had made a deal with Russia to get some Russian oil. I asked how the oil was being delivered and was interested to hear the reply. It was being shipped by boat from the Black Sea through the Dardanelles, through the Mediterranean, through the North Sea, thence to the Baltic Sea, and so to Finland. Yes, indeed, Russia has an imposing transportation system.

However, I conclude with one sobering remark. A flash fire, such as a sudden atomic attack, can cause vast damage even though the fire burns itself out in the space of a few minutes. We do need to take precautions against this kind of a development, but this is hardly the kind of development we are spending much of our wealth and efforts on. In fact, by confusing ourselves, we are not maintaining the concentration necessary to face this real military danger.

Mr. MAHON. Mr. Chairman, I yield 18 minutes to the gentleman from Alabama [Mr. ANDREWS], a member of the Committee on the Navy Panel.

Mr. ANDREWS. Mr. Chairman, as a member of the Navy Panel of the Department of Defense Subcommittee, it has been my particular responsibility to review the budget estimates of the Navy. I would like to discuss with you briefly our committee action on some of these estimates.

Never in the history of our Military Establishment has a military service undergone such far-reaching changes in so short a time as our Navy. In only a short period of time, the Navy has passed from battleships to guided-missile cruisers, from steam to nuclear power, from gunpowder to nuclear weapons, from reciprocating-type planes to modern supersonic jet aircraft, from conventional submarines capable of firing only torpedoes, to nuclear-powered submarines capable of launching torpedoes and long-range guided missiles.

These changes are being made at a time when the overseas responsibility and commitments of this country have broadened as never before until today they cover virtually the whole free world. As these responsibilities and commitments have broadened, so have the responsibilities of the Navy.

The vigilance, readiness, and combat capability of the Sixth Fleet in the Mediterranean and the Seventh Fleet in far eastern waters stand as constant reminders to the free world and to those behind the Iron Curtain of the power for peace which lies at the heart of our military policy. They stand ready to act at a moment's notice. They are striking forces poised to spearhead any attack against any enemy which would threaten the welfare of this Nation or the peace of the Free World. They are eloquent symbols of the desire and ability of this Nation to preserve the peace of the world. The bill before you continues to make such a navy possible.

Now let me talk for a few minutes with you about the fourth military service of this country, the Marine Corps.

This bill provides support for a Marine Corps of three combat divisions, three Marine Air Wings, and the necessary supporting troops. The strength of the Corps during fiscal year 1958 will be maintained at a level of 200,000 personnel. These forces represent an integrated, trained, and ready team. In the words of the Commandant of the Marine Corps:

> They are prepared to fight in a general war, a small war, or a limited war, but above all, they are ready to fight.

The advent of nuclear weapons into modern warfare has seen changes in the overall operational methods of the Marine Corps and in equipment necessary to support their activities. They have developed a new vertical assault technique for amphibious landings which, with its characteristics of speed and mobility, make them more potent than they have even been in the past. This bill makes provision for implementation of this new doctrine.

Yes; this bill makes reductions in the estimates of the Marine Corps, but it in no way impairs their fighting efficiency or their ability to procure the necessary materiel which they have programed for the coming fiscal year. For example, the funds provided by the committee together with estimated unobligated balances, will provide approximately $282,700,000 for Marine Corps procurement in fiscal year 1958. This is a sufficient amount to enable the Marine Corps to undertake their full procurement program of $215 million projected in the President's budget and leave a sufficient unobligated balance at the end of the fiscal year to achieve the necessary con-

tinuity in the program for the following year.

The deployment of the Marine Corps emphasizes their role in our defense posture. The 2d Marine Division and the 2d Marine Air Wing are on the east coast in North Carolina, ready to project their coordinated power in any troubled area in the Mediterranean, Near East or Middle East. A battalion landing team of this division, and from time to time appropriate air elements from the Second Marine Aircraft Wing, are maintained on station with the 6th Fleet in the Mediteranean. A small but powerful unit prepared for any task assigned it, and in a position to do it quickly.

The 1st Marine Division and the 3d Marine Aircraft Wing are stationed on the west coast in California. From there, embarked aboard ships of the Navy, they can contend with any emergency in the Pacific in a matter of days.

The third major deployment is perhaps most important of all. The 3d Marine Division and the 1st Marine Aircraft Wing are located at various bases in the Pacific and Far East. Plans and work are under way to station this force, less units composing the 1st Marine Brigade, on Okinawa, not as a garrison force but as a force undergoing training and continuously prepared to move out on short notice. From these locations, it is within easy striking distance of any potential trouble spot in the Far East.

Past history and recent events have proven again and again the importance of having marines deployed in overseas areas. In such a manner, they are instantly available for any emergency in any trouble spot of the world. The funds recommended by your committee in the accompanying bill are based on a continuation of this deployment and will enable the Marine Corps to fulfill its traditional role in the Military Establishment of this country as our Nation's force in readiness.

In this day of nuclear weapons and modern warfare the ability of the Navy to fulfill its objective of maintaining supremacy of the seas, depends in a large degree on the success of their research and development programs. In the past and in the present these research and development programs have contributed and are still contributing greatly to the ability of the Navy to maintain control of the seas. Their ability to maintain such control in the future will depend to a large degree upon the continued success in the research and development programs.

Your committee has recommended $495 million for this program for fiscal year 1958, $3 million more than that made available in fiscal year 1957, but a reduction of $10 million in the budget estimates. As pointed out in the report the committee is not satisfied with the coordination of the research and development program within the Navy, nor of the need for some of the various and sundry studies and programs presented in the justification of this appropriation request. We believe that with the exercise of proper coordination and in the application of intelligence priority to the program that the Navy can accomplish its overall research and development program within the amount recommended by the committee. Should this not prove sufficient in the event of some breakthrough in the research and development field ample emergency authority has been provided by the committee in the appropriation of the Office of the Secretary of Defense to meet these needs.

Let us look at some of these programs which have been funded in this bill. The Navy has a peculiar problem with reference to aircraft. Catapult takeoffs and arrested landings necessitate the construction of aircraft with more severe requirements in many areas than are needed for operation from conventional airfields. Development of these aircraft not only insure the continuation of essential aircraft for the various carrier task forces, but also permit the current Navy-Marine Corps development of shore based catapult and arresting gear for advanced base and amphibious operations. Development of this system will eliminate the need for time consuming construction of expensive airfields in advance areas.

The new vertical assault technique of the Marine Corps requires a continued development of weapons and equipment required for this modern amphibious type operation. Many gains have already been achieved but much remains to be done, such as reducing the size and weight of weapons and equipment and increasing their effectiveness and efficiency.

The enemy submarine threat as well as the desirability of our utilizing the undersea areas as an avenue of attack poses research and development problems that demand solution. Last summer, for example, a group of the best scientists and engineers in the country gathered together to take a very close look at the many problems involved in providing the Navy with increased future capabilities in undersea warfare, in an era when nuclear powered submarines carrying guided missiles and exploiting modern weapons are a fact. This group known as project NOBSKA made certain recommendations which have already resulted in some of the programs of the Navy being reoriented. The other recommendations are even now studies. Together they give the Navy an excellent avenue of approach to the providing of the essential materiel necessary to counter the submarine threat and to exploit these undersea areas to our advantage.

Particularly does the Navy have an interest in the requirement for basic research. Many of the present and future problems of the Navy can be solved only with information derived from basic research now being done or programed. Such effort must be continued for these findings may well hold the key to the ability of the future Navy of our country to maintain control of the seas.

Our investment in research and development assures us that just as today our Navy will be an effective force employing the most modern weapons of its day and capable of any action our Nation requires of it.

Now may I turn to the guided missile program of the Navy. Approximately $500 million is made available in the current bill for guided missile procurement exclusive of research and development.

No longer are guided missiles in the Navy something to dream about for the future. Air-to-air missiles such as the Sparrow and the Sidewinder are even now in our fleet aircraft. Surface-to-air missiles such as the Terrier already installed on cruisers in our active fleet, the Petrel, an air-to-surface missile, is in use by patrol squadrons. The Regulus missile, a surface-to-surface long-range missile for the bombardment of targets of Navy interest, is at sea in submarines as well as in surface combatant ships. Soon the Regulus II missile, a much faster, higher flying and more powerful missile than Regulus I will be flying off ships and land-based tests will be coming to a close and it will take its place aboard surface vessels and submarines as a powerful attack weapon in the fleet. The surface-to-air missile Talos is even now being readied for fleet introduction. The Bullpup, an air-to-surface missile, will be procured with funds contained in this bill.

Progress is being made on the fleet ballistic guided missile known as the Polaris. Funds are not only contained in the bill for the continuation of this missile program, but also for advanced materiel to be procured for a submarine in the 1959 program that is intended to launch this missile.

All of the combatant surface ships in the 1958 construction program have guided missile capabilities. Three of the four nuclear-powered submarines are planned to be guided-missile launchers.

The Navy has won its battle to provide the fleet with operational guided missiles. It will continue to stay ahead in that battle due to research and development programs.

There is, however, one matter of considerable concern which is now beginning to have a greater influence than ever before on the guided missile program, that is the matter of missile unit cost. We are now beginning to purchase or program large numbers of missiles to outfit the fighting forces of the Navy. It is a costly proposition. The total bill is reaching what has been termed astronomical proportions. This is the final battle which must be won. Even as we devote time and scientific talent to developing more and more missiles the Navy and others concerned must devote a great deal of time and talent to reducing the unit costs of our various guided missiles. Every dollar must be utilized to the maximum unless we are to spend ourselves into a disaster while we seek to prevent one with our Armed Forces. We cannot permit ourselves to be virtually priced into second place in the guided missile field due to high unit costs. In the words of Rear Adm. John E. Clark, Director of the Guided Missile Division of the Chief of Naval Operations, "the Navy's guided missile story is a success

UNIVERSITY OF MICHIGAN LIBRARIES

story," a story however, "which now must be protected from the always deadly virus of unreachable high unit costs."

The military success of this country has always been founded on teamwork. Teamwork involving mutual trust and support between the Navy, the Army, the Marine Corps and the Air Force. This is as it should be. Such teamwork must be continued if our military effort is to be a successful one. Yet this teamwork does not stop with the military services. You and I as Members of Congress, the people in and out of Government service, in our universities, in our industry, in the districts which we represent, are all members of this team. The military efforts of this country will progress in a large degree in direct relation to the support we give them. I do not mean today that as Members of Congress we should blindly appropriate funds on their every estimate, or grant their every request; they must all be screened with careful and deliberative study. I think your committee has done that as evidenced in this bill. I trust that we will continue to do that in the future and that the same careful deliberations and spirit of cooperation and confidence will be displayed by all of us whether in this Chamber, back in our districts, or anywhere by all who call themselves members of this American team.

Mr. HOFFMAN. Mr. Chairman, I make the point of order that a quorum is not present.

Mr. MAHON. Will the gentleman withhold that for a moment?

Mr. HOFFMAN. I will be glad to withdraw it if we get unanimous consent that somebody else is not going to make it.

Mr. MAHON. We have one more speaker, and we will close at 5:30, if that will be satisfactory.

Mr. HOFFMAN. May I inquire of my colleague from Iowa: Are you going to make a point of no quorum?

Mr. GROSS. Is the gentleman going to withdraw his point of order?

Mr. HOFFMAN. If you agree you are not going to make one.

Mr. GROSS. Let the gentleman withdraw if he wants to.

Mr. HOFFMAN. I am waiting. Well, I will pass the buck to you. I will withdraw it for the moment.

Mr. GROSS. I make the point of order that a quorum is not present.

Mr. MAHON. Will the gentleman withhold that for 1 minute?

Mr. GROSS. Yes; I will wait for 1 minute.

Mr. MAHON. Mr. Chairman, I yield myself 1 minute.

Mr. Chairman, I want to pay tribute, if I may, to my colleagues who are members of the defense subcommittee. This is a committee where we work for months each year on defense appropriations. One needs a passion for anonymity to serve on this committee. The hearings are not public; they cannot be. We work during the long days and months in an effort to serve the best interests of the Congress and the country, and I am inspired when I hear as I have today the speeches of my colleagues on the subcommittee. Others will speak during the further debate which will resume Monday.

The Democratic members in order of seniority on the subcommittee are as follows: The gentleman from California [Mr. SHEPPARD], the gentleman from Florida [Mr. SIKES], the gentleman from Arkansas [Mr. NORRELL], the gentleman from Mississippi [Mr. WHITTEN], the gentleman from Alabama [Mr. ANDREWS], the gentleman from South Carolina [Mr. RILEY], and the gentleman from Pennsylvania [Mr. FLOOD].

The Republican members in order of seniority on the subcommittee are as follows: The gentleman from Massachusetts [Mr. WIGGLESWORTH], the gentleman from Kansas [Mr. SCRIVNER], the gentleman from Michigan [Mr. FORD], the gentleman from Maryland [Mr. MILLER], and the gentleman from New York [Mr. OSTERTAG].

I have listed the members of the subcommittee as being Democrats or Republicans. Actually, there is practically no partisanship in the committee, all members devoting themselves to the best interests of the country without reference to partisan politics.

I want to mention members of the staff with whom we work on the defense bill. They are Mr. Corhal Orescan, Mr. Samuel Crosby, Mr. Frank Sanders, Mr. Earl Silsby, and Mr. Ralph Preston. They work tirelessly and effectively and the Congress and the people are fortunate to be so well served by men dedicated to the public good.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. MAHON. I am glad to yield to my friend from Iowa.

Mr. GROSS. May I say that it is for the reason that we have had many fine statements and I suspect there will be more to come that I made the point of order of a quorum not being present; because I think there ought to be more Members on the floor to hear the statements made on a bill involving $36 billion.

Mr. MAHON. Mr. Chairman, I do not quarrel at all with my good friend from Iowa.

Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. MCCORMACK) having resumed the chair, Mr. MILLS, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill (H. R. 7665) making appropriations for the Department of Defense for the fiscal year ending June 30, 1958, and for other purposes, had come to no resolution thereon.

LIMITATION OF DEBATE ON H. R. 7665

Mr. MAHON. Mr. Speaker, I should like to confer with the gentleman from Massachusetts [Mr. WIGGLESWORTH] as to the remaining time for debate. The indications are that about 4 hours equally distributed between the gentleman from Massachusetts and myself would be reasonably adequate to finish the debate. If the gentleman is agreeable to that, I ask unanimous consent that the remainder of general debate be limited to not more than 4 hours, with the time to be equally divided between the gentleman from Massachusetts [Mr. WIGGLESWORTH] and myself.

Mr. WIGGLESWORTH. Mr. Speaker, that is entirely agreeable.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. MAHON. Mr. Speaker, I ask unanimous consent that the gentleman from Arkansas [Mr. NORRELL] be permitted to include appropriate extraneous matters in the remarks which he made this afternoon.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

GENERAL LEAVE TO EXTEND

Mr. MAHON. Mr. Speaker, I ask unanimous consent that all Members who have spoken on the bill may have permission to revise and extend their remarks and insert appropriate extraneous matter.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

FEDERAL EXCISE TAX LAWS

Mr. COOPER. Mr. Speaker, I offer a resolution (H. Con. Res. 179) and ask unanimous consent for its immediate consideration.

The Clerk read the concurrent resolution, as follows:

Resolved by the House of Representatives (the Senate concurring), That there be printed 12,400 additional copies of the report to accompany H. R. 7125, a bill to make technical changes in the Federal excise tax laws; of which 7,500 copies shall be for the use of the Committee on Ways and Means; 4,200 copies for the House document room; 500 copies for the Senate document room; and 200 copies for the use of the Committee on Finance.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. BURLESON. Mr. Speaker, may I advise the Chair that the report on the resolution just passed is on the Clerk's desk.

COMMITTEE ON GOVERNMENT OPERATIONS

Mr. MILLS. Mr. Speaker, I ask unanimouse consent to address the House for 1 minute.

Mr. SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. MILLS. Mr. Speaker, at the suggestion and request of the gentleman from Massachusetts [Mr. MCCORMACK], I announce that the Committee on Gov-

ernment Operations will have a meeting at 10 o'clock on next Tuesday in room 1501 to consider the bill H. R. 6711, to extend the Reorganization Act of 1949. This is done in order that Members interested in the legislation may be on notice of this meeting and the consideration of this bill.

FEDERAL TAX LAWS AS THEY PERTAIN TO DEPLETION ALLOWANCES

Mr. CURTIS of Missouri. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. CURTIS of Missouri. Mr. Speaker, for some time I have advocated a reevaluation of the Federal tax laws as they pertain to the extractive industries with particular reference to the depletion-allowance theory.

On April 15, 1957, the St. Louis Post-Dispatch had an editorial titled "Millions Congress Overlooks," in which they discussed the tax depletion allowance. On April 18, 1957, I wrote to the editors of the St. Louis Post-Dispatch, explaining my interest to them on this subject matter and discussing it at some length. On May 7, 1957, I wrote to Congressman JERE COOPER, chairman of the House Committee on Ways and Means, formally requesting that the Committee on Ways and Means hold hearings on this subject. I sent a copy of this letter to Secretary of the Treasury Humphrey. On May 17, 1957, I received a reply from Secretary Humphrey setting forth his views with respect to hearings by the Ways and Means Committee on this subject.

I have not received a reply from the chairman of the Ways and Means Committee in answer to my letter of May 7, to date. However, I believe that it is most important in this time of need of the Federal Government for revenue and of equalizing the tax structure among the many segments of our economy to move promptly toward a reevaluation of our tax laws as they affect the extractive industries. I am making this material public because of the general interest in this matter. The proper way to begin is to have hearings by the Ways and Means Committee.

[From the St. Louis Post-Dispatch of April 15, 1957]

MILLIONS CONGRESS OVERLOOKS

Surely Congress is not going to go to the end of its present session without doing something about the oil-tax depletion allowance.

The utmost hullabaloo is being raised about reducing outgo for foreign aid, for the Post Office, for schools, or for anything at all. Yet here are many millions being lost to the Treasury every year for no good reason, and only a handful of Senators are willing to do so much as stand up and be counted on either side.

The oil-depletion allowance is intended in theory to give oil companies incentive to explore for new oil reserves. Last year reserves of crude oil and natural gas stood at a record high, yet the depletion allowance still offers special incentives to the discovery of still more.

Thanks to the depletion allowance, the oil companies enjoy an advantage over all other kinds of business. They can deduct 27½ percent of their net income before figuring their income tax, up to half their gross income. Accordingly, in the last 31 years, during which income taxes for most corporations have risen from 14 to 52 percent, income taxes for some oil companies have gone down to as little as nothing.

Superior Oil Co. earned $10 milion in 1953, but instead of paying income taxes it collected a credit of $100,000 from the United States Treasury. The following year it earned $12,500,000, paid no income taxes, and collected $500,000 in credits. The depletion allowance even goes abroad. A syndicate of American oil companies known as Arabian-American earned $272 million in Saudi Arabia in 1955 without paying Uncle Sam a nickel.

Senator WILLIAMS, of Delaware, has proposed scaling the allowance down to 20 percent, which he estimates would recover $250 million a year in income taxes for the Treasury. Senator DOUGLAS, of Illinois, alternatively proposed keeping the figure as it is for companies earning less than $1 million a year, and reducing it to 15 percent for companies with $5 million or more of taxable income.

Neither Senator could get enough colleagues to raise their hands to force a roll-call vote, which would go on the record—and only a fifth of those present was required. The only Senators who responded to Mr. WILLIAMS' appeal were DOUGLAS, AIKEN, of Vermont, POTTER, of Michigan, LAUSCHE, of Ohio, JAVITS, of New York, and NEUBURGER, of Oregon. Two years ago WILLIAMS, DOUGLAS, and AIKEN had tried with similar unsuccess to compel individual Senators to take sides. Again the other day the Senators, in a supine exhibition of political cowardice, simply shouted down the proposals.

There is justification for some limited amount of depletion allowance to compensate for the risks the oil industry takes in exploring new reserves. The amount allowed is excessive, constituting a drain on all other taxpayers to afford a bonanza for a few. Talk in Congress of saving the taxpayers' money will ring most hollowly as long as these particular millions go on being squandered.

APRIL 18, 1957.

To the Editors of the St. Louis Post-Dispatch, St. Louis, Mo.

GENTLEMEN: I read with interest your editorial of Monday, April 15, 1957, entitled "Millions Congress Overlooks," referring to the Federal tax deduction permitted the owners of oil and gas wells for depletion in the amount of 27½ percent of the income derived from these properties.

For several years I have advocated a new look at the depletion allowances permitted under our Federal tax laws for mineral deposits (including oil and natural gas). I am convinced that the percentage depletion allowances do not accurately reflect the actual depletion experienced under modern methods of extraction. Furthermore, the estimates which the percentage figures reflect need not be so arbitrary in the light of modern knowledge of what mineral wealth actually exists in producing mines and wells. Our tax laws should reflect the knowledge we now possess about the extraction of oil, gas, and other minerals, rather than the knowledge we had 30 years ago.

However, if we are going to take a look at this matter, I think it would be helpful to throw more light on the subject. Furthermore, if we are going to make a political issue out of it, we should take a real look at the politics involved.

In the first place, the Senate of the United States has very little to say about initiating any changes in the Revenue Code. The Constitution quite clearly bases the power to initiate tax laws in the House of Representatives. So it is less important to know what Senator WILLIAMS or Senator PAUL DOUGLAS or Senator LYNDON JOHNSON thinks about this matter, even though they may talk a lot about it, and more important to know what Speaker SAM RAYBURN and the 15 Democrat members and 10 Republican members of the Ways and Means Committee think about it.

The oil-depletion allowance is not intended in theory to give oil companies incentive to explore for new oil reserves. This may be one of its practical results. The theory behind the oil-depletion allowance is constitutional. The 16th amendment gives the Federal Government the power to tax income, but not principal. Any mining operation involves the return of capital. A mine is worth so much at any given time, but the owner of the mine, as he continues to extract the mineral, lessens the value of the mine and when the mine itself is exhausted the mining property has little value.

The difficulty in applying the income tax to mining operations comes from the fact that it is hard to know just how much mineral is in the mine (or oil in the well) at a given time. If it could be determined exactly how much was there, an actual figure for capital could be used instead of an estimated figure. Furthermore, if an owner is to replace his capital investment and remain in the mining business, he cannot just go out on the market and purchase his replacement. To bring out this point, by contrast, anyone in a manufacturing business can replace his wornout machinery by buying on the market new machinery. To replace the capital investment lost through mining, one must resort to exploration for a new ore body. The capitalization of the costs for exploration then becomes another complicating factor in computing what is income and what is return of capital in the mining business.

Discovery depletion was first adopted in applying income taxation to the mining industry to permit the capitalization of moneys spent searching for new mineral deposits. Because discovery depletion was difficult to figure accurately and apply (particularly in equal fashion to mineral deposits blocked out before the income tax law became effective and mineral deposits discovered and blocked out after the income tax law became effective), percentage depletion was adopted for oil and gas in 1926 for metal mines, coal, and sulfur in 1932 and later on for other minerals. There is no question of inequality as between citizens in the tax laws applicable to gas and oil production. Any citizen or any group of citizens derive the same benefits if they go into this occupation. The laws have been on the books ever since the income tax law first went into effect over 40 years ago. If, indeed, the oil and gas businesses were especially lucrative, there would be an excess of investment in the oil and gas industries. Some argue that this is the case. The test of this is, Do we have adequate oil and gas reserves in the United States of America and available to the United States of America? Some argue that we have more than adequate reserves. Others argue that we do not. This is one basis for determining whether our depletion percentages are producing good or bad economic results.

Essentially, the oil and gas industries attract public notice, because there is a large element of gamble in the business. There are many losers, but the winners are few and the amount they win is large. An examination of only the winners gives a very distorted view of gambling, so an examination of those who have become wealthy in the oil and gas industry gives a very distorted view of the industry and permits the industry to become the butt of demagogs. However, unlike gambling, the oil and gas industry is essential to our society. Governmental regulation or Government operation would not

UNIVERSITY OF MICHIGAN LIBRARIES

result in a better performance in the search and development of oil and gas discoveries. A healthy private enterprise system seems to produce the best results. This is not entirely theory. Many nations have resorted to semigovernmental systems over a period of years with very mediocre results.

However, rather than to judge what the economic effects of our tax laws are on the oil and gas industry in relation to our overall economy, inasmuch as the question is not one of extremes, I think the important thing to judge is whether the tax laws as written actually provide an accurate measuring stick for what is truly capital return and what is income in our mineral extraction industries. If the measuring stick is accurate, I am satisfied the economic effects will be beneficial. If the measuring stick is inaccurate to the extent that more capital is moved into this area of human endeavor than would normally go in, but for the tax structure, then the economic effects might be detrimental. On the other hand, there are areas in our economy which for various reasons we decide should be subsidized through Government fiat. Perhaps oil and gas production is such an area.

My own conclusions are that oil and gas production is not an area where we need subsidization and, even if it were, I would rather get the matter out in the open so that we would be conscious of the fact that we were subsidizing it. Then we would be in a position of making some decisions as to how much it should be subsidized. Subsidy through tax laws is subtle and easy and, in my judgment, one of the greatest dangers to our traditional system of government.

I believe that the present depletion percentages do not accurately measure what is capital return and what is income in the oil and gas industries. I am not prepared, without further study, to say what figure would be most realistic. However, I believe it is quite important that the Ways and Means Committee undertake an objective study at once to determine what percentage figure would be more realisic to measure what is capital return and what is income. It is entirely possible that a better formula than an industrywide formula, such as percentage depletion is, can now be devised in light of our increased geological knowledge.

Sincerely,

THOMAS B. CURTIS.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D. C., May 7, 1957.

Hon. JERE COOPER,
Chairman, House Committee on Ways and Means, Washington, D. C.

DEAR MR. COOPER: In 1955 a subcommittee of the Joint Economic Committee on economic aspects of our Federal fiscal policies conducted some studies entitled "Federal Tax Policy for Economic Growth and Stability." One chapter of these studies was devoted to the impact of Federal taxation on natural resources development. The papers prepared by the experts on this subject appear on pages 419–493 of the Joint Committee print, "Papers submitted by panelists appearing before the subcommittee on tax policy." The interrogation of this panel of experts by the subcommittee appears on pages 350–411 of the printed hearings before the subcommittee on tax policy, December 5–16, 1955.

The work of the Joint Economic Committee is limited to a consideration of broad governmental policies and the effects of these policies on our economy. The committee does not cover specific legislation, nor does it propose specific legislation.

Congressman WILBUR MILLS was chairman of this subcommittee and I was a member of it. Both of us being members of the Ways and Means Committee were undoubtedly stimulated in our interrogation of the panel experts by our interests in specific tax legislation.

For some time, I have advocated a reevaluation of the Federal tax laws as they pertain to the extractive industries with particular reference to the depletion allowance theory.

Discovery depletion was first adopted in applying income taxation to the mining industry to permit the capitalization of moneys spent searching for new mineral deposits. Because discovery depletion was difficult to figure accurately and apply (particularly in equal fashion to mineral deposits blocked out before the income tax law became effective and mineral deposits discovered and blocked out after the income tax law became effective), percentage depletion was adopted for oil and gas in 1926, for metal mines, coal, and sulfur in 1932, and later on for other minerals.

I believe it is important that the Ways and Means Committee do undertake to reevaluate our tax laws in this area as soon as possible and, for this reason, I am putting in writing a formal request to you as chairman that this be done.

Perhaps this is a subject matter that the subcommittee of the Ways and Means Committee headed by Congressman MILLS can properly go into.

If there are any reasons why you feel that the Ways and Means Committee should not or cannot go into this subject at this time, I would appreciate knowing what these reasons are. Furthermore, if it is simply a question of timing rather than desirability that this be done, I would appreciate your advising me at what time the Ways and Means Committee might undertake this work.

I am further moved to make this formal request of you as chairman of the Ways and Means Committee in light of the action taken by several Senators recently to modify our depletion laws through amending H. R. 4090, a bill to extend the corporate and excise tax rates, on the Senate floor. In my judgment, such basic laws should not be changed in such a fashion and without proper study by the Ways and Means Committee. Certainly, the House of Representatives should seek to avoid the subversion of the Constitution which clearly provides that tax bills must originate in the House of Representatives. The House can lose this basic right, however, through a failure to move in and exercise this right in matters which require action as I feel is the situation in this instant case.

Sincerely,

THOMAS B. CURTIS.

THE SECRETARY OF THE TREASURY,
Washington, May 17, 1957.

Hon. THOMAS B. CURTIS,
House of Representatives,
Washington, D. C.

DEAR TOM: Many thanks for sending me a copy of your letter of the 7th to the Honorable JERE COOPER, advocating a reevaluation of the Federal tax laws relative to the extractive industries, with particular reference to the depletion allowance theory. I am interested to know of your concern with the subject.

As you know, I feel that while in a general way the practical effects of the present depletion provisions are carrying out our general national purposes, I certainly would not object to a thoroughgoing, complete study, with hearings, to determine whether any changes might be required for the future best interests of the country as a whole.

Best to you.

Sincerely,

GEORGE HUMPHREY.

THE EISENHOWER MIDDLE EAST DOCTRINE

Mr. OSMERS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. OSMERS. Mr. Speaker, residents of New Jersey's Ninth Congressional District, which I represent, support the Eisenhower administration's Middle East doctrine by a 2½-to-1 ratio, according to replies received so far to my 1957 questionnaire.

More than 11,000 replies have already been received from approximately 40,000 questionnaires which I mailed out recently. Fifty-four percent replied "yes" to the question: Do you favor using United States military force to prevent Communist aggression and expansion in the Middle East? Twenty percent replied in the negative, and 26 percent were undecided.

Continued economic aid to friendly and neutral nations was favored by nearly 4 to 1, or 76 percent to 20 percent. But of those favoring continued aid, there was a 3-to-1 ratio favoring such aid at reduced cost. Only 4 percent were undecided on continuing aid.

Aid with restrictions to Communist nations was opposed by a 2-to-1 margin with 59 percent against and 31 percent in favor, and 10 percent undecided.

Sixty-one percent were opposed to cutting the Federal budget to a point where domestic programs and services are curtailed. Thirty-one percent favored such cutting, and 8 percent were undecided.

Replies show heavy support for some of the bills introduced by me. My proposal for a complete review of budget and tax policies by qualified citizens and Congressmen was favored by 91 percent. Such a review is provided for in my bill, H. R. 6028.

Immediate tax relief for small business was favored by 72 percent, with only 14 percent opposed and 14 percent undecided. My bill, H. R. 6027, affords such relief.

Federal scholarship aid for scientific and technical training for qualified students as called for in my H. R. 1976, was approved by 80 percent of those replying, with 17 percent opposed and 3 percent undecided.

My H. R. 6951 and House Resolution 80, which seek to end employment discrimination due to age, were approved by an overwhelming 93 percent.

As a possible repercussion of current Congressional investigations into labor-management rackets, 67 percent of the replies favored Federal supervision of pension and welfare funds, with 23 percent opposed and 10 percent undecided.

An increase in postal rates on all classes of mail to cover the Post Office Department deficit was favored by 70 percent, opposed by 20 percent, with 10 percent undecided.

Eighty-one percent of those replying favored the prohibition of billboards on new Federal highways, a measure which has my strong support. Only 10 percent were in favor of permitting billboards, with 9 percent undecided.

Six months' active duty training for all new reservists and National Guard enlistees was supported by 73 percent of

those who replied. Seven percent opposed it, and 20 percent were undecided.

Replies are still coming into my office in fairly heavy numbers. Those who have filled out and returned these questionnaires have really helped me in my efforts to represent my constituents intelligently.

Mr. Speaker, I wish to emphasize a statement which I have made before, namely, that there is no single method as helpful to me in determining the feelings and wishes of my constituents as the replies which I receive from these annual questionnaires. I want to thank publicly, especially those who have sent detailed comments on the various questions covered and other public issues.

Here is a summary of percentage replies:

Do you favor—	Yes	No	Undecided
1. Using United States military force to prevent Communist aggression and expansion in the Middle East?	54	20	26
2. Continued economic aid to friendly and neutral nations?	76	20	4
3. Aid with restrictions to Communist satellite nations?	31	59	10
4. Complete review of budget and tax policies by qualified citizens and Congressmen (my H. R. 6028)?	91	4	5
5. Cutting the Federal budget to a point where domestic programs and services are curtailed?	31	61	8
6. Immediate tax relief for small business (my H. R. 6027)?	72	14	14
7. Raising postal rates on all classes of mail to cover deficits?	70	20	10
8. Federal supervision of pension and welfare funds?	67	23	10
9. Federal scholarship aid for scientific and technical training of qualified students (my H. R. 1976)?	80	17	3
10. 6 months active duty training for all reservists and new National Guard enlistees?	73	7	20
11. Ending employment discrimination due to age (my H. R. 6951 and H. Res. 80)?	93	4	3
12. Keeping billboards off new Federal highways?	81	10	9

HOUSING

Mr. VURSELL. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. VURSELL. Mr. Speaker, I take this time to inform the Members of the House, who recently passed the housing bill, that the Banking and Currency Committee of the other body has reported out a housing bill which, I understand, will come to the floor of the other body for action early in the coming week.

What they do in the other body may become of particular interest to the House when the result of their actions is brought to the House by the conference committee on the housing legislation.

The Banking and Currency Committee of the other body has made a number of radical changes in the bill this body passed. However, today in order to keep the House informed, I will confine my remarks only to the college housing part of the bill.

First, I would like the Members of the House to know that the Banking and Currency Committee of the other body, in reporting the bill, leaves the interest rate to the Government at the present 2⅞ percent compared with the House bill recently passed providing an increase in interest rate on Government loans for college housing to 3½ percent.

I would like also to point out that the Banking and Currency Committee of the other body increased the additional loan fund of $150 million for college housing which amount was requested by the Administrator Mr. Cole, to $200 million, an increase of $50 million over the action taken by the House.

It is important to note that the Banking and Currency Committee of the other body provided that $25 million of the amount be reserved for "building housing for nursing students and interns at a public or private hospital."

This is a new project that does not have the approval of the college housing agency, and certainly should be defeated in the other body or later in a conference by the Members of the House.

As the ranking minority member for the House Appropriations Subcommittee for Independent Offices, before which the representatives of the Housing and Home Finance Agency came and testified at length, and from a subsequent study I made of the housing bill, I would like to give a short review of the act with particular reference to the college housing section.

Re pertinent facts about college housing loans.

The act was written in 1950 providing that the Housing and Home Finance Agency with the help of the Treasury would fix the interest rates. The rates they set for the first 5 years averaged 3.05 percent.

Then the Congress, in 1955, amended the statute and lowered the interest rate the colleges should pay the Government to 2⅞ percent, which exists to the present time.

This liberality on the part of the Congress with the taxpayers' money caused wealthy universities and educational institutions to flood the Housing and Home Finance Agency with five times as many applications for loans in 1956 and 1957 as had been received during the previous several years.

Lowering these interest rates caused the tax-exempt, well-financed educational institutions to quit borrowing from commercial sources, insurance companies, and so forth, with the result that of the last $60 million in loans for college housing, all were financed by the Federal Government. Low interest rates have driven private lenders out of the market.

The officers of the Housing and Home Finance Agency, seeking to correct the matter, testified before the Banking and Currency Committee, urging the interest rates be raised. That committee recently reported the bill to the House, raising the rates to 3½ percent, which was approved without any objection. Certainly the Senate bill keeping the rates at 2⅞ percent should be amended to an increase of 3½ percent, as passed by the House.

It is ridiculous for the Government to pay 3½ percent for money and loan the funds at 2⅞ percent to tax-exempt wealthy colleges at a loss of ⅝ percent.

The House approved an additional loaning fund of $150 million for college housing, and, in this instance, the committee of the other body raised that amount of loan fund $50 million over the amount requested by Administrator Cole for college housing, and over the amount passed by the House, to a total of $200 million of which they start a new program by reserving $25 million of the amount of $200 million proposed by the Senate for building housing for nursing students and interns, at public or private hospitals. This is a new project that does not have the approval of the college housing agency, just another camel getting his nose under the tent.

If adopted, this will open the door to the extension of this program—not only to the building of homes for student nurses and interns—and is not limiting the program to its original intent for higher educational institutions exclusively.

This new program should be stopped before it is extended to the unnecessary building of housing for nursing students and interns, at public or private hospitals. No one can justify the initiating of this new program.

The Finance Committee bill of the other body increases the total loan funds to $950 million, and keeps the interest rate at about 2⅞ percent. It also provides the new project for nursing and intern facilities, for both public and private hospitals. Certainly this new project has no place in college housing.

MORE FUNDS AUTHORIZED THAN NEEDED

Here are documented facts:

Since the act was passed in 1950, only $403,081,000 has been firmly committed for loans. Of this $403,081,000, only $178,917,214 has been loaned. Of this amount, only $169,319,000 has been spent for the purchase of bonds, and, in addition to this, only $9,598,214 has been advanced for the purpose of beginning construction on college housing projects.

In addition to the $178,917,214, $224,163,785 has been firmly committed, or obligated, for executed contracts.

This brings the total amount of money that has been firmly committed, or obligated, or loaned to $403,081,000. This is the total amount of money that has been obligated out of the authority they now have of $750 million for the 7 years in which this program has been in operation.

If the Senate bill is passed, as written, it will increase the obligatory authority for the college housing agency $50 million over Mr. Cole's request for 1958, to a total of $950 million—Mr. Cole, the Administrator, requested $900 million.

This will give them over the $403,081,000, which they have committed but have only spent $178,917,214, an authorization advance backlog of $546,919,000.

UNIVERSITY OF MICHIGAN LIBRARIES

If the Senate bill is amended, as it should be, increasing the interest rates to 3½ percent, it will greatly reduce the request for Government finances, because tax-exempt educational institutions will largely go back to private enterprise to secure the major part of their funds, as they did before the interest rate was lowered in 1955 from 3½ to 2⅞ percent.

This points up the fact that if it took 7 years to firmly commit only $403,081,000, it will doubtless take another 7 years to firmly commit the balance of $546,919,000, and if the interest rate is raised to 3½ percent, as it should be, there is good reason to believe that the amount of funds provided for in the Senate bill will not be committed within the next 10 years.

It would seem to me that if we are ever going to reduce the budgets for the future, it is incumbent upon the House and Senate to reduce authorizations. I think the House made a mistake in adding $150 million to this authorization, and it would appear that the Senate is about to make a greater mistake by increasing the authorization to $200 million instead of $150 million, and its greatest mistake of initiating a new program of living quarters for student nurses and interns, in public and private hospitals, at a token cost of $25 million this year—another case of the camel getting his nose under the tent.

The history and facts of college housing, as above related, would seem to sufficiently justify the Congress in disapproving the $200 million, and holding the authorizations to $750 million in order to let the construction program of college housing use up, if it can, all the $346,919,000 yet uncommitted as of March 31, 1957.

SMALL BUSINESS

Mr. ULLMAN. Mr. Speaker, I ask unanimous consent that the gentleman from California [Mr. ROOSEVELT] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Oregon?

There was no objection.

Mr. ROOSEVELT. Mr. Speaker, the distinguished chairman of the Senate Committee on Small Business, the Honorable JOHN J. SPARKMAN, introduced a resolution which clearly sets out the problems faced by small business in securing a fair share of the procurement dollars spent by the Department of Defense.

I have today introduced a similar House resolution with the hope that if the Senate and House each enact such a declaration of principle, it will have an important effect upon the Department of Defense, and thus, render a real service to the thousands of small-business concerns who can afford no lobbyists or large staffs in Washington, and who, therefore, must depend on the elected representatives of the people to defend their rights.

THE PANAMA CANAL

Mr. HAYS of Arkansas. Mr. Speaker, I ask unanimous consent to address the House for 1 minute for the purpose of acquainting the Members with certain problems in connection with the Panama Canal and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. HAYS of Arkansas. Mr. Speaker, one of the key events in our Nation's history was the acquisition on May 4, 1904, of the Canal Zone coupled with the construction of the Panama Canal, 1904–14, inaugurated by President Theodore Roosevelt.

It was my special privilege to attend, on May 18, 1957, the 22d annual meeting of the Washington chapter of the Panama Canal Society consisting of former officials, engineers, and employees who were engaged in the construction of the great waterway or in its subsequent operation and maintenance; also members of the Foreign Service and Armed Forces who have served on the Isthmus. Thus, its membership is representative of the various professions, skills, and occupations that have contributed toward the historic project.

The officials of the society were Col. George S. Brady, president; Alexander E. McClure, vice president; and Gustav C. Hertz, secretary-treasurer. The committee on arrangements consisted of Joseph A. Cheeseman, chairman, and Stephen Latchford.

Among the guests were: one colleague, the gentleman from Kentucky, Hon. Eugene Siler, Dr. Edward L. R. Elson, pastor of the National Presbyterian Church; Col. Robert W. Fojt, president of the Marine Equipment Board; Capt. James W. Farmer; Dr. Charles S. Collier, professor of law, George Washington University; one of my esteemed professors in my own legal training some years ago; Dr. Arno C. Fieldner, Fuels Technologist of the Bureau of Mines; Mrs. Gaillard Sherman Rogers; Dr. Louis M. Sears, professor of history emeritus, Purdue University; Mrs. Ruth Shipley, former head of the Passport Division, State Department; and Dr. Charles C. Tansill, professor of American history and diplomacy, Georgetown University.

Dedicated to all those directly identified with the construction, maintenance, operation, sanitation, protection, and defense of the Panama Canal, the occasion was outstanding, and, indeed, of historic character.

The principal address was by the Hon. Maurice H. Thatcher, sole surviving member — 1910–13 — of the Isthmian Canal Commission, life-long student of Isthmian problems, and distinguished former member of Congress from Kentucky. The second speaker was Capt. Miles P. DuVal, United States Navy, retired, well-known historian of the Panama Canal, recognized authority on its operational problems, and author of the terminal lake-third locks plan for its major improvement.

Dr. Charles S. Collier, who has studied the legal questions involved in the current debate, also spoke briefly.

The subject of the very timely discussion was Suez and Panama. The speakers contrasted and compared the situations presented by the two great interoceanic canals.

Under leave to extend my remarks, I include the addresses of Governor Thatcher, Captain DuVal, and Professor Collier, as follows:

ADDRESS OF HON. MAURICE H. THATCHER

Mr. President, distinguished guests, oldtimers, members of the society, and friends, because of the increasing discussion at home and abroad concerning the question as to whether the recent seizure of the Suez Canal by Egypt constitutes any precedent as to whether Panama may have any right to claim ownership and control of the Panama Canal, it has been deemed appropriate for this annual meeting of our society to hold this discussion. Certainly the subject of any proposals for surrender by the United States of all the rights, power, and authority concerning the Panama Canal and the Canal Zone, either to Panama or to some international authority, is one to engage the attention of our citizens generally, particularly the oldtimers whose efforts and sacrifices so greatly contributed to the success which our Nation achieved in the construction of the great water link at Panama. What I shall say on the subject will be said in good spirit, without any personalities involved, and for the purpose of stating my views for whatever they may be worth.

Our limited time today will not permit any extended discussion, but I shall strive to point out certain distinct differences between the two situations—the one at Suez and the other at Panama. I shall address myself especially to the treaty arrangements providing for the construction of the Suez Canal and of the ownership involved, and offer a brief reference to our treaty with Panama in 1903, leaving to Captain Du Val—an eminent authority and historian on the Panama Canal—the task of stating in more detail pertinent provisions of our several treaties with Panama.

SUEZ CANAL

The political status of the two canals—the Suez and Panama—are to be contrasted. The Suez Canal was constructed under a concession granted in 1854 by the Khedive of Egypt to Ferdinand de Lesseps which authorized the latter to organize a private company—designated as the Universal Suez Maritime Canal Company—for the purpose of constructing, maintaining, and operating that waterway. The grant involved ran for 99 years, commencing from the day of the opening of the canal for operation. Under the concession the Egyptian Government was to receive an annual stipend of 15 percent of the net profits derived from the operation of the canal. All necessary lands, etc., were available to the company which might be necessary for the work. The concession was supplemented and amended by that of January 5, 1856, but did not change the period of the concession. At the time of these concessions Egypt was a part of the Ottoman Empire, of which Turkey was the dominant member, and ratification was made by the Sultan of the Empire. Under the grants thus accorded de Lesseps organized the required company, which sold stock to individual investors and obtained the required funds, and successfully accomplished the great task which he had thus undertaken. The concessions included formal provisions requiring the canal to remain open as a neutral passage to all the merchant ships of the world. The canal was begun in 1860 and put into successful operation upon its completion in 1869.

On October 29, 1888, there was signed at Constantinople a convention or treaty by

Germany, Austria-Hungary, Spain, France, Italy, The Netherlands, Russia and Turkey with respect to the free navigation of the Suez Canal. Great Britain, though named as a signatory, did not sign but did respect the convention, and formally adhered to it through the Anglo-French agreement of April 8, 1904.

I can only refer briefly to the 1888 convention or treaty. It provided that the Suez Maritime Canal should always be free and open in time of war as in time of peace to every vessel of commerce or war without distinction of flag. Other supporting provisions were included in this convention, with the territorial rights of Turkey reserved. The latter provision is to be contrasted with the cession of sovereignty of the Canal Zone strip in Panama. Until the recent seizure of the Suez Canal by Egypt, it was governed by the concessions to de Lesseps and the convention of 1888. The indicated seizure was clearly in contravention of the provisions in those documents and contrary to all international law, which is to the effect that one nation cannot abrogate by itself the treaty provisions based on appropriate considerations and before the end of the prescribed period. There must be mutual abrogation. Hence, the action of Nasser in Egypt was without authority of treaty or international law, and in derogation of both, and was largely motivated by a desire for revenge because of his failure to procure from the United States and Great Britain funds for the Aswan dam project. Of course, Soviet influence was back of Egypt. The lease period for the Suez Canal had only about 12 years to run from the date of Nasser's action. The waterway would pass automatically to Egyptian ownership and control in 1968; but the unexpired leasehold was of substantial value. Nasser thus undertook to confiscate valuable property of shareholders of the company, which was, indeed, a ruthless act.

PANAMA CANAL

Now let us turn to Panama. The case there is altogether different. The Suez Company was organized as a private undertaking, with a commercial company and with the operation of the canal as a source of profit. Under the company it was operated successfully and profitably, and, as I have stated, with 15 percent of the net profit to Egypt. As to Panama, in addition to the basic indemnity paid to the Panamanian Government of $10 million, the United States paid first to Panama an annuity of $250,000; subsequently increased to $430,000; and under a recent treaty raised to $1,930,000. Also, under the last-named treaty, the United States is according to the Panamanian Government and its people certain additional benefits of substantial character.

After the failure of the French attempt to construct the Panama Canal, no other nation or authority could have constructed it. Only the United States was in a position to undertake the work, and our Government did undertake it agreeably to treaty arrangements with Great Britain and the Republic of Panama; and at its own cost did construct it. All informed persons know something of the battle for the location of the proposed Isthmian Canal, which resulted in the choice of Panama; and they know something also of the fact that Panamanian independence grew out of the situation thus presented. The United States also, agreeably to the treaty of Colombia of 1922, paid to that country the sum of $25 million—Panama before that country's secession in 1903, having been part of Colombia.

The task of construction was a formidable one and what seemed to be insuperable difficulties had to be mastered. Yellow fever and malaria, together with other tropical diseases, held the Isthmus of Panama in their grip, and Panama was known as one of the world's worst pestholes. Adequate sanitation had to be established before there could be any hope of success in the American undertaking, and the sanitary miracle that followed was brought about by American skill and leadership, headed by General Gorgas. In order to accomplish the task in hand, our Government negotiated a treaty with Panama, immediately upon the independence of the latter—November 1903—whereby the newly created nation gave to the United States, for stated considerations, authority to construct from ocean to ocean through the center of the country, the canal; and also transferred to the United States, as stated in the treaty, complete sovereignty over the 10-mile zone strip through which the canal was to extend; as well as very broad powers as to sanitation, expropriation of additional lands for use of the canal, and the like. It is pertinent that in this connection, I refer to article II of that treaty, which states that the Republic of Panama grants to the United States in perpetuity "the use, occupation, and control" of a 10-mile-wide strip from ocean to ocean, being necessary for the construction, maintenance, operation, sanitation, and protection of the canal, with a like grant for other lands, islands, and waters outside the zone deemed necessary and convenient for the indicated work.

Article III provides as follows: "The Republic of Panama grants to the United States all the rights, power, and authority within the zone mentioned and described in article II of this agreement, and within the limits of all auxiliary lands and waters mentioned and described in said article II, which the United States would possess and exercise if it were the sovereign of the territory within which said lands and waters are located to the entire exclusion of the exercise by the Republic of Panama of any such sovereign rights, power, or authority."

The United States would not, and could not, have undertaken the work except for these and other grants named in the treaty of 1903. Not only was the canal to be built, but it had to be maintained and operated, in perpetuity; and this our Government, in that treaty, obligated itself to do. As already indicated, the treaty also provided, article XIV, for the payment of our Government to the Republic of Panama of $10 million upon the ratification of the treaty, and an annual payment of $250,000, beginning 9 years later. These payments were to be in addition to certain other benefits to Panama indicated in the treaty.

In connection with the work of the United States Government as to the construction of the canal, it must be borne in mind that not only has our Government expended hundreds of millions of dollars in the work of constructing, sanitating, maintaining, operating, and defending the canal, but also some of our Nation's finest men and women serving in the canal enterprise on the Isthmus in the earlier days died of yellow fever, malaria, the plague, and other deadly ailments. Their supreme sacrifice contributed a priceless contribution to the American effort at Panama.

Whatever may be thought of the provisions in the basic treaty of 1903, between Panama and the United States, touching the nature of the authority, ownership, and control which the United States may have with respect to the canal and the Canal Zone, certainly there can be no question of such control and authority so long as the canal is maintained and operated by the United States agreeably to the terms of the various pertinent treaties involved. I certainly heard of no authoritative suggestion during my official service on the Isthmus adverse to the authority of the United States in the canal and the Canal Zone. It was a part of my duties there to represent the Isthmian Canal Commission in all its relations with the Panamanian Government.

The question of residual ownership may be more or less of an abstract or theoretical character, because the right and authority of the United States over the Canal Zone and the canal have been fully exercised ever since the treaty of 1903. The United States must be able to police and protect the immediate territory adjacent to the canal in order to maintain and operate the canal. Therefore, the zone strip was agreed on at the outset as the necessary permanent region to pass to the control and authority of the United States.

If for any reason the United States should abandon the maintenance and operation of the canal, it is not likely that it would care to retain any control or authority over the zone strip, whatever its rights, if any, might be in that connection. It must be kept in mind that the United States and Panama are mutually pledged as to the perpetual operation, maintenance, and control of the canal. These questions, it seems to me, should be dealt with realistically and not otherwise.

There isn't the slightest doubt of the fact that if the United States had not given adequate protection of the Panama Canal in World Wars I and II and in the Korean war, the enemies of the United States would have utterly destroyed it. The protective process required to preserve the canal and its operation has—first and last—cost the United States the vast sum which the Nation's taxpayers have furnished. No other government, source, or authority has contributed a dollar for this purpose or for the sanitation, maintenance, and operation of the canal.

Moreover, the basic cost to the United States in adding the protective installations required has run to many millions of dollars, aside from the added cost of maintaining troops on the isthmus and in the isthmian regions for protective purposes. These items constitute in their collective way a very strong consideration, which, in my judgment, should preclude surrender by the United States of its control, maintenance, and operation of the canal to any other authority. Certainly in no proposal of which I have ever learned has there been any suggestion whatsoever as to reimbursement to the United States as a condition precedent to such surrender.

The United States has scrupulously performed its treaty obligations to operate the canal on equal terms for all. So long as the United States continues this policy there can be no adequate reason for its surrender of the canal to another authority.

As to the Panama Canal, permit me to make this further observation. It is well known that the Communist powers and the Communist adherents throughout the world favor such surrender of authority and control of the canal henceforth, preferably to an international body. It is also well known that there are those in our own land and in other free countries, unrealistic idealists, who favor such internationalization, hoping that the indicated surrender would constitute another example on the part of a free country to inspire Communist powers with the spirit to show a like magnanimity in their dealings with other nations. Most of the free nations have pretty well been liquidated in the past few years, and instead of taking the examples thus set before them as matters for emulation, the Communist powers have built upon the fading strength of the free nations. And so it would undoubtedly be if the United States made such surrender. In the event of war between the free nations and those of the Communist world, the latter would strive to destroy the Panama Canal, if their military interests seemed thus to require, and this would be true even if an international authority was in control of it.

Because of the situation now presented as to the Panama Canal and its future, I believe

UNIVERSITY OF MICHIGAN LIBRARIES

that it would be wise—and indeed absolutely necessary—that the position of the United States be made very clear on the subject of the canal; and that to this end it would be timely and well for the Congress of the United States to declare in some appropriate declaration its attitude on the subject. It seems that all the propaganda—and I assure you there is a great deal of it—has been on behalf of such surrender, and chiefly for internationalization.

There is, I fear, something of tension arising between the United States and Panama because of the increasing demands and requests by Panama for greater benefits claimed because of the presence and operation of the canal. This situation is to be deplored, because as between Panama and the United States all questions that affect the two countries should be settled amicably through the orderly processes of negotiation. It is inevitable that differences will from time to time arise, and ofttimes there will be very strong differences involved. But destiny has linked the two Nations together and thus far they have been able to solve their differences in mutual respect, and these processes should continue in the future. Otherwise, both of the nations will suffer. In this connection, I may say that if reliance cannot be placed upon treaty agreements, then I do not know how questions arising under them can be solved. Those agreements should be fully respected by both parties; and to this end, of course, I favor the implementation by the Congress and our executive branches of any agreements now or hereafter arising which may require implementation. On the other hand, I adjure our Panamanian friends who are in authority to stand with us squarely on the treaty arrangements which have provided for the construction, maintenance, operation, sanitation, and protection of the canal; and if there are differences in interpretations, these should be resolved—not under emotions of nationalistic zeal on either side—but in the spirit of amity. If basic facts can be agreed on, solutions are much easier of achievement.

In this general connection permit me to say that during my Isthmian tenure I found among the Panamanians some of the finest, dearest friends I have ever known. They were of the independence era, and some of them had been leaders in the independence movement. They possessed high character and courage. Some of them occupied the chief posts of the Panamanian Government; and they always cooperated in the fullest and most effective manner in the work of the canal. Not in a single instance did they ever fail to deal promptly and satisfactorily with any request which it was my duty to submit in behalf of the Isthmian Canal Commission with respect to the construction of the canal. Accordingly, here and now—as always in the past—I make most grateful acknowledgment.

Therefore, in the light of history and experience, and based on the just and realistic consideration involved, it is undoubtedly for the best interests of the United States and those of Panama, as well as for the best interests of the world at large, that the United States continue in the control and operation of the Panama Canal in accord with treaty agreements and obligations.

ADDRESS OF CAPT. MILES P. DU VAL

Mr. President, Governor Thatcher, distinguished guests, ladies, and gentlemen, you have just heard an historic address by an historic personality. A full answer to Governor Thatcher's suggestion would involve a complicated story on which many volumes have been written. Yet, when reduced to its essentials, it is relatively brief and simple. Moreover, the diplomatic story of the Panama Canal is a topic that appeals strongly to all ever associated with the great enterprise.

The story starts with events in the last half of the 19th Century. At that time the United States and Great Britain were diplomatically deadlocked in a struggle for control of the Nicaragua route, which was then the most favored site for a canal. With these two great powers thus preoccupied, French private interests launched upon their tremendous effort to build a canal at Panama, 1879–89, under concessionary arrangements with Colombia, Panama, then being a portion of that country.

Ending in a colossal failure that created a political crisis in France, this ill-fated attempt had far-reaching consequences. It brought the Panama Canal route to the front in world opinion. It demonstrated that the task of building an interoceanic canal was too vast an endeavor for private enterprise, and that it would require the support of a strong government. It aroused the interest of the United States in completing the venture.

Fortunately, technical engineering and sanitation developments by that time had reached the stage that would make the canal undertaking possible. The United States, which had learned much from its program of transcontinental railroads, was well prepared for the undertaking.

One of the first important steps in the great American saga was to resolve the deadlock with Great Britain from the restrictions of the 1850 Clayton-Bulwer Treaty, which had deprived the United States of exclusive control of any Isthmian canal.

After prolonged negotiations conducted by Secretary of State John Hay and Lord Pauncefote, the British Ambassador, the diplomatic situation was cleared in what was the first of the three great canal treaties, the Hay-Pauncefote Treaty, of November 18, 1901, which was proclaimed on February 22, 1902.

What did this treaty accomplish? Superseding the 1850 treaty, it recognized the exclusive right of the United States to construct and manage any Isthmian canal. It also adopted the principal points in the Convention of Constantinople of 1888 for the Suez Canal as rules for the operation and neutralization of the American canal.

These rules included the basic provision that the canal shall be "free and open" to "vessels of commerce and of war of all nations" that observe them on terms of "entire equality" with tolls that are "just and equitable." They also authorized the United States to "protect it against lawlessness and disorder."

The next year, in a historic congressional struggle between advocates of the two proposed canal sites, which has been described as the battle of the routes, Panama won with the passage of the Spooner Act, approved June 28, 1902. This act authorized the President to acquire from the Republic of Colombia the perpetual control of a strip of land across the isthmus for canal purposes. But diplomatic difficulties intervened.

In the ensuing crisis, which followed rejection by Colombia of the Hay-Herran Treaty between that country and the United States, Panama seceded from Colombia and declared its independence on November 3, 1903, a day still commemorated in Panama as Independence Day.

The result was that the second basic canal treaty, known as the Hay-Bunau-Varilla Treaty of November 18, 1903, was negotiated between the United States and Panama, instead of Colombia.

This treaty, in compliance with provisions of the Spooner Act, granted to the United States "in perpetuity" the "use, occupation and control" of the Canal Zone for the "construction, maintenance, operation, sanitation, and protection" of the Panama Canal. It also guaranteed the independence of the Republic of Panama.

The agreement further stipulated that Panama granted to the United States "all the rights, power, and authority" within the Canal Zone and certain auxiliary areas that the United States would "possess and exercise" as "if it were sovereign of the territory." And quite significantly, this was granted "to the entire exclusion of the exercise by the Republic of Panama of any such sovereign rights, power, or authority."

That the intention of the authors of the Hay-Bunau-Varilla Treaty was to provide for perpetual control of the Canal Zone and the Panama Canal by the United States as required by law is evidenced by the fact that the key word, "perpetuity," is used six times in the treaty. Another interesting provision was the grant to the United States of the power of "eminent domain" in the Republic of Panama, as necessary for the "construction, maintenance, operation, sanitation, and protection" of the canal.

A third important international agreement was the Thomson-Urritia Treaty of April 6, 1914 between the United States and Colombia. Proclaimed March 30, 1922, this treaty likewise recognized the independence of Panama and the title to the Panama Canal and Panama Railroad as "vested entirely and absolutely in the United States." It extended to Colombia essentially the same canal rights with respect to tolls for the transit of troops, materials, and ships of war as were granted to Panama in the Hay-Bunau-Varilla Treaty.

These three international agreements complete the treaty edifice upon which the ownership and control of the Panama Canal by the United States rests. They were the logical results of a long series of historical events and experience at both Suez and Panama.

The Hay-Bunau-Varilla Treaty of 1903 was the high-water mark of United States "rights, power, and authority" in the Isthmian area. The structure remained in effect for 35 years unchanged. It still constitutes the diplomatic foundation of the Panama Canal.

The approach of World War II served to precipitate some changes in the original Hay-Bunau-Varilla Treaty as embodied in the Hull-Alfaro Treaty proclaimed in 1939. Its provisions included abrogation of the guarantee of the independence of Panama by the United States and of the right for the exercise by the United States of "eminent domain" in the Republic of Panama. It raised the original annuity of $250,000 to $430,000, and extended other special benefits to Panama.

A second postconstruction treaty in 1955 between the United States and Panama raised the annuity from $430,000 to $1,930,000, and authorized substantial additional benefits to Panama.

In this connection, however, it should be stated that the United States has not given up the major "rights, power, and authority" granted "in perpetuity," under its 1903 Hay-Bunau-Varilla Treaty for the "construction, maintenance, operation, sanitation, and protection" of the Panama Canal. The United States still has jurisdiction over the Canal Zone and Panama Canal as if it were sovereign of the territory and, in accordance with treaty, "to the entire exclusion of the exercise by the Republic of Panama of any such sovereign rights, power, or authority."

ADDRESS OF PROF. CHARLES S. COLLIER

Mr. Chairman, distinguished guests, and members of the Panama Canal Society, the opportunity which you have so graciously accorded me to say a few words on this occasion comes to me unexpectedly. But I shall endeavor to respond to the best of my ability.

There are three currents of propaganda adverse to the interests and rights of the United States in relation to the Panama Canal, which have become increasingly important as well as conspicuous during the last few months. The first of these is propaganda for turning over the management and operation of the canal to an international

commission of some sort. This idea has been stressed recently by writers like Mr. James P. Warburg, who believes that such a move would set an example that would influence Colonel Nasser and other leaders in Egypt, and would thus solve the Suez crisis. I would like to say right here that I believe this hope or expectation is entirely groundless. Nasser is not interested in the Panama Canal. It is of no direct importance to Egypt. He would never think of giving up his special advantages at Suez from which he expects to derive great diplomatic gains throughout a long future, merely to imitate an abdication policy of the United States at Panama, if the United States were so hasty and unwise as to adopt such a policy. All the evidence goes to show that Nasser is thinking along entirely different lines.

But there is another factor in world opinion that works in favor of the suggestions for an international commission, and that is the general idealistic sentiment in favor of the development of the United Nations. But the charter of the United Nations does not contemplate any such administrative activity as this, and there is no machinery for it. From the world viewpoint, the Panama Canal had best be left in experienced hands, where competence and impartiality of operation methods have been proven. This is one field where the Soviet veto should never be allowed to operate, nor should the dark and pernicious forces of communistic policies and rivalries, Asiatic as well as Russian, even when they operate through United Nations agencies or commissions, be allowed to disrupt or interfere with the successful administration of our great canal. It actually is of little present economic importance to the Communist despotisms. Their interest in Panama is purely political and military. This is so obviously a case where an ounce of prevention is worth more than several pounds of cure.

The second current of propaganda and diplomatic pressure toward weakening the control of the United States at the Panama Canal comes from Panama itself. The United States has always maintained a genuine "good neighbor policy" toward Panama. There can be no doubt that the general economic property of the people of Panama is founded upon the service of the canal, which was built by the enterprise, skill, and energetic leadership of the Government of the United States as well as by the investments of many hundreds of millions of taxpayers' dollars, taken from the taxpayers of the United States. The benefits in sanitation alone throughout the Canal Zone, and auxiliary lands, as well as throughout Panama's own territory have been of immense, indeed of incalculable, value to all the people of Panama.

Yet, some of the spokesmen for Panama do not seem satisfied with the present arrangements, that are so beneficial to both nations on the basis of true mutuality. They have recently sought further concessions such as the transfer of both terminal stations of the Panama Railroad to Panama jurisdiction, which has in consequence been authorized by the treaty of 1955. But this transfer was against the natural logic of railroad operation and may prove very harmful to the United States.

But we should not overlook another distinct factor which animates the high-minded and generous among our Panamanian friends, and that is their idealistic notions of territorial sovereignty over the entire Isthmus. But responsibility and power must go together. If the United States is to bear the responsibility before world opinion for the successful operation and maintenance of the Canal, it must have complete power over the Canal Zone and the auxiliary lands, power of government, sovereign power in all respects, just as the language of the treaty of November 1903, the Hay-Bunau-Varilla Treaty so plainy provided.

Now there is a third source of adverse propaganda against our regime at the Panama Canal, and that is of course the Communist powers. The Soviet Government desires ardently to weaken the United States, and will employ any means whatever toward this end. If they can diminish our control at Panama at all, this will be just so much gain for their overall plans. To weaken the United States is to weaken the only power which can prevent world domination by the Communist bloc. In this worldwide context, it is supremely important to keep the United States strong and mighty. This is an objective that outweighs almost all other considerations. We must rely on our Latin-American friends to perceive and act upon this central truth. The larger nations of South America, Brazil, Argentina, Chile, indeed all the Latin-American states have everything to lose and nothing to gain from any diminishing of the power and the ownership rights of the United States at Panama.

There is another aspect of this Soviet propaganda, that I would like to stress. It happens that the free nations of the world have had control over the great strategic waterways of the world, not only at Panama, but at Suez, at the Kiel Canal in Germany, and at the Bosphorus and the Dardanelles in Turkey. Their long control at Suez has already been terminated.

I want particularly to stress the point as to the position of our magnificent ally Turkey, for I believe this has not been mentioned here today. If Russia could lure and mislead the nations of the world to attempt to impose the control of a mixed international commission upon navigation at the Bosphorus and the Dardanelles, what a terrific victory that would be for the advance of Soviet domination, not only in the Near East, but over the whole world. What a fatal blow that would be to the safety and indeed to the very independence of Turkey. Yet the casuistical arguments that are today employed by Soviet propagandists against our position at Panama could equally well be employed against Turkey's position at the Bosphorus and the Dardanelles. And this would be true both from a legalistic and from a factual point of view. Let us guard and preserve our own rights and interests at Panama, while we at the same time guard and preserve the rights and interests of one of the most important and one of the most reliable of all our allies, Turkey, at the eastern gates of the absolutely vital Mediterranean Sea.

I would like to close with one concrete suggestion, which I have not heard mentioned here today. Let us get rid of the Panama Canal Corporation—and turn the canal properties back to the direct ownership of the United States itself. The United States built the canal at the expense of the United States Treasury. There is not a dollar of private investment involved. The United States long operated and maintained the canal under its own name, and with no disguise over its ownership or its territorial sovereignty. Then, late in the day, so to speak, the Panama Canal Corporation was established to act as an agency for the United States Government, which owns all of the corporate stock. The invaluable physical properties constituting the canal and its auxiliary installations were all turned over legally to this Corporation.

Now I believe this was all a mistake. It was a first step toward divorcing the United States from the canal. American legal technicians and bureaucrats may look upon the Panama Corporation as if it were merely a bureau or arm of the United States Government. But to foreigners all over the world, even foreigners who are well informed in a general sense, this arrangement suggests that there is an independent capitalistic corporation interposed between the United States Government and the canal management. They infer that the Panama Canal Corporation is like the Union Pacific Railroad, originally a United States corporation, or even more closely similar to the ill-fated Suez Canal Corporation, whose rights were wantonly invaded with so much apparent success by Colonel Nasser's government, on the pretext and with the legalistic excuse of paramount territorial sovereignty as against the rights of purely private property. The suggestion offered by the Egyptian Government was that a private capitalistic corporation was being nationalized and private property was being taken for public use.

Now it is obvious to us here today that the Panama Canal Corporation has a very different character from the Suez Corporation. But this may not be obvious to all the world. The presence of this gigantic corporation at Panama beclouds the issues. It hides the real role of the United States Government as the owner with the interests and rights of ownership, as well as the powers of a sovereign over the entire Canal proposition. The Panama Canal Corporation somehow conceals the truth of the matter and creates distorted impressions in the minds of many persons all over the world, who have not had the opportunity to think the matter through, and thus to understand the real truth of the situation.

So why not get rid of this Corporation? Let us abolish this corporate veil which hides or partially distorts the truth for so many people. Let Congress turn the canal and all the properties back to the United States Government itself. Let the canal be run by a bureau or agency of the United States Government named directly by the President, and all of whose members can be removed by him at any time. I believe this would create a different atmosphere. I know I should sleep more securely if this step were taken!

Mr. Chairman, ladies, and gentlemen, I want to thank you all most cordially for your earnest attention and generous response.

After the addresses, on motion of William R. McCann, of Hopewell, Va., distinguished engineer, formerly associated with the Isthmian Canal Commission, 1907–14, the society unanimously adopted the following resolutions:

RESOLUTIONS OF THE PANAMA CANAL SOCIETY OF WASHINGTON, D. C., ADOPTED MAY 18, 1957

Whereas communistic influences in this country and in the world at large have long been insistent that the United States surrender all its authority for the control and operation of the Panama Canal to an international body or some other authority; and

Whereas certain noncommunistic elements, at home and abroad, have also urged that the canal be internationalized; and

Whereas the United States, under solemn treaty agreements and guaranties, assumed the great risks and obligations involved, and at huge cost to the United States Government and its taxpayers undertook and consummated the construction of the Panama Canal, and has since successfully maintained and operated it, in strict accordance with treaty provisions, for its use by all the ships of the world without discrimination; and has effectively protected, at its own expense, the canal and the Canal Zone during two World Wars and the war in Korea; now, therefore be it

Resolved by the Panama Canal Society of Washington, D. C., at its annual meeting in Washington, on May 18, 1957, as follows:

1. That the society believes that every just and wise consideration favors the retention, in perpetuity, by the United States of all its sovereign rights, power, and authority with respect to the Panama Canal

UNIVERSITY OF MICHIGAN LIBRARIES

and the Canal Zone, as guaranteed by existing treaties.

2. That the society is also of the judgment that such retention by the United States of all its sovereign rights, powers, and authority embodied in such treaties will be for the best interests, not only for the United States and Panama, but, as well, for the world at large.

3. That it is the further judgment of the society that, in view of the situation now presented, the Congress of the United States should, at the earliest possible date, declare its views on this important subject—which, as the society would respectfully urge, should be a reaffirmation of the long-standing Isthmian policy, based on the solemn treaty agreements providing for the construction of the Panama Canal and for the perpetual maintenance, operation, sanitation, and protection of the canal and the Canal Zone.

4. That copies of these resolutions be furnished to the appropriate committees of the Congress, and to the press.

Following the discussion, Congressman SILER stated to the assemblage that he was much pleased therewith, and indicated his approval of the proposed policy declaration by the Congress concerning the Panama Canal recommended by Governor Thatcher; with which view I fully concur.

So timely was the subject matter of the meeting, and so constructive its approach toward the current situation, that I believe this account of its principal features merits a place in the annals of the Congress. Moreover, the information developed therein should aid the Congress in formulating a reasoned policy and is commended for study by all agencies concerned with the canal question. The people of Panama can be assured, at all stages of policy formulation and implementation, of the desire of the people of America to preserve their friendship and good will through fair treatment and close cooperation.

THE HELLS CANYON DAM

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Oregon [Mr. ULLMAN] is recognized for 30 minutes.

Mr. ULLMAN. Mr. Speaker, recently each Member of Congress received a brief bulletin isued by the Council of State Chambers of Commerce entitled "The Many-Lived Hells Canyon Bill." I have carefully examined this bulletin and find it grossly inaccurate. As the Congressman from the congressional district in Oregon adjacent to the Hells Canyon damsite, I would like to make a brief analysis of some of the glaring misrepresentations contained in this publication.

The general thesis of the bulletin is that the benefits to be achieved from the high dam at Hells Canyon and the 3 small dam program of underdevelopment advocated by the Idaho Power Co. are approximately equal. Based on this erroneous premise, the bulletin rapidly reached the equally erroneous conclusion that the Idaho Power Co. should be allowed to continue its desecration of the Snake River. In setting forth this thesis, the council is guilty of both the sin of commission and omission.

From any conceivable standpoint, the high dam at Hells Canyon is infinitely superior to the proposed three small dams. From the standpoint of prime power capability, the high Federally constructed dam has approximately a 300,000 kilowatt advantage. And considering power potential from the standpoint of salable firm power, the high dam could produce approximately 1,238,400 kilowatts of power as compared to the 853,000 kilowatts that the 3-dam scheme could produce.

The same superior benefits exist when one considers flood control, navigation, or recreational benefits. The high dam holds out the possibility of 3,880,000 acre-feet of storage capacity, while Idaho Power Co.'s program of underdevelopment would only supply 1 million acre-feet.

Power revenues from the high Federal dam would be used to aid in the development of irrigation and reclamation projects in the basin. Not one dime of revenues from the private power project would go into anything except profits to private investors. Development of the scenic splendors of the Snake River Basin would be lost forever.

In this context, it is interesting to consider the bulletin's chronology of the Hells Canyon dispute. Certainly, here, the sin of omission is very obvious. The council's chronology stresses the fact that the Federal Power Commission held extensive hearings and that staff engineers of the Commission had spent many man-hours studying the various proposals for development of the Snake River prior to licensing of the Idaho Power Co. What the bulletin fails to mention is that Congress had previously authorized the Corps of Engineers and the Bureau of Reclamation to study development potentialities of the Snake River. Consonant with this authorization, these agencies made the requisite study and concluded that full development of the river necessitated a high storage dam at Hells Canyon. The findings of the corps and the Bureau were also supported by the Federal Power Commissioner examiner who heard the Hells Canyon case and who, at the termination of more than a year's hearings, concluded:

> The facts seem to point to the inescapable conclusion that with the marked and substantial advantage of the Government's credit, the high dam would be dollar for dollar the better investment and the more nearly ideal development of the Middle Snake (p. 55 of FPC examiner report).

Yet, there is no indication of this in the council's bulletin. There is only the flat statement that the FPC on August 4, 1955, issued a license to Idaho Power Co. for construction of three dams. Nor is there any indication in the bulletin that this decision was a blatant refusal to accept factual engineering conclusions because of political pressures emitting from the highest political circles.

Mr. Speaker, the council's bulletin also provides erroneous information concerning the cost of the high dam at Hells Canyon, and who will pay that cost. According to the council, Hells Canyon "would have imposed a wholly unnecessary burden of one-half billion dollars on the Nation's taxpayers." The latest cost estimate concerning the high Hells Canyon Dam is $366 million. Of this, approximately 85 percent, or $311 million, is reimbursable. What this means is that over $311 million will be repaid into the Treasury, plus interest, by ratepayers in the Pacific Northwest. Hells Canyon will pay itself out and at the end of a 50-year period it will not have cost the taxpayers or the Federal Government a single penny. It will be owned by the taxpayers and will continue to annually bring into the Federal Treasury millions of dollars.

From any standpoint, the high Hells Canyon Dam is one of the soundest investments in which the Federal Government could possibly engage.

The council bulletin relies heavily on the fact that construction of the Brownlee Dam by the Idaho Power Co. has already begun, and that subsequent abandonment of the private project would cost the taxpayers dearly since Idaho Power Co. would have to be reimbursed. It is completely erroneous to state that the American taxpayers will be charged with the cost of reimbursing the power company. The fact is that such reimbursement will be made by the ratepayers of the region. Certainly such payments will not add more than a fraction of a mill to the cost of power, and certainly this fraction of a mill is insignificant when the additional benefits to be achieved by construction of the Federal project are fully weighed.

Mr. Speaker, I cannot help but note in passing that the bulletin makes no mention of the present condition of the Brownlee Dam site. Certainly, by implication, the council's bulletin attempts to paint a glowing picture of progress being made by Idaho Power Co. and of the large expenditures which the company has paid out. I find no mention whatsoever of the fact that the Snake River is still flowing in its old channel, that there is no way of knowing how much damage was done to the earthen core by the flood of last February, nor that the channel-construction works will probably remain underwater until late this summer. Nor do I find reference to the fact that the Federal Power Commission has recently admitted that basic changes in design are being contemplated and that these plans have not even been approved at this time by the FPC.

Mr. Speaker, I find it extremely striking that a bulletin issued by an organization often given to the issuance of sanctimonious platitudes concerning the high level of Federal spending should fail to mention that the Idaho Power Co. is a recent recipient of rapid tax writeoff certificates which are going to cost the Federal Government millions of dollars. On April 25, 1957, the Office of Defense Mobilization issued rapid tax-amortization certificates to the power company and, thus, the taxpayers were brought in to bail out the power company and to underwrite the cost of private development of the Snake River.

Mr. Speaker, this inexcusable and indefensible transfer of funds out of the taxpayers' pockets into the pockets of the stockholders of this sprawling private utility has been roundly and rightfully condemned by responsible Senators and Congressmen. Issuance of these certifi-

cates also belies the empty contention of the power companies that underdevelopment through the three low-dam scheme would not cost the taxpayer 1 cent.

For the issuance of these certificates means that the Idaho Power Co. will be virtually freed from all Federal income tax for a period of 5 or 6 years, thus draining the Federal Treasury of approximately $30 million. And let us bear in mind that such savings will not be passed on to the ratepayers, but in all probability will be made available directly to stockholders either in dividends or in a reinvestment program. And when all depreciation is written off, the private utility company will merely raise rates to cover any possible deficiency.

Yet, no mention of this form of banditry is made in the bulletin of the Council of State Chambers of Commerce. Instead, the bulletin breaks down the supposed cost of the Hells Canyon Dam for each of the States. No mention is made of the fact that most of this money would be reimbursed to the Federal Government by the ratepayers. I suggest that the council analyze the cost to the Federal Government of the tax writeoff certificates issued to Idaho Power Co. and break that amount down by State to determine how much the taxpayers of each State will have to pay for this giveaway. I also suggest that they clearly point out that this loss will bring no benefits to taxpayers or to the Nation, and that there will never be any reimbursement of this giveaway.

Mr. Speaker, if the information contained in this bulletin is typical of that issued by the Council of State Chambers of Commerce, I fear that this council is nothing more than a puppet of the private utility syndicates. If so, it should clearly be labeled as such. This bulletin gives every indication that the council has joined the highly suspect group which is dedicated to the further plundering of our natural resource heritage.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mrs. ROGERS of Massachusetts, for 5 minutes, today.

Mr. BAILEY, for 45 minutes, on Tuesday next.

Mr. ULLMAN, for 30 minutes, today.

Mrs. ROGERS of Massachusetts, for 5 minutes, on Monday next, and to revise and extend her remarks and include extraneous matter.

Mr. FLOOD, for 1 hour, on Wednesday next.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mrs. GRANAHAN.

Mr. POWELL (at the request of Mr. SANTANGELO).

Mr. CEDERBERG and to include an article which is estimated by the Public Printer to cost $481.25.

Mr. CURTIS of Missouri after general debate today on the subject of tax depletion allowances and to include extraneous matter.

Mr. SAYLOR (at the request of Mr. ARENDS) and to include extraneous matter.

Mr. WIGGLESWORTH to revise and extend his remarks on the floor today and to include tabular and extraneous matter.

Mr. HOFFMAN and to include excerpts.

Mr. ROGERS of Texas.

Mr. FEIGHAN.

Mr. POWELL (at the request of Mr. FLOOD).

ADJOURNMENT

Mr. FLOOD. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 14 minutes p. m.), under its previous order, the House adjourned until Monday, May 27, 1957, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

887. A letter from the Administrator, General Services Administration, transmitting a draft of proposed legislation entitled "A bill to amend the Federal Property and Administrative Services Act of 1949, as amended, regarding advertised and negotiated disposals of surplus property"; to the Committee on Government Operations.

888. A letter from the Chairman, Federal Power Commission, relative to submitting the financial statements of proceeds derived from licenses issued by the Federal Power Commission under the Federal Power Act and stating that they were inadvertently omitted from the information transmitted on December 31, 1956; to the Committee on Interstate and Foreign Commerce.

889. A letter from the Secretary of the Army, transmitting a draft of proposed legislation entitled "A bill for the relief of Kiyohito Tsutsui"; to the Committee on the Judiciary.

890. A letter from the Secretary of Commerce, transmitting a draft of proposed legislation entitled "A bill to authorize appropriation of an additional sum required for completion of the Inter-American Highway"; to the Committee on Foreign Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. CANNON: Committee of conference. H. R. 7221. A bill making supplemental appropriations for the fiscal year ending June 30, 1957, and for other purposes (Rept. No. 478). Ordered to be printed.

Mrs. GREEN of Oregon: Joint Committee on the Disposition of Executive Papers. House Report No. 479. Report on the disposition of certain papers of sundry executive departments. Ordered to be printed.

Mr. BURLESON: Committee on House Administration. House Concurrent Resolution 179. Concurrent resolution authorizing the printing of additional copies of the report to accompany H. R. 7125, a bill to make technical changes in the Federal excise-tax laws; without amendment (Rept. No. 480). Ordered to be printed.

Mr. FORAND: Committee on Ways and Means. H. R. 7125. A bill to make technical changes in the Federal excise tax laws, and for other purposes; without amendment (Rept. No. 481.) Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. AVERY:

H. R. 7756. A bill to amend the Watershed Protection and Flood Prevention Act with respect to measures for erosion control; to the Committee on Agriculture.

By Mr. HALE:

H. R. 7757. A bill to amend section 382 of the Communications Act of 1934 to provide an exemption from the requirements of part III of title III of the act in the case of certain vessels; to the Committee on Interstate and Foreign Commerce.

By Mr. McGOVERN:

H. R. 7758. A bill to provide for the acquisition of lands by the United States required for the reservoir created by the construction of Randall Dam on the Missouri River and for rehabilitation of the Indians of the Crow Creek Sioux Reservation, S. Dak., and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. REUSS:

H. R. 7759. A bill to amend the Internal Revenue Code of 1954 with respect to the time prescribed for depositing tax payments in Government depositaries; to the Committee on Ways and Means.

By Mr. SISK:

H. R. 7760. A bill to amend section 8e of the Agricultural Adjustment Act (of 1933), as amended, and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended, so as to provide for the extension of the restrictions on imported commodities imposed by such section to all imported citrus fruits, and to sliced figs, dried figs, and fig paste; to the Committee on Agriculture.

By Mr. VAN PELT:

H. R. 7761. A bill to provide for the issuance of a special postage stamp to commemorate the National Flag Day; to the Committee on Post Office and Civil Service.

By Mr. JONAS:

H. R. 7762. A bill to amend section 223 of the Revenue Act of 1950, so that it will apply to taxable years ending in 1954 to which the Internal Revenue Code of 1939 applies; to the Committee on Ways and Means.

By Mr. EVINS:

H. R. 7763. A bill to limit the transmission of advertising circulars and pieces of advertising as third-class (bulk) mail; to the Committee on Post Office and Civil Service.

H. R. 7764. A bill to amend the antitrust laws by vesting in the Federal Trade Commission jurisdiction to prevent monopolistic acts or practices and other unlawful restraints in commerce by certain persons engaged in commerce in meat and meat products, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. BYRD:

H. R. 7765. A bill to provide for assisting the States in the improvement and extension of the National System of Interstate and Defense Highways, and for other purposes; to the Committee on Public Works.

By Mr. KEAN:

H. J. Res. 345. Joint resolution authorizing the erection on public grounds in the city of Washington, D. C., of a memorial to the dead of the 2d Infantry Division, United States Forces, World War II, and the Korean conflict; to the Committee on House Administration.

UNIVERSITY OF MICHIGAN LIBRARIES

By Mr. COOPER:

H. Res. 266. Resolution providing for printing additional copies of a study entitled "Internal Revenue Administration, Progress Report of the Subcommittee on Internal Revenue Taxation"; to the Committee on House Administration.

By Mr. RIVERS:

H. Res. 267. Resolution maintaining the headquarters for Eastern District United States Court; to the Committee on the Judiciary.

By Mr. ROOSEVELT:

H. Res. 268. Resolution favoring the award to small-business concerns of a fair share of purchases and prime contracts made by the military services; to the Committee on Armed Services.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

By the SPEAKER: Memorial of the Legislature of the State of California, memorializing the President and the Congress of the United States relative to the relationship between Federal and State Governments; to the Committee on Interior and Insular Affairs.

Also, memorial of the Legislature of the State of Oregon, memorializing the President and the Congress of the United States requesting that statehood be granted to Alaska and Hawaii during the current session of the Congress; to the Committee on Interior and Insular Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANFUSO:

H. R. 7766. A bill for the relief of Morris Rokowsky; to the Committee on the Judiciary.

By Mr. CRETELLA:

H. R. 7767. A bill for the relief of Domingos Vaz Gomes; to the Committee on the Judiciary.

By Mr. CURTIS of Massachusetts:

H. R. 7768. A bill for the relief of Tuberculosis and Health Association, Inc.; to the Committee on the Judiciary.

By Mr. EVINS:

H. R. 7769. A bill for the relief of Col. Benjamin Axelroad; to the Committee on the Judiciary.

By Mr. JACKSON:

H. R. 7770. A bill for the relief of Mrs. Jeannine Simone Bouchard, and her husband, Paul Bouchard; to the Committee on the Judiciary.

By Mr. O'HARA of Illinois:

H. R. 7771. A bill for the relief of Heinz August Schmarz; to the Committee on the Judiciary.

By Mr. O'NEILL:

H. R. 7772. A bill for the relief of Ursula Holzapfel; to the Committee on the Judiciary.

By Mr. SANTANGELO:

H. R. 7773. A bill for the relief of John Tatakis (Ioannis P. Tatakis); to the Committee on the Judiciary.

By Mr. SHEPPARD:

H. R. 7774. A bill for the relief of Otilio Estrada-Gonzales; to the Committee on the Judiciary.

By Mr. SISK:

H. R. 7775. A bill for the relief of Hermine Keshishyan; to the Committee on the Judiciary.

H. R. 7776. A bill for the relief of Constante Saguiling Nuval Tacata; to the Committee on the Judiciary.

By Mr. WALTER:

H. R. 7777. A bill for the relief of Sgt. John F. Baughman; to the Committee on the Judiciary.

EXTENSIONS OF REMARKS

You Can Have Good Mail Service, If—

EXTENSION OF REMARKS

OF

HON. ELFORD A. CEDERBERG

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, May 24, 1957

Mr. CEDERBERG. Mr. Speaker, recently the people of our Nation have suddenly become interested in the operation of the Post Office Department, but many of the problems involved in the terrific task of handling about 60 billion pieces of mail a year are not generally known.

Recently, the U. S. News & World Report arranged an exclusive interview with Postmaster General Arthur E. Summerfield who has provided the readers of that publication with first-hand answers to many of the questions presently being discussed with respect to the Post Office Department. This interview appears in the current issue of U. S. News & World Report and I feel that it is sufficiently enlightening to be included at this point in the CONGRESSIONAL RECORD:

Mr. SUMMERFIELD. Before I answer your questions, I wish to make some general observations. The spotlight of nationwide publicity has been focused on the Post Office Department recently to an unprecedented degree.

This interest grew out of the inadequacies of our budget, which led to a forced cutback in accustomed mail service over the weekend of April 13, 1957.

While we did not plan it this way, this emergency has probably been helpful for the Post Office Department.

Today many more citizens understand that their post office must have everybody's help if this Nation is to have the postal service our people deserve and expect.

The Post Office Department faces many serious problems.

Its buildings are out of date, overcrowded, poorly located.

It lacks modern equipment and is struggling to handle an ever-growing volume of mail by old-fashioned hand-labor methods.

It is charging 1932 prices for most services. Meanwhile its costs have more than doubled, just as household and business expenses have.

It loses more than half a billion dollars a year. It losses total total more than $5 billion since 1945.

No one in the present management of the Post Office Department is satisfied with the mail service. We know it is better than it was, but we also know it is not good enough. You can have good mail service if certain things are done.

We have plans well underway to attain our goal, which is the next-day delivery of a letter between any two cities in the United States.

In the meantime, the Department has two immediate objectives.

The first is to increase postage rates on first-, second-, and third-class mail so that the Department can operate on a more nearly break-even basis. Doing so would mean that the actual users of the mails would pay more of the costs which are now paid by the taxpayers.

And a half billion dollars of new revenue a year from more equitable postal rates would help balance the Federal budget and contribute to tax reductions.

The second objective is to accelerate a long-range—possibly 10-year—program to build and modernize post-office buildings and develop modern mechanical and electronic equipment to speed mail through post offices 30 to 50 percent faster than is now possible. Unless the buildings and equipment of the Post Office Department are modernized, we face a gradual deterioration and eventual breakdown of our postal service as the mail volume continues to increase.

Now, you've been hearing some misleading statements for a long time. These imply that the Post Office is a "great public-service organization" and as such has always lost a great deal of money, and that isn't any different from the Department of Agriculture, the Department of Defense, the Treasury or any of the other departments of the Government which are supported mainly by general tax funds. This is sheer propaganda disseminated by a few large mail users receiving subsidies.

The fact is that the Post Office Department, from 1900 to 1940, lost on an average only $33 million a year. During that period the Post Office Department absorbed in this $33-million figure the cost of franked mail for Members of the Congress, distribution of mail for other departments of the Government, and airline subsidies.

You will note on the chart [see page 66] that I omit the years from 1941 through 1945, the reason being that those were war years, and during periods of national emergency the Defense Department takes care of the cost of distribution of service mail, which throws the Post Office Department into the black—or did—on an average of $33 million a year during those particular years. So for accuracy's sake, we eliminate those 5 years.

From 1946 to 1956 the postal deficit jumped to an average of $445 million a year, and the total deficit in those years exceeded $5 billion, all of which became part of the national debt: On this, the Treasury is paying interest currently at the rate of about $125 million a year.

Most citizens are budget-conscious today, and rightfully so. Everyone knows that the Government has the largest budget in peacetime history. But so is our gross national product, and so are the demands which must be met by Government to assure the Nation's security.

It is vital to the Nation's welfare that budget cuts not be made in a haphazard manner or for partisan political purposes. As far as the Post Office Department is concerned, it is essential that any budget review be based on an understanding of the facts that differentiate this huge businesslike operation within Government from other branches of the executive department.

In 1952, the last year under my predecessor, Postmaster General Jesse Donaldson, the deficit in the Post Office Department was $720 million, an alltime high. [See photo-chart on page 67.] In 1953, we succeeded in re-

ducing it to $625 million, and progressively to $222 million in 1956, and in 1957, which ends on this coming June 30, an estimated $211 million and an estimated $178 million in 1958.

This reduction, exceeding $500 million, was due to efficiencies and economies through management improvements, increased parcel-post and foreign mail rates, payment of postage by Congress and Government agencies, and transfer of airline subsidies from the Post Office Department to the Civil Aeronautics Board. These airline subsidies now can be scrutinized by the appropriations committees of the Congress—which they never had an opportunity to do before—because heretofore the Post Office had to pay as a subsidy the figure the Civil Aeronautics Board submitted to us, and we had nothing to say about it. They set the rates and the amount of the subsidy, and we, of course, had to pay it.

So when we asked to have this changed, we did it for two reasons: One, I wanted to have a clean budget in the Post Office Department. Second, I believe in the processes that we have developed through the years in this country where the appropriations committees should have a chance to review carefully all budgets, including airline subsidies.

AS DEFICIT WAS CUT, CONGRESS ADDED NEW EXPENSES

Meanwhile, as the basic postal deficit was being reduced, new expenses were being added, mostly by actions of the Congress. They added 25 millions in 1953 to our costs, 47 millions in 1954, another 105 millions in 1955, another 242 millions in 1956 and another 304 millions in 1957—and an estimated amount of $473 million in 1958.

This $473 million includes such items as these: Pay increases of $207 million; fringe benefits of $59 million; retirement-fund contributions, $132 million; increase in capital expenditures over 1952 of $47 million. Now this last was the only item over which the Post Office Department had any influence—for the replacement of worn-out equipment of one kind or another in the post offices throughout the country, and new equipment for new post offices. Finally, there was $28 million in rate increases for the railroads in 1953, making, as I say, a total of $473 million.

Furthermore, the estimated $651 million deficit in 1958 does not include pending rail-rate increases, further employee pay increases or fringe benefits, and the facilities-modernization program of the Department costing a minimum of $110 million per year for the next 5 years.

The meaning here is simple. If we had continued to operate under 1952 standards, we would today have a yearly postal deficit in excess of $1 billion.

So I feel that the administration has done its homework insofar as an effective effort is concerned to improve its efficiency and reduce the deficit of the Post Office Department during the past 4 years.

It is a rather common practice to complain about the number of people on the Federal payroll.

But let's see what has happened in the Post Office Department.

In 1949, there were 517,690 employees on the Post Office payroll.

In 1952, there were 523,757.

In 1955, there were 511,613, and in 1956 there were 508,587.

None of these figures includes the temporary employees we add at Christmastime. So again, in this area, we feel we have improved our efficiency. And we haven't done that by firing employees on a wholesale basis. The reductions are due to attrition, retirement, and deaths among our 500,000 employees.

The recent dilemma of the Post Office Department in requiring more money to continue accustomed mail service through the fourth quarter of this fiscal year was due primarily to the high rate of prosperity the Nation is enjoying, and to reasons beyond our control.

The Post Office Department needed an additional $47 million because the American people are now sending nearly three-fourths of a billion more pieces of mail this year than we estimated 18 months ago that they would; because we must pay the higher wages to postal employees voted by the Congress; and because 1.3 million more homes and 250,000 more business concerns needed delivery service. To have denied these American citizens regular mail service would have been unthinkable.

COULD NOT SPEND MONEY WE DID NOT HAVE

The need for extra money—supplemental appropriations, they are called—is common and often unavoidable in the Post Office Department. In the past 20 years additional funds were needed in all expect 3 years. During these 3 years, 1953, 1954, and 1955, the Eisenhower postal administration returned $235 million of unspent money to the Treasury out of funds appropriated to the Post Office Department by the Congress.

The need for this additional money to continue regular mail service the last quarter of this fiscal year was first made known to the Senate committee last July. Subsequently, the House committee was so advised, as indicated in the record of their January 15, 1957, hearings. The formal request for these needed funds was sent to them on March 12, 1957, by the Bureau of the Budget. They had ample knowledge and time to have prevented this curtailment of mail service.

In taking the step we had to take on April 13, the Department acted in accordance with established practices and the statutory provisions of the law in regard to supplementary appropriations.

To have continued without appropriations would have been in violation of the anti-deficiency law. As President Eisenhower emphasized in his April 17 press conference, we could not spend money we did not have.

The recent publicity about the Department has also focused the spotlight on another phase of our financial problem which most Americans did not understand—namely, that there is a very small percentage of postal expenditures over which the postal management has direct control.

For example, our budget for next year calls for expenditures of about $3.25 billion. Of this huge sum, 96 percent goes for pay of employees, transportation of mail, and occupancy of postal buildings. Postal salaries and fringe benefits are set by the Congress, the rates we pay to railroads and airlines for carrying mail are set by other governmental agencies, and the costs of utilities and communications are largely fixed by other regulatory bodies.

This leaves approximately 4 percent, about $140 million, of the total budget of $3.25 billion for items over which the Department can exercise any real discretionary control—and even that is limited.

TWENTY PERCENT MORE MAIL WITH FEWER EMPLOYEES

Some critics say we could save money by being more efficient and thereby using fewer employees. The answer is that we have been doing that, and the meat-ax approach does not lend itself to either efficiency or good employee morale. Efficiency in the postal service is built by day-to-day improvement at 38,000 places of business. Our record in this respect is a good one and can be wrapped up in 1 simple statistic: We are today handling 20 percent more mail than 6 years ago with fewer employees.

The same is true of transportation. We are today spending $50 million less, comparatively, for transportation per year than 4 years ago, despite the large increase in the volume of mail.

We are all very conscious, in the Post Office Department, of this fact: It's a Government monopoly, and as a monopoly we have to be particularly careful to recognize our responsibility to the postal patrons of this country, which number all of our 170 million fellow Americans. We have tried to do that. We also recognize this fact—which I called to the attention of the appropriations committees of Congress—that the Post Office Department is the one major department of the Government which can identify every service it renders to any individual.

When a person buys a stamp or a series of stamps for the mailing of a letter or a package or parcel, he is paying whatever price the Government of the United States through the Congress is charging for this service, and he has a perfect right to expect that service is going to be provided, because he is paying a specific charge for every service he receives.

Now, then, if we curtail after people have paid their money for that service, we commit a breach of trust. They have no other place to go to mail first-class letters; they have only the Post Office. So I say that, if they are not paying enough for the postal service which they receive—which is true, they are not—that is the responsibility of the Congress of the United States. It is not the fault of the American mail user. He is paying all that the law says he should pay.

You hear a great deal of conversation about the service that foreign countries provide their people and the rates they charge. But the emphasis is usually on service without reference to cost.

We have studied several countries in Europe and we have calculated the number of square miles in area they serve, also what they pay their experienced postmen on an annual basis, and what they charge for a domestic letter rate. I think these are very illuminating figures.

The average square miles served by these countries total 105,808. In the United States, your Post Office Department serves 3,022,387 square miles.

These countries pay their experienced postmen on an average $1,502 a year; whereas the United States Government pays it experienced postmen an average of $4,410 a year.

The average domestic letter rate charged by these same countries is 4.4 cents for a 1-ounce letter, as against 3 cents in America.

These other governments operate their post office either on a break-even basis or at a profit. Our neighbor, Canada, does it consistently on a profitable basis.

Now I'll be glad to answer questions.

Question. Is it true that foreign postal service is a good deal better than our service here?

Answer. It may be better in certain areas of Europe, but the conditions vary so much it's like trying to compare apples and oranges. By the way, I was interested in observing the other day a report that came out of a meeting of the postal unions in Europe—I don't mean employee organizations, but the union of post office departments of various countries—to the effect they are planning on reducing the number of deliveries a day. They have already done that in several instances, reflecting their increase in costs of labor over there. All of the countries in Western Europe are in that group.

POST OFFICE A UNIQUE BUSINESS

Question. Would you say that the Post Office Department is a unique business?

Answer. Certainly in this respect, we cannot set the prices for our goods and services.

Question. Who sets the prices?

Answer. Congress.

Question. Can you change them?

Answer. We can't change them on the first-class mail, airmail, second-class mail, and

UNIVERSITY OF MICHIGAN LIBRARIES

third-class mail. The Postmaster General does set the prices on fourth-class mail, which is parcel post, with the consent of the Interstate Commerce Commission. We are required under the law to operate the parcel post service on a break-even basis, and we have done so.

Question. You say you can't fix the price of the transportation of your mail by train or airplane? Who fixes that?

Answer. The Interstate Commerce Commission sets the rates paid to the railroads, and the Civil Aeronautics Board sets the rates to be paid to the airlines.

Question. So you are in a business where somebody else fixes the rates of what you have to pay, and somebody else fixes the rates of what you can charge for the service itself?

Answer. That is correct.

Question. Who fixes the pay of the employees of your Department? As a head of a business, can you fix the pay?

Answer. No. The Congress of the United States fixes it.

Question. Then your budget has to reflect any increases in pay voted by the Congress?

Answer. Yes.

Question. And then, when you go back to Congress to get enough money to pay for your freight, transportation, employees, and also to get your prices established, can they decide to make you run at a deficit if they want to?

Answer. They can and have.

Question. In other words, they fix your deficits, too?

Answer. They do.

Question. That's not very much like a private business, is it?

Answer. No, and it isn't a sound way to run a governmental agency, I might add. Other countries don't do it that way.

I feel that if the Members of Congress were familiar with all of the ramifications of the Post Office Department, the various items that affect its operation, they could more intelligently adjust the various items to reality.

Question. Your customers are the public. If your customers want service and you run out of service, what are you going to do?

Answer. We should take steps to prevent a recurrence of the April 13 episode, when we curtailed mail service on the week end.

Commonsense would seem to indicate that the Department should have a more flexible means of getting the money it needs to carry extra mail volume. Then, when we sell more stamps and have to provide more service, the extra revenue would be reflected automatically in our spending authority without any of the fuss and fury which arose last month. If estimated mail volume falls off, as it undoubtedly will from time to time, then the Department certainly should not spend as much money as it originally estimated.

Question. In a private business, if you run out of goods, don't you just tell a customer to come back in a couple of weeks?

Answer. That's right.

Question. But you can't say that?

Answer. No. We did that partially for 24 hours on April 13, and you know the reaction.

Question. Did the public react violently to it?

Answer. Violently by some, but many others seemed content not to get any mail on Saturday.

Question. What was the nature of the protest—did they blame the Post Office Department more than Congress?

Answer. Not when they understood. At first, they believed some of the statements that were made on the floor of the House and in statements to the press wherein some members of the Appropriations Committee were blaming the Postmaster General for a so-called arrogant attitude and so on—but when the facts were released to the press and over the air, the change was almost instantaneous.

Question. In most businesses, the head of the business can estimate the demand for his product and get enough supply to take care of the demand. What means do you have for estimating the demand for your product?

Answer. Well, we take the figures for the previous year, and years prior to that previous year, and we can pretty well judge the trends. We study the economic situation that exists in the country at the time—the volume of mail that's being used—and we come up with a reasonably accurate figure.

When you consider that we're talking about 60 billion pieces of mail a year, that we can come up with a figure within 1 billion of that, that's not too inaccurate.

Question. There must be a lot of money received from the sale of stamps. Does that go to the Department at all?

Answer. No; not a penny of it. It goes immediately to the Treasury of the United States.

CONGRESSIONAL APPROPRIATIONS ONLY SOURCE OF FUNDS

Question. And how do you get it out of the Treasury to use?

Answer. Only by appropriation of the Congress.

Question. If you had all the money from the sale of stamps as a revolving fund, would you run out of money?

Answer. It all depends upon whether or not other expenses have been added over and above what they were the year before—for instance, an increase by Congress in salaries and wages or fringe benefits. Sometimes those increase more rapidly than revenue increases from all classes of mail.

Question. By stamps, do you mean revenue from all classes of mail or service?

Answer. All revenues—registered mail, c. o. d., parcel post, airmail—all classes of mail.

Question. Is the cost of printing the stamps charged against you?

Answer. Oh, yes; we pay the Bureau of Engraving and Printing for those, at a price set by them.

Question. When your budget is made up, do you get any use of these receipts?

Answer. Oh, no.

Question. You have a deficit figure here of $545 million. Do you count receipts from stamps in that?

Answer. Yes, in order to determine the amount of the deficit, but that's entirely different. The revenues that come in go to the Treasury.

Question. Then, for operating purposes you don't have it, but it's credited on the books to your Department?

Answer. That's right.

Question. Have you restored all the cuts in service you made a few weeks ago?

Answer. Nearly so. However, we have restricted the Saturday deliveries in business areas to 1 a day, which is adequate, and in most cities of the United States to 2 deliveries a day in business areas on weekdays, with a few exceptions in the larger cities, which get 3 deliveries in business areas on weekdays.

Question. Do you think the American people expect their mail to be delivered the day afterward in towns and cities within a reasonable distance?

Answer. Yes—they either expect it or they want it.

Question. Are they getting it?

Answer. They're getting it in many, many instances, but in many they are not. We're not satisfied with the service. While we have improved it substantially, we are still unsatisfied.

There are two places in which we can improve the delivery of mail. One is to reduce the time it takes a letter to be processed from the time it arrives in the post office until the time it leaves, and the other is to reduce the time in transportation betwen cities. The reason we have so much difficulty—the real bottlenecks—are within post offices.

You must realize that the Government has appropriated no new funds by direct appropriation for the building of any new post offices since 1938. It is since 1938, up until the present time, that this country has had its greatest growth—its greatest expansion in all lines of business.

We're doing business in outmoded, outgrown post offices and we have not been provided the funds by the Congress to do the necessary research work to design modern pieces of equipment that could be used to reduce the demands for floor space per letter, or to reduce the time it takes to process a letter.

It has only been in the last 4 years, really, that any sums of any amount worth mentioning have been appropriated to the Department for the purpose of research. We have used those sums that have been provided us very effectively to date. I have several things I would like to point out to you that we have been able to do in that regard.

To improve mail service in the instances where the distances involved are not great—particularly in the large metropolitan areas—necessitates more efficient handling of the mail within the post offices. We haven't even the simplest fixed conveyors, so familiar to everyone who has been connected with industry, that have been available to private industry for many, many years. We have very, very few post offices in the country that have such equipment at all. We are still forced to use old hand-truck methods to push mail around the floor from one operation to another—all of which takes up floor space, wastes time and is inefficient and costly.

In the meantime, mail volume, as you know, has doubled over the last 20 years. So mechanization of the post offices is absolutely essential to an improvement in the mail service.

Question. Well, isn't there something that is lacking in the transportation? As an example: A special delivery letter of importance to us was put in the post box at 12:30 noon on Saturday and postmarked Princeton, N. J., at 5 p. m., left there in time to get to Trenton promptly by truck, but arrived in Washington at 4 a. m. on Monday and was delivered to us at 7:55 a. m.—36 hours to go 150 miles. We needed that letter on Sunday. That isn't usual, is it?

Answer. That was over the weekend?

Question. Yes. Is it because of Sunday and you don't have transportation?

Answer. Oh, we have transportation over weekends. Of course, we use a minimum force on Sunday within the post offices. We do take care of the incoming and outgoing mail. But, again, that probably is a result of some of the restrictions and some of the curtailment necessitated by this $6 million that the Congress did not appropriate to us out of the $47 million that we requested.

Question. It is much more costly to use the telephone or telegraph than a 3-cent stamp—

Answer. Too many people just fail to realize that the mail service in the United States is the most important system of communications that we have. I think that is one thing, maybe, that will come out of this recent difficulty we had with the Appropriations Committee of the Congress: The public has had its attention focused upon the Post Office and the importance of the service it renders.

TWENTY-FIVE YEARS OF 3-CENT LETTERS

Question. How long ago did you put the 3-cent stamp into effect?

Answer. In 1932. There has been no increase since that time.

Question. How many times since then has the Post Office Department—in this and pre-

ceding administrations—recommended a rate higher than 3 cents and not gotten it?

Answer. We have recommended an increased first-class rate to the 83d, 84th, and 85th Congresses.

Question. What is the highest that was recommended—5 cents?

Answer. Yes, 5 cents is the most. We considered recommending or requesting 5 cents this time, and it was quite apparent after a survey was made of the Congress that they would not give serious consideration to 5 cents at this time.

Question. Do you need a 5-cent rate?

Answer. Yes, we should have 5 cents.

Question. So you had to come back to 4 cents. You haven't got that yet, have you?

Answer. No. The hearings have been concluded in the House Civil Service and Post Office Committee and they have reported a bill out.

Question. Are there any pressure groups fighting increased rates on first-class postage?

Answer. Yes, but the pressure groups are confined, principally, to a few of the larger magazine publishers and some third-class mailers of advertising matter. Some of these large users of second and third-class mail also resist an increase in the first-class.

I think the reasoning behind their actions is that, if the first-class rate increase is granted, the public would insist that second-class and third-class rate increases be also made. As far as the general public is concerned, the polls—and there have been many of them taken in the last 2 years—indicate very clearly that the general public wants the Post Office Department to pay its own way. The last poll that I saw, taken by one of the Congressmen, showed that 91 percent of the people would favor an increase in postage rates in order to put the Post Office Department on a pay-as-you-go basis.

Question. What is the principal argument made by the publishing industry against increasing mail rates, and what is your answer to it?

Answer. Oh, some large publishers say they just can't afford to pay any more postage than they are paying. On the other hand, some are very frank and completel candid about it, and say that they not only can but should.

Question. You're talking mainly about periodicals now?

Answer. Yes, I am speaking about some of the leading magazines in this country, who believe the rates should not be higher. Strangely enough, it's usually the smaller magazines who can least afford to pay an increase that recognize that statesmanship is a responsibility of people in business as well as of people in Government, and they are perfectly willing to pay for an increase. Their testimony before the various committees in Congress will clearly prove that.

COST IF MAIL GOES FREE

Question. What is your answer to the argument that the Post Office Department should be a service department and, therefore, should in large part be paid out of the general taxes collected from industry and the public?

Answer. I'm very frank in my reply. If it is really true that the Post Office Department is strictly a service organization, then we shouldn't charge anything for mail service—let everybody use it at no cost at all, and pay for all the expenses out of the general fund. Mind you, I don't want to see that.

Question. What would it cost the public if you did that?

Answer. Three and a quarter billion dollars a year.

Question. Is it the general feeling in Congress that the Post Office Department should operate at a deficit—that is, as a service organization?

Answer. There is a feeling in the Congress that there probably are some items that should be considered public service and paid for by all taxpayers. For instance, free mail to the blind, certain below-cost rates to fraternal organizations and religious organizations. Again, in order to follow our policy of having a clean budget, we have requested the Congress to pass legislation which would provide for reimbursement to the Post Office Department for a sum of approximately $27 million a year, which covers the postal-rate discounts on these various public-service items.

You see, those who oppose postage-rate increases use those figures in a very exaggerated degree. They blow the figures up from $27 million to several hundred million.

Question. Does that also cover Congressional-franking privileges?

Answer. No, that's already being taken care of. The Post Office Department is paid for carrying Congressional and Government mail.

Question. Do you expect to get a 4-cent rate this year?

Answer. Yes; I'm very confident we'll get it.

Question. What about the airmail rate? Will that go up, too?

Answer. Yes; that will go up to 7 cents.

Question. When you break down that deficit—what's the deficit in each postage class?

Answer. It is approximately $270 million a year in second-class mail. It's approximately $230 million for third-class mail, and about $30 million for first-class mail. This is without providing a proper charge at all for the preferential service which first-class mail does receive over and above the other classes of mail. If service values are considered, we calculate that first-class mail loses $346 million a year.

Question. Would the 4-cent rate still leave a deficit in the first class?

Answer. We would just about break even on first-class. It now costs more than 4 cents for a 1-ounce, first-class letter.

HIGHER RATES, LESS MAIL

Question. Do you think if you raised the rates for mail you would have less of it?

Answer. Yes; I think one of the major factors that have resulted, for example, in the great increase in third-class mail the past several years has been a ridiculously low rate. It is just so cheap that people use it very carelessly. That's why some people call it "junk" mail. There was a time when people used third-class mail rather selectively. When third-class mail first came into being, it was charged 97 percent of its cost. Of course, it went down a great deal since 1932 in relation to the revenue received from it and what it costs to handle it.

I think a substantial increase in third-class mail is not only in order, but it is long past due, and I think it will have the effect of probably improving the caliber of third-class mail. The quality of it, I think, will be higher; I think it will be more readable to the public and more acceptable to them.

Question. Would there be as much?

Answer. I would think, naturally, it would reduce the quantity of it somewhat.

Question. We haven't talked about parcel post. Why should the Government carry parcel post? Why not leave that to the express companies to carry?

Answer. The express companies do not have the facilities to handle small packages. For instance, there are 70 percent of our post offices that cannot be reached directly by train connections. You see, there are a great many fewer passenger-carrying and mail-carrying trains in this country today than there were 20 years ago.

Question. If they receive enough volume, couldn't they use automobiles to deliver just as you do?

Answer. It seems that the more business the express companies have, the greater their losses seem to be.

Question. The Parcel Post Association recently issued a statement contending that you are paying a $100-million subsidy to the railroads and paying them more for carrying your parcel post than the railroads are charging the express company for handling express packages in the same cars. What is your answer to that?

Answer. Well, in the first instance, the railroads, of course, own the express company. If they care to give them a below-cost charge, I guess maybe that is their prerogative. At least, that's the policy they follow. So far as our paying the railroad as a subsidy, that is not true. The rates we pay are fixed by the Interstate Commerce Commission.

Question. If you could do your own negotiating with the railroads, do you think you could do a better job than, say, the Interstate Commerce Commission does?

Answer. In 1953, the railroads had requested from the Interstate Commerce Commission an increase of about 45 percent. We have the right, under the statute, to negotiate with the railroads—we exchange our figures and costs. We finally adjusted that with the consent of the Interstate Commerce Commission to a 10-percent increase.

Question. Have you encouraged the use of vending machines for the sale of stamps?

Answer. Yes; we have.

Question. What effect has the use of vending machines had on the increase in mail?

Answer. I dont know as to the increase in mail, but it reduces the clerk hire in post offices and is a great convenience to the public. We don't have to keep the stamp windows open as long hours today with the vending machines that we have.

Question. You have vending machines in the post office buildings too, haven't you?

Answer. Yes. Those are machines that we developed through our research. We only have a few hundred of them so far. We've had several models built and we've installed them in the post offices, and we are trying to perfect them.

Question. Are those in the drugstores yours, too?

Answer. No, those are privately owned.

PROFIT FROM MACHINES

Question. Do you encourage private companies to put out vending machines?

Answer. Surley.

Question. To save you the time for your clerks?

Answer. Yes, and it is more convenient for the patrons to buy stamps at more places.

Question. They make a profit on them?

Answer. Sure.

Question. Why can't you make that profit?

Answer. By law, the Post Office Department cannot charge more than face value for stamps.

Question. Do you have any control over how much they charge in those machines—such as 10 cents for three 3-cent stamps?

Answer. No.

Question. On that question of the operation of the profitmaking business versus the public service, is it your point that the Department should pay for itself in entirety—that there should be no public-service operations whatever? Where do you draw the line?

Answer. No, not necessarily. I think a reasonable amount should be set aside for public-service items that are actually identifiable as such. Aside from that we should operate on an approximate break-even basis. In fact, the statutes now require Government agencies to charge whatever it costs to provide a direct service for any identifiable person—in fact, all departments in the Government are supposed to operate on that basis, but we can't go beyond because of the action of the Congress itself.

UNIVERSITY OF MICHIGAN LIBRARIES

Question. What is the lag between postage increases and pay increases for your employees?

Answer. There has been no rate increase in first-class mail since 1932. Since that time, there has been $1.3 billion of annual increases in salaries, wages, and fringe benefits to employees.

Question. Have you any scientific method of figuring out what the increases in the other classes of mail should be, other than the first class? First class is easy—you add a cent to the postage and make it 4 cents, but you have all kinds of percentages for the others. How do you arrive at your conclusions as to the equitability of those different percentages?

Answer. Let's take first class: Traditionally, the Post Office Department charged much more than the bare cost of handling first-class mail. In 1932, first-class mail paid about 30 percent more than the allocated costs. In so doing, the Congress recognized the principle that users should pay for the preferential service that first class receives over other classes of mail. However, that situation has changed because of the long delay in the increase in first-class mail rates, so now we are actually running in the red on first-class mail.

Question. First-class mail is costing you more, in other words?

Answer. That's right, the revenue has not kept pace with expenses, which have more than doubled since 1932. About 3 years ago we set up a committee of long-time skillful career people in the Post Office Department who know rate problems, and asked them to study and prepare a recommendation for a system which would provide some recognition in our costs for differences in service between the classes of mail.

In our cost-ascertainment report, we follow the formula which they developed. Under this formula, for example, instead of asking second-class mail to pay the loss of about $270 million that I previously mentioned, we calculate it should pay something around 100 million, after we had allowed for the difference in service factors.

Let me point out that what we are actually asking for in rate increases of 60 percent in second class will produce only around $33 million by the end of the fourth year.

The reason that we did not ask for a larger increase than 60 percent on second-class mail is very simple: The Congress, by its failure to increase the rates from time to time as costs have increased, has permitted publishers to set up their mail-distribution systems on a below-cost mail-service charge. You can't correct that—or you should not correct it, in my opinion—by one stroke of the pen, because you would create a hardship that would fall heavily upon the smaller publishers of the country.

I think Congress can correct this over a period of years in gradual steps rather than to do it at one time, because the effect would be too serious if done otherwise. That's why we proposed four annual increases of 15 percent each.

We're very conscious of the fact that the power of Government should never be used to destroy any important segment of the economy of this Nation.

Question. You spoke of the improvements in service that have been made. What are the principal improvements that you feel have been made during your 4 years?

Answer. We are moving more than a billion 3-cent letters a year by air between important cities of this country. We're doing it for less money than we were previously paying the railroads, insofar as the net cost of the Department is concerned, and we are delivering them up to 48 hours faster.

We have introduced certified mail, which is a cheaper service than registered mail.

Mailers can now put a first-class letter in a package by paying the additional postage for the letter.

We have installed modern mobile equipment—you may have noticed some of the new mail trucks that we are using today which are lightweight, three-quarter-ton trucks as against two-and-a-half-ton trucks that were used by our predecessors through the years—at a great reduction in the cost. They move more rapidly and cost far less originally and are cheaper to operate.

We have mobilized letter carriers in a number of areas in the country with equipment which we ourselves have designed, and, incidentally, we are very proud of some of these new mail trucks that we have developed because they have now become standard production in the automobile plants of this country.

And there are many more things in mechanization of post offices that will move mail faster.

Question. What is the story of the trouble you had recently in getting a supplemental appropriation to continue accustomed mail service the balance of this fiscal year?

Answer. The facts speak for themselves. I first advised the Appropriations Committees in July of 1956 of the need for a supplemental appropriation for 1957—it was quite apparent at that time that we would need more money to handle the increased volume of mail.

We informed the chairman of the Senate subcommittee—the Deputy Postmaster General informed him and the ranking member of that committee in July 1956—of the need of a supplemental in 1957 of approximately $53 million. They said it was too late—it was too close to the time the Congress adjourned. So we next notified the Appropriations Committee of the House on January 15, 1957, and I will quote from the record:

"Mr. J. VAUGHAN GARY (chairman of the subcommittee of the House Committee on Appropriations): What additional supplemental appropriation will you request for 1957?

"Mr. Maurice H. Stans (the Deputy Postmaster General, who was then testifying): We're asking the Bureau of the Budget to clear, so that we can present it to this committee, a request for $53 million."

That included the $47 million that we finally requested officially. That was last January.

Now it is true that the official notification did not come from the Bureau of the Budget until, I believe, March 12, which still gave ample time for the full Appropriations Committee to meet and to report out a bill in order to give the Congress a chance to act.

I approached the subcommittee of the House Appropriations Committee with a very realistic appraisal of the whole situation, emphasizing its seriousness. I said to them, "Gentlemen, if you insist on denying us this supplemental, for reasons which I cannot imagine, do you realize what curtailment of the service that means, because that is approximately a 40-percent cut in the expenses over which we have any control? It means that curtailment of service will be very serious; it will seriously affect the economy and the welfare of the people of this country."

I have here with me the communications that I had with Mr. J. VAUGHAN GARY on April 3, and on April 4 to Congressman CLARENCE CANNON, the chairman of the full committee.

Question. Have these been published?

Answer. They have not. I also have another letter to Congressman CANNON on April 9.

BEHIND THE WEEKEND CUT

Question. What do they show?

Answer. I will read one to you. This went to the Honorable CLARENCE CANNON, chairman of the Committee on Appropriations, under date of April 4:

"With total reluctance, we are laying plans for curtailment of postal services to meet the cut imposed yesterday by the Appropriations Subcommittee on a requested supplemental appropriation for fiscal 1957.

"We believe the seriousness of these required curtailments warrants consideration by the entire Congress at the earliest possible date as to the advisability of this course.

"To that end I would appreciate it if you would expedite urgently the action and report of the Appropriations Committee to the House, so that, if further funds are voted, they will be available before too much damage is done to the service."

If you have heard some comments about the Postmaster General being arrogant, demanding, and all that sort of thing, I submit to you that this language is far from demanding.

I had asked Chairman J. VAUGHAN GARY, of the subcommittee, on April 3 if he would not call an urgent meeting of the subcommittee to consider action on this important matter, and on April 9 I sent this letter to Mr. CANNON:

"DEAR MR. CHAIRMAN: Through the medium of a special issue of the Postal Bulletin, copy of which is enclosed, orders have gone to all our post offices to curtail services in order to meet the situation caused by lack of funds during the current fourth quarter of this fiscal year. These orders are effective at specified dates, beginning Saturday, April 13.

"I am most sincere in saying to you that I hope the Congress can take action on our supplemental appropriation before these service curtailments become effective.

"If the full money we actually need is voted to us, it would prevent a great disservice to the people of the United States. Anything you can do to move up action by the House Appropriations Committee would be very helpful in ending present confusion and avoiding unnecessary damage to the postal service and the morale of its employees, and would have my sincere appreciation.

"Would you not be willing to hold a meeting of your committee early in the week so that Congress can act promptly and definitely, and we can advise postmasters as to the extent to which these orders may be withdrawn?"

Question. Did he act on that?

Answer. No. The only information I received from him was this letter on April 5:

"The Committee on Appropriations today adopted the following resolution: *Resolved*, That the chairman be directed to announce to the Postmaster General and the press that an additional appropriation of $17 million be approved for postal operations, and that on April 12 of this committee will consider the matter of any further appropriations up to the total of $47 million."

That prompted my other letters I have just read to you.

Question. Is there any explanation of why they postponed action?

Answer. You have heard the comments made on the floor of the House.

WHO WAS RESPONSIBLE?

Question. But it still doesn't explain why the public lost this weekend of mail service. The responsibility for that isn't clear——

Answer. Oh, yes; it it is very clear. The responsibility was solely upon the chairman of the Appropriations Committee of the House of Representatives, who failed to call his full committee into session to vote out a bill which could have immediately gone to the floor and had action on the part of the whole Congress.

Question. On the flexibility in cutting your budget, you have said that 96 percent of your expenditures go for the pay of employees, transportation of mail, occupancy of postal buildings, and that only 4 percent, or $140

million leaves you with any discretionary control. What sort of discretionary control do you have over the $140 million? What do you use that for?

Answer. You are correct. Approximately 4 percent, about $140 million of the total budget of $3.25 billion, is for items over which the Department can exercise any real discretionary control, and even that is limited.

Question. Is that for stamps and trucks, etc.?

Answer. This is the money we use to print stamps, buy trucks and pens and the hundreds of other items needed in the operation of 38,000 post offices, and to provide research in better ways to handle mail. Certainly none of these items can or should be cut to any sizable degree. Some equipment purchases can be postponed, but that doesn't save money in the long run.

Well, we are now curtailing the purchase of supplies and materials and living out of inventory—that is one item, though it is nothing more than a deferment of costs. We have done that in lieu of curtailing the service. We delayed the payments for new uniforms to employees—excepting those that were contracted for and were to be paid for during the month of April, until the first of July. Again, it's a further deferment.

To save $6 million in the weeks that we have left in this fiscal year, it just isn't in the cards.

Question. In your budget of $3.25 billion, if you are spending 96 percent for pay and transportation and the occupancy of postal buildings; if you are paying that much, that leaves you with only 4 percent for your stamps and trucks and other operations of the post offices. Where can you make any cuts in your operation?

Answer. Just by curtailing services, or the delay of purchases of necessary equipment and supplies.

Question. You have said that the Post Office is handling 20 percent more mail than 6 years ago with fewer employees.

Answer. That's right, and less than a 2 percent comparable increase in cost.

Question. Do you have some pretty clear indications of what the Post Office Department could do in the way of mechanized equipment and new developments if you had the money?

Answer. Yes. We just dedicated the first mechanical letter-sorting machine in the postal service in Silver Spring, Md. I'd just like to outline some of the other items:

We have been working hard to correct the deplorable old-fashioned mail-handling methods of the Post Office. With limited funds we have been working to develop mechanical and electronic machines and equipment, better use of floor space and more efficient buildings. We have made real progress, and we are on the threshold of a number of major developments.

FOUR MILLIONS TO RESEARCH

This year we will spend $4 million for research. While this is small for an operation of our size, it is 10 times the research program of 1952.

Now, right at that point, I want you to know that, when we came in in 1953, we had to set up a research department. We had to seek out skilled engineers and scientists around the country and bring them into Washington. You know the competition there is for men in that particular category in the country.

We are working with the Bureau of Standards and 11 outstanding engineering firms and research firms in developing mechanical and electronic equipment to move mail in and out of big-city post offices more rapidly. This, in the simplest terms, is our bottleneck, and we can lick it within the foreseeable future if the Congress will appropriate the money to buy the equipment and to modernize our buildings so that mail can be speeded through the offices in 30 to 50 percent less time than is now possible.

Now, here are some of the developments: In Baltimore we are operating the first mechanical parcel-post sorting machine with electronic memory system—the first one. We are soon going to test two competing systems in other offices.

In Detroit—this is an installation I personally inspected 2 weeks ago—we have installed a conveyor system to move letter mail through its handling and distributing operations. It is a beautiful piece of equipment, and it is a pleasure to look at. The employees are happy, it is speedy, and it will pay for itself within 24 months.

Question. Is it a sort of conveyor-line process?

Answer. Yes.

Other installations are underway: In the new Silver Spring, Md., mechanical letter-sorting machine—without touching the letters, but by pressing buttons—a clerk distributes more than 300 different sortations.

Question. Does that sort them to different destinations?

Answer. Yes; 300 combinations. In Chicago we have under installation our first power-and-free overhead conveyor system to move mail from receiving platforms to temporary storage, to work areas and out to shipping platforms.

You see, the question of space in these big metropolitan centers is terribly serious. Chicago and New York are badly congested, and Detroit and Los Angeles as well.

We will bring in the mail in this Chicago installation and put it on an overhead conveyor system, by turning the bags upside down and hooking them on, and they will go to the areas where they are wanted as they are called for. Then they go over the tables—merely open the bag and the mail falls out. But the floor space you save.

I would dare say in the New York post office that 20 percent of the usable floor space is used up by nothing but trucks that people have to push around from one place to another. There just isn't any rhyme or reason to it.

NEED FOR MECHANIZATION

Even the simplest forms of mechanization that I am familiar with personally from my experience in industry for the past 30 years, which are so obviously needed and so inexpensive to buy, have not been available to the Post Office Department.

Question. Why is that? Wouldn't Congress give you the money?

Answer. Congress did not provide the money, although in one year in the previous administration the Appropriations Committee did insist that a certain amount of money be used for research—they did it themselves—which indicates to me that there wasn't a realization of the necessity of that sort of work being done by some of my predecessors. But to me it's kind of an old story, and I've seen so much of it all my life and I am interested in this kind of program.

Question. You've started a number of ambitious programs: this mechanization thing you're referring to, the lease-purchase program which apparently had to be shelved, the rural consolidation program which you haven't been able to push through because of opposition—aren't all of those things dependent in the last analysis on your ability to live with Congress and sell them these ideas?

Answer. To a considerable degree, yes. That's true. Let's take these point by point.

Let's take the lease-purchase program. We had two leasing methods that we requested the Congress to provide. They so hamstrung the lease-purchase program by regulations and referrals back to committees for approval and whatnot that, together with higher interest rates, it became inoperative.

However, we also received from Congress the authority to enter into a direct-leasing program, where we would go out and option a piece of property for the Post Office Department by an assignable option. We would then design a building for that property, and then we would ask for public bids on the acquisition of the property and the erection of the building to our specifications. That is the device that we have used so effectively. We have built approximately 1,600 new post offices—true, most of them have been small ones—throughout the country under the direct-leasing program. It has been wonderfully effective.

Question. But how many under the lease-purchase program?

Answer. One has been awarded and is under construction at Saint Marys, Ohio, and two others have been awarded.

Question. Under the direct-leasing program, the Government never actually becomes the owner of that building as it would under the lease-purchase?

Answer. No, it doesn't, but we've been able to get very attractive rentals because we've been able to convince prospective landlords of the desirability of having Uncle Sam as a tenant, and consequently we have been able to make very attractive term leases, which in some cases are as long as 30 years for properties built to our own design and specifications.

Question. But that direct-leasing program is an ancient program, going way back——

Answer. Not on the basis we have it today, no. It was a very restricted procedure before. We've eliminated a lot of the things that were undesirable in the previous leasing arrangements.

For instance, now we study an area, we determine the need for a building, the type of the building, the size and location, and quietly option the most desirable piece without any publicity, so we don't run into competition and inflated prices. The rentals we're paying, incidentally, per square foot compare very favorably to the rentals we were paying for the outmoded, old-fashioned buildings that we were occupying. It has been an amazing experience, really.

Question. What has been the impact of the change in American life from cities to suburbs on the mail service?

Answer. Oh, yes. That's one of the reasons for our increase in costs; that's one of the reasons we had to install 4,000 new carrier delivery routes every year. We have thousands of extensions of city and rural routes to take care of these changes in the character of neighborhoods. As you know, there's any number of building projects even around Washington where there are 100, 200, or 300 new homes built in a group. Those people all want their mail and we have provided them with mail service—all across the country.

Question. Are there collecting centers as well as distributing?

Answer. That's right.

PLANNING AHEAD

Question. It makes your rural operations much more expensive, doesn't it—much less rewarding?

Answer. Well, you see, there's not a single activity of the Post Office that stayed dormant during this 4 years. We've anticipated these changes and recognized what we should do about them, and the proof of how effective we have been is those figures I showed you there—the decrease in the amount of the deficit, the operating deficit of the Post Office Department over the last 4 years. We're giving better service at less cost.

Question. What about your efforts to close a lot of the small post offices for the sake of economy? Are you being hamstrung in that by local communities and by Members of Congress?

Answer. There were 41,000 post offices when we came in, and now there are something

UNIVERSITY OF MICHIGAN LIBRARIES

less than 38,000. We have been successful to that degree.

In no instance do we close a small post office without providing the patrons of that post office with equal or better service than before, by the substitution of rural routes. Mail now comes to their box in front of their home rather than to a small post office miles away where they have to go to get it.

What happens is that, when these people in the neighborhood find that their little post office is going to be closed, they do not want to lose the identification of their particular community, and they sometimes become rather emotional about it. Even though it costs the Government several thousands of dollars a year to maintain it with poor service, they get up petitions, and quite often those petitions are initiated by someone in the post office who doesn't want to lose a job, and they converge on their Congressman. It is difficult, but we have been successful in this gradual process.

Question. Does the Congressman put pressure on the Post Office Department not to close the office?

Answer. Well, he asks us to resurvey the matter and see if we can really justify it, and, if we can, we usually are able to convince the Congressman, but it takes time to do those things.

Question. Don't many of your employees work short hours, comparatively, at fairly good pay, and, over all, don't they have probably some of the best jobs in Government?

Answer. We think they are. We think that the Post Office Department not only provides an opportunity for a career, but it also provides an opportunity for substantial income and security.

MILLIONS SAVE STAMPS

Question. Is the sale of commemorative stamps increasing?

Answer. Oh, yes. The last estimate I saw indicated there were about 12 million stamp collectors in this country. Philately is becoming more and more popular, and I think it is a splendid cultural hobby. The Department makes money on a commemorative stamp because many of them are not actually used for mail service.

Question. Are you planning to leave the Cabinet?

Answer. I have no plans to do so, and I am quite confident the President has no plans for me to leave in the foreseeable future. I can only point out to you that the objectives of the Eisensenhower administration for better mail service at less cost to the taxpayers have not yet been fully realized. My job is not finished.

Question. As the Nation grows, the mail grows; is that it?

Answer. It's bound to—as long as boys and girls are falling in love, getting married and having babies, you are going to have more mail.

Question. In the March 3, 1950, issue of U. S. News & World Report we had an interview with Postmaster General Donaldson of the Truman administration, and we asked him if "the problem of the postal deficit can be licked in due time in this country." He replied:

"Yes, I think it can. The Post Office Department is probably facing its worst financial problem in the history of the postal service. But that's not due to the fault of any of the people in the postal service. It's like any other business—the costs have mounted over which we have little or no control, and nothing has been done to increase the revenues in the Department while much has been done to increase the costs, in the way of legislation and orders of regulatory bodies that fix the charges for transportation of the mails."

What do you think of this answer?

Answer. Well, history repeats itself. That's exactly my view today.

"Liberty and Justice for All"—Remarks to Students of Dimner Beeber Junior High School

EXTENSION OF REMARKS
OF
HON. KATHRYN E. GRANAHAN
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Friday, May 24, 1957

Mrs. GRANAHAN. Mr. Speaker, it was my honor and privilege last Friday to meet with the faculty and students of the Dimner Beeber Junior High School, 59th Street and Malvern Avenue, in my district of Philadelphia, and to discuss with them the concepts of liberty and justice.

Some years ago, my husband spoke at this same school and was tremendously impressed by the caliber of the teachers and the students. He told me he was proud to be the Congressman for such a group. I can now fully appreciate his feelings at that time, for when I spoke there, I was most impressed in exactly the same way.

The children of Dimner Beeber Junior High showed a sense of maturity and responsibility and civic awareness one finds really surprising among junior high age groups, and the deportment of the student body was truly outstanding. The principal, Mr. E. Orton, has every right to be proud of his faculty and students.

Mr. Speaker, under unanimous consent of the House, I submit for inclusion in the CONGRESSIONAL RECORD my remarks at the Dimner Beeber Junior High School that day, as follows:

LIBERTY AND JUSTICE FOR ALL—REMARKS BY CONGRESSWOMAN KATHRYN E. (MRS. WILLIAM T.) GRANAHAN, AT DIMNER BEEBER JUNIOR HIGH SCHOOL, PHILADELPHIA, MAY 17, 1957

It is a great pleasure, and an honor, too, for me to have this opportunity to speak to you today on the great phrase out of our pledge of allegiance, "with liberty and justice for all."

Children in school sometimes find it a little difficult to read much deep meaning into the high-sounding words and the noble expressions in our great patriotic documents. Much that is in the Declaration of Independence sounds strange to us today—the words are often unfamiliar ones and the thoughts are of issues long ago and known to us only through our study of history. They do not seem to have too much current meaning sometimes.

The Constitution is one of the greatest documents ever written by human beings, but again, to the boy or girl in school, it may deal with very little that seems familiar and with a whole lot that seems altogether out of your daily experience.

So, too, the concepts—liberty and justice.

It probably becomes monotonous to you to hear your teachers and your parents and people in public life constantly telling you the day will come when these concepts are more meaningful—and will be real to you in everything you do.

It is no reflection on your youth that we who are older keep repeating this idea. For we, too, were all once in school and more concerned about what we might wear at graduation, or what celebrations there would be at the end of the school year, or what we would do on the school picnic, or how much money we would have to spend on vacation plans, than we were about the immigration laws, or the idea of political freedoms or economic freedoms.

It is only where justice and freedom have been unknown for periods of time—or where the threat to destroy them is ever-present—that these great concepts become more personal to each individual, including those in school.

So I want to say right now, I am not going to lecture you about how glad you should be to live in America rather than somewhere else. I know you all know how lucky you are. Let's not go around pointing fingers at each other and saying be grateful, because it is not necessary.

But let us do this—you in your school activities and in your day-to-day life at home and at church or synagogue and among your friends, and I will try to do the same in the Congress of the United States—let us translate the words liberty and justice into their real meaning to us by being good friends with each other and listening to the other fellow's point of view, and making sure the other fellow gets his fair share in all instances.

For after all, that is what this country is supposed to be based on. That is what we want it to be—a true democracy where all are equal before the law and none of us need be ashamed of our racial or religious or economic background.

For while we do not have equal wealth, or equal brainpower, or equal physical characteristics—we are all different in every way—and yet we do have this great and precious thing of equal opportunity and equal justice under law.

Those of you who have been in Washington and have seen the majestic Supreme Court building across from the Capitol have seen the inscription, "Equal Justice Under Law," over the entrance. It is not just a phrase which sounds good or looks good carved in the marble. It is the basic concept of America. It is what makes our country the wonderful place we know.

There are times when one or another of us has occasion to wonder if the words are really true. We hear instances of individuals who are railroaded to jail for crimes they did not commit. We hear of poor folks who get less than justice because they are pitted against rich and powerful adversaries.

And you might be inclined then to say: "Aw, there is no justice."

But stop a moment and just consider one thing. Consider this.

When and how and under what circumstances do you hear of these instances in which justice is not evenhanded; in which some individual who is not rich and powerful loses out unfairly to another?

You hear about these things in the newspapers, in Congress, over the radio or television, in the pulpit of your house of worship, or in the conversation of friends and neighbors—and you hear about them because some one or some group—or the Government itself—has moved in to correct an injustice.

Frequently it is the courts which do it. Sometimes it is public opinion. Often it is a newspaper. But always it is some American or American institution which is moved to act by what is right and by what is just. Just remember that.

Right now we have many problems in this country. They are not always being solved as quickly or as well as we would like. As a Member of Congress I sometimes get impatient over the slowness of things—over the slowness of progress. I have introduced some bills which seem to be dying on the vine, pigeonholed in committee. One is to change the immigration laws to allow more good people who would make good Americans to come to this great country as your relatives and mine came here. Little seems to happen on this bill. I get discouraged over it, sometimes.

But friends in the Congress tell me that the issue is not dead and will not die. That like-minded Members will continue to work to correct the injustices of the present law as they affect some groups.

And as I see Congress in action I have reason to believe that decent-minded people will succeed in achieving any good purpose, but it takes work and patience and constant plugging away.

The Congress can move fast in an emergency. It can move at lightning speed when there is a sudden crisis involving our country or our defense.

But normally it moves slowly, deliberately. It takes infinite pains. It examines every comma and looks twice at every period. Everything the Senate does is painstakingly reviewed by the House, and vice versa. Bills may pass one House or another many times before the other one even agrees to consider them. Issues are sometimes resolved by the plain and ordinary and remarkable procedure of just letting them lie around long enough until time takes care of a bad situation.

That is not my idea of the right way to operate. We should face up to these problems and act on them.

But sometimes we seem to lack not only the will but the wisdom to know how to act on them or what to do.

For it is not always a simple matter of righting a wrong or improving a bad situation. What we do to help one group or another in our midst may react adversely on some other group. Bills to help a particular industry hurt another industry. Proposals to help one part of the country may react to damage the economy of another.

This is not an argument for delay. It is rather an explanation for why there sometimes are delays.

Basically all Members of Congress want to do the right thing for the country. But our views differ on this frequently. A majority can always act, but not always in such a way as to assure the justice of a majority cause. Sometimes it is a minority which has justice on its side. What then?

The answer is we must examine each proposal and each proposition with as much intelligence and as much objectivity as possible—as we can bring to bear on the subject. And we must sometimes pray for guidance—yes, it is often that hard to know the true path of justice and liberty.

By liberty, can we mean the complete freedom of everyone to do always whatever he likes, regardless of how many people get hurt in the process? No, it cannot mean that.

But what it can mean, and should mean, is that we dare not discriminate against any group because of race, creed, or color. We dare not have one type of justice for the rich, and another for the poor. We dare not bow and scrape before one group because they are powerful, and ride roughshod over another, because they have no way of getting back at us.

In short, we have to be decent with each other. We have to recognize the elementary human dignity in each person.

And we have to pass the kind of laws which also recognize human rights, and human needs, and human dignity.

We do not always succeed. When we fail, we should be told about it. It should be called to our attention. Americans have a right and a privilege to speak up and protest when they see a miscarriage of justice.

The more we watch out for the other fellow's liberty, the safer our own will be.

The more we protest injustice to someone else, the less likely are we to have injustice practiced on us.

The more we join in common undertakings to help the whole group, the whole school, the whole community, the whole country, the better off each and every one of us is going to be.

That may be stating it too simply. But to me, that's simply what it all amounts to.

I am still a new Member of Congress. I have much yet to learn about the work. But I hope I never learn that to be a successful Member of Congress one has to unlearn the principles of decency and dignity and justice and friendship which to me are so fundamental to the democratic process. I am sure it will not be necessary.

And you boys and girls, as you grow older and take part in the life of the community, will find no better guides than the words "liberty and justice for all."

Representative Powell Calls for a Third Force in American Life

EXTENSION OF REMARKS
OF
HON. ADAM C. POWELL, JR.
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Friday, May 24, 1957

Mr. POWELL. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following excerpts from a speech given by me on the occasion of the prayer pilgrimage for freedom, at the Lincoln Memorial, Washington, D. C., on Friday, May 17, 1957, at 12 noon:

REPRESENTATIVE POWELL CALLS FOR ESTABLISHMENT OF A THIRD FORCE IN AMERICAN LIFE

We meet here today in front of the Lincoln Memorial because we are getting more from a dead Republican than we are getting from live Democrats and live Republicans.

We must face the basic dishonesty and increasing hypocrisy of our two political parties. Only the politically free Supreme Court views the American scene against a background of morality and uncompromising legality and acts accordingly.

In the north and south amongst Republicans and Democrats we find a studied contempt of the law of the land—the Supreme Court decisions. Even the proponents of civil rights legislation have made deals behind the scenes to emasculate the present bill or see that it is passed only in one House. As for the executive branch, it refuses to exercise the massive majesty and prestige of its office as it should.

I begged the Democratic Party directly through the national chairman, Paul Butler, to speak out during its national meeting May 5. They absolutely refused to say one word concerning the bombings, outrages, persecutions, and present civil rights legislation now being considered by a Democratic-controlled Congress.

Therefore, it is mandatory that we establish a third force. A force that will be nonpartisan, but political; nonracial, but for the time being led by our Negro clergy who have given the greatest spiritual witness of any group in this century; nondenominational, inviting men of all faiths to follow. It must be housed only in the churches, led only by the clergy, powered through prayer with the masses acting in unity.

The NAACP is now being driven underground. The technique of the South is to outlaw the NAACP for the sole purpose of preventing it from presenting cases in local and State courts. This will be an insurmountable roadblock to prevent the NAACP from reaching the Supreme Court. We can through this third force raise funds and channel those funds to the NAACP to continue its monumental work and where they are blocked, present cases ourselves using the same NAACP lawyers.

We shall use as our techniques—based solely on passive resistance nationally and locally wherever the situation calls for such action—work stoppages, economic boycotts, mass demonstrations, sitdown strikes, slowdowns, picket lines, and above all, political unity irrespective of party, for and against individual candidates. Through these techniques we can turn the tide from hypocrisy to honesty; from flaunting the law to respect for the law. We will welcome and we will aid openly or through the underground those white church groups, Protestant, Catholic, and Jewish, who are on our side—the right side, the legal side, the moral side.

Smoke 'Em Out

EXTENSION OF REMARKS
OF
CLARE E. HOFFMAN
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Friday, May 24, 1957

Mr. HOFFMAN. Mr. Speaker, with a staggering national debt, a $7.4 billion annual interest charge, a $70-plus billion budget, and taxpayers entitled to relief, will someone please tell me why the Congress—supposedly the people's Representatives—have insisted on keeping in operation the expensive and unneeded Murphy Army Hospital in Waltham, Mass.; the expensive and unneeded Army-Navy Hospital in Hot Springs, Ark.?

The very efficient Secretary of the Army, Wilber Brucker, Michigan's former Attorney General and Governor, has vigorously protested this waste.

Congressman FORD, who represents Kent and Ottawa Counties, and who is a member of the subcommittee and the full Committee on Appropriations, which will bring the bill carrying these items to the floor, has called attention to the fact that the 1956 and 1957 appropriation bills kept these two hospitals in operation, despite the fact they were not needed.

Congressman FORD further disclosed that, notwithstanding the efforts of the Department to comply with the congressional directive to keep the hospitals operating by funneling patients to them from other areas, this year there was an average of but 68 to 77 patients a day in the 405-bed Arkansas hospital, while the hospital staff carried 313, doctors, nurses, military, and civilian attendants—4⅓ attendants for one patient. The Murphy 450-bed hospital had a patient load of from 85 to 95 a day, and it, too, carried a staff of over 300 doctors, nurses, military, and civilian attendants—3½ attendants to one patient.

The Congress often charges the Executive Departments—and especially the armed services—with being responsible for the waste of our tax dollars. For this waste in operating these two hospitals, is not the Congress responsible?

Our colleague, Mr. FORD, further discloses that closing the two hospitals, turning the Massachusetts one into an Army engineers headquarters, would save $746,500 next year and approximately $1,043,000 each year thereafter.

UNIVERSITY OF MICHIGAN LIBRARIES

Heretofore, the appropriation has gone through under a closed rule, which prevented a point of order being made against the bill. This year, the Member from the Fifth District, Mr. FORD, is determined that, if a similar rule is proposed, he will ask for a record vote; that, in any event, he intends to fight the appropriation when the bill comes before the House.

Unless the Congress supports him, it will have no logical reason for complaining about waste or extravagance in Executive Departments.

The House is continually investigating the influences behind wasteful appropriations. It certainly would be interesting to know who is responsible for continuing in operation these two unneeded expensive hospitals. I shall, of course, vote to put them to other use.

Do We Have an Immigration Policy in Concert With the Demands of Our Time?

EXTENSION OF REMARKS
OF
HON. MICHAEL A. FEIGHAN
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Friday, May 24, 1957

Mr. FEIGHAN. Mr. Speaker, earlier today I spoke before the Westmoreland County Bar Association, at Greensburg, Pa., on the subject Do We Have an Immigration Policy in Concert With the Demands of Our Time?

Members of Congress are aware that President Eisenhower as well as Members of Congress have made a number of proposals relating to our immigration laws. I have made a careful study of all these proposals and have talked with a considerable number of our colleagues about them. This led me to make a proposal which I outlined for the first time in my talk before the Westmoreland County Bar Association. Because of the importance of this issue, I urge Members of this House to read my remarks and study the proposal which I have made. Under leave granted, I insert my address delivered to the Westmoreland County Bar Association:

DO WE HAVE AN IMMIGRATION POLICY IN CONCERT WITH THE DEMANDS OF OUR TIME?

(Address of Hon. MICHAEL A. FEIGHAN, United States Representative, 20th Ohio District, before the Westmoreland County (Pa.) Bar Association luncheon at Greensburg, Pa., on Friday, May 24, 1957)

For the greater part of our history we have encouraged immigration into our country. During colonial days the attractive opportunities offered by the new world caused many European rulers to impose regulations in order to prevent people from emigrating to our shores. The American colonists resented the restrictions imposed on emigration to the New World by the European monarchs because our Declaration of Independence, in the list of indictments against the King of Great Britain, lists among the injuries and usurpations that "he has endeavored to prevent the population of these States; for that purpose obstructing the laws for naturalization of foreigners; refusing to pass others to encourage their migration hither * * *."

Despite efforts made by the European monarchs to prevent the population of the original colonies and later the United States, the opportunities of the free world were so appealing that immigrants flowed into the United States at such a rate that by 1820 the population had jumped to about 10 million people from a population of 4 million in 1790. Congress then concerned itself with the conditions of travel confronting prospective immigrants as they faced the long journey to the promised land. There were many disturbing reports in Europe and here at home of the appalling conditions in which immigrants were carried across the Atlantic Ocean. Descriptions of the horrors of steerage space prompted Congress to enact a series of laws limiting the number of passengers on each vessel, forcing the shipping lines to provide sufficient water and food for the journey and to keep complete lists of all passengers on board including such data as age, sex, occupation, country of which they were citizens, and the place of their destination. From this it should be clear that Congress in the year 1820 took steps to encourage full-scale immigration to the United States.

In 1863 Congress enacted the Homestead Act which permitted aliens who had filed their declaration of intention to become citizens to then acquire homesteads. This was another specific measure enacted by Congress to encourage immigration from Europe to our shores.

Congress also passed the Chinese Exclusion Act known as the Coolie Act. Discovery of Gold in California brought large numbers of Chinese to that State, which apparently caused great concern that our West Coast would soon be overrun by unlimited numbers of Chinese. This Chinese Exclusion Act was repealed in 1943.

These developments in large measure account for our growth as a sparsely settled country of 4 million people in 1790 to a great world power of more than 170 million people today.

There have also been sporadic efforts in Congress since 1798 to restrict and otherwise regulate immigration into the United States. The alien and sedition laws of 1798 were the first. Those laws required 14 years of residence as a requisite to citizenship rather than the 5 years residence required today. The President was authorized by these laws to expel forthwith "dangerous aliens" and to imprison those who resisted expulsion. Since the alien and sedition laws were first enacted for a 2-year period, they lapsed by default because Congress would not re-enact them.

Other exclusion laws were then enacted refusing admission to prostitutes and procurers. Shortly thereafter laws excluding mentally deficient persons, stowaways, chronic alcoholics, and vagrants were enacted.

It was not until 1921 that we began to limit the number of immigrants to be admitted each year. The first quota statute was signed into law by President Warren G. Harding on May 19, 1921. Under that law the number of immigrants permitted to enter the United States was fixed at 357,803 annually, that figure being based on the number of foreign-born persons who lived in the United States, according to the census of 1910.

The second quota law was enacted in 1924 and contained a feature which has become known as the national origins formula. Under the law of 1924, 154,657 immigrants are admitted each year. This formula provides that the annual quota for each country is one-sixth of 1 percent of the number of inhabitants in the continental United States as determined by the census of 1920, whose ancestry has been traced to the country for which a quota was determined. Some countries were assigned no quota whatever. All orientals were excluded.

That same quota system arrived at in 1924 remains as the cornerstone or control factor governing our entire immigration system today. Some minor alterations have been made in it, such as assigning a minimum of 100 quota to countries of the world which hitherto had no quota whatever. No basic changes have been made which would reflect an alteration in the 1924 policy.

Our nonquota intake of immigrants is not based solely on geographical factors.

In addition to nations of independent countries of the Western Hemisphere, we admit under the present law, outside of the quota, all wives, husbands, and minor unmarried children of United States citizens, regardless of their place of birth. Here the numbers are by no means alarming, but it may be worth mentioning that the number of nonquota immigrants admitted from such countries as Greece, Italy, Spain, Holland, and a few others, runs about equal to the number of quota immigrants admitted from those countries. All these countries have relatively small quotas.

It is also interesting to note that the first law excluding subversives from admission into the United States was passed by Congress in 1903. A subversive was then defined as an "anarchist," but this same statute excluded "persons who believe in or advocate the overthrow by force or violence of the United States Government." A review of the background of that particular piece of legislation indicates the clear intent of Congress to protect our country from the influx of ideologies and political tactics originating in the atmosphere of historic Russian despotism. It is against this background that I would like to discuss briefly with you our present immigration policy and its relation to the realities of the world in which we live.

The national origins formula creates a situation in which a large number of quota numbers are authorized for countries which do not need them because the record shows they do not utilize them. Specifically, I refer to Great Britain and Ireland. On the other hand, the national origins formula provides very small quotas for countries which today are seeking settlement opportunities for a portion of their population as a necessary step to attaining economic stability, and maintaining an equilibrium in Government. I refer specifically to such countries as Italy, Greece, and the Netherlands. There is a third category of countries whose tragic situation warrants special mention. I refer to those countries under Communist occupation such as Hungary, Poland, Lithuania, Estonia, Latvia, Rumania, Czechoslovakia, among others. Natives of those countries who have been forced to find religious or political asylum in the free world look to us as the traditional haven for the oppressed and the unwanted. There is little we can do under our regular immigration laws to help these victims of totalitarianism because the already small quotas assigned to them under the national origins system has been mortgaged by 50 percent for as many as 100 years in some instances.

The most glaring inadequacy of our national origins formula is that it requires the application of a hard, fixed, and unrealistic mathematical formula to a world situation in which our concern for the human factors must be foremost.

As a consequence, we wind up each year in the position of having on the one hand a very large number of quota numbers left over from countries that neither need nor want them and on the other hand a very long line of applicants for admission who are natives of countries whose sons and daughters played an important role in shaping the destiny of our great country in past generations.

The best examples I can cite to demonstrate just how impractical the national-origins formula is in terms of our political responsibilities in this upset world are the following:

In 1947 President Truman appealed to Congress for emergency legislation to admit a

reasonable number of displaced persons into the United States. In his message to Congress urging action he noted our regular immigration laws made it impossible for us to cooperate with other free nations in bringing about a solution to a grave postwar problem. There were 1½ million persons from Central and Eastern Europe residing in Germany, Austria, and Italy who refused to return to their homelands for fear of loss of their lives or liberties at the hands of the Communist regimes then in control of their homelands. After extensive public hearings, controversy and prolonged debate, Congress enacted emergency legislation in 1948 to admit 205,000 displaced persons. That law was amended in 1950 because the original number of admissions authorized was insufficient to cover our fair share toward resolving the displaced persons problem. The authority for admission was raised to 401,000 persons.

In 1953, President Eisenhower, during his first year in office, sent Congress a message asking for emergency legislation to help resolve the problems of overpopulation in Europe and to provide haven for a reasonable number of the many new victims of Communist tyranny who were daily escaping into free Europe and Asia. Among the arguments advanced by President Eisenhower in support of this proposal was that unless Western Europe found some solution for its problem of overpopulation, there could be little hope for the economic stability envisioned by our foreign-aid program which, by that time, had cost the American taxpayer more than $26 billion.

Congress again passed another emergency immigration bill authorizing the admission of some 207,000 special immigrants over a 3-year period.

Even before the expiration of President Eisenhower's emergency immigration program, our country was faced with still another major immigration crisis. The Hungarian freedom revolution of last October and the ruthless Russian suppression of that gallant try for freedom produced a new category of refugees. In the month of November and December 1956, well over 100,000 Hungarians had found it necessary to flee from their homeland after the Russians reinvaded, killing some 60,000 Hungarians and then putting another alien regime in charge of their affairs. That freedom revolution caught the Free World by surprise, because so many of the leaders had been misled into believing that total revolution against the Russian tyrants was impossible.

When the free Western Powers failed to take any practical action in support of the Hungarian freedom fighters, the conscience of the American people demanded that immediate asylum should be given to some of the latest victims of Russian tyranny and reprisal. The result was that President Eisenhower directed the admission of 21,500 Hungarian refugees in Austria on a parole status, with the understanding that this arrangement would continue until Congress took action one way or another on his decision. The President's authority to direct such action under existing law has been subject to question. As of May 20, 1957, the number of Hungarian refugees admitted to the United States was 32,295, of which 6,284 came under immigrant visas issued pursuant to the Refugee Relief Act of 1953, as amended, and 26,011, came under the parole operation. Nevertheless, the fact remains that unless the President took the action he did, it would not have been possible for the United States, the historic haven for the oppressed and unwanted, to do much of anything to help the Hungarian refugees in Austria. This helplessness would have been demonstrated at a time when most of the small but free nations of the world were opening their doors wide to the Hungarian patriots.

I hesitate to think about the position we will be in should the East Germans or the Poles or the people of some other oppressed nation behind the Iron Curtain erupt into total revolution against the Russian Communists. Should this happen, we will undoubtedly be faced again with a tremendous refugee problem caused by the brutal methods used by the Russians in suppressing such freedom revolutions. I would like to think that future revolutions against communism would not result in a large influx of political refugees into the Free World, but I am afraid the absence of a dynamic foreign policy toward the captive nations forbids my entertaining that happy thought.

You might be interested in an observation I made in a speech on the floor of the House on February 8 last year on the occasion when Congress received President Eisenhower's latest message on immigration policy. In commenting on the need for a more elastic policy than now exists, I said, and I quote: "The likelihood exists that so long as the conspiracy of communism exists in this world and continues its inhumanities and tyrannies against people, we will continue to have refugees who plead with us for religious and political asylum." The Hungarian revolution which followed in October of last year underscores the importance of our facing up to that cold reality because the very same situation applies today as applied on February 8, 1956 when I first made the statement. Moreover, the circumstances that compelled me to make that statement have not changed in the least.

To sum up, I consider that our present immigration policy as reflected by the controlling laws is outdated, inadequate, and certain to cause us not only embarrassment, but the loss of respect and friendship of millions of people who look to us as the defenders of human freedom and the hope of a better world of tomorrow. The national origins formula applies to conditions prevalent in 1921 and 1922. It has no practical relationship to the political demands of the modern day. Events of the past 12 years leave no doubt that we must effect major changes in our basic immigration laws so that we may have an immigration policy to support our best national interests.

There is so much emotion and lack of knowledge surrounding our immigration laws that any effort to bring about sudden and drastic change in them will be met by a number of very serious obstacles. It seems to me therefore, if any real change is to be effected in these laws it must come gradually. Accordingly, I have worked out a proposal which does not abruptly discard the national origins formula, but does open the way for the demonstration of what may be a better system of allocating quota numbers than the national origins formula.

It is estimated that each year there are some 65,000 authorized but unused quota numbers. I propose that the unused quota numbers for the past 3 years be reauthorized for use for a period of 3 years. These unused quota numbers would then be allocated semiannually with the following criteria to serve as guideposts in making specific allocations:

1. The desirability of bringing into the United States annually a number of persons possessing technical and professional skills and specialized experience found to be in short supply in the American labor market. A determination would need to be made that such services will be substantially beneficial to the national economy.

2. Our traditional position of providing a haven for victims of totalitarian aggression who have found it necessary to flee their homelands because of persecution or fear of persecution based upon their religious or political views. In the present world circumstances, special account should be taken of those escapees from communism who fled from their homelands because of acts they had taken against the regimes in control.

3. The desirability of reuniting families and relatives. There are in the United States a considerable number of families who have found asylum here while members of their immediate families are still living in distant lands. There are also native born Americans who are anxious to have relatives abroad admitted into the United States for permanent residence. To reunite these broken families is to act in concert with our political philosophy which holds that the family is the basic unit of society.

To make the allocations of these unused quota numbers and all determinations connected therewith, a board or commisison will be necessary. Such board or commission would initiate studies and investigations and would be in touch with departments and agencies of the Government in any way concerned with immigration policy. It would be made up of five members, appointed by the President, with the advice and consent of the Senate.

Congress would be notified semiannually of all allocations made of quota numbers and such allocations would become effective unless Congress took action disapproving them.

The makeup of this proposed commission or board is critical to the success of the proposal. Obviously, individuals appointed to the commission must possess the highest qualifications backed by a long record of devotion to the public interest. The commission must be completely devoid of partisan politics just as it must be composed of individuals experienced in withstanding undue pressure or promises. The terms of office should be, if the plan proves to be feasible, for 10 years and with salaries provided to make possible the availability and time of the best talents in the country.

After this proposed pilot project has been in effect several years, I believe that with wise administration the feasibility of eliminating the national origins formula without doing violence to our national interest, will in my opinion, have been demonstrated. If the plan proves otherwise, Congress would simply not renew the 3-year authority and the project would be automatically terminated. In either case, the debate about our national origins system could be resolved once and for all on the basis of facts and not emotion and prejudice.

Fourteen years of service on the Committee on the Judiciary, together with a careful study of the many new political responsibilities which have been thrust upon us as a Nation in recent years, led me to offer this proposal. It is one way of creating an elastic and realistic policy which will permit us to adjust our immigration system to the most urgent demands put upon our leadership as a nation. I believe that our present immigration policy has failed to meet the test of time or the tide of human events.

It is time for a change, and I sincerely hope that the changes we must make will be based upon an honest recognition of the heavy responsibilities which are ours in a world which must avoid world war III, and find the way to a just and lasting peace.

A Salute to Pan American World Airways

EXTENSION OF REMARKS
OF
HON. ADAM C. POWELL, JR.
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Friday, May 24, 1957

Mr. POWELL. Mr. Speaker, many of our colleagues recognize the necessity of

UNIVERSITY OF MICHIGAN LIBRARIES

assisting the Puerto Rican people in obtaining for themselves more than general menial chores.

Pan American Airways long ago pioneered service to San Juan and made it possible for a rapid exchange of persons, knowledge, and culture between the mainland and the Commonwealth of Puerto Rico. Hundreds of thousands of people have been flown between San Juan and the United States via Pan American Airways. In the first 3 months of this year alone, Pan American has flown more than 1,000 tons of cargo between New York and San Juan.

However, I believe that Pan American's finest accomplishment was achieved recently when this great international airline commissioned 33 new stewardesses at its Miami base. Twenty-three of those girls are Puerto Ricans and they will soon be flying on Pan American Clippers to all points of the Pan American system to South and Central America and the Caribbean.

Mr. Speaker, I salute Pan American World Airways for its conscientious industry and making available to its passengers the service of these 23 Puerto Rican girls who, I am sure, will render to Pan American a service for which the airline can be additionally proud.

Residual Oil Imports

EXTENSION OF REMARKS

OF

HON. JOHN P. SAYLOR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, May 24, 1957

Mr. SAYLOR. Mr. Speaker, President Eisenhower is to be commended for his forthright attitude toward the oil imports problem. I was gratified to hear that the President had announced that there is reason to believe that alien oil is entering the United States in such quantities as to threaten to impair the national security. The White House at the same time ordered the Honorable Gordon Gray, Director of the Defense Mobilization, to begin an immediate investigation and take the action necessary to keep import levels in conformity with the stipulated provisions of the national security amendment to the Trade Agreement's Extension Act of 1955.

In the course of Mr. Gray's work, I trust that he will take a very close look into the residual oil imports situation. I remind him that the report of the Presidential Advisory Committee on Energy Supplies and Resources, which was basic to the development of the national defense amendment, very definitely treated residual oil as a separate problem. Let me read two paragraphs from that report:

> The committee believes that if the imports of crude and residual oils should exceed significantly the respective proportions that these imports of oils bore to the production of domestic crude oil in 1954, the domestic fuels situation could be so impaired as to endanger the orderly industrial growth which assures the military and civilian supplies and reserves that are necessary to the national defense. There would be an inadequate incentive for exploration and the discovery of new sources of supply.
>
> In view of the foregoing, the committee concludes that in the interest of national defense imports should be kept in the balance recommended above. It is highly desirable that this be done by voluntary, individual action of those who are importing or those who become importers of crude or residual oil. The committee believes that every effort should be made and will be made to avoid the necessity of governmental intervention.

Obviously, Mr. Speaker, any action which fails to consider residual oil separately would be of no value whatsoever to the protection of the domestic bituminous coal and anthracite industries. If a limitation on imports is enforced, and a specific quantitative restriction on residual oil is not included, then, of course, residual oil could conceivably make up the major portion of the total imports. The amount of residual oil coming into this country at the present time comprises too great a peril to our defense structure to tolerate this condition any longer. Fortunately the coal industry last year increased production over the alarmingly low level to which it had fallen in 1955; however, output is still far below what it would be if Government policies on imports and on other matters affecting the industry were fair and proper.

Government officials and fuel experts from private industry acknowledge that coal will have to accept a progressively greater share of the responsibility to meet increasing energy needs of the future, yet there is a glaring lack of concern for the industry's immediate welfare.

Coal producers must, of necessity, be given an opportunity to build up their resources. The coal miner needs to have steady work if he is expected to remain at this occupation. Today's labor force consists of trained engineers and technicians who, through experience and devotion to their jobs, have helped to make America's mining industry the most productive in all the world. They must be encouraged to stay in mining communities if they are to be ready to produce the fuel that will be needed in succeeding years. This encouragement will not come with 2 or 3 days of work per week; nevertheless, reduced workweeks and completely shut-down mines are imminent unless a more realistic approach to coal's problems is taken by Congress and the executive department.

One glance at the year's production figures will explain why a feeling of insecurity persists among mine operators and the labor force. To remove this tension and provide a spirit of optimism in mining towns requires positive action here in Washington.

Last year, when the bituminous coal industry reached an output level of 500 million tons, there was a popular tendency to assume that the problems of the industry had been overcome and that the upward trend would continue at a healthy rate on into the future. One of the factors that many analysts overlooked was a production chart extending back sufficiently far to provide a sound basis of comparison with other periods. For 10 years ending in 1956, average production amounted to just 500 million tons, which was below even the 1920–29 average and is prima facie evidence that 1956 cannot be considered any great shakes for the coal industry. There is no cause for rejoicing in the 1956 figure.

Coming down through the first portion of 1957, we might very well expect to find that at least the moderate gains made in 1956 over the preceding year were holding fast. Any upward movement, regardless of the rate of ascendancy, would constitute a stimulating development. The blunt truth, however, is that there is no increase in coal production to report at this time. Through May 4, bituminous coal production amounted to approximately 175 million tons, a decrease of some 3 million tons under the figure covering the corresponding period for 1956. Anthracite production is also down, with commercial production through May 4 almost 10 percent below the preceding year's output. The anthracite industry has been so hard hit in recent years that heaven knows it cannot withstand further losses brought about by unreasonable Government policies. As you see, in both the anthracite and bituminous industries, the anticipated gains have failed to come about. Production is down. A strong and sustained demand must be recorded during the remaining months if any substantial improvement is to be recorded for the year.

Now, here is what has happened in residual oil imports. Ten years ago the foreign residual oil entering this country's markets amounted to just about 45 million barrels. A relentless upsurge then got underway, and the coal industry has been suffering ever since. President Eisenhower took notice of the situation when he appointed a Cabinet Committee on Fuels and Energy Resources in 1954. It was that committee which recommended that imports of crude and residual oils be held at the respective proportions that such imports bore to domestic production in 1954. The 1954 figure on residual oil imports was 129 million barrels. For 1956 it was almost 162 million barrels, which in energy equivalent is a little less than 39 million tons of bituminous coal.

I trust that Mr. Gray will refer to the remarks of Members of the House and Senate when the bill to extend the Trade Agreements Act was debated in 1955. He will learn that it is the unequivocal intent of Congress to restrict oil imports to these designated levels. Even such a limit is far from a just mitigation for the producers and the laboring forces in the bituminous coal and anthracite industries. It will at least protect them from extended piracy on the part of international oil shippers.

1957 Graduates From Gruver, Tex., High School

EXTENSION OF REMARKS
OF
HON. WALTER ROGERS
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Friday, May 24, 1957

Mr. ROGERS of Texas. Mr. Speaker, it was my great pleasure this week to welcome to Washington the 1957 high school graduates from Gruver, Tex., which is located in the 18th Congressional District of Texas that I have the honor to represent. The occasion of their visit to this Chamber was likely noted by this body in view of the fact they were, in my opinion, one of the finest looking and the most well-behaved groups we have seen for some time. They were accompanied by the principal of Gruver High School, Mr. Ralph Eddins and Mrs. Eddins, and Gruver Elementary School Principal Mr. J. T. Hoy and Mrs. Hoy. This group has worked long and hard toward the realization of their senior trip and they are, I believe, to be commended for their selection of an educational itinerary. These 26 sons and daughters of Texas were Misses Barbara Wright, June Sloan, Luanna Olsen, Margaret Montgomery, Marietta Luttrull, Esther Kauffman, Kathryn Knutson, Jolene George, Rachel Harris, Suellen Hawkins, Gwen Arthur, Mary Lou Beamer, Barbara Charon, Adeline Dahl, Bonnie Drake, Janet Eddleman and Mary Lou Gordon; and Messrs. David Shapley, Charles Beck, Fred Sturman, Billy Cox, E. C. Denns, Donald Heath, Dale Irwin, Larry Lewis, and Byron Peddy.

SENATE

MONDAY, MAY 27, 1957

The Chaplain, Rev. Frederick Brown Harris, D. D., offered the following prayer:

Our Father, God, as once more we bow in the peaceful stillness of this Chamber of freedom, where in the past fateful decisions have molded the life of the Nation, guide by Thy wisdom, we beseech Thee, the pending decisions of this body, entrusted with vast power that awes and solemnizes our hearts. Dedicate Thy servants here, as they speak and act, to the yet unfinished task of winning the kind of a world for which brave men have died.

Steady us with the assurance that Thy righteous purposes for mankind are even now being worked out, in spite of the denials and betrayals of willful and blinded men. Make plain to our understanding that legislative enactments and economic adjustments in themselves cannot bring social salvation, except as they are undergirded by spiritual reliance and a sustaining strength not our own, without which we labor in vain, without which all else is as futile props against a decaying house that the Lord hath not made. In the name of the Redeemer, we ask it. Amen.

THE JOURNAL

On request of Mr. JOHNSON of Texas, and by unanimous consent, the Journal of the proceedings of Thursday, May 23, 1957, was approved, and its reading was dispensed with.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States submitting nominations were communicated to the Senate by Mr. Miller, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session,

The VICE PRESIDENT laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had agreed to the amendments of the Senate numbered 1, 2, 3, 4, 6, and 7 to the bill (H. R. 5788) making appropriations for the Executive Office of the President and sundry general Government agencies for the fiscal year ending June 30, 1958, and for other purposes, and disagreed to the amendments of the Senate numbered 5 and 8 to the bill.

The message also announced that the House had agreed to the amendments of the Senate to the joint resolution (H. J. Res. 247) for the relief of certain aliens.

The message further announced that the House had agreed to the amendments of the Senate to the concurrent resolution (H. Con. Res. 89) approving the granting of the status of permanent residence to certain aliens.

The message also announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 985. An act to provide that chief judges of circuit and district courts shall cease to serve as such upon reaching the age of 75;

H. R. 6548. An act to amend the Universal Military Training and Service Act, as amended, as regards persons in the medical, dental, and allied specialist categories; and

H. R. 7143. An act to amend the act of August 3, 1950, as amended, to continue in effect the provisions relating to the authorized personnel strengths of the Armed Forces.

The message further announced that the House had agreed to a concurrent resolution (H. Con. Res. 179) authorizing the printing of additional copies of the report to accompany H. R. 7125, a bill to make technical changes in the Federal excise-tax laws, in which it requested the concurrence of the Senate.

ENROLLED BILL AND JOINT RESOLUTION SIGNED

The message also announced that the Speaker had affixed his signature to the following enrolled bill and joint resolution, and they were signed by the President pro tempore:

H. R. 2146. An act to amend the Small Reclamation Projects Act of 1956; and

H. J. Res. 247. A joint resolution for the relief of certain aliens.

HOUSE BILLS REFERRED

The following bills were severally read twice by their titles and referred as indicated:

H. R. 985. An act to provide that chief judges of circuit and distict courts shall cease to serve as such upon reaching the age of 75; to the Committee on the Judiciary.

H. R. 6548. An act to amend the Universal Military Training and Service Act, as amended as regards persons in the medical, dental, and allied specialist categories; and

H. R. 7143. An act to amend the act of August 3, 1950, as amended, to continue in effect the provisions relating to the authorized personnel strengths of the Armed Forces; to the Committee on Armed Services.

COMMITTEE MEETINGS DURING SENATE SESSION

On request of Mr. JOHNSON of Texas, and by unanimous consent, the Subcommittee on Welfare and Pension Funds of the Committee on Labor and Public Welfare and also the Antimonopoly Subcommittee of the Committee on the Judiciary were authorized to meet during the session of the Senate today.

LEGISLATIVE PROGRAM

Mr. JOHNSON of Texas. Mr. President, I should like to announce, for the information of the Senate, that the Senate will not be in session on Thursday. There will be a routine session on Friday. We do not anticipate any rollcalls on that day. If it is necessary to clear up the calendar, the Senate will be in session on Tuesday and Wednesday of this week.

Again, I should like to call attention to the fact that on tomorrow, at 2:30 p. m., the Senate will receive a very distinguished visitor, Chancellor Konrad Adenauer, who will appear on the floor.

GENERAL GOVERNMENT MATTERS APPROPRIATION BILL, 1958

The VICE PRESIDENT laid before the Senate a message from the House of Representatives, which was read as follows:

IN THE HOUSE OF REPRESENTATIVES, U. S.,
May 24, 1957.

Resolved, That the House agree to the amendments of the Senate numbered 1, 2, 3, 4, 6, and 7 to the bill (H. R. 5788) entitled "An act making appropriations for

UNIVERSITY OF MICHIGAN LIBRARIES

the Executive Office of the President and sundry general Government agencies for the fiscal year ending June 30, 1958, and for other purposes," and disagree to the amendments of the Senate numbered 5 and 8 to said bill.

Mr. HAYDEN. Mr. President, last Wednesday the Senate passed H. R. 5788, the general Government-matters appropriation bill for 1958 and requested a conference on the Senate amendments. On Friday, the House considered the amendments, and agreed to all but two of them, namely, No. 5 and No. 8.

Amendment No. 5 inserted language to add the unobligated balance to the emergency fund for the President for national defense. Without this additional balance, the emergency fund will have $1 million for 1958, the same as for the past 2 years. Very little use was made of the fund last year, and its purpose is to provide for unforeseen problems which may arise.

Amendment No. 8 inserted language adding a proviso to section 201 which allowed the cost of any special feature or equipment on automobiles required for law enforcement and similar activities to be in addition to the ceiling fixed for the purchase price of such automobiles. The intention of the Senate amendment was to correct a situation occasioned by a recent ruling of the Comptroller General which upset a previous ruling dating back to 1938, under which such special equipment had been allowed beyond the price ceiling. The House, however, considers the proviso to be too broad in scope, and prefers that more restricted language be submitted as a budget estimate in regular procedure.

In the absence of the Senator from Washington [Mr. MAGNUSON], I have checked with the other conferees on the bill, and find them agreeable to receding from these two amendments, in order that final action be taken on the bill.

Therefore, Mr. President, I move that the Senate recede from its amendments No. 5 and No. 8.

The VICE PRESIDENT. The question is on agreeing to the motion of the Senator from Arizona.

The motion was agreed to.

Mr. JOHNSON of Texas. Mr. President, I had intended to make a statement on the matter, but I shall not, inasmuch as the motion of the Senator from Arizona has been agreed to.

TRANSACTION OF ROUTINE BUSINESS

Mr. JOHNSON of Texas. Mr. President, under the rule, there will be the usual morning hour, for the introduction of bills and the transaction of other routine business. In that connection, I ask unanimous consent that statements be limited to 3 minutes.

The VICE PRESIDENT. Without objection, it is so ordered.

EXECUTIVE COMMUNICATIONS, ETC.

The VICE PRESIDENT laid before the Senate the following letters, which were referred as indicated:

ADDITIONAL FACILITIES FOR TRAINING OF CERTAIN COMPONENTS OF ARMED FORCES

A letter from the Secretary of Defense transmitting a draft of proposed legislation to provide additional facilities necessary for the administration and training of units of the reserve components of the Armed Forces of the United States (with accompanying papers); to the Committee on Armed Services.

REPORT ON MILITARY PRIME CONTRACTS WITH BUSINESS FIRMS IN THE UNITED STATES FOR EXPERIMENTAL, DEVELOPMENTAL, AND RESEARCH WORK

A letter from the Assistant Secretary of Defense, Supply, and Logistics, transmitting, pursuant to law, a report on military prime contracts completed with business firms in the United States for experimental, developmental, and research work, during the first 9 months of fiscal year 1957 (with an accompanying report); to the Committee on Banking and Currency.

PROPOSED INCREASE OF APPROPRIATIONS FOR HOSPITAL CENTER IN DISTRICT OF COLUMBIA

A letter from the Administrator, General Services Administration, Washington, D. C., transmitting a draft of proposed legislation to increase the authorization for appropriations for the Hospital Center and facilities in the District of Columbia and for other purposes (with an accompanying paper); to the Committee on the District of Columbia.

AMENDMENT OF FEDERAL PROPERTY AND ADMINISTRATIVE SERVICES ACT OF 1949, RELATING TO OPTIONS IN CERTAIN LEASES OF GOVERNMENT PROPERTY

A letter from the Administrator, General Services Administration, Washington, D. C., transmitting a draft of proposed legislation to amend section 203 (c) of the Federal Property and Administrative Services Act of 1949 and to permit the exercise of options contained in certain leases of Government property (with an accompanying paper); to the Committee on Government Operations.

AMENDMENT OF FEDERAL PROPERTY AND ADMINISTRATIVE SERVICES ACT OF 1949, RELATING TO CERTAIN SURPLUS PROPERTY

A letter from the Administrator, General Services Administration, Washington, D. C., transmitting a draft of proposed legislation to amend the Federal Property and Administrative Services Act of 1949, as amended, regarding advertised and negotiated disposals of surplus property (with an accompanying paper); to the Committee on Government Operations.

AUDIT REPORT ON FEDERAL HOME-LOAN BANKS

A letter from the Comptroller General of the United States, transmitting, pursuant to law, an audit report on Federal home-loan banks, supervised by the Federal Home Loan Bank Board, for the fiscal year ended June 30, 1956 (with an accompanying report); to the Committee on Government Operations.

CANCELLATION OF CERTAIN CHARGES AGAINST INDIVIDUAL INDIANS AND TRIBES OF INDIANS

A letter from the Under Secretary of the Interior, transmitting, pursuant to law, a copy of an order canceling certain charges existing as debts due the United States by individual Indians and tribes of Indians (with accompanying papers); to the Committee on Interior and Insular Affairs.

PROPOSED CONCESSION CONTRACT, OREGON CAVES NATIONAL MONUMENT, OREG.

A letter from the Under Secretary of the Interior, transmitting, pursuant to law, a proposed concession contract in Oregon Caves National Monument, Oreg. (with accompanying papers); to the Committee on Interior and Insular Affairs.

PUBLICATION ENTITLED "TYPICAL ELECTRIC BILLS, 1957, CITIES OF 50,000 POPULATION AND MORE"

A letter from the Chairman, Federal Power Commission, Washington, D. C., transmitting, for the information of the Senate, a copy of its newly issued publication entitled "Typical Electric Bills, 1957, Cities of 50,000 Population and More" (with an accompanying document); to the Committee on Interstate and Foreign Commerce.

FINANCIAL STATEMENTS OF PROCEEDS DERIVED FROM CERTAIN LICENSES ISSUED BY THE FEDERAL POWER COMMISSION

A letter from the Chairman, Federal Power Commission, Washington, D. C., transmitting, pursuant to law, financial statements of proceeds derived from licenses issued by the Federal Power Commission under the Federal Power Act (with accompanying papers); to the Committee on Interstate and Foreign Commerce.

KIYOHITO TSUTSUI

A letter from the Secretary of the Army, transmitting a draft of proposed legislation for the relief of Kiyohito Tsutsui (with an accompanying paper); to the Committee on the Judiciary.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the VICE PRESIDENT:

A joint resolution of the Legislature of the State of California; to the Committee on Agriculture and Forestry:

"Assembly Joint Resolution 26

"Joint resolution relative to a congressional investigation of the poultry production industry

"Whereas the poultry industry is a most important segment of California's agricultural economy; and

"Whereas a long period of depressed prices has created serious problems for the poultry producers in the State of California; and

"Whereas the natural advantage of proximity to California's important and expanding consumer markets appears to be vitiated by reason of shipment into the State of poultry from areas with lower health and inspection standards than are required of poultry producers in the State of California; and

"Whereas congressional action may well be required to solve this vexing problem and preserve the California poultry industry from destructive inequalities: Now, therefore, be it

"*Resolved by the Assembly and Senate of the State of California (jointly)*, That the Legislature of the State of California respectfully memorializes the Congress of the United States to conduct such investigations as may be necessary to develop a program of legislation to insure equitable conditions for production of poultry throughout the Nation; and be it further

"*Resolved*, That the chief clerk of the assembly is directed to transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

A joint resolution of the Legislature of the State of California; to the Committee on Interior and Insular Affairs:

"Assembly Joint Resolution 16

"Joint resolution relative to the relationship between Federal and State Governments

"Whereas recent decisions of the United States Supreme Court have indicated that the permissible area of State activity in certain fields has materially narrowed and the power of the Federal Government has been materially increased at the expense of State governments; and

"Whereas it has been held by the Supreme Court that a State law requiring a permit for the construction of a hydroelectric plant on a nonnavigable stream need not be complied with inasmuch as the waters involved were on 'reserved lands' of the Federal Government and that the Federal Government had the power to regulate the use of waters on all such lands; and

"Whereas prior to this decision the view widely prevailed that all nonnavigable waters a part of the public domain were subject to the plenary control of the States, with no distinction as to whether the waters were on reserved lands or on lands subject to private acquisition and disposal under public land laws; and

"Whereas when it is considered that over 46 percent of all land in this State is owned by the Federal Government, any interpretation of this Supreme Court decision to the effect that State laws regulating the appropriation and use of waters are inapplicable to waters on or originating on Federal lands would result in a serious disruption in the orderly development and utilization of the waters in this State by State and local agencies, and a substantially similar situation exists in most of the other Western States; and

"Whereas the Supreme Court has also recently held that no compensation need be paid, in Federal condemnation proceedings along a navigable stream, for that portion of the value attributable to the riparian nature of the land, on the ground that the land was held subject to the dominant navigational servitude of the Federal Government: Now, therefore, be it

"Resolved by the Assembly and Senate of the State of California (jointly), That the Legislature of the State of California respectfully memorializes the Congress of the United States to enact legislation similar to the 'Western Water Rights Settlement Act of 1957' proposed in the current session of Congress by Senator BARRETT of Wyoming, for the exclusive purpose of removing all doubts as to the validity of existing water rights acquired under State laws, and to provide that the future acquisition of unappropriated waters in each State, navigable and nonnavigable, must be in compliance with State laws; and be it further

"Resolved, That the chief clerk of the assembly be directed to transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

A resolution of the Legislature of the State of Florida; to the Committee on Finance:

"House Memorial 905

"A memorial to the Congress of the United States of America urging that no restrictions be placed upon the import of crude and residual fuel oils

"Whereas the industries and businesses of Florida are almost entirely dependent upon the use of fuel oil and Florida is one of the largest users of fuel oil in the country; and

"Whereas refining processes are improving and more gasoline and other more valuable products are being produced from a barrel of crude leaving less fuel oil; and

"Whereas the production of residual fuel oils within the United States is not sufficient to supply the fuel oil requirements of the United States and its people; and

"Whereas the United States is consuming 57 percent of the free world's petroleum supply and has only approximately 20 percent of the free world's proven petroleum reserves; and

"Whereas it is in the interest of the United States to conserve its petroleum supply; and

"Whereas the continued imports of crude and fuel oils is necessary to the economy and public welfare of the United States and is essential in the public interest to the maintenance of a competitive price level that is just and fair to the users; and

"Whereas efforts have been made in the past and attempts may be made in this Congress to impose restrictions upon the imports of crude and fuel oils: Now, therefore, be it

"Resolved by the Legislature of the State of Florida, That the Congress of the United States is hereby memorialized and respectfully urged that no restrictions be placed upon the import of crude and residual fuel oils;

"That copies of this memorial be transmitted forthwith by the secretary of state of the State of Florida to the President of the United States, the President of the Senate, and the Speaker of the House in the United States Congress, and to each of the Senators and Representatives in the United States Congress; and

"That a copy of this memorial be spread upon the journal of both the Senate and the House of Representatives and sufficient copies thereof be delivered to the press."

A resolution of the Legislature of the State of Nebraska; to the Committee on Labor and Public Welfare:

"Legislative Resolution 27

"Whereas secondary boycotts are used by the officials of labor unions to bring economic pressure upon neutral employers of employees to compel workmen to join labor organizations, to force union members to switch their union affiliation, and to win collective bargaining contract demands; and

"Whereas organizational or racket picketing is a technique used by some labor union officials to bring economic pressure upon an employer to make him force union membership on his employees; and

"Whereas secondary boycotts and racket picketing interfere with and disrupt the right of free collective bargaining and voluntary union membership guaranteed in section 7 of the Labor-Management Relations Act; and

"Whereas the hot-cargo clause in contracts of unionized carriers avoids the responsibility of these carriers in rendering adequate service to the general public; and

"Whereas the use of the secondary boycott by the teamster union gravely affects the welfare of numerous Nebraska communities; and

"Whereas there is now pending in the Senate of the United States, S. 76, introduced by CARL T. CURTIS, of Nebraska, a bill to make illegal all forms of the secondary boycott and to outlaw racket picketing: Now, therefore, be it

"Resolved by the members of the Nebraska Legislature in 68th session assembled,

"1. That the legislature respectfully memorializes the Congress of the United States to amend the Labor-Management Relations Act to and completely these types of unfair labor practices.

"2. That authenticated copies of this memorial be transmitted to the President of the Senate and the Speaker of the House of Representatives of the United States, to each of the United States Senators and Representatives from Nebraska, and to the Secretary of Labor of the United States in Washington, D. C.

"DWIGHT W. BURNEY,
"President of the Legislature.

"I, Hugo F. Srb, hereby certify that the above is a true and correct copy of Legislative Resolution 27, which was passed by the Legislature of Nebraska in 68th regular session on the 22d day of May 1957.

"HUGO F. SRB,
"Clerk of the Legislature."

A resolution of the Senate of the State of Illinois; to the Committee on Foreign Relations:

"Senate Resolution 51

"Whereas Specialist Third Class William S. Girard, a resident of Ottawa, Ill., and a member of the United States Army stationed in Japan, has been indicted by a Japanese court on a charge of manslaughter arising from the death of a Japanese citizen; and

"Whereas the circumstances which led to the death of the Japanese citizen show that she was injured on a United States Army military reservation while engaged in activities prohibited by the United States Army, and that at the time of the injury, William Girard was performing duties as a sentry of the United States Army; and

"Whereas under the terms of a status of forces treaty the Japanese Government has demanded that SP/3 Girard be surrendered to the Japanese courts for trial; and

"Whereas to surrender William Girard to the jurisdiction of the Japanese courts, to be tried for an alleged offense committed on a United States Army military reservation while in the performance of his duties, will result in the denial to this American citizen of the protection and rights which are guaranteed to all American citizens by the Constitution and laws of the United States. Furthermore, it would be a great injustice to deny to this American serviceman the rights and privileges which he is sworn to defend; and

"Whereas if William Girard is to be subject to a trial, he should be tried by an American tribunal which will guarantee to him all the rights and privileges to which he is entitled, and which is free of the prejudices existing against American servicemen in foreign countries: Therefore be it

"Resolved by the Senate of the 70th General Assembly of the State of Illinois, That we condemn and protest any action which would surrender William Girard to the jurisdiction of the Japanese courts for trial; that we condemn any status of forces treaty which subjects American servicemen to foreign jurisdictions and deprives them of constitutional rights and privileges as American citizens; that we respectfully request the President of the United States, the Secretary of State, the Secretary of Defense, and the Congress of the United States, to take such action as will prevent William Girard from being brought to trial by the Japanese Government in the Japanese courts; and that a suitable copy of this preamble and resolution be forwarded by the secretary of state to the President of the United States, to the Secretary of State, to the Secretary of Defense, to the United States Senate, and to the House of Representatives of the United States.

"Adopted by the senate, May 22, 1957.

"JOHN WM. CHAPMAN,
"President of the Senate.

"EDWARD E. FERNANDES,
"Secretary of the Senate."

Three concurrent resolutions of the Legislature of the Territory of Hawaii; to the Committee on Interior and Insular Affairs:

"House Concurrent Resolution 37

"Whereas there is pending in the Circuit Court of the First Judicial District of the Territory of Hawaii a condemnation suit,

UNIVERSITY OF MICHIGAN LIBRARIES

Law No. 16696, wherein the Territory is condemning the Fishery of Mokauea; and

"Whereas although said condemnation suit was commenced on August 29, 1941, and there has been no final adjudication thereof, the Territory has transferred by quitclaim deed to one of the claimants to an undivided interest in and to the said Fishery of Mokauea, namely the Hawaiian Dredging Co., Ltd., a portion of the said fishery to wit, 1.634 acres of 71,170 square feet of wharfage land that abuts the Hawaiian Dredging Co., Ltd., plant by quit-claim deed dated August 6, 1952; and

"Whereas the said exchange mentioned above was executed under sections 4534 and 4535 of the Revised Laws of Hawaii, 1945, said sections 4534 and 4535 being expressly cited in the said quit-claim deed; and

"Whereas said exchange was executed upon the recommendation of the then Land Commissioner of Public Lands and approved and signed by the Governor of the Territory; and

"Whereas said exchange although benefiting the Hawaiian Dredging Co., Ltd., a claimant of an undivided interest in and to said fishery of Mokauea may have prejudiced the rights of other claimants of undivided interest in and to said fishery; and

"Whereas the rest of said claimants in and to the said fishery of Mokauea are willing to abide by a judicial determination of their interest and the extent thereof, if any, in and to said fishery: Now, therefore, be it

"Resolved by the House of Representatives of the 29th Legislature of the Territory of Hawaii (the Senate concurring), That the Congress of the United States is hereby respectfully requested to enact legislation authorizing the Commissioner of Public Lands of the Territory of Hawaii to effect an equitable exchange of public lands in the Territory of Hawaii with those claimants to the Fishery of Mokauea who will have judicially established their interest and the extent thereof, if any, in and to the said fishery in the condemnation proceedings mentioned above or in any other judicial proceeding in the Territory; and be it further

"Resolved, That certified copies of this concurrent resolution shall be forwarded to the President of the United States, the President of the Senate and the Speaker of the House of Representatives of the Congress of the United States and to the Delegate to Congress from Hawaii."

"House Concurrent Resolution 69

"Whereas pursuant to the provisions of section 6–61 of the Revised Laws of Hawaii 1955, the board of trustees of the Employees' Retirement System of the Territory of Hawaii is composed of 7 trustees of whom one is the treasurer of the Territory who serves ex-officio; 3 are appointed by the Govornor; 3 are members of the system elected to serve as trustees by the employees; and

"Whereas questions have been raised regarding the provisions of paragraph 1 of section 80 of the Hawaiian Organic Act as to whether the board of trustees of the Employees' Retirment System is legally constituted and whether it constitutes a board of public character; and

"Whereas as a consequence thereof there is serious doubt as to whether the provisions for the elections of members respective to said board as well as the action taken heretofore by such trustees are valid; and

"Whereas the Legislature of the Territory of Hawaii believes that the confirmation of the election of the member-trustees and ratification of their acts and the acts of the board of trustees since their election thereto are necessary; and

"Whereas the Legislature of the Territory of Hawaii sincerely believes in the principle that the members of the retirement system should be represented on the board of trustees by persons of their own choosing: Now, therefore, be it

"Resolved by the House of Representatives of the 29th Legislature (the Senate concurring, That the Congress of the United States is hereby respectfully requested to:

"1. Amend section 80 of the Hawaiian Organic Act by inserting after the words 'boards of public character that may be created by law;' the following: *'Provided, however*, That the legislature may provide for the election of some of the members of the board of trustees of the employees' retirement system of the Territory by the officers and members of the territory or counties';

"2. Ratify and confirm the election of members of the board of trustees of the Employees' Retirement System of the Territory heretofore elected by the officers and employees of the Territory and counties; and be it further

"Resolved, That certified copies of this concurrent resolution be forwarded to the President of the United States, the President of the Senate, and the Speaker of the House of Representatives of the United States and the Delegate to Congress from Hawaii."

"House Concurrent Resolution 71

"Whereas the employees of the Commissioner of Public Lands of the Territory of Hawaii do not enjoy the benefits of civil-service status: Now, therefore, be it

"Resolved by the House of Representatives of the 29th Legislature of the Territory of Hawaii (the Senate concurring), That the Congress of the United States be requested to amend the organic act so that the subagents, clerks, and other employees of the Commissioner of Public Lands of the Territory of Hawaii shall continue in employment subject to suspension, demotion, and dismissal as provided in the civil-service laws of the Territory of Hawaii as amended from time to time; and be it further

"Resolved, That certified copies of this resolution shall be forwarded to the President of the United States, the President of the Senate, and the Speaker of the House of Representatives of the United States, and the Delegate to Congress from Hawaii."

A resolution of the Legislature of the Virgin Islands; to the Committee on Public Works:

"Resolution petitioning the Congress of the United States for the extension of Federal aid to highway programs to the Virgin Islands

"Whereas existing programs of Federal aid to the various States and Territories in the construction and maintenance of highways do not include the Virgin Islands; and

"Whereas the need for adequate roads exists throughout the Virgin Islands, which is of primary importance especially to the farmers of these islands in marketing their produce, and also as and adjunct to the business of tourism; and

"Whereas the Congress has recognized the urgency of Federal assistance to the various States and Territories in the building of the highways of America; and

"Whereas in this part of America, it is most urgent that such Federal aid be extended: Therefore be it

"Resolved by the Legislature of the Virgin Islands, That the Congress of the United States and the appropriate committees of its Houses are urged to take immediate and effective action to provide for the extension of Federal aid to highways programs to the Virgin Islands; and be it further

"Resolved, That a copy of this resolution be sent to the President of the Senate, the Speaker of the House of Representatives, the respective chairmen of the Senate and House Committees on Public Works, Interior and Insular Affairs, the Secretary of the Interior, the Director of Territories and Insular Affairs, and the Governor of the Virgin Islands.

"Thus passed by the Legislature of the Virgin Islands on May 21, 1957.

"Witness our hands and the seal of the Legislature of the Virgin Islands this 21st day of May A. D. 1957.

"AUBREY A. ANDUZE,
"President."

[SEAL]

"JOHN D. MERWIN,
"Legislative Secretary."

A telegram, in the nature of a petition, from O. L. Hilde, Minneapolis, Minn., relating to the President's budget; to the Committee on Appropriations.

A resolution adopted by the Minnesota Valley Cooperative Light & Power Association, Montevideo, Minn., favoring the enactment of Senate bill 555, to authorize the construction, operation, and maintenance of the Hells Canyon Dam on the Snake River between Idaho and Oregon, and for related purposes; ordered to lie on the table.

STATEHOOD FOR ALASKA AND HAWAII—JOINT RESOLUTION OF OREGON LEGISLATURE

Mr. NEUBERGER. Mr. President, I have received today a copy of Senate Joint Memorial 7, which was adopted by the Legislature of the State of Oregon to urge the admission of Alaska and Hawaii to statehood during the present session of Congress.

The people of Oregon have long supported full statehood for these two Territories, both of which are close and familiar to us who live on the Pacific coast. We are eager to welcome them to full and equal citizenship in our Nation, and to have their elected representatives join us in the Congress. As a member of the Subcommittee on Territories of the Senate Committee on Interior and Insular Affairs, I shall urge action on the statehood bills as soon as the subcommittee can meet, as the hearings on these bills have already been completed and printed, and the record is clear and ready for action.

Mr. President, I ask unanimous consent that Senate Joint Memorial 7 of the

Oregon Legislature may be printed in the RECORD.

There being no objection, the joint resolution was referred to the Committee on Interior and Insular Affairs, and, under the rule, ordered to be printed in the RECORD, as follows:

Senate Joint Memorial 7

To the Honorable Senate and the House of Representatives of the United States of America in Congress Assembled:

We, your memorialists, the 49th Legislative Assembly of the State of Oregon, in legislative session assembled, most respectfully represent as follows:

Whereas the people of Alaska and Hawaii have shown their capacity to govern themselves; and

Whereas the people of the Territories of Alaska and Hawaii have consistently and willingly observed and performed all of the duties of other citizens of the United States; and

Whereas to allow these modern communities of loyal Americans to continue to share the burdens and responsibilities of citizenship without the right fully to govern themselves in the manner of our States, without both voice and vote on the floors of Congress, and without vote for the President of the United States, is to continue to violate the sacred democratic principles which guided our great country's fight for independence over a century and a half ago; and

Whereas the people of the State of Oregon have many economic, social, and cultural ties with the people of Alaska and Hawaii and have a keen interest in seeing statehood granted to the Territories of Alaska and Hawaii; and

Whereas both Houses of the Congress of the United States are once again considering legislation which would grant statehood to Alaska and Hawaii: Now, therefore, be it

Resolved by the Senate of the State of Oregon (the House of Representatives jointly concurring therein), That the Congress of the United States be memorialized to grant statehood to Alaska and Hawaii during the current session of Congress; and be it further

Resolved, That copies of this memorial be sent to the President of the United States of America, to the President of the Senate and to the Speaker of the House of Representatives of the Congress of the United States, to the chairmen of the committees of the Congress which are considering statehood for Alaska and Hawaii, to the Oregon congressional delegation and to the Delegates to Congress from Alaska and from Hawaii.

The VICE PRESIDENT laid before the Senate a joint resolution of the Legislature of the State of Oregon, identical with the foregoing, which was referred to the Committee on Interior and Insular Affairs.

INCREASED COMPENSATION FOR POSTAL EMPLOYEES — RESOLUTION OF ARKANSAS SENATE

Mr. McCLELLAN. Mr. President, I present for appropriate reference, a resolution adopted by the Senate of the State of Arkansas, relating to increased compensation for postal employees. I ask unanimous consent that the resolution may be printed in the RECORD.

There being no objection, the resolution was referred to the Committee on Post Office and Civil Service, and, under the rule, ordered to be printed in the RECORD, as follows:

Whereas Senate bill 27 and House bill 2474, now pending in the Congress of the United States, would provide for a pay raise for postal employees; and

Whereas this pay increase will affect 7,200 postal workers in Arkansas and will bring an additional $8,750,000 into our State each year; and

Whereas recent studies have conclusively shown that the wage rates of postal employees have lagged far behind wage increases to workers in private industry; and

Whereas it is believed that the wages of postal employees should be brought more closely in line with wages paid to individuals in private industry: Now, therefore, be it

Resolved by the Senate of the first extraordinary session of the 61st General Assembly of the State of Arkansas:

SECTION 1. That the Senate of the State of Arkansas does hereby encourage the Congress of the United States to pass pending legislation which would provide for pay increases to postal employees.

SEC. 2. That upon adoption of this resolution, a copy of the same shall be mailed by the secretary of the senate to Senator JOHN L. MCCLELLAN and Senator J. W. FULBRIGHT.

Adopted.

ARTHUR SHIREY,
Secretary.

REVISION OF POSTAL LEGISLATION—RESOLUTION

Mr. YOUNG. Mr. President, I think the North Dakota Press Association should be commended for the resolution which it adopted favoring revision of legislation proposed by the United States Post Office Department. I ask unanimous consent that the resolution be printed at this point in the RECORD, as a part of my remarks.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION ADOPTED AT THE ANNUAL CONVENTION OF THE NORTH DAKOTA PRESS ASSOCIATION AT MINOT, N. DAK., APRIL 27, 1957

Whereas the deficit of the United States Post Office Department is approaching $1 billion a year; and the said Department is becoming an increasingly serious burden upon the Public Treasury; and

Whereas costs of doing business and maintaining the usual postal services have greatly increased; and

Whereas it is desirable that the Department be placed on as nearly a self-supporting basis as possible; and

Whereas it is most equitable that the increased cost be paid, so far as practicable, by the users of the postal services: Now, therefore, be it

Resolved, That the North Dakota Press Association petition the Congress of the United States to approve the postal rate revision legislation proposed by the United States Post Office Department.

By the committee:

HOWARD DOHERTY,
Chairman, Killdeer, Killdeer Herald.
FERN LEE,
Towner, Mouse River Farmers Press.
HARRY E. POLK,
Williston, Williston Herald.
S. H. FARRINGTON,
Harvey, Harvey Herald.
GRANT HELGESON,
Hankinson, Hankinson News.

Moved, seconded, and adopted unanimously at Minot, N. Dak., on this date, April 27, 1957.

Attest:

ORION COLE,
President, Hatton Free Press, Hatton, N. Dak.
F. J. FROESCHLE,
Secretary, Ranson County Gazette, Lisbon, N. Dak.

PROPOSED LEGISLATION ON BEHALF OF VETERANS WITH SERVICE-CONNECTED DISABILITIES—LETTER AND RESOLUTION

Mr. WILEY. Mr. President, I was pleased to receive in the morning mail a letter and a resolution from Adj. Charles R. Kettle, of the Department of Wisconsin Disabled American Veterans.

The resolution, urging support of H. R. 6191, was unanimously adopted by the Disabled American Veterans annual eighth district conference in Milwaukee recently.

As we know, H. R. 6191 proposes to extend for 1 year the period during which a person may be determined eligible for disability payments under the social-security program.

In addition, it would provide that social-security benefits for disabled veterans would not be reduced because of VA payment for service-connected disabilities.

As we recall, H. R. 6191 passed the House on March 28, 1957.

I am glad that our colleagues on the Senate Finance Committee presently have the bill under consideration, and hope that it will be reported out soon.

Aware that amendments are being considered, I shall naturally be happy if improvements can be made.

I am hopeful, however, that the general objective of the bill will be adhered to.

Moreover, I would urge all the members of the Senate to view this proposal sympathetically when it comes to the floor of the Senate.

I ask unanimous consent to have printed at this point in the RECORD the letter from Adjutant Kettle, and the text of the resolution adopted by the national eighth district conference.

There being no objection, the letter and resolution were ordered to be printed in the RECORD, as follows:

DISABLED AMERICAN VETERANS,
DEPARTMENT OF WISCONSIN, INC.,
Hanover, Wis., May 24, 1957.

Hon. ALEXANDER WILEY,
United States Senate Building,
Washington, D. C.

DEAR SENATOR WILEY: The enclosed resolution was unanimously adopted by the Disabled American Veterans' annual national eighth district conference in Milwaukee, Wis., on April 28, 1957. The district is comprised of the States of Illinois, Wisconsin and Michigan.

You are respectfully requested to actively support the enactment of H. R. 6191.

Sincerely yours,

CHARLES R. KETTLE,
Department Adjutant.

RESOLUTION URGING DELETION FROM THE SOCIAL-SECURITY LAWS PROVIDING FOR BENEFITS TO TOTALLY DISABLED PERSONS AT AGE 50, THE CLAUSE WHICH REDUCES THE SOCIAL-SECURITY BENEFITS BY ANY AMOUNT A VETERAN RECEIVES FROM THE VA FOR HIS DISABILITIES

Whereas the social-security laws were amended in the last previous session of Congress to provide for benefits to totally disabled persons at age 50; and

Whereas this amendment imposed a restriction that reduces the social-security benefit by any amount a veteran receives for disability compensation paid for war disabilities, and is, therefore, discriminatory

UNIVERSITY OF MICHIGAN LIBRARIES

against veterans as compared to civilians who never went to war; and

Whereas the bill H. R. 6191 has been unanimously reported by the House Ways and Means Committee, eliminating the restriction on compensation payments: Now, therefore, be it

Resolved, That the Eighth District Conference of the Disabled American Veterans, assembled this 27th and 28th of April, 1957, in Milwaukee, Wis., go on record supporting H. R. 6191 and urge that department adjutants of the States comprising the eighth district conference send letters to all Congressmen and Senators, requesting their support for this legislation; and be it further

Resolved, That a copy of this resolution be sent to the DAV national director of legislation, Mr. Omer Clark.

Approved April 28, 1957, by the National Eighth District Conference of the Disabled American Veterans assembled in Milwaukee, Wis.

CHARLES R. KETTLE,
Adjutant, Department of Wisconsin, DAV, Hanover, Wis.

ASSISTANCE FOR POLAND—RESOLUTION

Mr. JAVITS. I present a copy of a resolution adopted at a great mass meeting of Americans of Polish extraction held in Buffalo, N. Y., on May 3, urging upon our Government the policy of giving the people behind the Iron Curtain in Poland some hope that they have a friend who will give them humanitarian support in the way of food and medicine. I ask unanimous consent that the resolution may be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

At a mass meeting commemorating the adoption of the Polish Constitution of the 3d day of May, held at the Polish Union Hall, 761 Fillmore Avenue in the city of Buffalo, N. Y., the following resolution was unanimously adopted:

"Whereas the year 1957 marks the 166th year of the adoption of the Polish Constitution of May 3, 1791, which document was the most liberal and the most democratic constitution of its day; and

"Whereas the Republic of Poland has been deprived of her political independence and has suffered the loss of approximately one-half of her eastern territory and 13 million of her citizens having been unjustly and arbitrarily absorbed by the Soviet Union; and

"Whereas the Soviet Union still dominates what remains of the Republic of Poland with her Red army, inspite of the uprisings of the people in the city of Poznan in June 1956, and the upheaval in October 1956 in Warsaw, and the elections that were held in January 1957; and

"Whereas many of these unfortunate events that followed the end of World War II were conceived and agreed upon at the now infamous Conferences of the Big Three at Teheran and Yalta; and

"Whereas recently many Polish citizens have been repatriated by the Soviet Union from slave-labor camps, sick, hungry, and destitute, and in need of immediate medical attention, housing, and food; and

"Whereas the Soviet Union has for the past 12 years exploited the Republic of Poland economically through bad industrial planning, collectivization of her farms, socialization of small private enterprise, and the removal of her natural resources to a degree that she has become totally impoverished; and

"Whereas American sympathy for downtrodden and freedom-loving Poland has been evidenced by over 90 percent of the American press, radio, and television, and in addition thereto the Ford Foundation has given a concrete example of said love and affection by granting and setting aside upward of half a million dollars for cultural and educational purposes, under which grant there will be an exchange of students and ideas between the two peace-loving nations; and

"Whereas the present western boundaries of Poland on the Oder and Neisse Rivers have been historically Polish territory through the ages; and

"Whereas communism continues to threaten our own liberties in these great United States of America through infiltration into our schools, into our factories, into Government agencies and various other institutions and organizations: Now, therefore, be it

"*Resolved*, As Americans dedicated to the freedom of all nations, we feel duty bound in the name of justice and equity to take firm stand in defense and restoration of the just rights of our ally, the Republic of Poland; be it further

"*Resolved*, That the decisions of the Teheran and Yalta conferences concerning Poland and other nations, arrived at without their representation, be revoked and repudiated entirely; be it further

"*Resolved*, That we protest against any change in the present western boundaries of Poland as presently constituted, inasmuch as they have always been historically Polish; be it further

"*Resolved*, That we petition our Government to remain alert and extremely vigilant to the assumed 'new look' of the present leaders of the Soviet Union until such time as they roll back the Iron Curtain and free the captive peoples of Poland and other enslaved nations; be it further

"*Resolved*, That we further petition our Government to extend immediate financial and economic assistance to the Republic of Poland to help the repatriated citizens that need immediate medical assistance, and to the nation as a whole which was exploited and impoverished by the Soviet Union for the past 12 years; be it further

"*Resolved*, That we commend and compliment the trustees of the Ford Foundation for their generous grant of financial assistance to promote and encourage culture and education between America and Poland; be it further

"*Resolved*, That we petition our Government to continue to eradicate communism from our land and our institutions, and that it continue to take all necessary steps for our defense that we remain prepared on land, on the sea, and in the air against all possible aggressors; be it further

"*Resolved*, That we as loyal citizens of the United States of America, hereby repeat our pledge of loyalty and allegiance to our great and beloved country; be it further

"*Resolved*, That copies of this resolution be sent to the Secretary of State, John Foster Dulles, and to our Congressman, Hon. Edmund P. Radwan; also to Hon. Jacob Javits and Hon. Irving M. Ives, United States Senators, and to the trustees of the Ford Foundation.

"Resolution committee:

"MICHAEL E. ZIMMER,
"Chairman, Judge, City Court of Buffalo.
"CASIMER T. PARTYKA,
"Judge, City Court of Buffalo.
"JOSEPH S. MATALA,
"Director of Real Estate, City of Buffalo.
"ANN MIKOLL,
"Deputy Corporation Counsel, City of Buffalo.

"Dated: Buffalo, N. Y., May 5, 1957."

FINANCING OF PART-TIME FARMERS—RESOLUTION

Mr. WILLIAMS. Mr. President, at a recent meeting of the Delaware State Farm Bureau, a resolution opposing subsidization and Government financing of part-time farmers was adopted.

In view of the plight of full-time farmers who are attempting to make a living from producing for an already glutted market, such a program to loan to part-time farmers for agricultural production only tends to aggravate the problems of full-time farmers.

I ask unanimous consent that this resolution be incorporated at this point in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

Whereas we are living in a rapidly changing world, and whereas farming methods and conditions must keep pace with the development of a more economic and more efficient way of farming to meet the rising demand for uniform, high quality, low cost food, we conscientiously and urgently oppose the subsidization or support of inadequate, inefficient, and uneconomic part-time farms at the expense of the taxpayer.

PROPOSED MUSEUM OF AMERICAN ART—RESOLUTION

Mr. HUMPHREY. Mr. President, the Twentieth Century Club, a District of Columbia organization of over 500 women from various parts of the country, has recently adopted a resolution supporting S. 966, a bill I have introduced to establish a Museum of American Art.

I ask unanimous consent that the resolution be printed at this point in the RECORD, and be appropriately referred.

There being no objection, the resolution was referred to the Committee on Rules and Administration, and ordered to be printed in the RECORD, as follows:

Whereas the Civil Service Commission Building is an excellent example of Greek revival architecture and should be preserved, and whereas the Smithsonian Institution has in its possession many fine examples of American art without sufficient housing for them, and whereas such a museum would be of great assistance in preserving American art: Now, therefore, be it

Resolved, That the Twentieth Century Club, meeting in regular session May 2, hereby requests that the Committees on Rules and Administration refer S. 966 and H. R. 4002 to the proper committees in Congress in order that hearings may be held and favorable action taken on the bills; and be it further

Resolved, That copies of this resolution be sent to the chairmen of the Rules and Administration Committees, to Senator HUMPHREY, Congressman THOMPSON, and, later, the chairmen of the committees to which the bills are referred.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. MONRONEY, from the Committee on Interstate and Foreign Commerce, with an amendment:

S. 1366. A bill to amend the act entitled "An act to authorize the construction, protection, operation, and maintenance of public airports in the Territory of Alaska," as amended (Rept. No. 374).

By Mr. EASTLAND, from the Committee on the Judiciary, without amendment:

S. 1566. A bill for the relief of Arthur Sew Sang, Kee Yin Sew Wong, Sew Ing Lin, Sew Ing Quay, and Sew Ing You (Rept. No. 375);

H. R. 1451. An act for the relief of Cecelia Vaccaro (Rept. No. 378);

H. R. 1765. An act for the relief of Ellen G. Marinas (Rept. No. 379);

H. R. 1837. An act for the relief of Elda Mondillo (Rept. No. 380); and

H. J. Res. 289. Joint resolution to facilitate the admission into the United States of certain alien children (Rept. No. 376).

By Mr. EASTLAND, from the Committee on the Judiciary, with an amendment:

H. R. 1359. An act for the relief of Mrs. Theodore (Nicole Xantho) Rousseau (Rept. No. 381).

By Mr. EASTLAND, from the Committee on the Judiciary, with amendments:

S. 1581. A bill for the relief of Shew Shei Lan and Chow Shong Yep (Rept. No. 377).

By Mr. JOHNSTON of South Carolina, from the Committee on Post Office and Civil Service, without amendment:

S. 25. A bill relating to effective dates of increases in compensation granted to wage board employees (Rept. No. 382).

EXECUTIVE REPORTS OF COMMITTEES

As in executive session,

The following favorable reports of nominations were submitted:

By Mr. EASTLAND, from the Committee of the Judiciary:

Maurice Augustus Crews, of Pennsylvania, to be an Assistant Commissioner of Patents, vice Arthur W. Crocker, elevated;

William B. Somers, of North Carolina, to be United States marshal for the middle district of North Carolina; and

Albert W. Saegert, of Texas, to be United States marshal for the western district of Texas.

By Mr. HRUSKA, from the Committee on the Judiciary:

J. Lee Rankin, of Nebraska, to be Solicitor General of the United States.

By Mr. JOHNSTON of South Carolina, from the Committee on Post Office and Civil Service:

Thirty postmaster nominations.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. JOHNSON of Texas:

S. 2153. A bill to authorize the issuance of a special series of stamps as a tribute to the surveyors of the United States; to the Committee on Post Office and Civil Service.

By Mr. BEALL:

S. 2154. A bill to provide for the appointment of an additional judge for the Juvenile Court of the District of Columbia; to the Committee on the District of Columbia.

By Mr. CASE of New Jersey:

S. 2155. A bill for the relief of Vera Lovrecek; to the Committee on the Judiciary.

By Mr. DIRKSEN:

S. 2156. A bill to fix the fees payable to the Patent Office and for other purposes; to the Committee on the Judiciary.

By Mr. CHAVEZ:

S. 2157. A bill to authorize appropriation of an additional sum required for completion of the Inter-American Highway; to the Committee on Public Works.

By Mr. CHAVEZ (by request):

S. 2158. A bill relating to the procedure for altering certain bridges over navigable waters to the Committee on Public Works.

By Mr. CLARK (for himself, Mr. HUMPHREY, Mr. JAVITS, Mr. LONG, Mr. MAGNUSON, Mr. MORSE, Mr. MURRAY, Mr. NEUBERGER, and Mr. CASE of New Jersey):

S. 2159. A bill to provide for the establishment of a Department of Housing and Urban Affairs and for other purposes; to the Committee on Government Operations.

(See the remarks of Mr. CLARK when he introduced the above bill, which appear under a separate heading.)

By Mr. SPARKMAN (for himself, Mr. FULBRIGHT, Mr. CLARK, Mr. HILL, Mr. O'MAHONEY, Mr. KEFAUVER, and Mr. HUMPHREY):

S. 2160. A bill to make capital more readily available for financing small business and thus to promote, foster, and develop the domestic and foreign commerce of the United States, and for other purposes; to the Committee on Banking and Currency.

(See the remarks of Mr. SPARKMAN when he introduced the above bill, which appear under a separate heading.)

By Mr. GOLDWATER:

S. 2161. A bill to amend the act of August 14, 1955 (69 Stat. 725); to the Committee on Interior and Insular Affairs.

By Mr. CHAVEZ:

S. 2162. A bill for the relief of Yee Kung Sun; to the Committee on the Judiciary.

By Mr. HUMPHREY:

S. 2163. A bill for the relief of Estrellita C. Suyama; to the Committee on the Judiciary.

CONCURRENT RESOLUTION

Mr SMATHERS submitted a concurrent resolution (S. Con. Res. 33) requesting the President to return the enrolled bill S. 1463 to the Senate, which was considered and agreed to.

(See concurrent resolution printed in full, which appears under a separate heading.)

PROPOSED DEPARTMENT OF HOUSING AND URBAN AFFAIRS

Mr. CLARK. Mr. President, on behalf of the Senator from Minnesota [Mr. HUMPHREY], the Senator from New York [Mr. JAVITS], the Senator from Louisiana [Mr. LONG], the Senator from Washington [Mr. MAGNUSON], the senior Senator from Oregon [Mr. MORSE], the Senator from Montana [Mr. MURRAY], the junior Senator from Oregon [Mr. NEUBERGER], the Senator from New Jersey [Mr. CASE], and myself, I introduce, for appropriate reference, a bill to provide for the establishment of a Department of Housing and Urban Affairs, and for other purposes.

Mr. President, two-thirds of the population of the United States lives in urban areas. We must adapt the administrative structure of the Government to the changes brought about by the fact that the United States has changed in the last half century from a predominantly rural nation to one predominantly urban.

We cannot ignore what this population explosion means. Metropolitan growth is posing one of the greatest challenges of the second half of the 20th century. We cannot meet this challenge with Government machinery designed for the 19th century.

This bill, if enacted, would create a new Department of Housing and Urban Affairs. This Department would provide stronger leadership for the Government's housing and civil defense programs, coordinate existing Federal programs which are urban-oriented, fix responsibility for research and policy recommendtion, and give representation to the urban population at the top levels of the Government in the same manner as the rural population is represented by the Department of Agriculture.

The new Department would be made up initially of the Housing and Home Finance Agency and the Federal Civil Defense Administration. These two agencies combined are larger in size and volume of expenditure than several of the existing departments. The bill also provides for the transfer of other functions to the new Department by directing the President to transfer those functions and agencies which would further the purposes of the bill. The President has authority to make such transfers under existing reorganization legislation.

Since the bill is essentially a reorganization of existing functions of Government, it would inaugurate no new operating programs. It would result in no increased expenditure, except perhaps minor expenditures for research, and these would be offset by savings through improved administrative coordination of the agencies being consolidated.

The principle of creating a Department of Urban Affairs has had support from the administration.

The last new Federal department was created in 1953, when the Federal Security Agency was raised to Cabinet status and renamed the Department of Health, Education, and Welfare. This bill follows essentially the same procedure, since it would elevate to Cabinet status the Housing and Home Finance Agency, with the Federal Civil Defense Administration added.

Mr. President, I ask unanimous consent that the bill may lie on the table for 1 additional legislative day, in order that Senators may have the opportunity to join as additional cosponsors.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the bill will lie on the table, as requested by the Senator from Pennsylvania.

The bill (S. 2159) to provide for the establishment of a Department of Housing and Urban Affairs and for other purposes, introduced by Mr. CLARK (for himself and other Senators) was received, read twice by its title, and referred to the Committee on Government Operations.

PROPOSED NATIONAL INVESTMENT COMPANY ACT OF 1957

Mr. SPARKMAN. Mr. President, I introduce, for appropriate reference, a bill to make capital more readily available for financing small business, and thus to promote, foster, and develop the domestic and foreign commerce of the United States, and for other purposes.

In this connection, I should like to say that this bill is really a redrafting of a bill I introduced earlier in the year, at the beginning of this Congress, Senate bill 719, for the purpose of establishing national investment companies.

The committee has been doing considerable work on the bill. It represents a new writing of the old bill. Hearings will be held shortly before the Small Business Subcommittee of the Committee on Banking and Currency, under the chairmanship of the distinguished Senator from Pennsylvania [Mr. CLARK]. I am very hopeful that some legislation along this line may be enacted.

UNIVERSITY OF MICHIGAN LIBRARIES

I may say that I am joined in the sponsorship of this measure by my colleague, the senior Senator from Alabama [Mr. HILL], the Senator from Wyoming [Mr. O'MAHONEY], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Arkansas [Mr. FULBRIGHT], the Senator from Pennsylvania [Mr. CLARK], and the Senator from Minnesota [Mr. HUMPHREY].

I, of course, would welcome any other sponsors who might see fit to join in the sponsorship of the bill, and I certainly commend it to the careful consideration of all Members of the Senate.

The VICE PRESIDENT. The bill will be received and appropriately referred.

The bill (S. 2160) to make capital more readily available for financing small business and thus to promote, foster, and develop the domestic and foreign commerce of the United States, and for other purposes, introduced by Mr. SPARKMAN (for himself and other Senators), was received, read twice by its title, and referred to the Committee on Banking and Currency.

HOUSING ACT OF 1957—AMENDMENTS

Mr. SPARKMAN (for himself, Mr. FULBRIGHT, and Mr. CLARK) submitted amendments, intended to be proposed by them, jointly, to the bill (H. R. 6659) to extend and amend laws relating to the provision and improvement of housing, to improve the availability of mortgage credit, and for other purposes, which were ordered to lie on the table and to be printed.

Mr. CAPEHART submitted amendments, intended to be proposed by him to House bill 6659, supra, which were ordered to lie on the table and to be printed.

Mr. CAPEHART (for himself and Mr. KNOWLAND) submitted amendments, intended to be proposed by them jointly to House bill 6659, supra, which were ordered to lie on the table and to be printed.

Mr. BEALL submitted an amendment, intended to be proposed by him, to House bill 6659, supra, which was ordered to lie on the table and to be printed.

Mr. BENNETT submitted amendments, intended to be proposed by him, to House bill 6659, supra, which were ordered to lie on the table and to be printed.

Mr. BRICKER (for himself and Mr. BUSH) submitted amendments, intended to be proposed by them, jointly, to House bill 6659, supra, which were ordered to lie on the table and to be printed.

Mr. BUSH. Mr. President, I submit amendments, intended to be proposed by me, to the housing bill, H. R. 6659, and ask that they be printed and ordered to lie upon the table.

Mr. President, the first point at which to capture control of Federal spending and lending is when the Congress establishes limits on programs in authorization bills.

The housing bill which is now the Senate's pending business contains authorizations far in excess of the levels recommended in President Eisenhower's budget. The total amount of authorizations recommended in the bill is $2,105,800,000, as compared with the budget recommendations of $925 million.

The amendments I intend to propose will give Senators interested in economy an opportunity to reduce the authorizations in the bill by $450 million. I anticipate that other Senators will offer additional amendments reducing the authorizations in the bill by another $500 million, making the grand total of possible reductions nearly $1 billion.

My amendments would:

First. Reduce the authority of the Federal National Mortgage Association to borrow directly from the Treasury from $2,100,000,000 to $1,700,000,000, eliminate a proposed limit of 1 percent on the amount of FNMA's fees and charges for its commitment and its purchase of mortgages under its special assistance programs, and eliminate proposed authority for FNMA to make direct construction loans in competition with private lenders.

Second. Reduce the increase in the authorization for college housing loans from $200 million to $150 million as recommended by the administration, eliminate a hidden subsidy to colleges by requiring payment of interest at a rate which the Treasury itself must pay on its long-term obligations, and prevent an expansion of the program to include divinity schools and hospitals among institutions eligible for college housing loans.

Mr. President, I ask unanimous consent that the amendments, together with statements in explanation of the amendments be printed in the RECORD following these remarks.

The VICE PRESIDENT. The amendments will be received, printed, and lie on the table; and, without objection, the amendments and explanations will be printed in the RECORD.

The amendments and explanations presented by Mr. BUSH are as follows:

PROPOSED AMENDMENT TO SECTION 202 RELATING TO TREASURY DEPARTMENT BACKSTOP FOR FNMA SECONDARY MARKET OPERATIONS

Amend section 202 by striking out "$2,100,000,000" on page 31, line 14, and substituting "$1,700,000,000."

STATEMENT IN SUPPORT OF PROPOSED AMENDMENT

Section 202 of the bill would increase the amount of FNMA's secondary market obligations that the Secretary of the Treasury may hold by $750 million (from $1.35 billion to $2.1 billion). The Treasury backstop authority would thereby be made equal to the FNMA's proposed general borrowing authority under the bill.

The administration has recommended an increase in the amount of the Treasury backstop of $350 million, rather than $750 million. A $350 million increase would be fully adequate to reinforce the FNMA general borrowing authorization. It has never been contemplated that the FNMA would call upon the Treasury as a source for all, or even a major portion, of its secondary market funds.

PROPOSED AMENDMENT TO SECTION 203 RELATING TO FNMA FEES AND CHARGES IN ITS SPECIAL ASSISTANCE PROGRAM

Amend section 203 by striking out the designation "(a)" on page 31, line 15, and by striking out all of subsections (b) and (c), starting on page 31, line 18, and ending on page 32, line 13.

STATEMENT IN SUPPORT OF PROPOSED AMENDMENT

Section 203 (b) of the bill would establish a 1-percent ceiling on the amount of FNMA's fees and charges "for its commitment and its purchase" of mortgages under its special assistance program. Subsection 203 (c) would apply this ceiling retroactively to certain commitment contracts.

Existing law does not undertake to limit FNMA's fees and charges. FNMA has not abused its discretion in this matter. The FNMA now charges a commitment fee of 1 percent and, if the mortgages are delivered, a purchase and marketing fee of one-half of 1 percent. Under section 203 (b) of the bill, the total fees would be reduced to 1 percent. The policy of charging a one-half of 1 percent purchase fee which is not collected unless the mortgage is sold to FNMA under the commitment contract should be retained. The fee serves as an inducement to the mortgage originator to seek to place the mortgage with a private investor instead of FNMA. Neither should the 1-percent commitment fee be lowered. Under existing conditions in the money market, a lower fee would be unduly attractive, and would encourage the investment of Government funds in mortgages which might otherwise be purchased by private investors.

It is desirable, if private investors are to be encouraged to invest their funds in the special assistance type of mortgage, that FNMA under its special assistance program should not purchase at terms substantially more lenient than those of private investors. Thus, the cumulative effect of subsections 203 (b) and (c) must be considered in conjunction with subsection (a), which would continue the requirement that FNMA pay at least 99 percent of par in this program.

It is true that the FNMA's commitment and purchase fees in connection with military housing mortgages under the Capehart program now total only 1 percent and that the purchase price is set at par. However, these special terms are appropriate in connection with military housing which is needed by the Government itself for occupancy by servicemen and which is built on military posts. In that program the Government, rather than private persons, is the beneficiary of the more liberal terms.

PROPOSED AMENDMENT TO STRIKE OUT SECTION 207 RELATING TO PROPOSED FNMA AUTHORITY TO MAKE CONSTRUCTION ADVANCES IN ITS SPECIAL ASSISTANCE PROGRAM

Strike out section 207 (p. 34, lines 1 through 14).

STATEMENT IN SUPPORT OF PROPOSED AMENDMENT

Section 207 of the bill would permit FNMA to make direct construction loans from various authorizations included under the special assistance functions. This provision would put FNMA in the originating or primary loan market, where it would be in direct competition with private lenders. This invasion of the field of private lending is unnecessary. FNMA has purchased hundreds of millions of dollars worth of mortgages where the short-term construction funds have been made available by private lenders. Private lenders are willing to make this type of construction loan in reliance on FHA commitments to insure the mortgage and FNMA commitments to purchase the mortgage. Section 207 of the bill is unneeded legislation.

PROPOSED AMENDMENT TO SECTION 601 OF THE BILL RELATING TO COLLEGE HOUSING AUTHORIZATION AND ELIGIBILITY REQUIREMENTS

Amend section 601 as follows:

1. Strike out all of subsection (a) (p. 51, lines 3 through 9) and substitute the following:

"(a) Section 401 (d) of the Housing Act of 1950 is amended by striking out '$750,000,000' and inserting in lieu thereof '$900,000,000.'"

2. In subsection (b), strike out clauses (2) and (3) (p. 51, line 17, to p. 52, line 3) and renumber clauses (4) and (5) as (2) and (3), respectively.

STATEMENT IN SUPPORT OF PROPOSED AMENDMENT

Section 601 would increase the revolving fund for college housing loans by $200 million and would add two categories of eligible borrowers to the college housing program. One category is divinity schools, which do not now receive aid because of constitutional legal questions, and the other class is hospitals which operate schools of nursing or which are approved for medical internships by recognized authority.

The administration, upon the basis of balancing the needs of the college housing program against other budgetary needs, has recommended that the college housing revolving loan authorization be increased by $150 million. Section 601 of the bill provides for a $200 million increase, and the proposed amendment would provide for the $150 million increase recommended by the administration.

Under the proposed amendment, the college housing loan program will be enabled to proceed at a reasonable volume consistent with other budgetary demands. In this connection it should be noted that, in addition to the $150 million increase which would be made available under the proposed amendment, it is estimated that there will be unallocated at the end of the current fiscal year about $92 million of presently authorized funds.

The proposed amendment would also strike from the bill the provisions making divinity schools and hospitals eligible for college housing loans. Loans for divinity schools will undoubtedly give rise to long-drawn-out litigation under the first amendment to the Constitution. Since the questions of legality arise under the Constitution, they cannot be finally settled by act of Congress alone. In view of these difficulties it appears more desirable to permit the construction needs of divinity schools to continue to be financed on the basis of private contributions and loans.

Hospitals are not now eligible under the college housing program because they do not offer at least a 2-year program fully transferable toward a baccalaureate degree. Of course, colleges and universities which operate medical schools and nursing schools in partnership with hospitals are now eligible under the law. In the case of hospitals whose student nurses and interns are not registered in colleges and universities, Federal grants for housing, as well as for other hospital facilities, can be made under the Hill-Burton program.

It should be noted, too, that, while the bill would earmark $25 million for housing loans to hospitals, this would only be a small beginning. The American Hospital Association estimates that $150 million is required. There are 5,500 hospitals in the country, and most of them have interns. There are also 1,100 nursing schools. This new program can, therefore, take on enormous dimensions once it gets underway. It can also serve as a precedent for loans for other types of schools which are not affiliated with colleges or universities.

STATEMENT IN SUPPORT OF PROPOSED AMENDMENT TO SECTION 601 RELATING TO COLLEGE HOUSING INTEREST RATE

Subparagraph (c) which would be added to section 601 of the bill would require the Housing Administrator, in making college housing loans, to charge a rate equal to that payable by him to the Treasury plus one-fourth of 1 percent. The present law provides for a similar spread, except that if the resulting rate is less than 2¾ percent, the higher rate must be charged. However, because of the different base to which the one-fourth-percent differential would be applied under the provisions of the next subsection (which changes the formula fixing the interest rate paid by the Administrator on funds borrowed from the Treasury for college housing loans) as compared with the present law, the net result under present market conditions, would be to change the college housing loan interest rate from 2⅞ percent to 3½ percent.

Subparagraph (d) which would be added to section 601 of the bill would provide that college housing funds borrowed by the Administrator from the Secretary of the Treasury shall bear interest at a rate, calculated each calendar quarter, based on the current average market yield on all outstanding marketable obligations of the United States having a remaining maturity of 15 or more years. This formula would be in place of the formula now in the law which bases the interest rate on the average rate borne by all interest-bearing obligations of the United States, irrespective of maturity, as computed at the end of the preceding fiscal year, or 2½ percent, whichever is higher. The rate proposed would currently result in the Administrator paying 3¼ percent on funds borrowed from the Treasury. Under the present law, the rate for fiscal year 1957 is 2⅝ percent.

The enactment of the interest rate formula proposed, which would raise the interest rate on college housing loans on the basis of present market conditions from 2⅞ percent to 3½ percent, would eliminate the subsidy inherent in the existing interest rate formula by permitting the Administrator to borrow college housing loan funds from the Secretary of the Treasury at a rate of interest equal to that which the Treasury itself would have to pay if it went into the market to borrow the funds for a comparable length of time. In that way the colleges receive the full benefit of the use of the Treasury's credit on Federal Government borrowings for college housing loan funds.

As the formula is based on current market yield, it reflects the interest rate the Treasury would have to pay in the current market for borrowings of maturities comparable to that of college housing loans. It is unrealistic to assume that when the Treasury lends money to an agency it somehow can dip into a fund which represents the composite of all its past borrowings still outstanding. Therefore, the proposed interest rate formula does not reflect the interest cost relating to old borrowings, such as those financing World War II.

The point has been made that the Federal Budget is now in balance, with income sufficient to cover current expenditures. Therefore, it is argued that Government borrowing is necessary for the purpose of refinancing old obligations, and that college housing loan funds are really being derived from tax revenues and not from borrowing. The argument then concludes that there should be no necessary connection between the college housing interest rate and the current cost of long-term Government borrowing.

This entire chain of reasoning is based on a false assumption. It assumes that the Government should finance new programs, such as the college housing loan program, out of current revenue, while using new borrowings to refinance old debt. This would give the college housing program a prior claim on current tax receipts than would be given to the repayment of old debt. There is no reason why the college housing loan program should have first claim on current tax revenues while the repayment of old debt receives a second claim.

The old debt is a result of a war which had to be fought, and the old debt must now be repaid. Since it must be repaid, the undertaking of later programs, such as the college housing program, makes necessary new borrowings. Since these new borrowings require the payment of a rate of interest on current market conditions, it is clear that a subsidy will be given to the colleges if loans to them are made at a rate which is insufficient to cover the cost to the Federal Government of borrowing in today's market, plus administrative expenses, plus a reserve for losses.

The Federal Government should, if its finances are to be managed prudently, give a first claim on current tax revenues to current operating expenses, such as defense expenditures. It should give a second priority to meeting the maturing debt. Finally, it should give a third priority to capital projects and long-term investments such as college housing loans. These are in effect financed by new borrowing when current income is insufficient.

Under the present law, college housing loans are geared to the interest rate being paid on all outstanding debt, including moneys borrowed during World War II at only 2½ percent interest. The college housing loan interest rate should be geared to the current cost of long-term borrowings.

In brief, it cannot be denied that the need for Federal long-term borrowing, now or in the near future, would be lessened were it not for the college housing program and similar current loan programs. It is folly for the Federal Government to continue indefinitely to compute the cost of such borrowing on the basis of interest rates which were set during the 1940's and earlier for moneys borrowed to cover the cost of the war and of prior emergencies.

ESTABLISHMENT OF A CONTINUING UNITED NATIONS FORCE—ADDITIONAL COSPONSOR OF CONCURRENT RESOLUTION

Mr. FLANDERS. Mr. President, I ask unanimous consent that the name of the junior Senator from New York [Mr. JAVITS] may be added to the list of cosponsors of the concurrent resolution (S. Con. Res. 29) favoring the creation of a force similar to the United Nations Emergency Force for the maintenance of international peace and security, submitted by me, on behalf of myself and other Senators, on May 8, 1957.

The VICE PRESIDENT. Without objection, it is so ordered.

EXTENSION OF AUTHORITY OF SPECIAL COMMITTEE TO STUDY THE FOREIGN AID PROGRAM—REFERENCE OF RESOLUTION

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that Senate Resolution 141, Calendar No. 380, extending to January 31, 1958, the authority of the Special Committee To Study the Foreign Aid Program, which was reported on Thursday last from the Committee on Foreign Relations, be referred, under the rule, to the Committee on Rules and Administration.

The VICE PRESIDENT. Without objection, it is so ordered.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. SALTONSTALL:

Address delivered by the Vice President before the 65th annual meeting of the American Iron & Steel Institute, New York City, May 23, 1957.

UNIVERSITY OF MICHIGAN LIBRARIES

By Mr. KUCHEL:

Address entitled "International Trade Promotes World Peace," delivered by him before the Foreign Trade Association of Southern California at Los Angeles, on May 23, 1957.

NOTICE OF CONSIDERATION OF NOMINATION OF JAMES M. LANGLEY TO BE AMBASSADOR OF THE UNITED STATES TO PAKISTAN

Mr. GREEN. Mr. President, as chairman of the Committee on Foreign Relations, I desire to announce that the Senate received today the nomination of James M. Langley, of New Hampshire, to be Ambassador of the United States to Pakistan, vice Horace A. Hildreth, resigned.

Notice is given that this nomination will be eligible for consideration by the Committee on Foreign Relations at the expiration of 6 days, in accordance with the committee rule.

THE PROGRAM AND POLICIES OF PRESIDENT EISENHOWER—ADDRESS BY SHERMAN ADAMS

Mr. SMITH of New Jersey. Mr. President, on Friday evening, May 24, in Trenton, N. J., before the sixth regional conference, sponsored by the Republican National Committee, the Honorable Sherman Adams, the Assistant to the President, delivered a memorable address defending the program and policies of President Eisenhower at this critical time.

I ask unanimous consent that the address be published in full in the body of the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY SHERMAN ADAMS, THE ASSISTANT TO THE PRESIDENT, DELIVERED AT TRENTON, N. J., ON FRIDAY EVENING, MAY 24, 1957, BEFORE THE SIXTH REGIONAL CONFERENCE SPONSORED BY THE REPUBLICAN NATIONAL COMMITTEE

Tonight I feel as Abe Lincoln evidently did on one occasion in 1860.

You will recall that after his nomination he stayed in Springfield until the election. There he interviewed an endless procession of job hunters and their friends. This frustrating job he patiently handled with that amazing humanism, tact, and insight that distinguished him from ordinary men. Then one day he contracted a mild case of smallpox. When he discovered what his ailment was, he said to his secretary, "Tell all the office seekers to come at once, for now I have something I can give all of them."

Tonight I also have the urge to give something to everybody. I hope, however, I shall have something less uncomfortable than he had to give. I earnestly hope, too, it will prove to be of greater value to all of you.

This gathering is the sixth in a nationwide series of such meetings. To me it is best characterized as a soul-searching—a coming together to evaluate how far we have progressed these past 4 years—to measure where we now are—to appraise where we, as Americans and as Republicans, must strive to go between now and 1958 and 1960.

As it is written in the Holy Book, "To every thing there is a season, and a time to every purpose under the heaven." This is our season—this is our time—to set about our common purpose in the face of the obstacles we know are ahead.

I am not used to mincing words. Nor am I accustomed, as the saying goes, to "shovel smoke." It is written that there is "a time to keep silence, and a time to speak." Tonight I am here to speak.

For I am certain of this: we are at the time, and we are in the season, when straight talking is indispensable to Republican purpose and progress. In no other way can we chart for ourselves the right course. It is to do exactly this that we are gathered here.

Our self-appraisal will not be helped by turning our eyes from some of the things that have been perplexing our party. An example is our peculiar obsession right now with "epithetical Republicanism."

In early political history Americans have known the Barnburners, the Know-Nothings, the Free Soilers, the Mugwumps, the Abolitionists, and the Locofocos. Today how freely we Republicans bandy about colorful terms.

The Democrat opposition, as all of us know, suffers from a chronic and incurable political schizophrenia. Schizophrenia, you remember, is split personality. Indeed, their party is irreparably split—and down its very middle, both geographically and philosophically—and the split is so deep that the party simply cannot put itself together again. In that party, as the North proposes, the South disposes, and never the twain shall meet.

Unfortunately, we Republicans are doing a little splitting ourselves. While this may be fun, it is a pastime we can ill afford.

Today, we have the stalwarts, the irreconciled, and the irreconcilables. We have the liberals, the liberal-conservatives, the conservative-progressives, the plain and simple conservatives, and the reactionaries. We have the moderns and the un- or antimoderns, the old-fashioned and the traditionalists—each resoundingly the oracle of the true meaning of republicanism. By itself that should give us concern enough.

But another concern is the 1958 Federal budget, its size and composition, what it means to us.

Another is our defense and mutual-security programs and the cost and meaning to our country and our party.

Here's yet another—social progress—its scope and direction, and what difference it makes to us as a people and as a party.

Another is our party's official posture before the American people, proclaimed proudly before all America in our party's platform adopted a short 9 months ago in San Francisco. We are concerned as well with the import of these solemn pledges to our President and to all of us who consider ourselves loyal, dependable workers in the Republican cause.

Two other concerns come to mind. One is the year 1958, as critical a year as our party has faced in its 100 years. The other is 1960, the importance of which I hardly need emphasize here.

So we need to look again to the bricks and mortar of our party structure. The outlines of this great edifice we can see easily enough. But we must test the materials that compose its foundations and walls, lest intentionally or otherwise, by our own huffing and puffing, we blow our own house down.

Now, our party is no nicely trimmed organization including only those who think and speak precisely alike. It enforces conformity upon no one. Our party is big enough in spirit and purpose to include every single citizen who believes in its basic principles.

Every Republican is entitled to interpret for himself the nature of our commitments and objectives. Even so, if our party means anything at all, it means that every loyal member of this Republican Party is committed to certain common goals and shares certain basic views.

The hyphenation of republicanism that I mentioned earlier is a case in point. We must stop claiming allegiance to a fraction of a faction. Suppose we be just this—loyal Republicans—the kind of Republicans who are willing to join with other Republicans to get our Congress back in 1958 and keep the Presidency in 1960.

As his first term came toward a close, three considerations weighed heavily in the President's mind as he considered the possibility of another term:

1. That the foreign policies he had pursued had kept our country at peace in this dangerous world.

2. That his domestic policies had brought prosperity to our people.

3. That he felt he had the physical energy to go through 4 more grueling years of the Presidency.

As for the last, time and the fates will prove, but this I can report to you: The President is in great shape, and unless I miss my guess, both time and fate are on his side.

As for the second—his domestic policies—may I give you the opinion of one of the opposition leadership. During last month's recess of the Congress he told me this: "My people are happy and prosperous," he said. "They have relatively few complaints. They look ahead with confidence. Just keep that President of yours in good health for us."

As for the first—his foreign policies—we have an absence of fighting. To be sure, an uneasy peace. But we have stopped the loss of frontiers of the Free World. The Communist destroyers of freedom are understanding more clearly where we stand. Ours has been a cleaner and plainer policy. Our relentless waging of peace is turning the tide. The neutrals and the soft populations are edging our way. Our mutual-security programs, our atoms-for-peace program, our disarmament efforts, our information services, our every diplomatic move, all are showing results in an easing of tensions and a recoiling from war. True, keeping the peace is expensive.

And let that introduce some observations about the spending of money.

First, let's remind ourselves of certain precepts that we Republicans hold in common—economical and efficient Government, for instance—a Government that taxes no more than imperatively necessary to maintain essential functions—that spends no more than the minimum needed for such services—that considers the public debt not praiseworthy proof of our national wealth but an obligation to be paid off. We demand Government that respects and is determined to protect the integrity of the citizen's dollar, that recognizes the indispensability of private initiative to our way of life, that believes in the rewarding of ability and hard work—a Government devoted to equality of freedom but that rejects paternalism, regimentation, and the penalizing of success.

To me these are traditional Republican principles. They are as sound and strong today as ever. They are more than enough to make trivial our superficial differences which merely prove the continuing vigor of this Grand Old Party—a party as lustily determined today as at its birth a century ago to meet responsibly the Nation's needs.

It's time we looked hard at our growing propensity to find motes in our colleagues' eyes, to harp about our primly adjusted party halos, to pass judgments, and to bandy about epithets, as though we ourselves were our own worst enemies—political or otherwise. It is time that we, as a party, mind an old adage: "What Peter says about Paul tells more about Peter than it tells about Paul."

To prove my point, let's take our Republican precept: good government is economical government. That, I am sure, has no opponent here. Now let's apply it.

What does economy in government mean to you, to your neighbor, to our party throughout the Nation? Does it mean endangering our country's safety to save dol-

lars, regardless of Communist missiles and aircraft and submarines and atomic bombs? Surely, it must not. Yet we do want economy, and we want our taxes cut. So we ask ourselves, can we cut the Federal budget for defense, where 2 out of 3 of our tax dollars go?

On this there has been much difference of opinion. Mainly it is inspired by our political opposition, which a year ago was charging all over America alleging that our defenses, along with all other Federal programs, had too little, not too much, money. That fact is an interesting commentary on how much they meant what they said last year, and how much they mean the exact opposite that they say now. You remember the jet airplane that flew into its own bullets last year. If we'll just be patient, the opposition will show us exactly how that is done in politics.

But here's the point: is the defense budget now recommended by the President too big, as the opposition says now—to little, as the opposition said last year—or about the right amount, as our President says?

Should we, for example, buy fewer jet bombers at $8 million each because they cost 2½ times more than they did, and fewer aircraft carriers because they cost 3 times as much? Should we have fewer submarines and tanks because their cost has doubled? Fewer missiles and rockets and atomic bombs because they take billions we could otherwise use for tax cuts?

The answers are obvious. Not one of us would whittle our Army, Navy, Air Force, and Marines below safe levels simply to save money.

That raises these key questions: Committed as we are to economy, do you believe that it is either economy or commonsense to cut defense spending below the point of national safety? Would you support unsafe reductions to make possible tax cuts, budget balancing, debt reduction, if thereby the security of your home and country and world peace were endangered? Of course you would not. Then, what should we do about this major part of this whole budget question?

As for my own viewpoint, I'll say simply this:

I know not who your confidential defense expert is. Maybe he is a Member of Congress or a news reporter—maybe yourself, or, even, your Federal tax return. But certainly I have mine.

He is the best our Nation has ever had in the highest office in the land.

Confidently, gladly, I put my trust for our defense in Dwight D. Eisenhower.

And of this I am deeply convinced, for our Republican Party—for every American—the only sound course is to give our loyal backing to our great soldier-President, on what he deems essential to keep the world at peace and to protect our country.

If that be our proper course in defense, then our search for economy must lead us elsewhere.

Now take the figure 41. That, in billions, is defense cost. Add the figure 17. That, in billions, is for interest payments on the huge national debt we inherited from our Johnny-come-lately economy-minded opponents. That $17 billion also pays expenses which the Government under law has no option but to pay. To cut here is unlawful.

So we have the figure 58—41 for defense, 17 for bills we have to pay. Now there is another figure, 13. In billions, that's what is left in the budget. In part of this area economy seekers can publicly display their zeal by cutting what they voted for last year and by closing up some of the programs that they so eagerly commenced. Judging from some talk I've heard lately, this $13 billion area ought to be our party's happy hunting ground.

Now, let's look at what is in this figure 13.

Aside from defense and expenses fixed by law, the figure 9 pays for every service and program which your Government carries on. What are they? Let me give you just a few examples: flood control, disaster relief, river, shore and harbor improvements, upkeep of our merchant fleet, assistance in cleaning up slums, most of our farm programs, carrying the mails, construction of post offices and public buildings, maintaining national parks for your recreation, health services for our people, the school-lunch program, and so on. Spending for these programs can be stopped if you want them and other such programs stopped, but crippling them will build a poor platform to elect a Congress and a Republican President. It is on such questions that some of us in the Republican Party disagree. The test of this budget cutting must be right here, for certainly we agree that our defense must remain strong and that the legal obligations of our Government must be paid.

What is the ingredient in these programs that generates so much argument? Two words define it: social progress.

Here I want to give you some quotations to help put us on the course again.

The first one is this:

"The legitimate object of government is to do for a community of people whatever they need to have done, but cannot do at all, or cannot do so well, for themselves in their separate and individual capacities. But in all that people can individually do as well for themselves, the government ought not to interfere."

That wise counsel comes to us from our first Republican President, Abraham Lincoln.

The second quotation is this:

"Our religious faiths have taught us our obligation to those who fall behind in the race for a decent living. * * * I believe that the Federal Government should aid education in those States below the average national income, should aid States to give free medical care to all those unable to pay for it, should assist local governments in eliminating slums and providing minimum decent housing, and should, in a crisis, undertake to assist States to provide food."

That statement is bequeathed to us by a statesman who became one of our President's closest, most respected friends, Senator Robert A. Taft.

And third, from the President himself, this quotation:

"In all those things that deal with people, be liberal, be human. In all those things which deal with people's money, or their form of government, be conservative."

And fourth, from our Republican platform adopted less than a year ago, these quotations:

Promise No. 1 in our Republican platform:

"We shall continue our far-reaching and sound advances in matters of basic human needs, expansion of social security, broadened coverage in unemployment insurance, improved housing, and better health protection for all our people."

Promise No. 2 in our Republican platform:

"(We) will continue to fight for dynamic and progressive programs which, * * * will stimulate improved job safety for our workers * * * (assist) millions of workers with special employment problems, such as older workers, handicapped workers, members of minority groups, and migratory workers; strengthen the Federal-State Employment Service and improve the effectiveness of the unemployment insurance system; protect the assets of employee welfare and benefit plans; assure equal pay for equal work regardless of sex; strengthen the 8-hour laws for the benefit of workers who are subject to Federal wage standards; extend the protection of the Federal minimum-wage laws to as many more workers as is possible and practicable; fight for the elimination of discrimination in employment because of race, creed, color, national origin, ancestry, or sex; improve the economic conditions of areas faced with persistent and substantial unemployment; revise and improve the Taft-Hartley Act; (protect) the right of workers to organize into unions and to bargain collectively."

Promise No. 3 in our Republican platform (relating to aid for school construction):

"The Republican Party will renew its efforts to enact a program of Federal assistance in building based on sound principles of need and designed to encourage increased State and local efforts to build more classrooms."

These statements—from Republican leaders, from our present Republican platform adopted only 9 months ago—I cite with this one purpose in view:

Simply this: To clear our minds of any lingering doubts that any of us may have that this party of ours is a novice in the field of social progress, and that our party today is no less committed to sound social progress than it was when it was born 100 years ago.

The fact is, today we Republicans are committed before all America, and properly so:

First, to work to achieve equality before the law, regardless of race, creed, or color;

Second, to make sure that our Government remains warmly responsive to the urgent social and economic problems of the American people.

To these ends, we are committed by our Republican platform. To these ends, the campaign in 1956 committed us. To these same ends, the President stands personally pledged, and he has explicitly stated that he, for one, does not take pledges and promises lightly.

I am convinced that the great majority of the people of our party are as resolutely determined to work for all other promises to which our party stands committed as they are determined to work for a smaller budget and the protection of the citizens' dollar.

But this economy business is playing some strange tricks. We see some among us, cheered on by the political opposition, attempting to cripple or to strike out forever some of these programs that we—all of us—pledged to the American people a few months ago.

I say simply this: The pledges we have made cannot be ignored, cannot be weakened, cannot be violated without permanent injury to our entire party. Hypocrisy, personal or political, is not part of the Republican character.

Here, let me make one point absolutely clear.

I am proud—and I believe every Republican in America should be—that our President is determined to carry into full effect every platform commitment of our party, and every campaign commitment he made last fall.

Our job, in my opinion, is to give this dedicated President of ours every possible help in carrying those promises into effect. Can there be better politics for the Republican Party? Repudiation of our party promises and programs will end in nothing but political suicide.

Now, a word on one more concern I mentioned—mutual security it is rightly called, foreign aid, or giveaway, as some call it.

No purpose can be served by elaborating on this program on the heels of the President's message to Congress and his personal message to the Nation.

Once again, if we will but refer to our party's pledge to the American people, we will see what we must do or rightly forfeit public confidence and support.

Our platform pledge doesn't beat around the bush.

"We shall continue," it says, "to support the collective-security system begun in 1947 and steadily developed on a bipartisan basis."

UNIVERSITY OF MICHIGAN LIBRARIES

Our platform goes on to say this: "Technical and economic assistance programs are effective countermeasures to Soviet economic offenses and propaganda. They provide the best way to create the political and social stability essential to lasting peace."

Even in the absence of these pledges, mutual security programs demand support for the reasons set forth by the President. But with these pledges, if republicanism now should turn its back on mutual security programs, it will be not only at the expense of our Nation's security, but also at the expense of running out on the party's word.

That brings me to mention 1958 and 1960.

This much is clear: no less than a unified and all-out effort can hope to bring victory to the Republican Party in either of these years. Our political opposition is already hard at work, both by commission and by omission. Its omission is inaction—for example, in the field of civil rights, immigration, school legislation, all key elements in our legislative program. Their party is in a real dilemma. If they pass civil rights, they're ruined down South. If they don't, they're ruined up North. The same on schools. The same on immigration. To quote a popular Tennessean, their split personality has them "all shook up." Are we going to let that Jekyll and Hyde combination get away with it? I say no.

Weapons for victory we Republicans have, in great abundance—a great President; a program of national urgency and demonstrated merit; a Nation prosperous and at peace; a defense and a program to wage peace that every Republican can proudly support.

Peace we have gained in contrast to 4 years ago; balanced budgets we have restored; tax cuts we have had, the largest in all history; Government payrolls we have cut; social advances we have forged all across the domestic scene. America today is stronger, happier, better prepared economically and militarily, sounder philosophically and politically, than in many years. In such a climate, on the very heels of such accomplishment, political success is certain if we will just not rest on our oars.

If all this were not enough, we have a political opposition in a constant state of self-contradiction, "shook up" on issues it can never itself resolve.

Here, then, is the really great lesson from this meeting—to return to our homes and places of business reconsecrated to work wholeheartedly together to win back control of Congress in 1958 and to hold the presidency for republicanism in 1960.

And second, I feel impelled to leave this thought with you:

To me it is inconceivable that loyal republicanism can be twisted to mean persistent and carping opposition to our party's leader and our party platform. If that should be our course—inconceivable though it is—then, earnestly I say this to you: our party will be foredoomed at the polls.

Therefore, let each of us give personal attention to the official pledges of this party of ours. Let us review the pledges of our President last fall. Then let us redouble our efforts and join with him and our party leadership to ensure that this Republican Party of ours stands honestly, clearly, proudly, before America as one that keeps its word.

Let our party work in unity, as it has promised, incessantly for peace, for sustained progress along paths already laid, for the betterment of every citizen, regardless of station, race, color, or creed.

Thank you and good night.

AN ENDING TO THE COLD WAR?

Mr. FLANDERS. Mr. President, in last Friday's newspapers there came out of Russia the most hopeful news that has been released from that country since the establishment of the Communist government. Mr. Khrushchev seems, in effect, to have announced the end of the cold war.

The Soviet news agency, Tass, reported a speech by Mr. Khrushchev, which he delivered on Wednesday, in Leningrad, to a conference of agricultural workers from northwestern regions of the Russian federation. The party chief declared that Russia is opposed to the principle of creating mutual fright and stalemate. He said:

> We are not going to blow up the capitalist world with bombs. If we overtake the United States in the per capita production of meat, butter, and milk, we shall have hit the pillars of capitalism with the most powerful torpedo yet seen.

He furthermore is reported to have said:

> But the Soviet Union—the people of the once backward Russia who have taken power into their own hands and built a socialist pattern of economy—have created and advanced large-scale industries, carried through collectivation of farming, set up state farms, and gained an opportunity to catch up and surpass the United States in per capita production.
>
> We are bound to win this competition. This victory will have a greater effect than that of the H-bomb. The efforts we make to advance our economy and to improve the welfare of the people will have a greater effect than anything else on the minds of hesitating people. And such people will be more and more inclined to side with us, to side with the Marxist-Leninist theory and with the working class in the struggle against capital.

Mr. President, this is good news, if Khrushchev means it. We welcome a contest in raising the standards of living of the people of a whole country. We welcome a test as to whether the capitalist system or the Communist system is the best means for providing the peoples of the earth with food, clothing, shelter, education, and the opportunity for peaceful living and spiritual development. With utmost confidence we will continue and improve our own unmatched record of serving the needs of people through the operation of the capitalist system.

In such a contest everyone wins; no one loses. In such a contest the Russian people will have the hearty good wishes of the American people. Should they win and achieve a higher, broader state of well-being, that will be no cause of antagonism, will give rise to no hostile purposes or actions on our part, in spite of the hostile imputations of Mr. Khrushchev. Butter on his side will not breed guns on ours. Any improvement for the Russian people will be a cause of hearty congratulation.

It is not impossible for the people of Russia to begin an improvement in their own well-being which will astonish them and astonish the world. But there is an unavoidable prerequisite. They must throw off the burden of armament. Otherwise, they are tied down to a standard of living well below the possibilities which their labor and natural resources hold out for them.

For years we have been offering to the people of Russia, through negotiations with their Government, the terms of honest disarmament. This honest disarmament must include mutual inspection and mutual control. When is the Soviet Government going to take advantage of this offer and permit the Russian people to enjoy the blessings which Mr. Khrushchev has so alluringly described to them?

PRINTING OF ADDITIONAL COPIES OF REPORT TO ACCOMPANY H. R. 7125

The VICE PRESIDENT. The Chair lays before the Senate a concurrent resolution coming from the House of Representatives, which will be read.

The legislative clerk read the concurrent resolution (H. Con. Res. 179), as follows:

Resolved by the House of Representatives (the Senate concurring), That there be printed 12,400 additional copies of the report to accompany H. R. 7125, a bill to make technical changes in the Federal excise-tax laws; of which 7,500 copies shall be for the use of the Committee on Ways and Means; 4,200 copies for the House document room; 500 copies for the Senate document room; and 200 copies for the use of the Committee on Finance.

Mr. HAYDEN. Mr. President, House Concurrent Resolution 179 provides, at the request of the House Committee on Ways and Means, for the publication of additional copies of a report.

I ask unanimous consent that the Senate proceed to the immediate consideration of the House concurrent resolution.

There being no objection, the concurrent resolution (H. Con. Res. 179) was considered and agreed to.

THE MEDICAL ITEMS IN THE NATION'S BUDGET

Mr. WILEY. Mr. President, some time ago I was pleased to receive from Dr. Thomas H. Alphin, director of the Washington office of the American Medical Association, a special report which listed all the health items in the Nation's budget for the 1958 fiscal year.

The AMA summary of these various appropriations represents, to my knowledge, the only currently available complete picture of what Uncle Sam is doing, so to speak, in all the diversified fields of health activities. These activities range from the health work performed on behalf of the Nation's veterans by the Veterans' Administration, to the health program of the Atomic Energy Commission, the National Institutes of Health, and in many other fields.

I believe that this handy summary may well be consulted by my colleagues and by the public generally. I send to the desk, therefore, the text of this summary and ask unanimous consent that it be printed at this point in the body of the CONGRESSIONAL RECORD.

We as a nation rightly take pride in our high health standards. It is our intent to continue to go forward so that man may achieve and enjoy the abundant life, the life of full, unbounded health which was intended for all of us.

The greatest discoveries still lie before us for achieving the truly abundant life.

The VICE PRESIDENT. Is there objection to the unanimous-consent request of the Senator from Wisconsin?

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

Medical-health budgets of Federal departments, agencies, and commissions for this fiscal year

Agency	Fiscal 1957	Fiscal 1956
Veterans' Administration	$825,024,300	$790,185,800
Department of Defense	790,105,000	818,104,500
Department of Health, Education, and Welfare	772,661,800	526,935,400
Federal Civil Defense Administration	49,810,000	30,450,000
Atomic Energy Commission	31,525,000	27,700,000
International Cooperation Administration	29,310,000	25,441,000
Department of State	15,496,000	13,669,790
Federal employees health program	10,000,000	6,000,000
National Science Foundation	8,000,000	5,000,000
Department of Labor	7,151,126	7,336,000
Department of Interior	6,138,205	5,770,000
Panama Canal Zone	6,055,300	5,702,900
Department of Treasury	3,511,700	2,990,000
Department of Justice	1,580,000	1,470,000
Federal Trade Commission	1,000,000	1,000,000
Department of Commerce	547,914	277,586
Civil Service Commission	386,000	382,600
National Advisory Committee to Selective Service	180,000	180,000
President's Committee for Handicapped	134,678	130,000
Health Resources Advisory Committee	90,000	101,000
Office of Attending Physician of Congress	12,145	
Total	2,558,719,168	2,268,826,576

VETERANS' ADMINISTRATION

(This year: $825,024,300; last year, $790,185,800.)

In-patient care in VA hosiptals: $619,614,000.

(Last year: $615,869,000.)

VA's largest single medical appropriation covers in-patient care in 173 VA hospitals and provides for an average of 121,865 beds a day. At present, VA reports daily patient load at 111,540, just over 91 percent of capacity. The appropriation includes salaries of physicians and other personnel, medical rehabilitation of veterans, dietetic and nursing services, social services and special services, such as recreation and transportation of veterans.

Out-patient care: $82,638,000.

(Last year: $85,471,200.)

The bulk of this appropriation is for outpatient care in about 100 VA clinics. The remainder is earmarked for fees to physicians ($7,738,000), and dentists ($8,415,000), under the home-town care program.

Modernization and replacement construction: $51,635,000.

(Last year: $30 million.)

This amount is for work on existing units costing over $250,000 a project, and equipment for new units. The money is available until expended. (See Major Alterations and Improvements item on next page for smaller projects.)

Domiciliary care: $29,319,000.

(Last year: $23,062,500.)

Domiciliary care is being provided in 17 VA facilities for about 17,000 veterans who, while incapacitated for employment, are not in need of full hospital care. VA also makes payments to 30 State homes in approximately 30 States with a daily patient load of around 9,000. Payments this fiscal year are estimated at $5,888,000 (under a new law, Public Law 613, 83d Congress, Federal contributions to these homes were raised from a maximum of $500 to $700 a year per patient).

Contract hospitalization: $13,967,000.

(Last year: $15,237,300.)

This appropriation finances an average daily patient load of 3,260 veterans in Federal hospitals other than VA and in State and municipal hospitals. Patients in Federal non-VA hospitals are estimated at 1,345 and in non-Federal hospitals, 1,915. Psychotic cases make up the largest single category of contract cases.

Medical administration: $7,300,000.

(Last year: $7,422,000.)

To operate the VA Department of Medicine and Surgery in the Washington central office and the seven area medical offices; included are salaries, travel and like expenses.

Medical research: $10,990,300.

(Last year: $6,381,600.)

For research, mostly in VA hospitals. The breakdown: General medical and surgical research, $5,870,000; atomic medical research, $2,000,000; prosthetics testing, $990,300; neuropsychiatric, $1,250,000; tuberculosis, $780,000; other, $100,000.

Major alterations, improvements, and repairs: $4,533,000.

(Last year: $3,900,000.)

For alterations, improvements, and repairs to VA clinics and domiciliaries (costing less than $250,000 per project).

Supply depot operations: $1,628,000.

(Last year: $1,642,200.)

For maintaining and operating supply depots handling the purchase, shipping, and storage of medical supplies and equipment used by the Department of Medicine and Surgery.

Medical education and training: $1,400,000.

(Last year: $1,200,000.)

For VA training programs for physicians and other VA personnel, in medical specialties and auxiliary services.

Medical care—Philippine veterans: $2 million.

(Last year: Not reported.)

Until 1960 the United States Government will contribute for the care of Philippine veterans.

DEPARTMENT OF DEFENSE

(This year: $790,105,000; last year: $818,104,500.)

Army medical services:[1] Approximately $290 million.

(Last year: $300 million.)

The estimated cost includes expenses normally associated with the operation of military hospitals and dispensaries, military and civilian salaries, medical supplies and equipment, utilities, communications, transportation, travel subsistence, maintenance and repair of buildings and grounds, expenses for construction, medical education and training, medical research and preventive medicine.

Air Force medical services:[1] Approximately $223 million.

(Last year: $286 million.)

The estimated cost includes expenses normally associated with the operation of military hospitals and dispensaries, military and civilian salaries, medical supplies and equipment, utilities, communications, transportation, travel subsistence, maintenance and repair of buildings and grounds, expenses for construction, medical education and training, medical research and preventive medicine.

Naval medical services:[1] Approximately $277 million.

(Last year: $232 million.)

The estimated cost includes expenses normally associated with the operation of military hospitals and dispensaries, military and civilian salaries, medical supplies and equipment, utilities, communications, transportation, travel subsistence, maintenance and repair of buildings and grounds, expenses for construction, medical education and training, medical research and preventive medicine.

Office, Assistant Secretary of Defense (Health and Medical): Approximately $105,000.

(Last year: $104,500.)

For salaries, travel and administration of this office, and for travel expenses and consultant fees for the Defense Department Civilian Health and Medical Advisory Council.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

(This year: $772,661,800; last year: $526,935,400.)

Division of Hospital Facilities: $126,381,000.

(Last year: $112,250,000.)

This division administers the Federal aspects of both the original and expanded Hill-Burton programs. The total appropriation is divided into the following four categories:

Hill-Burton original program: $102,800,000.

(Last year: $88,800,000.)

This appropriation, allotted to the States on the basis of population and per capita income, assists in the financing of new hospitals and related health facilities construction under the original Hill-Burton program. To date, Federal funds have partially financed approximately 2,869 projects, including nearly 132,096 hospital beds, and 636 public-health centers, 18 State health laboratories, and approximately 100 nurses' homes and training facilities. To date, Federal contribution represents $762 million and is matched by sponsors' funds amounting to $2,370,000,000.

Medical facilities—category program: $21 million.

(Last year: $21 million.)

The total allotted to the States this year on a population-per-capita income formula will assist in the financing of new construction under the 1954 amendments in four categories, as follows: $6,500,000 for hospitals for the chronically ill and impaired; $6,500,000 for diagnostic centers, or diagnostic and treatment centers; $4 million for nursing homes; and $4 million for rehabilitation facilities. As under the original program, the Federal share may range from one-third to two-thirds of the total project cost. As of July 1956, there was approved a total of 204 projects divided among the 4 categories, as follows: Facilities for chronically ill, 42; diagnostic-treatment centers, 77; nursing homes, 42; and rehabilitation facilities, 43.

Hill-Burton administrative expenses: $1,381,000.

(Last year: $1,250,000.)

This appropriation is used for salaries and expenses for the hospital survey and construction program for Washington, D. C., and eight regional offices at the Federal level.

Research: $1,200,000.

(Last year: $1,200,000.)

Authorized in 1949 but not appropriated until 1955 was this item for research, experiments and demonstrations on utilization of

[1] All figures are estimates because appropriations are not broken down into categories of medical expenditures. Anticipated reduction in the Department of Defense medical program during fiscal year 1957 is primarily attributable to more effective joint utilization of the facilities, fewer personnel assigned to operation, and a lower level of hospital and dispensary construction. Reductions, however, have been partially offset by an estimated expenditure of $41 million during fiscal year 1957 for the dependent medical care program.

UNIVERSITY OF MICHIGAN LIBRARIES

hospital services, facilities and resources. The bulk of the money is earmarked as grants to States, universities, hospitals, hospital associations, professional associations, and community organization and a small amount for direct research by Public Health Service.

National Institutes of Health: $216,508,000.
(Last year: $97,823,000.)

National Cancer Institute: $48,432,000.
(Last year: $24,828,000.)

About two-thirds of this appropriation is earmarked for grants to non-Federal individual investigators and private institutions for research and training and States receive $2,250,000 for cancer control work. The balance is used for direct operations, salaries, supplies, and for this Institute's share in the cost of operating the Bethesda (Md.) Clinical Center and related auxiliary services.

National Heart Institute: $33,396,000.
(Last year: $18,778,000.)

Grants to non-Federal individual investigators and public and private institutions for research and training take about two-thirds of the appropriation and $2,125,000 is allocated to States for heart disease control. The remainder is for direct operations, such as salaries and supplies, and to support the Clinical Center.

Mental Health Institute: $35,197,000.
(Last year: $18,001,000.)

Approximately 60 percent of this appropriation is apportioned for research and training through grants to individual investigators and public and private institutions. The sum of $4 million is allocated to the States for community mental health services. The remainder will support direct operations, such as salaries, expenses, and to help finance the Clinical Center and for related auxiliary research services.

Arthritis and Metabolic Diseases Institute: $15,885,000.
(Last year: $10,740,000.)

Grants to public and private investigators for research and training total $10,290,000. The remainder will go for direct operations, such as salaries and supplies and Clinical Center support.

Neurological Diseases and Blindness Institute: $18,650,000.
(Last year: $9,861,000.)

Grants to public and private investigators and institutions for research and training total $14,280,000. The remainder is for direct operations, such as salaries and supplies and to support the Clinical Center.

Allergy and Infectious Diseases Institute: $13,299,000.
(Last year: $7,580,000.)

Research grants to public and private investigators for research and training amount to $8,182,000. The remainder finances direct research and other related services of the Institute.

Dental Health Institute: $6,026,000.
(Last year: $2,136,000.)

This appropriation is divided as follows: (a) for research and fellowships, $3,700,000; (b) direct research at Bethesda, $1,035,000; (c) review and approval of research grants and fellowships, $79,000; (d) administration, $100,000; (e) technical assistance to States, $824,500; and (f) coordination and development of dental resources, $287,500.

National Institutes of Health—General funds: $12,122,000.
(Last year: $5,899,000.)

These funds are administered by the Division of Research Grants of the National Institutes of Health, with practically all funds being expended for research and training grants, with the exception of $1.7 million for control of biologics (including polio vaccine), which activity is under the Division of Biologic Standards. The balance goes toward supporting fellowships and administrative expenses relating to grants.

NIH planning and construction (new category): $33,501,000.

There is available for NIH for planning or construction of facilities $33,501,000 broken down as follows: $1,630,000, expansion of surgical NIH units; $200,000, planning for future construction for dental NIH research; $1,371,000, for animal quarters, NIH; $300,000, planning for office building, NIH; $30,000,000 grants for medical research facilities under Public Law 835.

Indian health activities: $48,075,300.
(Last year: $38,840,000.)

Under Public Law 568 (83d Cong.) PHS assumed responsibility for health of American Indians and natives of Alaska which formerly was a function of Interior Department. The total is broken down as follows: Hospital care in Indian hospitals, $23,001,400; contract patient care, $8,313,000; field health services, $5,940,600; program direction and management services, $2,058,300; and construction of hospitals, clinics, and quarters, $8,762,000. The total appropriated for Indian health activities is $48,075,300, to which is added reimbursable items from other Government agencies totaling $538,300.

Hospitals and medical care: $40,969,700.
(Last year: $34,326,000.)

These funds are used for operational cost and maintenance of PHS hospitals and health services in caring for American seamen, Coast Guard, and Public Health Service personnel and their dependents, Federal employees injured at work, leprosy patients, and narcotic addicts; includes studies in the development and coordination of nursing resources. It also includes $1 million for grants to Hawaii for care of patients suffering from leprosy and $2 million for nurse-training grants. Not shown is approximately $300,000 additional income from reimbursable items from other Federal agencies.

Poliomyelitis-vaccine program: $23,600,000.
(Last year: $30 million.)

Public Law 411 extended last year's $30 million polio-vaccine program. Additional appropriated funds amounting to $23,600,000 are available in addition to unexpended appropriations of last year to States for vaccination of children under 20 and pregnant women against poliomyelitis. The Federal vaccination program is scheduled to expire on June 30, 1957.

Assistance to States—general: $17,591,000.
(Last year: $18,160,000.)

Grants totaling $12 million will be available for apportionment to the States in support of State and local general public-health activities. These grants must be matched 1 State dollar for every 2 Federal dollars. Last year $4,500,000 was available for activities in administering the polio-vaccination programs in the States. An additional $4,591,000 supports direct activities of the United States Public Health Service in providing technical assistance, consulting services to States, expenses of the National Office of Vital Statistics, international health activities, demonstrations, training activities, and operational expenses. An additional $1 million will be available for grants to schools or direct traineeship awards to individuals for the training of professional public-health personnel. In this program matching will be required.

Tuberculosis control: $6,660,000.
(Last year: $6 million.)

Grants to States for diagnostic and treatment clinics, mass casefinding, and followup services account for $4,500,000, all of which has to be matched equally by the States. The remainder is for direct operations of PHS.

Communicable Disease Control: $5,750,000.
(Last year: $5,250,00.)

The entire appropriation is used for direct activity of the PHS Communicable Disease Center at Atlanta, Ga., and its affiliated operations, including investigations in poliomyelitis. The Center carries on studies in epidemiology, furnishes laboratory diagnostic services and sponsors special projects to assist States.

Sanitary engineering activities: $9 million.
(Last year: $4,690,000).

This program is made up of seven activities as follows: air pollution, $2,740,000; water supply and water pollution control, $4,224,100; radiological health activities, $347,800; milk and food sanitation activities, $446,000; interstate carrier and general sanitation activities, $493,000; Sanitary Engineering Center research activities, $403,100; accident prevention, $51,000; and administration, $295,000.

Venereal disease control: $4,195,000.
(Last Year: $3,500,000.)

Of the total, $1,700,000 goes for direct grants to States for venereal disease detection treatment and control on a special-need basis. The remainder is spent for technical assistance to the States, mostly to pay Federal employees assigned to State health departments.

Foreign quarantine service: $3,315,000.
(Last year: $3 million.)

This service operates approximately 250 medical quarantine stations on borders of the United States. It also operates approximately 25 medical examination stations on foreign soil for the examination of aliens seeking visas to enter the United States. Inspections are made of all seagoing vessels and aircraft entering the United States.

Office of the Surgeon General: $3,892,000.
(This year: $2,762,000.)

For administrative expenses of this office, including all housekeeping services, evaluation of public health needs, and personnel training. Included also is $700,000 for administration of the National Health Survey Act authorized by Public Law 652.

Water pollution control (new category): $50 million.

Under a new law passed by Congress in 1956 (Public Law 660), the Federal Government will make grants for waste treatment plants.

National Library of Medicine (new category): $1,376,000.

As a result of Public Law 941 enacted by Congress in 1956, the Army Medical Library has been renamed the National Library of Medicine and transferred to the Department of Health, Education, and Welfare. While it is contemplated that a new structure will be erected to house the library, only operational funds and planning money have been made available by Congress for this fiscal year. Operational funds for the 9 months which remained in the fiscal year following the transfer of the library to HEW total $1,026,000. An appropriation of $350,000 was made for planning the construction of a new library building.

Alaska—Disease and sanitation investigations and control: $1,185,000.
(Last year: $1,125,000.)

This appropriation will be divided as follows: $638,000 for grants to the Territory for public health services and the remainder for research activities of the Arctic Health Research Center at Anchorage.

Alaska mental health program (new category): $25,000.

Authorized by Public Law 830, which for the construction of a mental health hospital in Alaska and Federal funds for operation of a mental health program. The first appropriation is for initial planning.

Reimbursable health program for other governmental agencies: $321,800.
(Last year: $321,800.)

This represents the cost of services expected to be advanced by Public Health Service to other governmental agencies for establishing and operating on-the-job clinics. As a total, however, it is misleading, as a substantial number of Government agencies carry on their own health programs independent of Public Health Service. Public Health Services deals largely with Washington person-

nel, whereas 90 percent of the Government's employees are located outside of Washington.

Social Security Administration: $161,183,000.

(Last year: $125,796,000.)

Bureau of Public Assistance (medical payments): Approximately $100 million.

(Last year: $90 million.)

An estimated $265 million of Federal, State, and local funds is expected to be paid for medical and health needs of public assistance recipients this fiscal year. The United States share of this total is an estimated $100 million. This bureau operates under the Social Security Administration.

Disability freeze program: Approximately $9 million.

(New category.)

Among the administrative expenses of the old-age and survivors insurance program, is an item incurred by excusing disabled persons from paying OASI contributions without penalty in their retirement payments. This phase of the program is referred to as the "disability freeze" amendment to the Social Security Act. This year approximately $9 million will be expended for employees' salaries, working materials, etc.

Permanent and total disability payments: Approximately $11 million.

(New category.)

Under the 1956 amendments to the Social Security Act, persons over age 50 who become permanently and totally disabled may receive payments equal to retirement benefits as though they had reached age 65. This new program will take effect on July 1, 1957. This fiscal year, however, expenses will be incurred for "tooling up." These expenses will include recruiting of additional staff for field offices, training of staff, revising manual materials, negotiation of new agreements with State agencies for rehabilitation and the furnishing of new materials for States to use, such as forms, etc.

Children's Bureau: $41,183,000.

(Last year: $35,796,600.)

Operating under the Social Security Administration, the Children's Bureau administers grants to States for maternal and child health, and crippled children's and child welfare services. This year grant money totals $39,361,000, divided as follows: $16 million for maternal and child-health work, with the States required to spend approximately 50 cents for each Federal dollar; $15 million for crippled children's services, same matching requirement; and $8,361,000 for child-welfare services, where the only matching requirement is that States must supply some money. In addition the Children's Bureau has $1,822,000 to finance investigating and reporting activities and to administer the grants.

Food and Drug Administration: $7,979,000.

(Last year: $6,266,000.)

For administering the Federal Food, Drug and Cosmetic Act, Congress voted $6,779,000, which includes $309,000 for policing the distribution of Salk polio vaccine during this fiscal year. FDA will also realize an estimated $1,200,000 from fees paid by industry for certification of biologics, insulin, seafood, etc. The figure for last year does not include fees.

Office of Vocational Rehabilitation: $42,110,000.

(Last year: $36,825,000.)

Under the expanded Vocational Rehabilitation Act (Public Law 565, 83d Cong.) Congress this year voted $36 million for grants to States. This is divided as follows: (a) support of basic rehabilitation services including medical examinations, surgical and therapeutic treatment, hospitalization, prostheses, occupational tools and aids, vending stands, rehabilitation facilities, vocational training and funds for maintenance (based on per capita income and populations as in Hill-Burton) $33,500,000; (b) extension and improvement of State programs, $1,500,000; (c) special grants to States or nonprofit organizations for projects designed to expand the rehabilitation program (2–1 Federal-State matching), $1 million. In addition $2,950,000 is available for training of rehabilitation personnel, including physicians, therapists, psychologists, counselors, medical and psychiatric social workers; $2 million for grants to States and other public and nonprofit agencies and organizations to pay part of the cost of special research and demonstration projects in vocational rehabilitation; and $1,160,000 for Federal administrative costs.

United States Office of Education: Approximately $2,545,000.

(Last year: not reported.)

Practical nurse training: For a goodly number of years the Office of Education has been making grants to States for vocational education in all fields of endeavor. It is estimated that during the last fiscal year approximately $500,000 in grants was used to educate practical nurses. For this year, the Office of Education has available $31,267,000 for grants to States. Included in this figure is $2 million earmarked funds recently authorized by Congress (practical nurses). An appropriation was voted in this amount, plus an additional $45,000 for added costs of administration. Office of Education officials believe that the States will not diminish the level of last year's program, which would mean approximately $2,545,000 is available for practical nurse education.

FEDERAL CIVIL DEFENSE ADMINISTRATION

(This year: $49,810,000; last year: $30,450,000.)

Projected health and medical spending by FCDA this year moves close to the $50 million mark for the first time. Out of a total appropriation of $93,560,000, the estimated $49,810,000 spending for the FCDA health office includes $47 million for stockpiling medical and other supplies owned wholly by the Federal Government, $1,700,000 for matching funds to the States to help them in their medical stockpiling, $810,000 for research and $300,000 for administration costs.

ATOMIC ENERGY COMMISSION

(This year: $31,525,000; last year: $27,700,000.)

The Atomic Energy Commission's Division of Biology and Medicine has about $2.7 million more than last year for research projects. This year's total includes the following spending plans: cancer, $3,002,000; other medical, $9,729,000; biological, $10,821,000; biophysical, $3,459,000; development of new laboratory equipment, $2,319,000; vocational and special training, $615,000; radioisotope distribution, $510,000; and miscellaneous items, $1,070,000.

INTERNATIONAL COOPERATION ADMINISTRATION

(This year: $29,310,000; last year: $25,441,000.)

Technical cooperation programs: $16,380,000.

(Last year: $20,141,000.)

The International Cooperation Administration through direct contributions (which do not have to be matched dollar for dollar) is helping underdeveloped countries to control specific diseases, to set up national and local health services and to establish environmental sanitation. Countries receiving money make contributions in cash, facilities or services in varying degrees.

Development assistance programs: $12,930,000.

(Last year: $5,300,000.)

Spending for emergency health programs (particularly in malaria control on which there is new worldwide emphasis) under ICA direction is up from last year. The agency has $2,500,000 for the Far East, and $10,430,000 for the Near East, South Asia and Africa. The largest single beneficiary will be India.

DEPARTMENT OF STATE

(This year: $15,496,000; last year: $13,669,790.)

United Nations children's fund: $9,700,000.

(Last year: $9,000,000.)

The United States share of the children's fund is up about $700,000 over last year for a total of $9,700,000, but the percentage of United States contribution to the total fund has dropped slightly from 60 percent to 57.5 percent. This is due to the fact that some of the 65 other nations contributing have increased their share slightly. The fund is aiding about 264 health and medical projects in 92 countries and territories, benefiting 32 million children and mothers. Last year the fund aided 1,800,000 children for yaws, vaccinated 14,500,000 against tuberculosis, and 9,000,000 against malaria and other insect-borne diseases.

World Health Organization: $3,410,000.

(Last year: $3,349,790.)

This country's share of the WHO budget remains at one-third of the total of all member-nation contributions. Among the 84 countries agreeing to make contributions is Russia, which until recently has been inactive. Last year WHO was sponsoring about 500 health projects in 106 countries and territories. WHO's overall budget is broken down this way: approximately 72 percent for operating programs, 10 percent for administration and salaries, and the rest for such expenses as holding international conferences and to compensate for nonpayment by inactive member countries.

Pan American Sanitary Bureau: $1,386,000.

(Last year: $1,320,000.)

The United States is contributing approximately two-thirds of the Bureau's regular budget which this year totals $2,100,000. In addition, this country plans an extra $1,500,000 for 1957 malaria-eradication programs. Because these international groups operate on a calendar year, the special contribution is not shown in this report. The Bureau, in existence many years before WHO was organized, is the regional office of WHO for the Americas. The Bureau is sponsoring health programs in 21 Latin American countries and the United States.

Foreign Service employees medical care: $1 million.

(New category.)

The 84th Congress, under Public Law 828, broadened an existing medical-care program for Foreign Service employees to take in their dependents, provided they are living overseas. State Department, which estimates that about 15,000 dependents are involved, has earmarked $400,000 for the first year. The regular program for overseas employees is placed at $600,000. Most of the care is provided in United States military facilities.

FEDERAL EMPLOYEES HEALTH PROGRAM

(This year: approximately $10 million; last year: approximately $6 million.)

Another health program, this one available to all Federal civilian workers, provides limited services through health clinics. They are operated by Federal agencies which employ 300 or more persons in any one area. By regulation, maximum cost of a health service cannot exceed $11 a year per employee, although special industrial conditions or minimal-size unit may warrant a higher ceiling. Services include treatment for on-the-job illnesses and physical examinations for employment.

NATIONAL SCIENCE FOUNDATION

(This year: $8 million; last year: $5 million.)

The Foundation's overall budget of $40 million is 2½ times last year's appropriation. While money earmarked for research grants

UNIVERSITY OF MICHIGAN LIBRARIES

in biological and medical sciences this year does not show the same proportionate increase, it is still considerably above fiscal 1956. The Foundation, now in its sixth year, initiates and supports basic scientific research, evaluates research of Government agencies, and correlates research programs of various agencies.

DEPARTMENT OF LABOR

(This year: $7,151,126; last year: $7,336,000).

Bureau of Employees' Compensation: $6,600,000.

(Last year: $6,800,000).

An estimated 2,390,000 Federal workers now are eligible under the Federal Employees' Compensation Act for medical and hospital care, rehabilitation services, disability and death payments, and funeral and burial expenses. For treatment of employees by private doctors and hospitalization in private facilities, Labor Department has set aside $4,500,000 this fiscal year, and for similar services in Federal hospitals and clinics, $2,100,000. A slight shift is noted away from Federal facilities to private resources; last year's totals were $4,349,218 and $2,234,222.

Bureau of Labor Standards: $551,126.

(Last year: $536,000).

For promotion of industrial safety, the Bureau plans to spend $387,322, and for reemployment programs of the physically handicapped, $163,804. The agency develops standards for hazardous occupations, assists the States in accident prevention programs and trains personnel for administering various projects.

DEPARTMENT OF THE INTERIOR

(This year: $6,138,205; last year: $5,770,000.)

Bureau of Mines: $5,304,300.

(Last year: $5 million.)

Bureau spending for preventive health and safety in the mines is up from last year. The total is divided this way: $3,874,300 for mine inspection and investigations; $898,000 for investigations of accidents and rescue work, and $532,000 for explosives, testing, and research.

Office of Territories: $833,905.

(Last year: $770,000.)

Sometime after the first of the year the money earmarked for contract hospitalization at Morningside Hospital, Portland, Oreg., of Alaskans judged insane will be transferred to the Territory of Alaska under Public Law 830, the Alaska Mental Health Act. This law provides that the Territory, with the help of the Public Health Service, will set up its own programs for the mentally ill.

PANAMA CANAL ZONE

(This year: $6,055,300; last year: $5,702,900.)

The total available for health and medical programs in the Panama Canal Zone is divided: $5,452,400 for operation of 3 hospitals; 1 leprosarium, 1 medical clinic, 2 dental clinics and 6 first-aid stations at which zone employees, their dependents and other zone residents receive treatment, and $602,900 for public health activities and operations of the health director's office. The 3 hospitals have a bed capacity of 1,167.

DEPARTMENT OF THE TREASURY

(This year: $3,511,700; last year: $2,990,000.)

The Bureau of Narcotics, operating within the Treasury Department, has added responsibilities under Public Law 728, 84th Congress for the suppression of illegal traffic in drugs, and accordingly, spending plans are up from last year. The Bureau also is charged with administering the oral prescription law, Public Law 729, 83d Congress.

DEPARTMENT OF JUSTICE

(This year: $1,580,000; last year: $1,470,000.)

The figure represents the Bureau of Prisons' estimate of the cost of medical and dental services for over 20,000 prisoners in 29 Federal penal institutions. The bulk (about $1,490,000) goes to commissioned officers of the Public Health Service assigned to the prisons and to related civil service personnel for services that include psychiatric, surgical and dental treatment. Another $90,000 is earmarked for fees to 220 consultants in various medical specialties.

FEDERAL TRADE COMMISSION

(This year: $1 million; last year: $1 million.)

The Commission plans to spend about the same as last year for research, testing, and compliance operations in the field of foods, drugs, cosmetics, and devices. This is nearly 20 percent of the agency's total budget of $5,550,000. FTC is charged by Congress with the safeguarding of life and health of the public through the prevention of the dissemination of false advertisements of various products.

DEPARTMENT OF COMMERCE

(This year: $547,914; last year: $277,586.)

Civil Aeronautics Administration: $419,414.

(Last year: $223,486.)

Spending for the CAA flight safety program is well ahead of last year. It is divided as follows: $197,315 for salaries and administrative expenses at headquarters, $74,399 for similar expenses in regional office, $47,700 for the CAA Medical Research Laboratory at Columbus, Ohio, and a special grant of $100,000 to the Flight Safety Foundation. Four medical officers in the field supervise the periodic physical examinations required of commercial and private pilots. For this service, pilots pay examining physicians directly; CAA has 1,774 designated medical examiners in the United States and overseas who make about 180,000 examinations a year.

Bureau of Standards: $128,500.

(Last year: $54,100.)

For highly specialized medical research and testing, the Bureau expects to spend about $579,300 for various agencies of Government; of this, $128,500 will involve Commerce funds, with the rest charged to other agencies. Projects include research on radiation protection, radiological instrument evaluation, acoustic calibration, X-ray standards, and dental materials.

CIVIL SERVICE COMMISSION

(This year: $386,000; last year: $382,600.)

The Commission's total budget is $17,407,500, out of which little over 2 percent goes for running the Medical Division. It covers salaries for 8 physicians in Washington and 11 in regional offices. The Medical Division's duties include establishing and reviewing physical standards for all civilian jobs in the Federal Government, supervising and adjudicating disability claims for retirement, and setting professional standards of doctors and ancillary personnel to be employed in Government.

NATIONAL ADVISORY COMMITTEE TO SELECTIVE SERVICE

(This year: $180,000; last year: $180,000.)

The figure is the amount the committee has available for staff salaries at Washington headquarters and its 51 State and Territorial offices, plus administrative costs. The committee advises Selective Service on deferment policies for physicians in residencies, teaching posts, essential laboratory and clinical research, and persons deemed necessary to protect civilian health.

PRESIDENT'S COMMITTEE FOR EMPLOYMENT OF PHYSICALLY HANDICAPPED

(This year: $134,678; last year: $130,000.)

Projected spending is for salaries and administration in the development and promotion of educational programs among employers to stimulate them to hire more of the physicaly handicapped. It also entails expenses in connection with the National Employ the Physically Handicapped Week.

HEALTH RESOURCES ADVISORY COMMITTEE

(This year: $90,000; last year: $101,000.)

The Committee advises the Director of the Office of Defense Mobilization on broad health resource problems, including medical manpower and blood related products. The Committee has the same membership as the National Advisory Committee to Selective Service.

OFFICE OF THE ATTENDING PHYSICIAN OF CONGRESS

(This year: $12,145.)

Since 1928, the Office of the Attending Physician of Congress has provided outpatient care for Members of the House and Senate and their staffs. By the act of that year, the office has been filled by a medical officer of the United States Navy. Sole occupant of the post has been Rear Adm. George W. Calver, Medical Corps, United States Navy. Funds voted by Congress are for medical supplies and equipment and contingent expenses. Salaries of the physicians and four enlisted men are paid out of Navy Bureau of Medicine and Surgery funds.

MAJOR BACKING FOR 1958 ECONOMIC AND TECHNICAL AID PROGRAMS

Mr. WILEY. Mr. President, within the past two weeks, I have been delighted to receive a multitude of mail in hearty support of the economic and technical assistance phases of the 1958 mutual security program.

The general tenor of these letters shows a thoughtful understanding of the need for economic development and exchange of skills and techniques, in furthering the political and economic stability of less-advanced countries.

Representative of the alert awareness to the needs of the newly emerging nations is a letter from Mrs. Marshall Beaugrand, president of the Wisconsin League of Women Voters. The league is one of our leading women's civic groups, and has done a marvelous job of public education in the international relations field.

I commend Mrs. Beaugrand's observations to the attention of my colleagues. I ask unanimous consent that Mrs. Beaugrand's message be reprinted in the body of the CONGRESSIONAL RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

LEAGUE OF WOMEN VOTERS
OF WISCONSIN,
Madison, Wis., May 21, 1957.

Hon. ALEXANDER WILEY,
Senate Office Building,
Washington, D. C.

DEAR SENATOR WILEY: The League of Women Voters has from its earliest days believed that the best method of preventing wars is by furthering peaceful change in the world through measures to achieve social and economic justice. Following the Second World War, the league supported United States economic aid to the war-torn countries of Europe, first through the Greek and Turkish aid and the Marshall plan and interim aid of 1947 and 1948, and then through the point 4 program of 1949. Our support of such aid has been consistently followed during the 10 years which have passed since 1947.

Western Europe's economic recovery has, of course, been notably successful, accompanied by a steadily rising standard of living and a lack of revolutions or hunger riots, the seedbed of communism. Yet the free world still needs mutual economic aid programs to remain free, particularly the new and newly emerging nations in the underdeveloped parts of the world.

Since the end of World War II, there have come into existence some 19 new nations in Asia and Africa, with a population of about 700 million people who, having won their political independence, stability of these countries is dependent upon a sound economic base. There is no present possibility of adequate private investment to furnish these needed funds. Therefore, there are but two sources whence they can come. One is the U. S. S. R., which always stands ready to fish in troubled waters. The other is the United States, as the main supplier. A continuing policy of economic aid is necessary for world stability and it can and will serve the national interest.

The League of Women Voters of Wisconsin, assembled in convention, urges your support for adequate appropriations, in the full amount as requested by the President, for foreign economic aid programs and for technical assistance programs, both through the United States and the United Nations.

Sincerely yours,

JANE P. BEAUGRAND.

THE WORLD'S INCREASE IN POPULATION AND THE OUTSTANDING WORK OF THE WORLD HEALTH ORGANIZATION

Mr. WILEY. Mr. President, this morning's New York Times contains a most significant article.

It is a summary of the principal conclusions of United Nations statisticians, as expressed in a book entitled "The Demographic Year Book for 1956."

The year book predicts that the world's population of 2.7 billion may double by the end of this century.

POPULATION SOARING BY 120,000 A DAY

This fact—the fact of the increase of the world's population by 120,000 a day—poses a tremendous challenge to the human race.

Obviously, it is up to mankind to provide the enduring peace—and with it—the food, the shelter, the living conditions under which the world's population may thrive. We want the human race to be not insecure, but secure; not fearful of starvation and disease, but confident of a better tomorrow.

GREAT NEED IN ASIA-AFRICA

The population increase in the underdeveloped countries of Asia and Africa, of course, spells the principal problem. It is among these lands that there is inevitably the most discontent, the deepest longing for an increased standard of living.

That is why our technical assistance program and the proposed revolving development assistance loan fund are so important.

WHO'S VITAL WORK

Part of the explanation for the world's increase in population is, of course, that mankind has been increasingly successful in the battle against disease—the battle against malaria, tuberculosis, and other age-old scourges.

I have in my hand the text of a summary of the inspiring work of the World Health Organization during the year 1956.

The summary sets forth the highlights of some 700 health projects in 102 countries and territories.

It is this invaluable work which is "paying off" in terms of a lowered mortality rate throughout the world. WHO is certainly to be commended for its tremendous achievements. These achievements in turn pose the challenge to mankind to provide for the increased population of which I have spoken.

I ask unanimous consent that the texts of these two items, the New York Times article, and the World Health Organization press release summary, be printed at this point in the body of the RECORD.

There being no objection, the article and press release summary were ordered to be printed in the RECORD, as follows:

[From the New York Times of May 27, 1957]

POPULATION BOOM SURVEYED BY U. N.—EXPERTS PREDICT THE WORLD'S 2,700,000,000 WILL BE DOUBLED BY YEAR 2000—GAIN IS 120,000 A DAY—PHENOMENAL MORTALITY DROP OF LAST DECADE STRESSED—NO DATA FROM SOVIET

(By Kathleen McLaughlin)

UNITED NATIONS, N. Y., May 26.—At a current rate of increase of 120,000 a day, or 43 million a year, the world's population of 2,700,000,000 may double by the end of this century. United Nation statisticians make this prediction in the Demographic Yearbook for 1956, published today.

The volume contains 750 pages of text and tables depicting the present demographic situation. It was compiled from steadily expanding census results covering nearly 200 separate areas of the globe, inhabited by 2,325,000,000 persons. The major sources were official records.

The yearbook presents census data for all countries and territories with the exception of the Soviet Union, the only large sovereign area that has published no census data within 10 years. It includes information from six other states in Eastern Europe—Bulgaria, Czechoslovakia, East Germany, Hungary, Poland, and Yugoslavia—for which demographic information has not previously been available.

INFANT MORTALITY RATES

Crude birth rates and death rates for these six are roughly comparable to the rest of Europe, the statisticians report. However, their infant mortality rates were found to be markedly higher than those in the West, ranging from 34 to 113 per 1,000 live births. The figures indicate that 7.7 percent of the babies born in 1955 died before they were a year old. In 13 other European countries the rate was 4.2 percent and in the United States and Canada 2.2 percent.

For the world in general the calculators estimate the birth rate at 34 per 1,000 persons annually, and the death rate at only 18. The most significant demographic event of the last decade, they said, was a phenominal decline in mortality, the impact of which is only now beginning to be felt and its implications for the future understood.

The statisticians attribute the decline to advancements in environmental sanitation and disease control. They point out that the introduction of modern drugs in the late 1930's made possible the control of maternal mortality and also materially decreased the risk of death from pneumonia, tuberculosis and other diseases.

Simultaneously, they add, deaths of infectious diseases slumped markedly in the postwar era, through the spread of anti-malaria campaigns using DDT, and expanded sanitary controls such as new water supply systems. Life expectancy rose correspondingly.

DUTCH LEAD IN LONGEVITY

The Netherlands is identified as the country with the highest average expectation of life at birth, now recorded respectively at 71 for males and 73 years for females. England and Wales have the same life expectancy for females, the yearbook shows. Among the major countries, India has the shortest life expectancy, the records indicating 32 years for males or females, based on the censuses of 1941 and 1951.

Latin America continues to reflect the fastest population growth, with a rate of 6.2 percent, or 4,400,000 persons a year. In second place are Africa, southwest Asia, and Oceania, with rates of 2 percent. Europe has the slowest regional increase, the rates varying from 0.6 to 1 percent.

North America and the Soviet Union are growing at comparatively equal rates, 1.7 percent a year, which is a fraction above the world's average of 1.6 percent.

Asia, with more than half the population of the world, has the largest absolute increase annually, 24 million persons, the yearbook shows.

A resurvey of the 1950 United States census discloses it was deficient by 1.4 percent, accounting for an omission of 2 million persons.

[From the Pan American Sanitary Bureau Regional Office of the World Health Organization News of April 3, 1957]

WHO ANNUAL REPORT STRESSES NEED FOR QUICK ERADICATION OF MALARIA—MEDICATED SALT SUGGESTED—AGENCY'S AID IN 700 PROJECTS IN 120 COUNTRIES AND TERRITORIES CITED

WASHINGTON, D. C., April 2.—Malaria eradication has been one of the main concerns of the World Health Organization in 1956, Director-General M. G. Candau states in his annual report to the X World Health Assembly, which will open on May 7 in Geneva.

Mosquito resistance to insecticides was responsible for shifting WHO's malaria policy from mere control to eradication, the report indicates. A dramatic race is now underway between the effectiveness of the chlorine-based insecticides on the one hand and the capacity shown by mosquitoes for development of resistance to the insecticides. In certain parts of Greece such resistance has developed.

"It is clear," says Dr. Candau, "that, were conditions similar to those in Greece to appear elsewhere, the chances of success of eradication campaigns would be seriously jeopardized and it might be necessary to change the methods of interrupting transmission.

"One way of solving the problem might be the distribution of salt for human consumption containing antimalarial drugs, since preliminary results of a study promoted by WHO of the effect of such medicated salt on volunteers inoculated with malaria seem encouraging."

APPEALS FOR CONTRIBUTIONS TO WORLD MALARIA FUND

Dr. Candau further states that WHO member states should assume collective responsibility to achieve worldwide malaria eradication, and should put at WHO's disposal additional funds which may be required by individual countries engaged in eradication work.

In establishing the malaria eradication special account, the 1955 World Health Assembly, meeting in Mexico, created a source of financial help which will be needed to assist governments for only a few years, provided those engaged in eradication work are willing to continue, if not increase their own current expenditure for the length of time

that may be necessary. "It is my earnest hope that the contributions to the special account, which by the end of 1956 were still rather few, will increase in the near future, thus making it possible for a greater number of countries to wage an all-out campaign against one of mankind's worst scourges," concludes the director-general.

The report states that scientific research on insect resistance "exemplifies one aspect of WHO's work which, although less spectacular than the direct services rendered to governments, nevertheless constitutes the real backbone of the various activities through which the Organization is striving to promote world health. * * * An extensive system of exchange of information has been established on problems of resistance in general. This system now involves more than 300 workers in the field and makes it possible for many laboratories to plan specialized research concentrating on those questions for which they are particularly suited."

The review reports that WHO participated last year in nearly 700 health projects in 120 countries and territories, and granted 883 fellowships.

The following summary of the report is given by WHO:

Malaria

WHO personnel were engaged in malaria projects in 34 areas in all WHO regions, including new projects in Ethiopia and the Sudan.

Yaws and venereal infections

In mass campaigns against syphilis and yaws more than 55 million people had been examined and 16 million treated with penicillin by the end of 1956. Serious, and sometimes fatal reactions following penicillin treatment have been reported in some countries during the last few years in urban populations. WHO is therefore coordinating research both in the laboratory and in the field on the comparative usefulness of different penicillin preparations and of antibiotics other than penicillin as public health weapons against these diseases. Some 30 laboratories all over the world are participating in this work.

Tuberculosis

Tuberculosis is still a serious world problem. WHO and the United Nations Children's Fund (UNICEF) continued to cooperate with governments on mass BCG vaccination campaigns, and studies of diagnostic and control procedures that might be usefully adopted for antituberculosis programs under primitive conditions were continued and extended. The large-scale use of drugs as a public health measure had been carefully studied. WHO has continued to recommend the use of isoniazid alone in its field studies because it is the only antituberculosis product that is not too expensive for a public health budget and that is readily taken by contacts who are not themselves sick.

On the subject of BCG the report points out that, when correctly and widely applied, BCG vaccination has a real effect in reducing the incidence of tuberculosis, but it is not in itself sufficient to influence the main reservoir of infection which is in already infected persons, and to bring tuberculosis under control. It must be combined with a program of case-finding and treatment.

Rabies

"Rabies is the most dreaded of all virus diseases," says the report. "Recent advances resulting from research promoted by WHO have materially improved prospects for its control. The demonstration that the use of hyperimmune serum has a major effect in reducing mortality even after severe bites by rabid wolves is an important advance, and work is continuing to determine the proper dosage and the effect of vaccine in combination with serum."

Trachoma

As a result of pilot projects assisted by UNICEF and WHO, it is now clear that mass treatment with antibiotics has given hope of eventually controlling this serious eye disease which often leads to complete blindness.

Leprosy

The discovery that sulphone drugs are effective against leprosy has improved the prospect for its control. The situation may now perhaps be compared with that in tuberculosis: Expensive and lengthy hospital treatment is no longer necessary, lifelong isolation in leprosaria is now unjustifiable and there are prospects that, after the infectious period has been terminated, further treatment may safely be continued at home and normal family life preserved.

Poliomyelitis

Perhaps the most dramatic advance in recent years has been the development of a vaccine against poliomyelitis. It is already clear from experience gained in the administration of more than 100 million doses, with no recurrence of the incidents which marred the 1955 program, that for countries with a high incidence of the paralytic form of the disease, it is an effective means of reducing the serious consequences of infection. WHO is coordinating research on the use of the present vaccine and the development of other types of vaccine. WHO regional poliomyelitis laboratories continued their work, studying prevalent viruses and undertaking or assisting in serological surveys.

Public health administration

"It is now generally recognized that isolated health projects are of doubtful and transient value unless they are based on a structure of decentralized, integrated health services, in which curative and preventive services are organized in hospitals, laboratories, and health units, well distributed through the cities, towns, and villages of the country. These services must be supported by the population and guided by a competent central health authority." WHO has helped a number of countries set up a series of pilot projects on these lines, starting at the district or province level and intended in time to cover the whole country.

The report also reviews WHO projects in health education of the public, maternal and child health, mental health, nutrition, sanitation, and technical education and training.

Atomic energy in relation to health

WHO's program in this field can be summarized under five main heads: (1) Training; (2) Collection and Distribution of Information on the Medical Problems of Atomic Energy and the Medical Uses of Radioisotopes; (3) Study of Health Problems Involved in Disposal of Radioactive Wastes; (4) Distribution of Radiation Standards in Collaboration With Other International Agencies; and (5) Stimulation and Coordination of Research. The World Health Assembly has warned governments of the possible health dangers in the utilization of atomic energy, declaring: "Planning and implementation of every project concerned with the peaceful use of atomic energy should be made in close contact with the responsible public health authorities."

International quarantine

The international sanitary regulations which have been in existence for 4 years have been further amended, with the entry into force of additional regulations relating to yellow fever and modifying the form of the smallpox vaccination certificate. Furthermore, the World Health Assembly withdrew, as of January 1, 1957, the special measures applying to the Mecca Pilgrimage, which involves annually half a million or so persons.

The WHO report states: "The fundamental object of international quarantine is to prevent the spread of pestilential diseases from one country to another. National health authorities are fully aware of the risks involved, and the task of WHO is therefore not to stimulate countries to defend themselves adequately, but to help them to apply quarantine measures that are both timely and adapted to the actual epidemiological situation."

UNITED STATES INFORMATION AGENCY

Mr. FULBRIGHT. Mr. President, I wish to make a few comments on a matter which is close to the Senate and is now pending in conference.

For a number of years, I have followed closely the operations of the United States Information Agency. I have watched its workings abroad and its workings at home. During recent years I have become rather disheartened by the Agency. I have come to the conclusion that when it came to propagating a point of view, it was deficient in many respects. I have now discovered that in one respect, however, it is superb. That is in propagandizing its own point of view to maintain its own appropriation.

I was somewhat startled this morning to find the newspapers filled with a self-serving declaration by a member of this Agency concerning the appropriation. I do not recall many examples of this practice in the past.

It seems to me highly unusual, on the eve of a conference between the House and the Senate, for an agency in question to have complete command of newspaper space. There was no attempt at rebuttal, nor, so far as I know, was there any attempt to obtain the other point of view.

Abbott Washburn, the Deputy Director, merely ticked off the list of things he said would happen to the Agency. No one had an opportunity to challenge him or even to question his facts.

Mr. President, for the past several days there has been a concerted drive to preserve the payrolls of USIA. It is a drive which is deeply resented by many Members of Congress, of whom I am one.

The facts are that this Agency operated on less money than would be provided by the Senate for 3 out of the past 4 years. The Senate figure is merely the average of those 4 years.

The facts are that the Agency was able to offer the Senate committee no detailed figures which would justify maintaining its current appropriations—much less increasing them.

Personally, I felt that the Agency should be held to a lower figure than that authorized. The events that have occurred since the Senate acted have reinforced my belief.

They also have raised in my mind a serious question as to whether we have created a Frankenstein—a monster that may not be very good at telling the rest of the world the facts about America, but which is superb in propagandizing the American people.

The quicker we place the Agency under responsible control in the State Department the better, so far as I am concerned.

I think the outbreak in Formosa which has taken place in the last few days is a matter of serious concern to us.

Mr. GORE. Mr. President, will the Senator yield?

Mr. FULBRIGHT. I yield to the Senator from Tennessee.

Mr. GORE. Perhaps the Senator will recall I related to the Senate that, upon a visit to Formosa late in September, we had a conference with Ambassador Rankin. Upon that day, in the presence of 5 other Senators and 9 Members of the House of Representatives, I asked the Ambassador how many persons were on the United States Government payroll in Formosa. I was astounded with his answer. He said, "Something more than 4,000." I then asked him if the interests of the United States could not be attended to with a lesser number. He replied he thought the job could be done equally well, if not better, with one-half that many.

I should like to inform the Senator and my other colleagues that I have now been informed that there are several hundred more people in Formosa on the United States Government payroll than were on the payroll in Formosa when the Ambassador already said there were twice as many as were needed.

Mr. FULBRIGHT. I recall very well not only the Senator's public statement, but a personal discussion with him about the matter. I think his information should be taken most seriously. In my opinion, the situation in Formosa is extremely critical. Inasmuch as similar conditions very likely exist in other areas throughout the world, instead of our improving our relations with other countries, there may be a contrary result.

I think this attack by a leading member of the USIA, the Deputy Director, on the action of the Senate, while the appropriation is still in conference, is wholly uncalled for. This is the sort of thing which I think the Senate should condemn. It should not tolerate interference by a member of the Agency through the medium of statements published in the press, on the very day the conferees are considering the item.

Mr. JAVITS. Mr. President, I, too, have recently been on Formosa, indeed within the last 2 or 3 months, and I have heard with great interest the observations of the Senator from Tennessee [Mr. GORE] upon that subject.

I might say there is just as much reason to suppose that we have not done as thorough a job as we should do and that we needed more people than we had in order to hold off what has turned into a real emergency in our relations in the Far East.

I should like to say also, if the Senator will permit me, that what people call "meat ax" cutting is simply drawing a conclusion that because there are 4,000 people there, and incidentally we are pursuing a vast program of military, economic and technical assistance on which we are spending hundreds of millions of dollars a year, our situation is bad. The same conclusion from the fact that there were only 1,000 people and therefore it was bad, or there were 6,000 and therefore it was bad.

I think what is needed is real inquiry into the merits of the matter. That is the great fault with a process of slicing an agency to pieces and then complaining because it is not doing a job—it runs the danger of throwing out the baby with the bath water and I believe the situation should be left in perspective.

Mr. FULBRIGHT. Mr. President, I cannot permit that observation to go unchallenged. This matter has been under close study for a long time.

To begin with, the Hickenlooper subcommittee reported on the subject in 1952. That was a subcommittee of the Committee on Foreign Relations. The subcommittee went into this whole matter very thoroughly. It took evidence from all over the world, from many different sources.

I think that study, together with subsequent studies, indicates very clearly that the USIA type of approach is warranted and proper in wartime, when emotions of the people are highly stirred and people are greatly concerned about their immediate security. There are many reasons why an overt propaganda agency is warranted in wartime. But, in peacetime, I submit, all the evidence shows this program is not a very effective way to improve the foreign relations of the United States.

The issue here is the quality and the effectiveness of the media used by the USIA. The assumption on the part of the Senator from New York [Mr. JAVITS] and others that this is inherently an effective and a wise way to proceed, and that all we need to do is increase the volume, I think is basically erroneous. It is not an effective way to improve relations.

The VICE PRESIDENT. The time of the Senator from Arkansas has expired. Other Senators may obtain the floor in their own right.

Mr. JAVITS subsequently said: Mr. President, further in connection with the colloquy which I had earlier with my colleague, the distinguished Senator from Arkansas [Mr. FULBRIGHT], let me say that I, too, as I have previously stated, have been in Formosa within the past 2 months. I traveled there. I talked with Generalissimo Chiang Kai-shek, Madame Chiang, and many other officials, including the Prime Minister. I have seen something of the situation there. If we are to learn from what has happened in Formosa, it must shake us out of a certain kind of complacency—which is probably unique with us—a complacency which causes us to feel that if we help someone else, the situation is or should be in fine shape so far as we are concerned.

I am a firm believer in the foreign-aid program as an essential element of our national security but that does not mean that I want to countenance any inefficiency or ineffectiveness. I just do not believe that meat-ax cutting will get effectiveness. I believe we have to supply the money to do the job and then see that it is done.

The question is whether the situation is good, even though we do help.

The situation is one which requires constant review, constant understanding, and constant servicing. The conferees on the USIA appropriation are meeting this morning. That is the Agency which we expect to project our point of view to the world, including the people of Formosa.

I think it is at least as legitimate a conclusion that we have not appropriated enough here in the Senate for the job, that we have not authorized enough personnel, and that we have not done enough planning to do the job that needs to be done in the key and sensitive areas such as Formosa, as it is to conclude that we have been doing too much.

The great organs of public opinion seemed to be lined up behind the proposition that this is an indispensable activity, which is entitled to support from the executive and the Congress. Apparently it has received very much greater support from the other body, which has studied the problem just as carefully as we have. Also I feel that the competition on propaganda we are getting from the Communists is so strong that our own proposed effort is too limited in our own interest.

I express the hope that none of my colleagues will take offense at the fact that the head of an agency puts up a spirited defense in a proper way for his agency. That is one of our great American privileges. I do not think a man should be penalized for that, certainly not when the agency under consideration is so important and vital to the interests of the United States in our search for security.

I ask unanimous consent to have printed in the RECORD at this point as a part of my remarks an editorial entitled "'Economizing' on USIA," published in the New York Times of today.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the New York Times of May 27, 1957]

ECONOMIZING ON USIA

A joint congressional conference committee begins consideration today of the differences in the bills passed by the House and the Senate for operation of the United States Information Agency this next fiscal year. The difference in this case is substantial. The House authorized an appropriation of $106 million as against the Senate figure of $90 million. President Eisenhower originally asked that the Agency receive $144 million. The USIA budget this year is $113 million.

It is easy to understand why the USIA should be highly vulnerable to congressional budget slashing. We Americans are suspicious of anything which smacks of propaganda. There is no body of voters here whose interests are immediately and obviously hurt by a cut in the USIA's budget as is true, for example, say, of farmers when farm subsidies are reduced. Money spent on USIA does not produce impressive material objects which can be put on parade when needed, as is true, say, of tanks or planes bought with military appropriations. In any farflung and complex operation such as that of USIA there are inevitable mistakes. But the remedy is better planning and management, not a blind slash in funds.

The point is that the USIA is the most vital agency we have in the fundamental contest of our times, the struggle for men's minds. All over the world, using every conceivable means, the forces of Soviet-led communism are seeking to convince the world's people that this Nation is the incarnation of evil, that we stand for war, injustice, racial discrimination and exploitation. This gigantic anti-American campaign

can be stopped only by the truth about the United States—it is the USIA which has the task of spreading that truth. The real economy is to get more value out of each dollar spent.

With this in mind, we can see that it would be the falsest of false economies to give the USIA anything less than it needs to do its vital job. We hope the conference committee will bear that fact in mind.

OUR LIVING FUTURE

Mr. CLARK. Mr. President, on another matter, on Monday, June 3, at the Statler Hotel, at 6:45 p. m., a most interesting moving picture entitled "Our Living Future" will be presented by the American Council To Improve Our Neighborhoods, a national civic organization which I have the honor to serve as a member of the board of directors. All Members of the Senate and of the House of Representatives, and their wives, have been invited to attend the showing of this picture, which is to be preceded by a buffet supper.

We shall today consider the Housing Act of 1957 in this body. This picture to which I have referred will no doubt be shown before final legislative action has been taken by the Congress on the Housing bill.

I wish to invite the attention of all my colleagues to this matter, and I hope that as many as possible will accept the invitation of Mr. Andrew Heiskill, the president of Life magazine and the president of the American Council To Improve Our Neighborhoods, to see this most interesting showing on a matter of vital importance.

NORTHWEST TAX WRITEOFFS

Mr. GOLDWATER. Mr. President, during recent days there has been quite a hue and cry by the senior Senator from Oregon [Mr. MORSE] regarding the morals involved in the granting of a rapid tax amortization certificate to the Idaho Power Co.

The senior Senator from Oregon admitted in the debate last week that there was nothing illegal about this action, but he contended only that it was immoral.

Mr. President, it has come to my attention that there have been 398 corporations in the Pacific Northwest which have received rapid tax amortization certificates in the last 7 years. I have been in the Senate only about 4½ or 5 years of those 7 years, but I have never before heard the issue of morality raised as to the granting of tax amortization certificates in the Pacific Northwest.

Mr. President, in order that my colleagues may know about these 398 corporations, and which corporations they are, I ask unanimous consent that an article which appeared in the Idaho Daily Statesman of May 15, 1957, entitled "Northwest Tax Writeoffs Are Reported at $1 Billion," be printed in the body of the RECORD at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

NORTHWEST TAX WRITEOFFS ARE REPORTED AT $1 BILLION

WASHINGTON.—Certificates permitting an accelerated rate of depreciation of construction costs, for tax purposes, have been granted 398 corporations in the Pacific Northwest in the last 7 years.

Records of the Office of Defense Mobilization show it has issued such certificates for defense-connected plants and equipment costing more than $1 billion in Idaho, Montana, Oregon, and Washington.

The effect is to permit the 398 companies to take a total depreciation of $695 million against income taxes over a 5-year period.

A section of the internal revenue code, enacted in 1950 after the Korean war broke out, permits owners of defense-connected plants in the words of ODM to "write off a portion of a capital investment" over a 5-year period instead of over a period of 20 years or longer. Purpose of the program, administered by ODM, is expansion of the productive capacity of private industry to meet mobilization goals.

REPEAL CONSIDERED

A Senate committee now is considering repeal of this provision of the tax laws in favor of a more limited program.

Larger-than-normal depreciation deductions in the first 5 years are offset, in theory, by smaller-than-normal deductions later.

The percentage of rapid amortization varies by properties, depending on their defense classification. The average is said by ODM to be 60 percent.

ODM reports 21,895 certificates had been issued nationally to May 1. They are for facilities costing an estimated $39,361,477,000. The total subject to amortization is $22,965,208,000.

Totals for the Pacific Northwest by States:

Idaho, 35 certificates for facilities costing an estimated $166,194,000, with $98,213,000 subject to amortization; Montana, 43 certificates for facilities costing an estimated $141,426,000 with $95,389,000 subject to amortization; Oregon, 97 certificates for facilities costing an estimated $228,637,000 with $159,035,000 subject to amortization; Washington, 223 certificates for facilities costing an estimated $550,564,000 with $343,023,000 subject to amortization.

ODM records list Idaho Power Co., Boise, as the recipient of 4 certificates in addition to 2 issued last month for 2 Snake River Dams, Brownlee and Oxbow Dams in Hells Canyon stretch of the river bordering Idaho and Oregon. They will permit rapid amortization of $65,216,000 of the cost of the 2 power projects, which is estimated at $103,081,000.

Idaho Power's four other certificates are for facilities estimated to cost $22,640,000, with $10,820,000 subject to amortization.

OTHER CERTIFICATES LISTED

The ODM lists these other Idaho certifications, with names of corporations, estimated cost of facilities and amounts subject to amortization in parentheses:

American Smelting & Refining, Wallace, $461,000 ($277,000), $83,000 ($50,000); Rare Metals Corporation of America, Washington County, $253,000 ($203,000); Porter Bros. Corp., Idaho at large, $1,715,000 ($1,372,000); Warren Dredging Cascade $35,000 ($23,000); Baumoff Marshall, Inc., Cascade, $160,000 ($104,000).

J. R. Simploy Co., Pocatello, Caldwell and Meyers Cove, $1,023,000 ($460,000); $234,000 ($19,000), $180,000 ($63,000), $175,000 ($122,000); Twin Feather Mills, Kamiah, $40,000 ($16,000); Ohio Match, Huetter, $352,000 ($88,000); Potlatch Forests, Lewiston, $1,007,000 ($403,000); Monsanto Chemical Pocatello $7,452,000 ($3,626,000).

Food Machinery and Chemical Corp., Pocatello, $4,971,000 ($2,485,000), $3,141,000 ($1,508,000); Sullivan Mining, Kellogg, $6,679,000 ($4,675,000); Jefferson Lake Sulphur, Montpelier, $790,000 ($356,000), $2,146,000 ($966,000); Speer Cartridge Works, Lewiston, $42,000 ($27,000); Phillips Petroleum, Burley, $6,258,000 ($3,442,000); Bunker Hill and Sullivan, Bradley, $1,733,000 ($1,040,000).

Oregon Short Line Railroad, Pocatello, $112,000 ($45,000), $70,000 ($35,000); Martin Grain, Kooskia, $80,000 ($32,000); J. H. Valentine, Twin Falls, $95,000 ($48,000); Continental Oil, Burley, $515,000 ($206,000), $559,000 ($221,000); Utal Oil Refining, Boise, $119,000 ($48,000).

WESTERN HEMISPHERE UNITY

Mr. SMATHERS. Mr. President, I know that each Senator was extremely pleased to read in this morning's press that the civil war which had started in Haiti the day before yesterday has apparently come to an end.

It appears that reason and self-restraint have triumphed, and for that all of us can breathe a great sigh of relief.

I am sure that all of us in the United States, because of our affection for the people of Haiti and our concern over their welfare, are most anxious that the transition from one government to another be made in orderly and democratic fashion. The new provisional President Daniel Fignole, according to the press this morning, states that he has assumed the presidency only for the purpose of making arrangements for an orderly election in the very near future. This statement is one which I am sure the people of Haiti appreciate, as well as do their friends in the United States.

It is our hope and wish that this neighbor of ours will quickly be able to stabilize its political as well as its economic position, for when strife, discord, and revolution occur in any one of these friendly countries it becomes a threat to the peace and security of all of us who are in the Western Hemisphere. We want the people of Haiti to be certain that we are sympathetic with them in this hour of turmoil and that we are hopeful their difficulties will quickly be resolved in a fashion pleasing and satisfactory to them.

BALLISTIC SEAPOWER—FOURTH DIMENSION OF WARFARE

Mr. STENNIS. Mr. President, much to my regret I shall be compelled to leave the Chamber shortly, during the time which will probably be used by my colleague on the Armed Services Committee, the junior Senator from Washington [Mr. JACKSON], in delivering what I know will be an excellent speech. I have already had the opportunity to read the speech. It is entitled "Ballistic Seapower: Fourth Dimension of Warfare."

I commend a study of this speech to Members of the Senate and House, and all other interested parties. It comes from a man who is certainly qualified to speak on this highly important and highly uncertain subject. It deals with weapons program of the future. The Senator from Washington is unusually well prepared to speak on this subject. He has given a great deal of attention to

it, not only recently, but over the years. I believe that his observations and comments, together with his predictions, will prove to be a landmark in the early and helpful discussion on this highly important subject.

I commend the Senator from Washington for the great amount of work he has devoted to this timely and intricate subject. I think he is rendering outstanding service as a member of the Armed Services Committee, particularly in this field, although his work is certainly not confined to it. I am grateful for the work he has done, and for the speech he will deliver today, in giving us the benefit of his ideas and conclusions upon this subject. Our Nation is better prepared to protect itself because of his work and effort in the past. I am sure that he will be in the forefront of achievements in this field of endeavor in the important years to come.

THE PRESIDENT'S BUDGET—STATEMENT BY SENATOR PAYNE

Mr. CASE of New Jersey. Mr. President, all of us were distressed several weeks ago by the illness which afflicted our colleague, the Senator from Maine [Mr. PAYNE]. We have been following happily the good news of his convalescence.

The interest of the Senator from Maine in the affairs of the Nation has not in any way been diminished. He still maintains a deep interest in the affairs of the country.

I am pleased to submit for the RECORD a statement which he has asked me to submit on his behalf, in support of the President's budget. I ask unanimous consent that it be printed in the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR PAYNE SUPPORTING THE PRESIDENT'S BUDGET

In the past few weeks President Eisenhower has made two addresses to the Nation in which he very forcefully pointed up the real issue involved in the current controversy over the Federal Budget for 1958. This is that the expenditures proposed in the budget, by and large, represent the very minimum if we are to maintain in operation the programs which have been evolved through long, hard experience to keep the United States strong. The issue is not that the proposed budget is too big, but rather can we afford not to spend the money proposed by the budget?

On numerous occasions I have indicated my complete support of economy in government and the elimination of all nonessential Federal expenditures, but I am unalterably opposed to drastic, meat-ax cuts in the President's budget which cannot be demonstrated to be in the public interest. As one who has long been one of the strongest supporters of this administration I am in agreement with President Eisenhower that severe cuts cannot be made in the Budget for 1958 without jeopardizing the security of the Nation, or impairing the National welfare.

It is therefore, a source of great pleasure to me that public support for the President's budget, and particularly support for the funds recommended for the mutual security program, is rapidly mounting. In the past 2 weeks the mail which has been received in my office indicates 5 to 1 support of the President's program.

I append some representative letters which I have received from citizens of Maine for printing in the RECORD at this point.

GEORGETOWN, MAINE, *May 22, 1957.*

Hon. FREDERICK G. PAYNE,
Senator from Maine,
Washington, D. C.

DEAR SENATOR PAYNE: This letter is meant as a protest against the mass hysteria for drastic budget reduction that has swept the country in recent weeks. In all likelihood, careful, impartial Congressional scrutiny could and should be the means for developing more adequate programs, for curtailing waste and for effecting certain small economies without jeopardizing the major, broad outlines of the budget. Indeed, if the present cry for reduction serves such a purpose, all well and good.

But, essentially, the President's budget should be granted by the Congress. This is not the time for pennywise squeezing nor for the slicing of huge sums where the best interests of the country and the very safety of the free world are concerned. Neither is this the time for Congressional logrolling or for petty lobbying to save regional projects at the expense of vital world needs.

This is a time, most certainly, for courageous, bipartisan appraisal and support of the major requests in the Eisenhower budget.

We therefore strongly urge you to support the following: The school-program budget, the agricultural appropriations budget, the United States Information Agency budget, the national-defense budget, the mutual-security-program budget.

It is unthinkable that the mutual-security program could be further curtailed. Our moral responsibility as leader for the forces of freedom, as well as our own practical interests in building a better economical world structure, should preclude even the thought of such shortsightedness.

We have the honor to remain,

Yours very truly,

RUTH L. PATTERSON.
ETHEL B. PATTERSON.

LEAGUE OF WOMEN VOTERS OF MAINE,
Portland, Maine, May 15, 1957.

The Honorable FREDERICK G. PAYNE,
Senate Office Building, Washington D. C.

DEAR SENATOR PAYNE: I have been asked to forward to you the following statement which was issued by the League of Women Voters of Maine at its convention May 14:

"The League of Women Voters of Maine, in convention assembled, reaffirms its approval of economic aid to underdeveloped countries as a vital necessity to world peace. We believe that United States and United Nations Technical Assistance appropriations and United States economic aid appropriations should be maintained in the interest of improving worldwide economic conditions. For these reasons, we oppose any reduction in the amount proposed in the President's budget in the area of foreign economic aid."

Sincerely yours,

Jean E. Orr
Mrs. JULIAN H. ORR,
State President.

AID TO COMMUNIST SATELLITES

Mr. KNOWLAND. Mr. President, on May 26, 1957, there appeared in the New York Herald Tribune an article entitled "Surplus Food Question: Refugees Oppose Aid to Satellites," written by Herbert A. Philbrick. This is a subject which I have discussed on the floor of the Senate a number of times. I have questioned the policy decision of helping to finance the economic or political systems of Communist regimes.

Because of the importance of this subject, and because of the fact that it will be an issue upon which, in due time, the Senate will have to act, I ask unanimous consent that the article to which I have referred, together with the article referred to by Mr. Philbrick, which appeared in the International Peasant Union publication for February–April 1957, under the title "Aid to the Communist Regimes," be printed in the RECORD at this point as a part of my remarks.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the New York Herald Tribune of May 26, 1957]

SURPLUS FOOD QUESTION: REFUGEES OPPOSE AID TO SATELLITES

(By Herbert A. Philbrick)

Should the United States send surplus farm products to Communist-controlled countries? The Senate Foreign Relations Committee is confronted with this problem in a current study now being made of our overall foreign aid program. And the Senators are being advised by powerful pressure groups to remove present restrictions preventing shipment to Red nations.

Most prominent in urging the Government to send surplus products to the Communists is the National Planning Association, an organization which has previously urged trade with Red China. In a report made public last week, the National Planning Association said: "The administrators of the programs should be free to make disposal agreements with Iron Curtain countries when and if there is an opportunity thereby to advance the aims and aspirations of freedom-loving peoples."

The question, of course, hinges on the when and if. The National Planning Association seems to think that the when is now, and apparently sees no ifs. They said "with increasing signs of unrest in Soviet-dominated countries, is may prove useful to give the administrators of the program and additional freedom of action in this respect."

Most anti-Communist refugee organizations seem to violently disagree with the position of the national planning organization. Among them are the Albanian Democratic Agrarian Party, Bulgarian National Agrarian Union, Croatian Peasant Party, Czechoslovakian Republican Agrarian Party, United Farmers and Smallholders Party of Estonia, Hungarian Peasant Association, New Farmers and Smallholders Party of Latvia, Popular Peasant Union of Lithuania, Polish Peasant Party, Rumanian National Peasant Party, Democratic Party of Slovakia, and the Yugoslav-Serbian Agrarian Union.

In the last bulletin published by the International Peasants Union, representing the 12 captive nation parties, they said, "It would be naive to assume that economic aid accorded to a Communist regime is capable of benefiting the people who find themselves oppressed by Communist dictatorship. It would be even more naive to believe that the transitory concessions to the peoples imposed by the popular revolution developments are not purely tactical moves calculated to overcome the current crisis and consolidate the Communist dictatorships over the restless majorities of the people."

One might ask why, with all of the vast productive potentials and the millions of farmers and laborers now contained in the Soviet empire, there should be any need for food. The International Peasants Union explains, "For some years now, the democratic powers have been appealing to the people

UNIVERSITY OF MICHIGAN LIBRARIES

subjugated by the Communist dictatorships and victimized by Soviet imperialism, to resist with all their strength and by all means at their disposal, the forcible political, economic, and social enslavement of the Soviet system. They were urged to work slowly, to sabotage the economic plans of their oppressors and exploiters (who) threaten the very existence of human freedom and civilization in general."

"At great sacrifice," the Peasants Union points out, "this was done with the result that the Communist economic system was shaken to its very foundation."

Further, they report, "After Stalin's death, the process culminated in disorganization of the party and the terrorist set-up, placing the Soviet regime in a serious political crisis." It was this crisis which in turn imposed the repudiation of the "infallible Red deity, Stalin." This development signified nothing short of ideological and political collapse of the Communist tyranny in the Soviet Union as well as in the subjugated countries.

"Under the circumstances," concluded the International Peasants Union, "it is incomprehensible that at the moment when the captive peoples had succeeded in disrupting the economic system of the whole Soviet sphere, the Free World should appear with proposals of affording material aid to Communist regimes that had been shaken and weakened by the resistance of the peoples."

Would such aid as proposed by the National Planning Association be effective if limited to the captive nations with Russia excluded? The International Peasants Union says that the answer is "No." They state: "Now that the Moscow empire is tottering, the faith in its power was shaken to the point that some of its satellites suddenly came to the realization that * * * having been plundered, their regimes were inevitably moving toward economic and political catastrophe. After plundering unscrupulously and without compensation, the subjugated peoples; after utilizing their food products for maintenance of its enormous military machine, and their raw materials and ore for the purposes of advancing its insatiable heavy industry, the Soviet economy found itself in a crisis so that, instead of being in a position to render economic assistance to the satellites, they are forced to seek it elsewhere."

Should the Communist bloc countries which have alleged independence of Moscow be given food and economic assistance? Again, the International Peasants Union says "No." They explain, "The most naive belief would be to assume that Communist leaders guilty of criminal action to impose communism on the people, are capable of a shift toward democracy which leads to loss of power and their own liquidation.

"If there were the slightest trace of sincerity, the Communist leaderships would have demonstrated this by opening widely the subjugated countries to the surpluses of the Free World, and especially those of the United States, allowing free distribution of food among the starving peoples."

[From the International Peasant Union of February-April 1957]

AID TO THE COMMUNIST REGIMES

For some time it has become the fashion for the Free World to afford material aid to Communist regimes professing a tendency of asserting national independence in relation to the Soviet Union. The justification for such opportunist policies is that in this manner the Free World is weakening the Soviet Union and her worldwide Communist conspiracy as well as encouraging the breakaway of nations hitherto belonging in the orbit of her empire. Even though briefly, let us examine this phenomenon frankly and sincerely.

For some years now the democratic powers have been appealing to the peoples subjugated by Communist dictatorships and victimized by Soviet imperialism to resist with all their strength and by all means at their disposal the forcible political, economic, and social enslavement of the Soviet system. They were urged to work slowly, to sabotage the economic plans of their oppressors and exploiters, to undermine as much as feasible the position of this criminal antihuman reaction because it not only destroys countries and peoples wherever installed by Soviet military aggression but also threatens the very existence of human freedom and civilization in general. This proceeded on the realization that the Soviet system threatened also the survival of the presently free countries and peoples by aiming to place them under the yoke of the Moscow power-mad universalist clique. Accordingly, press, radio, speeches, appeals—all were preoccupied with this fundamental and decisive theme.

Regardless of the Draconic measures of the Communist dictatorship and of the Soviet imperialistic apparatus, at the price of frightful sacrifices heroically endured, the subjugated peoples of eastern-central Europe as well as the peoples of the Soviet Union herself in the end arrived at the result that the Communist economic system was shaken in its very foundation. After Stalin's death, the process culminated in disorganization of the party and the terrorist setup, placing the Soviet regime also in a serious political crisis. It was this internal politicoeconomic crisis that imposed the highly embarrassing repudiation of the hitherto omnipotent and infallible universal Red deity, Stalin. This development signified nothing short of ideological and political collapse for the Communist tyranny in the Soviet Union as well as in the subjugated countries of central and eastern Europe and a tremendous loss of prestige among the Communist parties of the world. What remained in this debacle was only the Soviet-Communist military machine and, even this, in the Hungarian revolution, showed disintegration and suffered an impressive defeat.

Under the circumstances, it is incomprehensible that at the moment when the captive peoples had succeeded in disrupting the economic system of the whole Soviet sphere the Free World should appear with proposals of affording material aid to Communist regimes that had been shaken and weakened by the resistance of the peoples enduring for so many years their brutal techniques. In other words, the democratic powers are proposing to restore what popular resistance has demolished for the purpose of reducing communism to economic impotence by heeding their own appeals. Even so, the matter is not concerned only with moral and ideological considerations. The main point is that in this manner the Free World is moving to strengthen the position of the badly shaken Communist dictatorships, to arrest the process of their distintegration and thus afford them the possibility to continue their collaboration with the Soviet universal conspiracy for the sole purpose of retaining their positions of power.

Then, there is another aspect of this question. Now that the Moscow empire is tottering, the faith in its power was shaken to the point that some of its satellites suddenly came to the realization of having been plundered to such an extent that if this were allowed to continue their regimes were inevitably moving toward economic and political catastrophes. This situation placed the Soviet Union herself before an economic and political catastrophe. After plundering for whole 10 years most unscrupulously and without compensation the subjugated peoples while leaving them to starve and move around in rags, after utilizing their food production for maintenance and reserves of its enormous military machine and their raw materials and ore for the purpose of advancing its insatiable heavy industry, the Soviet economy found itself in a crisis so that, instead of being in a position to render economic assistance, the satellites are forced to seek it elsewhere.

Does it not appear strange that in this catastrophic period for the Soviet Union and the Communist system, while they are facing economic and therefore political collapse, the Free World should appear and say: "We are ready to take over the heavy burden which may crush your weakened setup. Instead of you, we shall assist those whom so far you have plundered and driven into bankruptcy, who now seek assistance that you cannot give because you need assistance yourself."

Such is briefly the practical significance of the material assistance that the Free World is offering to some Communist regimes and which actually is bound to assist the Soviet Union to overcome her difficulties and advance her aggressive designs on the democratic world. In other words, what popular resistance has achieved is to be undone for the sake of accommodating ill-conceived opportunism. Under the cirumstances, it is not much to urge every sober and objective individual to judge for himself the moral, economic, and political consequences of this unprincipled political aprpoach of the Free World in general and the United States in particular, that now leads its economic, military, and political base.

It would be naive to assume that the economic aid afforded to a Communist regime is capable of benefiting the people who find themselves oppressed by Communist dictatorship and are being ridden mercilessly by the Soviet imperialist apparatus. It would be even more naive to believe that the transitory concessions to the peoples imposed by the popular revolutionary developments are not purely tactical moves calculated to overcome the current crisis and consolidate the Communist dictatorships over the restless majorities of the people. It was along such lines that Lenin went to the point of reinstating a purely bourgeois new economic policy and openly acknowledging that 1 step backward had in view 5 steps forward. The most naive belief would be to assume that Communist leaders guilty of criminal acts in their efforts to impose communism on the peoples are capable of a shift toward democracy which leads to loss of power and their own liquidation.

If there were the slightest trace of sincerity of affording help to the peoples themselves, the Communist leaderships would have demonstrated them by opening widely the subjugated countries to the surpluses of the Free World and especially those of the United States allowing free distribution of food among the starving peoples and whatever else could be spared. Such moves have great possibilities to the point of being not mere "crumbs" warding off death by starvation which the Communist employ to save—not the peoples but their own position of power. This is the reason that currently the nationalist Communist regimes and their Moscow souffleurs sing the same song that they are seeking exchange and not charity. Exchange what—the things that the Communists do not posses?

It ought to be obvious therefore that, Stalinists or not, the Communist dictators follow the same pattern and pursue the same aims. They seek economic assistance from the democracies not for the purpose of feeding and clothing the peoples that they keep in total subjection and exploit unmercifully, but in order to use this assistance of the free world for the purpose of intensifying their control as well as assisting the Soviet Union to increase the numbers of tanks, planes, atomic and hydrogen bombs so that, by aggression against the free world, the position of communism be secured and the starving

masses be rendered impotent to resist any further.

If the Free World has truly lost its reason and allows such manipulations to succeed, then it is headed for defeat. We continue to believe, however, that the moral conscience of humanity will overcome the political naivete and opportunism in dealing with Communist aggression and that freedom and wisdom will triumph in the end.

ESTABLISHMENT OF NATIONAL MONUMENTS AT FORT CLATSOP IN OREGON AND THE INDIAN POST OFFICE IN IDAHO

Mr. NEUBERGER. Mr. President, I ask unanimous consent to have printed in the body of the CONGRESSIONAL RECORD an article which I contributed to the Oregonian Sunday magazine of May 19, 1957, in support of my legislative proposals for the establishment of national monuments at Fort Clatsop in Oregon and the Indian Post Office in Idaho. Both of these places are historic spots on the famous trail of Lewis and Clark, who were the first Americans to cross our continent.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WHEN THE MOCCASINED MEN MARCHED

(By Hon. RICHARD L. NEUBERGER, of Oregon)

TWO NOTABLE POINTS ON LEWIS AND CLARK ROUTE RECOMMENDED FOR NATIONAL MONUMENTS

Few American regions have a richer historical legacy than the Pacific Northwest. Yet no part of the United States has been so neglected by the National Government with respect to Federal custodianship of historically significant areas.

New England and the South, for example, are dotted with national historic sites, memorials, and monuments like apples on a tree. The Northwest has only one lone site—McLoughlin House at Oregon City, and this is merely supervised by the National Park Service, but is not an official segment of our national park system.

With all these facts in mind, I have introduced in the Senate two bills authorizing the creation in the Pacific Northwest of a pair of genuine national monuments under the ownership and operation of the United States Government. The monuments would commemorate one of the truly great events in the annals of America, the Lewis and Clark Expedition.

One monument would be in the State of Oregon, at the site of recreated Fort Clatsop, near Astoria. The other would be high in the Clearwater National Forest of Idaho, at a beautiful spot called Indian Post Office, where stand three rock cairns which actually date from the era of Meriwether Lewis and William Clark.

This legislative effort is bipartisan. Cosponsor of my Fort Clatsop bill is Senator WAYNE MORSE, Democrat, senior Senator from Oregon; cosponsor of the Indian Post Office bill is Senator HENRY C. DWORSHAK, Republican, senior Senator from Idaho.

The Fort Clatsop bill has been passed by Congress and signed by President Eisenhower. The National Park Service now is studying the feasibility of setting aside reconstructed Fort Clatsop as a national monument. I understand some controversy has arisen over whether it is on the exact site of the original fort. It seems to me the Park Service must accept the existing location or else submit definite proof that an alternative site is the authentic one.

SITES MERIT RECOGNITION

In my opinion, Fort Clatsop and Indian Post Office richly merit enshrinement as national monuments—far more so, for example, than an early iron industry at Hopewell, Pa., or the Vanderbilt mansion outside of Hyde Park, N. Y.

To begin with, the Lewis and Clark expedition marked the first crossing of this vast continent by Americans. Fort Clatsop, which the explorers erected during the rainy December of 1805, was the first permanent settlement of any sort inhabited by Americans on the shores of the world's greatest ocean. It was the first American military post anywhere west of St. Louis. It was where American conquest of the West really began.

Reconstruction of Fort Clatsop was carried out faithfully in connection with the Lewis and Clark sesquicentennial, in 1955. The logs even were cut to the precise proportions of those described in Lieutenant Clark's 150-year-old plans. Tom Vaughan of the Oregon Historical Society tells me that a pair of immigrants from Finland were found to provide the woodworking skills needed to notch, niche, and dovetail the intricate joints of the log stockade.

Considerable money from the Oregon State treasury and private contributions has gone into this undertaking, along with uncounted hours of volunteer labor and the logs, donated and pressure-treated with preservative by the Crown-Zellerbach Corp. In view of the buildings and sites of inferior memory which are already in Federal possession, it will be a case of outright discrimination against the Pacific Northwest if Fort Clatsop fails to qualify for status as a national monument.

Indian Post Office is vastly different from the log battlement on the damp Oregon seacoast.

At 7,036 feet, Indian Post Office is the highest elevation reached by Lewis and Clark on their trek. It lies athwart the Lolo trail, where the frontiersmen came closest to starvation and disaster. One of the sergeants of the party, Patrick Gass, described the scene as "a horrible mountain desert."

CAIRNS MARK SPOT

But white puffs of bear grass abound picturesquely at Indian Post Office in the summer, and big game is abundant. The animals have been driven up into the high country by civilization since Lewis and Clark were there. But the historically exciting feature of Indian Post Office is that the lovely meadow still contains three rock cairns which marked the lofty trail at the time the first westbound Americans carried our flag to the shores of the Pacific.

Meriwether Lewis wrote in his famous journal that "we resumed our route over the heights and steep hill of the same great ridge. * * * We reached an eminence where the Indians have raised a conic mound of stone, 6 or 8 feet high, on which is fixed a pole made of pine, about 15 feet."

This mound, along with cairns that have no poles, endure to this day. The Lolo trail is still that wild, where it clings to the towering ridges above the foaming Lochsa River. This was the stream of destiny through the Bitterroots, the stream that Lewis and Clark immortalized as the Kooskooskee.

I believe the argument is compelling for national monuments both at Fort Clatsop and at Indian Post Office.

Fort Clatsop recreates the original Lewis and Clark outpost with extreme fidelity to details. Even with the most minimum sort of custodial care, the fort attracted more than 10,000 visitors last summer. Of course, the site can be reached easily by automobile on United States Highway No. 101. It is my recommendation that the National Park Service acquire additional nearby acreage to give the fort the proper protection and setting.

Indian Post Office is in another category. It is wild, remote, and aloof. It can be reached best by horseback or on foot. A rough forest road is open for only a few months at the height of the summer.

This is so legendary a spot that the ashes of the late Bernard DeVoto, greatest of the biographers of Lewis and Clark, will be scattered here this summer by his widow and other members of his family. Mr. DeVoto died in November 1955 and his remains are now in a Forest Service vault at Ogden.

ORDER DISPENSING WITH CALL OF THE CALENDAR

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the call of the calendar be dispensed with.

The PRESIDING OFFICER (Mr. CURTIS in the chair). Without objection, it is so ordered.

JOINT POWER DEVELOPMENT ON THE COLUMBIA AND YUKON RIVERS

Mr. NEUBERGER. Mr. President, I ask unanimous consent to have printed in the body of the CONGRESSIONAL RECORD a news article from the Vancouver (British Columbia) Sun of May 14, 1957, entitled "MacKenzie Urges Joint Hydro Plan."

In this article Dr. Norman MacKenzie, president of the University of British Columbia, has proposed an international commission to govern and regulate power development on the great Columbia and Yukon Rivers.

Because the recommendation of this outstanding Canadian educator is so close to the proposals contained in my own Senate Resolution 121, I believe that the article will be of special value and interest to the Senate.

Dr. MacKenzie voiced his recommendations during a speech on the campus of the University of Alaska, when he was presented with the honorary degree of doctor of laws at the annual commencement ceremonies near Fairbanks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MACKENZIE URGES JOINT HYDRO PLAN

COLLEGE, ALASKA.—President Norman MacKenzie of the University of British Columbia proposed Monday that an international commission be set up to govern power development on the Columbia and Yukon Rivers.

Dr. MacKenzie made the suggestion in a speech to the graduating class of the University of Alaska, which presented him with an honorary doctor of laws degree.

The United States Harmon doctrine, which states that "a nation has absolute and unfettered control and jurisdiction over everything and everybody within its borders, including the waters that flow within and across its borders," came under sharp criticism in the speech.

RAPS DOCTRINE

"In recent years this doctrine has proved most embarrassing to the United States and advantageous to Canada in respect of the prospective use and development of the waters of the Columbia and Yukon Rivers as well as others that cross our border," he said.

UNIVERSITY OF MICHIGAN LIBRARIES

"My own view is that the sensible approach in matters of this kind is to create an impartial and competent authority, one representing both our countries, with authority to prepare plans for the total development of those boundary waters and to recommend a proper distribution of the results or product of this development on a fair and equitable basis."

MAXIMUM BENEFITS

"This would achieve the maximum benefits for the peoples and countries concerned."

Dr. MacKenzie added that he felt "these sensible solutions are linked up emotionally, in Canada at least, with the sensible settlement of other problems of common interest" faced by the United States and Canada.

He named as examples access to the sea across the Alaska Panhandle and reasonable access to United States markets for Canadian resources and products.

Earlier in the speech he called the Alaska Panhandle a "serious obstacle to the effective development" of British Columbia and the Yukon.

He said he felt the United States "got the best" of the Alaska boundary settlement with Canada.

The PRESIDING OFFICER (Mr. CURTIS in the chair). Is there further morning business? If not, morning business is closed.

REQUEST FOR RETURN TO SENATE OF ENROLLED BILL S. 1463

Mr. SMATHERS. Mr. President, I submit a concurrent resolution and ask unanimous consent for its immediate consideration.

The PRESIDING OFFICER. The resolution will be read for the information of the Senate.

The concurrent resolution (S. Con. Res. 33) was read as follows:

Resolved by the Senate (the House of Representatives concurring), That the President of the United States is requested to return to the Senate the enrolled bill S. 1463, to amend the Medals of Honor Act to authorize awards for acts of heroism involving any motor vehicle subject to the motor carrier safety regulations of the Interstate Commerce Commission. If and when said bill is returned by the President, the action of the Presiding Officers of the two Houses in signing said bill shall be deemed rescinded; and the Secretary of the Senate is authorized and directed, in the reenrollment of said bill, to make the following correction: In line 3 of the Senate engrossed bill strike out "38" and insert "33."

Mr. SMATHERS. Mr. President, I may say that the only purpose in requesting the return of the bill is to correct a clerical error.

The PRESIDING OFFICER. Is there objection to the present consideration of the concurrent resolution?

There being no objection, the concurrent resolution was considered and agreed to.

BALLISTIC SEAPOWER—FOURTH DIMENSION OF WARFARE

Mr. JACKSON. Mr. President, more than a year has gone by since I took this floor to urge more speed, more effort, and more central direction for our intermediate range and intercontinental ballistic missiles programs.

As you know, Mr. President, these missiles will rank with the invention of gunpowder, and the A-bomb and the H-bomb, as among the most revolutionary developments in all military history.

The IRBM—the intermediate-range ballistic missile—could fly from a launching site near Leningrad to London in 10 or 15 minutes. The ICBM—the intercontinental missile—could fly from outside Moscow to Chicago in 25 or 30 minutes. Both weapons will travel at speeds and heights making effective interception unlikely, so far as we know today. Both will carry hydrogen warheads. One such missile could destroy the heart of the largest city on earth.

We are now in a neck-and-neck race with the Soviets to see who will get these weapons first.

Our own program lagged badly until less than 2 years ago. The President gave the development of these weapons supreme priority only after urgent pleas from Members of the Congress. The Secretary of Defense appointed a full-time missile program coordinator only after similar urgings.

But the past is behind us. What matters is the present and the future. Today, the development programs we have started are going places—fast.

The Air Force is speeding toward the first operational test of Thor, its intermediate-range missile. It is working around the clock at the same time on Atlas and Titan—alternate versions of the intercontinental ballistic missile. The Army has moved forward rapidly on Jupiter—its version of the IRBM, although statements from the Secretary of Defense have left the outcome of this program in doubt. On a far smaller scale, and with a far longer timetable, the Navy is developing Polaris—a sea-launched intermediate-range missile.

We are now taking calculated scientific and technical risks. We are trying to move as quickly as possible from the laboratory and drawing board to the assembly line—from scientific research to large-scale industrial production of operational weapons.

We are now cutting down our technological lead time.

But it should be clear that building and testing a missile is not the same as building a missiles force. The technological problem of building accurate and reliable missiles is only half the total problem.

The other half is the problem of strategic and military planning. How many intercontinental missiles should we build, and how many intermediate-range missiles? How many of our missile launching platforms should be on land; and how many on the sea? How many land-based missiles should be deployed in our own country; and how many at advanced overseas bases? How much research and development money should we now put into one missile system, and how much into another?

We may have ballistic missiles, but we will not have an effective missiles force, until these questions are answered, and answered correctly.

Some may wonder why I make these points today when we have yet to test our first operational IRBM. Should we not now concentrate all our energies on testing and building these weapons, and defer until later the problem of military and strategic planning?

But technical development and strategic planning must go forward in parallel. One cannot be divorced from the other.

There is a lead time in military and strategic planning just as real as the lead time in technical development. The effectiveness of our missile force 5 years from now, and even 10 years from now, will depend on strategic planning decisions made in the Pentagon this year, in 1957.

Every year's delay in strategic planning means a year's delay in building an effective missile force.

Recall the history of the B–29, the long-range Superfortress which did so much to destroy the Japanese military economy in World War II. The strategic decision to attain long-range bomber capability was made on the eve of World War II, long before the B–29 existed even on paper. Six years of superb technical effort were needed before we secured the B–29 fleets which helped devastate the Japanese Empire in 1944 and 1945.

Our ballistic missiles force will be subject to the same laws of strategic planning. Five or ten years of all-out technical development and industrial production will elapse before strategic planning decisions made this year can be reflected in the actual hardware of a ballistic missile force.

Certain strategic questions are therefore now crucial: Are we now covering every good bet in our strategic planning for the ballistic missile era? Is our planning giving every promising missile system adequate emphasis?

In short: Are we now doing everything possible to cut down the lead time in strategic planning?

I believe that the answer to these questions may be "No." I believe that we may now be neglecting one ballistic missile system which could give us a quantum jump upward in our military deterrent power.

I refer to a possible future fourth dimension of warfare, the intermediate-range ballistic missile fired from ocean-launching platforms.

I refer to a delivery system in which the IRBM with a hydrogen warhead could be launched against strategic targets from submerged or surfaced nuclear-propelled submarines.

I call this the fourth dimension of warfare because it would introduce a new element into military strategy and tactics. It would combine nuclear firepower—missiles with H-bomb warheads—with nuclear propulsion, in the form of mobile submarine launching platforms which could roam anywhere on the high seas without refueling and stay submerged indefinitely.

The Navy is now building *Halibut*, a nuclear submarine, which will fire missiles of relatively slow speed and relatively short range. This will be an excellent ship, but it represents only one very short step toward a true IRBM submarine.

In addition, the Navy now has a long term—a very long term—research and

development program aimed at ultimately, eventually, firing intermediate-range ballistic missiles from submarines and surface ships. This program, however, commands neither the money, the manpower, nor the priority now assigned to the ICBM and land-based intermediate-range missiles. And yet, an IRBM launched from an ocean platform could have the same target coverage and the same military effect as an ICBM launched from our own country.

It is very probable that we can build submarine-based missile launching systems. No insurmountable technical obstacles are now foreseen.

Nonetheless, special problems are involved in designing, building, and controlling a reliable weapons system in which 1,500-mile missiles could be accurately and reliably fired from ocean platforms. In fact, the technical challenge is far greater than the one of developing Thor or Jupiter, our land-based intermediate-range missiles.

It should not be hard to see why. A land-based launching site is an immovable platform, precisely oriented to our globe's axis. It rests on the bedrock of the earth itself. It is firmly fixed in space. The range to a potential target can be calculated with hairbreadth accuracy long before an emergency occurs. The only real limiting factor would be the accuracy of our guidance systems and maps.

A submarine launching platform would not be fixed in space. Even if anchored, it would be constantly moving because of the ocean's action, and moving in three dimensions. The distance between a patrolling submarine and enemy targets would constantly change. Range calculations could not be easily made.

A land-based missile would fly through only one element—the air. A sea-based missile, if actually fired from under the water, would fly through two elements—water and air. The problem of launching and the problem of accurate guidance would be more difficult.

Land-based launching sites would have a relatively easy logistics problem. Spare parts and replacement depots would be close at hand. Spare parts and replacements for sea-based missiles would be located in the ship itself. But in a crisis, sea-based missiles would be far more difficult to service and replenish than land-based missiles.

The problem of military command—of foolproof control over the operations of our missiles—would be comparatively simple in the case of land-based systems. We would know exactly where every land-based-missile platform was, at every instant of time. Land-based sites could be linked with a central headquarters through a jam-proof and instantaneous communications network.

Sea-based systems would have to be linked to command headquarters by many communication channels, on the assumption that it would be impossible to jam all the channels at once.

As we see, the difficulties of actually building an effective ocean missile force are numerous. Yet the arguments for a far greater emphasis on the sea-based system are compelling.

Our security clearly lies in convincing the Soviets that even if they strike the first nuclear blow, they cannot prevent an overwhelming and possibly fatal counterattack.

A submarine missile base could move in close to the aggressor's shores to launch missiles. It could compete favorably with any land-based system in target coverage.

There is this vital difference, however. The Kremlin would know the location of our land-based launching sites. The Kremlin would not know where our ballistic seapower was deployed.

Land-based sites will not be tiny dots on the landscape. They will be relatively large, relatively easy to identify, and fixed in place. It is doubtful whether we or our allies could conceal their location.

One cannot discount the future possibility of mobile land-launching sites, as the state of the art improves. This, however, is a possibility of the distant future.

A massive surprise missile attack, skillfully executed by the Soviets, might actually knock out most of our Strategic Air Force and much of our land-based-missile capability before we could retaliate.

But the location of our ocean missile force would change constantly. This deterrent fleet, ever shifting, could be dispersed over the millions of square miles of the Atlantic, the Pacific, and the Arctic Oceans. Thanks to nuclear power, it would not have to be refueled. A certain fraction of this force could remain on submerged alert. The surface of the ocean would shield it from hostile search radar. It could be in a state of constant readiness, 24 hours a day, 365 days a year.

Steady advances are, of course, being made in submarine detection. Yet finding ships under the sea is vastly more difficult than spotting planes in the air, or ships on the surface of the sea, since the scientific laws of radar do not apply.

Hidden, widely deployed, ever on the move, missile submarines would be enormously difficult to locate and even more difficult to destroy. The odds against eliminating such a deterrent fleet before it could strike a counterblow would be a hundred to one or even a thousand to one.

The problem faced by an aggressor would be like that of a man trying to find a black cat on a vast and empty plain on a dark, moonless, and starless night.

If the enemy launched a surprise missile attack, our only effective reply would be a nuclear counter blow. Yet the aggressor's missiles would strike our homeland within minutes of being launched. Mr. President, would there be time to strike a counterblow with many of our land-based missiles before they were destroyed?

If we rely only on land-based sites, an aggressor's first surprise blow may be the final blow, the blow which makes effective retaliation impossible.

This is where the fourth dimension of warfare—ballistic seapower—becomes crucial. No matter how fast the enemy's missiles travel, they could not eliminate this underseas fleet in one massive assault. Enough submarines would remain intact to strike a crushing counterblow.

An additional point needs emphasis. In the IRBM and ICBM era, if the Soviets launched a nuclear war, their first move would be a massive attack on the ballistic retaliatory power of the Free World. Failure to destroy this power would leave the Kremlin open to a devastating counter blow—a rain of rockets.

In short, our own missile sites, and the sites of our allies, would be strategic magnets. Like a magnet, these sites would draw the fire of an aggressor's ballistic blow.

Note this difference, however, Mr. President: Land-based missile sites, both here and abroad, would be strategic magnets drawing the enemy's missiles toward the cities, the towns, the farms, and the factories of the Free World. Ocean-based platforms would be strategic magnets drawing the enemy's missiles away from our countries.

Our missile submarines could be a save-our-cities force. This fleet would be stationed far out at sea—thousands of miles from San Francisco or Chicago or New York or London or Paris. The Kremlin, if it started an all-out war, would be forced to attack our ballistic seapower. And every Soviet missile fired against the concealed and shifting submarines would mean one less missile, one less hydrogen warhead, available for use against our cities. Of the Soviet missiles sent against this underseas fleet, almost all would fall harmlessly into the barren and uninhabited seas. The clouds of radioactive spray geysering up from the depths would fall on empty ocean—not on our cities.

In truth, such a force might become the ultimate save-the-peace force of the ballistic era. This fleet would confront Soviet military and economic planners with an almost impossible dilemma. Moscow could not make a surprise attack, and itself survive, if this fleet remained in existence.

But how would the Kremlin's strategists propose to destroy it? The sites of land-based ballistic counterforce would be known in location, and would be immovable. Conceivably, Moscow might calculate that several hundred Soviet missiles, fired in a surprise assault, could break the back of this land-based deterrent. In all probability, however, it would be impossible to locate and attack many of our submarine-based missiles. As long as the submarine was moving, it could not be hit with a ballistic missile. The Soviets might require a stockpile of literally tens of thousands of missiles and nuclear warheads, and still be unable to destroy our submarine striking power.

Think of the enormous strain on the Soviet economy if Moscow were to prepare for a ballistic Pearl Harbor against the Free World. Billions and billions of rubles would be needed to build up the Soviet missile force which could strike against the Free World's land-based missile sites and our Strategic Air Command. But these weapons would be

UNIVERSITY OF MICHIGAN LIBRARIES

nothing, compared to the enormous outlays of money, materials, and manpower which would have to be devoted to the attempt to destroy our underseas missile force.

There is a limit to what the Soviet economy can produce. Russia's laboratories and factories might simply prove unequal to the task of building the numbers and types of weapons that would be needed if Moscow were to entertain any serious hope whatsoever of destroying both our land-based and our sea-based missile counterforce. For every million dollars we would spend on a submarine missiles fleet, the Soviets might spend fifty million or one hundred million and still not be in a position to destroy our underseas fleet.

Mr. President, nothing I have been saying is any secret to the Soviets. Moscow understands the principles of military strategy. Moscow understands that our system of advanced bases is the greatest single strategic advantage possessed by the Free World. Moscow understands that Soviet submarine launching platforms could cancel out this advantage. Moscow knows that a fleet of underseas missile ships flying the Soviet flag would be the equivalent of Communist bases a few hundred miles from Seattle, Los Angeles, and New York.

Today, right now, the Soviets have submarines which can fire ballistic missiles at least 200 miles. We must presume they will soon have submarine-launched ballistic missiles with a 1,000- or 1,500-mile range. No real defense against such weapons is now foreseeable. In fact, our own ballistic seapower may be the one thing which above all will keep Moscow from making a surprise attack with its own sea-based missiles.

As you know, Mr. President, I have never been a one-weapon advocate in my approach to defense problems. I do not think for a single moment that a submarine missile-launching system would eliminate the necessity for the land-based ICBM or IRBM. I am sure that we will need a balanced missile force—just as our entire defensive effort must be balanced if we are to be ready to repel military aggression in all its wide variety of forms.

Certainly, for a long time to come, we shall require medium-range and long-range manned bombers. The difference between building a successful test missile and a real missiles force is the difference between day and night. As missiles are perfected, they will be added to our arsenal as a supplementary-delivery system. I cannot now foresee the day when missiles will completely substitute for manned bombers.

So far as missiles are concerned, the real question is not whether we should have a land-based or sea-based missile system. I am sure we need both. The real issue concerns a tremendously difficult decision in strategic planning. It is the issue of strategic balance. It is the issue of how much emphasis we should put on a sea-based system, and how much on land-launched missiles. It could be that sea-based missiles will be of only very limited military use. If so, one could defend the very leisurely effort we are now making to develop this weapons system. But it could equally be that this weapon will, in fact, introduce a fourth dimension into warfare. If so, one could not defend our existing business-as-usual program.

Which is it, Mr. President? Will the submarine-launching platform be just another routine weapon? Or will it come to be a supreme deterrent of the ballistic era? This is the issue.

It is no comfort to be told, as I am sure we shall be told, that our defense planners are already "studying" this issue. Of course they are. They are "studying" hundreds of issues. The H-bomb was being studied in 1942; but we did not start a real H-bomb program until 1950, 8 years later. The ICBM was being studied in 1946, but we did not go all-out to build it until almost 10 years later.

Nor is it any comfort to be told, as I am sure we shall be told, that the Navy is now "working" on the problem of developing submarine-launched missiles. Of course the Navy is "working" on this problem. The Navy is "working" on thousands of problems. The real question is, how much work? How much effort, how much money, and how much priority are now being assigned the sea-based IRBM? Is it the right amount of effort; is it the right amount of money; and is it the right priority?

The plain fact is that the money now authorized and appropriated for the Navy is insufficient to support an all-out effort to develop this weapon as quickly as possible, if an all-out effort is now in the national interest.

The Navy has just so much money to go around. Its overriding concern is with building the ships and the airplanes we need to defend ourselves this year and next year. Furthermore, the law prohibits funds appropriated for the Navy's presently authorized shipbuilding program from being diverted to the development of this new weapons system.

The real point, however, is this: The question of the priority we should now give ballistic seapower is not one which can be decided wisely among the armed services themselves.

Let us be honest about it. Interservice rivalry is a fact. It is a fact also that missile spending may very shortly be the largest single military hardware item in our defense budget. Everyday commonsense argues that each service will try to claim for itself a lion's share of the missile budget. It is simply unrealistic to expect the three services to answer objectively the question of how much effort should be put on the sea-based IRBM. Any answer given by the services themselves would inevitably reflect interservice logrolling.

There is another reason—even more important—why the issue of the emphasis to be given sea-based missiles should not be decided within the Defense Establishment. This is not purely a military issue; it is an issue which goes to the roots of our foreign policy, as well. The emphasis given the ocean-based IRBM affects the very fundamentals of our relations with our allies.

Let us take an example. At the Bermuda Conference, we agreed to give our British friends assistance in securing land-based intermediate-range missiles, when these became operational. Sound reasoning lay behind this offer. The IRBM, stationed on British soil, will give our own country the advantage of a counterstrike force located 3,000 miles closer to a Eurasian aggressor. In addition, Britain's determination—and ability—to resist an aggressor's threats will no doubt be strengthened if these missiles are added to her arsenals.

At the same time Britain is a comparatively tiny country. As the British Government's own white paper recently acknowledged, her cities and urban population could not escape from a Soviet air-atomic attack directed against British bases. There is simply not enough real estate to go around. It is a matter of plain geography in the age of weapons of mass destruction.

The problem, however, would be very different if Britain were primarily defended by a force of submarine-based missiles. These weapons would not be dotting the British countryside, near London or Manchester or Edinburgh. They would be deployed far out at sea, well beyond direct fall-out range of Britain's population. A sneak attack from Moscow, if designed to eliminate this sea-based deterrent, would not fall on the densely populated British countryside; it would fall instead on the empty stretches of the Atlantic and Arctic Oceans.

For purposes of defense, Britain would no longer be a tiny country. Tens of thousands of square miles would be added to its defense base. Britain's frontiers would shift from the Hebrides and the Cliffs of Dover to the far reaches of the oceans.

A sea-based missile force should have enormous appeal for our allies, especially in Europe. It could provide a maximum deterrent to Moscow, with reduced danger to home territories. It would constitute a rational method of self-defense in the ballistic era.

We and our NATO allies are now reviewing present strategy for the defense of Europe. Might not a water-based missile force go far to meet our common needs? Is it not possible that the bonds of the NATO alliance could now be strengthened by a cooperative program to develop and support a sea-based missile force?

No further argument should be needed to show why the question of land-based versus sea-based missiles cannot be answered in purely military terms. Neither our men in uniform, nor their civilian superiors in the Pentagon, should be expected to settle a problem which will affect so vitally the entire future of our relations with our allies.

It is my earnest opinion that only one person is qualified to resolve the question of whether we are placing enough emphasis on the development of ballistic seapower. That person is the President of the United States acting not only in his capacity of Commander in Chief of our Armed Forces, but also as the one charged under the Constitution with the conduct of our foreign affairs.

I have the highest respect for the dedication, ability, and sincerity of the heads of our armed services and the civilians

within the Department of Defense. I simply believe that an issue of this historic import lies beyond their province.

It is therefore with the greatest respect that I suggest the following:

First. The President, with the help of the National Security Council, should personally reexamine the question of whether we are now giving enough effort, enough money, and enough priority to the development of sea-based missile-launching systems.

Second. In resolving this issue, the President should give consideration to seeking assistance from a presidentially appointed Commission on Ballistic Seapower.

Such a Commission would, of course, be completely nonpartisan, both politically and in terms of allegiance to anyone of the armed services. Its membership could be made up of a small number of citizens, those best qualified by reason of military, industrial, diplomatic, or scientific attainment, to counsel the President most wisely. Its report could be made available to the President in time for his decision to be reflected in next year's budget request.

In conclusion, let me say this: Terrible weapon is being piled on terrible weapon. But a peace of mutual terror cannot last forever.

I believe that discussions among nations for a sound and safe system for the control and limitation of armaments should be continuous. The statesmen of the Free World must never give up in their search for a security system which rests on more than the threat of mutual destruction.

Yet until this quest is successful, we require a balanced military arsenal, with modern weapons to meet both nuclear and limited aggression.

And until this quest is successful, we require the most rational and effective deterrent to nuclear war that we can get. If the sea-based missile force is such a deterrent, then we should bend the national effort to achieve it.

I am deeply convinced that the issue of whether we are giving enough emphasis to the development of ballistic seapower should be reviewed and decided now—not next year, or the year thereafter, but this year.

Mr. President, the American people need not stand in fear. We can welcome the future. We have a great tradition of mastering the problems that confront us. But no people can escape the laws of military and strategic planning. Decisions we make—or fail to make—today, will determine our chance to deter nuclear war tomorrow.

Mr. TALMADGE. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. NEUBERGER in the chair). Does the Senator from Washington yield to the Senator from Georgia?

Mr. JACKSON. I am happy to yield.

Mr. TALMADGE. First, I should like to congratulate the distinguished Senator from Washington for a very able and profound speech. I know he is devoting a great deal of time, energy, and work, as a member of the Armed Services Committee, to this particular problem.

I should like to ask the Senator a question or two, if he will yield for that purpose. First, how do we stand, compared with Russia, in the development of our missile program?

Mr. JACKSON. I think at the present time the Soviets are ahead of us in the race for the intermediate range ballistic missile. That is the 1,500 nautical mile missile. With regard to the ICBM, or the intercontinental ballistic missile, I would say it is a neck-and-neck affair. I should add, of course, that the Soviets, with their enormous submarine fleet of at least 500 submarines, have a minimum of a 200-mile missile capability against the North American Continent.

Mr. TALMADGE. What steps, if any, are we taking to develop a sea missile force or submarine missile force?

Mr. JACKSON. The Navy is working on this program. I regret to say, however, that it simply does not have enough funds, because of its overall requirements, to meet certain building needs within the Navy. The result is that the Navy is not making, and cannot make, the effort which in my judgment should be made to achieve this objective.

Mr. TALMADGE. Is it not the Senator's opinion that if we can develop an adequate missile force by use of warships, submarines, and other media, we can materially reduce our defense budget?

Mr. JACKSON. I do not think there is any question about it. I believe that the submerged nuclear-powered submarine places in our hands, and in the hands of the Free World, an effective weapon, which places the Soviets in such a position that they would not dare to start an allout atomic-hydrogen war. I think that the submarine force, together with land-based systems of launching missiles, would give us the most economical retaliatory power we could build.

Mr. TALMADGE. And at the same time we would be afforded a better weapon to prevent war?

Mr. JACKSON. Exactly. In addition, of course, an ocean-based missile force would draw the fire away from our cities. It would force potential enemies of the Free World to seek out and destroy the retaliatory force at sea. I think this aspect of it alone should commend it to very, very careful consideration by our people.

Mr. TALMADGE. I thank the distinguished Senator.

Mr. KEFAUVER and Mr. GORE addressed the Chair.

Mr. JACKSON. I am happy to yield to the distinguished senior Senator from Tennessee.

Mr. KEFAUVER. I wish to congratulate my colleague from Washington upon his very able presentation. I should like to ask him one question.

I notice, on page 14, that the Senator recommends that the President, with the help of the National Security Council, should examine the question as to whether we are giving enough money and priority to the development of a sea-based missile launching system; and, second, that there should be a presidentially appointed commission on ballistic seapower.

Does the Senator not feel that if these matters were fully considered and decided in the Security Council, the second part, relating to the so-called commission, might well be solved by appointing members of the commission from various committees of the Congress?

Mr. JACKSON. That is a possibility. However, it occurred to me that we should try to utilize the services of professional experts, who are completely free to give impartial judgments and free from interservice rivalry.

It is conceivable that this commission could take on the form of a joint commission. I presume that is what the distinguished senior Senator from Tennessee has in mind.

Mr. KEFAUVER. That is what I had in mind.

Can the Senator give any further information as to how much study is being given by the administration to the proposal he has made for ballistic seapower?

Mr. JACKSON. The defense planners, of course, have been considering this item for a long time. As I pointed out, they are also considering a thousand and one other problems.

My point is that this type of retaliatory force has not been given the consideration which it merits. I wish to say that some of the finest scientific men we have in America wholeheartedly support this approach to the construction of a sea-based retaliatory force. They are men like Dr. Edward Teller, and a host of other top scientists, who feel that this area is being neglected. They feel that a submarine missile force would help to stave off the catastrophe of an atomic hydrogen conflict.

Mr. KEFAUVER. I thank the Senator.

Mr. GORE. Mr. President, will the Senator yield?

Mr. JACKSON. I am happy to yield.

Mr. GORE. The Senator is entitled to, and I am sure has, the gratitude of many of his colleagues for the leadership he has provided in this difficult and technical but very important field.

The Senator has said that the President of the United States is best equipped to make a decision as to the emphasis and the effort to be placed upon this development. I would agree with the Senator in that respect if I were convinced that the President himself would actually make the decision, after coming into full possession of the facts. I qualify my comment in this respect because of the experience which the able Senator and I, as members of the Joint Committee on Atomic Energy, have had with respect to the development of an atomic airplane. We have seen another instance in which perhaps the President of the United States, is possessed of all the facts, would be best able to determine the importance of maintaining American leadership in this field, as we have maintained leadership in the field of atomic submarine development.

Because of the experience which the Senator and I have had—witnessing the slowing down of the atomic airplane program; so that it has been left, in fact,

UNIVERSITY OF MICHIGAN LIBRARIES

without even a definite schedule—I wonder if the Senator does not think there is ample room for the activity of the Joint Committee on Atomic Energy, of which he and I are members, as I have said, in the field to which the able Senator has addressed his talents and attention, as well as in the field of development of nuclear power and nuclear airplanes.

Mr. JACKSON. I do not think there is any question that the Joint Committee on Atomic Energy has a very heavy responsibility in this field. I think we have an opportunity to make a real contribution.

The distinguished junior Senator from Tennessee will recall that the Joint Committee went into quite some detail as to the rate of progress of our ballistic missile program a little over 2 years ago. We wrote a letter to the President, urging that the program be given top priority, and that a civilian administrator be appointed. The President did take those steps a short time thereafter, some 30 to 60 days after the committee had been in touch with him.

I hope the President will take decisive action on this problem. I feel, in all honesty, that the rivalry which exists in the Pentagon precludes an opportunity for the Department of Defense to go forward with the kind of study which should be made.

Mr. GORE. Mr. President, will the Senator yield further?

Mr. JACKSON. I am happy to yield further.

Mr. GORE. Assuming that the interservice rivalry is so acute that the National Security Council is impeded from giving to the President an objective analysis of the American situation in the ballistic field, the development of ballistic missiles, and the importance thereof, does the Senator not think that the Joint Committee could repeat its efforts and that perhaps, if it could get the personal attention of the President, it could bring about a repetition of the direction of the President's personal attention to the problem?

Mr. JACKSON. I think the distinguished junior Senator from Tennessee has made an excellent suggestion. I feel that the very fine bipartisan attitude we have in our committee on these problems is such that we should be able to achieve that sort of objective.

Mr. GORE. Mr. President, will the Senator yield further?

Mr. JACKSON. I am happy to yield.

Mr. GORE. I appreciate the Senator's reference to the bipartisan attitude which prevails in our committee. I applaud that. It was in no partisan sense that I raised the question of the President's giving personal attention to this problem and being fully possessed of the facts.

Mr. JACKSON. The junior Senator from Washington did not wish to suggest any such inference. It was not intended.

Mr. GORE. I did not understand the Senator to infer that. Of course, the office of the President of the United States is the most powerful and the most burdensome position in the world. The present occupant of that office, or any future occupant of that office, can give his personal and full attention to only a limited number of problems. This, however, is a problem of sufficient magnitude and importance, in my opinion, to justify the President in taking time to become fully informed and to take direct executive action. It is only through direct executive action, in my judgment, that the bottleneck of interservice rivalries will be broken, so as to promote this development as it should be promoted.

Mr. JACKSON. The junior Senator from Washington completely agrees with that statement.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. JACKSON. I am happy to yield.

Mr. PASTORE. First of all, I wish to express my regrets that I was unable to be present at the time the distinguished Senator from Washington delivered his speech. However, knowing of his interest in the past, I am confident that whatever he had to say on this very important subject is of such great importance that all Members of the Senate will read the speech—particularly the junior Senator from Rhode Island.

I was very much impressed by the question addressed to the distinguished Senator from Washington by the Senator from Georgia, with relation to the competition between the Soviet Union and the United States in the development of the intermediate and intercontinental missiles. As I understand the Senator from Washington, his position is that, so far as the intermediate missile is concerned, there may be a possibility that the Russians are somewhat in advance of us.

Mr. JACKSON. That is correct.

Mr. PASTORE. And that, with relation to the intercontinental missile, there is a possibility that we are more or less neck and neck.

Mr. JACKSON. That is correct.

Mr. PASTORE. That being the case, this is the question which I should like to address to the distinguished Senator from Washington: What is his observation with reference to the likelihood of America agreeing to a cessation of testing of hydrogen devices and weapons unless we make sure that we are in advance so far as the intermediate missile and the intercontinental missile are concerned?

Mr. JACKSON. I think it would be a serious mistake. I feel that it is indispensable to our security and the security of the rest of the Free World that we have in being this retaliatory capability. I think it would be unwise, indeed, if we should attempt to enter into some kind of disarmament program piecemeal, without developing a rascalproof system of disarmament. If we are dealing with rascals, we had better make sure that the system is rascalproof. I think that is the great danger we face in the discussions now in progress with the Soviets.

Mr. PASTORE. Will the Senator concede that if we are to live any longer in this period of balance of terror, the advantage will be weighted in favor of the nation which perfects as soon as possible, the intermediate and intercontinental missiles?

Mr. JACKSON. There is absolutely no doubt about it.

Mr. PASTORE. If that be the case, if I correctly understand the Senator from Washington, he strongly recommends that we proceed very cautiously in the direction of stopping any of our tests with relation to perfecting and refining our hydrogen warheads, until we determine that we are equal to or ahead of the Russians, so far as progress in this field is concerned.

Mr. JACKSON. The Senator is correct.

Mr. PASTORE. I congratulate the Senator. I shall make it a point to read his speech.

Mr. GORE. Mr. President, will the Senator yield?

Mr. JACKSON. I yield.

Mr. GORE. In addition to listening to a major portion of the Senator's speech, during the colloquy which has ensued, I have read the full text. It is one of the most able performances I have seen in a long while.

Mr. JACKSON. I thank the distinguished Senator from Tennessee.

I wish to make one observation in connection with the previous colloquy. I think it would be unfair if any impression were to be created in making these remarks on the subject of ballistic seapower, we are trying to encourage, aid, and abet further rivalry within the Defense Department.

The kind of approach I am suggesting for the consideration of the use of submarines, both surfaced and submerged, affords an opportunity to our Government and to the rest of the Free World to solve this problem impartially and fairly, without giving undue weight to the personal views of any of our top professional men in the Army, the Navy, or the Air Force. I believe that as time goes on there must be more impartial consideration of the various possibilities, which will, for the future, at least, give the United States and the other free nations an opportunity to have a military capability which will prevent any would-be aggressor from starting a war which might lead to an atomic or hydrogen catastrophe.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Allott	Fulbright	Morse
Anderson	Goldwater	Morton
Barrett	Gore	Murray
Beall	Green	Neuberger
Bennett	Hayden	Pastore
Bricker	Hickenlooper	Potter
Bush	Holland	Purtell
Butler	Hruska	Revercomb
Byrd	Humphrey	Robertson
Capehart	Ives	Russell
Carlson	Jackson	Saltonstall
Carroll	Javits	Scott
Case, N. J.	Johnson, Tex.	Smathers
Case, S. Dak.	Johnston, S. C.	Smith, Maine
Chavez	Kefauver	Smith, N. J.
Church	Kennedy	Sparkman
Clark	Knowland	Stennis
Curtis	Kuchel	Talmadge
Dirksen	Lausche	Thurmond
Douglas	Long	Thye
Dworshak	Malone	Watkins
Eastland	Martin, Iowa	Wiley
Ellender	Martin, Pa.	Williams
Ervin	McClellan	Yarborough
Flanders	Monroney	Young

Mr. JOHNSON of Texas. I announce that the Senator from Nevada [Mr. BIBLE], the Senator from Delaware [Mr. FREAR], the Senator from Missouri [Mr. HENNINGS], the Senator from Alabama [Mr. HILL], the Senator from Oklahoma [Mr. KERR], the Senator from Washington [Mr. MAGNUSON], the Senator from Montana [Mr. MANSFIELD], the Senator from Michigan [Mr. MCNAMARA], the Senator from West Virginia [Mr. NEELY], the Senator from Wyoming [Mr. O'MAHONEY], and the Senator from Missouri [Mr. SYMINGTON] are absent on official business.

Mr. DIRKSEN. I announce that the Senator from Vermont [Mr. AIKEN], the Senators from New Hampshire [Mr. BRIDGES and Mr. COTTON], and the Senator from South Dakota [Mr. MUNDT] are absent on official business.

The Senator from Kentucky [Mr. COOPER] and the Senator from Kansas [Mr. SCHOEPPEL] are necessarily absent.

The Senator from Indiana [Mr. JENNER], the Senator from North Dakota [Mr. LANGER], and the Senator from Maine [Mr. PAYNE] are absent because of illness.

The PRESIDING OFFICER (Mr. TALMADGE in the chair). A quorum is present.

VISIT TO THE SENATE BY BUSINESSMEN FROM VICTORIA, AUSTRALIA

Mr. DIRKSEN. Mr. President, the Senate is honored today by having in the gallery a delegation of very distinguished businessmen from the State of Victoria, in Australia. They have been making a 6 weeks' tour of the United States. I hope the Senate will extend them a cordial welcome; and I ask these distinguished visitors to stand.

[The visitors from Australia rose in their places in the gallery, and were greeted with applause.]

THE HOUSING ACT OF 1957

The PRESIDING OFFICER. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business.

The Senate resumed the consideration of the bill (H. R. 6659) to extend and amend laws relating to the provision and improvement of housing, to improve the availability of mortgage credit, and for other purposes, which had been reported from the Committee on Banking and Currency with an amendment, to strike out all after the enacting clause and insert:

That this act may be cited as the "Housing Act of 1957."

TITLE I—FHA INSURANCE PROGRAMS

SEC. 101. Section 2 of the National Housing Act is amended by redesignating subsection (g) as subsection (h) and by inserting after subsection (f) the following new subsection:

"(g) Any payment for loss made after December 31, 1957, to an approved financial institution under this section shall be final and incontestable after 2 years from the date the claim was certified for payment by the Commissioner, in the absence of fraud or misrepresentation on the part of such institution, unless a demand for repurchase of the obligation shall have been made on behalf of the United States prior to the expiration of such 2-year period."

SEC. 102. Section 203 (d) of the National Housing Act is hereby repealed.

SEC. 103. Section 203 (i) of the National Housing Act is amended by striking out "$6,650" and inserting in lieu thereof "$8,000", and by striking out "$5,950" and inserting in lieu thereof "$7,200."

SEC. 104. Section 204 of the National Housing Act is amended by adding at the end thereof the following new subsection:

"(k) Notwithstanding any other provisions of this section or of section 604 or 904, with respect to any debentures issued pursuant to this section or section 604 or 904, the Commissioner may (1) include in such debentures reasonable payments made by the mortgagee, with the approval of the Commissioner, for the purpose of protecting, operating, or preserving the property, and taxes imposed upon any deed or other instrument by which the property was acquired by the mortgagee and transferred or conveyed to the Commissioner, and (2) terminate the mortgagee's obligation to pay mortgage insurance premiums upon receipt of an application for debentures filed by the mortgagee."

SEC. 105. (a) The second sentence of section 204 (d) of the National Housing Act is amended by striking out "determined by the Commissioner, with the approval of the Secretary of the Treasury, at the time the mortgage was offered for insurance, but not to exceed 3 percent per annum" and by inserting in lieu thereof "established by the Commissioner pursuant to section 224."

(b) The second sentence of section 207 (1) of such act is amended by striking out "determined by the Commissioner, with the approval of the Secretary of the Treasury, at the time the mortgage was insured, but not to exceed 3 percent per annum" and by inserting in lieu thereof "established by the Commissioner pursuant to section 244."

(c) The second sentence of section 803 (f) of such act is amended by striking out "determined by the Commissioner with the approval of the Secretary of the Treasury, at the time the mortgage was accepted for insurance, but not to exceed 3 percent per annum" and by inserting in lieu thereof "established by the Commissioner pursuant to section 224."

SEC. 106. Section 207 (c) (3) of the National Housing Act is amended by striking out "limitations per room" and inserting in lieu thereof "limitations", and by inserting immediately after "$1,000 per room" the following: "without regard to the number of rooms being less than 4, or 4 or more,".

SEC. 107. The unnumbered paragraph immediately following paragraph (3) of section 207 (c) of the National Housing Act is amended (1) by striking out "$8,100 per family unit" and inserting in lieu thereof "$8,100 per family unit (or $8,400 per family unit in the case of projects to consist of elevator-type structures)", and (2) by inserting before the period at the end thereof a comma and the following: "and may permit single elderly persons to use and occupy such units."

SEC. 108. Section 207 (q) of the National Housing Act is repealed.

SEC. 109. Section 213 of the National Housing Act is amended by adding at the end thereof a new subsection as follows:

"(i) Nothing in this act shall be construed to prevent the insurance of a mortgage under this section executed by a mortgagor of the character described in paragraph (1) of subsection (a) of this section covering property upon which dwelling units and related facilities have been constructed prior to the filing of the application for mortgage insurance hereunder: *Provided*, That as to any project on which construction was commenced after the date of enactment of the Housing Act of 1957, the mortgage on such project shall be eligible for insurance under this section only in those cases where the construction was subject to inspection by the Commissioner and where there was compliance with the provisions of section 212 of this title: *And provided further*, That in the case of properties other than new construction, the limitations in this section upon the amount of the mortgage shall be based upon appraised value rather than upon the Commissioner's estimate of the replacement cost.".

SEC. 110. Section 213 (e), 220 (f) (1), 221 (g) (1), and 222 (e) of the National Housing Act are each amended by striking out "and (h) of section 204" and inserting in lieu thereof "(h), and (j) of section 204."

SEC. 111. Section 219 of the National Housing Act is amended by striking out "or the Section 220 Housing Insurance Fund" and inserting in lieu thereof "the Section 220 Housing Insurance Fund, the Section 221 Housing Insurance Fund, or the Servicemen's Mortgage Insurance Fund."

SEC. 112. (a) (1) section 221 (a) of the National Housing Act is amended to read as follows:

"SEC. 221. (a) (1). This section is designed to supplement systems of mortgage insurance under other provisions of the National Housing Act in order to assist certain segments of the population to which adequate housing is not available under existing private financing programs to obtain adequate living accommodations. In carrying out the purposes of this section, the Commissioner shall prescribe such procedures as in his judgment are necessary to secure a preference or priority of opportunity to purchase or rent dwelling units covered by mortgage insurance under this section to persons included within the following categories, and to persons within such additional categories as the Commissioner may by regulation prescribe: (A) persons affected by urban renewal activities, (B) persons of moderate income, (C) persons whose inability to obtain adequate living accommodations in privately financed housing is attributable to race, creed, or color, (D) elderly persons, and (E) persons having five or more dependents.

"(2) As used in this subsection—

"(A) the term 'person affected by urban renewal activities' means an individual or family from an urban renewal area, or an individual or family displaced as a result of governmental action, in a community respecting which (i) the Housing and Home Finance Administrator has made the certification to the Commissioner provided for by section 101 (c) of the Housing Act of 1949, or (ii) there is being carried out a project covered by a Federal-aid contract executed, or prior approval granted, by the Housing and Home Finance Administrator under title I of such act before the effective date of the Housing Act of 1954, or (iii) there is being carried out an urban renewal project assisted under section 111 of the Housing Act of 1949, as amended;

"(B) the term 'person of moderate income' means an individual or family whose income is not sufficient to rent new privately financed housing with total monthly housing expenditures of 20 percent of the normal stable income of such individual or family;

"(C) the term 'elderly person' means a single person 60 years of age or over, or a family the head of which (or his spouse) is 60 years of age or over;

"(D) the term 'dependent' means any person who may be considered a dependent under section 152 of the Internal Revenue Code of 1954, including a spouse."

(2) Section 221 (d) (2) of such act is amended to read as follows:

"(2) involve a principal obligation (including such initial service charges, appraisal, inspection, and other fees as the Commissioner shall approve) in an amount (A) not to exceed (i) $12,500 in the case of a property upon which there is located a

dwelling designed principally for a single-family residence, except that the Commissioner may by regulation increase this amount to not to exceed $15,000 in any geographical area where he finds that cost levels so require, (ii) $18,000 in the case of a property upon which there is located a dwelling designed principally for a two-family residence, except that the Commissioner may by regulation increase this amount to not to exceed $20,000 in any geographical area where he finds that cost levels so require, (iii) $25,000 in the case of a property upon which there is located a dwelling designed principally for a 3-family residence, except that the Commissioner may by regulation increase this amount to not to exceed $27,500 in any geographical area where he finds that cost levels so require, (iv) $32,000 in the case of property upon which there is located a dwelling designed principally for a 4-family residence, except that the Commissioner may by regulation increase this amount to not to exceed $35,000 in any geographical area where he finds that cost levels so require; and (B) not to exceed the appraised value (as of the date the mortgage is accepted for insurance) of any such property, less such amount, in the case of any mortgagor, as may be necessary to comply with the succeeding provisos: *Provided*, That if the mortgagor is the owner and an occupant of the property at the time of the insurance, he shall have paid on account of the property at least (i) $200 in the case of a single-family dwelling, (ii) $400 in the case of a 2-family dwelling, (iii) $600 in the case of a 3-family dwelling, and (iv) $800 in the case of a 4-family dwelling, in cash or its equivalent (which amount may include amounts to cover settlement costs and initial payments for taxes, hazard insurance, mortgage insurance premium, and other prepaid expenses): *Provided further*, That nothing contained herein shall preclude the Commissioner from issuing a commitment to insure, and insuring a mortgage pursuant thereto, where the mortgagor is not the owner and an occupant of the property, if the property is to be built or acquired and repaired or rehabilitated for sale, and the insured mortgage financing is required to facilitate the construction, or the repair or rehabilitation, of the dwelling and to provide financing pending the subsequent sale thereof to a qualified owners who is also an occupant thereof, but in such instances the mortgage shall not exceed 85 percent of the appraised value: *And provided further*, That the Commissioner shall prescribe such procedures as in his judgment are necessary to secure to families, referred to in subsection (a) above, priorities in occupancy of the remaining units of 2-, 3-, and 4-family dwellings after occupancy of 1 unit by the owner; or."

(3) Section 221 (d) (4) of such act is amended by striking out "5 percent per annum on the amount of the principal obligation outstanding at any time, or not to exceed such percent per annum not in excess of 6 percent as the Commissioner finds necessary to meet the mortgage market", and inserting in lieu thereof "4 percent per annum on the amount of the principal obligation outstanding at any time."

(4) Section 221 of such act is further amended by inserting at the end thereof a new subsection as follows:

"(i) Nothing in this act shall be construed to prevent the insurance of a mortgage under this section covering a housing project containing dwelling units designed for occupancy by single persons, and such dwelling units shall constitute family units within the meaning of this section.".

(b) Section 305 of such act is amended by adding at the end thereof a new subsection as follows:

"(g) Notwithstanding any other provision of this act, the Association is authorized to make commitments to purchase and to purchase, service, or sell, any mortgage which is insured under section 221 of this act: *Provided*, That the total amount of purchases and commitments authorized by this subsection shall not exceed $250 million outstanding at any one time.".

SEC. 113. Section 223 (a) of the National Housing Act is amended—

(1) by striking out "or 213" each place it appears (except in the second proviso in paragraph (7)) and inserting in lieu thereof "213, or 222";

(2) by inserting after "prescribed by" in paragraph (4) the following: "this act or"; and

(3) by striking out the second proviso in paragraph (7) and inserting in lieu thereof the following: ": *Provided further*, That a mortgage of the character described in paragraphs (1) through (6) of this subsection shall have a maturity, a principal obligation, and an interest rate not in excess of the maximums applicable to loans insured under section 203, 207, 213, or 222, as the case may be, except that in no case may the principal obligation of a mortgage referred to in paragraph (5) of this subsection exceed 90 percent of the appraised value of the mortgaged property."

SEC. 114. Section 226 of the National Housing Act is amended by adding at the end thereof the following new sentence: "Notwithstanding the first sentence of this section, the Commissioner is authorized to require, in connection with any mortgage where the mortgage amount is computed on the basis of the Commissioner's estimate of the replacement cost of the property, that a written statement setting forth such estimate be furnished under his section in lieu of a written statement setting forth the amount of the appraised value of the property.".

SEC. 115. Title II of the National Housing Act is amended by adding at the end thereof a new section as follows:

"SEC. 229. (a) Notwithstanding any other provision of this title, and in addition to mortgages insured under section 203 or 207, the Commissioner may insure and make commitments to insure any mortgage under this section which meets, except as hereinafter provided, the eligibility requirements set forth in such sections: *Provided*, That no mortgage shall be insured under this section unless the Secretary of Defense or his designee shall have certified to the Commissioner that the housing with respect to which the mortgage is issued is necessary in the interest of national defense. Such certification shall be evidence to the Commissioner of the need for such housing and that such project or property is an acceptable risk in place of any other requirement in this act that the project or property meet a requirement of economic soundness: *Provided*, That the Secretary or his designee with the approval of the Commissioner shall have determined that adequate housing is not available for personnel of the armed services at reasonable rentals within reasonable commuting distance of the installation and that the mortgaged property will not so far as can reasonably be foreseen substantially curtail occupancy in existing housing covered by mortgages insured under this act.

"(b) Except as otherwise provided herein, the provisions of this title relating to mortgages insured under section 203 or 207, respectively, shall be applicable to mortgages insured under this section which meet the eligibility requirements of such sections.

"(c) The Commissioner shall require that each dwelling covered by a mortgage insured under this section shall be held for rental for a period of not less than 4 years after the dwelling is made available for initial occupancy or until advised by the Secretary of Defense or his designee that the housing may be released from such rental conditions. Priority in sale or rental of dwellings covered by mortgage insured under this section shall be required and given to essential military and permanent personnel of the armed services as evidenced by certification issued by the Secretary of Defense or his designee.".

TITLE II—FEDERAL NATIONAL MORTGAGE ASSOCIATION

SEC. 201. (a) The second sentence of section 303 (d) of the National Housing Act is amended by striking out "$50,000,000" and inserting in lieu thereof "$100,000,000."

(b) The second sentence of section 303 (e) of such act is amended by striking out "$50,000,000" and inserting in lieu thereof "$100,000,000."

SEC. 202. Section 304 (c) of the National Housing Act is amended by striking out "1,350,000,000" and inserting in lieu thereof "$2,100,000,000."

SEC. 203. (a) The second sentence of section 305 (b) of the National Housing Act is amended by striking out "one year" and inserting in lieu thereof "two years."

(b) Section 305 (b) of such act is further amended by striking out the third sentence and inserting in lieu thereof the following: "The Association shall impose charges or fees for its services under this section, in an amount not to exceed 1 percent of the unpaid principal amount of any mortgage for its commitment and its purchase of such mortgage, with the objective that all costs and expenses of its operations under this section should be within its income derived from such operations and that such operations should be fully self-supporting. Not more than one-half of the charges or fees imposed under the preceding sentence with respect to any mortgage shall be collected at the time of the issuance of the commitment with respect to such mortgage, and the balance of such charge or fee shall be collected at the time of the purchase of the mortgage."

(c) The Federal National Mortgage Association shall take appropriate measures to extend the benefits of section 305 (b) of the National Housing Act, as amended by this section, to the holders of commitments entered into after March 31, 1957, and fulfilled after enactment of the Housing Act of 1957.

SEC. 204. (a) Section 305 (c) of the National Housing Act is amended to read as follows:

"(c) The total amount of purchases and commitments authorized by the President pursuant to subsection (a) of this section shall not exceed $450 million outstanding at any one time."

SEC. 205. Section 305 (e) of the National Housing Act is amended to read as follows:

"(e) Notwithstanding any other provision of this act, the Association is authorized to enter into advance commitment contracts and purchase transactions which do not exceed $350 million outstanding at any one time, if such commitments or transactions relate to mortgages with respect to which the Federal Housing Commissioner shall have issued pursuant to section 213 either a commitment to insure or a statement of eligibility; but such commitments in any one State shall not exceed $35 million outstanding at any one time: *Provided*, That (1) of the total amount of advance commitment contracts and purchase transactions authorized by this subsection, the amount of $175 million thereof shall be available solely for commitments or purchases of mortgages where the management or sales-type cooperative involved is certified by the Federal Housing Commissioner as consumer-sponsored, and (2) of the commitments in any one State, not more than $17,500,000 shall be outstanding at any one time for mortgages with respect to cooperative projects which are not of the type described in clause (1) of this proviso."

SEC. 206. Section 305 (f) of the National Housing Act is amended by striking out "$200,000,000" and inserting in lieu thereof

"$400,000,000," and by inserting before the period a colon and the following: *"Provided further,* That not less than 7.5 percent of the amount authorized in the preceding proviso shall be available for such purchases and commitments with respect to mortgages insured under section 809."

SEC. 207. Section 305 of the National Housing Act is amended by adding at the end thereof a new subsection as follows:

"(h) Notwithstanding any other provision of this Act, the Association may make loans for the construction of any housing project, if (1) such construction advances are insured under this act, (2) the Association has issued a commitment to purchase a mortgage on such housing project, and (3) the Association determines that such financing is not otherwise available on reasonable terms. The Association may impose charges or fees for its services in providing financial assistance under this subsection in an amount not to exceed 1 percent of the principal amount of any loan made or participated in hereunder."

TITLE III—SLUM CLEARANCE AND URBAN RENEWAL

SEC. 301. Section 103 (b) of the Housing Act of 1949 is amended by striking out "$500 million, which limit shall be increased by further amounts of $200 million on July 1 in each of the years 1955 and 1956, respectively," and inserting in lieu thereof "$900 million, which limit shall be increased by further amounts of $250 million on July 1 in each of the years 1957, 1958, 1959, and 1960, respectively."

SEC. 302. (a) The Housing Act of 1949 is further amended by:

(1) Striking out the second sentence of section 103 (a) and inserting in lieu thereof the following: "The aggregate of such capital grants with respect to all the projects of a local public agency on which contracts for capital grants have been made under this title, exclusive of projects referred to in the proviso hereof, shall not exceed 75 percent of the aggregate of the net project costs of such nonexcluded projects: *Provided,* That the aggregate of such capital grants may exceed 75 percent but not 85 percent of the aggregate net project costs of those projects which the Administrator, at the request of a local public agency, may approve on such an 85 percent capital grant basis. A capital grant with respect to any individual project shall not exceed the difference between the net project cost and the local grants-in-aid actually made with respect to the project";

(2) Striking out "one-third" in section 104 and inserting in lieu thereof "25 percent", and inserting before the period at the end of such section a comma and the following: "and, with respect to projects referred to in the proviso in the second sentence of section 103 (a), local grants-in-aid shall not be required in excess of 15 percent of the aggregate net project costs of all projects of the local public agency on which contracts for capital grants have been made on the 85-percent basis";

(3) Inserting before the first semicolon in section 110 (d) the words "to defray expenditures within the purview of section 110 (e) (1) hereof";

(4) Inserting before the period at the end of the first sentence of section 110 (e) a colon and the following: *"Provided,* That with respect to a project for which a contract for capital grant has been executed on an 85-percent basis pursuant to the proviso in the second sentence of section 103 (a), that part of gross project cost under clause (1) of this subsection shall, in lieu thereof, comprise the amount of the expenditures by the local public agency with respect to the following undertakings and activities necessary to carry out such a project:

"(i) Acquisition of land (but only to the extent of the consideration paid to the owner and not title, appraisal, negotiating, legal or any other expenditures of the local public agency incidental to acquiring land), disposition of land, demolition and removal of buildings and improvements, and site preparation and improvements, all as provided in paragraphs (1), (2), (3), (4), and (6) of section 110 (c); and

"(ii) The payment of carrying charges related to the undertakings in clause (i), exclusive of taxes and payments in lieu of taxes, but not beyond the point where such a project is completed;

but shall not comprise the cost of any other undertakings and activities with respect to such a project including, but without being limited to, the cost of surveys and plans, legal services of any kind, and all administrative and overhead expenses of the local public agency"; and

(5) Inserting within the parentheses in the second sentence of section 110 (e) after the words "or is hereafter executed" the following: ", other than a project on which a contract for capital grant is made on an 85-percent basis pursuant to the proviso in the second sentence of section 103 (a)."

(b) Section 314 of the Housing Act of 1954 is amended by striking out "two-thirds" in the second sentence and inserting in lieu thereof "75 percent."

(c) Notwithstanding the provisions of any existing contract either for a capital grant for a project under title I of the Housing Act of 1949, as amended, or for a demonstration grant for a project under section 314 of the Housing Act of 1954, as amended, under which final settlement and payment in full of the grant has not been made, the Administrator may extend financial assistance for such project on the basis of a 75-percent grant as provided in section 103 (a) of such title I, as amended, or in such section 314, as the case may be, and may issue such procedures, regulations, contract amendments or changes, and other documents as may be appropriate to reflect the revised basis for financing such project.

SEC. 303. Section 106 (e) of the Housing Act of 1949 is amended by striking out "10 percent" and inserting in lieu thereof "15 percent."

SEC. 304. Paragraph (2) of section 106 (f) of the Housing Act of 1949 is amended by striking out the second sentence and inserting in lieu thereof the following: "Such payments shall be made subject to such rules and regulations as may be prescribed by the Administrator, and shall not exceed $100 in the case of an individual or family, or $3,000 in the case of a business concern. Such rules and regulations may include provisions authorizing payment to individuals and families of fixed amounts (not to exceed $100 in any case) in lieu of their respective reasonable and necessary moving expenses."

SEC. 305. Section 110 (b) of the Housing Act of 1949 is amended to read as follows:

"(b) 'Urban renewal plan' means a plan, as it exists from time to time, for an urban renewal project, which plan (1) shall conform to the general plan of the locality as a whole and to the workable program referred to in section 101 hereof and shall be consistent with definite local objectives respecting appropriate land uses, improved traffic, public transportation, public utilities, recreational and community facilities, and other public improvements; and (2) shall be sufficiently complete to indicate such land acquisition, demolition and removal of structures, redevelopment, improvements, and rehabilitation as may be proposed to be carried out in the urban renewal area, zoning and planning changes, if any, land uses, maximum densities, and building requirements.".

SEC. 306. Section 110 (c) of the Housing Act of 1949 is amended by striking out the last two paragraphs and inserting in lieu thereof the following:

"Financial assistance shall not be extended under this title with respect to any urban renewal area which is not clearly predominantly residential in character unless such area will be a predominantly residential area under the urban renewal plan therefor, except that this limitation shall not apply—

"(A) where the urban renewal area contains (i) a substantial number of blighted, deteriorated, or deteriorating commercial or industrial structures and the Administrator and the governing body of the local public agency determine that the redevelopment or rehabilitation of such area for predominantly nonresidential uses is appropriate in connection with the orderly and effective planning and carrying out of urban renewal projects which are subject to the foregoing limitation, or (ii) a substantial number of slum, blighted, deteriorated, or deteriorating dwellings or other living accommodations, the elimination of which would tend to promote the public health, safety, and welfare in the locality involved and such area is not appropriate for predominantly residential uses: *Provided,* That the aggregate of the capital grants made pursuant to this clause (A) shall not exceed 7.5 percent of the total amount of capital grants authorized by this title; or

"(B) where the urban renewal area consists of land within the purview of clause (1) (ii) or (1) (iii) of the first paragraph of this subsection which does not contain a substantial number of blighted, deteriorated, or deteriorating structures but otherwise meets the requirements of clause (A) (i) of this paragraph: *Provided,* That no grants shall be made for projects pursuant to this clause (B), and the loans and outstanding advances to any local public agency pursuant to this clause shall not exceed 2½ percent of the estimated gross project costs of the projects undertaken under other contracts with such local public agency pursuant to this title."

SEC. 307. Section 110 (d) of the Housing Act of 1949 is amended by inserting in the second proviso of the first sentence after the words "under this section 110 (d)" the following: "with respect to any project covered by a Federal-aid contract under this title."

SEC. 308. Section 2 (5) of the United States Housing Act of 1937 is amended by adding the following at the end thereof: "In cases where the public housing agency is also the local public agency for the purposes of title I of the Housing Act of 1949 an administration building included in a low-rent housing project to provide central administrative office facilities may also include sufficient facilities for the administration of its functions as such local public agency, and in such case, the Authority shall require that an economic rent shall be charged for such facilities in such building as are used for the administration of its functions as such local public agency and shall be paid from funds derived from sources other than the low-rent housing projects of such public housing agency".

SEC. 309. There is hereby authorized to be appropriated the sum of $500,000 for a 3-year period, commencing on or after July 1, 1957, to be used by the Housing and Home Finance Administrator for the purpose of providing fellowships in public or private nonprofit institutions of higher education for the graduate training of qualified persons in urban planning and related fields.

TITLE IV—PUBLIC HOUSING

Low-rent housing

SEC. 401. (a) Section 15 (8) (d) of the United States Housing Act of 1937 is amended by inserting before the period a colon and the following: *"Provided,* That the public housing agency may permit any such families to remain as tenants in the project during any period in which it is determined by the public housing agency that there is an inadequate supply of decent, safe, and sanitary dwellings for their use in the locality involved at levels which they can afford, if

UNIVERSITY OF MICHIGAN LIBRARIES

such families pay during any such period rentals equal to at least 20 percent of their net incomes (less the exemptions permitted by section 2 (1) of this act) or rentals equal to the rents at which comparable accommodations would be provided by private enterprise unaided by public subsidy, whichever is less".

(b) In order to enable low-rent housing to serve more effectively the needs of large families of low income, the United States Housing Act of 1937 is amended by deleting the second and third sentences of paragraph (1) of section 2, and substituting therefor the following: "The dwellings in low-rent housing as defined in this Act shall be available solely for families whose net annual income at the time of admission, less an exemption of (a) $100 for each minor or adult dependent member of the family having no income, and (b) not to exceed $600 of the income of each member of the family other than the principal wage earner, does not exceed five times the annual rental (including the value or cost to them of water, electricity, gas, other heating and cooking fuels, and other utilities) of the dwellings to be furnished such families. For the sole purpose of determining eligibility for continued occupancy, a public housing agency may allow, from the net income of any family, an exemption (a) for each minor member of the family (other than the head of the family and his spouse) of either $100 or all or any part of the annual income of such minor, and (b) of $100 for each adult dependent member of the family having no income, and (c) not to exceed $600 of the income of any other member of the family other than the principal wage earner.".

(c) (1) Section 101 (c) of the Housing Act of 1949 is amended by striking out "or for annual contributions or capital grants pursuant to the United States Housing Act of 1937, as amended, for any project or projects not constructed or covered by a contract for annual contributions prior to August 1, 1956,".

(2) Section 10 (1) of the United States Housing Act of 1937 is amended by striking out the following: "*Provided further*, That no such new contract for annual contributions for additional units shall be entered into except with respect to low-rent housing for a locality respecting which the Housing and Home Finance Administrator has made the determination and certification relating to a workable program as prescribed in section 101 (c) of the Housing Act of 1949, as amended:".

(d) Section 15 (5) of the United States Housing Act of 1937 is amended by striking out in the first sentence the figure "$1,750" and inserting in lieu thereof "$2,000", and by striking out the figure $2,250".

(e) Section 15 (5) of the United States Housing Act of 1937 is amended by adding at the end thereof a new sentence as follows: "Every contract made pursuant to this act for loans, annual contributions, or capital grants, with respect to projects for which the preparation of plans, drawings, and specifications has not been started or contracted for prior to the date of enactment of the Housing Act of 1957; shall require that such plans, drawings, and specifications follow the principle of modular measure in every case deemed feasible by the public housing agency, in order that the housing may be built by conventional construction, on-site fabrication, factory pre-cutting, factory fabrication, or any combination of these construction methods."

Housing for disaster victims

Sec. 402. (a) The Public Housing Commissioner is hereby authorized to enter into contracts on a standby or emergency basis, without regard to the provisions of section 3709 of the Revised Statutes, for emergency production and delivery, or purchase and delivery, of housing and equipment in the event of a major disaster as defined in section 2 (a) of the act of September 30, 1950 (64 Stat. 1109), as amended. Such housing and equipment may be made available to local public agencies, the American Red Cross, or other nonprofit relief organizations, without charge, to provide shelter for victims of any such disaster. The Commissioner is also authorized and directed to prepare procedures for emergency mobilization of local services and property to provide emergency shelter including the preparation of sites for emergency dwellings.

(b) Notwithstanding the provisions of any other law except provisions enacted hereafter which refer specifically to this act, the Commissioner is authorized to use for the purposes of this section not to exceed $5 million of funds made available by section 20 of the United States Housing Act of 1937. All receipts of the Public Housing Administration under this section and any reimbursements to the Administration pursuant to the provisions of the act of September 30, 1950 (64 Stat. 1109), as amended, shall be applied to repayment of the note or notes of the Public Housing Administration executed and delivered in connection with funds obtained pursuant to said section 20, and the Secretary of the Treasury shall credit as a payment upon such note or notes an amount equal to the amount certified by the Commissioner as having been expended under this section and which the Administration has not repaid out of such receipts or reimbursements.

Disposition of war housing projects

Sec. 403. (a) Notwithstanding the provisions of section 614 of the act entitled "An act to expedite the provision of housing in connection with national defense, and for other purposes," approved October 14 1940, as amended (42 U. S. C. 1521, and the following), the Housing and Home Finance Administrator is authorized to sell and convey war housing project CONN–6029 to the housing authority of the town of Wethersfield, Conn., pursuant to the provisions of section 810 of the Housing Act of 1954, as amended, until midnight of July 1, 1957.

(b) Notwithstanding any other provision of law, the Housing and Home Finance Administrator is authorized and directed to sell and convey to the Housing Authority of the City of Las Vegas, Nev., for a total price of $452,200, all of the right, title, and interest of the United States in and to the housing project known as Kelso-Turner (NEV–26021) located in the city of Las Vegas, Nev. Five percent of the purchase price shall be paid at the time of closing and the balance of the purchase price shall be secured by a mortgage and shall be paid in equal annual installments within 20 years from the date of sale with the right of prepayment of all or any part thereof. The unpaid balances shall bear interest at the rate of 4½ percent per annum. The Administrator may impose such other terms and conditions as he may deem necessary or desirable. The Administrator shall make no payments in lieu of taxes with respect to the project authorized to be conveyed hereunder for any tax year or portion thereof subsequent to the date of sale. Any sale pursuant to this authorization shall be made within 3 months after the date of enactment of this act.

(c) (1) Notwithstanding the provisions of sections 607 and 614 of the act entitled "An act to expedite the provision of housing in connection with national defense, and for other purposes," approved October 14, 1940, as amended (42 U. S. C. 1521 and the following), or any other law, the Housing and Home Finance Administrator shall convey to the State of Louisiana all right, title, and interest of the United States in and to the projects identified as LA–16011 and LA–16012, constructed under the provisions of said act on real property constituting a part of the grounds of the Central Louisiana Hospital for the Insane leased from the State of Louisiana. Such conveyance shall be made in consideration of the payment of $300,000 by the State of Louisiana in three equal annual installments.

(2) Payments in lieu of taxes, pursuant to section 306 of such act of October 14, 1940, shall be made only for the pro rata period of the tax year preceding the date of delivery of possession of such projects to the State of Louisiana.

(3) The provisions of this subsection shall be effective only if the first installment is paid within 60 days after the date of enactment of this act.

(d) Notwithstanding any other provision of law, the Housing and Home Finance Administrator is authorized and directed to sell and convey to the city of Layton, Utah, for a total purchase price of $580,000, all of the right, title, and interest of the United States in and to the housing project known as Verdeland Park (UTAH–42015) located in the city of Layton, Utah. The purchase price shall be secured by a mortgage which need not be a general obligation of the city, and shall be paid in equal annual installments within 10 years from the date of sale with the right of prepayment of all or any part thereof. No downpayment shall be required, and the unpaid balances shall bear interest at the rate of 4½ percent per annum. The Administrator may impose such other terms and conditions as he may deem necessary or desirable. The Administrator shall make no payments in lieu of taxes with respect to the project authorized to be conveyed hereunder for any tax year or portion thereof subsequent to the date of sale. The provisions of this subsection shall be effective only if the conveyance is made within 90 days after the date of the approval of this act.

TITLE V—MILITARY HOUSING

Sec. 501. Section 803 (a) of the National Housing Act is amended by striking out "June 30, 1958" and inserting in lieu thereof "June 30, 1959."

Sec. 502. Section 803 (b) of the National Housing Act is amended by striking out the first sentence of paragraph (3) and inserting in lieu thereof the following: "The mortgage shall involve a principal obligation in an amount—

"(A) not to exceed an average of $16,500 per family unit for such part of such property or project (including ranges, refrigerators, shades, screens, and fixtures) as may be attributable to dwelling use, less the Commissioner's estimated value of any usable utilities within the boundaries of the property or project owned by the United States and not provided for out of the proceeds of the mortgage: *Provided*, That should the financing of housing to be constructed pursuant to a single invitation for bids be accomplished by two or more mortgages, the principal obligation of any single mortgage may exceed an average of $16,500 per family unit if the sum of the principal obligations of all mortgages for such housing does not exceed an average of $16,500 per family unit: *Provided further*, That the estimated apportioned cost of any such family unit (including the value of usable utilities as hereinabove stated) shall not exceed $25,000; and

"(B) not to exceed the bid of the eligible bidder with respect to the property or project under section 403 of the Housing Amendments of 1955, which bid shall bear a reasonable relation to the Commissioner's estimate of the replacement cost of the property or project when the proposed improvements are completed: *Provided*, That the Commissioner's estimate of replacement cost may include the cost of the land, the physical improvements, and the utilities within the boundaries of the property or project less the estimated value of any usable utilities within the boundaries of the property or project owned by the United States and not

provided for out of the proceeds of the mortgage.".

TITLE VI—MISCELLANEOUS

College housing

SEC. 601. (a) Section 401 (d) of the Housing Act of 1950 is amended by striking out "750,000,000" and inserting in lieu thereof "$950,000,000", and by inserting before the period at the end thereof a colon and the following: "Provided further, That the amount outstanding for hospitals, referred to in clause (3) of section 404 (b) of this title, shall not exceed $25,000,000".

(b) Section 404 (b) of such Act is amended to read as follows:

"(b) 'Educational institution' means (1) any educational institution offering at least a 2-year program acceptable for full credit toward a baccalaureate degree, including any public educational institution, or any private educational institution no part of the net earnings of which inures to the benefit of any private shareholder or individual, (2) any educational institution beyond the level of high school (no part of the net earnings of which inures to the benefit of any private shareholder or individual) the courses of which are designed to train persons to carry on the vocation of clergyman of a religious denomination, (3) any hospital operating a school of nursing beyond the level of high school approved by the appropriate State authority, or any hospital approved for internships by recognized authority, if such hospital is either a public hospital or a private hospital, no part of the net earnings of which inures to the benefit of any private shareholder or individual, (4) any corporation (no part of the net earnings of which inures to the benefit of any private shareholder or individual) (A) established by any institution included in clause (1) of this subsection for the sole purpose of providing housing or other educational facilities for students or students and faculty of such institution without regard to their membership in or affiliation with any social, fraternal, or honorary society or organization, and (B) upon dissolution of which all title to any property purchased or built from the proceeds of any loan secured under this title will pass to such institution, and (5) any agency, public authority or other instrumentality of any State established for the purpose of providing or financing housing or other educational facilities for students or faculty of any public educational institution included in clause (1) of this subsection, but nothing herein contained shall require an institution included in clause (1) of this subsection to obtain loans through any instrumentality included in this clause of this subsection.".

Voluntary home mortgage credit program

SEC. 602. Section 610 (a) of the Housing Act of 1954 is amended by striking out "June 30, 1957" and inserting in lieu thereof "June 30, 1960".

Farm housing research

SEC. 603. (a) The Housing and Home Finance Administrator is authorized and directed to undertake and carry out a program, in the manner provided in subsection (b), for the study of farm housing in the United States. Such program shall be designed to assist in the improvement of farm-housing conditions in the United States by developing data and information on—

(1) the adequacy of existing farm housing;

(2) the nature and extent of current and prospective needs for farm housing, including the needs for financing and improved design, utility, and comfort, and the methods by which such needs might best be satisfied;

(3) the problems faced by farmers in purchasing, constructing, improving, altering, repairing, and replacing farm dwellings;

(4) the interrelation of farm-housing problems and the problems of housing in urban and suburban areas; and

(5) any other matters bearing upon the provision of adequate housing for the farm population of the United States.

(b) The research, study, and analysis required to carry out the program described in subsection (a) shall be conducted by land-grant colleges established pursuant to the act of July 2, 1862 (7 U. S. C., secs. 301–308), and such research, study, and analysis shall be financed with grants made to such colleges by the Housing and Home Finance Administrator on such terms, conditions, and standards as may be specified in regulations prescribed by him.

(c) The authority of the Housing and Home Finance Administrator to make grants under subsection (b) shall expire June 30, 1959; and the total amount of such grants shall not exceed $300,000 during either of the fiscal years ending June 30, 1958, and June 30, 1959.

(d) There are authorized to be appropriated such sums as may be necessary to carry out this section.

Exchange of data

SEC. 604. The Housing and Home Finance Administrator shall exchange data relating to housing and urban planning and development with other nations where such exchange is deemed by him to be beneficial to the programs of the Housing and Home Finance Agency.

Mr. SPARKMAN. Mr. President, with reference to the pending measure, as the Senate begins its debate on H. R. 6659, as that bill was amended by the Senate Banking and Currency Committee, I think it appropriate to make a general statement.

As chairman of the Subcommittee on Housing, I take this opportunity to thank the members of the subcommittee and the Committee on Banking and Currency, as well as the staffs of each committee, for their cooperation and efforts in preparing this year's housing legislation.

For the past year or more, the housing industry has felt the effects of the administration's hard money policy. Housing starts have rapidly declined—declined to a level far below that necessary to meet the housing needs of the American people. All the so-called indirect credit controls which have been applied to credit have had a disproportionately severe effect upon housing. We have an unsatisfied demand for housing at this very moment, and we shall be faced with an unprecedented reduction in our existing inventory as other new programs involving demolition of existing housing get underway.

There is no doubt that we have come a long way in assisting American families to obtain decent housing through federally encouraged housing programs. Since the inception of the National Housing Act in 1934, the Federal Housing Administration has insured mortgages secured by more than 5.1 million dwelling units. I should like to point out that this program has not, in its overall effect, cost the Government 1 cent.

The same statement can be made in connection with all other federally underwritten housing programs administered by the Housing and Home Finance Agency, with the exception of the public housing, and the urban renewal and slum clearance programs. As a matter of fact, I contend that if all these housing programs were wiped from the statutes today, the Federal Government would not have lost any money in these housing ventures, but, on the other hand, would in the end earn a slight profit. Again, with the exception of the two programs mentioned, it is my contention that the Government's housing programs, including the Federal National Mortgage Association, can accurately be defined as a type of investment. And, as a matter of fact, it can be argued that the public housing and urban renewal programs, which utilize capital grants, are solid investments in America's future.

I am sure that all my colleagues have noted an increase in the volume of correspondence coming to their offices in connection with housing legislation. Between the dates of March 18 and April 3, 1957, the Housing Subcommittee held hearings at which nearly 1,000 pages of testimony were recorded. In addition, some 340 reports, statements and letters were received. It is evident to me, after hearing the testimony and reading the various reports received, that the housing needs of the Nation are not being met.

In preparing this year's housing bill, every proposal received was carefully considered by the subcommittee during 4 days of executive session, and later by the full committee in 1 day of executive session.

The proposed Housing Act of 1957 is divided into six titles. Title I covers the FHA insurance programs established by the National Housing Act. Title II provides for changes in the operations of the Federal National Mortgage Association. Title III contains a number of improvements in the slum clearance and urban renewal programs. Title IV provides some technical amendments for the low-rent public housing program. Title V extends and provides for clarifying amendments to the military-housing program. And title VI contains miscellaneous provisions, including college housing, the voluntary home mortgage credit program; farm housing research, and 1 or 2 other subjects.

TITLE I—FEDERAL HOUSING ADMINISTRATION—GENERAL

The provisions in title I of the bill cover the insurance programs administered by the Federal Housing Administration. With few exceptions, the provisions in this title deal with minor technical amendments designed to facilitate and clarify the administrative functions and operations of the FHA. In addition, this title contains provisions to delete obsolete sections of the National Housing Act.

TWO-YEAR PERIOD FOR INVALIDATING TITLE I CLAIMS

The bill amends the title I home-improvement program to establish a 2-year statute of limitations, from the date the lender's claim is paid by the FHA. During this period, the FHA may demand the return of claims paid and cancel the insurance on the grounds of technical ineligibility. Under existing law, there is no statute of limitations, and the Federal Housing Commissioner can require a lender to repurchase a title I loan because of lack of eligibility for insurance any time after the claim has been paid.

UNIVERSITY OF MICHIGAN LIBRARIES

Lenders are in many instances forced to create contingent reserves to protect themselves against this contingency. Some reasonable period should be placed on the time within which FHA may require lenders to repurchase a title I loan. Therefore, this bill proposes to amend the title I program so as to provide that the FHA will have 2 years after the claim has been paid to investigate the case for matters of eligibility. After that period, the claim may be considered as final and incontestable unless it is established that the lender has been guilty of fraud or misrepresentation.

OBSOLETE FARM HOUSING PROVISION

In 1954, officials of the Federal Housing Administration advised the Congress that a provision pertaining to the insurance of mortgages on farm properties had been virtually unused. Therefore, the Housing Act of 1954 amended the provision to provide that no mortgages could be insured under this section after the effective date of the 1954 act, except pursuant to commitments issued on or before such date. There are no outstanding commitments under this section at the present time, and the committee, therefore, feels that this section is now obsolete, and should be deleted from the National Housing Act.

SECTION 203 (I) MORTGAGES

Under existing law, FHA is permitted to insure mortgage loans secured by properties in small towns and semirural areas without requiring costly site improvements and with minimum construction standards. This program was specifically designed to bring the FHA insurance system into use in areas and by families which were not served by the mass homebuilding industry. Pursuant to section 203 (i) of the National Housing Act, the maximum mortgage amount is established at $6,650, which amount would permit the purchase of a $7,000 house for a downpayment of $350. Evidence brought to the attention of the committee this year showed that construction costs have been steadily rising and that the maximum mortgage amount handicapped this useful program in many areas of the country. In order to remedy this situation and to stimulate low-cost housing, the bill raises the maximum mortgage amount from $6,650 to $8,000. Under the present downpayment required by the FHA, this will permit the purchase of an $8,400 house with a downpayment of approximately $400.

MAINTENANCE OF FORECLOSED PROPERTIES AND TERMINATION OF MORTGAGE INSURANCE PREMIUMS

Existing law does not make any provision for the maintenance and care of properties on which foreclosure action has been initiated by the mortgagee and which properties will eventually fall into the hands of the FHA. In many instances, from 18 months to 2 years elapse before the title to the property is vested in the FHA. During this period, maintenance is required to keep the property in good repair. This bill permits the FHA to authorize mortgagees to make small expenditures for the protection of properties securing insured loans commencing with the beginning of foreclosure proceedings and continuing until title passes to the FHA. It is felt that such a provision will protect the property from vandalism and damage by the elements and, in effect, maintain the property in good repair for transfer to the FHA.

This section of the bill would also permit termination of the mortgagee's obligation to pay mortgage insurance premiums when the mortgagee files his application for debentures. Under existing law, mortgagees are required to pay insurance premiums up to the date of acceptance of title by the FHA.

CORRECTING OBSOLETE PROVISIONS OF FHA DEBENTURE INTEREST RATE

In 1954, a provision was added to the National Housing Act which provided that the debenture interest rate, with respect to any section of the act, shall be fixed by the Commissioner, with the approval of the Secretary of the Treasury, in an amount not in excess of an annual rate of interest determined by the Secretary by estimating the average yield to maturity on the basis of daily market quotations of prices during the calendar month next preceding the establishment of such rate of interest on all outstanding marketable obligations of the United States having a maturity date of 15 years or more from the first day of such next preceding month, and by adjusting such average yield to the nearest one-eighth of 1 percent. In conformity with this provision, a debenture interest rate was established in December 1956 at 3¼ percent. In sections 204, 207, and 803 of the National Housing Act, there remain references to the former maximum rate of 3 percent per annum. Therefore, there is a contradiction in the law as it exists today. While there is no legal difficulty, there has been a practical problem resulting from the seeming conflict of the section added in 1954 and the wording of the three other sections mentioned above. The committee is advised that section 224, added in 1954, is considered as the controlling provision. Therefore, this bill removes the point of confusion and expressly conforms the interest rate formula added in 1954 to all sections of the act.

Mr. President, I may interpolate at that point to say that this is a relatively small program, but it is one of the very best in the whole bill. It is one that applies to low-cost housing, particularly in rural and semirural areas, at a time when the cost of housing has been steadily mounting.

MORTGAGE AMOUNT INCREASES UNDER SECTION 207 (RENTAL HOUSING)

Under section 207 of the National Housing Act, the FHA Commissioner is authorized to insure a rental housing mortgage not to exceed $2,250 per room, or $8,000 per unit. Discretionary power is vested in the Commissioner to raise the per room limit by $1,000 in high-cost areas, and an additional amount in the case of an elevator-type structure. However, the additional room cost may not be added in high-cost areas if the unit contains less than four rooms. The bill provides an amendment to remove this prohibition against application of the high-cost allowance, in order that the $1,000 per room may be added to each room in a rental unit in a high-cost area, regardless of the number of rooms in the unit.

Ever-increasing costs of construction account for very little rental housing being provided in recent years. One of the major reasons for this has been the inability of mortgagors to obtain adequate mortgages. Either the mortgagor must invest substantial sums of money in the rental property, which may take some time to recover, or, as has been more typical, rental projects are simply not built. In order to stimulate this program and to provide greater incentive in the production of rental housing, the committee added this amendment, believing that it will make this program attractive, particularly in high-cost areas.

Furthermore, the bill adds a special provision to 207 rental housing for elderly persons to permit units for occupancy by single persons as well as families, and increases the maximum mortgage amount from $8,100 to $8,400 per unit where the mortgage is to finance an elevator-type rental housing project to be used and occupied entirely by elderly persons.

Mr. LAUSCHE. Mr. President, will the Senator yield for a question?

Mr. SPARKMAN. I am glad to yield to the distinguished Senator from Ohio, a member of our committee.

Mr. LAUSCHE. As I read the provision, the allowable sum per room is now $2,250, and the bill contemplates raising that from $2,250 to a level of $3,250? I may be in error about that. I merely ask the question for information.

Mr. SPARKMAN. The Senator is correct, in the high-cost areas only.

Mr. LAUSCHE. Therefore, the bill would provide insurance of mortgages in the construction of rental housing at a cost per room of not to exceed $3,250.

Mr. SPARKMAN. The Senator is correct. The Senator, I am sure, noticed that in my remarks I tried to stress one thing we have been trying to do, which is to remedy a situation wherein we have had practically no rental housing built in the past 2 or 3 years because of the increase in the cost of housing. We are hoping by this action to stimulate production of rental housing.

REPEALING OBSOLETE REFERENCE

The bill repeals section 207 (q) of the National Housing Act, which has become obsolete by the enactment of sections 213 and 306 (e). The reference in section 207 (q) to "paragraph numbered (2) of subsection (c) of this section" is an obsolete reference to a repealed provision.

ELIGIBILITY OF EXISTING CONSTRUCTION OF SECTION 213—COOPERATIVE HOUSING

Pursuant to existing law, the FHA is permitted to insure mortgages secured by cooperative housing projects so long as the mortgage is secured by new construction. Many cooperative groups could acquire suitable existing housing if purchase money could be obtained with the aid of a Government-insured mortgage. Consequently, this bill amends section 213 of the National Housing Act to permit existing structures to be eligible as security for a mortgage under this

UNIVERSITY OF MICHIGAN LIBRARIES

program. The mortgage amount on existing projects is to be based upon an FHA estimate of value rather than the FHA estimate of replacement cost as is the case with new construction of section 213 projects. While in the case of existing properties the mortgage should be predicated on the value and not solely on replacement cost, it is recognized that the value determination should take account of the fact that the property is purchased as a cooperative for continued use and occupancy rather than as an income-producing investment. The usual technique used in the valuation of rental property, therefore, should be modified accordingly.

In this connection, the committee expects FHA to take steps to assure that the consumer's interest is protected and that the insurance on existing structures is used only by groups whose member-stockholders are occupants or prospective occupants of the project, or to representatives of nonprofit corporations created to facilitate transfer of such projects to bona fide consumers.

TERMINATION OF MORTGAGE-INSURANCE PREMIUMS WHERE FHA DOES NOT ACQUIRE FORECLOSURE PROPERTY

Under existing law, FHA is authorized to permit the termination of the mortgagee's liability for payment of mortgage-insurance premiums in those cases where the mortgagee forecloses on the mortgaged property but informs the FHA Commissioner that it does not intend to convey the property to FHA in exchange for debentures. Existing law which applies only to individual home mortgages insured under section 203 of the National Housing Act permits the mortgagee to terminate subsequent mortgage-insurance premiums upon such notification. This bill applies the same principle to other individual home mortgages insured under sections 213, 220, and 221 of the National Housing Act.

TRANSFERABILITY OF FHA INSURANCE FUNDS

Provisions in the National Housing Act now provide authority for the FHA Commissioner to transfer moneys to and from various insurance funds. However, such authority does not extend to the section 221 housing insurance fund and the servicemen's mortgage insurance fund. The bill would amend that section providing for the transferability of the various insurance funds in order to bring the section 221 housing insurance fund and the servicemen's mortgage insurance fund within the purview of that provision.

AMENDMENTS TO FHA SECTION 221

This bill amends section 221 of the National Housing Act in order to make the benefits of that section available to additional families and individuals who have not enjoyed an equal opportunity to obtain decent housing under other federally encouraged housing programs. Under existing law the benefits of section 221 are available only to persons displaced by urban renewal activities. Section 221 provides FHA insurance of mortgages with no downpayment except $200, which may include settlement costs; a 40-year maturity for single-family dwellings; and mortgage insurance up to 100 percent of value on multifamily rental projects if the mortgagor is a nonprofit organization.

This bill amends section 221 by designating five needy segments of our population who may obtain mortgage insurance under the provisions of section 221. These segments are: First, persons affected by urban renewal activities—the group now covered by existing law; second, persons of moderate income—defined in the bill as an individual or family whose income is not sufficient to rent new privately financed housing with total monthly expenditures of 20 percent of the normal stable income of such individual or family; third, persons whose inability to obtain adequate living accommodations in privately financed housing is attributable to race, creed, or color; fourth, elderly persons—defined in the bill as a single person 60 years of age or over, or a family the head of which, or his spouse, is 60 years of age or over; and, fifth, persons having 5 or more dependents.

In addition to amending section 221 to cover these groups, the bill would establish a new maximum interest rate of 4 percent on mortgages insured under this section, and also would increase the maximum mortgage limit to $12,500—or $15,000 in high-cost areas.

A further amendment would make the mortgage-insurance provisions of section 221 applicable to 2-, 3-, and 4-family dwellings. At the present time as stated above, only single-family dwellings or multifamily rental projects may now be insured under section 221. The bill as reported would permit the insurance of a 2-, 3-, or 4-unit building if the owner is an occupant of the property. The FHA Commissioner would be required to prescribe procedures necessary to secure a priority in the remaining units to eligible families.

I do not believe anyone will argue that the groups to be served by this amendment do not need better and more adequate housing. At the same time, it is becoming obvious that the need of these groups for better housing is increasing at a more rapid pace than any other segment of our population. An alarming number of families can expect to be displaced as a result of the slum-clearance and urban-renewal program and the huge new Federal roads program. A most frustrating situation confronts these families of moderate income; those whose earnings range between $3,500 and $5,000 per year. In that income range, adequate housing is not always available within their income. Families of minority groups have many difficulties, regardless of income, in obtaining housing. Elderly persons who are becoming a proportionately larger share of our population are forced to live in shamefully substandard dwellings to an extent which disturbs our national conscience. The plight of larger families, especially those at lower- and mid-mile-income levels, is becoming desperate.

FHA-INSURED LOANS ON HOUSING SOLD BY GOVERNMENTAL AGENCIES

The bill amends section 223 (a) of the National Housing Act to make it possible for housing sold to servicemen with financing under section 223 to receive the benefits of mortgage-insurance provisions contained in section 22, the servicemen's mortgage-insurance program.

ADVISING HOME BUYER OF FHA ESTIMATE OF REPLACEMENT COST

Pursuant to existing law, the FMA is required to furnish an estimate of value to the home buyer. Where the law bases the amount of the mortgage upon replacement cost, FHA's estimate of value is sometimes less than the amount of the mortgage based upon replacement cost. This situation has in many instances created a misunderstanding between the home buyer, the mortgagee, and the FHA. The bill, therefore, amends section 226 of the National Housing Act to allow the FHA to furnish an estimate of replacement cost to the home buyer, in lieu of an estimate of value, in those cases where the law bases the mortgage upon replacement cost.

Mr. GORE. Mr. President, will the Senator yield?

Mr. SPARKMAN. I am glad to yield.

Mr. GORE. Did the committee give any consideration to writing into the bill a prohibition against discounts?

Mr. SPARKMAN. I may say to the distinguished Senator from Tennessee that the subcommittee did write a provision in the bill directing the Commissioner of Housing and the Administrator of Veterans' Housing to set up methods of controlling and regulating the discount practice. The full committee struck out the provision, largely on the ground that the bill as it passed the House contains a provision relating to that matter.

I think I can safely say we were not pleased with the language the subcommittee sought to write into the bill or the language the House had written into it. Since language on the subject is already in the House bill, the whole matter will be in conference, and it was the hope that between the time the bill clears the Senate and the time the conference meets, we will be able to work out satisfactory language as between the two.

The language was not left out because we did not wish to have some such provision in the bill; it was simply because we felt that we would have a more flexible bill by leaving it out of our bill, since the House bill already contained language which would throw the whole matter into conference and permit us to write in any kind of reasonable provision.

Mr. GORE. Mr. President, will the Senator yield further?

Mr. SPARKMAN. Yes. I am glad to yield.

Let me say to the Senator, lest he misunderstand me, that I am strongly of the opinion the method by which these discounts have been exacted from our people has been wrong, that it is a vicious practice, and that certainly it ought not to be allowed to exist. I believe I can say that our whole committee felt rather sympathetic to that viewpoint.

Mr. GORE. I fully share the opinion the Senator has just stated. I wish to point out to the Senator, and to the members of the committee, that unless something is done effectively to restrain,

regulate, or prohibit—the latter being my preference—discounts on Government-guaranteed and Government-insured housing loans, then we will provide no real benefit in the long run to the home builder by lowering the amount of downpayment, because the amount will eventually be added to the discount, as it grows larger and larger under the tight-money policy.

Mr. SPARKMAN. I will say to the distinguished Senator from Tennessee that I surely have no quarrel with the statement he has made. I repeat, as I have said many, many times, it is a vicious practice. I think in large part it has simply resulted by taking advantage of a situation which could be taken advantage of because of the money situation.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. HUMPHREY. Are we to understand that the vote in the full committee related to the language which, I believe, is in section 603 of the subcommittee's bill, and is not to be interpreted as being in opposition to some kind of regulation or control over discounting practices, but rather is to be interpreted as a desire to give the privilege or the right to the conference committee to prepare language which will meet the objective of restraining, controlling, or prohibiting the discounting practice presently engaged in? I merely wish to have the record clear on that point.

Mr. SPARKMAN. I agree with the statement of the distinguished Senator from Minnesota.

Mr. HUMPHREY. So when the bill comes back from conference we can look forward to seeing at least language as good as the House language, and possibly better, in terms of its coverage of the practice of discounting.

Mr. SPARKMAN. I will state my own personal view to the effect that that statement is correct, and I think I am perfectly safe in saying that was the attitude of the full committee.

I wish to be perfectly frank. It is not easy to write this kind of provision. This is not the first time we have wrestled with this problem. It was before us in 1953. At that time the Administrator of Veterans' Affairs issued regulations prohibiting any discount whatever. He had to scrap it right away. It is quite difficult to write language which will prohibit discounting. However, the House has made an effort to do so. The subcommittee has made an effort. The Senator from Minnesota has referred to the subcommittee language. I should be glad to have the Senator read into the RECORD the language upon which the subcommittee agreed.

Mr. HUMPHREY. The language is found on page 45 of the subcommittee print, in section 603, under the heading "Discount Control." The language is as follows:

DISCOUNT CONTROL

SEC. 603. With respect to housing built or sold with assistance provided under the National Housing Act, or title III of the Servicemen's Readjustment Act of 1944, the Federal Housing Commissioner and the Administrator of Veterans' Affairs, respectively, are specifically authorized and directed to issue such regulations, applicable uniformly to all classes of mortgagees, as they determine desirable for the purpose of limiting the charges and fees imposed upon the builder, veteran, or other purchaser in connection with the financing of the construction or sale of such housing, whether or not such charges were or are imposed in connection with the financing assisted by the Federal Government, and no loan shall be insured or guaranteed under such acts unless the mortgagee certifies that it has not imposed upon the builder, veteran, or other purchaser any charges or fees in connection with the financing of the construction or sale of such housing in excess of the charges or fees permitted under such regulations for such purposes as are applicable to the housing involved.

As I understand, all that legal language says is that the Administrator of Veterans' Affairs and the Federal Housing Commissioner shall draw up such regulations as they deem advisable to control discounting. That is really what it says, is it not?

Mr. SPARKMAN. Perhaps I should ask the Senator from Minnesota. I wonder if he recognized that language. Perhaps I can refresh his recollection. It is taken, in haec verba, from a bill introduced by the Senator from Minnesota, Senate bill 88.

Mr. HUMPHREY. I had hoped by that bill to curb this practice, but I agree with the Senator's observations as to the difficulty of finding the proper language to make such a provision effective.

An effort was made also in that bill—S. 88—to restrict interest payments on veterans' housing to 4½ percent. I think the most important objective is to keep the downpayment in line with the ability of purchasers to pay, and to control discounting, because no matter how much we control interest, if the discounting practice is permitted to run wild, interest charges run up anyway. Discounting is merely another way of foisting additional charges upon the purchaser.

Mr. GORE. Mr. President, will the Senator yield?

Mr. SPARKMAN. Let me make one observation, and then I shall be glad to yield to my friend from Tennessee. Inasmuch as the Senator from Minnesota has just read the language which the subcommittee proposed to the full committee, I think it might be of interest if I were to read what is in the House bill, and what will, at all events, be in conference.

I read from page 15, in the House language:

On completion of the study—

That relates to the study previously provided for under the National Housing Act—

the Housing and Home Finance Administrator, after consultation with the Federal Housing Commissioner, shall fix reasonable limits on the charges, fees, and discounts imposed upon the builder, seller, or purchaser in connection with the financing of the construction or sale of any housing covered by a mortgage insured under the National Housing Act, whether or not such charges, fees, and discounts are imposed in connection with the financing under such mortgage. Such limits may vary in accordance with the terms of the mortgage involved, the geographical area in which the housing is located, and such other pertinent factors as the Administrator deems advisable. As a condition of eligibility for such insurance, the lender shall certify that no charge, fee, or discount has been imposed by it in excess of the limits fixed pursuant to this section. The Administrator shall, on or before April 30, 1958, submit to the President and the Congress a full report on such study including his findings and such recommendations as he may deem appropriate.

So I think the Senator from Tennessee will agree with me that that language throws everything on this subject into conference. We instructed our staff to draft appropriate language to take care of the situation. There was some feeling on the part of certain members of the committee that if we adopted this language, as between this language and the House language, such action might be taken as an acceptance of the principle of discounts being allowed. We did not wish to be bound by any such construction.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. HUMPHREY. I merely wish to make my own position clear. I believe my bill was introduced in January. At least it was early this year.

Mr. SPARKMAN. The number is S. 88. It must have been introduced on the first day of the session.

Mr. HUMPHREY. The idea was to get away from the discount. The question is, how to write such language specifically into the law, in the light of the previous experience to which the Senator has referred, back in 1953, when the Administrator prohibited discounts. We are trying to find language which will encourage the construction of housing and, on the other hand, prohibit discounting. That seems to me to be a sort of sub rosa practice. It is a way of concealing costs by adding to the costs, so that one does not really know what is happening to him until it has happened.

Mr. GORE. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. GORE. As a matter of fact, unless there is some control of the practice of discounting mortgage loans under the housing program, the fixing of an interest rate is almost meaningless, because a 4½ percent loan obtained only at the price of an 8 or 10 percent discount is not a 4½ percent loan at all. I warn the able Senator that under a program carefully contrived to bring about higher and higher interest rates, the discount rate will go up unless the Congress takes effective action to prevent it.

I invite the Senator's attention to the fact that only a few days ago the Treasury Department was unsuccessful in refinancing a portion of a maturing $4 billion bond issue, involving bonds which were issued only 3 years ago at 1⅞ percent interest. The Treasury offered to substitute for those bonds 4-year bonds at 3⅝ percent interest or 1-year notes at 3½ percent interest. The effort at refinancing was, I believe, unsuccessful to the extent of 28 percent, which, in layman's language, means that the big-money boys are demanding still higher interest. A higher rate of interest means a higher discount rate under

the present system. The representatives of the people must call a a halt to this reconcentration of the wealth of the country.

Mr. SPARKMAN. Those who the distinguished Senator from Tennessee describes as "the big money boys" should look ahead, and realize that the Government must sell a great many more bonds during the present year.

Mr. GORE. How many billions of dollars in bonds must be refinanced?

Mr. SPARKMAN. If I correctly recall, all told, $78 billion must be refinanced this year.

Mr. GORE. Imagine the impasse to which we have come, when in 3 years' time the interest rate has increased 2 whole points on intermediate-term Government securities.

Mr. SPARKMAN. And the securities still go begging.

Mr. GORE. What will that do to the discount on veterans' home loan mortgages, and FHA mortgages, unless Congress takes effective action? Therefore, in all candor, although appreciating the efforts of the able Senator and of the committee as a whole, I must say I am disappointed that the Committee on Banking and Currency has not brought to the Senate a firmer recommendation, with effective language, on this point.

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. SPARKMAN. Let me say this, first of all. I have tried to explain why it was that the full committee did not approve the language the subcommittee wrote into the bill in an effort to make the bill strong enough so that it would stand up.

With reference to the other matters, I am delighted that the Senator from Tennessee is a member of the committee which is about to make a study of the whole interest program, and the manner in which the Treasury, as a result of its own action, has been caught in its own trap, so to speak.

Mr. GORE. The mouse has been playing with the cat, but the cat now has the mouse, and the cat has not been playing for fun.

Mr. SPARKMAN. The Senator is correct.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. CLARK. I wonder if the Senator from Alabama will not agree with me that the troubles with respect to the discount problem—and the fees and the charges involved, as a result of which the builder cannot get anything like the face amount of the mortgage he is forced to pay off—are due in large part to administration policies?

First of all, the administration's housing officials want to follow the private money market, instead of stabilizing it. Secondly, FNMA wants to make money for the Government, so that it can show a profit.

My position is completely in accord with that of the distinguished Senator from Tennessee and the Senator from Minnesota, that we ought to try to control these discount practices. A number of us on the committee felt that way. Unfortunately our views did not prevail in committee.

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. CAPEHART. I merely wish to say that I, too, would like to see lower prices throughout our economy. Prices are entirely too high. That goes for automobiles and clothing and everything else we buy. I do not know that interest rates are any higher, in proportion, than anything else. The fact remains that throughout the country we see new homes being built and occupied. We see new automobiles, we see more and more cars on the highways, and we see people wearing new clothing.

Likewise there has been an increase in bank deposits and savings accounts. In an article published in the newspapers this morning I notice that the savings of the people in April were the largest in the history of the Nation. There are more people working today than ever before. The whole economy of the Nation is prospering. It is pretty hard to find anything wrong. Of course, there are some soft spots here and there. Of course there are some people who are still not getting, perhaps, their full fair share. Anyone with eyes can see what is going on all over the country.

I do not know how we are going to handle the interest problem in the face of such a demand for money, unless we want to have it controlled by the Government. Of course, if we want price controls and wage controls and rent controls, that is one thing; and, let me say, that if inflation continues over a period of months or years, perhaps some day we will have to have controls. I say that because I think the greatest danger facing this Nation is inflation. It is continuing to rise.

It must be remembered that for a while the present administration was able to hold the cost of living at about where it was 4 or 5 years ago. Then, starting about a year ago, inflation started going up again. During the past year it has gone up about four points. If private industry does not control it, some day it will get completely out of hand.

I do not know how we can control interest rates without controlling other things. I do not know how we can control anything without controlling interest rates. The matter of inflation is all rolled up into a ball. But the reason for all these things is the fact that the people have money and are spending their money, and more of them are going on vacations, and more are building homes, and more are getting more of everything else. I do not know how we can do anything about it unless we legislate along certain lines.

Mr. GORE. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. GORE. The able Senator from Indiana started out by saying that the interest rate had gone up comparably, as I recall his statement, with the increase in prices of other things. As a matter of fact, the Government interest rate on 3- to 5-year Government obligations has gone up more than 100 percent since 1950. This has not occurred by accident. It is the result of deliberate policy. It is not by accident that income from interest increased 27 percent from 1953 to 1956, while the farm income decreased 12 percent during the same period.

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. GORE. It is not by accident that the income from dividends has skyrocketed. It is not by happenstance that this has come about. It has been the deliberate policy of the administration. They have not been permitting it; they have been dictating it and leading it in that direction. Unless Congress calls a halt to it, the veterans will have to pay larger discounts. There will be fewer housing starts because of the burden of higher interest rates and larger discounts.

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. CAPEHART. There will also be larger increases in wages and increases in earnings and increases in dividends and increases in everything, because we have an inflationary trend at the moment.

The Senator from Tennessee makes some very broad charges. He does not prove any of them, though.

Mr. GORE. What have I not proved? I have given the Senator the interest rate.

Mr. CAPEHART. The Senator said that the administration was deliberately doing it.

Mr. GORE. Does the Senator say it was by accident?

Mr. CAPEHART. It is the general trend of inflation in the country.

Mr. GORE. Under George Humphrey, Secretary of the Treasury.

Mr. CAPEHART. Of course it is under George Humphrey, Secretary of the Treasury. I am sure the Senator does not mean to leave the impression that George Humphrey personally has pulled the string somewhere and pushed the interest rates up.

Mr. GORE. I think so, indeed. It has been the deliberate policy of this administration to push interest rates higher. If the Senator is not informed about that, I am surprised.

Mr. CAPEHART. I am surprised that the Senator should make such a broad statement without any proof at all that it has been done deliberately. The Senator does not mean to tell me that if George Humphrey could sell bonds at 3 percent or 2½ percent, he would deliberately sell them at 4 percent, does he?

Mr. GORE. I do, indeed. I will give the Senator an example. The very first bonds the Secretary of the Treasury issued carried a rate of 3¼ percent, which was higher than necessary—very much higher than necessary.

Mr. CAPEHART. How does the Senator know it was higher than necessary?

Mr. GORE. Because within a matter of a few days those bonds were selling at $12 above par.

Mr. CAPEHART. Has the Senator from Tennessee had any experience in selling bonds or buying bonds?

Mr. GORE. Not to the extent——

Mr. CAPEHART. Or any experience whatever along that line which qualifies him to discuss this subject?

Mr. GORE. I certainly confess that I have never had experience comparable to that of the Secretary of the Treasury or to that of the distinguished senior Senator from Indiana——

Mr. CAPEHART. I do not pretend to have any such knowledge or experience.

Mr. GORE. But one does not have to be a rich man to have intelligence. One does not have to have great experience in the marketing of corporate securities or Government bonds in order to read and learn and observe. Yes, it has been the deliberate policy of the administration.

Mr. CAPEHART. What makes the Senator or any other person believe interest rates can be held down when all other prices have been rising? I admit that interest rates were lower than other prices, but eventually they had to go up because of the great demand for money with which to build highways, churches, schools, factories, utility plants, and houses. Interest rates had to go up at sometime or other. There cannot be a great demand for money by everybody who wants to borrow, without having interest rates mount. We might as well be sensible about this. The Senator from Tennessee can demagog about it and blame the Treasury; he can blame Humphrey for it, too.

Mr. HUMPHREY. George Humphrey. [Laughter.]

Mr. CAPEHART. I mean George Humphrey. But eventually the rise in interest rates had to come. It was as sure to come about as that 2 and 2 make 4. If more persons have mortgages to sell than can be supplied by the money available, the interest rate will rise. The same principle applies to the sale of automobiles, land, and everything else. The rise in interest rates was inevitable.

No one will ever make me believe that the Secretary of the Treasury would deliberately sell a bond at an interest rate of 3½ percent if he could sell it at 2½ percent.

Mr. SPARKMAN. I wish to make one brief observaton; then I promise to yield to the Senator from Tennessee.

Mr. GORE. I can hardly restrain myself. [Laughter.]

Mr. SPARKMAN. Does the Senator from Tennessee remember a day in the spring of 1953, just a couple of days after the announcement of the famous 3¼-percent bond issue?

Mr. GORE. I do, indeed.

Mr. SPARKMAN. I wonder if the Senator remembers my standing at this desk, and his sitting behind me, when I discussed the inevitable result of that bond issue upon housing and upon the prices which veterans would have to pay for their housing, and how the prices were bound to go up, up, and up.

Mr. GORE. Yes. I remember.

Mr. SPARKMAN. I remember saying at that time that I had figured what the result would be. I said a veteran could choose from among three different plans. If he wanted to pay the same amount for his house, he could cut off one bedroom over the same term of time. Or he could take it for an additional term of years—5 years, if I remember correctly—and pay the extra amount. Or he could simply add the extra cost and pay for it each month in an increased amount.

Does the Senator from Tennessee remember taking part in that debate?

Mr. GORE. I recall it distinctly.

Mr. SPARKMAN. Has not the situation developed in exactly that way?

Mr. GORE. The Senator is correct. I recall further that the Senator from Alabama and I warned State, municipal, and county officials across the land that if they contemplated building schools, constructing hospitals, laying sewer lines, or issuing bonds for anything else, unless they acted very soon, the rates of interest would go up, up, and up. Yes, I recall that. I recall it distinctly.

I recall also that as new Government issues have appeared, we have seen exerted the upward pressures on the interest rates.

The distinguished Senator from Indiana—and I am certain he did not mean to do so—appeared to have referred unkindly about our sentiments as being demagogic or lacking in sense. I am certain he did not mean to leave that impression.

Mr. CAPEHART. I apologize if I did.

Mr. GORE. I knew the Senator did not intend to do that.

Mr. CAPEHART. What I intended to say was that it gave Senators a great opportunity to use their imagination.

Mr. GORE. Unfortunately, the purchaser or the builder of a home has to use something more than imagination. He has to pay a tribute to the tight-money policy.

Under the last Democratic administration a veteran could buy or build an average 2-bedroom home with a monthly payment of $59 over 21 years. Today, under this administration, the same average 2-bedroom house will cost him not $59 a month, but $69.25 a month, not for 21 years, but for 25 years.

He does not get a larger-sized house for his money; he is paying a tribute to the tight-money policy which has been brought about deliberately by the officials of this administration.

Mr. CAPEHART. Mr. President, will the Senator from Alabama yield?

Mr. SPARKMAN. I yield.

Mr. CAPEHART. I remember the statement which the able Senator from Alabama made in respect to this matter, but I could have made the same statement before that I make now. I remember when a 4-room house could have been bought for $4,000. Today the cost of constructing such a house—the construction cost alone, not considering the interest rate or the financing charges—runs up to around $12,000 or $14,000. The same argument can be made in that case as can be made with respect to the one additional bedroom, because all prices have gone up. The cost of materials, the cost of labor, the interest rate, and the cost of everything else in America, is higher.

What makes Senators believe they can keep the cost of land or of leasing or hiring money lower than the general average of all costs in America, lower than all other selling prices? It simply cannot be done unless it is done by legislation. That is the point I am trying to make.

Wages today are higher than they have ever been. They are on the average $10 a week more than they were 4 years ago. I am not complaining about it; I am glad of it. My point is that we are in an inflationary spiral. This administration held inflation at almost the same percentage for about 4 years. In the last year, I will have to admit, there has been a rise of about 4 percent, and costs are rising.

I should say that the most acute problem is general inflation. It is not necessarily a rise in interest rates, or wages, or rises in other lines. It is general inflation which is breaking our back and will continue to break our back. My best judgment is that we in Congress ought to be paying some attention to the question of general inflation. We are not going to be able to do much about interest rates so long as there is inflation, so long as there is full employment in America, and so long as there is the amount of money which is available for spending in the United States today. I am not unmindful of the fact that conditions are spotty. I am not unmindful of some soft spots.

My point is, why should we be any more shocked by the interest rates than we are by the increase in wages and in material costs?

Mr. GORE. Mr. President, will the Senator from Alabama further yield?

Mr. SPARKMAN. I will yield one more time to the Senator from Tennessee.

Mr. GORE. The able Senator from Indiana has asked us to compare the increase in the wages of the workingman with the increase in interest rates. On the one hand, the increase in hourly wages has been only 14 percent from 1953 to 1956, whereas the interest rate on 3- to 5-year Government bonds has increased by more than 100 percent.

The able Senator from Indiana says it is inevitable that interest rates will go higher and higher. I say to him it is inevitable unless the powers of the Government are used to regulate and stabilize the rate of interest on Government bonds. How can there be stability unless there is stability of bonds issued by the United States Government?

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. GORE. Not at the moment.

I say yes, it is inevitable, under present policies.

Money is an instrumentality of organized society. It is an instrumentality of the Government itself. When the powers of the Government are used deliberately to push interest rates higher, higher rates are inevitable, of course. The powers of the Government should be used, and must be used, to stabilize the monetary structure of the country. Otherwise the average person, as the able Senator from Indiana has said, will be headed for trouble through a further spiraling of interest rates and a further spiraling of the discount rate.

UNIVERSITY OF MICHIGAN LIBRARIES

The veteran or the FHA applicant not only has to pay more per month, for a greater number of years—an instance of which I stated—but he also has to pay at least indirectly, a discount of as much as 8 or 10 percent. Unless the powers of the Government are used to bring stability to our monetary situation, then the discount rate will rise higher and higher, no matter what interest rate we specify in the bill.

Mr. CAPEHART. Mr. President, will the Senator from Alabama yield to me?

Mr. SPARKMAN. I yield.

Mr. CAPEHART. Let me say that the Senator from Tennessee has made a speech, but he has not told us how to do what he proposes. Will he introduce a bill to control interest rates?

Mr. SPARKMAN. Mr. President, of course the distinguished Senator from Indiana knows that the Finance Committee is presently beginning a study of the problem; and I hope it will study the entire problem of interest payments, fiscal management, and the many other factors which need examination. My own hope is that the committee will do a thorough job; and if its study indicates that additional legislation is needed, I hope the committee will report such proposed legislation.

Mr. CAPEHART. Mr. President, I will join any other Member of the Senate in introducing a bill calling for a study of the causes of the high cost of living and its effects, because the Congress should interest itself in the causes of inflation and its net effects.

However, my point is that interest rates are not the only factor reflected in the increased cost of housing. The increase in the cost of labor, the increase in the cost of material, and many other costs also affect the price of housing.

I agree that interest rates have risen, but it is inevitable that they will rise as all other costs rise. Today there is a larger and larger demand for money. The only way to cure the situation, as I see it at the moment, is for the Congress to pass a law fixing interest rates. If that is done, it will then be necessary for Congress to pass a law fixing prices, and then it will be necessary for Congress to pass a law fixing wages and rents, because one part of the economy cannot be controlled by law without having all the other parts controlled by law.

I think the whole general problem should be studied; a study should be made of the causes and the effects. Unless the increase in the cost of living stops, I believe that some day some action on the general subject will have to be taken by Congress, and not necessarily only on the specific problem of interest rates.

Mr. HUMPHREY, Mr. JAVITS, and Mr. CLARK addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Alabama yield; and, if so, to whom?

Mr. SPARKMAN. Mr. President, I yield first to the Senator from Minnesota; and thereafter I shall yield to the Senator from New York, and then to the Senator from Pennsylvania.

Mr. HUMPHREY. Mr. President, I thank the Senator from Alabama for yielding to me.

I have listened to the very interesting and engaging debate between the Senator from Indiana and the Senator from Tennessee. I wish to call to the attention of the Senator from Indiana the fact that interest rates in December 1952, were considerably lower than they were in April 1953. When George Humphrey, acting for this administration—as the Senator from Tennessee has pointed out—purposely and by design increased the interest rates in connection with what he described at the time as an attempt to put the refinancing of the Government debt on a long-term bond basis, he opened a Pandora's box of interest-rate increases; and he did so purposely and by design.

Let me point out that the greatest inflation which occurred before then came prior to 1951. Despite the fact that wages and prices rose at a rapid rate from 1950 through 1951, the interest rate on Government financing did not rise at the same rate. The interest rates have risen at a time when the present administration said it was controlling inflation. However, it did not control inflation in the case of the interest rates—nor did higher rates stem inflationary pressures.

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. HUMPHREY. Not at this time, Mr. President.

Mr. CAPEHART. I wish to state why that has occurred.

Mr. HUMPHREY. I desire to have the Senator from Indiana know that the rationalization for the interest rate policy by the administration has been to curb inflation. But, instead, there has been more inflation; inflation has not been curbed. Prices remained rather static between 1951 and 1953, as the Senator from Indiana knows, inasmuch as he is a member of the Banking and Currency Committee. Whatever price stability there was from 1953 to 1956 was at the expense of the farmers, and the record so shows. The minute farm commodity prices had a mild upturn, the cost of living began to rise. The rise in the general price structure was occurring while the prices of farm commodities were going down. A significant factor in that increase has been in the interest rates.

Furthermore, when the Senator from Indiana says that savings this year are the largest they have ever been, I ask him to state whose savings are the largest they have ever been. Certainly that is not true of those with incomes of less than $5,000. Instead, it is true of the savings which come from large aggregations of capital.

Furthermore, let me say to the Senator from Indiana that as interest rates rise—as the Senator from Tennessee has pointed out—everyone is affected adversely and everyone is given a bad jolt. The rise in interest rates has cost the taxpayers of the United States $1 billion a year; the cost to support George Humphrey's folly. [Laughter.] The rise in interest rates has cost the consumers more than $4 billion a year. That has been the result of a premeditated, concerted, designed program by the present administration to increase the interest rates; and the spokesmen for the administration have said so. The architect of the fiscal policy of the Eisenhower administration, Secretary George Humphrey, has said repeatedly that he was going to have the interest rates follow the money market, and that he was going to look upon money as a commodity, despite the fact, as the Senator from Indiana knows, that the Constitution provides that the Congress has the right to coin money and to regulate the value thereof. I am not ready to vote to turn over to the private banks, with George Humphrey as president emeritus, the regulation of the value of money.

Mr. CAPEHART. Mr. President, if the Senator will yield to me, let me ask why he does not introduce proposed legislation to do that, instead of talking so much about it.

Mr. HUMPHREY. I propose to have the Government exercise its power in such a way as to control the discount rate, and to set policies for the making of housing loans by individuals, and to fix interest rates.

Furthermore, Mr. President, when we Democrats wanted the bond market to be controlled, we controlled it. However, today United States Government bonds are not worth 100 cents on the dollar. Furthermore, under the Democratic administration, the Government debt was refinanced.

I ask the Senator from Indiana to state one time during the past 20 years when Government bonds have gone begging as they are today—when 28 percent of the offered Government bonds are not taken up by buyers.

Mr. CAPEHART. Mr. President, I hold in my hand a copy of the Washington Post for today, May 27, 1957; and on page B–5 there is the headline "Individual Savings Rise to Record $14.6 billion." The article states that the savings of the American people are the largest in the history of the Nation.

Mr. HUMPHREY. To what individuals does the article refer? After all, corporations are usually listed as individuals.

Mr. CAPEHART. No; the article refers to the people as "individuals."

Mr. HUMPHREY. What people?

Mr. CAPEHART. Mr. President, suppose I read the article. It is as follows:

INDIVIDUAL SAVINGS RISE TO RECORD $14.6 BILLION

Individual savings, as measured by the Securities and Exchange Commission, reached a postwar high of $14.6 billion in 1956.

The SEC study attributed the rise from $7.6 billion in 1955 to the climb in personal income after taxes, an increased rate of saving and a slowdown in the growth of individuals' debts.

Under savings, an elastic concept as used by economists, SEC includes buying of stocks and bonds and insurance as well as cash, deposits in banks and savings and loan associations. From this total, SEC subtracts new mortgage and consumer debt.

The Commerce Department, using a different definition, has figures indicating a trend similar to that found in SEC's report. Commerce's more complete coverage defines savings as the difference between personal income and spending.

RECORD SAVINGS GAIN

Last year, according to SEC, individuals added a record of $5.1 billion to their savings and loan associations holdings, compared to a gain of $4.8 billion in 1955. Bank savings accounts expanded $4.4 billion against $3.5 billion in 1955.

Insurance and pension reserves for individuals jumped $11.4 billion with about two-thirds in private plans and the rest in government.

Holdings of stocks and bonds rose $7.2 billion despite the $100 million net cash-in of United States savings bonds. This cash-in is attributed to their fixed yield while interest value rose.

They are the people to whom the article refers—not corporations.

Mr. HUMPHREY. What people? I suggest most respectfully to the Senator from Indiana that the facts will reveal first, that for the first time in 20 years, farm liabilities are greater than farm assets; and, in the second place, personal indebetedness is the highest it has ever been in the history of the country.

Furthermore, when the Senator from Indiana examines what are called private savings, exclusive of the part represented by insurance and health and welfare funds, he will find that the great majority of the American people have little or no private savings; that the bulk of the so-called savings to which he has referred are savings of the upper income group, and are primarily the result of dividends.

Mr. CAPEHART. Let me finish reading the article. I continue reading from the article:

The Nation's year-end balance sheet showed individuals held $163.5 billion in cash and deposits; $37 billion in savings and loan associations; $88.8 billion in all kinds of Government's bonds; $109.9 billion in private insurance; and $61.2 billion in Government insurance.

This brought total assets—

That is, of the people, no corporations at all are included—

This brought total assets to $460.4 billion. Liabilities were $89.7 billion in mortgage debt and $37 billion in consumer debt for a total of $126.7 billion.

Assets minus liabilities were $333.7 billion compared to $322.7 billion in 1955.

There is the answer to the question of inflation.

Mr. GORE. Mr. President, will the Senator yield?

Mr. CAPEHART. There are three Senators engaged in this debate on the other side of the aisle; I am the only one on this side of the aisle.

Mr. HUMPHREY. Get some recruits.

Mr. CAPEHART. Give me three times as much time.

Mr. SPARKMAN. May I say to the Senator from Indiana I am trying my best to yield to a recruit on his side of the aisle.

Mr. CAPEHART. Let me answer the able Senator from Minnesota. He mentioned the year 1950. The beginning of 1950 was the time when there arose a great demand for money. The reason why there is a shortage of money today is that a great demand was built up over the years during the war, when people could not and did not expand their factories and utilities. There has developed a tremendous demand for money. In fact, there is a greater demand for money than can be supplied by the money available for the purposes for which we would like to see it used.

Mr. GORE. Mr. President, will the Senator yield?

Mr. SPARKMAN. The Senator has asked me to yield once, and said he would then be through. I yield to him.

Mr. GORE. I am glad that at least one Senator on the other side of the aisle will undertake to defend the present policy. If the Senator from Indiana will read the next day's issue of the news he quoted——

Mr. CAPEHART. This is today's newspaper. [Laughter.]

Mr. GORE. Maybe it is the same day's.

Mr. CAPEHART. This is today's issue. There could not be a later issue. [Laughter.]

Mr. GORE. Perhaps it is the issue of the day before.

Mr. CAPEHART. This is today's issue.

Mr. GORE. The Senator will find that the profits of corporations were higher in 1956——

Mr. CAPEHART. Of course they were.

Mr. GORE. Than ever before in the history of the country.

I should like the Senator to couple that fact with these two statistics: The bankruptcy rate is higher now than it has been since 1932. Secondly, the rate at which small businesses are closing their doors since January 1957 is about twice the rate at which they were failing during the same period in 1953. Yes, the question still remains—What people have the savings?

The Senator read one very intriguing statement, that people were cashing in their Government bonds. These are the little people. They are the ones who are cashing in their savings bonds in order to meet their obligations, and in order to keep from closing their business doors. The present policy is having tragic effects. Big business is growing bigger and bigger. Corporation profits are going higher and higher, while small business is being pushed down, mortgage foreclosures are increasing, and the closing of the doors of little business is increasing all the time.

Mr. CAPEHART. Mr. President, will the Senator from Alabama yield?

Mr. SPARKMAN. I yield.

Mr. CAPEHART. I appreciate the fact that the able Senator from Tennessee is a young man. He evidently did not live back in the days of 1932, or he could not have made the statement that there are as many failures today as there were in 1932.

Mr. GORE. I did not say that.

Mr. CAPEHART. The Senator certainly did say that.

Mr. GORE. I said bankruptcy was at the highest rate since 1932.

Mr. CAPEHART. There is nothing today that is comparable to what happened in 1932. I read into the RECORD the article which showed the conditions which existed. I am sure the Washington Post and Times Herald is a reputable newspaper. I do not believe it would print anything that was not true. The Senator talks about people cashing in their bonds. I just read into the RECORD from the article, which stated that the people had $163 billion in cash and deposits, and $37 billion in savings and loan associations, and $333 billion in quick assets. So the statement the Senator has just made does not hold water. The fact is that the country was never so prosperous as it is today, generally speaking. The national income is the highest in the history of the Nation. The national gross product is the greatest. I just read that the people's savings are the largest. More people are employed, at the highest wages in the history of the Nation.

As I said a moment ago, all one has to do is drive around and see the homes, churches, and factories, and then drive around at nighttime and see the lights on in factories and people working in them. Take a look at the clothing people are wearing. One cannot help recognizing that the country is, generally speaking, prosperous.

As I have said, the dangerous thing facing us, in my opinion, is the threat of general inflation. We ought to attack inflation on the entire front, as well as the interest front, because we cannot control interest unless we control other costs, and we cannot control other costs unless we control inflation. I do not know why the Senator picks out interest rates and complains only about them, when interest rates are just one of the many inflationary results of the business being transacted today. If the Senator feels that way about it, why does he not have the courage to introduce a bill to fix interest rates—a bill which would control interest rates?

Mr. SPARKMAN. May I interject one comment? This discussion began over the question of discounts and the question of some curb or some control over discounts.

The Senator from New York has been trying to get recognition. I yield to him.

Mr. JAVITS. Mr. President, I had in mind asking a question on the bill. I have read it with great care, in an effort to find where it deals with VA loans. I understand a separate program is expected for that purpose.

I think it should be made very clear to the Senate—and I enter this debate as a "new recruit"—that it is the 50 million families who are in the $5,000 income bracket whose savings we are discussing. I always thought we were reconciled to paying some price for runaway inflation in the cost of Government, which we hoped would end in 1952.

I should like to ask the Senator from Alabama, the chairman of the subcommittee, two questions. First I should like to commend him for his outstanding way of conducting the hearings on the housing bill. The chairman of the subcommittee has rendered fine service. We know a great many more things than we talk about, or we imply we know them. One is that we are trying to redress a certain social imbalance. Apparently, credit is being consumed too much in other areas which we do not consider socially more desirable than housing.

UNIVERSITY OF MICHIGAN LIBRARIES

I should like to ask two questions. The first is, What will be done, or what is in contemplation, about the VA loans? Those who are trying to get VA loans are feeling the pinch the hardest. The number of VA loans has been cut in two because money is not available. We have 20,000 units in Long Island, the fastest growing area in New York, where mortgages cannot be closed because ex-GI's cannot find the money available. They cannot get the money. That is my first question.

Question No. 2: I invite the Senator's attention specifically to the question asked by my friend, the Senator from Indiana, which, it is said, is answered in the bill. I wish the chairman would show us where. How are we going to get a flow of mortgage money? In an effort to reverse the present trend of interest rates in this highly desirable field of housing, perhaps the time has come, in terms of inflation, which ran wild up to the end of 1952 and which was temporarily stopped, to do this. I think one of the prices we paid was a higher interest rate. Perhaps the time has come, now, when we should say that the balance is going the other way, and we should change the emphasis, and come to lower rates, and show in this bill how to do it.

I thank the chairman for giving me this opportunity to ask questions, and I hope he will address his attention to the two points I have raised.

Mr. SPARKMAN. First, let me say to the distinguished Senator from New York that if he will obtain the charts he will observe that inflation did not run rampant through 1952, but that it leveled off in the spring of 1951. The Senator will recall that the great spurt came at the opening of the Korean war, and inflation continued until it became necessary for Congress to enact control legislation, which went into effect in the first part of 1951.

Mr. JAVITS. Mr. President, will the Senator yield to me to make one observation? I think it will be helpful.

Mr. SPARKMAN. If the Senator will look at the charts he will find that the line was level.

Mr. JAVITS. If the Senator will yield, I think this will be a helpful observation.

I never have tried—and I shall not start now—to capitalize on housing as a subject for political discussion. I am deeply interested in the issue. I think it is a basic issue to our people.

I will tell the Senator now that we can find plenty of fault with both parties. We are dealing with a basic American social issue. I hereby strip anything I have said of any implication of a partisan approach. There will be another opportunity for that, and plenty of field days for it. I do not think this is the proper time.

Mr. SPARKMAN. I appreciate the remarks of the Senator from New York. What I had to say was not based upon partisan considerations. I was trying to keep the record straight. What I stated is a fact as presented before the Joint Committee on the Economic Report.

I remember one day that Mr. Humphrey, the Secretary of the Treasury—George Humphrey, that is—seemed to be greatly surprised, when he made a somewhat indifferent statement about leveling off as of a certain time, when the disguished Senator from Illinois [Mr. DOUGLAS] pointed out, on Mr. Humphrey's own charts, that the leveling off started back in the spring of 1951, and that the course had been fairly level since that time, up until the last few months, when we had this little jump edging in. I hope, and we all hope, that that may very soon come under control, and that we may continue to have a more or less level line.

The Senator from New York asked two questions. Let me answer them at once.

First of all, our committee did decide to leave out of the bill all provisions pertaining to veterans' housing, and there is a good reason for that. We have a somewhat confused status with reference to veterans' housing legislation.

In the House the Committee on Veterans Affairs handles all veterans' housing. The Committee on Banking and Currency handles other types of housing.

In the Senate the Committee on Labor and Public Welfare handles veterans' housing under the general Veterans' Administration guaranty program. The Committee on Banking and Currency handles all other housing, including veterans' direct loan housing.

Therefore, too often we get a confused status. We have in the Senate on several different occasions included veterans' housing provisions as a part of an overall housing bill, but when we have gotten into conference with the House we have run into a situation where either we would have to have a divided conference, with conferees from two diffcrent committees, or else we would have to strike veterans' housing from the bill and put it in a separate bill.

Since the House has already passed a veterans' housing bill and since the bill has been sent over to the Senate, we would like to leave that item out of the pending bill and act on it separately. I am hopeful our committee very soon will start hearings on that subject. That is a program which involves an expansion and enlargement and improvement of the direct lending program.

The VA-guaranteed housing program, if it should be considered, would be considered by the Committee on Labor and Public Welfare. So far as I know, there is no bill under consideration in that committee at the present time looking to a continuation the VA-guaranty program. My understanding is that the committee declined to extend it, or at least has not acted to extend it. Therefore, I presume that it is safe to assume that when it runs its course, then next year, June 30, I believe, or September 30; I do not know which, it will come to an end.

I probably am speaking entirely out of turn, since our committee does not have jurisdiction over the matter, and the able Senator from South Carolina [Mr. THURMOND], the chairman of the subcommittee of the Committee on Labor and Public Welfare which does have jurisdiction over the VA housing bill, is present. It may be that he can tell us something more about it.

I anticipate that the Committee on Banking and Currency will report a veterans' housing bill dealing with the direct lending part of the subject.

Mr. JAVITS. I thank the chairman of the committee.

Mr. SPARKMAN. With reference to the other question, as to how we might make additional funds available, if the Senator will refer to a discussion in the report, on pages 62 and 63, he will observe how we have tried in some way to meet this situation through special asistance programs. We recognize the difficulty of getting new funds into the housing program. We are studying and exploring every possible avenue that we can learn about in an effort to bring new funds into the housing field.

We hope that the time will come when some of the tremendous pension, retirement and welfare funds will go more and more into the home mortgage field. A few of the recipients of those funds are beginning to make investments now. Some of the labor organizations have made investments. I believe the Amalgamated Clothing Workers have.

Mr. JAVITS. The Senator is correct.

Mr. SPARKMAN. They are very strong in the State of the Senator from New York. They have for a good many years invested funds in the housing market, and have done a very fine job in the field of housing, which includes housing not only for their own employees, but for other people living in their vicinity.

Only recently a teachers' retirement fund in the State of the distinguished ranking minority member of the committee, the Senator from Indiana [Mr. CAPEHART], invested, I believe, $9 million in some Capehart housing mortgages.

In my State I observed the other day that a teachers' retirement fund had invested funds in mortgages.

I am hopeful that as time goes on the trustees of more and more of these funds will realize that the finest security in this country, so far as the pledging of collateral is concerned, is based upon the homes of America, and then they will be willing to buy these mortgages and ease up the situation in which we find ourselves at the present time.

Mr. JAVITS. I believe there is about $20 billion in the pension funds presently in existence.

Mr. SPARKMAN. I think I noted that there was $28 billion.

Mr. JAVITS. Twenty-eight billion dollars. Will the Senator join with, I think, so many of us, in the feeling that the dedication of some of these funds—say a round figure of 10 percent of them—to this particular mortgage market represents a highly patriotic purpose? It seems to me, considering the source of the funds, that it is almost the bounden duty of the trustees, whether individual trustees or bank trustees, to invest in the FHA and VA mortgages.

Mr. SPARKMAN. I certainly believe it is as good a security as one can get, because if the time ever comes when the homes of America are not safe and

adequate to secure the paper that is pledged against them, what else in this country will be? I think, as the Senator has so well pointed out, that after all the funds would be used for the very people who would be living in the homes, to help provide the homes and make them available. I certainly think it would be a patriotic performance on the part of the trustees of such funds.

Mr. THYE. Mr. President, will the Senator yield?

Mr. SPARKMAN. I promised the Senator from Pennsylvania some time ago that I would yield to him.

Mr. CLARK. Mr. President, I thank the Senator for yielding to me.

I should like to point out to my good friend the Senator from Indiana, who said a couple of minutes ago—I suppose it was almost half an hour ago—that the increase in interest rates had not been any greater than the increased cost of other items, in the economy, that, as the distinguished Senator from Tennessee [Mr. GORE] pointed out, interest rates have increased enormously. My figures indicate that since 1952 they have gone up 65 percent on 3-month Government securities.

In the meantime the price of food has gone down 1 percent. The price of clothing has gone up only 1 percent. The cost of transportation is up only 7 percent. But the cost of housing, shelter, and rent has gone up 13 or 14 percent. The end result is that of the 5-percent increase in the cost of living since 1952, 45 percent of the rise has been accounted for by the increase in the cost of shelter.

In the meantime, what has happened to dividends and interest? Total dividend payments have gone up 40 percent. Total interest payments have gone up 50 percent. But total wages have gone up 27 percent, and total farm income has gone down 23 percent.

This indicates the sources of the great pool of savings of which the Senator from Indiana spoke so eloquently a little while ago. We want to tap that pool—only a small part of it—to bring down the cost of housing and, therefore, bring down the cost of living, by making more FNMA special assistance funds available. I refer to the trust funds and pension funds which we have been discussing.

We wish to make a small portion of that pool available to cut down the cost of housing and thus reduce inflation.

I wish to thank my good friend from Indiana for the assistance he gave us in the committee toward bringing before the Senate many of the fine provisions of the pending bill.

We wish to accomplish the object which I have described not by attacking inflation all the way across the board, because that cannot be done in this bill but by attacking it selectively, in an area of great social need. By making available a relatively small amount of money, we can bring down the cost of housing and reduce inflation in that particular aspect of our economy, while giving to the American people decent roofs over their heads, which so many of those in the lower-income groups so badly need.

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. CAPEHART. When I say that interest rates have not gone up as much as the prices of other things, if we start back in 1937 or 1940, interest rates today are no greater, in proportion, than they were then. In fact, they are not as high as the prices of all other goods, if we start at the beginning, or the low point of the depression. Interest rates today, in comparison with wages 20 years ago, are not as high. Interest rates today, in comparison with material costs in building a house 20 years ago, are not as high. Interest rates today are not as high, in proportion, as all other costs which enter into a house, if we go back 20 years.

Mr. CLARK. I have no doubt that what the Senator says is correct. However, it was my understanding that when the Senator from Indiana took the floor a little while ago he was talking about what happened since 1952. It was in that connection that I wished to correct the RECORD.

Mr. CAPEHART. The fact is that interest rates had had a general tendency to lag behind the general price increase. But when World War II was over, and everyone started building churches, roads, factory buildings, and hundreds of thousands of new homes all over the United States, there began to be such a great demand for money that interest rates started going up in direct proportion to the demand for money.

Mr. CLARK. I point out that the only respect in which the Senator's statement is unfair is that houses for the American people are not being built, because the rate of housing starts is at the lowest point since 1949. We are building houses for those above the middle income level but not for those who have incomes of $6,000 a year or less. That is the purpose of this bill.

Mr. CAPEHART. I am aware of that; but I am also aware of the fact that if one drives around any city in the United States, he will see tens of thousands of new homes. I am delighted by that.

Mr. CLARK. If one drives around within the city limits of the same cities, he will find slums inhabited by people who are unable to provide a roof over their heads. Most of the building is going into the suburban areas, and while we want suburban building we want to do something about the slums as well.

Mr. CAPEHART. We have that situation, and we have had it for years. I want to help to correct it, but I do not believe that has any bearing on the interest rates.

Mr. THYE. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. THYE. Suppose that a young couple are desirous of owning their own home, and they make application for one of these loans. They have already selected, in consultation with the contractor, a house which might cost about $14,000 when completed. It is a 3-bedroom house. The young people have earnings of about $5,000 a year. They may have 1, 2, or 3 children. In some instances they have 4 children.

What is the first thing with which they would be faced? How much of a downpayment would they have to make on the $14,000 home, when they show that their earnings, in a rather secure job, are somewhere in the neighborhood of $5,000 a year?

Mr. SPARKMAN. First, let me say to the distinguished Senator from Minnesota that he makes reference to the fact that they have an income of about $5,000 a year.

Mr. THYE. That is correct.

Mr. SPARKMAN. Under a rule of thumb for general application, a family can afford a house which costs about 2½ times their annual income. Therefore presumably the maximum value house they would be able to buy would be a $12,500 house. However, assume that their income is sufficient for a $14,000 house. At the present time the couple would have to make a downpayment of $1,700.

Mr. THYE. Has the Senator obtained for the record information as to how many times such applicants have been turned down when they have produced a downpayment of $1,700, and were informed by those who were to pick up the mortgage, "You must have a downpayment of $2,500 or $3,000, because unless you have such a downpayment, we will not accept this mortgage."

That has been an important concern during past years. I have received information from all over the Nation to the effect that many young couples have been turned down under such circumstances. That is the reason why I ask these questions. I wish to have the record reflect something specific. Many a young applicant has been turned down when he thought he had the necessary downpayment. The investor would say, "No; we will not handle that mortgage. You must have a greater downpayment."

The confused, disillusioned, and heartbroken young people often came away from the bank or the investment company's office and said "We thought Congress had passed an act which would allow us to obtain a home. Our income is within the reasonable limits described during the colloquy when the act was under consideration. Our income was sufficient. We thought we were buying within our income, but now we are told that there must be a greater downpayment, and some additional service charges, or we canot obtain the loan."

That is the situation which I should like to see cleared up in this record. There has been too much misunderstanding. Too many applicants have been heartbroken because they thought Congress had provided for them. However, apparently Congress had not provided the necessary safeguards to prevent the lender from asking for a greater downpayment than we anticipated at the time we passed the act.

Mr. SPARKMAN. When I mentioned the figure $1,700, of course, the Senator from Minnesota understood that that was the downpayment on the principal of the loan. Of course, there are closing costs, which ordinarily probably run between $200 and $400 for that sized loan.

So far as any additional downpayment is concerned, that is a matter completely between the mortgagor and the mort-

UNIVERSITY OF MICHIGAN LIBRARY

gagee. In other words, it is up to the bank or the insurance company or the mortgage broker or the private individual or whoever is making the loan.

Of course, the Federal Government does not make the loan; it provides the insurance for the loan, over and above the amount of the downpayment. If the bank is not willing to make a loan on that basis, the Federal Government cannot require the bank to do it; nor can it require the insurance company or the savings and loan association, or any other lender, to lend the money.

If the purchaser were a veteran, he could have obtained a guaranteed VA loan while the program was still in effect. Or, if he were a veteran living in a rural or semirural area, and if he had been refused a loan, he would be eligible for a direct loan from the Administrator of Veterans Affairs.

Mr. THYE. Mr. President, will the Senator yield further?

Mr. SPARKMAN. I yield.

Mr. THYE. Even under the VA program, there were many times when an applicant was faced with the same situation under FHA which I have described. He was faced with the same, identical situation; the man who handled the paper would simply say, "We will not lend the money." That is one reason why the interest rate went up. It was because of the lender's refusal to handle that kind of paper. Perhaps there was an opportunity to invest the money with an industrialist who wanted money for the expansion of his plant.

What disturbs me more than anything else is that I have heard so many times, during the past 2½ years, particularly, of young families who have tried to buy homes. They thought that Congress had provided for them under the GI law or under the FHA law. They found that was not so. They found themselves confronted with the situation I have outlined. They were required to make a larger downpayment. We should make absolutely certain that that will not continue to be the situation in the administration of the law. Otherwise these young applicants will continue to be heartbroken and disillusioned. They will feel that Congress has been talking a great deal about legislating in their behalf, but that Congress has not legislated any safeguards they thought had been put in the law. Therefore we should make absolutely certain that such an applicant is safeguarded. If steps need to be taken, we should certainly take them.

We should do everything we can to promote home ownership in the country, because nothing makes for stronger citizenship than the feeling a man has from the responsibility of owning a home, and caring for his own yard, and believing "This is my property; I am not paying rent." That makes for good citizenship and patriotic responsibility to the Government.

Mr. SPARKMAN. I should like to say to the distinguished Senator from Minnesota, that, as I am sure he knows, I am in full accord with the statement he has made with reference to the importance of homeownership. I know of no way, however, whereby the Government can make certain that the young couple the Senator has reference to will be able to find someone who will be willing to put up the money, even when it is insured by the Government under the FHA plan or guaranteed under the VA program.

We have provided, to a limited extent, for direct loans to veterans who live in areas where money as a rule is not readily available. We have also provided a special assistance program under which FNMA is directed to buy mortgages. That is a special assistance program. Senator from Minnesota must understand that if we were to extend that program to the whole housing field, it would take an enormous amount of money to be advanced by the Federal Government.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield to the Senator from Minnesota.

Mr. HUMPHREY. I thank the Senator from Alabama for yielding. I ask him to yield for only one purpose. There has been some discussion during a recent colloquy about the savings in our country. I have been able to get the information from the 1957 Survey of Consumer Finances issued by the Board of Governors of the Federal Reserve System, and also from the Department of Commerce. That survey reveals that one-fourth, or 25 percent, of all American families have no savings at all.

Mr. SPARKMAN. How many did the Senator say?

Mr. HUMPHREY. Twenty-five percent.

Mr. SPARKMAN. Twenty-five percent have no savings at all?

Mr. HUMPHREY. That is correct. Thirty percent have savings under $500. Twenty-two percent have savings between $500 and $2,000.

Therefore, it is fair to say that more than three-fourths of the American families have savings of less than $2,000. Of the three-fourths, one fourth have no savings at all.

Consumer credit, relative to the size of consumer income, is now double what it was 10 years ago.

That is all a part of the picture.

The other fact I wish to bring to the attention of the Senate is that the interest rates on the public debt, to which the Senator from Tennessee and the distinguished Senator from Alabama referred, are up, on the average, 23.6 percent. That is as between 1950 and February 1957. That is on the average, of course.

State and local Government bonds are up 69.6 percent. Three- to five-year United States Government obligations, which are the so-called intermediates, the issue that refinances most of the public debt, are up 122 percent. These figures come from the Department of the Treasury.

Interest rates on corporate bonds, up 39.5 percent. Bank rates on short-term business loans, up 62.3 percent. That is the interest rate as of December 1956, as compared with December 1950.

Those are the facts as disclosed by the Government. I thought, while we had considerable heat generated over the subject of interest rates and the subject of savings, it might be well to shed some light and place some facts in the RECORD with respect to personal savings and interest rates. Those are the facts. When we look at the facts, generalized statements take on a different complexion entirely.

I thank the Senator from Alabama for his courtesy.

Mr. LAUSCHE. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. LAUSCHE. The Senator from Alabama, while reading his prepared speech, and prior to the time the present discussion ensued on the subject of interest and discounts, discussed section 112 of the bill.

Am I correct in my understanding that under section 112 the Federal Government would enter the field of giving special assistance in the building of houses for the purpose of providing accommodations for four new classes of citizens, namely, persons of moderate income; persons whose ability to obtain adequate living accommodations in privately financed housing is attributable to race, creed, or color; elderly persons; and persons having five or more dependents?

Mr. SPARKMAN. To make the RECORD clear, I should say that this is not a new program. It is already in existence and it makes these four classes eligible for such special assistance.

Mr. LAUSCHE. As I understand, the present program covers housing for persons displaced by urban renewal activities.

Mr. SPARKMAN. By Government activity.

Mr. LAUSCHE. The bill is intended to expand that operation and to afford protection to the four groups mentioned.

Mr. SPARKMAN. The Senator is correct.

Mr. LAUSCHE. May I ask what additional money will have to be provided by FNMA to finance this program as it is estimated?

Mr. SPARKMAN. The $250 million provided in the amendment was considered to be sufficient.

Mr. LAUSCHE. Do I understand correctly that the $250 million will be given to FNMA to aid it in buying mortgages obtained in the financing of such structures?

Mr. SPARKMAN. The Senator is correct.

Mr. LAUSCHE. With respect to the interest rate—I think this is pertinent, because we have been discussing the subject of interest rather broadly—under the present law there is a ceiling of 6 percent which may be charged on mortgages bought under this program. I think that is a correct statement.

Mr. SPARKMAN. That is the ceiling—the maximum.

Mr. LAUSCHE. The bill, however, will reduce the interest rate from 6 percent to 4 percent.

Mr. SPARKMAN. Only as it relates to these categories.

Mr. LAUSCHE. As it relates to these five categories. My query is, What is the thinking, having in mind the large interest charges which were discussed here, regarding the justification for dropping the rate to 4 percent, and how

is it hoped to sell mortgages at that rate of interest?

Mr. SPARKMAN. The purpose of that interest rate is to reduce the cost of housing. The Senator realizes, of course, that the particular groups which are sought to be provided with this type of housing are those which it has not been possible to reach with other housing programs. The Senator from Ohio, in the committee meetings, from time to time has heard our discussions concerning some method of providing housing for the low and middle income groups, or people whose income simply is not sufficient to enable them to buy high-priced property.

With reference to the 4-percent rate, I remind the Senator that there are other housing programs which carry the 4-percent rate. One of the programs which is perhaps most generously supported is the military housing program, which carries the 4-percent rate. Farm housing loans carry a 4-percent rate. College housing loans carry an even lower rate of interest. The rate is flexible, to some extent, depending upon the cost of the money to the Federal Government. At the present time it is 2⅞ percent, but about July 1 the rate probably will be increased. There may be other housing programs; I am not certain.

I realize that 4 percent would not be regarded by most persons today as being a realistic rate, but I hope the time will come when a mortgage which is guaranteed by the United States Government will sell at a rate of 4 percent. I think we have gone entirely too far in allowing Government-guaranteed mortgages, which are almost as good as Government bonds, to carry interest rates competitive with private lending rates, when there is all the difference in the world between them.

Mr. LAUSCHE. I assure the Senator from Alabama that I subscribe thoroughly to the arguments which have been made about the inordinate rates of interest which are being charged the Government.

Probably it was last October, while I was Governor of Ohio, that on general bonds, with the full faith and credit of the entire State pledged to their payment, it was necessary to pay 2¾ percent interest. At that time I rebelled against the idea. When I think that the Federal Government has to pay practically 4 percent, it is simply unbelievable.

I wish to address one further question, to the Senator, and this, again, pertains to section 112. It deals with 2-, 3-, and 4-family unit dwellings. Is my understanding correct that this section would raise the ceiling on the price at which the mortgages would be insured?

Mr. SPARKMAN. The Senator from Ohio will recall the discussion in the committee concerning an amendment which was offered on behalf of the distinguished Senator from Maine [Mr. PAYNE]. The argument which was presented to the committee was that in some cities of Maine there exist this type of building, which could be used for the housing of persons who are displaced by reason of Government building programs, if the law permitted it. So this provision was included for the purpose of allowing such housing. That is not directly a part of the other program to which the Senator has referred.

Mr. LAUSCHE. It is in the same section.

Mr. SPARKMAN. Yes. It is all amending section 221, but it was included for an entirely different purpose.

Mr. LAUSCHE. Is my understanding correct that in the construction of a 2-, 3-, or 4-family dwelling at a cost of $32,000 or $35,000 in the high-cost areas, the minimum downpayment per dwelling unit would be $200?

Mr. SPARKMAN. For each unit in the building; that is correct.

Mr. LAUSCHE. So the Government would guarantee the mortgage of a $35,000 building, a 4-family dwelling, and the purchaser pay $800 down?

Mr. SPARKMAN. I remind the Senator that this is not for the purpose of building. This is for the purpose of utilizing the existing buildings of the types I have just described. But if it were a 4-unit building, the cumulative total down payment for the 4 units would be $800.

Mr. LAUSCHE. On a guaranteed mortgage of $35,000.

Mr. SPARKMAN. In high-cost areas, $35,000.

Mr. NEUBERGER. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. NEUBERGER. I join with those who have commended the distinguished junior Senator from Alabama for his leadership and foresight on this great issue.

When the able Senator from Indiana [Mr. CAPEHART], in the earlier part of the debate, was quoting from the Washington Post and Times Herald with respect to savings, I wondered if he had noticed an article which was published in the same newspaper of today, under the byline of Philip S. Brown, and entitled "Why New Housing Has Fallen So Sharply." Mr. Brown was referring to the decline in new housing construction in the District of Columbia area. The article is very significant. It points out that the population is expanding in this area and that the income of those who live here has been going up very sharply.

I call the attention of the Senate to several aspects of the article, which I think bear on some of the points made by the Senator from Indiana, and which tend to support the position taken by the Senator from Tennessee and the Senator from Alabama.

Mr. Brown, in his article, points out:

> Since the late fall of 1955, when housing starts began to decline in this area, lumber prices have fallen, but building materials, all in all, have changed only slightly.

The author of the article then points out that he does not see how the drop in residential construction can be attributed, even in part, to changes in building costs.

Then this particular paragraph seems to be very significant:

> Interest is far and away the major expense that most peope incur in buying a house. One who borrows $10,000 at 4½ percent, to be repaid over 30 years, commits one's self to pay $8,242 in interest. At 5½ percent, the commitment is $10,448.

In other words, that author, who is an expert for the Washington Post and Times Herald in the field of residential construction, emphasizes that interest is the major obligation incurred by those who purchase houses. It is the big expense.

I wish to ask several questions of the eminent Senator from Alabama. I happen to represent in the Senate, along with the distinguished senior Senator from Oregon [Mr. MORSE], the State which produces more lumber than any other State in the United States. Oregon has in recent years encountered what might be described as an adverse economic current which is running disturbingly counter to that of the rest of the country. Approximately 8 or 10 years ago, each person in Oregon enjoyed a per capita income which was approximately $200 above the national average. Today, it is approximately $10 or $15 below the national average. Part of this change can be attributed to a major slump which has overtaken the lumber industry.

I hold in my hand several telegrams. One of them comes from Joseph W. McCracken, executive vice president of the Western Forest Industries Association. I ask unanimous consent that these telegrams be printed in the RECORD.

There being no objection, the telegrams were ordered to be printed in the RECORD, as follows:

PORTLAND, OREG.,
May 24, 1957.

Hon. RICHARD L. NEUBERGER,
United States Senate,
Washington, D. C:

Western Forest Industries Association very disturbed over Senate Banking and Currency Committee's 1957 housing bill. Full committee turned down liberalization of FHA program and reduced FNMA mortgage purchase authority by $750 million.

Have been urging our membership to defer decisions to permanently shut down their lumber operations until after Congress has passed the 1957 housing bill. We have based our advice on a hoped-for liberalization of the housing program. With a consequent pick-up in housing starts and finally an increase in the presently depressed lumber market.

Sincerely concerned that full Senate ratification of Banking Committee bill next week will lead to another wave of lumber and plywood mill closures. Many mill owners will close that have been in continuous operation for over 20 years. In past few months 126 mills have already shut their doors in Oregon alone.

We are told a liberal housing bill may be inflationary at this time. You are better able to judge this than we. However we are disturbed that in the guise of preventing inflation our industry along with the home building industry is being singled out for a temporary depression while other industries are experiencing record prosperity.

We are in a position to predict the result of a continued depression in the lumber industry which would result from the failure to liberalize the Federal housing programs. Hundreds of medium sized and smaller operating units will go out of business permanently. Then when the housing spigot is turned back on some day, this industry will consist in large measure of only the largest operations. The small lumberman will be gone and the vitality which he has provided will also be gone. The Government is now

UNIVERSITY OF MICHIGAN LIBRARIES

concerned about mergers and large sized units in our industry. Nothing imaginable will contribute more to this trend toward bigness than the failure to liberalize Federal housing programs in this session of Congress.

We understand the Senate will debate the housing bill next Monday. We urge your support of any amendments to the Banking Committee's bill which will liberalize the FHA program and restore to FNMA the $750 million for mortgage purchase.

Our association has been in continuous operation since 1944. We are composed of over 100 medium sized and small sawmill manufacturers doing business in Oregon, Washington, California, and Montana.

Sincerely,

JOSEPH W. MCCRACKEN,
Executive Vice President, Western Forest Industries Association.

RIDDLE, OREG., *May 24,1957.*

Hon. RICHARD L. NEUBERGER,
United States Senate,
Washington, D. C.:

Re FHA bill S. 1898, due to present slump in lumber market it is imperative this bill be passed as it seems to be the only release we will receive in the near future. Passage of this bill alone could bring release to every industry in this area.

D. R. JOHNSON LUMBER CO.

ROSEBURG, OREG., *May 24, 1957.*

Hon. RICHARD L. NEUBERGER,
United States Senate,
Washington, D. C.:

Urge that you do all possible to push Senator SPARKMAN'S and Senator SMATHERS' improvement of FHA program.

Respectfully,

J. C. BAXTER,
Secrteary, Wilbur Lumber Co.

EUGENE, OREG., *May 24, 1957.*

Hon. RICHARD L. NEUBERGER,
United States Senate,
Washington, D. C.:

Urgent that you support liberalized FHA program as provided in Senator SPARKMAN'S subcommittee bill and Senator SMATHERS' FHA bill S. 1898.

EUGENE WILLAMETTE LUMBER CO.

EUGENE OREG., *May 24, 1957.*

Hon. RICHARD L. NEUBERGER,
United States Senate,
Washington, D. C.:

The lumber business in general and the whole economy of our area is in dire need of a liberalized FHA program. We solicit your cooperation and urge your full support of the amendment embodied in Senator SPARKMAN'S subcommittee bill and Senator SMATHERS' FHA bill, S. 1898.

Respectfully,

L. L. YEAGER,
McKenzie River Lumber Co.
DOUGLAS ORME,
Bethel Planing Co.
CHARLES KITCHEL,
O. and C. Lumber Co.
VERNE MCGUIRE,
Raymac Lumber Co.

WASHINGTON, *May 24, 1957.*

Bethel Planing Co.,
Eugene, Oreg.:

CHARLES KITCHEL,
O. and C. Lumber Co.,
Eugene, Oreg.:

VERNE MCGUIRE,
Raymac Lumber Co.,
Eugene, Oreg.:

Glad to assure you of my support for every effort which may be made in Senate to liberalize FHA terms and other housing legislation as reported out by committee, so as to overcome adverse and restrictive effects of administration's tight-money policies. Progressive housing bill important both because of crucial importance to Oregon's lumber-based economy and because more plentiful and better housing is real national need. Appreciate your message. Regards.

RICHARD L. NEUBERGER,
United States Senator.

Mr. NEUBERGER. Mr. President, in his telegram Mr. McCracken points out that lumber mills in our State which have been in continuous and successful operation for more than 20 years, face the imminent threat of permanent closure unless there is a genuine revival in the lumber market.

My interest in this situation arises only in part because I help represent the major lumber-producing State in the Nation, although naturally my interest in the matter is affected by that fact. However, I wish to state that my interest in it also arises from the need for the construction of an adequate number of individual family and multiple-unit dwellings which will provide comfortable housing for the American people.

Does the Senator from Alabama think that by means of the pending bill, there will be ample opportunities to encourage the housing construction which the country needs in order to take care of its people, particularly under what we regard as an American standard of living?

Mr. SPARKMAN. Does the Senator from Oregon ask whether I believe the pending bill is sufficient for that purpose?

Mr. NEUBERGER. Yes.

Mr. SPARKMAN. No, not at all; and I am glad the Senator from Oregon has asked that question.

The rock-bottom minimum of additional housing units needed in the United States each year is 1 million. Considerably more than that could well be used. In other words, if I were to state the number of additional housing units required each year in order to supply the needs of the people of the United States for comfortable housing, I certainly would put the figure at much higher than that—perhaps at 1,500,000.

Mr. NEUBERGER. And today it is approximately——

Mr. SPARKMAN. Nine hundred and ten thousand.

Mr. NEUBERGER. Yes; and in March I believe it was down as low as a rate of 800,000.

Mr. SPARKMAN. Yes; in March the figure was 815,000 or 844,000, or approximately that amount.

In that connection, let me state that 940,000 is the annual projection, based on the April figure. However, in April there was an increase. In March, the figure was 810,000.

Despite that projection, I should like to point out, by way of caution, that the number of housing starts in April was the lowest in the United States in the month of April since 1949. Therefore, the Senator from Oregon will understand that when we study only the projection, we are liable to fool ourselves.

At this point I should like to refer to an article published in the magazine "Banking," which is issued by the banking industry. The article to which I refer appears in the current issue of that magazine, and is entitled "Housing, Population Growth Just About Keep Pace."

The article is not long, and I shall read it:

HOUSING, POPULATION GROWTH JUST ABOUT KEEP PACE

"The growth in the Nation's housing stock appears to have just about kept pace with population growth during the past 7 years," states Business Trends, published by the research department of the Federal Reserve Bank of Cleveland.

By the way, we should remember that the past 7 years have been perhaps the most productive 7 years in the history of the United States, in the case of housing.

Mr. NEUBERGER. Is it not true that, in the case of the purchase or acquisition of new automobiles, there has been a great increase in the rate, as compared with the construction of housing?

Mr. SPARKMAN. Yes.

I read further from the article:

It is pointed out by Business Trends that the country's nonfarm population has increased by nearly 21 million persons since 1950 to a total currently around 146,500,000 men, women, and children. "The 7-year growth in the nonfarm population was about 17 percent, almost identical with the estimated increase in the number of occupied dwelling units during this period," reports the FRB publication. "'Between 1950 and 1956," it states, "an average of 10 new nonfarm dwelling units have been occupied for every addition of 32 percent persons to the nonfarm population. This ratio appears to be about in line with the average number of persons per occupied dwelling unit, which has not changed much in recent years."

Trends concluded its discussion by stating that "little progress has been made in replacing the large number of substandard dwellings in the country * * *. Replacing these substandard units, or modernizing them to meet present day standards, would appear to be a desirable social objective. The task is so large—and it grows with time—that doing even a small part of it each year would sustain the housing industry at very high levels for some years to come."

We must remember that the article I have just read is based on a Federal Reserve study, as reported in the magazine Banking. I do not believe two more conservative or more cautious groups than those could be found.

Therefore, we must conclude that certainly it is not an exaggeration to state that the construction of housing is just about keeping pace with the increase in population, to say nothing of the replacement of the houses which become obsolete and those which are torn down because of housing development programs, urban renewal programs, and the houses destroyed by fire and other disasters. In other words, the construction of new houses in the United States is just about keeping pace with the increase in population.

Mr. NEUBERGER. What bothers me so much about the situation is that there

is an enormous market for new automobiles, and we are undertaking a $33 billion interstate road program; these developments are desirable but, as the Senator from Alabama has pointed out, a lag is occurring in the construction of housing, where the American people spend most of their time, either when sleeping or when awake.

Mr. SPARKMAN. Let me state that what bothers Senators more than anything else is inflation. Inflation will be the basis of one argument which will be made in connection with various phases of the housing program.

I wish to ask whether any Member of the Senate hears complaints about inflation when there is an increase in the number of automobiles produced in the United States in any one year?

Mr. NEUBERGER. Or when the American people spend, in 1 year, more than $15 billion for liquor and tobacco. Is that situation referred to as inflation?

Mr. SPARKMAN. Or when a great industry decides to spend half a billion dollars in expanding its plant. That is not called inflation.

It is only when a beginning is made in the construction of the houses essential for American families, that we begin to hear talk about dangerous inflation.

Mr. CLARK. Or—if the Senator from Alabama will yield to me—when we begin to put $27 billion into a highway program.

Mr. NEUBERGER. Mr. President, if the Senator from Alabama will further yield to me, let me say that the one great danger of inflation seems to be said to exist in connection with housing construction. I refuse to believe adequate housing will encourage inflation. The Senator from Alabama has been a leader in the field of housing ever since he entered the Congress. He is now presenting the housing bill on the floor of the Senate, and he has admitted that the pending bill contains imperfections.

Let me ask how the bill could be amended so as to give encouragement to an adequate, responsive, and necessary housing program which is so urgently needed today in the United States. Could that be done by reducing the required downpayments, or by providing for the making of direct loans by the Government rather than by underwriting loans from private sources? How would the Senator from Alabama propose that it be done? It is essential that construction of residential housing be resuscitated.

Mr. SPARKMAN. I may say there is a great deal more importance attached to reducing downpayments in getting the type of housing we need—that is, providing housing for the great mass market. The great mass market for housing is made up of people with incomes of $6,000 a year and less. If we could put emphasis on that type of housing—in other words, houses costing $15,000 and less—we probably would do more good than by any other single act.

I could make several suggestions as to how I think the program could be improved to do these things, but I am realistic. I know what we are up against. In presenting this measure, all I hope to do—and I think this is also the committee's view—is to hold the ground as best we can, in the hope matters may stabilize, and perhaps in another year's time we can work out a real program.

Mr. NEUBERGER. One further question; then I shall not additionally intrude on the Senator's valuable time.

In other words, then, am I to understand it is the opinion of the Senator from Alabama the present bill which he is explaining and presenting on the Senate floor is the very best measure that can be passed under the present circumstances?

Mr. SPARKMAN. I am of that opinion. That is correct.

Mr. President, I ask unanimous consent that I may have the privilege of yielding to the junior Senator from Rhode Island [Mr. PASTORE], so that a matter of great interest may be presented to the Senate, and that afterward I may have the right to resume.

The PRESIDING OFFICER (Mr. DOUGLAS in the chair). Is there objection to the unanimous-consent request of the Senator from Alabama? The Chair hears none, and it is so ordered. The Senator from Rhode Island is recognized.

Mr. PASTORE obtained the floor.

Mr. SMATHERS. Mr. President, will the Senator from Rhode Island yield to me so that I may suggest the absence of a quorum.

Mr. PASTORE. I yield for that purpose.

Mr. SMATHERS. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll; and the following Senators answered to their names:

Allott	Fulbright	Morse
Anderson	Goldwater	Morton
Barrett	Gore	Murray
Beall	Green	Neuberger
Bennett	Hayden	Pastore
Bricker	Hickenlooper	Potter
Bush	Holland	Purtell
Butler	Hruska	Revercomb
Byrd	Humphrey	Robertson
Capehart	Ives	Russell
Carlson	Jackson	Saltonstall
Carroll	Javits	Scott
Case, N. J.	Johnson, Tex.	Smathers
Case, S. Dak.	Johnston, S. C.	Smith, Maine
Chavez	Kefauver	Smith, N. J.
Church	Kennedy	Sparkman
Clark	Knowland	Stennis
Curtis	Kuchel	Talmadge
Dirksen	Lausche	Thurmond
Douglas	Long	Thye
Dworshak	Malone	Watkins
Eastland	Martin, Iowa	Wiley
Ellender	Martin, Pa.	Williams
Ervin	McClellan	Yarborough
Flanders	Monroney	Young

The PRESIDING OFFICER (Mr. LAUSCHE in the chair). A quorum is present.

Mr. JOHNSON of Texas. Mr. President——

Mr. PASTORE. I yield to the distinguished majority leader.

SENATOR THEODORE FRANCIS GREEN, OF RHODE ISLAND

Mr. JOHNSON of Texas. Mr. President, there are men who are ageless, men to whom the passage of the years merely represents the accumulation of milestones.

Such a man is our distinguished and honored chairman of the Foreign Relations Committee, THEODORE FRANCIS GREEN. This week he beomes the "oldest" man ever to serve in the Congress of the United States. I place the word "oldest" within quotation marks, because in his case it is merely a measure of years of service.

The experts, it seems, cannot agree on the exact day when the record will be set. So the Senator from Rhode Island is acting in characteristic fashion.

He is proving that he is the master of time, and not its slave. He is setting May 30, next Thursday, as the official date. As they always do, time and calendar will bow low and adapt themselves to the wishes of the distinguished chairman of the Foreign Relations Committee, Senator GREEN.

For all of us, next Thursday will be a great occasion. We shall once again have an opportunity to display our deep affection for the gay, sprightly man who combines the highest degree of statesmanship and vitality, and makes the rest of us sigh for the days when we were once young.

Mr. KNOWLAND. Mr. President——

Mr. PASTORE. I yield to the distinguished minority leader.

Mr. KNOWLAND. Mr. President, I would not want this opportunity to pass without those of us on the Republican side of the aisle joining the majority leader in expressing our great gratification at this milestone which our good friend and lovable companion from Rhode Island has passed or is about to pass—depending upon which historian is consulted.

In this Chamber we discuss many controversial subjects. Sometimes we divide along party lines, and the center aisle marks the division. Sometimes we divide along geographical or philosophical lines. But today there are no divisions in the Senate as we all come to pay our tribute, not only to an outstanding Senator, a man who holds the high and important position of chairman of the Foreign Relations Committee, under whose chairmanship I am privileged to serve, but a man whom we all join in honoring. All of us, regardless of the section of the country from which we come, regardless of our party affiliation, join with the majority leader in expressing our happiness at being able to unite in paying tribute to the senior Senator from Rhode Island and expressing the hope that he may celebrate many future anniversaries of his service.

I know of no Member of this body, regardless of how young he may be in years, who is more young in outlook than is the distinguished Senator from Rhode Island. Having traveled with him on occasion in foreign lands, I can personally testify that, while we so-called younger Members often became a little tired, he was still able to go, and not only visit the places we were supposed to visit, but also to take on additional work.

He is one of the hardest working members of the Foreign Relations Committee, and I am happy to join in paying this tribute to him today.

UNIVERSITY OF MICHIGAN LIBRARIES

Mr. PASTORE. Mr. President, on June 18, 1956, I had the honor to rise in the Senate to extol my colleague, the senior Senator from Rhode Island, THEODORE FRANCIS GREEN. On that date, he had achieved a record—the oldest Senator to serve in these proud halls. Let me refer to the CONGRESSIONAL RECORD of that day—volume 102, part 8, page 10449—for the lively biography of this Phi Beta Kappa son of Brown University, onetime Governor of Rhode Island, and the perennial Senator from our beloved State.

On that June day of 1956, Senator GREEN had counted 88 years, 8 months, and 15 days. But he had only started to count. For there were more honors to be acquired. The House of Representatives claimed that it had Members in the past who had lived longer. There is no justice in the canard that in the House it only seems longer. They produced the records.

Yet Senator GREEN was not dismayed. He could bide his time.

There was a record of 89 years, 56½ days. They were counting half days by this time. Senator GREEN passed that record on November 28, 1956. Next our Senator overtook a Representative claim-claiming 89 years, 7 months, and 18 days—and today all his competitors become only memories—this the memory of a man who had a mere 89 years, 7 months, and 25 days.

We salute the memories of these grand old men who will compete no more with Senator GREEN. There is glory for them, too.

We salute them, and we congratulate Senator GREEN, who now has only one birthdate to remember—his own—October 2, 1867.

The year 1867 brought other great events in history. That year Russia sold us Alaska for $7,200,000. The same year Nebraska came into the Union. The direct current dynamo was invented and electrical age got on its way. Cyrus Field got a medal for laying the Atlantic cable. A Member of Congress from Ohio charged the President with interference and finally the President was impeached.

The French withdrew from Mexico City; and the whole world went to Paris for the exposition of 1867. Sholes and Golden were working on the first practical typewriter; and the first big drive for woman suffrage got underway. This fact may be irrelevant in the life of a man who has remained a bachelor all his days and nights—so far—inasmuch as the woman's vote has always been overwhelming for Senator GREEN.

Let us leap 90 years from 1867 to 1957. If, Mr. President, you think it is a long leap, remember, my colleague made it.

Let us consider a few of his accomplishments during this past year.

It has always been his dream to become chairman of the Foreign Relations Committee—and, by George, he made it. He had hoped to hear the songs of the Brown campus echo in the corridors of the Senate. And a month ago in a well-deserved serenade to their great alumnus, the Brown Glee Club, raised their thunder in the rotunda.

Senator GREEN has flown east and west—north and south—overseas and wherever duty might call him—truly a public servant.

And he has continued his lifelong hobby of private importations to his collection of Far East antiques. He finds, as it were, more diversion in ancient Confucianism than in modern Confusionism—or whatever the political name may be.

His 6-week study mission to the Continent last year, with an official visit to 13 countries, culminated in his report on aid to Africa submitted last February.

We all remember his masterful presentation here of the Middle East resolution. We are familiar with his committee report on the foreign-aid program and are aware of his introduction of the Mutual Security Act. Senator GREEN is everywhere in demand as a speaker and he complies as much as his Senate duties will permit. A month ago he was principal speaker at the World Trade Fair in New York. One night will find him talking at Bucknell University—and the next night you will find him listening at a testimonial dinner in his honor at the Waldorf-Astoria Hotel in New York.

His sense of humor delights every gathering while his deep learning adorns every discussion of the affairs of the Nation. A gracious host, a sought-after guest, there are few who get so much fun out of life—or put so much good humor into it. We are very fond of him. He is very fond of us, so much so that he has promised to keep on as Senator until his turn of the century. We have learned to rely on his promises—so we feel that he will be on these premises come that century. At least that is our wish—and our prayer for him.

Let me close with a stanza of a little poem:

> But if from life you take the best,
> And if in life you keep the jest,
> If love you hold;
> No matter how the years go by,
> No matter how the birthdays fly—
> You are not old.

Congratulations to my friend and colleague, Senator THEODORE FRANCIS GREEN.

[Applause, Senators rising.]

Mr. GREEN. Mr. President, I rise, not to make a speech, but to express my heartfelt thanks for the great tribute my colleagues are paying me this afternoon.

I cannot tell them how much it means to me. I have heard not only the words of the distinguished majority leader, the distinguished minority leader, and my distinguished colleagues from Rhode Island, but I have also received a great many greetings, both public and private, from my colleagues on both sides of the aisle, from those whom I have known ever since I came to the Senate, as well as from those who recently came to the Senate and whom I am glad to greet as friends.

I have had a long life. It is hard for me to realize it—unless I go back over the details—because I do not notice much difference in myself tonight as I stand here from the way I was when I came here first some 20 years ago, or a little more than that.

I have enjoyed my service here. I believe that one reason why I have enjoyed it is not because I have always won—because sometimes I have lost—but because, when it is forced upon me and I know I am right, I enjoy a fight.

Not many men are willing to say so. But I say if I feel I am right and the other fellow picks a fight, so much the better. I then have a chance to prove I am right. Although sometimes, in the view of certain people, it has not been a successful fight, I have enjoyed it notwithstanding.

I think that is perhaps one reason why I am here. My friends in Rhode Island needed a fight, and probably never would have gotten anywhere without it. I learned that year after year, and after 25 years of defeat I was never discouraged, and I finally won; and from then on I went on to ever greater victories.

I say this for the benefit of my friends on both sides of the aisle who may become discouraged over a temporary defeat. If they know they are right, let them keep on, and they will win—if they are right. That is the big "if." We can never be sure in this world. I have never felt entirely sure, but I have acted on the assurance, which I have, that a clear conscience and hard work will carry one forward, even if there is nothing else to count upon.

It is a bit uncertain, of course, whether today is the day when the record was set. As my colleagues know, I celebrated the day last fall some time. Then it was found that a mistake had been made, not by me, but by the Library of Congress, that noble institution. I had the honor to be the chairman of the Joint Committee on the Library, and I blush for shame that that great institution should have made such a mistake.

Then, as a result of further investigation, they shoved the date ahead until about this time. Then they decided on this day. However, along came another investigator, who examined the more than 15,000 records, and he decided that leap years had been overlooked; in other words, that 1 day a year must be allowed in making the calculations.

Then along came the third school of thought and they said that a leap year does not come every 4 years; that there are only 24 leap years in a century. By this time they were counting my age by centuries. At that point I gave it all up. Then the reporters came—Senators know how they butt into these things—and they said to me, "You must choose a day to celebrate."

"Well," I said, "I am going to choose, not the 26th or 27th or 28th, or even the 29th of May. I am going to give them 1 day for another school of thought, the fourth school of thought, and I will choose the 30th of May as the day to celebrate, when there will be a celebration anyway."

[Applause, Senators rising.]

Mr. BUSH. Mr. President, as a Senator from the State of Connecticut, I am very happy upon this occasion to join other Senators in extending to my dear friend congratulations on behalf of the people of the State of Connecticut, his next-door neighbor. We admire him, we

respect him, and we rejoice in the wonderful record which he has established.

If I may say so, Mr. President, to me the schedule of work this great man undertakes day in and day out is amazing. He is famous for the fact that in addition to all the usual work of a Senator, he is very conscious of his responsibility as a member of the Committee on Foreign Relations. I venture to say that he attends more of the affairs given at embassies of neighboring countries and of countries far away, than does any other Member of the Senate of the United States. For the courtesy which he shows them, he is greatly respected by the representatives and the people of other countries. I think we all can bask somewhat in the reflected credit, because he is the senior member of the Committee on Foreign Relations.

In this connection, I heard an amusing incident about the Senator not long ago at one of the embassies. He was standing in the reception line, waiting to be introduced to the host. He had his little engagement book out and was looking at it very intently. One of his friends said to him, "Theodore, are you trying to find out where you are going from here?"

The Senator turned and said, "No; I am trying to find out where I am."

I think that illustrates my point about his attentiveness to official duties. I mention this only as one aspect of the many facets of his work as a Senator because it is so significant.

Mr. SMITH of New Jersey. Mr. President, I cannot let the occasion pass without saying a word about our distinguished and beloved colleague. Theodore and I have been together on the Committee on Foreign Relations for a number of years. It is a great joy to me to be serving with him this year when he is the chairman. To use a slang expression, "he has run us all ragged."

I have attended committee hearings, especially when foreign aid was under consideration, when Theodore has opened the meeting and when the rest of us have had to leave early. But Theodore always closed the meeting. I do not think there has been a meeting which he has attended to which he has not given full time, attention, and thought to its planning, so as to make it the kind of meeting it should be.

I pay him this tribute as a colleague, because Senator GREEN has been wonderful to all of us.

Apart from the more or less official side, is the other side—the side of human friendship and affection.

We all love you, Theodore. I am one of the older Members of the Senate. I have not attained your seniority, but I think I can say that I have looked upon you as one, on the other side of the aisle, for whom I have come to have the highest affection. Whenever I attend one of the receptions to which the Senator from Connecticut [Mr. BUSH] referred, I am happy to find you there, so that I may have a word with you.

I know that if Mrs. Smith were here, she would extend to you her congratulations, because she says there is no one whom she more enjoys sitting next to at official banquets, than THEODORE GREEN, because she knows she is going to have an evening of real exhilaration.

Mr. President, I am glad to add my word to the tributes being paid our distinguished colleague.

Mr. HUMPHREY. Mr. President, I join with my colleagues in paying tribute and personal respect to our distinguished and beloved colleague from the State of Rhode Island. I did so personally only a few minutes ago, while the quorum call was in progress.

I have always had the greatest respect and esteem for Senator GREEN. I said to him that he combines the two great qualities which are so important in public life. On the one hand, he is an eminently successful politician in the best sense of the word; on the other hand, he is a statesman who has contributed greatly to the welfare not only of the State, not only of the Nation, but of the world. When those two qualities can be combined in one personality, we indeed have an unusual person.

In Senator GREEN, I feel we have the finest type of public servant and gentleman, whose friendship we shall always cherish and respect; one who has added to the honor and prestige of representative government and all the traditions of democracy.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD a splendid article entitled "Senator THEODORE FRANCIS GREEN," written by William H. Edwards, and published in the Harvard Law School Bulletin.

Mr. Edwards is a partner in the Providence law firm of Edwards and Angell. He is an active alumnus of the school, he has served as Rhode Island Chairman of the Law School Fund, and he is secretary of his class of 1921. I am certain that the Senator from Rhode Island is acquainted with Mr. Edwards. The article is indeed an excellent profile of the fine work of the Senator from Rhode Island in his public career.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Harvard Law School Bulletin of April 1957]

SENATOR THEODORE FRANCIS GREEN

(By William H. Edwards, 1921)

THEODORE FRANCIS GREEN, senior United States Senator from Rhode Island (and Harvard Law School, 1890–92), is a special case history in, among other things, geriatrics. He is not only the exception that violates the proverb and proves no rule; he is the case that disproves all rules. Born in October 1867 (only 2½ years after Appomattox), he is now serving his 21st year in the United States Senate and will be 90 this autumn. A vigorous and dynamic individual, both physically and mentally, he appears, as all observers agree, like a man in his 60's. Yet he can and does discourse with vivid recollection of the Law School of 1890 and of those far-off solar myths, Ames, Gray, and Thayer.

Elected for the first time to the governorship of Rhode Island in 1932, he began the important part of his political career in his 66th year, at an age when in that "little principality" bank presidents are usually in the habit of retiring. Yet Mr. GREEN has been going strong ever since—an Aristides whom his electorate on 5 occasions (2 gubernatorial and 3 Senatorial) have not become tired of calling "the Just," and an elder Cato who follows very literally that other hardy gentleman's precept, Senesco discens,—"I grow old learning."

With this session he has become chairman of the Senate Committee on Foreign Relations and is at the time of this writing struggling day after day with Mr. Dulles and with what some logician has flippantly called the Undistributed Middle East. His schedule would break the back of a far younger man. On the day this writer talked with him, Senator GREEN had been at his office or in the Senate from 8:30 a. m. till 5:30 p. m., or later, some of the time acting as chairman of a committee hearing. He had come back to the University Club (of Washington) for dinner. At about 8:30, beginning with dessert, he started reminiscing about the years of his early education. He talked with few interpolations on the part of his guest, for nearly 2 hours, and when the conference broke up late in the evening appeared as genially fresh as if he had just finished breakfast and as young in zest and manner as if he had gotten through law school in, say, about 1910 or 1915, or even later.

Altogether we have here a portent of no mean proportions—a portent of personality and achievement in which the law school, 1 of his 2 legal nurses, can take proper pride. To have survived to such age with such vigor is remarkable, to be sure; but to have survived with credit to himself and the State and Nation he serves is phenomenal.

With his accession to the chairmanship of the Committee on Foreign Relations and with the establishment of a record for age in Congress (there seems to be a little doubt on this score, but the next few months will dispose of any "transient and embarrassed phantoms" who have turned up as competitors in Congressional records), Mr. GREEN'S history and political activity have been given wide publicity, particularly in a full sympathetic article in the Saturday Evening Post (issue of January 5, 1957). It would be idle, in the space allotted to this disquisition, to go too much over the same ground.

What is interesting, one supposes, or may be interesting, one hopes, to the law school constituency has to do with those events of his life which pertain primarily to his education and his legal training.

Mr. GREEN was sickly as a child. He received much instruction at home. At the proper time, his father, Arnold Green (Harvard Law School, 1865–66), taught him Greek. No lessons or the study of them was permitted on the Sabbath. Arnold Green got around that by a legal fiction which permitted study of the Greek Testament on Sundays. "I saw through him," said the Senator. "But we got on all right till I became better at New Testament Greek than he was. He didn't like that." Biographers struggle these days with the problem of father-son hostility. Catherine Drinker Bowen struggled with it in "Yankee from Olympus," and now Professor Howe, in his just-published volume on Holmes, struggles with her struggle. Senator GREEN is lucidly direct and frank. "I was always rather afraid of my father," he admits. No lack of admiration, apparently; simply, a little fear.

The first school Senator GREEN went to was Miss Sawyer's, nearby on Benefit Street in Providence. "Keep him off the streets," said Arnold Green to Miss Sawyer. "Whether he learns anything or not I don't care." Later he went to Mr. Shaw's school. His class had only 6 members. The chief advantage of this school was that he had a walk of a mile or more each way. His health began to improve.

Thereafter came Classical High School, a public school of high standing in Providence. Here Mr. GREEN must have found himself intellectually, for he speaks with zest of his two favorite subjects, mathematics and Greek (one of his respected teachers in mathematics being an uncle of the writer, Stephen O. Edwards, who later was a brother lawyer of Mr.

UNIVERSITY OF MICHIGAN LIBRARIES

GREEN's). Mr. GREEN liked mathematics and Greek, but he did not like the girls in this coeducational school. They had all the seats near the window; Mr. GREEN had a corner seat surrounded by blackboards; and the teachers tended to "placate the girls." Whether this early experience produced later results no one can tell. Mr. GREEN says characteristically: "Well, it's true I was a bachelor then, and I still am." He graduated from Classical in 1883, at the age of 15.

He was uncertain about going to college. If he did, it was to be Brown. He never had a thought otherwise. The family was a Brown family—alumni, fellows, trustees galore. Mr. Arnold Green left decisions to his children (there were the Senator, 2 sisters, and the 3 little boys) with a freedom that was remarkable. On the day for matriculation in the autumn of 1883 he asked Theodore if he was going to college. The son said he was uncertain, though he had taken rather casually and passed an entrance examination, giving up a picnic at the last moment to attend to it.

But the college bell was ringing, and Theodore strolled over to the Brown campus and climbed to Upper Manning Hall where matriculation was in progress. Someone set off some firework caps, and the future Senator suddenly found himself held for questioning by President Robinson, literally before he had made his final decision to enter college. This was his first encounter with "Zeke" Robinson (stern but undignified). Green told him he was not guilty, did not know who the culprits were, and would not tell him if he did. This outraged Robinson, who called on Arnold Green. "Forget it," said the father, and as Green, senior, was a prominent citizen the president "forgot" it. Later that year the president raided 16 Slater Hall, where Green lived with John Henshaw. Green did not gamble, but some of the group were gambling. Robinson went again to Arnold Green, and there was even talk at that or another time of young Green's going to Amherst. "In any event," said President Robinson to the father, "the room was so full of smoke it was unhealthful." "Get him a larger room," said Arnold Green.

The son did top work scholastically—mathematics under Prof. "Nat" Davis, Greek under the elder Prof. Albert Harkness. There is a well-known story that Theodore reported to his father that he stood second in his freshman year. "Work harder," said Arnold Green. At the end of the sophomore year, Theodore reported: "I led my class." "They must have pretty low standards," the father replied. The writer asked the Senator if this story was apocryphal. "No," he replied, "something very much like that happened."

The transition to Harvard Law School (after a 3-year interval—1 year of postgraduate work at Brown and 2 years in a law office) seemed natural. Senator GREEN was the 4th oldest son in 4 successive generations to be a lawyer: Timothy Green, Timothy Ruggles Green, Arnold Green, and the Senator. A fifth oldest son in the next generation is the Senator's nephew, Ronald C. Green, Jr., Harvard Law School 1934, now practicing in Providence with the firm of Hinckley, Allen, Salisbury & Parsons (once Green, Hinckley & Allen, of which the Senator was a senior member for about 20 years).

Mr. GREEN lived for his 2 years on Cambridge Street ("near that big red building"—obviously Memorial Hall). He said that as far as grades went he did all right, but he remembers with some pride that he officiated as usher at two weddings during examination periods. This did not trouble him. "I never took examinations hard," he says.

Dean Ames, John Chipman Gray, and James Bradley Thayer were among his teachers, and he remembers them as great men. Ames, he thought, was not great as a teacher, but a very fine person. Gray was the outstanding teacher of this trio of giants.

After finishing 2 years, Mr. Green decided to go to Germany to complete his work. He and his father consulted Dean Ames, who was opposed. His opposition was obviously useless, as Arnold Green had done the same thing in his youth.

So the future Senator set off for Germany, to Weimar for a summer and a winter to learn the language, and then to Bonn for two terms with a term at Berlin in between. One of his vivid recollections is of Dr. Paul Krüger, famous German jurist and historian, and translater of the Gaius palimpsests. Krüger would take the matter in hand (for example, the Institutes of Gaius) and call on students to read a paragraph of the Latin and then translate it, at sight, into German for the benefit of the class. Mr. GREEN says this was terrifyingly hard for him. On the street after class he ran into the great Krüger, walked along with him, and mildly suggested that perhaps Krüger would have thought, because of language difficulties, of passing over him. "No," said the professor, "I do not discriminate. I will continue to call on you. You will be able to do what is asked." And he did. The Senator says that nothing has seemed hard to him in life since.

The Senator's admiration for Roman law and its great figures is boundless. For 3 years after his return, he taught Roman law at Brown. He practiced law with his father, and after his death with Frank L. Hickley, 1894, and the late Arthur M. Allen, 1900, and others, as mentioned above. Subsequently he practiced with Henry C. Hart, 1907, and Patrick P. Curran (later judge of the superior court of Rhode Island) in the firm of Green, Curran & Hart. For the past two and a half decades political interests have been paramount. Space does not permit an account of his charitable and educational activities and his connoisseurship in art, particularly in the field of Chinese painting.

One observation may be made in conclusion. The Senator's attitude to his education explains in part his cheerful longevity. He has taken things as they came, with no undue fear or distrust. If he had any advice to give younger men and younger lawyers, it would, he said, be this: "Just tackle things as they come up. Things are never as bad as they seem."

By way of confirmation of this spirit, his easy serenity is well expounded in a piece of verse which he composed for the Class of 1887 Gate on the Brown Campus. He frankly likes the lines and thinks that they are rather pat. There are two examples of paronomasia in it—the metaphorical reference to the actual college pump and well which are close by and to "Hope College," the ancient dormitory beside the gate.

> Welcome, O undergraduate,
> Within this '87 gate!
> All ent'ring here find hope endures,
> The fount of knowledge still allures,
> And here good fellowship abides,
> To cheer and help whate'er betides.

The Senator has in his own life, perhaps without realizing it, been the perpetually optimistic and perpetually youthful hero of his own couplets.

Mr. SPARKMAN. Mr. President, before I conclude remarks on the housing bill, I wish to take advantage of the opportunity to say a word regarding our esteemed and beloved colleague, the youthful Senator from Rhode Island. When I say "youthful," even though I say it rather facetiously, there is a great deal of truth in it.

I wonder if Senators noted a few minutes ago the statement of the Senator that it was difficult for him to realize that he had lived this length of time unless he started to think back over his life in detail. I think that is true, because if ever I was associated with a person who was eternally youthful, it is the distinguished senior Senator from Rhode Island.

There is a poem I have been thinking of. All of us are familiar with it.

> Grow old along with me,
> The best is yet to be.

I often associate that couplet with older persons, but I would have great difficulty in associating it with THEODORE GREEN. It is hard for me to think of him as having reached the ripe age which has been attributed to him today.

I have the great privilege of serving as a member of the Committee on Foreign Relations under the very able and distinguished chairmanship of Senator GREEN. I entered the House of Representatives at about the same time Senator GREEN came to the Senate. During my service in Congress, I have served under a great many chairmen, but never have I served under one who was finer, abler, more devoted, and more considerate of those working with him than is the very able chairman of the Committee on Foreign Relations.

The Senator from New Jersey [Mr. SMITH] spoke about the devotion of the Senator from Rhode Island to duty. When we realize the extent to which the Committee on Foreign Relations has been subjected to almost constant hearings during the whole session of Congress, first, on the Middle East resolution, and then on the various studies of foreign aid, and later on mutual security, in addition to the consideration of treaties and of nominations during the whole year, only then do we realize that the Senator from Rhode Island is one Senator who is always on time at the beginning of a hearing and is present when the hearing ends.

Mr. JACKSON. Mr. President, at this point will the Senator from Alabama yield to me?

The PRESIDING OFFICER (Mr. LAUSCHE in the chair). Does the Senator from Alabama yield to the Senator from Washington?

Mr. SPARKMAN. I am glad to yield to my friend, the Senator from Washington.

Mr. JACKSON. I should like to say that anyone who has traveled abroad with the distinguished senior Senator from Rhode Island [Mr. GREEN] knows that it is always necessary to be on time for an appointment, because the Senator from Rhode Island is always ahead of time.

Mr. SPARKMAN. The Senator from Washington is correct. I believe that everyone who has traveled with the senior Senator from Rhode Island knows that to be true. I have had the pleasure of traveling with him, under his chairmanship; and I know something of the devotion he has given to the work on which he has been engaged.

Mr. LONG. Mr. President, will the Senator from Alabama yield to me?

Mr. SPARKMAN. I yield.

Mr. LONG. During the 8 years I have had the honor of being a Member of this body, it has been my good fortune to serve on half of the Senate committees. It has been a great honor, and has afforded a fine opportunity to learn. During that time I have never seen any committee chairman work any more diligently or devote more time in attending to his responsibilities than has the distinguished senior Senator from Rhode Island, who serves as chairman of our Committee on Foreign Relations.

Although I am not certain that I could prove the point, I believe that the Foreign Relations Committee has perhaps sat more hours during the present session than has any other Senate committee. Never for 1 moment while the Foreign Relations Committee has been in session and has heard witnesses during the present session, has any other Senator been compelled to assume the responsibilities of the Chair; on every occasion the chairman of the committee has been present to hear the witnesses and to preside over the committee and to give each member of the committee an opportunity to be heard.

As one of the junior members of the committee, I have had the opportunity of observing the great patience and the outstanding vigor of the chairman of the committee, as he has presided for long hours, while various members of the committee have explored sundry matters in which they have been interested, even though they might not have been of such great interest to other members. Nevertheless, the chairman of the committee has never tired; he has never attempted to shut off a Senator's remarks. He has always been willing to remain at the committee meeting while any Senator has endeavored to obtain information on matters in which he is interested. I believe the senior Senator from Rhode Island excels any other Member of the Senate in tirelessly and faithfully pursuing his duties.

Mr. MONRONEY. Mr. President, will the Senator from Alabama yield to me?

Mr. SPARKMAN. I yield.

Mr. MONRONEY. Mr. President, it has not been my good fortune to travel with the senior Senator from Rhode Island [Mr. GREEN]; but when one travels to various parts of the world where the Senator from Rhode Island has been, one finds that the Senator from Rhode Island has been a wonderfully fine representative of the United States. His willingness to climb the highest mountain or to swim in the coldest swimming pool has established for him a worldwide reputation. As a dinner partner or raconteur, the Senator from Rhode Island has no peer. How wonderful it is when the oldest person to serve in the Senate of the United States still has the delightful personality and the great knowledge and wisdom that the Senator from Rhode Island has attained through the years.

It is certainly a great pleasure for me to have the privilege of serving with so eminent and distinguished a Senator.

Mr. MORSE. Mr. President, will the Senator from Alabama yield to me?

Mr. SPARKMAN. I yield.

Mr. MORSE. Let me say to the chairman of the Foreign Relations Committee, the senior Senator from Rhode Island [Mr. GREEN], that I am honored to join in these expressions of good will to him. I congratulate him on the historic record he has made in the Senate. My congratulations really have little to do with his length of service in the Senate or his age. Instead, my congratulations are based upon the great record of liberal service to the people of the Nation that he has made by his outstanding liberal voting record. During his years of service in the Senate, he has demonstrated that he recognizes that our primary obligation as legislators is to the welfare of the people.

Mr. President, there are not many persons in public life about whom the words I am about to say can truly be said; but, Mr. President, it is true that the senior Senator from Rhode Island is a great Christian, and he lives by the Christian law.

Mr. CAPEHART. Mr. President, will the Senator from Alabama yield to me?

Mr. SPARKMAN. I yield.

Mr. CAPEHART. I wish to say only a word, for I do not know how one could add very much to the many nice things which have been said this afternoon about the senior Senator from Rhode Island [Mr. GREEN].

Certainly there is only one Senator THEODORE GREEN; and when he was made, the mold was thrown away.

I wish to state what a privilege and pleasure it has been to serve with him on the Foreign Relations Committee.

Mr. President, I say to Senator GREEN, God bless you.

Mr. GORE. Mr. President, will the Senator from Alabama yield to me?

Mr. SPARKMAN. I yield.

Mr. GORE. Mr. President, the accustomed place of the distinguished senior Senator from Rhode Island [Mr. GREEN] in the private room which has a round table around which Democratic Senators gather for lunch is at the head. If any Senator finds himself occupying that chair when the distinguished senior Senator from Rhode Island enters that sanctimonious room, such a Senator feels embarrassed; and if he is a very junior Senator, he quickly leaves that place, and makes way for the eminent, distinguished, and lovable senior Senator from Rhode Island. Then, with his matchless sense of humor, his good spirit, and his fine fellowship, the Senator from Rhode Island entertains and regales all present, thus improving our appetites although increasing our luncheon bill, but, importantly, increasing also the understanding, the compassion, the sympathy, and the good fellowship which stand all of us in such good stead.

I joint in every good word that has been said of this distinguished man; and I wish for him many, many more anniversaries.

Mr. CHURCH. Mr. President, will the Senator from Alabama yield to me?

Mr. SPARKMAN. I yield.

Mr. CHURCH. I should like to say that it has not been my pleasure to serve so long as my colleagues have with the distinguished senior Senator from Rhode Island [Mr. GREEN], nor to know him so well as he is known by many of the Senators who have spoken today. But it has been my pleasure to make his acquaintance in recent months.

Since I now happen to be the youngest Member of this distinguished body, perhaps it will be appropriate for me to say that during the last 4 months of my acquaintance with Senator GREEN, of Rhode Island, oftentimes I have thought that I should like to serve in these halls for as long a time as he has served here. But regardless of whether I serve that long or whether my service is much briefer, I hope I can bring to my service here the spirit of youth that has characterized the service of the distinguished senior Senator from Rhode Island during these many years. Mr. President, youth is best measured in terms of its spirit; and the distinguished senior Senator from Rhode Island is as young in heart as any Senator of the United States. I think this is a tribute to the outstanding interest he has in the welfare of the people of the United States and the future of our country, for the spirit of youth looks to the future, rather than to the past; and this has characterized the service of the distinguished senior Senator from Rhode Island.

So I am happy to join at this time with my colleagues in wishing him good luck and Godspeed in all the years that I know lie ahead of him.

Mr. SPARKMAN. Mr. President, let me say just a concluding word: Yesterday I read in one of the newspapers something that I had heard the distinguished senior Senator from Rhode Island [Mr. GREEN] say in so many words, namely, that he is not at all content to rest on the laurels he already has acquired, but that he intends to serve in the Senate until he is 100 years old. I believe his colleague, the junior Senator from Rhode Island, made reference to that, and said if that is what he wanted to do, he would do it. I think most of us who know THEODORE GREEN believe that is true. I remember what he said to me shortly after the election of 1954, when I said to him, "You know, before you finish this term of service, you will have been the oldest man ever to have served in the United States Senate." He shrugged his shoulders and said, "That's nothing. I want to be serving there until I am 100, and the trouble is I will have to run for reelection twice more, because when I complete my service the next time I will be 99, and I will have to run again."

The thought occurred to me that if the distinguished Senator from Louisiana [Mr. LONG] serves in the Senate until he is as old as the Senator from Rhode Island is, he will have served in the Senate 60 years, and the distinguished Senator from Idaho, who has just spoken, will have served a total of 58 years. I think we get some measure of this man—this youthful man—from that fact, when we think in terms of that kind.

I wish to say to our esteemed colleague from Rhode Island that if he aspires to serve in the Senate until he is 100 years old, I certainly wish for him the attainment of that ambition, and I also hope as many of those as may want to stay

UNIVERSITY OF MICHIGAN LIBRARIES

with him during that time may likewise serve here, because it is a great place, not only in the association of one with another, but in the opportunity Members have to render real service to their country; and in that respect no one can surpass the distinguished record of the man to whom we have paid tribute this afternoon.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had agreed to the concurrent resolution (S. Con. Res. 33) requesting the President to return the enrolled bill S. 1463 to the Senate.

HOUSING ACT OF 1957

The Senate resumed the consideration of the bill (H. R. 6659) to extend and amend laws relating to the provision and improvement of housing, to improve the availability of mortgage credit, and for other purposes.

HOUSING FOR ESSENTIAL MILITARY AND PERMANENT CIVILIAN PERSONNEL

Mr. SPARKMAN. Mr. President, despite the other housing programs designed to provide housing at or near military establishments for military and civilian personnel of the Armed Forces, there are apparently still some localities where this need of housing has not been met. In order to assist in meeting this need, this bill adds a new section 229 to the National Housing Act authorizing the Commissioner to insure and to make commitments to insure mortgages where the Secretary of Defense has certified to the Commissioner that the housing with respect to which the mortgage is made, is necessary for national defense. Such certification shall be evidence of the need for housing and that the property is an acceptable risk for insurance.

This new section provides that the Secretary of Defense, with the approval of the Commissioner, must determine that housing is not available for personnel of the armed services at reasonable rentals within reasonable commuting distance of their duty stations. In addition, the Secretary of Defense shall determine that the property to be insured under this new section will not curtail occupancy in existing housing insured by the FHA.

Existing provisions of law will determine eligibility for FHA insurance with the exception of the conditions described above. Properties insured under this section shall be held for rental for a period of 4 years after the date of initial occupancy or until such time as the Secretary of Defense indicates that they may be released from the rental requirement. Priorities for military and permanent personnel of the armed services are established.

TITLE II—FEDERAL NATIONAL MORTGAGE ASSOCIATION

Perhaps the most urgent problem and the greatest deterrent to the production of housing this past year has been the ever-dwindling supply of mortgage money available for federally underwritten housing programs. There is no need to point out that this situation has occurred because of increases in the rediscount rate, higher yield from alternate sources of investment, demands on the money supply for industrial plant construction, expansion, and modernization, and the initiation of such new programs as that presently used to finance shipbuilding.

As a result of the flow of investment into other areas, the production of housing units has declined. For the first quarter of 1957, all private housing starts had declined to an annual rate of 933,000, as compared with an annual rate of 1,138,000 started during the first quarter of 1956. This represents a decline of 18.1 percent. During the first quarter of 1957, of the actual 200,200 starts, 33,300 were under VA-guaranteed mortgages—down 45.3 percent from the first quarter of 1956, and 28,200 were under FHA insurance—down 34.5 percent during the first quarter of 1956.

To me, these figures represent an alarming situation. Experts predict a tremendous demand for housing from 1960 on. Facts reveal that during the 1930's the birthrate was comparatively low, running about 2¼ million annually. During the forties, the birthrate increased to almost 4 million, and today stands at an annual rate of a little more than 4.2 million. When we couple these figures with the fact that the average young couple marries at age 20 to 25, it becomes inevitable that the high birthrate of the forties will be translated into a high rate of family formation in the sixties. Hence, we know that in the sixties we can expect not only a high rate of family formation, but also a high demand for housing.

In order to meet the demand we are now facing and the demand we must anticipate, it is imperative that some method be found to encourage a continual flow of funds into the mortgage financing field. In this connection, as private sources of investment funds decrease both in number and in size, builders and brokers seek access to the Federal National Mortgage Association.

It is evident that so long as the tight money market prevails, FNMA funds will be in great demand. The committee feels that additional purchasing power must be given to FNMA for its secondary market operations if housing production is not to fall below its present level.

SECONDARY MARKET OPERATIONS

In an attempt to stabilize the market for federally underwritten mortgages and to prevent the continuing decline in housing starts and applications, this bill would increase FNMA's authority to purchase mortgages by $500 million, thus the ceiling on FNMA's borrowing authority would be increased from the present $1.6 billion to $2.1 billion.

At the same time and in order to implement this additional borrowing authority, the bill would authorize an increase in the maximum amount of FNMA's secondary market obligations that the Secretary of the Treasury may hold. Presently, the Secretary of the Treasury may hold FNMA obligations up to a total of $1.35 billion. This authority is normally used as a source of ready funds available to FNMA at times when issues of its debentures for sale to the general public is not feasible. It also provides assurance to private investors that FNMA has available a source of liquid funds which may be used to purchase maturing debentures. This bill would increase this authority from $1.35 billion to $2.1 billion.

FNMA SPECIAL ASSISTANCE

One of the principal functions of FNMA is to provide special assistance for the financing of selected types of home mortgages, pending the establishment of their acceptability in the private mortgage market. Funds authorized for the special assistance program are divided generally into two categories: First, funds made available for Presidential allocation when, in his opinion, the conditions in the building industry and the national economy require the use of such funds for the purchase of mortgages on a special assistance basis; and, second, funds earmarked specifically by statute for the purchase of certain types of Government-guaranteed mortgages.

The pending bill makes several changes in both categories of special assistance funds.

FNMA PURCHASE PRICE

Existing law establishes a minimum purchase price of 99 percent of par for mortgages purchased under the special assistance functions. This statutory provision is scheduled to expire on August 6, 1957. This bill would extend this feature of the law for 1 year. In addition, the section dealing with this extension limits the fees and charges which may be made by the FNMA to 1 percent of the face amount of the mortgage. These two provisions, therefore, would assure the seller of an eligible mortgage a price equal to at least 98 percent of the mortgage amount.

FEES AND CHARGES ON MORTGAGES DELIVERED IN THE FUTURE

In order to assure that the originators of special assistance mortgages receive the full benefit of statutory action limiting the FNMA fees and charges and the purchase price of such mortgages, language has been added in this bill which would make these benefits available at the time the mortgage is delivered without regard to prior agreements existing between the originator and the FNMA. This benefit may be applied to mortgage commitments entered into after March 31, 1957, and fulfilled after enactment of this bill.

FUNDS SUBJECT TO PRESIDENTIAL ALLOCATION

Pursuant to existing law, funds totaling $300 million are subject to Presidential allocation, of which $100 million is available for use on a participation basis with private lenders—20 percent of a loan from FNMA funds and 80 percent from private funds. None of this $100 million has been used.

The bill would repeal the provision of existing law authorizing the $100 million fund for participation in loans with private lenders and would increase the general fund subject to Presidential allocation from $200 million to $450 million.

In effect, this is an increase in the authorization for Presidential allocation of $150 million.

FUNDS ALLOCATED DIRECTLY BY STATUTE—COOPERATIVE HOUSING MORTGAGES

Existing law allocates $100 million for the purchase of cooperative housing mortgages insured under section 213 of the National Housing Act. This bill would increase the allocation for cooperative housing mortgages by $250 million, making a total allocation of $350 million. Not more than $175 million of this total authorization may be used for the purchase of mortgages secured by consumer-sponsored or builder-sponsored projects. The bill also provides that not more than 10 percent of this fund may be outstanding at any one time in commitments covering properties in any one State.

It is believed that the cooperative housing program should be continued at a high level of activity. Until cooperative housing mortgages achieve a greater degree of acceptability among private investors, it is necessary to assist the program by providing additional funds through FNMA special assistance.

ARMED SERVICES HOUSING MORTGAGES

Existing law provides $250 million in special assistance funds for the purchase of military housing insured under sections 803—Capehart—and 809—housing for essential civilian employees of the Armed Forces—of the National Housing Act. This bill would authorize FNMA to purchase under its special assistance functions an additional $200 million in mortgages originated under title VIII.

SECTION 809 MORTGAGES

Last year, pursuant to Public Law 574, approved June 13, 1956, Congress authorized a small but important program which permits the FHA to insure loans to essential civilian employees stationed at military research or development centers. These research or development centers are primarily engaged in the development of the guided missiles and related projects. This bill would reserve for the purchase of these mortgages 7.5 percent—$30 million—of the FNMA funds allocated for the purchase of armed services housing mortgages. The $30 million figure represents 10 percent of the authorization added by this bill, together with approximately $10 million already reserved out of existing authorization.

CONSTRUCTION ADVANCES BY FNMA

The bill would authorize the FNMA to make construction advances on special assistance projects where the FHA insures such construction advances and where the FNMA has made a commitment to purchase the mortgage. This procedure should reduce the total financing costs of the project and will enable many projects to go forward which would otherwise be delayed through lack of construction financing. The bill would further authorize FNMA to impose additional charges or fees for this service not to exceed 1 percent of the principal amount of the loan.

FHA SECTION 221 MORTGAGES

As I have explained earlier, the bill would substantially increase the scope of section 221 of the National Housing Act. While the interest rate of 4 percent, which would be established for these mortgages, is sufficient to repay the cost of Federal borrowings and the cost of administering the program, it would not be attractive in the private market at the present time. Consequently, it is essential to provide special assistance funds for the purchase of mortgages originated under section 221. This bill, therefore, would establish a new special assistance category in the amount of $250 million for the purchase of mortgages insured under section 221. It is recognized that these funds will not provide housing in any great quantity, but it is hoped that the $250 million will provide a modest beginning toward relieving the critical housing situation faced by displaced families, elderly persons, minority groups, and large families.

TITLE III—SLUM CLEARANCE AND URBAN RENEWAL

Now I should like to talk about the provisions in the bill relating to the slum clearance and urban renewal program. As you know, the Federal Government, through the Housing Act of 1949, as amended in 1954, has a major role in the nationwide task of eliminating slums and blight in our cities. The Congress has recognized that local communities with their limited tax resources needed Federal assistance in this tremendous task. The Federal Government extends financial assistance in the form of loans, advances, and capital grants to local agencies responsible for carrying out local urban renewal programs.

The progress of the local programs was disappointing at the beginning, but in the last year it has been encouraging. In practically every city of any size located in all but 6 of the 48 States, the concept of urban renewal has taken hold. We are looking forward to the time when this program will have eliminated the hard core of slums and blight in our cities.

The bill recommends that the present capital grant authorization of $900 million be increased by $250 million a year for each of the next 4 years.

In arriving at the amount of new capital grant authorization, the committee was impressed by the testimony of witnesses, including many mayors of cities with active urban renewal programs, who urged the continuation and expansion of the program. These witnesses pointed out that an urban renewal program cannot operate on a sporadic basis and urged that new authorization should be sufficient to insure continuity. The typical urban renewal program requires 3 to 5 years from the planning stage to completion. The committee, therefore, feels that a program spread over a 4-year period would give it the continuity essential to its success.

Mr. President, the administration's position on this increase has not been clear. The President's budget message requested capital grant authority of $250 million a year for each of the next 2 years; a bill to the Senate—S. 1609—cut this figure to $175 million for 1 year; on May 7 the Administrator of the Housing and Home Finance Agency reversed the administration's position again and now appears to favor an authorization of $250 million for 1 year. Reductions in capital grant authority are defended in the name of inflation and as an attempt to reduce the 1958 budget. Actually, money authorized in this bill would be allocated over the next 4 years, but probably will not be spent for 3 to 5 years beyond that. It will not come from the 1958 budget. And who can predict the state of the economy 7 to 9 years in advance? The inflation of today may turn into deflation tomorrow.

During our hearings, we also heard considerable testimony that the Federal Government's present share of two-thirds of net project cost was inadequate for an aggressive continuing local program. The witnesses claimed that many local governments had exhausted their tax resources and bonding powers, and that they would have to slow down their urban renewal efforts unless the cost-sharing formula was adjusted to provide a greater proportion of Federal assistance. Your committee is proposing, therefore, that the Federal share be increased from two-thirds to three-fourths of net project cost.

For reasons submitted by the administration, as well as by many witnesses, a new alternative formula of Federal participation is being proposed. This new formula, to be used at the option of the local body, would require Federal participation of 85 percent of net project cost to be paid on the basis of a revised definition of gross project cost. By this revised definition, all administrative costs and survey and planning expenses would be the sole responsibility of the local body and would not be included in the base used for computing the Federal Government's share. By eliminating these costs from the base, it is expected that the program can be simplified and considerable redtape eliminated. It is expected that the Federal share will be about the same under either formula.

The bill would also increase the proportion of total capital grant funds for any one State from 10 to 15 percent in order to eliminate the possibility that more active States would be required to stop their programs because of the present limit. The Urban Renewal Administration would be authorized to establish maximum payments for moving expenses of individuals and families to be made without requiring proof of actual costs. The maximum payment for these expenses is $100.

For business concerns, the bill would increase the maximum payable for moving expenses from $2,000 to $3,000.

The bill would also establish a 3-year fellowship program for graduate training in urban planning and related fields. I have been impressed time and time again by the shortage of qualified persons to administer this very complex program. We need better and more trained persons, and I should hope that a fellowship program of this sort would help create an academic interest in the housing and planning field. Total cost of

UNIVERSITY OF MICHIGAN LIBRARIES

the 3-year program would be $500,000. The urban renewal program alone involves expenditures of billions of dollars of local and Federal moneys. By developing better trained and qualified personnel, I believe that the fellowship program would be one of the best investments that the Federal Government could make.

TITLE IV—PUBLIC HOUSING

In considering the requirements of the public housing program, the Banking and Currency Committee made recommendations to revise the income requirements for eligibility and for continued occupancy of low-income families in public housing. It was brought to our attention that the present formula for computing eligibility requirements need revision; that many needy large families are denied low-rent public housing because of inability to meet certain arbitrary standards used in computing net income.

The new provision would allow local housing authorities to increase the exemptions from family income for families seeking admission to low-rent public housing. It would permit an exemption from family income up to $600 of income earned by any member of the family other than the principal wage earner, also $100 for each adult member with no income. These same exemptions would be permitted for computing eligibility for continued occupancy, except that minors would continue to have full exemption of income for purposes of continued occupancy.

The bill further increases the maximum cost limits for low-rent housing from $1,750 to $2,000 per room and for units designed for elderly, from $2,250 to $2,500 per room. Costs of materials and labor have increased by 24 percent since the present limitation of cost was established for public housing units. By allowing these higher limits, we are making it possible to construct public housing units at a price consistent with that of comparable private construction.

The committee also recommends the elimination of the workable program requirement for public housing. This provision of the law has worked an undue hardship on communities, particularly the small ones which do not have or contemplate urban renewal programs. The preparation of a workable program has in the past been an onerous task requiring time and experienced personnel which small communities cannot afford. I believe that workable programs should be encouraged, but it should not necessarily be used to force a community to undertake such a program as a prerequisite to public housing.

We are also proposing that existing law be amended to require that plans and specifications for low-rent public housing follow the principle of modular measure. This will permit economies in design and construction of this type of housing and will permit more builders, especially those of prefabricated housing, to participate in this vital program.

The bill also provides that the Commissioner of Public Housing use up to $5 million of funds, which he is otherwise authorized to borrow from the Treasury, for the purchase of housing and equipment which may be made available to local public agencies, the American Red Cross, or others to provide shelter for disaster victims. By this provision it is contemplated that approximately 2,000 1-, 2-, and 3-bedroom trailers could be readily made available for occupancy in a disaster area within a minimum period of time after the President declares an area to be a disaster area.

DISPOSITION OF WAR HOUSING PROJECTS

The bill contains four provisions which would waive certain requirements of the Lanham Act and permit the Administrator of the Housing and Home Finance Agency to sell certain war and emergency housing projects to local housing agencies. The projects concerned are located in Connecticut, Conn-6029; Nevada, Nev-26021; Louisiana, La-16011 and La-16012; and Utah, Utah-4215.

TITLE V—MILITARY HOUSING

Under existing law, the military housing program is scheduled to expire on June 30, 1958. This bill would extend the program for 1 year, or until June 30, 1959. Pursuant to the military housing program, each mortgage originated under the program is limited to an average of $16,500 per unit. Experience under the program so far has shown that it is difficult to finance large projects under single mortgages. In many instances, it has been found necessary to divide some of the projects into several sections and to enter into separate mortgages for each section. Such an action has facilitated the placing of mortgages. However, difficulties have been encountered in dividing projects into areas so that each contained a proportion of officer and enlisted units which would permit the services to observe the $16,500 limitation. The Department of Defense has requested that the $16,500 average maximum per unit be applied against the project as a whole rather than as against each mortgage. This bill provides for this amendment.

While there is a stautory amendment on the average maximum cost per unit, there is no limit with respect to the cost of an individual unit. The lack of such a dollar limit might encourage the construction of a smaller number of high-priced homes for high ranking officers. In order to prevent this possibility, the bill would place a limit of $25,000 on any one individual unit. This limit will approximate limits placed on appropriated fund housing.

In addition, the bill redefines eligible bid to mean a bid with a reasonable relation to the FHA estimate of replacement cost.

TITLE VI—MISCELLANEOUS—COLLEGE HOUSING

The college housing program, originally authorized by the Housing Act of 1950, is continuing to relieve the critical shortage of dormitories on college and university campuses. This program enables the HHFA Administrator to make direct loans, up to 50 years in term, at low interest rates, for the construction and related service facilities for college and university students and faculties.

The HHFA estimates that by the end of the current fiscal year only $92 million of the $750 million revolving fund will be unallocated. Testimony received in connection with this program revealed that the need for student housing is acute and that this deficiency will become even more acute next year. In the fall of 1955, enrollments were at an all-time high of 2¾ million students. It is estimated that this figure will rise to 3 million in 1960, and by 1965 will exceed 4 million. Since dormitories will be ready for use in 1960 only if the projects are financed in fiscal 1958, the need for loans in the coming year will exceed that in any prior year.

This bill, therefore, would increase the college-housing authorization by $200 million. This amount, plus the estimated $92 million carryover, will enable the program to operate at a reasonable level during fiscal 1958.

In addition, the bill amends the definition of "educational institution" in several respects. The first modification makes eligible for loans accredited schools, the sole function of which is the training of ministers, priests, rabbis, and other divinity students. The second change would permit certain State agencies or public authorities, established to provide housing for students and faculty of State educational institutions otherwise eligible, to qualify as an eligible borrower under the college housing program.

In addition, the bill amends the definition of "educational institution" to include "any hospital operating a school of nursing beyond the level of high school approved by the appropriate State authority, or any hospital approved for internships by recognized authority, if such hospital is either a public hospital or a private hospital, no part of the net earnings of which inures to the benefit of any private shareholder or individual." In order to provide the necessary funds for housing contemplated for nurses and interns, the bill would earmark $25 million of the college housing loan revolving fund for the construction of such housing.

VOLUNTARY HOME MORTGAGE CREDIT PROGRAM

Under present law, the voluntary home mortgage credit program ceases operation on June 30, 1957. This bill would extend the program until June 30, 1960.

FARM HOUSING RESEARCH

Much of the attention of the Federal Government in the past has been devoted to the improvement in the quality of urban housing. Farm housing has been neglected and it is believed that studies should be made by qualified personnel to develop ways and means to improve housing conditions on the farm.

The bill, therefore, would make available $300,000 during each of the fiscal years 1958 and 1959 for research and study of farm housing in the United States. The work would be done by land-grant colleges under terms, conditions, and standards specified by the Administrator.

EXCHANGING HOUSING DATA WITH FOREIGN COUNTRIES

Because of the significant recent progress made in this country in dealing with problems relating to housing and urban

planning and development, very frequently the housing agencies are called upon to provide information to other countries engaged in solving similar problems. Furthermore, the housing and urban planning experience of many other countries has been and will continue to be helpful to the housing industry, the Congress, and the Administrator in developing new methods of meeting related problems in this country. This bill, therefore, authorizes the HHFA Administrator to exchange with other nations data relating to housing and urban planning and development.

Mr. MORSE. Mr. President, will the Senator yield to me to make a brief comment on his bill, because I should be very glad to have his point of view on my comments.

Mr. SPARKMAN. If the Senator will permit me to add a brief statement to what I have said, I will then be able to sit and listen to the Senator from Oregon speak in his own right, because I can complete my statement in a moment or two.

Something has been said here this afternoon about the increasing cost of housing. I have run across some figures which I should like to place in the RECORD. I find that the average price of a house in 1954 was $12,300. In 1955 it was $13,700. I do not have the figure for 1956, but I believe it was $14,500. In 1957, the probable amount will be $15,500. The figure had not been finally computed at the time this table was published. In other words, these figures show there has been a steady climb each year, without any letup.

Mr. President, in the statement I have made this afternoon I have tried to explain, according to the various titles, the subject matter contained in the bill. I want to stress the point, in line with the answer I gave to the distinguished junior Senator from Oregon [Mr. NEUBERGER], that I do not regard this bill as by any means meeting the requirements of what could be called a good housing program. By that I mean a program to take care of new family formations, which, by the way, are running from 800,000 to 900,000 a year; a program to replace homes which become obsolete or are destroyed by reason of fire, flood, or tornado; homes which are destroyed by reason of great improvements such as highways, parks, recreation areas, and other public improvements of various kinds. Nor does it meet the problem that presses upon me heavily, and I believe presses upon every person who has given adequate consideration to an overall adequate housing program, and that is the need of the great mass of people in what would probably these days be called the lower income brackets—that is, those having incomes from $5,000 downward, and who, by the way, constitute the great majority of the people of this country. They are not a small segment, but a tremendous part of the total population.

I think in devising any housing program we ought to have concern as to whether or not the program gives a reasonable opportunity to the various segments, all the economic levels of our people, to enjoy the objective that Congress declared in 1949 to be our housing policy; that is, a decent home, amid decent surroundings, for every American family. That does not mean that every family can get it, but no family ought to be denied an opportunity to get it because he belongs in an income group that does not measure up. There ought to be some opportunity for all.

However, I recognize the stringent conditions that prevail today. I recognize the presence of inflation and the increasing rise in the cost of living and in the cost of housing. I recognize the existence of high interest rates, the tight money policy, and the squeeze that is prevalent now in the field of home-mortgage money.

As I said in reply to the distinguished junior Senator from Oregon, I regard the bill as more or less a holding piece of legislation. There is nothing in it that is radical or unreasonable. We have proceeded, as best we can, in a conservative manner, to try to provide an overall housing program.

Mr. President, if there is one thing I think we ought to remember, in enacting housing legislation, it is that this bill is not designed for any one group. Unfortunately, a great many people in this country think of housing as applied merely to certain segments. They fail to recognize the overall housing program has a dozen different facets. If one speaks to some persons about housing, some immediately think of public housing. Others think of FHA housing. Others think of slum-clearance housing. Others think of urban-renewal housing. I might go on and name the different categories of housing. An adequate housing program is one that has consideration for all the different facets, which have been carefully worked out through the years, not merely in 1 year, but year after year, by Congress, in trying to provide an adequate overall housing program.

In that light, I regard what we have proposed to the Senate as an entirely reasonable measure—a holding measure, as it were. I hope the Senate will send to the conference between the two Houses a good measure, as strong a measure as we can pass under the circumstances.

Mr. GORE. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. GORE. Earlier today the distinguished Senator from Indiana [Mr. CAPEHART] and the junior Senator from Tennessee were engaged in a colloquy. The junior Senator from Tennessee was having difficulty remembering in what issue of the Washington Post and Times Herald he had read about record high corporation profits.

I find, upon examination, that the article was printed in the same issue from which the senior Senator from Indiana was reading. I read it last night. I should like to read the first and third paragraphs from this article, which appears in the Washington Post and Times Herald of May 27:

> Corporation profits before taxes rose to a record $43.7 billion last year, and will probably be as high or higher this year, the Commerce Department said yesterday. The 1956 before-taxes figure was a billion dollars higher than in 1955.

Mr. President, will the Senator from Alabama yield for one moment further?

Mr. SPARKMAN. I am glad to yield to the Senator from Tennessee.

Mr. GORE. Since the colloquy occurred earlier today, one of our colleagues has told me of a telephone call he received in the cloakroom, and his conversation with a constituent relating to the discount rate. It may not have been the going rate, and I am not sure just what it was, but the constituent told this colleague of ours that a 10-percent discount was being paid in his State now on Government-insured home mortgages.

I will ask the Senator: Does that mean that when a $10,000 note secured by the Government-guaranteed mortgage is taken to some financial institution, the borrower receives not $10,000, but only $9,000?

Mr. SPARKMAN. The Senator is correct.

Mr. GORE. The borrower must pay the 4½ percent interest, not on $9,000, but on $10,000, for the next 25 years?

Mr. SPARKMAN. The Senator is correct, though it is not necessarily on $10,000 for the next 25 years. It is on the unpaid portion of it.

Mr. GORE. The interest rate is spread out over a period of 25 years, based on the $10,000, the full amount of which he did not receive.

Mr. SPARKMAN. When the Senator speaks of a 10-percent discount it is well to remember that we speak of it as 10 points discount. Of course, if cash is involved, it has the same effect. If one figures it as to its effect on the interest, one figures 8 points as 1 percent. In other words, if a mortgage is sold at 92, it is discounted 8 points, and if the interest rate is 4½ percent to start with, the interest rate would end up as 5½ percent. By the time the one-half percent fee for insurance is added, it would be a 6-percent loan.

Mr. GORE. Is the Senate to understand that a Government agency is itself buying housing loans at a discount rate, when another Government agency is guaranteeing the loans?

Mr. SPARKMAN. That is true. I think the Senator could find in the record of hearings the place where I told the Director of the Federal National Mortgage Association that I felt he was wrong, that the action was contrary to the intent of Congress, and that in my opinion something ought to be done to reconstitute the Federal National Mortgage Association so as to prevent that.

Not only does the Federal National Mortgage Association engage in those discounts, but I think it can be conclusively shown that at times the Federal National Mortgage Association actually took the lead in securing greater discounts. At one time I think it was admitted, when the funds became low in the Federal National Mortgage Association, and there was a tendency to make a run for the funds which were left, that the Federal National Mortgage Association deliberately increased the discount rate in order to slow down the number of applications coming in.

I should like to recite another case, which happened near here, at Manassas,

UNIVERSITY OF MICHIGAN LIBRARIES

Va. A builder constructed 900 houses, which were approved by the FHA and by the VA. The houses were sold and occupied. When the builder carried the mortgages over to the Federal National Mortgage Association, he received a surprise. By the way, I think those houses were selling for under $9,000, all the way from $8,000 up to $9,000 in the very price range we need the most. When the builder carried the mortgages to the Federal National Mortgage Association, imagine his surprise to have them rejected, not on the ground that the property was not acceptable, because it had been approved by both the FHA and the VA, but on the ground that better security could be found. What they meant by that was that they could find mortgages covering houses of $20,000 or $15,000, and therefore they did not care to go into the field where the housing was most badly needed, and they refused to buy the mortgages.

That builder testified before our committee. His testimony is found in the hearings. He had to sell those mortgages at a discount of 10 points. He had to sell at 90. It so happened that about 10 days ago I spoke to the home builders of northern Virginia, and I related that bit of testimony given before our committee. After the meeting was over one of the people came to me and said, "You might be interested to know that the Manassas builder went into receivership yesterday."

The Senator spoke of the small-business men. We must remember that most of these builders are small-business men. The man I spoke of was a small-business man building houses in the price range of houses we need to have built, $8,000 to $9,000 houses, so that a person earning $4,000 or $5,000 a year can afford to buy the house. But an agency organized by the Government and allowed to function because of the munificence of the Government declined to buy those mortgages, and preferred to buy from another person selling mortgages on houses which probably sold for from $20,000 to $25,000. The small-business man struggled on 3 or 4 months and then went into receivership.

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. SPARKMAN. Let me point out one other thing. I wish to say in all fairness that I think one of the reasons why the Federal National Mortgage Association acts as it does is a weakness in the law which we passed 2 years ago. We certainly did not intend to have such things happen. We thought we were doing the right thing by trying to convert the Federal National Mortgage Association from a straight-out Federal mortgage corporation to one which is privately owned, very much like the Land Banks, the Farm Credit System, and systems of that kind, where members come in and subscribe to the stock, thereby creating a semi-private organization. So now we have an organization which, instead of feeling it was established to back up the housing industry, feels that it is a private corporation which must make money and must show a return and pay dividends to its stockholders. That is the motivation.

Mr. GORE. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. GORE. Thus again we see an agency of the Government moving deliberately and specifically to push interest rates up. I know of no reason why the Congress, which so recently made an error, if it be an error, to which the Senator referred——

Mr. SPARKMAN. I was stating my opinion. It is only my opinion.

Mr. GORE. I know of no reason why the Congress, which so recently committed an error, cannot undo that error. I shall certainly solicit the support of the Senator and members of his committee for an amendment which I shall attempt to have ready for his consideration and the consideration of the Senate tomorrow. I think it is time that representatives of the people take full cognizance of what is happening to them, and at least in the instance of home ownership call a halt to the spiraling cost of homes and the spiraling rate of interest.

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. CAPEHART. I believe the Senator has done a fine job of guiding the bill through the committee and conducting hearings. I think possible he might wish to correct the RECORD in one respect. He stated that FNMA preferred to buy mortgages of $20,000 to $25,000, when the law prohibits them from buying any mortgage greater than $15,000.

Mr. SPARKMAN. The Senator is correct. I believe that what I actually said was that they preferred to deal in houses costing from $20,000 to $25,000. However, the mortgage could not exceed $15,000. The Senator is correct. I appreciate his making that point clear.

Mr. CAPEHART. The question I wish to ask the Senator from Tennessee is how he proposes to cure this situation. I should be very happy to join with him in introducing proposed legislation which would prohibit FNMA from buying any mortgages for less than par. If we were to do that, we would find ourselves in this situation: FNMA has a limited amount of money, because Congress limits the amount of money it can use. I believe the bill calls for something like $750 million.

Mr. SPARKMAN. It calls for $500 million, but we had previously given them $500 million.

Mr. CAPEHART. If we prohibit the handling of VA or FHA guaranteed mortgages, if we prohibit the Government's guarantee, and say, "You must purchase these mortgages at par," no houses will be built, for the simple reason that no one is going to buy such mortgages at par when they pay only 4½ or 5 percent interest, when he can put his money into other kinds of mortgages or utility bonds, which pay more.

The only reason why builders must sell their mortgages at a discount is the low interest rate which the mortgages carry. We in Congress control the interest rate. If we are willing to increase the interest rates on VA or FHA mortgages by one-half of 1 percent, 1 percent, or more, we shall find the mortgages selling at par.

The only reason a mortgage or bond sells at par is that the combination of the interest rate which the instrument carries, and the amount below par at which it is bought equals the earnings which can be obtained from other sources.

So in order to cure the problem the Senator is discussing, the Federal Government would have to put up enough money to buy all the mortgages at a given interest rate and at a given price. If we are willing to do that, we can solve the problem. But that would require $10 billion, and the Government would be put directly into the mortgage business. It would buy all the FHA-guaranteed mortgages. Then we would not need the FHA, because the Government would hold and own the mortgages.

That is the only way to cure the situation, as I see it. I do not like it any better than does the Senator. The builder does not like it. When I was active in business, I did not like the fact that from time to time I was unable to meet my sales quota, or compete with someone else, because people were buying more from my competitor than they were buying from me. I did not like many things, but I had to work myself out of many situations.

We can cure this situation, if we wish to do it, by law, by having the Government buy the mortgages. If we wish to make it illegal to buy a mortgage guaranteed by FHA or VA at less than par, we can do it. But no private enterprise will buy the mortgages when its money can be loaned in other directions at higher interest rates. Any builder dealing in mortgages will testify that that is the problem.

With respect to the case cited in Virginia, the houses seem to be priced right, at $9,000. The discount on the mortgages was 10 percent. I do not know what the answer to that situation was. Perhaps the builder put too much money into the houses. Perhaps the houses cost too much. Perhaps he could not sell them when he completed them. Perhaps there were not enough people in that neighborhood who wanted that class of house. No one could determine why the builder got into trouble unless he could analyze the entire business transaction.

I should like to know how to cure this situation short of putting the Government directly into the housing business. Is there any way to do it short of that? If there is, I should like to know what it is. How does the Senator propose to do it, short of putting the Government into the housing business? Has any Senator the answer to that question?

Mr. SPARKMAN. The Government is already pretty deep in the housing business. I certainly do not claim that the problem could be solved overnight. I doubt if it could be solved by a single piece of legislation. I doubt whether we are wise enough to do that. I think we can solve the problem. We have been working at it for many years.

Mr. CAPEHART. I agree with the Senator.

Mr. SPARKMAN. I believe the FNMA makes a mistake in leading the market down in setting discounts.

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. CAPEHART. I think what FNMA is trying to do, inasmuch as it has a limited amount of money——

Mr. SPARKMAN. It is using that money as a brake on applications.

Mr. CAPEHART. If FNMA were to take mortgages at 100 cents on the dollar, in 30 days it would use up all the money Congress appropriates for it. What it is trying to do is to hold off and support the market, doing the best it can with a limited amount of money. If FNMA had an unlimited amount of money, if it could buy every mortgage, it could pay 100 cents on the dollar. However, it does not have an unlimited amount of money.

As the Senator knows, FNMA was organized by the Congress primarily to buy mortgages in sections of the country where there was no mortgage money at the time. We did not give any particular thought to the price. That was the purpose originally. Now it has developed into an instrumentality not only to buy mortgages where there are no mortgage companies, but also to buy mortgages, even in the large cities, where purchasers cannot be found for the mortgages. It is a backstop at best. It has a limited amount of money. I do not know how to handle the situation other than the way we are handling it. I do not know how we can get so-called lower interest rates and eliminate the discount feature we now have, which is very troublesome. I do not like it. I would not like it as a businessman. I do not know how we are going to solve the problem. We could do something which I suspect Congress would be opposed to doing, namely, permit the builder to pass on his additional financing costs, his discount costs, and his interest costs in his selling price, just as automobile manufacturers do, and just as every other businessman does. He is permitted to pass on to the buyer his increased financing costs.

We have frowned upon such an idea in connection with guaranteed FHA mortgages and VA mortgages. But we could permit builders to pass such costs on, as every other businessman does. He passes on all his costs. But FHA appraises a house at $12,000, we will say, and then says, "That is the price. We will guarantee the loan on the basis of $12,000, and no more." The FHA appraises the cost of constructing the house, but it does not take into consideration the cost to the builder of financing it.

If we wish to permit the builder to add onto the costs of constructing the house, the cost of financing it, we may be able to solve this problem; at least we will be able to help the situation. Short of that, I do not know what we can do about it, unless we furnish FNMA with billions of dollars with which to buy all the mortgages, and in that way put the Government in the mortgage business.

Mr. GORE. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. GORE. The senior Senator from Indiana has just stated that this Government agency was created for the purpose of providing a market for Government-guaranteed home loans in areas of the country where no market existed for those Government-guaranteed home loans. That was the original purpose. It fulfilled that function and accomplished that purpose. There is not now in any area of the United States a market for a Government-guaranteed home loan at a rate of interest which is written into this bill.

What kind of operation is that? What does a Government guaranty mean? Are we weasels or are we men? Do we want to pass a housing bill providing Government-guaranteed home loans for couples who want to establish a home and a decent place in which to rear their children? If so, let us face that situation. If we want to help discount clippers, let us face that.

Yes, there is a way to do it, and I propose to offer the Senate a choice in that regard tomorrow.

Mr. HOLLAND. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. HOLLAND. First I wish to congratulate the Senator from Alabama on the very clear and fair explanation he has made of the pending measure and to thank him for the very hard work that he and the members of the subcommittee and the members of the full committee have put into the bringing of this bill to the floor.

I should like to ask him a few questions, if I may, about the provisions contained in the pending bill relative to the making of loans to educational institutions, to allow them to better equip themselves with housing for students.

I know that this objective is very close to the Senator's heart, because I have heard him discuss it before. I have had active interest in this field also, by reason of the fact that in our State we have made very great use of existing law for financing new facilities at institutions of higher learning which are publicly operated. And we have also made excellent use of those provisions of existing law at those institutions which are church or private institutions. I know of similar use in other States, particularly in our region of the Nation.

I note that the Senate bill, for some reason which I assume is a good one, does not adopt the provisions of the House bill, which would have made the interest rate on such loans comply with the added cost to the Government now involved in the making of loans comparable in length of duration to the loans that are granted to institutions of higher learning for the building of dormitories and dining halls, and the like.

I believe the RECORD should show something that is not in the report of the committee—or, if it is, I have not been able to find it—stating why the Senate committee feels it unwise to follow the course suggested by the House bill and the House committee; that is, the raising of the interest rate somewhat to reflect the increased interest rate being paid by the Government.

I believe the House bill prescribes that the specific rate of interest being paid by the Government to secure the specific money which is loaned to the college shall be charged, plus a small additional fee to cover the cost of handling—I believe that is one-eighth of 1 percent.

The bill reported by the distinguished Senator and his committee would simply continue the present operation, which, as I understand, at least, would mean that the interest rate would reflect—because it is based on the average rate of interest paid by the Government for all its borrowings—the much lower interest rate paid on short-time loans, and would leave the Government in the position of lending at a loss for this very meritorious class of loans.

I wonder whether the distinguished Senator from Alabama would state for the RECORD why in the judgment of his committee it was wise to continue provisions which have brought about a condition under which this class of loans really operate as subsidies to institutions of higher learning, some of them public institutions not requiring any subsidization at all, and some of them private or church institutions, which may make a better case, and in my judgment do make a better case, for such subsidy.

I hope it will not impose upon the distinguished Senator from Alabama to state in the RECORD just why he and his committee felt it desirable to depart from the philosophy of the House bill, which reflects the increased cost of the procurement of funds by the Government in somewhat larger interest rates for loans made to the institutions of higher learning.

Mr. SPARKMAN. First, let me say that I do not agree particularly with the premise of the distinguished Senator from Florida when he refers to our committee departing from the philosophy of the House bill. As a matter of fact, we adhere to the policy which has been ours from the beginning. By the way, this program originated in the Senate committee, and I had the honor of sponsoring the first college loan program. For some time we have had that provision in the law. In the first program we had it related to the going rate of interest. However, we changed that 2 or 3 years ago and set it up on the present basis.

It would be a matter of argument, I believe, as to whether the Senate formula reflects the real cost of the money to the Government. I do not suppose there is any way of settling the argument, because it depends on how a person looks at it. Under the Senate version the interest rate is supposed to be the average cost to the Government of all the money, plus one-fourth percent for administrative purposes.

The Senator speaks about reflecting the change in the interest rates. Let us remember that this is subject to change. As a matter of fact, it is anticipated that as of July 1 there will be an increase in the interest charged. It is almost a certainty that that will take place.

Be that as it may, an amendment will be offered tomorrow or sometime before we finish consideration of the bill to change that formula on the interest rate,

and that amendment will be fully discussed at that time.

I think it is right to say that we recognize that there is probably a degree of subsidy or some form of Federal aid in connection with these loans. Speaking for myself, I feel that it is one of the smallest things the Federal Government can do in the interest of education. It is very important. It is a matter of importance to practically every college in the United States. Representatives of many different colleges came before the committee and showed us what their budget arrangements were and what the impact would be by a change in the rate of interest on their budgets. Our committee felt that these representatives who came before our committee made a good case for continuing this rate of interest. I think that if the Senator from Florida would take the time to read the hearings on that point, he would agree.

Mr. HOLLAND. I thank the distinguished Senator. If I understand his statement, he feels that the present law and the present provision for interest rates should be retained, even though such retention might mean a small subsidy to the institutions of higher learning affected and might mean the lending of funds at a somewhat lower rate of interest than the Government was actually paying at the time of the making of any such loan.

Mr. SPARKMAN. Let me make it clear that I do not admit that that will happen. I think it depends altogether on a person's viewpoint. One person might just as well contend that as another. After all, the Government borrows money in many different ways.

I call the attention of the Senator from Florida to the fact that the short-term rate and the long-term rate at which the Government borrows money have moved much closer together than they formerly were. The Senator can remember when short-term money was borrowed for even less than 1 percent—merely a fraction of 1 percent—and perhaps the long-term loan was at a rate of 2½ percent, making a difference of probably 2 percent.

But there was some discussion on the floor today to the effect that the Government tried to make a short-term loan at 3⅝ percent in repayment of short-term loans that had carried a rate of 1⅝ percent.

The chances are that the Government's long-term loans will not exceed 4 percent. So the gap has been narrowed considerably.

Remember, any new interest rate would reflect the combination of those two rates, which might produce a pretty equitable situation after all.

Mr. HOLLAND. I thank the distinguished Senator. My concern about the matter has been that this might be considered a form of Federal aid, which would plunge us into the same discussion about which many of us are apprehensive when any legislation for Federal aid to schools shall reach the floor.

Mr. SPARKMAN. I do not believe there will be any difficulty. I hope that when the amendment comes before the Senate for debate some figures will be presented which will, I believe, narrow the margin a great deal.

Mr. HOLLAND. I thank the Senator. I have one more question.

Many people of my State have been considerably concerned with the item of the initial payment required of purchasers to provide family housing. They have been disturbed by the fact that the Senate bill, as reported, would not recognize the current slump in the building of family homes and the fact that the cost of building family homes has been largely increased in recent months and years, and that it would appear that it is timely for the new law to reflect some diminution in the size of the required initial payment.

May I ask the distinguished Senator from Alabama what is the thinking of his committee in that regard?

Mr. SPARKMAN. The subcommittee agreed on a scale of lower downpayments which I suggested; that is, 2 percent up to the first $12,000 and 35 percent beyond that point, which would make a very liberal program from $15,000 down.

However, the full committee decided against that and in favor of leaving the schedule as the law now is. I have heard a good bit of discussion since that time, and it is my understanding that an amendment will be offered by the distinguished Senator from Indiana [Mr. CAPEHART] which will provide for a lower downpayment along the line suggested by the administration.

When that amendment is offered, it will be my intention to offer as a substitute an amendment which will provide 3 percent on the first $10,000, 10 percent on the next $6,000, and 30 percent on all over that amount. I believe that would recognize the problem which the Senator from Florida has pointed out, and at the same time would be a fair and reasonable requirement for the downpayments. I do not think there is a very great difference between the scale I have proposed and what I understand the Senator from Indiana will offer.

Mr. HOLLAND. That would, in effect, follow the provisions of the housing bill as passed by the House in this particular regard.

Mr. SPARKMAN. It would follow it rather closely, and would not be far divergent from what the Senator from Indiana proposes to offer.

Mr. HOLLAND. It would, therefore, offer little difficulty, if any, in conference.

Mr. SPARKMAN. That is correct.

Mr. HOLLAND. I hope the Senator will go ahead with his program in the manner he has mentioned and will present such an amendment, because I think it is very close to the thinking of most of the Senators with whom I have been able to discuss the matter today, and who have been somewhat distressed over the fact that the bill as reported by the full committee did not recognize the increased cost of housing, did not recognize the great reduction in new family housing under FHA, and did not, as most of us felt, adequately meet the facts of present financial life as they have developed in recent months in this important housing program.

Mr. SPARKMAN. I thank the Senator from Florida.

Mr. LAUSCHE. Mr. President, will the Senator yield for one question?

Mr. SPARKMAN. I yield.

Mr. LAUSCHE. I realize that the Senator has been on his feet for several hours and wishes to end the discussion.

Can the Senator from Alabama state the total amount of new obligations by the various housing authorities of the Federal Government which will be approved by the bill?

Mr. SPARKMAN. The additional amount?

Mr. LAUSCHE. Yes.

Mr. SPARKMAN. If carried out as recommended by the full committee, the total would be $2,100,000,000.

Mr. LAUSCHE. That means, does it, that the Federal agencies dealing with housing would be authorized either to buy mortgages and guarantee their payment or to make direct loans in a total amount of $2,100,000,000?

Mr. SPARKMAN. That is correct.

Mr. LAUSCHE. It is my understanding that the figures show that approximately $1,350,000,000 would definitely be used. That is, from the $2,100,000,000, $750 million might not be immediately usable.

Mr. SPARKMAN. I assume the Senator is referring to the $75 million borrowing authority of FNMA.

Mr. LAUSCHE. Yes.

Mr. SPARKMAN. That is correct. Of course, that amount would be available and usable, if found necessary.

I believe it would be appropriate to remind the Senator from Ohio that of that $2,100,000,000, the only amount which would be expenditures on the part of the Federal Government—as opposed to investments or returnable funds—would be the part spent on urban renewal.

Mr. LAUSCHE. I understand that. But if all the moneys were used, the contingent liabilities of the Federal Government would be increased by $2,100,000,000, less the moneys directly expended for urban redevelopment.

Mr. SPARKMAN. That is correct.

Mr. LAUSCHE. I should like to hear the views of the Senator from Alabama concerning the impact this expanded credit buying will have on interest rates and on the cost of labor and the purchases of materials. In other words, what will be the impact upon inflation of the $2,100,000,000 of expanded credit?

Mr. SPARKMAN. Of course, I cannot state that figure; but let me answer in another way: The unfavorable impact the Senator from Ohio points out would be as nothing, when compared to the impact upon our economy if home building were stopped today in its tracks. After all, we must balance one against the other.

I am not sure whether the Senator from Ohio was present at the time; if he was not, I should like to refer him to some testimony given at the committee hearing by Mr. Goodyear, when testifying on behalf of the National Association of Home Builders. He pointed out what the drop or decrease in housing construction from the year before last to last year meant in terms of man-years

of employment. He pointed out that it meant several hundred thousand, perhaps, aside from the difference in trade, commerce, and so forth.

So, Mr. President, one must be balanced against the other.

Frankly, I do not believe it fair to charge to housing all of the inflation we hear discussed, and to make housing the whipping boy for inflation. If a great industry in the fine, industrial State the Senator from Ohio so well represents, expands its plant—as so many of the industries there have done during this year—we never read in the newspapers or hear anything to the effect that such expansion is a contribution to inflation. Instead, it is described as business expansion, prosperity, and growth of our economy. But when $2,100,000,000 is proposed to be spent for housing—assuming that all of it is spent during the next two or three years—suddenly we are confronted with the specter of inflation. However, Mr. President, how much will be spent during this year for construction? $2,100,000,000 is hardly a drop in the bucket, when compared to what is being spent this year in the Nation for construction. Yet we do not hear the word "inflation" used in connection with any part of the construction industry except the part devoted to the construction of homes for American families. I think those matters should be considered before an attempt is made to create a great scare of "inflation" in connection with the construction of homes.

Mr. MORSE. Mr. President, I should like to have the attention for a moment of the Senator from Alabama, the Senator from Pennsylvania, and the Senator from Tennessee while I comment on the bill before the Senate today.

I think the Senator from Alabama [Mr. SPARKMAN] knows that throughout the years we have served together in the Senate, I have followed his leadership on proposed housing legislation. I believe he knows that I hold in exceedingly high esteem the great record of statesmanship he has made in the field of housing measures. Let me add that, of course, his record of statesmanship is not limited to that field alone.

I want the Senator from Alabama to know that I appreciate the particular and special problems which apparently confronted him this year as a member of the subcommittee and as a member of the full committee. I intend to continue to follow his leadership, because, after all, he has been the one who has had the responsibility of attempting to bring forth the best bill he could; and from what he has said this afternoon, I know that his disappointment in his own bill is as great as mine.

I wish to say to the Senator from Pennsylvania [Mr. CLARK] that I am thoroughly familiar with his great record in the field of public housing and the great example he set in Pennsylvania; and I want him to know the enthusiasm with which I hailed the bill he introduced in the Senate, the bill for which he fought in the subcommittee, and the bill which I hope will be offered—at least for the RECORD—on the floor of the Senate, by way of an amendment to the pending bill, so as to provide an opportunity to those of us who wish to stand up and be counted for what we consider to be a sound housing measure.

Mr. President, as a Senator from a very important lumbering State, I speak this afternoon; but I wish to make clear that my remarks are not motivated solely by my great concern for the depressed condition of the lumber industry in the United States, including Oregon. I speak also because I am very much saddened by the apparent fact—although on tomorrow we shall have an opportunity to see how bad the situation is—that in the year 1957, with an economy as strong as ours, apparently the Senate of the United States is not willing to do what I believe is clearly needed in behalf of the people of the United States, namely, pass a housing bill which at least will begin to provide an answer to the needs of the people of America for a decent housing program.

The Senator from Alabama has referred to the bill as "a holding bill." Mr. President, that is a significant commentary. I think it is one of the most significant statements the Senator from Alabama has uttered all afternoon. He finds himself in a position where he has to characterize his own bill as a "holding" bill, when in 1957, we ought to be marching forward to a better way of life in America for the many people in our country who are so sorely and desperately in need of more decent housing.

Mr. GORE. Mr. President, will the Senator yield?

Mr. MORSE. I yield to the Senator from Tennessee.

Mr. GORE. Does the able senior Senator from Oregon think that the United States Senate should pass a housing bill providing for effective Government guaranty of home loans, thus placing trust in the American people's desire and need for homeownership, or does he think the Senate should pass a farcical bill with respect to effective home loans?

Mr. MORSE. I think we should pass a housing bill that justifies the trust of the American people in their Government, and not a housing bill that has the effect of misleading the American people into thinking, for example, that they are getting a $10,000 mortgage, and $10,000 with which to borrow toward that mortgage, only to find that they are stuck with a 10-percent discount.

Let me say to the Senator from Tennessee I am very proud of the statement he made this afternoon and the position he took on the floor of the Senate. I would be delighted to be one of the cosponsors of the amendment, which he has assured the Senate will be drafted overnight and which will seek to come to grips with the problem, which, in a very real sense, I think does a great injustice to borrowers, because it misleads them. In my judgment, the Government itself cannot eliminate itself as a sort of coconspirator in a cheating arrangement, when it tolerates the 10-percent discount procedure.

Mr. GORE. Mr. President, will the Senator yield further?

Mr. MORSE. I yield.

Mr. GORE. Is the Senator aware of any losses on the part of the United States Government over the period of twenty-some-odd years in which it has placed its trust upon the desire and need of the American people for homeownership?

Mr. MORSE. I know of no such record of losses. I think it is a remarkable record that has been made in regard to the Government housing program.

Mr. GORE. Does he think that the Government of the United States would run any real risk of loss by providing an effective guaranty of home loans at 4½ percent interest?

Mr. MORSE. I am sure not.

Mr. GORE. Could such a program possibly be regarded as a wasteful commitment by the Government, or should it be treated as an expenditure, so to speak, "down the rathole"?

Mr. MORSE. I think that is exactly the program we should adopt.

Mr. GORE. Would it not, in fact, be using the power and the credit of the Government of the United States to build that which is basic to democracy and free society, namely, homeownership and a decent place for a family to live and rear children?

Mr. MORSE. It is the ideal on which I intend to bottom my remarks this afternoon.

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. MORSE. No, Mr. President; I decline to yield to the Senator from Indiana.

Mr. President, I desire to talk this afternoon to a point which involves a great ideal of democracy. It deals with the relationship of the State to the welfare of its people. We are about to enter the month of June, which has come to take on a very interesting social symbolism in America. Of all the months, it has come to be known as the month of marriage. I think it is true that probably more marriages take place in the month of June than take place in any other 2 months of the year. It is when so many thousands of our young people give consideration to the sacred trust of homeowning and homemaking.

As we consider this housing bill, it would be well for us to ponder a little on the significant meaning of the marriage institution to the strength of American democracy, because I would say, Mr. President, that the greatest security of American democracy is to be found in private home ownership. I believe that we strike a blow at the very strength of our democratic institutions whenever we throw barricades and inhibitions in the path of home building and home making in America. So I want to express my keen disappointment once again that, in a piece of proposed legislation characterized by the chairman of the subcommittee as holding legislation, we are not living up to what I consider to be our clear moral responsibility to the institution of marriage and homemaking in America.

I would have the Senate reflect for a few moments on the young people of America, and what the opportunity to buy a home at reasonable interest rates, at reasonable mortgage cost, means to the future of America. I am not the least bit moved by such scarecrow argu-

ments that if the Government provides a larger amount of money to pick up mortgages in those instances where selfish and predatory business interests seek to capitalize and profiteer at the expense of the young couples of America by a 10 percent discount, we will be taking America down the road to socialism. Tell it to the young people. I think that when the thousands of young couples, the homemakers of America, come to analyze some of the arguments being made against a more adequate housing program, they will register in their minds a little notation to remember when they come to fulfill their citizenship obligations at the voting booths of America.

So, Mr. President, I make a plea for and I shall support amendments which I understand and hope will be offered, along the line of the bill presented by the Senator from Pennsylvania [Mr. CLARK], in the subcommittee, which will increase the home-building program possible under the proposed legislation.

I wish to speak next about the problem of public housing. I have been discussing, up to now, the private home and the young people of America who wish to start their home building and their homemaking in a home of their own. I wish to say something now, Mr. President, about public housing.

I deeply regret that this bill is so inadequate in regard to public housing. Here we are in the Capital City of the Nation. The Senator from Pennsylvania made a study with the Senator from Oregon, not so many weeks ago, of the deplorable housing conditions in the District of Columbia. I do not speak for the Senator from Pennsylvania, but I wish to say that I do not think he would contradict my observation that we could proceed next year with a public housing program of a minimum of from 2,000 to 3,000 units, in the District of Columbia, and we would not begin to scratch the surface of the housing needs that cry out for attention in the Nation's Capital.

Mr. CLARK. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. GORE in the chair). Does the Senator from Oregon yield to the Senator from Pennsylvania?

Mr. MORSE. I yield to the Senator from Pennsylvania.

Mr. CLARK. I should like to associate myself with the remarks made by the distinguished senior Senator from Oregon with respect to the District of Columbia. I had the privilege of serving on the subcommittee which conducted a study with respect to the hungry children of the District of Columbia, of which the Senator from Oregon was the chairman. Together we made a tour through the slum and depressed areas of the Nation's Capital, some of them within seeing distance of the Capitol itself. The conditions are shameful. I know if all the Senators were to go on such a tour, the compassion in their hearts would lead them to do something about the situation.

The conditions in the District of Columbia are multiplied all over the United States in every great and small city. There is a minimum requirement today for 200,000 additional public housing units a year, and need for an administration which will carry through and put these units into effect without redtape, with some compassion, and with a desire to do something to relieve human misery and save the cities of the United States from destruction.

But I say to the senior Senator from Oregon, with sorrow in my soul, we do not have the votes.

Mr. MORSE. I wish to thank the Senator from Pennsylvania for his contribution to my speech. I completely agree with him. I am saddened by the fact that apparently in this session of Congress there is not among our colleagues the appreciation which I think there should be of this great social need. There is not a full recognition of what I consider to be a great moral obligation that rests upon us to come to the housing assistance of more unfortunately situated fellow Americans.

Last weekend, Mr. President, I spent some time in New York City. Over a 3-hour period I was taken on a tour of some of the great public housing projects of New York City. Seeing is believing, Mr. President. All one has to do is to see the great social improvements which have resulted from those great public-housing projects to know, as I am convinced is true, that the taxpayers' money was well spent in those great projects.

In fact, Mr. President, I am satisfied that if we wished to figure out in terms of dollars and cents what has been done, the economic benefits to the American people from these public-housing projects far exceed—many, many times over—the taxpayers' investments in the projects. That is true from the standpoint of health, from the standpoint of the reduction in crime, and from the standpoint of doing the decent, humane, kindly, Christian thing for fellow Americans who are living in squalor and unfortunate conditions, and are less fortunately situated than the rest of us.

Mr. President, I am never going to retreat from nor am I going to ignore what I consider to be the primary obligation of legislative bodies of a democracy, and that is to use the instrumentality of government to promote the welfare of people, whenever Government can come to the assistance of those less fortunately situated. I am not going to be repelled from that ideal, Mr. President, by cries about expense, cries about "creeping socialism," and cries, Mr. President, to the effect that it would put the Government into the housing business. To the contrary, I am satisfied when we fight for such great public causes as a public housing bill we are fighting to strengthen democracy, and we are fighting to strengthen the very system of private property, on the basis of which our so-called free enterprise system exists. If we have a country with increasing numbers of people living in squalor, poverty, and crime, we better watch out for our system, because finally those people will feel they have had all they can take, and then we shall have the basis of great social and political discord foisted upon the body politic.

Mr. CLARK. Mr. President, will the Senator yield briefly?

Mr. MORSE. I yield to the Senator from Pennsylvania.

Mr. CLARK. I hope the Senator from Oregon will include among the cries which do not impress him the cry that this bill is going to bring on a great inflation, which we should move away from with fear and trembling. I am sure that my colleague, the Senator from Oregon, realizes as well as I do that this bill, far from being inflationary—and if it were, even to the extent it is claimed, it would be to such a minor exent that no one would be able to realize it—on the contrary is counterinflationary, because the bill, if enacted into law, will bring down the cost of housing, which is responsible more than any one other thing for the increase in the cost of living since 1947 to 1949.

Mr. MORSE. I am glad the Senator raised the point. I was coming to that. It was my fourth point. I shall make it my third point.

Mr. President, the Senator from Pennsylvania has made my argument on the point. I think the housing program for which he and I stand is anti-inflationary. In fact, I do not fall for a lot of the fallacious economic arguments which I have heard on the floor of the Senate, and which I have read elsewhere, about the so-called existing danger of inflation. In my judgment, one does not create an inflation when in the first instance there is not a scarce production of consumer goods, but an abundant production of consumer goods. We have an abundant production of consumer goods at the present time. When one is confronted with that situation, Mr. President, then one ought to do what he can to promote wealth-creating projects which will help utilize the production of consumer goods. When we produce better homes and more stable families, with the resulting better earning power on the part of the families, in my judgment the result is anti-inflationary. We bring about inflation when there is a "bogging down" in the economy as a result of tens of thousands of people living in the kind of housing conditions we are trying to remedy.

Mr. President, we do not have an inflationary problem when we have a program of prosperity that is uniform throughout our citizenry. In part, the so-called inflationary problem that exists today is due to the great disjointure in the matter of the so-called prosperity, between and among the economic classes in America. That was brought out, I thought, so well earlier this afternoon by the Senator from Minnesota [Mr. HUMPHREY] that I shall not repeat it at this late hour.

I come now to my fourth point, Mr. President. I was very much interested in the discussion of the Senator from Alabama about housing in connection with the colleges of America. I wish to use the most kindly descriptive word, in answer to the argument that I heard again this afternoon, and that we always hear, the "bugaboo" argument about the fact that it might give rise to Federal aid to higher education. I reply to the argument by saying, "That is music to Russian ears."

As a member of the Foreign Relations Committee, let me say again and I think the greatest foreign policy need of America at the present time is to proceed to do something to raise the educational standards and the educational opportunities for American boys and girls, because Russia is outpacing us and outracing us. We must keep ahead of Russia in brain power, and we are not doing it.

That story needs to be told over and over and over again across America, because there are those who are seeking to scare the American people into thinking that when we propose aid to higher educational institutions we are taking America down some dangerous path, when what we are doing is proposing that before it is too late, the Federal Government proceed to spend some tax dollars for educational facilities in America, so that we can keep ahead of Russia in the 100 years' war which lies ahead. I think the expenditure of tax dollars for school facilities in America, and to help provide better housing conditions for higher educational institutions in America is a great need of defense in America, and a great need in American foreign policy.

Have we so little confidence in our system of checks and balances that we think we cannot write a law providing for Federal assistance in public housing, for better classrooms, and better laboratories for the institutions of higher learning in America, and still guarantee the operation, control, and determination of educational policy of those institutions by the institutions themselves, or, if they are State institutions, by the States?

Of course we can do it. I do not think we should try to put on political sheets and hobgoblin attires and scare the American people, as some politicians are trying to do in the entire field of Federal aid to education. I think the future of our country sorely demands that we rise to this obligation now, in connection with this bill, may I say to the Senator from Alabama. I think at least an opportunity should be given for Senators who wish to vote for a more adequate educational provision in this bill to vote for it.

This is only one facet of the educational problem which confronts us, but it is an important facet. These institutions of higher learning, both public and private—and I favor assistance to private institutions as well as public institutions, so far as so-called college public housing is concerned—are great arsenals of democracy in the fight against world communism in the 100 years which lie ahead. They are great intellectual defense establishments in the great battle for freedom in the hundred years' war ahead, between the two ideologies of totalitarianism, on the one hand, as represented by communism, and freedom, on the other, as represented by our democratic processes.

I am convinced that, as the American taxpayers come to understand and comprehend this problem, they will support those of us who are urging that this bill include more liberal and lenient provisions in regard to college housing.

I close with my last point, by saying that, as a Senator from Oregon, I speak out today pleading for recognition of a public housing program to bring relief to the lumber industry of America. The depressed condition in the lumber industry is not limited to my State. It is typical of the condition across America, for the reason that construction is down. With construction down, the lumber industry is down.

As I speak today, I understand that it is still true that the highest unemployment rates in America are in my State. The reason the highest unemployment rates in America are still in my State—though we should now be out of the annual seasonal slump which hits the lumber industry ordinarily in the winter season—is that that period is extended this year because the market for lumber is down, and it is down because housing construction is down.

I now read into the RECORD, with a comment or two on some of them, some telegrams and letters which I have received in connection with this problem.

ROSEBURG, OREG., *May 22, 1957.*
Hon. WAYNE MORSE,
United States Senate,
Washington, D. C.:

Anything you can do to push liberalized FHA program will be appreciated.

HUB LUMBER CO.
CHARLES TEAGUE.

EUGENE, OREG., *May 22, 1957.*
Hon. WAYNE L. MORSE,
United States Senate,
Washington, D. C.:

We urge that you support a liberalized FHA program as embodied in Senator SPARKMAN's subcommittee bill and Senator SMATHERS' FHA bill (S. 1898). You no doubt are aware of the serious condition of the lumber market today, any relief will in large measure depend upon the passage of SMATHERS' or SPARKMAN's amendments.

AIP-O-LOG VENEER, INC.,
ZIP-O-LOG MILLS,
GEO. A. CAMPBELL,
President and Partner.

PORTLAND, OREG., *May 21, 1957.*
Senator WAYNE MORSE,
Senate Office Building,
Washington, D. C.:

I understand the Senate committee rejected any reduction in FHA downpayments and cut FNMA. Home building is at a standstill in Oregon and have slowed down drastically in entire Nation. Consequently Oregon lumber industry hurting badly, thus crippling entire Oregon economy. What has the Senate got against Oregon and the lumber industry? FHA is self-supporting. Why is the Senate antagonistic to home building?

JOHN G. CLARK, *Realtor.*

PORTLAND, OREG., *May 21, 1957.*
Hon. WAYNE MORSE,
Senate Office Building,
Washington, D. C.:

We sincerely urge your support of more liberal downpayment schedule on FHA. This should help home building and many industries allied, especially lumber.

PORTLAND HOME BUILDERS ASSOCIATION,
ROBERT L. KING,
Executive Secretary.

PORTLAND, OREG., *May 21, 1957.*
Senator WAYNE MORSE,
Senate Office Building,
Washington, D. C.:

Request utmost support reduction FHA downpayment. Future of home building industry at stake.

LEO C. RUSH, *Builder.*

I read these telegrams because I think they argue more eloquently than any Senator could on the issues before us, as presented by the pending bill.

I read next a letter from Robert M. Knox, of Gold Beach, Oreg.

GOLD BEACH, OREG., *May 16, 1957.*
Hon. WAYNE L. MORSE,
United States Senate,
Washington, D. C.

DEAR SENATOR MORSE: According to an Associated Press report in the May 15 Oregonian, the Senate Banking Subcommittee approved a bill authorizing some reduction in downpayments under FHA. It provides for a 2-percent downpayment on the first $12,000 and 35 percent in the portion above $12,000. We hope that you can get early introduction and passage of this bill.

As you already know, Curry has the most rapid growth of any county in Oregon. Lumber workers are moving in from areas where the timber supply is exhausted. Even though they owned homes they are unable to sell or realize any returns for their investment or savings. As a result many live in trailers or pay exorbitant rent. The housing standards are very low. Under these conditions housing is badly needed. We are trying to organize a housing project to meet this situation. All previous attempts have been discouraged by the financial barrier or standards incompatible with our needs. The early passage of this bill would be of great benefit. Please keep us advised of progress.

Yours very truly,

ROBERT M. KNOX.

A telegram from Leo P. Hoffard, Incorporated, of Portland Oreg.:

The Senate Banking Committee has rejected lowering FHA down payments and reduced FNMA funds which is our life blood of homebuilding and lumber industries. It is very critical at the present time and if no assistance is forthcoming the west is in for a real depression. Any assistance you can give this matter would be greatly appreciated.

A telegram from the B. F. Johnson Lumber Co., of Portland, Oreg.:

MAY 27, 1957.

Urge that when considering omnibus housing bill please vote for reduction in downpayment on FHA housing.

A telegram from Jack C. Nunn, home builder:

MAY 20, 1957.

FHA downpayment reduction vital to home building industry. Urgently request your support enactment of reduction. Local home building down 35 percent middle of building season due to heavy downpayment.

A telegram from A. L. Buchner, president, Portland Mortgage Bankers Association:

MAY 22, 1957.

Urge vigorous support of housing legislation to effect reduction in FHA downpayments. Legislation imperative for welfare of lumber building mortgage banking and real estate industries and general economic welfare of State and Nation.

A telegram from Loyal A. Whitney, national director, Salem Home Builders Association, Salem, Oreg.:

MAY 23, 1957.

Urgently request support for FHA downpayment reduction. Home building industry in this area greatly in need of lower downpayment requirements.

A telegram from S. H. & W. Lumber Co., of Grants Pass, Oreg.:

MAY 22, 1957.

We strongly urge your support of a liberal FHA program as embodied in Senator SPARKMAN'S subcommittee bill and Senator SMATHERS' FHA bill, S. 1898.

A telegram from Bornwn Bros. Lumber Co., of Grants Pass, Oreg.:

Urgently request your favorable support of liberalized FHA program as embodied in Senator SPARKMAN'S subcommittee bill and Senator SMATHERS' FHA bill, S. 1898.

A telegram from Herbert Dalke, president of Home Builders Association of Salem, Oreg.:

Urgently request support of FHA downpayment reduction. Home building industry in this area in great need of lower downpayment requirements.

A telegram from L. L. Yeager McKenzie River Lumber Co., Douglas Orme, Bethel Planing Co., Charles Kitchell, O. & C. Lumber Co., Verne McQuire, and Raymac Lumber Co.:

The lumber business in general and the whole economy of our area is in dire need of a liberalized FHA program. We solicit your cooperation and urge your full support of the amendment embodied in Senator SPARKMAN'S subcommittee bill and Senator SMATHERS' FHA bill, S. 1898.

A telegram from D. R. Johnson Lumber Co., Riddle, Oreg.:

Re: FHA bill No. S. 1898.

Due to present slump in lumber market it is imperative this bill be passed as it seems to be the only release we will receive in the near future. Passage of this bill alone could bring release to every industry in this area.

A telegram from Joseph W. McCracken, executive vice president of the Western Forest Industries Association:

Western Forest Industries Association very disturbed over Senate Banking and Currency Committee's 1957 housing bill. Full committee turned down liberalization of FHA program and reduced FNMA mortgage-purchase authority by $750 million.

I have been urging our membership to defer decisions to permanently shut down their lumber operations until after Congress has passed the 1957 housing bill. We have based our advice on a hoped-for liberalization of the housing program with a consequent pick-up in housing starts and finally an increase in the presently depressed lumber market.

Sincerely concerned that full Senate ratification of Banking Committee bill next week will lead to another wave of lumber and plywood mill closures. Many millowners will close that have been in continuous operation for over 20 years. In past few months 126 mills have already shut their doors in Oregon alone.

We are told a liberal housing bill may be inflationary at this time. You are better able to judge this than we. However we are disturbed that in the guise of preventing inflation our industry along with the home-building industry is being singled out for a temporary depression while other industries are experiencing record prosperity.

We are in a position to predict the result of a continued depression in the lumber industry which would result from the failure to liberalize the Federal housing programs. Hundreds of medium sized and smaller operating units will go out of business permanently. Then when the housing spigot is turned back on some day, this industry will consist in large measure of only the largest operations. The small lumberman will be gone and the vitality which he has provided will also be gone. The Government is now concerned about mergers and large-sized units in our industry. Nothing imaginable will contribute more to this trend toward bigness than the failure to liberalize Federal housing programs in this session of Congress.

We understand the Senate will debate the housing bill next Monday. We urge your support of any amendments to the Banking Committee's bill which will liberalize the FHA program and restore to FNMA the $750 million for mortgage purchase.

Our association has been in continuous operation since 1944. We are composed of over 100 medium-sized and small sawmill manufacturers doing business in Oregon, Washington, California, and Montana.

Sincerely.

I may say that Mr. McCracken is, in my judgment, one of the keenest students of the lumber economy of the Pacific Northwest. In fact, many of the men whose telegrams and letters I have read into the RECORD I know intimately and personally. They are leaders in my State. They are responsible businessmen in the lumber industry. They enjoy the finest reputations. Many of them, incidentally, are Republicans. That has nothing to do with it, so far as the service of the Senator from Oregon is concerned. I owe them every effort I can make to try to get the Senate to understand the seriousness of the economic situation in the Pacific Northwest, and to pass a housing bill which will give an economic shot in the arm to the construction industry so that this very much needed and vitally important segment of our economy will not be thrown into a deeper depression than that which the telegrams and letters show it is already suffering.

I have a telegram from J. C. Baxter, secretary, Wilbur Lumber Co.:

Urge that you do all possible to push Senator SPARKMAN'S and Senator SMATHERS' improvement of FHA program.

Respectfully,

A telegram from Albert Fonder, president, Mayor's Advisory Council on Urban Renewal, Portland:

Urge your support H. R. 6657, reducing local share of urban renewal to one-fourth. Prospect for south auditorium project now being planned in Portland very dim unless local share can be decreased. Success of needed future project hinges on fate of south auditorium.

That is a specific project which deals with the social problem to which I addressed myself earlier in my remarks, and to which the Senator from Pennsylvania [Mr. CLARK] called the attention of the Senate. This is the kind of social service we ought to be rendering. This is the kind of program we ought to be supporting, in order to carry out what I have always thought were the great ideals of a democratic society which should seek to protect and help the more unfortunate brethren and to curb the exploitation of the weak by the strong.

Much can be said about the philosophy of the opposition to a more adequate housing program. It represents the attitude of the selfish interests that consider it is all right for them to take advantage of the economically weak. My plea is that it is the duty of Congress to take such steps as the Senator from Tennessee [Mr. GORE] suggested this afternoon, to protect the economically weak from the selfishness of the economically strong.

A telegram from Jack Harford, mayor of the city of Arlington, Oreg.:

We urged your help and influence on bill H. R. 6659. The city of Arlington is dependent on the passing of this legislation. We thank you again for helping us in our problems and trust that you will reserve a favorable vote on this bill.

I now read a letter I have received from Mr. William H. Hartzell, manager of the Builder Division, Hotpoint Appliance Sales Co., of Portland, Oreg.:

HOTPOINT APPLIANCE SALES CO.,
Portland, Oreg., May 22, 1957.

Senator WAYNE MORSE,
United States Senate Office Building,
Washington, D. C.

DEAR SENATOR: As a member of the appliance distributors and as a direct supplier to the home building industry, I wish to take this opportunity to urge you to vote for a reduction in FHA downpayments. As you know the home building industry has been curtailed drastically by tight money and disappearance of low-interest financing. I feel that if FHA downpayments are lowered as advised by the House committee and more funds are allocated to FNMA, the home building industry will carry on with no disastrous results. However, if no such course is taken, home building will continue to decline and thousands of employees supported by the many suppliers and subcontractors will lose their positions.

Again, I urge you to consider carefully your vote on this very important issue.

Very sincerely,

WILLIAM A. HARTZELL,
Manager, Builder Division,
Hotpoint Appliance Sales Co.

I have read this, Mr. President, because it is a letter received not from the lumber industry itself, but from one of the subsidiary or service industries, dependent for its economic strength upon home construction—the home appliance industry. Mr. Hartzell is pointing out what is happening to industry.

That is the way what is happening ripples out in our economy. When the mills start to go down the employees are deprived of work, in a few months we see the signs "For lease" appearing in the stores of the main streets of our lumber towns; or we see the signs reading "Going out of business—50 percent discount on all goods." That is what happens, Mr. President, when the vicious depression spiral starts.

Lastly, I wish to read a letter I have received from Mr. George S. Goodyear, president of the National Association of Home Builders. The present Presiding Officer, the distinguished Senator from Alabama [Mr. SPARKMAN], referred to him earlier in the debate. Mr. Goodyear in his letter to me says:

NATIONAL ASSOCIATION OF
HOME BUILDERS,
Washington, D. C., May 24, 1957.

The Honorable WAYNE MORSE,
Senate Office Building,
Washington, D. C.

DEAR SENATOR MORSE: Within the next few days you will be acting upon the housing amendments of 1957 (H. R. 6659). May I urge that you give every favorable consideration to the need for lower FHA downpayments.

The Senate Banking Committee bill contains no change in the present statutory

requirements for FHA downpayments. We believe this is a serious omission, adverse to the best interests of the national economy. Already there has been a drastic decline in housing starts under the FHA–VA financing programs. Insofar as the GI loan guaranty program is concerned, this is bound to continue because of the fixed 4½-percent interest rate which is unattractive to investors. Therefore, if the present downward trend in production is to be reversed, and if the average home-buying families are to be able to purchase new homes, there is a vital need for a substantial reduction in the present statutory minimum FHA downpayments.

I am enclosing a reprinted editorial from the American Builder magazine which provides a pertinent capsule picture of current and prospective national housing needs. Private industry is anxious to meet these goals. But as mentioned in the enclosed article, basic changes in the Nation's housing laws are necessary, in particular a reduction in the current FHA required downpayments. I hope this will be helpful to you in understanding the industry's vital interest in this matter and I urge your support for a substantial reduction in the current required FHA downpayments.

Sincerely,

GEORGE S. GOODYEAR,
President.

Mr. President, I ask unanimous consent that excerpts from the editorial also be printed as a part of my remarks.

There being no objection, the excerpts from the editorial were ordered to be printed in the RECORD, as follows:

SET YOUR SIGHTS: 2 MILLION HOMES A YEAR IS THIS INDUSTRY'S GOAL

Builders are breathing fire and fury at the attitude of the administration and of many bankers and businessmen that there's really nothing very serious about letting home building dwindle and dawdle along at 800,000 to 900,000 units a year.

Why is it, they ask, that home building is sharply off from recent years while every other segment of the United States economy is operating at top production?

Is it because we are overbuilt, overpriced, or unable to construct the kind of homes Americans want? The answer obviously is "No" on all points.

The basic reason, American Builder believes, is a whooping underestimate of the real need of the American public for more and better houses. To speak of 800,000 or 900,000 houses a year as enough for our dynamic, growing, prosperous and home-hungry population is to ignore every sound recent study, including that of the President's own housing committee.

Bottling up our dynamic industry at these horse-and-buggy levels is a slap in the face to American enterprise and ingenuity.

Home building is not a postponable item, to be turned on or off at will to offset fluctuations of the economy. Nor is it any more inflationary than other industries—such as automobile building—that create jobs and provide needed goods. New homes are a vital need of our people, and we should have a vigorous national housing policy based on that need.

Right now, this year we should be building at least 1,200,000 houses just to keep up with family formations and demolitions. By 1960 the need will rise to 1,500,000. And by 1975 our housing requirements rise to 2 million units a year.

Constructive, long-range legislation should be enacted by Congress at once to permit and encourage building at these levels which are conservative in terms of population growth, movement, and wealth. Low downpayments, 30-year loans, a central mortgage bank to encourage the free flow of funds should be established. And the fixing of interest rates at unworkable levels by law or Government bureau should be abolished.

Again we say, let's raise our sights. We need a housing policy and housing legislation with a goal of 2 million homes a year.

American Builder recommends complete overhaul of housing legislation to:

1. Lower FHA downpayments as stipulated in Smathers bill, so as to start at 2 percent of first $10,000 of purchase price.

2. Provide a competitive, flexible controlled FHA interest rate—realistic and geared to the money supply. For example, the interest rates to the yield of long-term Government bonds.

3. Lower the FHA insurance premium.

4. Increase the maximum FHA mortgage to $25,000.

5. Immediately increase VA-mortgage interest rate to 5 percent.

6. Immediately increase Treasury-held FNMA stock to expand FNMA's buying power.

7. Encourage investment in home mortgages by new sources of credit such as pension, union, and trust-fund investors. One way, for example, might be by means of FHA's new plan to sell FHA-insured mortgages for resale in participation certificates in units of $1,000 and up. Establish a central mortgage bank to lend money to builders and others who put up Government-backed mortgages.

8. Make it legal for builders to pass along to the buyer the discount he must pay to lenders while money is tight because of noncompetitive interests rates.

9. Pave the way for a program to make suitable land and facilities available to builders. The President might call a "White House conference" of Federal, State, and local officials, as urged by NAHB, to dramatize the needs and outline how to (1) provide these community facilities, and (2) reexamine local tax structures with a view toward making it practical to build more homes at reasonable prices.

Mr. MORSE. Mr. President, I close the debate for today with the plea that consideration be given to the ideals of democracy to which I alluded in my earlier remarks. I would have the Senate remember that as the thousands and thousands of young couples in the weeks ahead take their marriage vows, they are willing to make a great investment in America's freedom—the private home. I think we have a grave obligation, as a Government, to take the legislative steps necessary to protect those young couples from the kind of high interest rate and discount procedures which have been discussed by other speakers in the debate earlier this afternoon.

Mr. CAPEHART subsequently said: Mr. President, I ask unanimous consent that the remarks I am about to make be printed in the RECORD following the remarks of the Senator from Oregon [Mr. MORSE] inasmuch as I wish to answer very briefly some of the statements he made.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CAPEHART. First, Mr. President, let me say that the Senator from Oregon said that the young couples will pay a 10-percent discount. Let the RECORD show that although there may be a 10-percent discount in some cases, they will be the exception, rather than the rule. Furthermore, the FHA and the Veterans' Administration set the prices of the houses; and the 10-percent discount—if there is one—or the 6-percent or 7-percent discount will be charged to the builders, not to the young couples. The builders, not the young couples, will pay the discount.

The Senator from Oregon was tilting with windmills when he discussed the provisions in regard to college housing. So far as I know—and I believe I am correct—the bill contains all the provisions desired by anyone in respect to college housing. We included in the bill the amount desired for that purpose. We did not provide for an increase in the interest rates. I know of nothing requested by anyone in respect to college housing that we did not provide for in the bill.

Mr. President, in line with the tilting with windmills which the Senator from Oregon is always doing and his lack of knowledge is his statement that the committee voted to reduce by $750 million the FNMA commitment. The fact is that we voted to increase it—not reduce it—by $750 million.

So I simply rise to correct the RECORD, and to show that—as usual—the Senator from Oregon is tilting with windwills, and is setting up straw men of his own, and then is trying to knock them down, rather than to deal with the situation as it exists and deal with the record and the facts as we who understand the housing bill and we who have lived with it for days and days know it to be.

I wish to say only a word about the discounts. Frankly, I have no objection to having the Senate pass a bill providing that the FNMA must buy mortgages at 100 percent of par. I am willing to go along with such a proposal. Unfortunately, those who will not go along with it are the builders themselves, because they know that the Congress will vote only a limited amount of money for the FNMA; and they know that if they buy the mortgages at par, it will be only a few days before all the funds will be used up, and then they will have to sit there for 11 months without any money.

So I rather think I shall vote against having the FNMA buy the mortgages at par, because both the FNMA and the builders will be opposed to that. That is not the purpose of the FNMA. Its purpose is to protect the market and to help the market over a period of 12 months absorb the shock. However, if the Congress wishes to have the FNMA buy the mortgages at par, that will be perfectly agreeable with me. On the other hand, those who will be opposed to it and those who will be hurt as a result of it will be the builders themselves and those dealing in mortgages.

So I wish to straighten out the record, particularly in respect to those who really do not know what the bill contains.

Mr. HUMPHREY. Mr. President, I wish to say that I felt that the address of the Senator from Oregon was an excellent one, and that he expressed a philosophy relating to housing and Government assistance in housing which should be concurred in by the Congress of the United States; and I believe that he has performed a great service for the cause of housing in the United States.

Mr. CAPEHART. Mr. President, I wish the RECORD to show that I think the Senator from Oregon did the housing industry a disservice. I think he was

talking about what eventually will be called socialized housing, meaning an attempt to have the Government take over the housing business in the United States.
